Center for Domestic Preparedness: Funds for the Center for Domestic Preparedness (CDP), a component of G&T, will be allocated to provide specialized terrorism preparedness training for State, local, and tribal emergency responders on capacity-building skills tied to national priorities especially

those related to Weapons of Mass Destruction. G&T's CDP is the only Federally chartered WMD training facility. In addition to developing and delivering emergency responder training at various levels, for a broad range of disciplines, the CDP also participates in G&T's efforts on behalf of the Department to standardize and decentralize training for State, local and tribal responders while maintaining training quality and gathering meaningful evaluation data for continuous program improvement and effective program management. The CDP also performs response-focused test and evaluation of emergency response equipment. The CDP provides a unique training facility and environment for emergency responders to conduct specialized, advanced hands-on training in a toxic agent training venue that is not available at the State and local level.

National Domestic Preparedness Consortium: The NDPC works with G&T to identify training needs for all emergency response disciplines responsible for WMD terrorism prevention, deterrence, and incident response. Current NDPC membership is a partnership between university and government partners:

- Louisiana State University (law enforcement and bio-terrorism training),
- Texas A & M University (threat and risk assessment, fire/EMS, and incident command/unified command systems training),
- New Mexico Tech (explosives training),
- Center for Domestic Preparedness (live chemical agent training), and
- U.S. Department of Energy's Nevada Test Site (nuclear/radiological training).

All training sponsored by G&T/NDPC is the product of a rigorous development process that includes identification of objectives, which enhance field performance; curriculum development and review by Federal, State and local subject matter experts; pilot testing; review by a Federal interagency panel; and continuous assessment and updating.

The practice of having each NDPC member pay the full burden of participating responders reduces enrollment flexibility both among and between institutions. A cost-shared approach would leverage existing NDPC resources, and support enrollment levels more consistent with state and local needs. In FY 2005, G&T established a process for States to use their formula grant funds to procure additional deliveries of curriculum developed under G&T funds at a cost that takes into account the resources G&T has already expended for course development. This effort ensures that States desiring additional deliveries beyond G&T's ability to resource directly pay a fair and consistent price that recognizes the Government's previous investment. In FY 2006, G&T will build on this excess delivery acquisition model and will use NDPC funding to cover fixed operating expenses, with trainee costs paid by the sponsoring agency out of grant funds. Beginning in FY 2007, funding for NDPC will be allocated among members on a competitive discretionary basis. Factors that will determine the allocations will include course curriculum, program effectiveness, enrollment levels, and other performance criteria deemed appropriate.

PPA: Technical Assistance Program

	FTP	FTE	Amount
2005 Actual	11	11	61,082
2006 Revised Enacted	12	12	19,800
2007 Adjustments to Base	0	0	(8,300)
2007 Current Services	12	12	11,500
2007 Program Changes	0	0	0
2007 Request	12	12	11,500
Total Changes 2006-2007	0	0	(8,300)

G&T requests \$11.5 million for this activity. This is a decrease of \$8.3 million from FY 2006. This reduction reflects a reprioritization of resources to focus Technical Assistance on core competencies for improving state and local homeland security planning. The Office of the Undersecretary will be providing technical assistance to align state and local preparedness planning including catastrophic planning efforts and dissemination of innovative preparedness concepts.

CURRENT SERVICES PROGRAM DESCRIPTION:

Technical Assistance Support to Preparedness: The Homeland Security Preparedness Technical Assistance Program (HSPTAP) develops and enhances State and local jurisdiction preparedness strategies related to chemical, biological, radiological, nuclear, and explosives (CBRNE) terrorism through three types of direct services: 1) provision of information resources to raise awareness or enhance familiarity with vital preparedness capabilities; 2) provision of stand-alone tools including performance samples, models, and templates that guide the development and/or enhancement of various capabilities; and 3) delivery of customized, on-site assistance that provides facilitated instruction to ensure the development and/or enhancement of the most complex capabilities. The HSPTAP provides vital assistance through the delivery of technical assistance (TA) services that support implementation of the National Preparedness Goal and the National Preparedness Guidance.

The HSPTAP is targeted to State and local organizations based on analysis of State and Urban Area Homeland Security Strategies, which reveals national trends regarding vital capability gaps and is utilized to ensure design/development of the most vital services in-line with the National Preparedness Goal. All service requests must demonstrate a direct correlation to the corresponding State or Urban Area Homeland Security Strategy and obtain approval from the relevant State Administrative Agency or Urban Area Working Group.

TA services are grouped into three major categories: Prevention and Deterrence; Response and Recovery; and Program Management. Examples of specific TA offerings include:

- **Prevention and Deterrence TA:** These TA services assist State and local jurisdictions in the five functional areas of prevention and deterrence: Information Collection and Threat Recognition; Intelligence Fusion and Analysis; Information Sharing and Collaboration; Terrorism Investigation and Intervention; and CBRNE Detection. A description of an example TA service is provided below.

- The Prevention and Deterrence TA Workshop ensures that State and local stakeholders are fully introduced to and understand the prevention/deterrence paradigm. The workshop provides those responsible for preventing future terrorist attacks with the knowledge, skills, and resources to thwart future attacks. The workshop consists of the following objectives: 1) Develop consensus among stakeholders on the meaning and definition of prevention; and 2) Assist stakeholders in identifying their specific prevention needs.
- Since 1996, the Los Angeles County Sheriffs Department has operated a Terrorism Early Warning Group (TEW) to cover the anti-terrorism intelligence needs of the County. G&T has identified it as a model for replication throughout the country due to its success in gathering and analyzing large quantities of intelligence information from a regional, multi-discipline approach, while ensuring a flow of intelligence information from all sectors and through all levels of government through the Terrorism Early Warning Group (TEW) Expansion-Oriented and Technical Assistance program. This technical assistance program shares lessons learned about establishing TEW fusion center operations and how to share that information through regional teams. Included in this approach are preparedness strategies for prevention, detection, apprehension, and response.
- **Response and Recovery TA:** TA services are designed to improve State and local planning and management for response and recovery from terrorism, natural disasters, or other emergencies. Descriptions of Response and Recovery TA services are provided below.
 - The Interoperable Communications Technical Assistance Program (ICTAP) is designed to enhance interoperable communications between local, State, and Federal emergency responders and public safety officials, and is associated with G&T's UASI grant program. ICTAP works with the Urban Area Working Group (UAWG) to assess the current communications infrastructure for gaps and to determine the technical requirements that can be used to design an interoperable communications system.
 - The G&T's Equipment Technical Assistance Program (DPETAP) provides assistance to responders to help them better choose, operate, and maintain their CBRNE detection and response equipment by providing detailed technical information and hands-on equipment operation and maintenance training. In addition, DPETAP Instructor/Technicians provide intensive hands-on Homeland Defense Equipment Reuse (HDER) Program Training, CBRNE Mass Casualty Personnel Decontamination Training, and CBRNE Personal Protective Equipment (PPE) Field Training.
- **Program Management TA Program:** TA services assist State and local jurisdictions in developing and implementing effective preparedness strategies.
 - Grants Management TA improves the administration of G&T homeland security preparedness grants. The initial phase of the Grants Management TA service consisted of integrated research efforts that would accurately develop compilations of best practices in grants management and critical grants management

needs/problems. The benefit to States or local jurisdiction is that these research efforts serve as the foundation for the development of a tailored, on-site assistance program to ensure that identified best practices are implemented and critical needs/problems are addressed. The program includes both templates and on-site workshops.

- o Program Management TA provides assistance to State and local program administrators in developing, implementing and assessing homeland security strategies and programs. The program includes the Program Management Handbook and on-site implementation assistance.

PPA: Evaluation and National Assessment Program

	<u>FTP</u>	<u>FTE</u>	<u>Amount</u>
2005 Actual	17	17	14,300
2006 Revised Enacted	24	24	14,157
2007 Adjustments to Base	0	0	8,843
2007 Current Services	24	24	23,000
2007 Program Changes	0	0	0
2007 Request	24	24	23,000
Total Changes 2006-2007	0	0	8,843

G&T requests \$23.0 million for this activity. This is an increase of \$8.8 million from FY 2006. The implementation of HSPD-8 will continue to be a G&T priority in FY 2007. The increase in resources will be targeted towards the implementation of the mechanisms and tools demonstrating how the nation is leveraging billions of homeland security grant resources to improve the priorities and capabilities identified in HSPD-8.

CURRENT SERVICES PROGRAM DESCRIPTION:

HSPD-8 Implementation: To address national preparedness, the President issued HSPD-8 on December 17, 2003. The directive calls for an all-hazards National Preparedness Goal. As required in HSPD-8, the National Preparedness Goal will include measurable readiness targets, priorities, standards for preparedness assessment and strategies, and a system for assessing the Nation's overall level of preparedness. The interim National Preparedness Goal released on March 31, 2005, reflected the Department's progress to date to develop those elements in coordination with other entities. The Final National Preparedness goal will supersede the Interim Goal. It will summarize the measurable readiness targets and refer to the companion Target Capabilities List (TCL) document for detail. Version 1.1 of the TCL, issued May 23, 2005, represents a significant step forward in developing those readiness targets. The TCL identifies 36 capabilities that the Nation needs in order to address major events that exceed the resources of any single jurisdiction. The Final Goal will also summarize the standards for preparedness assessments and strategies, as well as Goal management and maintenance, including the assessment system.

Evaluation and Assessment: G&T is working to implement a comprehensive system to measure the effectiveness of its programs and their impact on our national preparedness. G&T has been developing and refining performance measures to focus on high-level outcomes for G&T's major programs and

building a performance measurement model. This process involves the gathering of data and information from the field, and developing databases to store this information on all of the programs. G&T will be working on enhancing the sophistication of our performance measures classification system in order to gauge the impact of our program products and services and how well they address the goals of the program. The outcome measures link to performance measures that are currently in the Interim National Preparedness Goal. The performance measures included in the Future Year Homeland Security Program (FYHSP) are focused on internal measurement of G&T programs and processes. These programs and processes are enablers for national homeland security preparedness and largely involve the transfer of information, policies/guidelines, grant funding, and technical assistance, to third parties for the achievement of DHS goals, objectives, and strategies. The G&T programs covered in FYHSP provide the foundational management, administration, and oversight in the transfer of these funds, products, and services. Many of the measures in the Goal will gauge the accomplishment of key milestones and events that will contribute to improved performance on G&T's outcome measures. The measures in the Goal all contribute to meaningful outcomes, and are more appropriately described as "indicator measures" of preparedness.

Prevention and Deterrence Activities: It is a critical priority for our Nation that we help States, local jurisdictions, and our Federal partners in achieving prevention related national priorities identified in the National Preparedness Goal and National Preparedness Guidance. The Prevention and Deterrence Program is designed to meet this critical priority by integrating all prevention-related activities of G&T, including technical assistance, training, and exercises, into a single, comprehensive prevention preparedness program. The goal is to design and build State and local prevention programs, appropriately allocate prevention resources, and create prevention capabilities. To achieve the goal, the program will identify the major planning tasks, deliverables, priorities and milestones, as well as provide policy oversight for Prevention and Deterrence technical assistance, training, exercises, and evaluations and assessments. The activities within this program also include serving as an executive agent managing and maintaining the National Planning Scenarios (NPS) and the NPS Universal Adversary (UA) (prevention) Prequels for DHS on behalf of the interagency/intergovernmental clients.

PPA: Management and Administration

	FTP	FTE	Amount
2005 Actual	31	31	3,546
2006 Revised Enacted	0	0	4,950
2007 Adjustments to Base	0	0	50
2007 Current Services	0	0	5,000
2007 Program Changes	0	0	0
2007 Request	0	0	5,000
Total Changes 2006-2007	0	0	50

G&T requests \$5.0 million for this activity. This a \$50,000 increase from FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Management and Administration: Management and administration includes traditional operational and program management support resources. Specifically, these funds include salaries and benefits for

all staff, travel, rent, printing and supplies, and contractor support for daily operations and G&T's contribution to the Departmental Working Capital Fund.

For 2006 and 2007, G&T is presenting a management and administration spending plan that captures the organization's salary and expense requirements by major program activity. G&T is working with the Department and OMB in developing methods to appropriately identify and finance the actual operational costs. Ultimately, the goal is to reflect the true cost of the management and oversight of G&T's nearly \$3 billion annual portfolio.

In the interim, the financing of G&T's management and administration continues to depend on contributions from its grant and program activities. In 2006, a total of \$80.9 million in management and administration funds has been financed through an across the board 3 percent contribution.

The below chart displays how G&T is financing its 2006 M&A requirements and how these resources will be expended by program.

Program	FY06 Funding	FY06 Execution
State Preparedness Grants Program	\$ 36,383	\$ 25,323
Target Infrastructure Capability Grants Program	\$ 34,304	\$ 20,985
National Exercise Program	\$ 1,544	\$ 6,996
State and Local Training Program	\$ 6,237	\$ 22,567
Technical Assistance Program	\$ 594	\$ 4,864
Evaluation and National Assessment Program	\$ 425	\$ 4,712
Systems Support Program	\$ 1,485	\$ 475
Management and Administration	\$ 4,950	
Total	\$ 85,922	\$ 85,922

Likewise, the 2007 M&A requirements are financed using the same methodology employed in 2006.

Program	FY07 Funding	FY07 Execution
State Preparedness Grants Program	\$ 21,800	\$ 23,843
Target Infrastructure Capability Grants Program	\$ 35,700	\$ 19,759
National Exercise Program	\$ 7,000	\$ 6,587
State and Local Training Program	\$ 11,400	\$ 21,247
Technical Assistance Program	\$ -	\$ 4,580
Evaluation and National Assessment Program	\$ -	\$ 4,437
Systems Support Program	\$ -	\$ 447
Management and Administration	\$ 5,000	
Total	\$ 80,900	\$ 80,900

IV. Program Justification of Changes

Below is a description of each program adjustment.

State Preparedness Grant Program: -\$374.8 million. The reduction in funding under this program activity reflects the continuing shift of resources from state-based programs to the Targeted Infrastructure Capability Grants Program.

Specifically, the reduction reflects (1) the non-recurrence of \$38.4 million for REAL ID grants and \$28.8 million for Metropolitan Medical Response System (MMRS) grants; (2) the non-recurrence of \$384.1 million for the Law Enforcement Terrorism Prevention Program activities, which are proposed to be funded under the State Homeland Security Grant Program (SHSGP); (3) the reduction of \$11.9 million for the Emergency Management Performance Grants (EMPG) program, which, for FY 2007, is consistent with the level of resources previously requested; and (4) a reduction of \$14.6 million in related program administration. Off-setting these reductions are programmatic increases for the State Homeland Security Grant Program totaling \$88.1 million and Citizen Corps totaling \$14.9 million. DHS will continue to improve the targeting of state-based grants towards the most critical priorities to be identified in the National Preparedness Goal.

Targeted Infrastructure Capability Grants Program: +\$294.6 million. The increase in funding under this program activity reflects the continuing shift of resources to programs that emphasize regional approaches to enhancing our nation's homeland security.

Specifically, the increase reflects an \$82.5 million enhancement to the existing UASI program, funding for the Targeted Infrastructure Protection Program (TIPP) totaling \$585.2 million, and a slight increase in program administration of \$1.4 million. Off-setting this increase is a reduction of \$374.6 million, which reflects the consolidation of individual transportation infrastructure grant resources under the larger (+55%), discretionary-based TIPP.

National Exercise Program: -\$2.8 million. This reduction reflects an \$11.1 million decrease to the Exercise Support Program, reflecting the increased state and local capability to develop self-sustaining exercise programs. Off-setting this reduction is a \$2.9 million increase in national, state and local exercise activities and \$5.5 million for program administration, enabling NEP to improve its coordination with Federal, state, and local exercise partners.

State and Local Training Program: -\$115.5 million. The FY 2007 budget request proposes an overall reduction for training center operations. The remaining resources, totaling \$92.4 million, are proposed to be allocated on a competitive discretionary basis and are consistent with funds previously requested by the Administration. DHS will continue to encourage state and urban area grantees to support training efforts that comply with DHS standards.

Technical Assistance Program: -\$8.3 million. This reduction reflects a reprioritization of resources to focus Technical Assistance on core competencies for improving state and local homeland security planning. The Office of the Undersecretary will be providing technical assistance to align state and local preparedness planning including catastrophic planning efforts and dissemination of innovative preparedness concepts.

Evaluation and Assessment: +\$8.8 million. The implementation of HSPD-8 will continue to be a G&T priority in FY 2007. The increase in resources will be targeted towards the implementation of the mechanisms and tools demonstrating how the nation is leveraging billions of homeland security grant resources to improve the priorities and capabilities identified in HSPD-8.

Systems Support Program: -\$59.8 million. The FY 2007 budget request, proposes to eliminate the resources available under this program activity, which were appropriated but not requested in FY 2006. In addition, the \$10.3 million provided within the Katrina Supplemental to replenish equipment stockpiles is not requested in FY07. This program activity was a one-time replenishment of response assets, and the FY 2007 budget proposes to transfer this program to FEMA which is responsible for managing similar equipment stockpiles.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Office of Grants and Training
Justification of Proposed Changes in State and Local Programs
Appropriation Language**

For grants, contracts, cooperative agreements, and other activities including grants to State and local governments for terrorism prevention activities, notwithstanding any other provision of law, [\$3,064,756,000] \$2,456,559,000 which shall be allocated as follows:

(1) [\$220,000,000] \$205,000,000 for formula-based grants of which \$170,000,000 shall be for Emergency Management Performance Grants and [\$50,000,000] \$35,000,000 shall be for grants to States for Citizen Corps preparedness activities.

(2) [\$2,640,000,000] \$2,071,000,000 for discretionary grants, as determined by the Secretary of Homeland Security, of which-

(A) [\$1,020,000,000] \$633,000,000 shall be for grants to State and territories for enhancing capabilities to prevent, deter, respond to and recover from acts of terrorism, to be allocated by the Secretary of Homeland Security based on risks, threats, vulnerabilities and unmet essential capabilities: Provided, That each State and territory receive no less than 0.25% of the funds appropriated under this paragraph;

(B) [\$1,020,000,000] \$838,000,000 shall be for grants to urban areas for enhancing capabilities to prevent, deter, respond to and recover from acts of terrorism, to be allocated by the Secretary of Homeland Security based on risks, threats, vulnerabilities, and unmet essential capabilities; and

(C) \$600,000,000 shall be for grants and other assistance to provide targeted infrastructure protection to ports, transit facilities, and such other infrastructure as determined by the Secretary of Homeland Security: [Provided further; That of this amount \$50,000,000 shall be for implementation of buffer zone protection plans:]

Provided, That no less than 80 percent of any grant under this paragraph to a State shall be made available by the State to local governments within 60 days after the receipt of the funds: Provided further, that for grant applications submitted under paragraphs (A) and (B), no less than 20 percent of the funds requested shall be for terrorism prevention activities of law enforcement.

(3) [\$178,210,000] \$180,559,000 for training, exercises, technical assistance, and other programs, [of which \$21,300,000 shall be available for management and administration; and

(4) For necessary expenses for the Office of Grants and Training, \$26,546,000; Provided, that not to exceed \$2,000 shall be used for official reception and representation expenses.]

Provided, That[,] none of the grants provided under this heading shall be used for construction or renovation of facilities; except for a minor perimeter security project, not to exceed \$1,000,000, as determined necessary by the Secretary of Homeland Security: Provided further, that the proceeding proviso shall not apply to grants under (2) (C) of this heading: Provided further, That grantees shall provide additional reports on their use of funds, as determined necessary by the Secretary of Homeland Security: Provided further, That funds appropriated for discretionary grants under paragraph (2)(A)

and (B) of this heading shall be available for operational costs, to include personnel overtime and overtime associated with Office of Grants and Training certified training, as needed.

