**Category:** Mandatory Data Elements for T0022 and T0028

**Component:** CVISN Architecture and Standards

**Synopsis:** Volpe is reviewing the mandatory data elements in T0022 to see if there is a need to change some of the optional fields to mandatory so they provide meaningful information to the states.

Summary: The vehicle registration data currently in SAFER comes from three kinds of input: PRISM PVF file, CVISN EDI input, and XML T0022 transaction. Although the processing logic of XML, EDI and PVF data files are similar, the required data elements are different. Some of the mandatory fields are commonly required by all three data submissions, and others are only mandatory for one source but not for the other sources.

Proposal: Data elements in XML T0022 transaction will be made mandatory, conditional mandatory, or optional as indicated in the attached table.

**Status:** Recommended

**CR Number:** 2936

**Category:** New data element needed

**Component:** CVISN Architecture and Standards

**Synopsis:** A source, other than the authoritative source, may submit e-screening enrollment data to SAFER. States requested a data element to track the source of the transponder data.

Summary: Any state can update e-screening information (XML T0024). States do not object to an unauthorized state submitting transponder information for another state, as long as the vehicle registration data is not affected.

Proposal: Add a data element to track the source of the transponder data.

Proposal: The XML delete transactions will be implemented in accordance with the requirements expressed in this CR.

**CR Number:** 2933

**External Reference:** SAFER CR 124

**Category:** Changes to SAFER-CVIEW interface for REVIEW\_REASON\_NOT\_RATED

**Component:** SAFER/MCMIS, SAFER/CVIEW

**Synopsis:** New values for REVIEW\_REASON\_NOT\_RATED are in the carrier data received by SAFER from MCMIS.

Summary: Since the FMCSA-sponsored CVIEW will not accept the new values, Volpe has implemented a workaround to change the values.

Proposal:  
The CVISN states change their CVIEW to accept the new values so that the data in their CVIEW databases will be consistent with the data displayed on the SAFER web site. A schema change will be required; the transaction T0031 will be versioned to T0031V2 and will be available in the January 2005 release of SAFER.

**Category:** SAFER Web services

**Component:** SAFER

**Synopsis:** Add T0032 (Licensing and Insurance Output Transaction) to the SAFER Web services capabilities.

Summary: Implementation of a web service capability is in beta testing for several XML transactions. This capability is expected to be available in SAFER 4.6 due to be released in September, 2004.

Proposal: Add T0032 to the SAFER Web services capabilities.

**CR Number:** 2798

**External Reference:** DJ Waddell - MD - 240-228-5878

**Category:** Business rules/process to clarify data source

**Component:** SAFER/CVIEW

**Synopsis:** Synopsis: Data integrity issues are resulting from a source, other than the authoritative source, submitting vehicle registration data to SAFER.

Summary: A source other than the authoritative source can submit vehicle registration data to SAFER. If the authoritative source later updates the information, the data already in SAFER may be overwritten. Business rules/process need to be established (a) to clarify the source of data and (b) to coordinate data entry/update by authoritative source and authorized but not 'authoritative' source.

Proposal: The proposal consists of several clauses.

1. A state (in most cases, a "non-participating" state) may authorize another state to send vehicle registration data to SAFER on its behalf; this must be documented by letter/email. Letter/email will also be required to withdraw the authorization.
2. A new table in SAFER will be created to keep track of which states are authorized to send vehicle registration data to SAFER for any given state. The default would be that only the IRP base state would be authorized to send vehicle registration data to SAFER.
3. Volpe will consider whether the new table is also the appropriate place to store contact information.
4. If a state that is not authorized according to the process attempts to send vehicle

registration data (XML T0020, T0021, or T0022) for another state to SAFER, the XML transactions will be rejected and the IRP base state will be notified that an unauthorized state has attempted to send vehicle registration data on its behalf.

5. The REGISTRATION\_START\_DATE will be a mandatory field and REGISTRATION\_EXPIRE\_DATE will be a conditionally mandatory field in the vehicle registration data.

6. The table will be posted in some form on the CVISN website.

**Status:** Recommended

**CR Number:** 2638

**External Reference:** Volpe CR 101

**Category:** CVISN Architecture and Standards

**Component:** SAFER/CVIEW, SAFER/PRISM

**Synopsis:** Enhance T0022 transaction to allow states to submit temporary authority vehicles to SAFER.

Summary: The SAFER XML service requires that the license plate/state be unique for vehicle records submitted via the T0022 input transaction. This CR requests that SAFER allow states to submit non-unique license plate/state and that SAFER would modify the data to produce a unique code (example: "TEMP + last 6 digits of VIN").

Proposal: States participating in recent ACCB meetings have recommended that this CR be disapproved. States should change their CVIEW or equivalent system so that the license plate/state submitted in a T0022 input transaction to SAFER is unique. SAFER should not modify data received by the state to create unique license plate/state.

**Category:** Database and XML schemas

**Component:** SAFER/CVIEW

**Synopsis:** Add account balance information to the CARRIER\_IFTA and CARRIER\_IRP tables in the current CVIEW database.

Summary: Utah proposed a change to XML transactions T0019 and T0020 to add fields of interest only to Utah for data exchange among systems within the state. The discussion at the ACCB meeting led to the more general question of providing the capability in XML transactions to carry state-specific data. States indicated interest in this capability, as long as they don't have to change their processing if they are not using the feature.

Proposal: Volpe will pursue the idea of adding a section to an XML schema to allow state custom data to be optionally carried in an XML transaction; this section would be ignored by SAFER and not passed on to other States.

Summary: Since the FMCSA-sponsored CVIEW will not accept the new values, Volpe has implemented a workaround to change the values or not send records that would be rejected.

Proposal:

**Category:** Need for permit snapshots

**Component:** CVISN Architecture and Standards

**Synopsis:** Since SAFER was originally developed in contained a capability to process carrier and vehicle permit data in an "assumed" form and data content. To this date, no organization or application has ever sent permit data - of any kind - to SAFER. We do not know if the original software and EDI design is correct or at all useful. At this point in time SAFER is not aware of any intention of any organization or application to send either carrier or vehicle permit data to SAFER. Unless a specific source of carrier or vehicle permit data can be identified, SAFER requests that the requirement for carrier and vehicle permit data processing be deleted.
