

Recent and Active Architecture CR Summary 2006-03-30

CR Number: 4626

External Reference:

Category: Add capability for multiple DBA names in SAFER

Component: SAFER/MCMIS

Synopsis: Several states support the capability for SAFER to store multiple DBA names. Since SAFER obtains the DBA name from MCMIS, both MCMIS and SAFER would need to be changed. Currently, some states concatenate multiple DBA names in the single DBA name field in MCMIS and state systems handle the multiple names.

Status: New

External Reference: SAFER CR 139, SAFER CR 164
Category: SAFER XML, SAFER ICD
Component: SAFER/CVIEW
Synopsis: Standardization of data values in XML input transactions.

Summary: Data elements input to SAFER must be standardized to ensure data quality and integrity.
Status: Closed Approved
Disposition: [2006-03-30] Closed Approved
Entered On: 10/18/2004 2:19:57 PM

CR Number: 2936
External Reference: SAFER CR 348
Category: New data element needed
Component: CVISN Architecture and Standards
Synopsis: A source, other than the authoritative source, may submit e-screening enrollment data to SAFER. States requested a data element to track the source of the transponder data.

Summary: Any state can update e-screening information (XML T0024). States do not object to an unauthorized state submitting transponder information for another state, as long as the vehicle registration data is not affected.

Proposal: Add a data element to track the source of the transponder data.

Status: Recommended
Disposition: [2006-03-21] Approved and scheduled for SAFER v5.1 release (Aug 2006)
Entered On: 8/23/2004 12:22:08 PM

CR Number: 2798
External Reference: SAFER 122; DJ Waddell - MD - 240-228-5878
Category: Business rules/process to clarify data source
Component: SAFER/CVIEW
Synopsis: Synopsis: Data integrity issues are resulting from a source other than the authoritative source submitting vehicle registration data to SAFER.

Summary: A source other than the authoritative source can submit vehicle registration data to SAFER. If the authoritative source later updates the information, the data already in SAFER may be overwritten. Business rules/process need to be established (a) to clarify the source of data and (b) to coordinate data entry/update by authoritative source and authorized but not 'authoritative' source.

Proposal: The proposal consists of several clauses.

1. A state (in most cases, a "non-participating" state) may authorize another state to send vehicle registration data to SAFER on its behalf; this must be documented by letter/email. Letter/email will also be required to withdraw the authorization.
2. A new table in SAFER will be created to keep track of which states are authorized to send vehicle registration data to SAFER for any given state. The default would be that only the IRP base state would be authorized to send vehicle registration data to SAFER.
3. Volpe will consider whether the new table is also the appropriate place to store contact information.
4. If a state that is not authorized according to the process attempts to send vehicle registration data (XML T0020, T0021, or T0022) for another state to SAFER, the XML transactions will be rejected and the IRP base state will be notified that an unauthorized state has attempted to send vehicle registration data on its behalf.
5. The REGISTRATION_START_DATE will be a mandatory field and REGISTRATION_EXPIRE_DATE will be a conditionally mandatory field in the vehicle registration data.
6. The table will be posted in some form on the CVISN website.

Status: Recommended

Disposition: [2006-03-30] Recommended for SAFER Release 5.1.

Entered On: 7/12/2004 8:59:22 AM