Explanation of Changes:

Deletes the funds set aside for the buffer zone protection. Buffer zone protection projects will be integrated into other targeted infrastructure and capability projects under section (C) as part of risk-based infrastructure analysis.

Deletes separate management and administration funding lines for training, exercise, technical assistance, and other programs (section (3)) and Office of Grants and Training (section (4)) and provides one funding line for management and administration for the office as a whole.

**Summary Justification and Explanation of Changes- 0560, State and Local Programs
State Preparedness Grants**

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Salaries and Benefits (OC 11.1 and 12.1)	\$ 9,198	\$ 9,504	\$ 4,823	\$ (4,681)

This dollar amount represents the contribution to the overall Salaries and Benefits cost for G&T. It includes costs for 54 FTEs. The FY 2007 request includes a decrease of \$4.6 million. This change is due to the fact that the FY 2007 request reflects a change in methodology on the spreading of management and administration.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Travel (OC 21.0)	\$ 2,150	\$ 1,054	\$ 689	\$ (365)

This dollar amount represents the contribution to the overall travel cost for G&T. It includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes a decrease of \$365,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
GSA Rent (OC 23.1)	\$ 2,440	\$ 1,540	\$ 1,005	\$ (535)

This dollar amount represents the contribution to the overall GSA rent cost for G&T. It includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes a decrease of \$535,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Communications and Utilities (OC 23.3)	\$ -	\$ 1,052	\$ 192	\$ (860)

This dollar amount represents the contribution to the overall communications, utilities, and miscellaneous charges for G&T. It includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes a decrease of \$860,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Printing (OC 24.0)	\$ 68	\$ 88	\$ -	\$ (88)

This dollar amount represents the contribution to the overall printing cost for G&T. It includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes a decrease of \$88,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Advisory & Assistance Services (OC 25.1)	\$ -	\$ 381	\$ 196	\$ (186)

This dollar amount represents the contribution to the overall advisory and assistance services for G&T. It includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a decrease of \$186,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

2341

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Other Services (OC 25.2)	\$ 28,261	\$ 18,926	\$ 11,517	\$ (7,410)

This dollar amount represents the contribution to the overall other services for G&T. It includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decrease of \$7.4 million. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Purchases from Govt. Accounts (OC 25.3)	\$ -	\$ 887	\$ 1,305	\$ 418

This dollar amount represents the contribution to the overall purchases from Government Accounts for G&T. It includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$418,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Operations and Maintenance (OC 25.7)	\$ -	\$ 2,950	\$ 2,073	\$ (877)

This dollar amount represents the contribution to the overall operation and maintenance of facilities for G&T. It includes all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes a decrease of \$877,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Grants (OC 41.0)	\$ 1,665,856	\$ 1,176,368	\$ 816,200	\$ (360,168)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The \$360 million reduction in grant funding is based on several factors: the substantial level of funds awarded over the past five years, the level of funding currently in the pipeline to state and local programs, and a reprioritization of DHS resources. Even at the reduced level, DHS will continue to improve the programs' effectiveness through improved targeting on states and urban areas at greatest risk, and greater focus on priorities in the National Preparedness Goal, especially enhancements of state and urban area communications interoperability.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Other Services (OC 25.2)	\$52,000	\$50,687	\$ 44,902	\$ (5,785)

This dollar amount represents the contribution to the overall other services for G&T. It includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decrease of \$5.8 million. This change is due to three factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment. Finally, the overall funding for the National Exercise Program decreased a total of \$8.2 million. The reduction in funding is based on a reprioritization of DHS resources. However, at the reduced level, DHS will continue to improve the exercise programs' effectiveness through a greater focus on priorities in the National Preparedness Goal.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Purchases from Govt. Accounts (OC 25.3)	\$ -	\$ 40	\$ 419	\$ 379

This dollar amount represents the contribution to the overall purchases from Government Accounts for G&T. It includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$379,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Operations and Maintenance (OC 25.7)	\$ -	\$ 134	\$ 666	\$ 531

This dollar amount represents the contribution to the overall operation and maintenance of facilities for G&T. It includes all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$531,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

**Summary Justification and Explanation of Changes- 0560, State and Local Programs
State and Local Training Program**

	<u>FY2005</u> <u>Actual</u>		<u>FY2006</u> <u>Revised Enacted</u>		<u>FY2007</u> <u>Request</u>		<u>FY2007</u> <u>Change</u>
Salaries and Benefits (OC 11.1 and 12.1)	\$	-	\$	1,728	\$	3,344	\$ 1,616

This dollar amount represents the contribution to the overall Salaries and Benefits for G&T. It includes costs for 44 FTEs. The FY 2007 request includes an increase of \$1.6 million. This change is due to the fact that the FY 2007 request reflects a change in methodology on the spreading of management and administration.

	<u>FY2005</u> <u>Actual</u>		<u>FY2006</u> <u>Revised Enacted</u>		<u>FY2007</u> <u>Request</u>		<u>FY2007</u> <u>Change</u>
Travel (OC 21.0)	\$	-	\$	192	\$	360	\$ 169

This dollar amount represents the contribution to the overall travel for G&T. It includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes an increase of \$169,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	<u>FY2005</u> <u>Actual</u>		<u>FY2006</u> <u>Revised Enacted</u>		<u>FY2007</u> <u>Request</u>		<u>FY2007</u> <u>Change</u>
GSA Rent (OC 23.1)	\$	-	\$	280	\$	526	\$ 246

This dollar amount represents the contribution to the overall GSA rent for G&T. It includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes an increase of \$246,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	<u>FY2005</u> <u>Actual</u>		<u>FY2006</u> <u>Revised Enacted</u>		<u>FY2007</u> <u>Request</u>		<u>FY2007</u> <u>Change</u>
Communications and Utilities (OC 23.3)	\$	-	\$	191	\$	101	\$ (91)

This dollar amount represents the contribution to the overall communications, utilities, and miscellaneous charges for G&T. It includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes a decrease of \$91,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	<u>FY2005</u> <u>Actual</u>		<u>FY2006</u> <u>Revised Enacted</u>		<u>FY2007</u> <u>Request</u>		<u>FY2007</u> <u>Change</u>
Printing (OC 24.0)	\$	-	\$	16	\$	-	\$ (16)

This dollar amount represents the contribution to the overall printing for G&T. It includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes a decrease of \$16,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	<u>FY2005</u> <u>Actual</u>		<u>FY2006</u> <u>Revised Enacted</u>		<u>FY2007</u> <u>Request</u>		<u>FY2007</u> <u>Change</u>
Advisory & Assistance Services (OC 25.1)	\$	-	\$	69	\$	102	\$ 33

This dollar amount represents the contribution to the overall advisory and assistance services for G&T. It includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$33,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

2350

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Other Services (OC 25.2)	\$ 55,000	\$ 57,800	\$ 55,200	\$ (2,600)

This dollar amount represents the contribution to the overall other services for G&T. It includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decrease of \$2.6 million. This change is due to three factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment. Finally, the reduction in funding reflects a reprioritization of DHS resources. At the reduced level, DHS will continue to refine its training program effectiveness through leveraging existing resources and program efficiencies.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Purchases from Govt. Accounts (OC 25.3)	\$ -	\$ 161	\$ 683	\$ 521

This dollar amount represents the contribution to the overall purchases from Government Accounts for G&T. It includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$521,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Operations and Maintenance (OC 25.7)	\$ -	\$ 536	\$ 1,084	\$ 548

This dollar amount represents the contribution to the overall operation and maintenance of facilities for G&T. It includes all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$548,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Grants (OC 41.0)	\$ 140,000	\$ 146,926	\$ 30,951	\$ (115,975)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The \$116 million decrease in funding is due to a \$21 million decrease in Continued and Emerging Training Grants and a \$56.5 million decrease in funding for the National Domestic Preparedness Consortium. The \$115 million reduction in grant funding is based on several factors: the substantial level of funds awarded over the past five years, the level of funding currently in the pipeline to NDPC members, and a reprioritization of DHS resources. Even at the reduced level, DHS will continue to work with the NDPC members to improve training programs' effectiveness through greater focus on priorities in the National Preparedness Goal.

**Summary Justification and Explanation of Changes- 0560, State and Local Programs
National Evaluation and Assessment Program**

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Salaries and Benefits (OC 11.1 and 12.1)	\$ -	\$ 216	\$ -	\$ (216)

This dollar amount represents the contribution to the overall Salaries and Benefits for G&T. It includes costs for 24 FTEs. The FY 2007 request includes a decrease of \$216,000. This change is due to the fact that the FY 2007 request reflects a change in methodology on the spreading of management and administration.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Travel (OC 21.0)	\$ -	\$ 24	\$ -	\$ (24)

This dollar amount represents the contribution to the overall travel for G&T. It includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes a decrease of \$24,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
GSA Rent (OC 23.1)	\$ -	\$ 35	\$ -	\$ (35)

This dollar amount represents the contribution to the overall GSA rent for G&T. It includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes a decrease of \$35,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Communications and Utilities (OC 23.3)	\$ -	\$ 24	\$ -	\$ (24)

This dollar amount represents the contribution to the overall communications, utilities, and miscellaneous charges for G&T. It includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes a decrease of \$24,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Printing (OC 24.0)	\$ -	\$ 2	\$ -	\$ (2)

This dollar amount represents the contribution to the overall printing for G&T. It includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes a decrease of \$2,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Advisory & Assistance Services (OC 25.1)	\$ -	\$ 9	\$ -	\$ (9)

This dollar amount represents the contribution to the overall advisory and assistance services for G&T. It includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a decrease of \$9,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

2356

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Other Services (OC 25.2)	\$ 14,300	\$ 13,760	\$ 23,000	\$ 9,240

This dollar amount represents the contribution to the overall other services for G&T. It includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes an increase of \$9.2 million. This change is due to three factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment. Finally, the program will increase a total of \$16.7 million. In FY 2007, DHS plans to develop a system for assessing the Nation's overall level of preparedness as required in HSPD-8. Current assessments, surveys and data calls requested of Federal, State, local and nongovernmental and private sector entities and the general public will ultimately be consolidated, revised, or realigned to create a national assessment and reporting system that supports the objective of the Goal. The system will provide the standard processes and planning tools for existing Federal preparedness programs to assess and report national readiness.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Purchases from Govt. Accounts (OC 25.3)	\$ -	\$ 20	\$ -	\$ (20)

This dollar amount represents the contribution to the overall purchases from Government Accounts for G&T. It includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes a decrease of \$20,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Operations and Maintenance (OC 25.7)	\$ -	\$ 67	\$ -	\$ (67)

This dollar amount represents the contribution to the overall operation and maintenance of facilities for G&T. It includes all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes a decrease of \$67,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

Summary Justification and Explanation of Changes- 0560, State and Local Programs
System Support Program

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Salaries and Benefits (OC 11.1 and 12.1)	\$ -	\$ 432	\$ -	\$ (432)

This dollar amount represents the contribution to the overall Salaries and Benefits for G&T. The FY 2007 request includes a decrease of \$432,000. This change is due to the fact that the FY 2007 request reflects a change in methodology on the spreading of management and administration.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Travel (OC 21.0)	\$ -	\$ 48	\$ -	\$ (48)

This dollar amount represents the contribution to the overall travel for G&T. It includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes a decrease of \$48,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
GSA Rent (OC 23.1)	\$ -	\$ 70	\$ -	\$ (70)

This dollar amount represents the contribution to the overall GSA rent for G&T. It includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes a decrease of \$70,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Communications and Utilities (OC 23.3)	\$ -	\$ 48	\$ -	\$ (48)

This dollar amount represents the contribution to the overall communications, utilities, and miscellaneous charges for G&T. It includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes a decrease of \$48,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Printing (OC 24.0)	\$ -	\$ 4	\$ -	\$ (4)

This dollar amount represents the contribution to the overall printing for G&T. It includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes a decrease of \$4,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Advisory & Assistance Services (OC 25.1)	\$ -	\$ 17	\$ -	\$ (17)

This dollar amount represents the contribution to the overall advisory and assistance services for G&T. It includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a decrease of \$17,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

2359

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Other Services (OC 25.2)	\$ 50,000	\$ 59,007	\$ -	\$ (59,007)

This dollar amount represents the contribution to the overall other services for G&T. It includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes an increase of \$59 million. This change is due to four factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment. Third, the FY 2007 budget request, proposes to eliminate the resources available under this program activity, which were appropriated but not requested in FY 2006. In addition, G&T is not requesting the \$10.3 million provided within the Katrina Supplemental to replenish equipment stockpiles. This program activity was planned a one-time G&T investment and the FY 2007 budget proposes to transfer this program to FEMA.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Purchases from Govt. Accounts (OC 25.3)	\$ -	\$ 40	\$ -	\$ (40)

This dollar amount represents the contribution to the overall purchases from Government Accounts for G&T. It includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes a decrease of \$40,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Revised Enacted	FY2007 Request	FY2007 Change
Operations and Maintenance (OC 25.7)	\$ -	\$ 134	\$ -	\$ (134)

This dollar amount represents the contribution to the overall operation and maintenance of facilities for G&T. It includes all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes a decrease of \$134,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

BUDGET REQUEST AND SUPPORTING INFORMATION

OFFICE OF GRANTS AND TRAINING
ASSISTANCE TO FIREFIGHTER GRANTS

I. Appropriation Overview

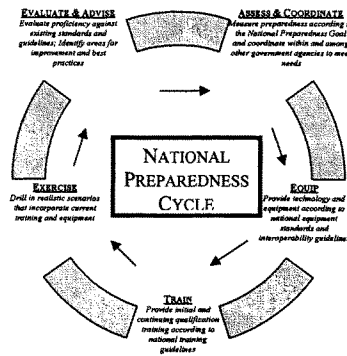

A. Mission Statement for Appropriation Name:

The Office of Grants and Training (G&T) is the principal component of the Department of Homeland Security (DHS) responsible for preparing State and local governments for acts of terrorism. In carrying out its mission, G&T is responsible for providing equipment, training, and support for the planning and execution of exercises, technical assistance, and other support to assist Federal agencies, States, territories, tribal, and local jurisdictions to prevent, plan for, and respond to acts of terrorism.

G&T plays a vital role in coordinating State and local issues across DHS and with its external stakeholders to ensure a more effective and unified policy development and the design and implementation of robust focused Federal assistance and programming.

The following diagram (Figure I-1) illustrates how G&T's core program activities facilitate ensuring our Nation's preparedness. Taken individually, each step in the cycle is represented in G&T's budget request.

Figure 2-1: National Preparedness Cycle

G&T serves as the single point of entry for State and local government agencies and non-profit/private sector organizations for first responder preparedness assistance and grant funding. G&T reports directly to the Under Secretary for Preparedness and is the conduit for national-level DHS programs,

policies, projects, and information flow between DHS and State, territorial, tribal and local governments.

B. Budget Activities:

Fire Program Activates

The Assistance to Firefighter Grants (AFG) Program awards one-year grants directly to fire departments and non-affiliated emergency medical services (EMS) organizations throughout the United States to support the Nation's first-responders in improving their effectiveness of firefighting and EMS operations.

C. Budget Request Summary:

For the Assistance to Firefighter Grants Program, the Office of Grants and Training requests 33 positions/FTE, and \$293,450,000 for FY 2007 Request. The total adjustments-to-base is zero FTE and a decrease of \$355,000,000.

2007 Program Change	0	0	0
2007 Request	33	33	280,450
Total Change 2006-2007	0	0	(243,993)

G&T requests \$280.5 million for this activity. This is a decrease of \$244 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Assistance to Firefighters Grant (AFG) Program awards grants directly to fire departments and non-affiliated emergency medical services (EMS) organizations throughout the United States to support one-year projects improving the effectiveness the Nation's first-responders in homeland security, firefighting, and EMS operations.

G&T administers the program, in cooperation with the U.S. Fire Administration. The entire AFG process is fully automated in an e-grant system. Applicants apply on-line, grants are awarded electronically, the grantees manage their grants (payment requests, amendments, etc.) on-line, and the grants are monitored and closed out electronically.

For FY 2007, grantees will again be invited to submit an application for assistance in the following two program areas most critical to enhancing the capabilities of the fire and EMS services:

- Operations and Safety Program which includes training, equipment, and personal protective equipment;
- Firefighting Vehicles Acquisition Program which includes pumpers, brush trucks, tankers/tenders, rescue vehicles, ambulances, quints, aerials, foam units, and fireboats.

The FY 2007 request for Operations and Safety Program does not include wellness and activities or modifications to facilities. As long as some of our Nation's first-responders lack personal protective gear, training, and critical response equipment, Federal preparedness funds should be used for those activities, not acquisition of exercise equipment or construction. As in past years, a percentage will be reserved for the Prevention Program to include public education and awareness activities, fire code enforcement activities, fire inspector certifications and inspection activities, purchase and installation of smoke

alarms and/or fire suppression systems, wild land mitigation awareness, and arson prevention and detection activities.

In FY 2005, G&T received approximately 21,000 applications from fire departments and non-affiliated EMS organizations. Funding priorities for each of the funding activities are established by DHS, based on the Department's National Preparedness Goals as well as recommendations from the Nation's nine major fire service organizations. The applications that most closely relate to these established priorities are the applications that are reviewed by peer review panels. The peer review panels typically take three weeks to complete and commence within two weeks of the end of the grant application period. The grant awards are based primarily on the results of the peer review panels. Awards are announced on a weekly basis within weeks of the completion of the peer review panels.

In their applications, applicants have to demonstrate financial need, articulate the benefits to be derived from the grant funds, and provide details regarding the effect the grant would have on the applicant's daily operations. The grants are intended to supplement a fire department's or EMS organization's current budget rather than supplant it. To this end, grantees must agree to maintain expenditures in the selected grant category at the organization's average spending rate as determined by previous two years.

Volunteer and combination departments must receive a proportion of the total grant funding that is at least equal to the proportion of the Nation's population that those fire departments protect. In preparation for the FY 2007 grant cycle, G&T will obtain the most current information from the National Fire Protection Association on the proportion of the nation's population protected by volunteer and combination fire departments.

Other legislated restrictions include a ceiling on the cumulative value of vehicle awards set at 25 percent of the total appropriation. Beginning in FY 2006, G&T was directed by Congress to award no less than three and one-half (3.5) percent of the appropriation on EMS activities with no more than two (2) percent of the total appropriation going to non-affiliated EMS organizations.

The maximum size of each grant is based on the grantee's population protected. The grantees generally must also share in the cost of the funded project at a percentage based on the population of their respective jurisdictions. Those limits and cost-sharing requirements follow:

- Fire Prevention and Safety grants have a \$1,000,000 limit with no cost sharing requirements.
- These table show the respective population-based requirements for grants awarded under the Assistance to Firefighters Grant Program:

Maximum Grant Per Fiscal Year

• Jurisdiction Size	• Maximum Grants per FY
• Up to 500,000	• \$1,000,000
• 500,000 – 1,000,000	• \$1,750,000
• Over 1,000,000	• \$2,750,000

Grant cost-sharing requirements for the Assistance to Firefighters Grant Program:

• Jurisdiction Size	• Local Cost-Share
• below 20,000	• 5%
• 20,000 and 50,000	• 10%
• Above 50,000	• 20%

PPA: Fire Act Program Administration

	Perm Pos	FTE	Amount
2005 Actual			19,000
2006 Enacted	0	0	18,157
2007 Adjustments-to-Base	0	0	(5,157)
2007 Current Services	0	0	13,000
2007 Program Change	0	0	0
2007 Request	0	0	13,000
Total Change 2006-2007	0	0	(5,157)

G&T requests \$13 million for this activity. This is a decrease of \$5.1 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Management and administration includes traditional operational and program management support resources. Specifically, these funds include salaries and benefits for all staff, travel, rent, printing and supplies, and contractor support for daily operations and G&T's contribution to the Departmental Working Capital Fund.

