Ensure that LDOL receives the resources and assistance needed to implement effective and efficient collection methods to recover overpaid benefits from their claimants.

The ETA Dallas Regional Office has also provided technical assistance to the LDOL concerning its benefit overpayment recovery efforts. It sanctioned the LDOL plan to use the Louisiana Attorney General's Office to assist in this effort.

Encourage the states to use the UIPL 01-04 option of suspending payments while eligibility determinations are pending.

UIPL 04-01 permits states to withhold/suspend UI benefit payments while a potential eligibility issue is resolved only when that issue can be resolved on a timely basis. Federal guidelines define "timely" as 14 days from the date an issue is identified. Judicial interpretation of Federal UC law prohibits states from suspending payments indefinitely while such issues are resolved. Data matches against the NDNH only indicate a "possible" overpayment. States must verify the week(s) in which wages were earned to determine whether an overpayment exists or not, and some overpayments will occur while these investigations are underway. The Computer Matching Agreement between the Department of Health and Human Services and the states specifies that states shall not suspend payment or take any adverse action against individuals until the NDNH information is verified. The ETA Dallas Regional Office will monitor the states' adherence to this guidance.