PPA: SAFER Act Hiring Program

	Perm Pos	FTE	Amount
2005 Actual			\$63,000
2006 Enacted	0	0	105,850
2007 Adjustments-to-Base	0	0	(105,850)
2007 Current Services	0	0	0
2007 Program Change	0	0	0
2007 Request	0	0	0
Total Change 2006-2007	0	0	0

G&T requests no funding for this activity in FY 2007, a decrease of \$105.8 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The FY 2005 and 2006 appropriation have both reflected specific amounts to be expended on these grant -- \$65M and \$110M respectively. The Office of Grants and Training has implemented this new grant effort by combining with the programmatic and IT platform of the Assistance to Firefighter Grants (AFG), more commonly referred to as "fire grants". SAFER, however, does have its own statutory requirements that are also followed.

SAFER grants are competitive grants for the: 1) hiring of (paid) firefighters; and 2) recruitment and retention of volunteer firefighters. The hiring grants fund only salary and benefits and are cost shared.

Recruitment and retention grants are 100% federal share. Non-Federal cost share amounts are statutory. Over the five-year performance period of the grant the federal share decreases to zero. On average, non-federal amount of total cost is higher than federal (approx 35% fed, 65% non-fed). Federal hiring costs are limited over the 5 year period of the grant to \$100K per firefighter.

The competition is conducted in two phases – funding priorities and peer review. Both phases have substantial fire service involvement. The FY2005 implementation has resulted in just over 130 grants for the \$65M. For the FY2006 effort, the application period will be in June. If prior experience is an indication of the interest that will be generated, we expect at least 3,000 applications. SAFER awards will commence after peer review in late August, finishing by October 2006. Funds are available for obligation until September 30, 2007. All Assistance to Firefighter Grants, including SAFER, are deployed on the digital platform. It is web-based from start to finish: grant application, award, grant management and close out system.

The Administration has not requested funds for SAFER Grants in FY 2007 on the grounds that local public safety agencies should assume responsibility for funding the appropriate number of personnel, and that Federal-funding for hiring local responders puts newly-funded personnel at risk once grant dollars phase out. In addition, over FY 2002-2006, \$3.2 billion has been appropriated for the Assistance to Firefighters Grant program. In addition and other DHS grants have provided significant funding to the nation's fire service, as much 30% of Homeland Security Grant funding total.

AFG funds have been awarded largely in accordance with local priorities. As of this time, DHS is still determining what impact these funds have had on protecting responders and the public from fire-related hazards, or in enhancing the capabilities needed to respond to terrorism and catastrophic events. As discussed in PART findings, the programs' current legislative requirements and program practices hinder the targeting of resources towards threat-based homeland security priorities, and past performance measures have not been well-suited to demonstrating program results.

IV. Program Justification of Changes

The FY 2007 request proposes three program changes:

- A reduction of \$244 million to Fire Program Activities. The net funding level of \$280 million will be sufficient to fund hundreds of applications, focusing on those applications that enhance the most critical capabilities enhancing local response to fire, terrorism, and major disasters.
- Termination of the \$109 million SAFER Act hiring program. The Administration has not previously requested such funds on the grounds that they supplant a long-standing local responsibility to fund firefighters. Federal funds should be prioritized to close the training and equipment shortfalls of existing personnel.
- A reduction of \$5 million to Program Administration, reflecting the reduced level of grant funding requested.

Over FY2006-2007, the AFG program will continue efforts to assess the impact of funds awarded to date, and to align grant funding priorities with priorities and capabilities identified in the National Preparedness Goal.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Office of Grants and Training
Justification of Proposed Changes in Assistance to Firefighter Grants
Appropriation Language**

[For necessary expenses for programs] *For grants* authorized by *paragraphs (B), (G), (H) of section 34* of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2201 et seq.), [\$655,000,000] \$293,450,000 [of which \$545,000,000 shall be available to carry out section 33 (15 U.S.C. 2229) and \$110,000,000 shall be available to carry out section 34 (15 U.S.C. 2229a) of such Act,] to remain available until September 30, [2007] 2008: Provided, That not to exceed 5 percent of this amount shall be available for program administration. *Provided further, That priority shall be given to applications enhancing terrorism capabilities.*

Explanation of Changes:

1. Addition of paragraphs (B), (G), (H) of section 34 refers to:
 - (B) To train firefighting personnel in firefighting, emergency response (including response to a terrorism incident or use of a weapon of mass destruction), arson prevention and detection, or the handling of hazardous materials, or to train firefighting personnel to provide any of the training described in this subparagraph
 - (G) To acquire additional firefighting vehicles, including fire trucks
 - (H) To acquire additional firefighting equipment, including equipment for communications, monitoring, and response to a terrorism incident or use of a weapon of mass destruction
2. Addition of Provided further, That priority shall be given to applications enhancing terrorism capabilities, emphasizing that capabilities needed for responding to CBRNE threats and catastrophic events will be a priority factor considered in the FY 2007 grant application process. .

Summary Justification and Explanation of Changes

	FY2005	FY2006	FY2007	FY2007
	Actual	Enacted	Request	Change
Grants/Subsidies/Contributions	\$0	\$524,443	\$280,450	(\$243,993)

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY2007 request includes a decrease of \$105.9 million. In developing the FY 2007 budget request, DHS senior management thoroughly considered how to resource its mission critical activities while expanding program areas to meet emerging needs. As a result, G&T was unable to maintain certain levels of support.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$0	\$3,636	\$3,684	\$48

Salaries and Benefits includes costs for 33 FTEs. The FY 2007 request includes an increase of \$48,000 for the proposed January 2006 2.2 percent increase in personnel compensation.

	FY2005 Actual	FY2006 Enacted	FY2007 Request	FY2007 Change
Travel (OC 21.0)	\$	731	\$ 732	\$ 1

This dollar amount represents the contribution to the overall travel for AFG. It includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes an increase of \$1,000. This change is due to a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Enacted	FY2007 Request	FY2007 Change
GSA Rent (OC 23.1)	\$	602	\$ 623	\$ 21

This dollar amount represents the contribution to the overall GSA rent for AFG. It includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes an increase of \$21,000. This change is due to a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Enacted	FY2007 Request	FY2007 Change
Communications and Utilities (OC 23.3)	\$	765	\$ 214	\$ (551)

This dollar amount represents the contribution to the overall communications, utilities, and miscellaneous charges for AFG. It includes all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes a decrease of \$551,000. This change is due to a working capital fund technical programmatic adjustment.

	FY2005 Actual	FY2006 Enacted	FY2007 Request	FY2007 Change
Advisory & Assistance Services (OC 25.1)	\$	277	\$ 218	\$ (59)

This dollar amount represents the contribution to the overall advisory and assistance services for AFG. It includes services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a decrease of \$59,000. This change is due to a working capital fund technical programmatic adjustment.

	FY2005	FY2006	FY2007	FY2007
	Actual	Enacted	Request	Change
Other Services (OC 25.2)		\$ 9,355	\$ 3,765	\$ (5,590)

This dollar amount represents the contribution to the overall other services for AFG. It includes report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decrease of \$5.6 million. This change is due to two factors. The first is a working capital fund technical programmatic adjustment of \$390,000. Second, the FY2006 request includes a decrease of \$5.2 million. Because of the decrease in grant dollars, certain economies in administrative activities with FEMA will be realized. These economies are estimated to be \$5.2 million.

	FY2005	FY2006	FY2007	FY2007
	Actual	Enacted	Request	Change
Purchases from Govt. Accounts (OC 25.3)		\$ 645	\$ 1,454	\$ 809

This dollar amount represents the contribution to the overall purchases from Government Accounts for AFG. It includes costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$809,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

	FY2005	FY2006	FY2007	FY2007
	Actual	Enacted	Request	Change
Operations and Maintenance (OC 25.7)		\$ 2,146	\$ 2,310	\$ 164

This dollar amount represents the contribution to the overall operation and maintenance of facilities for AFG. It includes all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$164,000. This change is due to two factors. First, the FY 2007 request reflects a change in the methodology on the spreading of management and administration. The second factor is a working capital fund technical programmatic adjustment.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Preparedness Directorate
Radiological Emergency Preparedness Program

I. Radiological Emergency Preparedness Overview**A. Mission Statement for Radiological Emergency Preparedness Program:**

The Radiological Emergency Preparedness Program (REPP) assists state, local, and tribal governments in the development of offsite radiological emergency preparedness plans within the emergency planning zones of Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities. The REPP fund is financed from user fees assessed and collected from the NRC licensees to cover budgeted costs for radiological emergency planning, preparedness, and response activities in the following year.

B. Budget Activities:**Radiological Emergency Preparedness Program (REPP) Fund**

REPP is a fee funded program with annual budget authority provided by prior yearly collections. REPP was part of FEMA in FY 2005, and budget authority was \$16,912,000 (-\$1,184,000 net of collections). The FY 2006 revised enacted budget authority in REPP was \$18,096,000 (-\$1,266,000 net of collections). REPP assists state, local, and tribal governments in the development of offsite radiological emergency preparedness plans within the emergency planning zones of the Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities. The REPP fund is financed from user fees assessed and collected from the NRC licensees to cover the budgeted costs for radiological emergency planning, preparedness and response activities in the following year.

Radiological Emergency Preparedness Program (REPP)

REPP was transferred to the Preparedness Directorate from FEMA under the Department's Second Stage Review (2SR). The program requests a base adjustment of 40 FTE to perform comprehensive reviews of the total security and preparedness posture around commercial nuclear power plants, which is consistent with the budget authority provided by FY 2006 fee collections. No other new initiatives or program enhancements are requested. The REPP will continue to execute its mission to assist state, local, and tribal governments in the development of offsite radiological emergency preparedness plans within the emergency planning zones of the Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities. The REPP fund is financed from user fees assessed and collected from the NRC licensees to cover the budgeted costs for radiological emergency planning, preparedness, and response activities in the following year.

C. Budget Request Summary:

REPP requests a base adjustment of 40 FTE in FY 2007 to perform comprehensive reviews of the total security and preparedness posture around commercial nuclear power plants.

** FY 2006 collection increases reflect anticipated FY 2007 Budget Expenditures.

Radiological Emergency Preparedness Program requests \$23,832,000 for this activity. This reflects an increase of \$5,736,000 over the FY 2006 enacted. The net base changes include \$4,470,000 for FTE increase of 40, \$369,000 for pay inflation, and \$897,000 for non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Radiological Emergency Preparedness Program (REPP) assists state and local governments in the development of off-site radiological emergency preparedness plans within the emergency planning zones of Nuclear Regulatory Commission (NRC) licensed commercial nuclear power facilities. The fund is financed from fees assessed and collected from the NRC licensees to cover the cost of REPP.

Adjustments-to-base

Due to new terrorism-based initiatives and an increase in nuclear, radiological responsibilities (Nuclear/RAD Annex of NRP and RDD/IND activities), REPP requires 40 additional headquarters and regional FTE. Ten of these FTE will be allocated to the DHS headquarters REPP staff and the other 30 will be allocated regionally.

The additional activities and responsibilities of REPP since the terrorist attacks of 9/11 have stretched the personnel resources thin, to a point where it has become increasingly difficult to accomplish all of the goals that the Program has been charged with meeting. Significantly increased expectations and responsibilities for REPP are envisioned for FY 2007 - FY 2011, so this increase in FTE is absolutely essential to begin in FY 2007 in order for REPP to continue to successfully implement its Program and retain the highest level of integrity it has worked so hard to establish and maintain over its 26 years of existence.

In the regional offices, we will establish a 1:1 ratio of site specialist to each plant in order to handle and address the increase in site-specific issues that have surfaced since the 9/11 terrorist attacks. We

have also noticed that as these plants begin to seek license extensions the number of issues increases dramatically.

Discussions with the Nuclear Regulatory Commission (NRC) and the Nuclear Energy Institute indicate there is going to be a significant increase in the number on new license applications to build additional reactors to generate power. We will need additional staff to conduct the formal reviews of offsite emergency plans and procedures and other emergency preparedness activities prior to the NRC's granting of an operating license to these utility companies. The NRC is adding 300 FTE to address these new license applications.

Since 9/11, REPP has received an increased number of requests to participate in exercises, drills, roundtable discussions, issue committees and working groups associated with nuclear power plant security as well as emergency preparedness and planning for an incident involving a radiological dispersal device or improvised nuclear device. At the present time we cannot support all of these activities and have had to make difficult decisions about which activities warrant our support.

We have received a significant amount of requests from our federal agency partners and our state, tribal, local, and private sector stakeholders to embark on an initiative to conduct a comprehensive revision and update of the current REPP policies, guidance and regulations. Much of these operative Program documents are 10-20 years old and some of the information is severely outdated and antiquated. And now, with the 2SR and the movement of the program to Infrastructure Protection (IP), the need to update program documentation is even more acute.

In FY 2005, REPP accomplished the following goals:

- REPP provided review and approval services in support of state and local government or licensee radiological emergency plans and preparedness.
- The Program assessed NRC licensees of commercial nuclear power plants.

In FY 2006, REPP is planning on accomplishing the following goals:

- Provide support and oversight to conduct, evaluate, and report findings to the NRC on 33 joint exercises (utility, state, and local) and any remedial exercises, as necessary, of offsite plans to resolve deficiencies identified during the joint exercises; address the issue of three site-specific, formal Rule 44 CFR 350 determinations on the adequacy of offsite REPP plans and preparedness activities; conduct routine annual reviews of offsite plans and related preparedness activities at the sites; review annual certifications of state and local governments and complete periodic reviews of public information materials for all sites.
- Conduct 11 REPP courses to train federal, state, tribal, and local emergency response personnel in the detection, reporting, assessment, protection against, and reduction of effects of radioactive materials introduced into the environment in the event of nuclear power plant accidents; provide training on the REPP Evaluation Methodology procedures.
- Revise REPP policy and guidance documents; analyze REPP exercises to identify and address problem areas in offsite REPP response planning and preparedness activities.

- Print guidance and policy documents in support of REPP.

In FY 2007, REPP is planning on accomplishing the following goals:

- Plan and execute a nationally coordinated, locally executed emergency preparedness and response program. This program's success lies in its ability to integrate and enhance federal, tribal nation, state, and local governments' planning preparedness, and response capabilities for all types of peacetime radiological emergencies.
- Coordinate the activities of federal agencies with responsibilities in the radiological emergency planning and preparedness process. As the Chair of the Federal Radiological Preparedness Coordinating Committee (FRPCC), HQ REPP Management provides policy direction with respect to federal assistance to state, tribal and local governments in their radiological emergency planning and preparedness activities; coordinates research and study efforts of its member agencies relative to state, tribal and local government radiological emergency preparedness to ensure minimum duplication and maximum benefits to state, tribal and local governments; and establishes subcommittees to aid in carrying out its functions.
- Make findings and determinations on the adequacy of offsite emergency planning and preparedness and submit them to the NRC in support of the licensing of commercial nuclear power plants. REPP coordinates all federal planning for the offsite impact of radiological emergencies and takes the lead for assessing offsite radiological emergency response plans and preparedness, makes findings and determinations as to the adequacy and capability of implementing offsite plans, and communicates those findings and determinations to the NRC.
- Develop and implement training at the local, state, and federal levels. REPP manages a robust, radiological emergency preparedness and response training curriculum targeted to federal, state, and local emergency management agencies. Without proper training, emergency response personnel may not develop the requisite skills or obtain the necessary knowledge to plan for and respond to an incident or evaluate radiological exercises and drills.
- Additionally, in FY 2007 REPP will transfer program lessons learned to homeland security initiatives at the local, tribal, state, and federal levels. The states and counties participating in REPP have been recognized as having developed robust emergency response capabilities that are models across the nation for response to all hazards.

IV. Program Justification of Changes

N/A. There are no program enhancements for REPP.

REPP - 6

V. Exhibits and Other Supporting Materials**A. Justification of Proposed Legislative Language**

Department of Homeland Security
Preparedness Directorate
Justification of Proposed Changes in Radiological Emergency Preparedness
Appropriation Language

The aggregate charges assessed during fiscal year [2006] 2007, as authorized in Title III of the Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 1999 (42 U.S.C. 5196e), shall not be less than 100 percent of the amounts anticipated by the Department of Homeland Security necessary for its Radiological Emergency Preparedness Program for the next fiscal year: *Provided*, That the methodology for assessment and collection of fees shall be fair and equitable and shall reflect costs of providing such services, including administrative costs of collecting such fees: *Provided further*, That fees received under this heading shall be deposited in this account as offsetting collections and will become available for authorized purposes on October 1, [2006] 2007, and remain available until expended.

Explanation of Changes:

There are no changes requested for REPP.

PPA Mission Statement				
The Radiological Emergency Preparedness Program (REPP) assists state, local, and tribal governments in the development of offsite radiological emergency preparedness plans within the emergency planning zones of Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities. The REPP fund is financed from user fees assessed and collected from the NRC licensees to cover budgeted costs for radiological emergency planning, preparedness, and response activities in the following year.				

Summary Justification and Explanation of Changes				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$8,000	\$8,528	\$13,875	\$5,348
Salaries and Benefits includes costs for 130 FTEs. The FY 2007 request includes an increase of \$369,000 for the proposed January 2007 2.2 percent increase in personnel compensation and an annualization of FY 2006 pay increase, \$4,470,000 increase for 40 new FTEs, and FY 2007 request includes an increase of \$508,645 in other technical programmatic adjustments.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$1,000	\$599	\$635	\$36
Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations. The FY 2007 request includes \$36,000 for non-pay inflation.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$1,000	\$586	\$607	\$21
GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes increases of \$21,000 in non-pay inflation.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Rent	\$0	\$776	\$786	\$10
Other rent includes all payments to a non-federal source for rental space, land, and structures. The FY 2006 request includes an increase of \$10,000 in non-pay inflation.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$20	\$29	\$9
Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes \$9,000 for non-pay inflation.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Printing	\$0	\$11	\$12	\$0
Printing includes all costs for printing and reproduction obtained from the private sector or from other federal entities. There is no significant change from FY 2006 to FY 2007.				

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$0	\$2,108	\$2,186	\$78
Advisory and assistance services include services acquired by contract from non-federal sources (that is the private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the Federal Government. The \$78,000 increase is for non-pay inflation.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$6,000	\$5,163	\$5,378	\$215
Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The \$215,000 increase is for non-pay inflation and working capital fund charges.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Purchase from Government Accounts	\$0	\$47	\$59	\$13
Purchases from government accounts include costs for purchases from other federal government agencies or accounts that are not otherwise classified. The \$13,000 increase is for non-pay inflation and working capital fund charges.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Operation & maintenance of facilities	\$0	\$149	\$151	\$2
Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another federal government account. The \$2,000 is for non-pay inflation.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$0	\$25	\$26	\$1
Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The \$1,000 increase is for non-pay inflation.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$0	\$84	\$87	\$3
Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The increase of \$3,000 is for non-pay inflation and working capital fund charges.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Preparedness Directorate
United States Fire Administration

I. United States Fire Administration Overview**A. Mission Statement for The United States Fire Administration(USFA):**

The mission of The United States Fire Administration (USFA) is to reduce life and economic losses due to fire and related emergencies through leadership, coordination, and support, and also to prepare the Nation's first responder and health care leaders through ongoing, and when necessary, expedited training regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all hazard and terrorism emergencies of all kinds.

USFA coordinates with other federal agencies, with state and local emergency service communities, the private sector, and with colleges, universities and other DHS educational consortium participants. In fulfilling our mission we utilize the assets of the National Fire Academy (NFA), the Noble Training Center (NTC), Emergency Education NETwork EENET or USFA Distance Learning Systems, the National Fire Data Center, and USFA's National Fire Programs (NFP) Division.

B. Budget Activities:

USFA significant accomplishments in FY 2005:

- Continued serving as the federal fire focus by championing federal fire protection issues to reduce the national fire loss and to improve protection of the public from fire and related emergencies.
- Developed policy, procedures, and training for a cadre of structural firefighters that will be identified by state in wild land fire threat zones.
- Developed and delivered training programs to an estimated 70,000 fire and emergency response personnel at the National Fire Academy both on and off campus through its diverse delivery system and network of national training partners.

In FY 2006, USFA is planning on accomplishing the following goals:

- Deliver training programs to fire and emergency response personnel at the NFA, both on and off campus, through its diverse delivery system and network of national training partners.
- Through the use of technology, develop and disseminate new national prevention, public education, preparedness and planning programs that address reducing the nation's risk and vulnerabilities to all hazards, including the threat of terrorism.
- Continue comprehensive training to support the National Incident Management System Integration Center (NIC) and the nationwide implementation on National Incident Management System (NIMS).
- Field new NIMS courses in Incident Command System (ICS), crisis communications management, and multi-agency coordination.

In FY 2007, USFA will accomplish the following goals:

- Deliver training program to fire and emergency response personnel at the NFA.

USFA - 1

- Perform comprehensive training to support the NIC and the nationwide implementation on NIMS.
- Field new NIMS courses in ICS, crisis communications management, and multi-agency coordination.

C. Budget Request Summary:

USFA requests \$46,849,000 to support its ongoing mission of providing training for the Nation's first responder and health care leaders that helps them reduce the loss of life. At the start of FY 2006 and continuing through FY 2007, the USFA was reorganized from Federal Emergency Management Agency (FEMA) to the DHS Preparedness Directorate. The FY 2007 funding request contains a \$2,350,000 increase, of which \$1,500,000 will fund development of new training curriculum and an additional FTE to better prepare the Nation's medical emergency personnel to effectively manage the effects of natural disasters, terrorists attacks and other catastrophic events. An additional \$850,000 covers mandatory cost increases associated with payroll and inflationary costs.

II. Summary of FY 2007 Budget Estimates by Program/Project Activity (PPA)

* The Preparedness Directorate did not exist prior to FY 2006. For comparison purposes, FY 2005 is an estimate of actuals.

III. Current Services Program Description by PPA

**Department of Homeland Security
U. S. Fire Administration
Program Performance Justification
(Dollars in thousands)**

PPA: United States Fire Administration

	Perm Pos	FTE	Amount
2005 Actual*	[113]	[113]	[\$42,847]
2006 Revised Enacted	113	113	\$44,499
2007 Adjustments-to-Base	850
2007 Current Services	113	113	\$45,349
2007 Program Change	2	1	1,500
2007 Request	115	114	\$46,849
Total Change 2006-2007	2	1	2,350

* The Preparedness Directorate did not exist prior to FY 2006. For comparison purposes, FY 2005 is an estimate of actuals.

Preparedness requests \$46,849,000 in FY 2007 for this activity. This reflects an increase of \$850,000 for pay and non-pay inflation and a program increase of \$1,500,000.

CURRENT SERVICES PROGRAM DESCRIPTION:

The USFA coordinates, directs, and controls fire prevention, mitigation and response activities, and fire service and allied professions training and education programs. It provides subject matter expertise to the emergency response community by serving as a clearing house federal fire protection issues, developing policy, procedures, and training for a cadre of structural firefighters that will be identified by state in wild land fire threat zones, delivering training programs to fire and emergency response personnel at the National Fire Academy, and delivering resident course offerings to students at the National Emergency Training Center and the Noble Training Center. Prior to FY06, FEMA funding estimates included USFA, the Emergency Management Institute (EMI), and the Nobel Training Center (NTC). Under 2SR, EMI remained part of FEMA, while NTC and USFA were integrated into Preparedness.

IV. Program Justification of Changes

Description of Item

An increase of \$1,500,000 and 1 FTE is requested for FY 2007 to increase the Nation's preparedness for natural or terrorist disasters through enhanced emergency medical personnel training.

Justification

This funding will enable the USFA to develop and upgrade course structures and materials to remain current with evolving technologies, techniques, and threats.

Impact on Performance (Relationship of Increase to Strategic Goals)

This program supports the strategic Protection 3.7 – 100% - Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters, or other emergencies. The funding will allow USFA to support WME related training and improvements to the Noble training center.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Preparedness Directorate
Justification of Proposed Changes in United States Fire Administration
Appropriation Language**

For necessary expenses of the United States Fire Administration and for other purposes, as authorized by 15 U.S.C. 2201 et seq. and 6 U.S.C. 101 et seq., [\$44,948,000] **\$46,849,000**.

Explanation of Changes:

There are no changes requested.

PPA Mission Statement					
The mission of The United States Fire Administration (USFA) is to reduce life and economic losses due to fire and related emergencies, through leadership, coordination, and support and also to prepare the Nation's first responder and health care leaders through ongoing and when necessary, expedited training regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all hazard and terrorism emergencies of all kinds.					

Summary Justification and Explanation of Changes				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$10,161	\$10,617	\$11,020	\$403
Salaries and Benefits includes costs for 113 FTEs in FY 2006 and 114 FTEs in FY 2007. The FY 2007 request includes an increase of \$207,032 for the proposed January 2007 2.2 percent increase in personnel compensation, \$149,900 for an additional FTE to help with course materials, and 46,070 in non-pay inflation				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$395	\$391	\$391	\$0
Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Transportation of Things	\$91	\$71	\$71	\$0
Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Rent	\$247	\$644	\$644	\$0
Other rent includes all payments to a non-federal source for rental space, land, and structures.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$2,792	\$2,170	\$2,405	\$235
Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases for class communication materials and utilities \$198,110 and non-pay inflation \$36,890.				

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Printing	\$425	\$697	\$697	\$0
Printing includes all costs for printing and reproduction obtained from the private sector or from other federal entities.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Preparedness Directorate
Infrastructure Protection and Information Security

I. Appropriation Overview**A. Mission Statement for Infrastructure Protection and Information Security:**

The Infrastructure Protection and Information Security (IPIS) appropriation funds the office of the Assistant Secretary for Infrastructure Protection and the office of the Assistant Secretary for Cyber Security and Telecommunications.

Office of the Assistant Secretary for Infrastructure Protection:

The Office of Infrastructure Protection (IP) reduces the vulnerability of the Nation's Critical Infrastructures and Key Resources (CI/KR) to terrorist and natural disasters, enables timely protective response to threats and incidents, and enable rapid recovery in the aftermath of such disasters. IP functions include: (1) Leading, integrating, and coordinating implementation of efforts among federal departments and agencies, state and local governments, international partners and the private sector to protect the Nation's CI/KR; (2) Ensuring analysis of the linkages between threats, vulnerabilities, and potential consequences to enable risk-based protective measures; (3) Ensuring maintenance of a sector governance and information sharing framework to facilitate coordination and collaboration for infrastructure protection; (4) Ensuring development of a National Infrastructure Protection Plan and mechanisms for complementing protective response under the National Response Plan (NRP); (5) Establishing and maintaining international programs to promote a global culture for the protection of CI/KR; and (6) Providing operational support to government and private entities in response to significant threats and incidents.

Office of the Assistant Secretary for Cyber Security and Telecommunications:

The Office of Cyber Security and Telecommunications reduces the risk to the vulnerability of the Nation's telecommunications and information technology infrastructures, enables timely response and recovery under all circumstances, including both natural disaster and terrorist related disruptions, and coordinates the planning for and provision of national security and emergency preparedness (NS/EP) communications for the Federal Government. Functions include: (1) Oversee the development of a national telecommunications structure that is responsive to national security and emergency preparedness needs of the Nation; (2) Ensure the provision of a national cyber response system to prevent, detect, respond to and reconstitute rapidly in the event of a cyber incident; (3) Ensure the provision of an industry-Government coordinating center with capabilities to assist in the initiation, coordination, restoration and reconstitution of NS/EP telecommunications services or facilities under all conditions of crisis and emergency; (4) Oversee efforts with the private sector to reduce vulnerabilities and minimize the severity of cyber attacks and develop recommendations for telecommunications architecture to meet current and future national security and emergency preparedness telecommunications requirements; (5) Oversee the development of procedures for the management, allocation, and use of federally owned or leased telecommunications assets under all conditions of crisis or emergency; (6) Ensure the development of a national awareness program and training and education to empower businesses, the general workforce and the general population to

secure their portion of cyberspace; (7) Coordinate with the intelligence and law enforcement communities to identify and reduce threats to cyber space; (8) Provide technical and analytical expertise and staff support to the National Security Telecommunications Advisory Committee responsible under Executive Order 12382 to provide information and advice to the President; (9) Oversee the conduct of technical studies and, in partnership with the Science and Technology Directorate, coordinate and review research and development efforts to support work in the telecommunications and cyber security arenas; (10) Ensure the conduct of test and exercise programs in the telecommunications and cyber security area to evaluate the robustness of incident management and recovery plans and programs.

B. Budget Activities:

Management and Administration (M&A)

IPIS M&A was appropriated \$82,509,000 in FY 2006. The M&A appropriation funds the salary and administrative costs for the IPIS programs. The salary costs include the FTE salary and locality pay, including benefits and awards. The administrative costs for IPIS include non-GSA rent, facilities fit out, office supplies and training expenses. Additionally, the administrative costs include support from the Office of the Under Secretary, including the CIO, Business Operations Office, Front Office and Administrative Operations.

Infrastructure Protection

Critical Infrastructure Outreach and Partnerships (CIOP) - CIOP was appropriated \$111,055,000 in FY 2006, including \$49,500,000 for the National Center for Critical Information Processing and Storage (NCCIPS). These funds are used develop and maintain an organizational structure, operational tools and defined processes to assure a continuous state of awareness and alert. A robust organizational framework in support of all stakeholders facilitates the identification, prioritization, coordination, and protection of critical infrastructures/key resources. It also provides forums and networks to encourage sharing of information about threats, vulnerabilities, incidents, potential protective measures, and best practices that enhance response, mitigation and restoration activities.

Critical Infrastructure Identification and Evaluation (CIIE) - CIIE was appropriated \$67,815,000 in FY 2006. CIIE carries out vulnerability assessments of critical infrastructure and key assets of the United States, and communicates standards to the infrastructure owners and key stakeholders. CIIE collects, verifies, and analyzes vulnerability and protective measure information on critical infrastructure and key assets from private sector owners and operators, public sector owners and operators, regulatory agencies within the Federal Government, and state and local governments so that protective measures can be prioritized.

National Infrastructure Simulation and Analysis Center (NISAC) - NISAC was appropriated \$19,800,000 in FY 2006. These funds are used to provide a comprehensive modeling and simulation capability to perform an analysis of critical infrastructures, their interdependencies, complexities, and the consequences of disturbances. NISAC promotes nationwide involvement in infrastructure-related modeling analysis by enabling contributions from a wide range of sources and supports consequence mitigation strategy development by predicting the cascading effects of potential operational disruptions to U.S. infrastructure.

Biosurveillance (BIO) - Biosurveillance was appropriated \$13,959,000 in FY 2006. These funds are used to improve the Federal Government's capability to rapidly identify and characterize a potential bioterrorist attack by enhancing ongoing surveillance and analysis capabilities in areas such as human

health, hospital preparedness, state and local preparedness, vaccine research and procurement, animal health, food and agricultural safety, and environmental monitoring. This interagency initiative promotes data sharing and joint analysis at the federal, state, local, and tribal levels. The preparedness portion of this effort involves the integration of current and new efforts into a comprehensive system that provides a real-time operating picture. This national Biosurveillance system will help shape current and proposed disease surveillance systems and guide research and development of technologies and capabilities.

Protective Actions (PA) - Protective Actions was appropriated \$90,485,000 in FY 2006. These funds are used to assist federal, state, local, tribal, and private sector organization in devising protection strategies, programs, and best practices. Training is also provided to infrastructure owners and operators and the local law enforcement entities that help protect them. Best practice activities reduce the vulnerability of and coordinate the protection of critical infrastructure and key resources. Critical infrastructure and key resources provide the essential services that underpin American society and must be protected.

Chemical Stockpile Emergency Preparedness Program (CSEPP) - Through CSEPP, Preparedness Operations will enhance existing local, installation, tribal, and state capabilities to protect the health and safety of the public, workforce, and the environment from the effects of a chemical accident or incident involving the eight United States Army chemical stockpile sites. The funding for this program is provided through a reimbursable agreement with the Department of the Army.

Cyber Security and Telecommunications

Cyber Security (CS) – CS was appropriated \$92,415,000 in FY2006. These funds are used to work collaboratively with public, private, and international entities to secure cyberspace and America's cyber assets. The strategic goals of National Cyber Security Division (NCSA) are as follows: (1) establish a national Cyberspace Security Response System to prevent, detect, respond to, and reconstitute rapidly after cyber incidents; (2) work with public and private sectors to reduce vulnerabilities and minimize the severity of cyber attacks; (3) promote a comprehensive national awareness program to empower all Americans—businesses, the general workforce, and the general population to secure their own parts of cyberspace; (4) foster adequate training and education programs to support the Nation's cyber security needs; (5) coordinate with the intelligence and law enforcement communities to identify and reduce threats to cyber space; and (6) build a world-class organization that aggressively advances its cyber security mission and goals in partnership with its public and private stakeholders.

National Security / Emergency Preparedness (NS/EP) Telecommunications - NS/EP Telecommunications was appropriated \$141,206,000 in FY2006. These funds are used to provide mission-critical communications for federal, state and local governments, and private industry through the following functions: (1) Administering the National Coordinating Center for Telecommunications to facilitate the initiation, coordination, restoration and reconstitution of NS/EP Telecommunications services or facilities under all circumstances; (2) Developing and ensuring the implementation of plans and programs that support telecommunications infrastructure hardness, redundancy, mobility, connectivity and security; and (3) Serving as the focal point for joint industry - Government and interagency NS/EP telecommunications planning and partnerships.

C. Budget Request Summary:

Infrastructure Protection and Information Security requests 445 positions, 445 FTE, and \$549,140,000 for FY 2007, a decrease of \$70,104,000 over the FY 2006 appropriation of 445 FTE and \$619,244,000. The total net base decrease is \$115,104,000. Within this total, Preparedness and the Department have identified critical enhancements to existing programs (e.g., program increases) and prioritized new undertakings to accomplish its mission. The two new initiatives are:

1. NIPP Program Office, an enhancement of \$35,000,000 to carry out responsibilities and tasks under Homeland Security Presidential Directive 7 and the National Infrastructure Protection Plan.
2. Chemical Security Office, \$10,000,000 to enhance chemical site security for inspectors and administrative/overhead costs.

II. Summary of FY 2007 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security Preparedness Directorate Infrastructure Protection and Information Security (IPIS) Summary of FY 2007 Budget Estimates by Program/Project Activity (Dollars in Thousands)												
Program/Project Activity	FY 2005 Actual*		FY 2006 Revised Enacted		FY 2007 Request		Total Changes		Increase (+) or Decrease (-) For FY 2007		Adjustments-to-Base

2007 Program Change
2007 Request	445	445	\$84,650
Total Change 2006-2007	2,141

* The Preparedness Directorate did not exist prior to FY 2006. FY 2005 M&A was appropriated in the Information Analysis and Infrastructure Protection account, however, the amount is not comparable. Please see the Department Overview section of the Budget for FY 2005 actuals from the legacy IAIP account.

The Preparedness Directorate requests \$84,650,000 for M&A. This is an increase of \$2,141,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The M&A appropriation funds the salary and administrative costs for the IPIS programs. The salary costs include the FTE salary and locality pay, including benefits and awards. The administrative costs for IPIS include non-GSA rent, facilities fit out, office supplies, training and travel expenses. A portion of the DHS working capital fund items that are directly correlated to the FTE are funded out of M&A. Additionally, the administrative costs include support from the Office of the Under Secretary, including the CIO, Business Operations office, Front Office and Administrative Operations.

2007 Adjustments-to-Base	(44,955)
2007 Current Services	\$66,100
2007 Program Change	35,000
2007 Request	\$101,100
Total Change 2006-2007	(9,955)

* The Preparedness Directorate did not exist prior to FY 2006. For FY 2005, the funding amounts are provided for those organizations/programs that had a comparable FY 2005 funding level. Please see the Departmental Overview section of the Budget for FY 2005 Actuals from legacy agencies.

The Preparedness Directorate requests \$101,100,000 for CIOP. This is a decrease of \$9,955,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

CIOP is critical to the support and development of strategic partnerships between DHS and its stakeholders across federal, state and local governments, private industry and international communities. The development and maintenance of an organizational structure, operational tools and defined processes are essential to assuring a continuous state of awareness. A robust organizational framework in support of all stakeholders facilitates the identification, prioritization, coordination, and protection of critical infrastructures/key resources. It also provides forums and networks to encourage sharing of information about threats, vulnerabilities, incidents, potential protective measures, and best practices that enhance response, mitigation and restoration activities.

CIOP funds are distributed among the Risk Management Division (RMD), Contingency Planning & Support Division (CPSD), Infrastructure Partnership Division (IPD), and the Office of Infrastructure Protection (OIP) within the Office of Infrastructure Protection.

Preparedness executes CIOP through the following major subprograms:

- Infrastructure Programs Office (IPO)
- Critical Infrastructure Warning Network (CWIN)
- National Infrastructure Coordination Center (NICC)
- Protected Critical Infrastructure Information (PCII) Program
- Infrastructure Coordination and Analysis Office (ICAO)
- National Infrastructure Protection Plan (NIPP) Policy, Plans & Performance Metrics
- Committee on Foreign-owned Investment in the U.S. (CFIUS) Infrastructure
- Constellation
- Infrastructure Protection Management (IPM)

- National Risk Dashboard

Infrastructure Programs Office (IPO):

IPO supports and facilitates two-way flow of information to assist CI/KR stakeholders in protecting their CI/KR. Activities include:

- Homeland Security Information Network (HSIN): Homeland Security Information Network (HSIN) supports two-way information sharing capability to the 13 Critical Infrastructure and 4 Key Resource sectors. This supports both programmatic development and capability deployment. The sectors see this program as finally a true contribution to the "partnership" by DHS and the government. Several of the sectors and their sector-specific agencies have invested substantial time and energy into working on their part of this program. In addition, in the current threat environment, several sectors have a great desire to expand their reach to members of their sectors for alerts, warnings and advisories through HSIN which they cannot do on their own--a core mutual responsibility with DHS.
- National Infrastructure Advisory Council (NIAC) Support: The National Infrastructure Advisory Council (NIAC) is a Federal Advisory Council that provides policy advice to the President on Critical Infrastructure Protection.
- National Response Plan (NRP) support: The NRP provides the NRP community with technical support and expertise in conjunction with response and recovery activities. It also collects and communicates incident level information, with the DHS IP, and appropriate Information Sharing and Analysis Centers (ISAC).
- Develop and maintain Critical Infrastructure Protection (CIP) Sector Partnership Model: The CIP Model develops and provides support for sector partnership structures and processes, such as the sector and government coordinating councils and their operating requirements, and implementation of cross-sector programs to support the partnerships.

Protected Critical Infrastructure Information (PCII) Program:

The PCII Program collaborates directly with industry to provide critical infrastructure information (CII) that requires protection or may be vulnerable to terrorism. The program builds the automated means to track the receipt, validation, processing, storage, management, and dissemination of PCII to DHS organizations as well as other federal agencies, state and local governments. Essential to the program's success is industry's confidence that information submitted by the private sector will be fully safeguarded. PCII also ensures such safeguards are in place.

National Infrastructure Coordination Center (NICC):

Activities within NICC include:

- Watch Operations and Operations Support: This activity includes maintaining 24x7 NICC operations, both at the Herndon, VA, facility and the IP NICC Desk in the Homeland Security Operations Center (HSOC). The NICC is the primary conduit for sector-related information sharing between the Infrastructure Coordination and Analysis Office, the Homeland Security Operations Center (HSOC), federal agencies, and private-sector partners.
- Continuity of Operations (COOP) planning: In the event that the NICC facility, located in Herndon, VA, is rendered inoperable for any reason, the NIPP will be able to function at an alternate site with appropriate connectivity to all mission-critical systems.
- Training and Exercises: CIOP is responsible for conducting and/or participating in tests and exercises to coordinate sector preparedness and to develop and improve analysis, coordination, and restoration processes. These tests and exercises will be internal and external, and may be conducted

on the national, regional, and local levels, both classified and unclassified. Full implementation of a critical infrastructure exercise program is not expected until FY 2006.

NICC funding also supports the following capabilities:

- Operational Tools – Prizm Development and Data Integration: Prizm is the primary operational tool for the NICC. Prizm includes logging, data-ingest, visualization, and reporting capabilities, and will eventually utilize data mining, data fusion, and other state-of-the-art technologies to assist NICC Operations personnel in assessing the operational status of the critical infrastructures and key resources.
- Operational Tools – Hardware & Software
- Operational Tools – Data/Information Sources

Infrastructure Coordination and Analysis Office (ICAO):

ICAO provides critical sector expertise to interpret infrastructure relevant threats, develop and support situational assessments, and enable owners/operators to conduct risk evaluations.

Activities include:

- Building/Sustaining Public – Private Partnerships & Info. Sharing Programs: This subprogram will: 1) Build/maintain partnerships with infrastructure owners/operators and government agencies with CIP responsibilities and 2) Develop/support/maintain information-sharing programs with sector stakeholders
- Geospatial: This program provides geospatial mapping, imaging, analysis, and sorting of the critical infrastructure sectors (CI) and key resources (KR) to support collection and review of the Nation's infrastructures. The IT geospatial capability will assist in maintaining operational, situational, and strategic awareness of the CI/KR. This IT will enable decision makers to understand and respond to adverse events and justifications.

Critical Infrastructure Warning Network (CWIN):

CWIN is survivable network connecting DHS with essential sectors that restore the Nation's infrastructure during emergencies (electricity, IT and telecom); states' Homeland Security Advisors; and Sector-specific Agencies and resources for each of the critical infrastructure sectors.

National Infrastructure Protection Plan (NIPP) Policy, Plans & Performance Metrics: HSPD-7 (Critical Infrastructure Identification, Prioritization and Protection) requires DHS to produce a comprehensive, integrated National Plan for Critical Infrastructure and Key Resources protection. The NIPP provides the framework and sets the direction for implementing a coordinated, national infrastructure protection effort and is based upon a risk management framework. The comprehensive NIPP will be supported by Activities include:

- Manage the development and broad implementation of the National Infrastructure Protection Plan
- Oversee the development of Sector-Specific Plans that will detail the application of the risk management framework to each of the 17 specific CI/KR sectors.
- Lead cross-cutting IP policy analysis, development, and implementation on behalf of IP through coordination with all appropriate stakeholders.
- Provide contractor support for management and leadership function of the IP front office.
- Provide IP with HR, Facilities Mgmt, Budget and IP Performance Management support and oversight.

Committee on Foreign-owned Investment in the U.S. (CFIUS) Infrastructure:

The CFIUS responsibilities of DHS will be transferred from Preparedness to Policy in FY 2007. As a member of the Committee on Foreign Investment in the United States (CFIUS), DHS is responsible for evaluating foreign ownership, control and influence (FOCI) of U.S. companies in accordance with the Exon-Florio Amendment to the Defense Production Act of 1950 (50 App. U.S.C. § 2170) to determine whether a proposed transaction poses a threat to national security.

Constellation:

Constellation addresses DHS's critical infrastructure protection mandate at the local level through an automation system hosted and used by law enforcement and first responders. This system combines an information portal for situational awareness along with a comprehensive Automated Critical Asset Management System (ACAMS). Constellation ACAMS is used by local law enforcement and first responders to inventory, categorize, prioritize, and database critical assets. It includes a workflow and tool set that enables localities to implement a complete program for critical asset management. These tools include a risk assessment system developed to DHS PREPAREDNESS standards, database elements compatible with the National Asset Database, and a fully realized reporting subsystem that enables automated production of Buffer Zone Protection Plans.

Infrastructure Protection Management (IPM):

IPM provides support for the management and leadership needs of the IP front office.

National Risk Dashboard

IP is developing a systematic planning and management tool (the "Dashboard Navigator") that will allow DHS management to identify and evaluate, at the strategic level, the current Readiness of prevention, protection, response and recovery systems within DHS, other federal agencies, and state, local, tribal governments to include the private sector. The purpose for having such a tool is to allow DHS management to identify, in greater depth, the current Readiness of the 17 sectors to respond to various threats.

Dashboard will be refined and extended to subsectors to fuse threat streams with critical infrastructure/key resource assets, vulnerability information and consequences. The refinements to the National Risk Dashboard will permit more targeted and efficient protective strategy development as well as provide an integrated view of national, regional, state and local threats, vulnerabilities, consequences and risk. Dashboard uses IP's risk determination methodology and visually presents a risk profile for critical infrastructure assets.

The following is a description of the CIOP program accomplishments and goals:

In FY 2005, CIOP had the following accomplishments:

- Expanded the HSIN-CS to critical infrastructure owners and operators in 11 sectors and major sub-sectors.
- Implemented the Critical Infrastructure Act of 2002 through PCII Program Office in accordance with relevant provisions of HSPD-7 and HSPD-9.
- Developed the Sector Partnership Model as a framework for CIP sector and cross-sector partnerships including assessments, identification of gaps and development of an implementation plan.
- Facilitated identification of private Sector Coordinating Councils (SCC) and a cross sector council led and governed by owners and operators.
- Developed Government Coordinating Councils (GCC) and the NIPP Senior Leadership Council.

- Continued support of the National Infrastructure Advisory Council, including delivery of reports and recommendations.
- Datacenter: Initiated computer hosting of departmental applications, network connectivity, and critical data storage.
- Completed issuance and implementation of the interim NIPP; continued to work stakeholder outreach and engagement, refined the draft sector specific plans, and measured and reported on national and sector-section progress.
- Expanded CWIN to all 50 states and the District of Columbia.
- Established the NICC as the 24X7 customer service interface for CI/KR partners.

In FY 2006, CIOP is planning to accomplish the following goals:

- Issue 6 CFR Part 29, Final Rule, "Procedures for Handling Critical Infrastructure Information (CII)".
- Accredit sector-specific federal entities and selected state and local entities to use and store PCII information, and implement the web-based training for PCII Officers and PCII users.
- Implement full operating capability for accepting electronic CII submissions.
- Significantly increase the number of submissions of CII through outreach to federal, state, local and private sector stakeholders.
- Enhance and streamline NICC procedures, reporting practices and supporting technologies to improve situational awareness.
- Continue NICC support of private sector partners' continuity of business information requirements through improved information sharing processes.
- Develop and implement NICC Prizm, HSIN-CS and Geospatial integration plans.
- Complete development of National Response Plan private sector support Concept of Operations.
- Fully implement Sector Partnership Model.
- Deploy HSIN-CS to all 17 critical infrastructure sectors and major sub-sectors.
- Ensure compatibility with the DHS Enterprise Architecture as Constellation System is moving from a pilot to an operational phase.
- Project Constellation - obtain FISMA and PCII compliance with protocols.
- Develop data flow from local Constellation ACAMS systems to national systems such as the NADB and HSIN.
- Chair CFIUS Vulnerability and Risk Assessment Standing Committees.
- Provide oversight/management of CFIUS security agreements; performing names checks, sponsoring clearances (when required by the agreement) and coordinating USG interactions with the companies.
- Complete and issue the National Infrastructure Protection Plan (Base Plan).
- Sector-specific Plans - Sector-specific agencies submit initial supporting plans for review and coordination among sector partners.
- CWIN to maintain 141 remote sites connecting DHS to federal, state, local and selected private sector critical infrastructure subscribers to a survivable communications network.
- Refine Office of Infrastructure Protection planning guidance and develop long-term strategic plan.

In FY 2007, CIOP is planning to accomplish the following goals:

- Begin oversight site visits and evaluations to accredited entities to ensure adherence to PCII program guidance.
- Expand the PCII Accreditation Program to all remaining federal, state, and local entities with a need to access and store PCII.

- Based on lessons learned and operational requirements, revise and publish the PCII Program Manual.
- Expand HSIN-CS in all CI/KR sectors, both in terms of numbers of sub-sectors, and numbers of users within each sector.
- Revise NIPP (Base Plan) as necessary based on experiential data and guidance.
- Finalize and coordinate implementation of sector-specific plans.
- Support sector plan implementation initiatives to further sector engagement, coordination and protection.
- Finalize NIPP performance metrics.
- CWIN operation expanded to territorial sites and other critical sectors.
- Deployment of Constellation to diverse urban areas implementing approach to local critical asset management.
- Support rollouts beyond the Los Angeles pilot system to service in other cities.
- Expand pilots to other critical infrastructure and private sector entities and their local law enforcement partners.
- Incorporate feedback from pilot private sector participants.
- Develop technical plan and implement integration with other DHS national-level systems.
- Integrate information developed from Constellation into National Baseline Risk Assessment.
- Conduct Exercises between federal, state and local, and private sector stakeholders.

Net Base Changes:

The total net base reduction is \$44,955,000.

Base Decreases: Description of Item

FY 2006 base funding for the National Center for Critical Information Processing and Storage (NCCIPS), \$49,500,000, is not being requested in FY 2007 in CIOP.

FY 2006 base funding of \$1,650,000 for CFIUS is transferring to Policy.

Justification

This realignment reflects an adjustment of infrastructure protection funds to better align IP activities with program strategic goals and objectives.

Base Increase: Description of Item

FY 2007 funding of \$4,000,000 for NIPP Program Management is being realigned from Protective Actions to CIOP.

FY 2007 funding includes \$2,195,000 for technical programmatic increases.

Justification

This realignment is to better align IP activities with program strategic goals and objectives.

The Preparedness Directorate requests \$71,631,000 for Critical Infrastructure Identification and Evaluation. This is an increase of \$3,816,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

CIIE funds are distributed among the Homeland Infrastructure Threat and Risk Analysis Center (HITRAC), Risk Management Division (RMD), and Contingency Planning and Support Division (CPSD) within the Office of Infrastructure Protection.

Preparedness executes CIIE through the following major subprograms:

- Reduce Vulnerabilities in Control Systems
- Strategic Activities
- Vulnerability Assessments
- Field Operations and Support
- Infrastructure Information, Identification, Integration, and Analysis (I4A)

The **Reduce Vulnerabilities in Control Systems** subprogram is funded by CIIE. However, the actual execution of this program takes place in the National Cyber Security Division. The program description is included in the Cyber Security Program portion of this document.

The **Strategic Activities** sub-program supports the Risk Analysis and Management for Critical Asset Protection (RAMCAP) program, the Vulnerability identification Self Assessment Tool (ViSAT), and Strategic Activity Analysis.

- The RAMCAP program is central to the Office of Infrastructure Protection's strategic risk analysis activities, and was developed to reduce risk for catastrophic attacks, reduce consequences of successful attacks, improve security planning for the development of future Critical

Infrastructure/Key Resources (CI/KR), and provide a common risk assessment methodology to evaluate risk across all infrastructure sectors. Specifically, the program will develop general vulnerability and risk assessment guidelines that can be used as the basis for vulnerability and risk assessments on assets in all CI/KR sectors. Additionally, the program will develop assessment guidelines that can then be used to compare assets from different sectors and will allow the prioritization for protection of our nation's CI/KR. Sector and segment specific RAMCAP top screens and modules will provide the Preparedness Directorate with the site-specific consequence and vulnerability data necessary to compare risk across sectors.

- ViSAT is a less complex risk assessment tool, originally developed by the Transportation Security Administration (TSA) that has been adapted for use as a self-assessment tool for managers of stadiums, arenas, and convention centers. ViSAT provides owners/operators with a no-cost easy-to-use means of assessing the effectiveness of their facility's current security system and identifying areas in need of improvement. Creation of additional modules is planned for other soft targets such as performing arts centers, retail centers, schools, office buildings, and religious centers.
- The Strategic Activities Analysis is designed to facilitate efforts to manage CI/KR risks over the long term, and review the appropriate tools and resources to guide mitigation strategies, and prioritize the allocation of finite federal resources to those mitigation strategies. The Preparedness Directorate is tasked to work with federal and private sector partners to identify CI/KR and is uniquely positioned to bring together information on threat streams, serving as the nexus for intersecting critical information and key participants. This analysis is completed by the Homeland Threat and Risk Analysis Center (HITRAC), which merges the Department's infrastructure expertise with intelligence analysts to map terrorist threats to infrastructure vulnerabilities. . HITRAC was created to integrate, analyze and share information regarding the risks of terrorist attacks to U.S. infrastructure for customers in DHS, other federal departments and agencies, the Intelligence Community (IC), state and local governments and law enforcement agencies, and the private sector.

The **Vulnerability Assessments** sub-program includes Vulnerability Field Assessment teams, the Vulnerability Assessment Comprehensive Review (CR), and support activities.

- The Vulnerability Field Assessment team conducts site visits to assist facility owners and operators and state and local law enforcement agencies in identifying vulnerabilities in all 17 infrastructure sectors including the nuclear, chemical, and commercial assets, dams, and emergency services sectors. The tools used to gather and catalog national critical infrastructure and key resource CI/KR vulnerability information include web-based self-assessment tools developed and deployed by the team. The unclassified information collected is disseminated to federal, state, local, tribal, and private sector stakeholders and classified information is provided to authorized owners and operators. The information collected is used as an input into the Strategic Risk Assessment process.
- The Vulnerability Assessment Comprehensive Review (CR) takes an in-depth, multi-agency approach to analyzing vulnerabilities at critical infrastructure assets and systems and identifying appropriate protective measures to address them. These CRs focus on individual sectors and include individual facilities in geographic isolation or groups of facilities in relative proximity to each other. Interagency teams comprised of appropriate federal, state, local and private sector stakeholders analyze vulnerability, consequence, and threat information, conduct site visits as

appropriate, and work collaboratively to develop mitigation strategies that protect the assets and surrounding communities.

- The Vulnerability Field Assessment support activities provide logistical support for vulnerability identification fieldwork and other support as requested by outside agencies conducting assessments.

The **Field Operations and Support** sub-program includes the Protect National Security Special Events and Other Special Events Program, Protective Security Advisors, the Tactical Operations Support team, and Headquarter Analysis and Field Support activities.

- The Protect National Security Special Events and Other Special Events program performs identification of critical infrastructure and operational characteristics for special events. The program team interfaces with federal, state, and local interagency representatives on infrastructure protection issues and advises the Principal Federal Official (PFO) on infrastructure protection-related issues in the affected area.
- Protective Security Advisors (PSA) convey threat advisories and specify warning information and guidance on appropriate protective measures and countermeasures to the community they serve. PSAs also assist in the verification of critical assets, coordinate efforts with local asset owners/operators and local law enforcement personnel, provide expert advice, ensure validation of protective measures, and enhance the proper coordination/communication structure between federal and local protection officials regarding critical infrastructure protection.
- The Tactical Operations Support team deploys PSAs with the PFO to provide infrastructure expertise and responds to requests for support, e.g., deploying Site Assistance Visits and Buffer Zone Protection Plans, and provides Radiological Detection Device training and distribution. The team uses systems compliant with the National Incident Management System (NIMS) and tracks developing incidents, monitors response activities, and coordinates with other offices as the central point of contact for critical infrastructure protection during incidents.
- Headquarters Analysis and Field Support activities provide timely site-specific "At Risk" Infrastructure Information to maintain operational awareness at HQ and for the PSAs in the field regarding infrastructure-related threats. The infrastructure information comes from a number of watch desks, including the Homeland Security Operations Center (HSOC) and the Transportation Security Operations Center (TSOC).

The Infrastructure Information, Identification, Integration, and Analysis (I4A) subprogram includes the National Asset Database (NADB) and the Protective Security Analysis Capability (PSAC).

- The NADB serves as the foundation for developing programmatic focus for various DHS initiatives. The database compiles a detailed inventory of the nation's CI/KR. The NADB will deliver the Risk/Readiness Dashboard to DHS management, allowing at a glance, easy to understand Risk/Readiness CI/KR profiles. Real-time knowledge of the Nation's risk/readiness profile will support rapid decision-making for asset allocation during periods of heightened threats and for routine programmatic planning. Additionally, the information available from this system will be user friendly and in a format easily communicated and understood at all levels of government, the private sector, and the public.
- The Protective Security Analysis Capability (PSAC) supports the integration of activities required for national strategy for protective actions execution. The Center concept focuses on tasks falling into five core functional areas: planning, coverage, integration, technology, and training/readiness.

The PSAC supports the NADB by populating and analyzing data streams, integrating spatial infrastructure data concerning dependencies, integrating and analyzing national laboratory information supporting Preparedness Directorate program and operations, and integrating analytical engines and the Dashboard. The PSAC team of technical experts provides analytical capabilities and facilitates operational planning. The team supports the development and maintenance of a fully integrated architecture to support real-time 24/7 situational awareness and protective security capabilities.

The following is a description of the CIIE program accomplishments and goals:

In FY 2005, CIIE has made the following accomplishments:

- The Strategic Activities RAMCAP program employs subject matter experts to combine NADB and RAMCAP information to develop qualitative and tactical risk profiles as more sophisticated tools are being built. In FY 2005, the RAMCAP program team developed the modules for the chemical, nuclear, and liquefied natural gas sectors used during the 2005 Hurricane season.
- The Vulnerability Assessments program provides infrastructure specialists in coordination with local law enforcement to identify specific asset vulnerabilities by conducting Site Assistance Visits (SAV). Teams conducted 200 SAVs in FY 2005.
- The Vulnerability Field Assessments Team revised and reissued 99 PM reports and refreshed 50 Characteristics and Common Vulnerabilities / Potential Indicators of Terrorist Activity (CV/PI) reports.
- The Vulnerability Assessments team deployed the Vulnerability Identification Self Assessment Tool (VISAT) to raise the level of security in public assembly facilities across the Nation. The VISAT tool was modeled after a self-assessment tool used by the Transportation Security Administration (TSA). Modules were completed for stadiums and arenas.
- The Vulnerability Assessments, Field Assessments program completed all planned reviews of critical functions and services.
- The Vulnerability Assessments Comprehensive Review (CR) team completed 10 Nuclear Power Plant (NPP) CR site visits, completed preparation (pre-site) for three additional NPP sites. The team completed the integrated protective measures plan (IPMP) for six NPP sites and completed three NPP comprehensive review reports. The CR team identified potential Chemical Facility CR sites, confirmed a pilot site location, and completed preparations for initial site visits. The team also developed a Concept of Operations Plan for the Chemical Sector.
- The I4A National Asset Database content was expanded to 77,000 assets. The NADB team contacted representatives from 50 states and six territories; reviewed and researched the existing federal agency databases and licensed or purchased commercial and private databases to refine the list of NADB assets.
- The NIPP and Sector Specific Agency Management program performed SSA functions for five CI/KR Sectors (Chemical, Nuclear, Commercial Facilities, Dams, and Emergency Services) and provided guidance to all 17 SSAs on asset identification and risk assessment, including consequence vulnerability and threat assessment.
- The NIPP and Sector Specific Agency Management program co-chaired the NIPP risk management and protective measures working group. This group coordinates reporting on protective measures as part of the 2005 Interagency Security Plan, the Strategic Threat and Action Report, and the Petroleum Security Working Group.

- The first generation NADB has facilitated the identification and organization of CI/KR, such as nuclear power plants, chemical sites in or near high concentrations of people, and highly traveled bridges, ports, and financial institutions.
- Created with the Office of Intelligence and Analysis a joint fusion center, HITRAC, to integrate, analyze and share information regarding the risks of terrorist attacks to U.S. infrastructure.

In FY 2006, CIIE plans to accomplish the following goals:

- The RAMCAP program anticipates adding up to eight additional sector modules.
- The Vulnerability Assessments team will conduct 150 SAVs in FY 2006.
- The Vulnerability Field Assessments Team will revise and reissue 99 PM reports and will refresh 50 CV/PI reports. Additional PM reports will be developed as required.
- The Vulnerability Field Assessments program will develop the ViSAT self-assessment tool for additional sectors to establish a baseline that identifies the strengths of current sector security programs, and identifies areas requiring improvement. The tool will facilitate the prioritization of a facility's required security enhancements. Modules scheduled for completion in FY2006 include convention centers, speedways, performing arts centers, K-12 schools, office buildings – urban, office buildings – suburban, religious centers, and postal & shipping retail centers.
- The Vulnerability Assessments CR team will complete CR analyses for all NPPs and associated facilities by the end of FY 2006.
- The Vulnerability Assessments CR team will conduct Chemical Sector CR analyses in FY 2006.
- Complete strategic Sector Risk Assessments for all sectors and key sub-sectors.

In FY 2007, CIIE intends to accomplish the following goals:

- The RAMCAP program will add up to 28 additional sector modules.
- The Vulnerability Assessments team will conduct 150 SAVs in FY 2007.
- The Vulnerability Field Assessments Team will revise and reissue PM reports and will refresh CV/PI reports. Additional PM reports will be developed as required.
- The Vulnerability Field Assessments will continue to conduct Rapid Response Visits (R2Vs), site vulnerability assessment tools designed to provide timely site with little advanced notice in response to outside threats and other stimuli.
- ViSAT modules are scheduled to be completed for postal and shipping distribution centers and maintenance facilities, hospital sub modules (1) and (2), colleges and universities, and day care centers. Modules for emergency services and amusement parks are also under consideration.
- The Vulnerability Field Assessments CR team will complete the Chemical CRs by the end of FY 2007.
- Completed updated Sector Risk Assessments for all sectors and key sub-sectors.

Net Base Changes:

The total net base increase is \$3,816,000. This includes a transfer in of \$4,000,000 and a technical programmatic reduction of \$184,000.

Base Increase: Description of Item

FY 2006 base funding for Control Systems Vulnerability, Risk Identification and Protection, \$4,000,000, was realigned from PA to CIIE. The program is executed in conjunction with Cyber Security and the description of current services describes the program mission and purpose.

Justification

2448

This realignment reflects an adjustment of infrastructure protection funds to better align IP activities with program strategic goals and objectives.

The Preparedness Directorate requests \$16,021,000 for NISAC. This is a decrease of \$3,779,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

NISAC funds support the Office of Infrastructure Protection's NISAC facility in Albuquerque, New Mexico.

The NISAC relies on the the following major subprograms to perform its mission:

- Analysis
- Computational
- Methodology

The NISAC Analysis sub-program includes Decision Support System, Infrastructure Program, and Network activities.

- The NISAC Analysis Decision Support System supports the planning and execution of major Homeland Security exercises (e.g., the Top Officials National Exercise (TOPOFF) series). This simulation system represents the current state-of-the-art critical infrastructure modeling and simulation technologies.
- The NISAC Analysis Infrastructure Program facilitates analysis to support the expansion of the NISAC high-fidelity simulations in geospatial extent of coverage, testing and improvement of larger-scale, lower fidelity simulations and better analytical integration.
- The NISAC Analysis Network Activity facilitates the incorporation of more complex strategic behavior into present (and future) simulations that directly impacts the development of simulations within NISAC.

The NISAC Computational sub-program includes Platform and Economics activities.

- The NISAC Computational Platform activity supports Fast Analysis Infrastructure Tool (FAIT) development, knowledge management system testing, improvement and expansion of FAIT usage. Additionally, this program supports collaboration framework testing, system implementation and maintenance.
- The NISAC Computational Economics activity supports the development of the NISAC Agent Based Laboratory for Economics (N-ABLE) Computational Economics Capability to expand the micro-economic analytical capabilities. Additionally, the activity facilitates the simulation of larger, more complicated supply chains, behaviorally driven activities, and the use of the Institutional Computing Cluster (ICC) for high-performance computing and market effects.

The NISAC Methodology sub-program includes Methodology and other Coordination activities.

- The NISAC Methodology activity supports the continued integration of consequence and infrastructure asset data developed in the simulation tasks using the NADB. This function will enable users to review prioritization results and make improvements to the asset/system prioritization for national-level assessments.
- The NISAC Methodology Coordination supports Infrastructure Simulation and Analysis program management activities to ensure technical and programmatic execution, integration, and leadership within the NISAC programs and manages collaboration with external stakeholders.

In FY 2005, NISAC accomplished the following:

- Expanded and deployed interdependency modeling tools for the transportation, communications, banking and finance, chemical, and commercial sectors based on modeling the cities of Chicago, Houston and the Midwest region of the U.S.
- Continued to work with the U.S. Coast Guard (USCG) and U.S. Army Corps of Engineers (USACE) to develop modeling capabilities for studying inland waterways
- Continued to resolve procurement & environmental requirements connected with the Kirtland building to pave the way to begin construction in late CY 2005.
- Continued Urban Infrastructure Model for Houston and initiated study on Los Angeles.

In FY 2006, NISAC plans to accomplish the following goals:

- Develop urban modeling efforts for generic city types and for specific cities.
- Conduct infrastructure modeling efforts for infrastructures that have national or large regional impacts.
- Update the Urban Area Security Initiative (and other risk-based grant programs) selection process with more robust modeling efforts.
- Develop proposal to expand and deploy modeling tools for the transportation sector, chemical sector, electrical generation from fossil fuel and nuclear power, and commercial asset sectors in the cities of Los Angeles, Washington DC, and the Northeast portion of the U.S. focusing on evacuation related events and their consequences.
- Develop proposal and pilot to expand capability of dynamic infrastructure interdependency simulation models to include regional, state, and local analysis.
- Complete construction of the Kirtland building.
- Conduct infrastructure modeling to predict impacts and develop mitigation plans for critical infrastructure personnel due to a possible avian influenza pandemic.
- Develop simulations and analyses of DHS identified disruption scenarios based on priorities from a preliminary National Hazards Assessment.

In FY 2007, NISAC plans to accomplish the following goals:

- Build out IT connectivity between NISAC laboratories, the Protective Security Analysis Capability (PSAC), and DHS-HQ.
- Identify and acquire academic expertise to work on-site at NISAC on a sabbatical basis.
- Provide NISAC models to PSAC and provide technical assistance in training PSAC personnel on them.
- Initiate expansion of Critical Infrastructure Protection – Decision Support System (CIP-DSS) modeling efforts from national (but very high level) to regional (but deeper detailed level) for Northeast and Southern California.
- Integrate spatial interdependency information into NISAC efforts on functional interdependencies.
- Integrate consequence and infrastructure asset data developed in the simulation tasks with the National Asset Database, review prioritization results and make improvements to the asset/system prioritization for national-level assessments.
- Southeastern Regional/Urban and National Infrastructure Interdependency Analyses to provide detailed review of infrastructure assets in southeastern U.S. at local to regional scale to identify potentially significant disruptive events and quantify the consequences of the identified events.
- Water Transportation Network Analysis System Development, Testing and Disruption to analyze ports and other waterways to understand asset disruptions and impacts.
- Develop scenario and issue base simulations of infrastructures and their interdependencies in support of longer-term issues analysis for DHS, IP and other government agencies. Provide infrastructure disruption consequence analyses, recovery analyses and integrated risk-based mitigation analyses.
- Provide infrastructure consequence analysis and document reviews to DHS in support of real world events (terror attacks, natural disasters), planning exercises (e.g., TOPOFF), and policy development on an as-needed basis. Continue to mature and maintain expertise in application of analysis tools through as-needed support of longer-term DHS IP projects.

Net Base Changes:

The total net base decrease is \$3,799,000. This includes a technical programmatic reduction of \$3,799,000.

Base Decrease: Description of Item

The FY 2007 request is a decrease of \$3,779,000 from the FY 2006 revised enacted amount.

Justification

The decrease reflects the completion of the Kirtland facility construction and a reprioritization of infrastructure protection funds to higher-priority missions and initiatives.

2007 Program Change
2007 Request	\$8,218
Total Change 2006-2007	(5,741)

* The Preparedness Directorate did not exist prior to FY 2006. For FY 2005, the funding amounts are provided for those organizations/programs that had a comparable FY 2005 funding level. Please see the Departmental Overview section of the Budget for FY 2005 Actuals from legacy agencies.

The Preparedness Directorate requests \$8,218,000 for Biosurveillance. This is a decrease of \$5,741,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Biosurveillance funds are distributed to the Risk Management Division (RMD) within the Office of Infrastructure Protection.

Preparedness executes the Biosurveillance Program through the following major subprograms:

- National Biosurveillance Integration System (NBIS)
- National Biosurveillance Integration System Support

National Biosurveillance Integration System (NBIS) sub-program includes activities supporting NBIS, Biosurveillance Monitoring Architecture, and NBIS Team Operations.

- NBIS provides real-time integration of Biosurveillance data harvested through many federal government agencies, including U. S. Department of Health and Human Services (HHS), Center for Disease Control (CDC), Food & Drug Administration (FDA), U. S. Department of Agriculture (USDA), U. S. Department of Homeland Security Science & Technology Directorate (DHS S&T), Environmental Protection Agency (EPA), and U.S. Geological Survey (USGS), that is useful in the early detection and characterization of a biological attack on the United States. The objectives of this integration are: to corroborate data across sectors; to ensure that data from each sector of surveillance can be fused to inform homeland security decision-making; and to decrease the gap between the point when the event actually occurs and the time when appropriate federal, state, and local response protocols are implemented.
- Biosurveillance Monitoring Architecture provides biological attack detection and characterization situation to the DHS Homeland Security Operations Center's (HSOC) Common Operating Picture

(COP). This integrates detection and characterization of information and analysis with the national indications and warnings architecture for infrastructure protection. NBIS is developed as an integrated geographic information assessment and response system that is designed to collect, monitor, and evaluate clinical and non-clinical biological threat information and reporting data streams. These data streams will cover a broad surveillance of foreign and domestic sources of intelligence, pest, disease outbreaks, syndromic health information, human, plant, animal, food, drinking water, and environmental information in order to identify indicators of and to characterize potential or imminent biological attacks or disease outbreaks that threaten the safety and security of the nation.

- NBIS will integrate geographic information assessment and response system collecting, monitoring, and evaluating clinical and non-clinical biological threat information and reporting data streams.
 - NBIS will enable enhanced, near-real-time detection and characterization information and analysis to be provided to the DHS Homeland Security Operations Center (HSOC) Common Operating Picture.
 - NBIS will facilitate rapid but accurate inter-agency communication and collaboration on issues, surveillance and detection results, and the status of any current investigation or laboratory effort aimed at characterizing or validating any developing threat or significant biological event.
- NBIS Team Operations require numerous federal agencies to coordinate activities and share supporting data and systems. This activity will facilitate effective and efficient interaction among NBIS Team members. To this extent, team members will require collocated offices, 24/7 access to data systems of the parent organization, training on NBIS developed architecture, etc.
- Biosurveillance and monitoring information obtained from federal agencies will be integrated. These agencies are a conduit of information obtained nationwide from federal state, local, and private industry sources. Additionally, efficient Team Operations will require:
 - Uniform policies and approaches for new technologies and integrating current surveillance and detection systems ;
 - Capability assessment, shortfalls identification, and solutions development;
 - Guidance on methodologies for assessing vulnerability and risk ;
 - National priorities for investment and implementation ;
 - Performance tracking and progress in National Biodefense Program implementation.

The NBIS Support program covers NBIS team support and integration & interface support.

- NBIS teams will attend meetings, symposia and participate in supporting studies & seminars.
- NBIS integration & interface support will connect various systems from a wide variety of federal agencies, which is critical to the success of the NBIS system.

In FY 2005, Biosurveillance has achieved the following accomplishments:

- DHS created NBIS-Lite in anticipation of the acquisition and development of NBIS. NBIS-Lite is a solution that bridges the gap between today's uncertainty and the fully capable NBIS system.
- NBIS Analysis Team planning and designing activities include:
 - Providing agency information to accomplish interagency familiarization
 - Developing standard operating procedures
 - Participating in tabletop exercises

- Analyzing information flows among internal agencies
 - Developing training programs
 - Reviewing Memorandums Of Agreement (MOA)
 - Understanding limitations and causes
 - Participating in NBIS development
 - Defining reach back requirements
- Biosurveillance began the implementation of Homeland Security Presidential Directive/HSPD-9 by developing and deploying tools to enhance correlation and analysis of Biosurveillance sensor data.
 - The NBIS program completed the planning process to integrate data from such program partners as CDC, FDA, USDA, and DHS S&T. Because of this effort, we are moving close to being able to utilize potential threat information from other agencies in the area of biosurveillance.
 - Plans and procedures have been set and procurement efforts are under way to allow for the launch and evaluation of a pilot program that integrates multiple data streams with threat information and efforts to implement information sharing through decision channels to the local law enforcement community.
 - Procedures have been devised to allow for the preliminary evaluation of usefulness of the existing biosurveillance data as merged with the existing threat information and will be implemented after necessary procurement actions have been complete.
 - NBIS is in the process of defining the characterization of biowarnings in sufficient detail to allow for the determination and development of appropriate threat data to effect a reduction in response time.
 - The NBIS program work in the areas of developing plans, procedures, characterizations, and procurement strategies has allowed for the determination of sensor capabilities, technological limitations, and which emerging technologies are appropriate for the real-time integration function critical to the success of NBIS.
 - With the establishment of relationships with our partner organizations, NBIS is starting to develop the capability to determine what threat data is required to support the medical countermeasures effort to assist in determining the appropriate responses to an attack.
 - The planning phase for the development of a draft proposal for techniques that are of potential use for decreasing the time for first response protocols has begun and, when completed, will allow NBIS to focus on the analysis of techniques for information release required to minimize the consequences of bioweapon use.

In FY 2006, Biosurveillance is planning to accomplish the following goals:

- Develop Standard-Operating Procedures (SOPs) for the analysis of multi-agency information, sharing information with relevant agencies, and reporting conclusions to the HSOC and Interagency Incident Management Group (IIMG).
- Establish Initial Operational Capability (IOC) and NBIS Analytic capabilities using the NBIS-Lite System.
- Receive contract award for the Full NBIS IT System.
- Initiate interagency staffing of the NBIS Analytic team.
- Achieve initial operation of the NBIS-V2 IT System for biosurveillance information fusion and analysis.

In FY 2007, Biosurveillance is projecting to accomplish the following goals:

- Replace NBIS-Lite IT System with the IOC of NBIS IT System.
- Upgrade SOPs for analytic system based on the increased capability of the NBIS IT System.

2455

- Add interagency information flows enabled by the NBIS IT System.
- Complete Memorandum of Agreements (MOAs) for interagency operation.

Net Base Changes:

The total net base decrease is \$5,741,000. This includes a technical programmatic reduction of \$5,741,000.

Base Decreases: Description of Item

The FY 2007 request is a decrease of \$5,741,000 from the FY 2006 revised enacted amount.

Justification

The decrease is due to a readjustment of infrastructure protection funds to better align IP activities with program strategic goals and objectives.

2007 Program Change	10,000
2007 Request	\$32,043
Total Change 2006-2007	(58,442)

* The Preparedness Directorate did not exist prior to FY 2006. For FY 2005, the funding amounts are provided for those organizations/programs that had a comparable FY 2005 funding level. Please see the Departmental Overview section of the Budget for FY 2005 Actuals from legacy agencies.

The Preparedness Directorate requests \$32,043,000 for PA. This is a decrease of \$58,442,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

PA funds are distributed among the Risk Management Division (RMD), Contingency Planning and Support Division (CPSD), Chemical and Nuclear Preparedness and Protection Division (CNPPD), and Chemical Security Office within the Office of Infrastructure Protection.

Preparedness executes PA through the following major subprograms:

- General Security Plans
- Studies, Equipment and Advisors
- National Terrorism Prevention Training Program
- Coordinate National Protection Efforts (Weapons of Mass Destruction / Terrorist Device Countermeasures Capability (WMD/TDCC))
- Federal Preparedness Coordinator program

The General Security Plans sub-program provides following activities:

- The Buffer Zone Protection Program is a voluntary program for state and local government law enforcement agencies (LEAs). The purpose of the program is to assist local law enforcement personnel in establishing improved security around (Outside the fence) critical infrastructure sites. The program is intended to define and identify effective preventive measures that interfere with the terrorist mission-planning cycle and any attack preparations. OIP is responsible for assisting local LEAs in developing Buffer Zone Protection Plans for critical sites and for evaluating and improving plans submitted to RMD. The Office of State and Local Government Coordination and Preparedness is responsible for awarding grants to fund the implementation of recommended protective measures. DHS develops a list of critical sites each Fiscal Year and coordinates with LEAs to develop a BZPP for high-risk sites. Once the plan is completed it is passed to OSLGCP to

administer grants. The BZPP program results in better protected CI/KR and also increases the general protective capacity and preparedness of Local Law Enforcement (LLE) and first responders.

- Buffer Zone Protection Plan (BZPP) workshops provide state and local entities responsible for protecting eligible facilities with training on conducting Buffer Zone Plans. Workshops have been offered for large individual jurisdictions, regions, and via video teleconferences.
- BZPP technical assistance visits provide on site support to jurisdictions requiring additional help completing Buffer Zone Plans.
- The Buffer Zone Planning team reviews and approves all infrastructure plans submitted to DHS as part of the BZPP program. Support staff log and review plans, work with state and local entities to correct discrepancies, and conduct trend and gap analysis of submitted plans that drive protective measures implementation and grant issuance.
- IP staff target infrastructure and conduct Buffer Zone Plans in collaboration with state and local entities including response to emerging threats and to support comprehensive reviews.

The Studies, Equipment, & Advisors sub-program provides coordination and oversight assistance to all CI/KR sectors. OIP staff is supplemented with subject matter experts from other federal agencies, state, and local entities, and the National Laboratories to advise on technical subjects and to oversee specialized projects and activities. These experts conduct studies addressing evolving vulnerabilities and potential consequences from the changing terrorist threats and new tactics and techniques enhances the likelihood of the appropriate protective measures being developed or selected for implementation to reduce risk.

The National Terrorism Prevention Training sub-program provides educational and awareness, centered on prevention planning, capabilities enhancement, information sharing Chemical Biological Radiological Nuclear Explosive (CBRNE) tactics and procedures and other necessary actions that will help citizens, both public and private to better deter, detect, defend and devalue their property and/or facilities as potential targets of opportunity. The training includes protective measures enhancements and prevention planning and support is available to owners/operators and members of the protective community at all levels of the federal, state and local governments.

The Coordinate National Protective Efforts sub-program is designed to improve intergovernmental, state, and local capabilities to detect, deter, prevent, and respond to CBRNE attacks. Specific program functions include:

- Assist state and local municipalities developing and implementing National Incident Management System (NIMS) compliant with Bombing Prevention and Response Plans for high-risk multi-jurisdictional areas.
- Develop task based, mission-specific training, procedure development, and validation exercises for responders.
- Ensure technical assistance available through grants that is consistent with current threats.
- Develop requirements and support projects within DHS Office of Science and Technology and Technical Support Working Group in order to identify and develop new terrorist device countermeasures based on risk.

The Federal Preparedness Coordinator (FPC) sub-program was established in FY 2006 by direction of the Secretary. FPCs are DHS core planning and liaison personnel who provide resources and expertise dedicated to a specific region. They are assigned from the spectrum of DHS components and are

located throughout the country, which provides the institutional knowledge and experience to reach-back and outward to multiple entities within DHS. The FPC will support national emergency planning and preparedness through stronger focus on comprehensive regional, state, and local jurisdictional planning and preparedness.

The following is a description of the PA program accomplishments and goals:

In FY 2005, PA has achieved the following accomplishments:

- Performed policy oversight and program management for OSLGCP grants related to Buffer Zone Protection Plans (BZPPs) allowing for the implementation of plans related to over 1,800 designated priority assets.
- Provided critical training to a significant number of priority asset owners and staff, educating them on incorporating requirements analysis and protective measures recommendations for enhanced security.
- Designed courses to meet the needs of the Chemical Sector, the Commercial Sector and other sectors that are identified as the threat environment, priorities, or other issues arise.
- Continued to deliver courses designed in FY 2004 to ensure that there is an adequate knowledge base among the protective personnel charged with protecting national assets/systems at within both the private and public sectors.
- Initiated emerging/technology application pilots and other related efforts for these major sector/segment categories:
 - Hazmat
 - Progressing with the training and equipping of selected Hazmat teams in the Washington area to mitigate the effects to the population of a terrorist attack on rail cars containing toxic hazards.
 - Oversaw the transfer to private industry of plans necessary to implement action of technology to eliminate the need for chlorine to disinfect waste water in a large metropolitan facility.
 - Bombing
 - Established the necessary concepts to maximize capability of canines to detect explosives.
 - Development of a low cost bomb squad robot that can conduct radiography in order to provide for detection of improvised explosive devices.
 - WMD
 - Substantial progress made toward the development of an operation of concepts and related training for local public safety officers to detect and interdict radioactive materials by deploying radiation pagers and detection equipment.
 - Work is progressing on being able to utilize UAVs or other devices to survey the extent of plumes following a terrorist attack that causes release of hazardous materials.
 - Completed necessary contractual actions and work has begun on implementing the pilot for the DC Rail Corridor concept which provides for radiological, chemical and biological agent detection. Successful implementation should occur in FY 2006.
- Supported the TOPOFF 3 Intra-Agency Working Group engaged in planning the TOPOFF 3 exercise, and provided IP-specific intelligence integration and coordination for both TOPOFF 3 and the Pinnacle continuity of operations exercise.
- Developed and tracked a comprehensive list of several hundred Special Events across the United States, e.g., the Super Bowl, etc.

- Developed and coordinated Integrated Federal Support Plans for the highest priority events in terms of risk and consequence.
- Appointed Federal Coordinators for high-priority Special Events.
- Coordinated implementation requirements and timelines for the National Response Plan (NRP)
 - Achieved concurrence from 32 federal partners and the White House on the plan.
 - Developed standard operating procedures for NRP coordinating mechanisms .
 - Developed and executed NRP familiarization and training seminars in seven cities.
- Provided Operational Support
 - Supported Interagency Incident Management Groups for the London Bombings and Hurricanes Katrina, Ophelia, Rita and Wilma.
 - Developed and implemented the Principal Federal Official (PFO) program.
 - Developed PFO training courses and certified over 100 personnel.
 - Stewarded the appointment of PFOs for Incidents of National Significance, for planned JFO activations, and for exercises.
 - Deployed PFO Support Staffs for hurricane responses, exercises, and both National Conventions to support PFOs.
- Developed the Federal Preparedness Coordinator (FPC) concept.

In FY 2006, PA is planning on accomplishing the following goals:

- Continue to perform policy oversight and program management for OSLGCP grants to ensure Buffer Zone Protection Plans (BZPPs) are implemented at designated priority assets.
- Continue to conduct BZPP workshops and technical assistance visits to train law enforcement agencies and first responders on the philosophy behind the program and how to develop site-specific plans, incorporating requirements analysis and protective measures recommendations for enhanced security.
- Develop the capability to perform gap analysis on outputs from various inputs such as BZPPs, Comprehensive Reviews (CRs), Rapid Response Visits (R2Vs) and Site Assistance Visits (SAVs) in order to determine appropriate protective measures for specific scenarios and/or sites.
- Coordinate efforts with OSLGCP to design protective measures training procedures and courses to allow for the most extensive coverage of priority assets, owners and staff in order to provide maximum leverage of resources and manpower.
- Continue to establish an interagency governance board related to bombing prevention technology.
- Continue supporting, both financially and with subject matter expertise, the Technical Support Working Group (TSWG) on evaluating technologies to support bombing prevention.
- Prepare, coordinate and publish the IP Incident Management Plan.
- Plan and provide support for execution of the National Response Plan in response to all-hazards Incidents of National Significance.
- Prepare IP situational awareness reporting in support of the Preparedness Directorate, Deputy Secretary, and Secretary during Incidents of National Significance.
- Deploy in support of the Joint Field Office and the Principal Federal Official during Incidents of National Significance.
- Develop risk-based model for evaluating and categorizing Special Events.
- Prepare 2006 Special Events list with state and local governments.
- Develop process and procedures for integration of DHS Special Events planning and Federal Preparedness Coordinator activities.
- Prepare DHS Pandemic Influenza Implementation Plan.

- Provide and coordinate DHS contingency planning for Pandemic Influenza and selected other DHS and national planning scenarios.
- Implement the Federal Preparedness Coordinator (FPC) sub-program to provide the institutional knowledge and experience to reach-back and outward to multiple DHS entities on behalf of state and local entities. FPCs will support national emergency planning and preparedness through stronger focus on comprehensive regional, state, and local jurisdictions planning and preparedness.

In FY 2007, PA is projecting to accomplish the following goals:

- Develop Train-the-Trainer courses to deliver initial instruction in such areas as Soft Target Awareness, SAV and R2V to priority asset owners and staff to afford training across the location and staff as needed.
- Coordinate efforts with OSLGCP to design protective measures training procedures and courses to allow for the most extensive coverage of priority assets, owners and staff in order to provide maximum leverage of resources and manpower.
- Continue to have discussion with the interagency governance board related to bombing prevention technology.
- Continue to conduct gap analysis for bomb squads in major cities and priority locations.
- Continue supporting, both financially and with subject matter expertise, the Technical Support Working Group (TSWG) on evaluating technologies to support bombing prevention.
- Plan and provide support for execution of the National Response Plan in response to all-hazards Incidents of National Significance.
- Provide and coordinate DHS contingency planning for selected DHS and national planning scenarios.
- Deploy in support of Joint Field Office and Principal Federal Official operations in response to Incidents of National Significance
- Prepare and coordinate Special Events list in FY 2007 with state and local governments.
- Recommend, as part of the FPC program, methods to ensure preparedness and response is interoperable with contiguous localities and is scalable to each likely incident.
- Develop information sharing initiatives and strategic partnerships between locally based DHS and other federal officials, as well as key state, local and private sector stakeholders.
- Coordinate resource and operational planning in preparation for incident response.
- Coordinate planning for, and participate in, local, regional, and national-level homeland security exercises and drills.

Net Base Changes:

The total net base decrease is \$68,442,000. This includes transfers out of \$8,000,000, technical programmatic adjustments of \$947,000, programmatic base reductions of \$61,389,000.

Base Decreases: Description of Item

Infrastructure Protection realigned \$8,000,000 to other IP programs as follows:

- NIPP and Sector Specific Agency Management funding of \$4,000,000 transferred to CIOP.
- Reduce Vulnerabilities in Control Systems funding of \$4,000,000 transferred to CIIE.

Justification

This realignment is to better align IP activities with program strategic goals and objectives.

Description of Item

The following activities have been reduced or eliminated based on reprioritization of Departmental resources:

- FY 2006 base funding of \$20,000,000 for Protective Security Analysis Center was eliminated.
- FY 2006 base funding of \$20,000,000 for Protective Measures Demonstration Pilots was eliminated.
- FY 2006 base funding of \$10,000,000 for Control Systems was reduced by \$6,000,000. Please see transfer above of remaining \$4,000,000.
- FY 2006 base funding of \$10,303,000 for the National Terrorist Prevention Training Program was reduced by \$8,961,000.
- FY 2006 base funding of \$14,003,000 for Coordinate National Protection Efforts was reduced by \$2,789,000 and \$4,000,000 was transferred to CIOP for NIPP and SSA Management (see above).
- FY 2006 base funding of \$16,000,000 for Develop General Security Plans was reduced by \$3,639,000.

Justification

This realignment reflects a readjustment of infrastructure protection funds to better align IP activities with program strategic goals and objectives.

The Preparedness Directorate requests \$92,205,000 for Cyber Security. This is a decrease of \$210,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Cyber Security funds supports the National Cyber Security Division (NCSD), which includes the following branches:

- United States Computer Emergency Readiness Team (US-CERT) Operations
- Law Enforcement and Intelligence (LE&I)
- Strategic Initiatives (SI)
- Outreach and Awareness (O&A)

The NCSD US-CERT Operations Branch includes activities supporting the following:

- The United States Computer Emergency Readiness Team (US-CERT) serves as a national focal point for the U.S. Critical Infrastructure (CI), U.S. Executive Branch, and state/local governments to address cyber security incidents that may pose a threat at the national level. The US-CERT Operations Analytic Cell maintains a 24x7x365 capability that receives, identifies, correlates, triages, and responds to incidents impacting the Nation's critical assets. The Analytic Cell coordinates the dissemination of cyber threat warning information via the National Cyber Alert System to warn the federal, state, local government, and associated critical infrastructure components of viruses, vulnerabilities, attacks, malicious code, impending threats, and weaknesses.
- The Malicious Code Analysis Program provides computer network analysis, vulnerability, incident response, and information assurance at the national and international levels. This program provides the capability to analyze, correlate large-scale, and target specific malicious code (e.g., viruses, worms, spyware, bots, trojan horses, and rootkits) *NOT* detected by current commercial anti-virus

programs or other private sector software tools that exploit vulnerabilities across federal agency boundaries, critical infrastructure, and public/private sectors.

- NCSD's Strategic Operations Program implements cyber security programs focused on our government customers (federal, state, and local). A major program within Strategic Operations is the Government Forum of Incident Response and Security Teams (GFIRST). The GFIRST community is comprised of approximately 50 teams and 500 members from the defense, intelligence, law enforcement, and federal civilian communities. In addition, Strategic Operations administers the Chief Information Security Officers (CISO) Forum, which is the only forum in the Government that brings Chief Information Security Officers together to work on senior level security issues affecting the Federal Government. Other activities supporting Strategic Operations include Project AIR-Automated Incident Response and Remediation (AIR), Forensics Training Program, and Computer Network Defense Service Provider (CNDSP).
- The Mission Operating Environment (MOE) represents a collection of information technology essential for supporting sophisticated cyber-security goals. Specifically, the MOE satisfies the US-CERT operational requirements for a dedicated infrastructure for developing and deploying tools and services needed to protect critical computing operations. US-CERT security specialists are using the MOE to study computer worms, viruses, and other malicious code that consistently shut down operations across the federal/state government and the critical infrastructure, leading to significant monetary damage and undermining the delivery of essential services. Security operations provided by the MOE require separation from the DHS systems to properly protect and preserve both the US-CERT mission and the parent agency accordingly.
- The Situational Awareness Programs are structured similarly to leverage information technology (IT) and to protect essential IT infrastructure from attacks. The US-CERT focuses on developing Situational Awareness programs that supply risk information across the United States Government in real-time. To date, the agencies have not been able to share threat, vulnerability, and incident data in real time, which is essential for defeating adversaries who are trying to exploit federal and state information systems or to shut down key services within the critical infrastructure. For example, the US-CERT Einstein program is an automated process for collecting, correlating, analyzing, and sharing computer security information across the federal government. Federal agencies benefit by raising the cyber situational awareness for their individual agency, contribute to their meeting statutory requirements, and help generate cyber situational awareness across the Nation (federal/state/local/tribal/critical infrastructure).

The NCSD Law Enforcement and Intelligence Branch (LE&I) coordinates the prevention, investigation, and prosecution of malicious cyber activity. Activities include:

- LE&I coordinates law enforcement (LE) activities related to cyber incidents across the United States Government (USG) including the following tasks: (1) maintains personnel in key DHS organizational nodes; (2) maintains points of contact (POCs), capabilities, and activities of LE and cyber security information sharing programs at the national level to coordinate efforts and resources; (3) supports law enforcement use of Cybercop, a secure information sharing portal as new national information sharing networks come online; (4) coordinates efforts between the USG intelligence community (IC), all levels and jurisdictions of LE, the private sector, and other entities; and (5) maintains operational Points of Contact (POCs) with American (federal, state, and local) and international intelligence and counterintelligence agencies.

- LE&I coordinates with the National Cyber Response Coordination Group (NCRCCG), consisting of 19 principal USG agencies with cyber responsibilities and capabilities and serves as the Federal Government's principal interagency mechanism for operational information sharing and coordination of the Federal Government's response and recovery efforts during a national cyber crisis.
- LE&I must maintain situational awareness (SA) to successfully coordinate nationwide prevention, detection, and mitigation responses to cyber incidents of national significance. Supporting activities include: (1) conduct evaluations to determine the current and evolving cyber threats facing the USG, critical infrastructures, and the Nation; (2) concurrently, delineate the capabilities of USG organizations and private sector partners to prevent, detect, respond to/mitigate and recover from cyber threats and attacks; (3) communicate prioritized and standing information needs (PINs/SINs) to dovetail into the cyber collection requirements for the National Intelligence Priority Framework (NIPF); (4) review and comment on external organizations' products, classified or unclassified; (5) generate reports, documents and white papers; and (6) draft and provide input to the Intelligence Analysis-Current (IA-C) on the Strategic Threat and Action Report (STAR) for delivery to the President.

The NCSD Strategic Initiatives (SI) Branch supports the following activities:

- The SI Critical Infrastructure Protection Cyber Security (CIPCS) Program works with public and private sectors to reduce vulnerabilities and minimize the severity of cyber attacks by improving the cyber security of critical infrastructures. NCSD is establishing uniform policies, approaches, guidelines, and methodologies for integrating federal infrastructure protection and risk management activities within and across sectors. These activities include: developing and implementing the National Infrastructure Protection Plan (NIPP) Information Technology (IT) Sector Specific Plan (SSP); providing cross-sector cyber guidance to Sector Specific Agencies' (SSAs) NIPP SSPs and federal agencies' critical infrastructure protection (CIP) plans; and establishing the Internet Disruption Working Group, in collaboration with the DHS National Communications System (NCS), to address near term mitigation strategies to improve the resiliency of the Internet.
- The Cyber Security SI Training and Education Program is aimed at fostering adequate training and education programs to support the Nation's cyber security needs. DHS is establishing, co-sponsoring, and implementing programs to advance the training of cyber security professionals in the United States. DHS is working in coordination with the National Science Foundation (NSF), the National Security Agency (NSA), and the Office of Personnel Management (OPM) to identify ways to leverage the existing Cyber Corps Scholarship for Service (SFS) program and the National Centers of Academic Excellence in Information Assurance Education (CAEIAE) program to address training and education workforce issues. Additionally, DHS is promoting the development of information technology (IT) security certification programs that will be broadly accepted by the public and private sectors.
- The Software Assurance Program is a public-private effort that supports the DHS mission to secure cyberspace and our Nation's critical infrastructure by promoting security across the software development life cycle to achieve a broader ability to routinely develop and deploy trustworthy software products. DHS is partnering with industry, academia, and other government agencies to

shift the security paradigm from “patch management” to “software assurance” by encouraging U.S. software developers to raise the bar on software quality and security. DHS sponsors Software Assurance Forums and Working Groups that provide opportunities for collaboration among industry, academia, and government on software assurance initiatives.

- The SI Cyber Exercise Program (CEP) plans, coordinates, and conducts exercises focused on the cyber and information systems that provide connectivity, control, and communications for critical infrastructure sectors, such as banking / finance, emergency services, energy, information technology, telecommunications, transportation, and water. Cyber exercises, which are conducted at all levels of government provide the environment to (1) develop, coordinate, rehearse, and refine key processes; (2) integrate infrastructure protection activities within other national-level plans; (3) establish mechanisms for coordination and information exchange; (4) and identify interdependencies, overlaps, and gaps so that all the critical infrastructure stakeholders at every level are better prepared for and more capable of preventing, responding to, and recovering from a major cyber incident.
- The SI Standards and Best Practices Program includes; (1) promoting standard/common naming conventions for vulnerabilities and malicious code; (2) collaborating with the National Institute of Standards and Technology (NIST) in the development of the National Vulnerability Database; (3) sponsoring and developing cyber security guidance and best practices documents; (4) sponsoring the creation of benchmarks for recommended security technical configurations; (5) collecting, developing, and submitting cyber security research and development (R&D) requirements for DHS Science and Technology (S&T) Directorate’s cyber security research priorities.
- The SI Control Systems Security Program manages NCSD efforts to enhance the security posture of control systems within the Nation’s critical infrastructure by mitigating the threat of terrorist attacks through improvements to legacy process control systems that monitor and control sensitive processes and functions for the Nation’s most critical infrastructures. These infrastructures include power and energy, water and pumping stations, chemical processing, pharmaceutical production, transportation, manufacturing, and food production. If these infrastructures are altered, incapacitated, or destroyed it would have a debilitating impact on national security, economic security, public health and safety, and/or the environment. This program uses funding from the Critical Infrastructure Identification and Evaluation budget line.

The Outreach and Awareness Branch of NCSD is responsible for communications, messaging, coordination and stakeholder outreach. The branch also has a separate component responsible for International Cyber Security Collaboration and Public Policy.

- The Outreach and Awareness component (1) focuses on coordination and development of internal and external communications; (2) works to ensure collaboration on events and activities across NCSD and with DHS colleagues across the Department including public affairs, legislative affairs, the private sector office, and other entities as appropriate; (3) and serves to build and maintain trusted relationships among and between industry, government, and academia to raise cyber security awareness and effectively secure cyberspace.
- The International Affairs component conducts the following tasks: (1) engages in international outreach activities to build awareness about the global cyber risk, shares information about the role and activities of computer security incident response teams to mitigate the risk, and builds

relationships among governments toward global cooperation on cyber security; (2) establishes information sharing relationships, communications mechanisms, and collaborative arrangements to increase our global cyber situational awareness; (3) leverages global expertise; (4) shares best practices, experiences, and specific threat and vulnerability information; (5) coordinates global cyber incident response; and (6) establishes collaborative arrangements for addressing the cyber component of critical infrastructure protection issues.

- The Public Policy component works to ensure consistent messaging and comprehensive responses to congressional testimony and other inquiries, as well as inform DHS internal and external stakeholders about cyber security issues and activities.

In FY 2005, NCSA has made the following accomplishments:

- US-CERT (1) developed a 24x7x365 Cyber Watch Center with initial capabilities to detect, analyze, and respond to cyber events; (2) standardized incident reporting across the government through White House Policy Coordinating Committee; and (3) continued to develop a phased US-CERT Portal integration into Homeland Security Information Network (HSIN).
- The US-CERT Malicious Code Analysis team (1) assessed new software vulnerabilities and provided warnings to more than 50,000 systems administrators across the Federal Government and Critical Infrastructure to protect more than 5,000,000 computer systems from severe cyber threats; (2) analyzed 125 malicious and other code samples using the Malicious Code Lab; (3) reviewed 2,100 new software vulnerabilities; and (4) conducted an effort to produce an internationally accepted common malware/virus definition and naming standard.
- The US-CERT Strategic Operations Program (1) established the Government Forum of Incident Response and Security Teams (GFIRST); (2) held the first national GFIRST conference; (3) provided as part of the Chief Information Security Officer Forum (CISO) recommendations for patch management, Federal Information Systems Management Act (FISMA), and incident reporting.; (4) provided as part of the Virtual Training Environment (VTE) a Cyber Incident Forensics Training DVD to over 500 members of government incident response teams; and (5) developed a beta version of the Federalized Computer Network Defense Service Provider metrics.
- The US-CERT Mission Operating Environment (MOE) program achieved full operating capability. It provides a dedicated infrastructure for development and deployment of tools and services.
- The US-CERT Situational Awareness (SA) team (1) installed Einstein systems at five locations; (2) received a final approved Privacy Impact Statement for Einstein; and (3) implemented Internet Health Service for use by 50 government agencies in the GFIRST community.
- LE&I (1) facilitated criminal investigative leads to DHS enforcement components that culminated in dozens of investigations surrounding Hurricane Katrina; (2) partnered with the National White Collar Crime Center (NW3C) to co-host the annual "State of the State" conference with attendees from 37 states; (3) expanded the Cybercop community to nearly 10,000 members representing all 50 states, DC, more than 40 countries, and will soon be joined by the FBI-sponsored InfraGard Program; (4) provided research and recommendations in the Technical Support Working Groups (TSWG) research and envelopment cycle; (5) provided guidance and facilitation to the National Cyber Response Coordination Group (NCRCG) to aide in accomplishing its strategic goals and

mission; and (6) initiated a strategic cyber threat assessment program to augment and elaborate on the Cyber National Intelligence Estimate (CNIE).

- The SI Critical Infrastructure Protection Cyber Security (CIPCS) Program (1) developed and submitted the FY 2005 NIPP IT Sector Specific Plan (SSP) to identify critical assets, assess their vulnerabilities, and implement protective measures; (2) developed cross-sector cyber content to provide direction and assist SSAs with the development of their NIPP SSPs; (3) drafted an IT Sector Asset Identification Methodology; (4) identified and updated initial IT Sector Asset categories for the National Asset Database (NADB), and (5) established the Internet Disruption Working Group (IDWG) in collaboration with the NCS.
- The SI Cyber Security Training and Education Program promoted strong educational programs—eight new CAEIAEs, a job fair, symposium, scholarship for service program—in cyber security and information assurance throughout the Nation.
- The SI Software Assurance Program hosted numerous working groups and meetings to promote security across the software development lifecycle and create a community of public and private sector partners. Specifically, the Software Assurance Program (1) hosted a “Develop a Curriculum” event to facilitate development of a Secure Software Common Body of Knowledge (CBK); (2) hosted a semi-annual Software Assurance Forum attended by more than 200 to facilitate the development of practical guidance in software assurance process improvement methodologies; (3) began development of the “Security in the Software Lifecycle” Developer’s Guide and the Build Security In Portal; and (4) collaborated with NIST to inventory software assurance tools and measure effectiveness, identify gaps and conflicts, and develop a plan to eliminate gaps and conflicts.
- The SI Cyber Exercise Program (CEP) coordinated and prepared for the National Cyber Exercise (NCE) Cyber Storm to evaluate the myriad of communication, coordination, technical capabilities, performance measures, and information sharing methods used by the various government agencies and the private sector. In addition, the CEP (1) continued efforts to enhance coordination of cyber security issues at the regional level through sponsorship and support to efforts in the Pacific Northwest and the Gulf Coast regions; (2) co-hosted and participated in the Multi-State Information Sharing and Analysis Center (MS-ISAC) cyber tabletop exercise with over 40 states and key government and private sector stakeholders; and (3) co-sponsored cyber tabletop exercises in New Jersey and Connecticut in preparation for TOPOFF3 with the Office of Domestic Preparedness (ODP).
- The SI Standards and Best Practices Program (1) promoted common naming conventions for vulnerabilities and malicious code; (2) developed and launched the National Vulnerability Database, in collaboration with NIST, to improve access to vulnerability information; (3) evaluated the effectiveness of existing Common Criteria programs and process through co-sponsorship of a review of the National Information Assurance Program (NIAP) with the DOD and participation in relevant forums; (4) supported the overall DHS R&D mission by identifying requirements for cyber innovation; (5) sponsored the Common Vulnerabilities and Exposures (CVE) program and Open Vulnerability and Assessment Language (OVAL) standards to improve standardization of information across security advisories, tools, databases and services; and (6) initiated development

of an internationally accepted common malware/ virus definition and naming standard through sponsorship of the Common Malware Enumeration (CME) program.

- The SI Control Systems Security Program (1) developed the Control Systems Security Framework to characterize system security requirements, definitions, protection profiles, and recommendations for owners and operators to meet prescribed levels of assurance; (2) sponsored government/industry workshops to increase awareness; (3) developed control systems security informational products tools and a baseline of control systems standards to enable promulgation of control systems security best practices; (4) established the US-CERT Control systems Security Center (CSSC) and a US-CERT Control Systems Watch Operation; (5) created a quantitative control systems cyber risk/decision analysis measurement methodology; (6) designed and procured "Rapid Response" assessment architecture and equipment; (7) conducted Control System Penetration Demonstration (e.g., simulated chemical spill) and developed an awareness video; and (8) established the Process Control Systems Forum (PCSF) in partnership with S&T to accelerate the development of technology that will enhance control systems security, safety, and reliability.
- The O&A Program established a program to (1) coordinate and develop internal and external communications; (2) ensure consistent cyber security messaging; (3) ensure collaboration on internal and external NCSD events; and (4) build and maintain trusted relationships among and between industry, government, and academia to raise cyber security awareness and effectively secure cyberspace. O&A also (1) developed a Cyber Awareness Plan that provides a framework on how DHS reaches out to stakeholders, federal and industry partners, and the American public to promote cyber security; (2) hosted quarterly meetings with stakeholders; (3) and participated in the Wye II Private Sector Retreat hosted by the National Cyber Security Partnership.
- The O&A International component (1) developed cyber security action plans for bilateral working groups that include information sharing, watch and warning, incident response, and strategic initiatives; (2) established a framework for five key allies' cooperation on cyber security policy, watch and warning, and incident response; (3) hosted a multilateral conference with fifteen countries; (4) developed a cyber security component of Security and Prosperity Partnership (SPP) with Canada and Mexico; (5) collaborated with 15 countries to develop an International Watch and Warning Network (IWWN) for greater global cyber situational awareness and incident response; (6) co-hosted a cyber security seminar in New Delhi; and (7) participated in OAS Cyber Practitioner's Workshops in Canada and Brazil, which developed a regional computer security incident response framework and established the incident response points of contact network.
- The O&A Public Policy component supported three congressional hearings, including drafting testimony, preparing for testimony, and responding to questions for the record.

In FY 2006, NCSD is planning on accomplishing the following goals:

- The US-CERT Cyber Watch Center will (1) continue to deliver a 24x7x365 watch and warning center capability; (2) increase real-time communications with public- and private- operational partners; and (3) improve and test NCRCG and US-CERT operational procedures.
- The US-CERT Malicious Code Analysis will (1) continue to assess new software vulnerabilities and provide; (2) enhance the Common Malware Enumeration Program with anti-virus vendors and

Incident Response Community; and (3) produce reports and white papers on identification and mitigation strategies for malware.

- US-CERT Strategic Operations will (1) test the ability to convene the Government Forum of Incident Response and Security Teams (GFIRST) in time of crisis and continue to refine the methods of contacting this community; (2) hold the second national GFIRST conference in the spring of 2006; (3) make a federalized version of the Computer Network Defense Service Provider (CNDSP) metrics available to the Federal Government and conduct pilot evaluations against these metrics; (4) develop Computer Forensics capability that will offer support to federal agencies and civilians; (5) complete CNDSP review of US-CERT and implement corrective actions as appropriate; and (6) implement the Federalized version of CNDSP metrics within four pilot sites.
- The US-CERT Mission Operating Environment program will improve its capability and enhance its survivability in FY 2006. Additional systems will be integrated to provide more redundancy and eliminate single points of failure. The MOE will initiate plans to incorporate with agency continuity of operations (COOP) requirements.
- The US-CERT Situational Awareness team will (1) continue to integrate Einstein systems at the remaining federal cabinet-level agencies, several state governments, and additional independent federal government agencies; (2) incorporate Trickler with Einstein for passive vulnerability identification; and (3) provide on-going training to Einstein users.
- LE&I will (1) conduct a project to identify, document, and disseminate official Points of Contact (POCs), capabilities, and activities of existing LE and cyber security information sharing programs at all levels nationally; (2) co-host the annual "State of the State" conference; (3) continue support of the Cybercop Portal; (4) co-sponsor the National Cyber Crime Survey with the Department of Justice; (5) participate in the Technical Support Working Groups; (6) coordinate with the NCRCG members to facilitate federal coordination of the various response activities conducted during cyber incidents; (7) continue to develop the ability to receive cyber threat/attack data, analyze and fuse it, and disseminate at the appropriate level to the U.S. Government, the critical infrastructures, and the private sector; and (8) implement the Credit Card Seeding Project, which set up "dummy" credit card accounts, monitors who is accessing these accounts, and analyzes how the money is used.
- The SI Critical Infrastructure Protection Cyber Security (CIPCS) Program will (1) develop an IT sector vulnerability assessment methodology and compile FY 2006 vulnerability assessment information; (2) update the IT SSP as part of the annual review process; (3) collaborate with the Intelligence Community to enable more comprehensive cyber strategic threat assessments; (4) continue to provide cross-sector cyber security guidance to SSAs and federal agencies; and (5) host the Internet Disruption Working Group (IDWG) Forum.
- The SI Training and Education Program will (1) continue to expand and enhance both the CAEIAE and SFS programs; (2) promote a more efficient SFS program by increasing participation of federal agencies; (3) initiate development of a national Information Systems Security (ISS) skill baseline and common body of knowledge (CBK) to facilitate professional certification efforts; and (4) establish partnerships with universities to better prepare the Nation's future business leaders to plan, implement, and manage private sector critical infrastructure protection.

- The SI Software Assurance Program will (1) publish the Secure Software Common Body of Knowledge (CBK); (2) develop a pilot training and education curriculum consistent with the CBK; (3) conduct two semi-annual Software Assurance Forums; (4) launch the "Build Security In" web-based central repository of recommended standards, practices, and technologies for secure software development; (5) publish the "Security in the Software Lifecycle" Developer's Guide v 1.0 and an "Acquisition Manager's Desktop Guide;" (6) develop a business case to support lifecycle use of security best practices; (7) continue to collaborate with NIST to conduct a survey of existing software assurance tools and metrics for effectiveness of these tools; and (8) publish a Software Security Measurement Guide.
- The SI Cyber Exercise Program (CEP) will (1) conduct the National Cyber Exercise: Cyber Storm with federal, state, and international government and industry participants; (2) conduct regional cyber security exercises under PNWER's Exercise Blue Cascades III and additional regions as they are developed; (3) participate in the after-action process in order to assess participant satisfaction to improve future exercise design; and (4) conduct a series of follow-on exercises with the NCRCG and other participant groups focused on lessons learned from Cyber Storm to increase operational capabilities under the National Response Plan and enhance public and private sector collaboration.
- The SI Standards and Best Practices Program will continue to (1) promote common naming conventions for vulnerabilities and malicious code; (2) enhance the database to improve access to vulnerability information; and (4) work with standards and other bodies to improve overall state of cyber security.
- The SI Control Systems Program will continue to enhance the US-CERT capabilities to manage and respond to control system-related cyber incidents. The Program also will validate the Control Systems Security Framework's protection guidelines and self-assessment tools in order to make them available to industry. Additional efforts will be aimed at enhancing and expanding control systems vulnerability assessments and increasing awareness of the potential impacts of a cyber attack on a control system through workshops and demonstrations.
- The O&A Program will (1) coordinate with the Information Technology Sector Coordinating Council, Information Technology Information Sharing and Analysis Center (ISAC), Cross-Sector Coordinating Council, and the ISAC Council in order to advance collaborative processes established under the National Infrastructure Protection Plan; (2) continue to develop working relationships and activities with federal agencies and Multi-State Information Sharing and Analysis Center (MS-ISAC) to increase reach to government stakeholders at all levels; (3) maintain a working relationship with National Cyber Security Alliance (NCSA) and actively develop strategies to incorporate NCSD key messages in NCSA working group activities for outreach to consumers, K-12, and small businesses; (4) coordinate with Office of Domestic Preparedness and Science and Technology Directorate on development and implementation of a community based cyber security program; and (5) work to establish a national program comprised of local teams of volunteers with expertise in relevant areas of science and technology, to assist local communities to respond and recover from attacks on information systems.
- The O&A International Affairs component will (1) continue to develop, participate, and collaborate in cyber security programs in the Organization of Economic Cooperation and Development (OECD), Organization of American States (OAS), Group of Eight (G-8) Critical Information

Infrastructure Protection (CIIP) Directory, “Usual 5” key U.S. allies, Joint Contact Group meetings, and Asia Pacific Economic Cooperation (APEC); (2) continue to establish a US – CERT International collaboration portal to provide a mechanism for communication among international counterparts; (3) continue to develop and implement action plans for additional bilateral working groups that evolve from outreach to collaborative engagement on information sharing, watch and warning, incident response and strategic initiatives; (4) host a multilateral conference with the 15 countries of the International Watch and Warning Network; (5) implement Security and Prosperity Partnership cyber security working group action plans with Canada and Mexico.

- The O&A Public Policy Component will continue to develop and provide input into cyber security related public policy efforts; support congressional hearings as they occur; and respond to Congressional letters from members and other inquiries from Congress.

In FY 2007, NCSA is projecting to accomplish the following goals:

- Increase US-CERT investments in cyber situational tools to analyze the health of federal and non-federal systems and enhance NCSA’s capability to contribute to the overall federal effort to monitor and assess the cyber environment, and continue to refine and expand upon its planned programmatic accomplishments for FY 2006. Specifically, NCSA will: expand operational abilities of the Cyber Watch Center; malicious code analysis; Einstein; Government Forum of Incident Response Teams (GFIRST); and Chief Information Security Officer Forum (CISO). Additionally, (1) US-CERT Strategic Operations program will assist agencies in developing formal forensic policies and procedures based on best practices; (2) US-CERT Strategic Operations will begin the process of evaluating federal agencies against the Computer Network Defense Service Provider (CNDSP) metrics; and (3) US-CERT Mission Operating Environment (MOE) team will complete a technology review and initiate a coordinated integration plan.
- LE&I will continue to refine and expand upon its planned programmatic accomplishments for FY 2006 including: official law enforcement Points of Contact (POCs); Cyber Cop Portal; State of the State Conference; National Cyber Security Survey; participation in Technical Support Working Groups (TSWG); facilitation of the National Cyber Response Coordination Group (NCRCG); facilitation of federal coordination of various response activities; analysis and dissemination of cyber attack and threat data in classified and unclassified reports; production of “unUsual Suspects” reports; and the Credit Card Seeding Project.
- Strategic Initiatives (SI) will continue to refine and expand upon its planned programmatic accomplishments for FY 2006 including: critical infrastructure protection of cyber security; cyber security and training activities; software assurance; cyber exercises; standards and best practices; and control system security. Additionally, (1) SI Software Assurance will host a workshop to conduct a security measurement validation and update to practical Software & Systems Measurement; (2) SI Software Assurance will develop and publish a report on software assurance acquisition and development, including templates for procurement and outsourcing and criteria for evaluating software suppliers; and (3) SI Control Systems Security Program will establish risk metrics based on FY 2005- 2006 data collection and assessments.
- The Outreach and Awareness (O&A) Program will continue to refine and expand upon its planned programmatic accomplishments for FY 2006 to coordinate and develop internal and external communications; ensure consistent cyber security messaging; ensure collaboration on internal and

2472

external NCSO events; and build and maintain trusted relationships among and between industry, government, and academia to raise cyber security awareness and effectively secure cyberspace.

2007 Request	\$143,272
Total Change 2006-2007	2,066

* The Preparedness Directorate did not exist prior to FY 2006. For FY 2005, the funding amounts are provided for those organizations/programs that had a comparable FY 2005 funding level. Please see the Departmental Overview section of the Budget for FY 2005 Actuals from legacy agencies.

The Preparedness Directorate requests \$143,272,000 for NS/EP. This is an increase of \$2,066,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

NS/EP Telecommunications supports the National Communications Systems (NCS) in: (1) the exercise of their homeland security-related telecommunications functions and responsibilities, and (2) the coordination of the planning for and provision of national security and emergency preparedness communications for the federal government under all circumstances, including crisis or emergency, attack & recovery and reconstitution. Specifically, NS/EP Telecommunications:

- Provides government priority telecommunications services, a robust operational level analytical capability of the Nation's telecommunications infrastructure, information sharing forums, alternate communications systems, 24/7 watch operations support, and an interface with industry;
- Administers the National Coordinating Center (NCC) for Telecommunications to facilitate the initiation, coordination, restoration and reconstitution of NS/EP Telecommunications services or facilities under all circumstances;
- Develops and ensures that plans and programs are implemented that support telecommunications infrastructure hardness, redundancy, mobility, connectivity and security; and,
- Serves as the focal point for joint industry, government and interagency NS/EP telecommunications strategic planning and partnerships.

Preparedness executes the NS/EP Telecommunications mission through the following major subprograms:

- Priority Telecommunications - a diverse set of mature and evolving activities designed to ensure priority use of telecommunications services by NS/EP users during times of a national crisis.
- Study and Enhance Telecommunications - administers and funds a number of activities that directly support the NS/EP mission, focusing on telecommunications network resiliency, security, performance and vulnerability.
- Critical Infrastructure Programs (CIP) - Provides NCC operations and implements CIP operations, plans and policy; conducts training and exercises; provides Network Security Information Exchanges (NSIE); and operates priority telecommunications services.
- Industry - Government and Interagency Processes - promotes joint planning, operational activities, coordination and information sharing related to the protection, restoration and recovery of the critical telecommunications infrastructure through well-established, mature relationships with the telecommunications industry and other federal agencies.

In FY 2005, NS/EP accomplished the following:

Priority Telecommunications:

- Increased total Wireless Priority Service (WPS) users to 23,079, and completed WPS full operating capability deployment in the networks of T-Mobile, Nextel, and Cingular. T-Mobile and Sprint Nextel (iDEN) have fully deployed WPS and Cingular will complete WPS deployment FY 2006.
- Increased total distributed Government Emergency Telecommunications Service (GETS) cards to 110,540,000 by end of FY 2005.
- Continued to improve and enhance the GETS capability to support Government users in time of crisis (e.g., during the Gulf Coast Hurricanes, users made over 40,000 GETS calls and over 4,000 WPS calls).
- Continued development of Next Generation Priority Service reference architecture (Version 2) based on industry trends.
- Analyzed standards based upon the NGN reference architectures with the NS/EP voice service overlay. Participated in ATIS and Internet Engineering Task Force-Next Steps in Signaling (IETF-NSIS) standards bodies developing signaling protocols, procedures, and requirements that enable priority treatment in Internet Protocol network.
- Wireless Priority Service (WPS), a program in the developmental phase, accomplished the following in FY 2005:
 - Completed deployment of WPS FOC in Sprint and Nextel (iDEN).
 - Completed deployment of WPS FOC Phase 1 in T-Mobile.
 - Developed vendor software for WPS GSM IOC Phase 2 and FOC capabilities.
 - Completed development of WPS FOC Phase 2 (GSM) features in Ericsson wireless switches.
 - Released final version of Universal Mobile Terminal Service (UMTS) Industry Requirements (IR) - Phase 1 WPS solution.
 - Completed development of WPS FOC (GSM) features in Siemens base stations.
 - Implemented Mobile Switching Center (MSC)-based FOC features in the Nextel network.
 - Developed internet congestion model that analyzes the effect of disruptive events on network performance.

Study and Enhance Telecommunications:

- Conducted modeling and analysis studies supporting NS/EP communications.
- Enhanced modeling capability (including tools and data).
- Responded to Committee on Foreign Investment in the United States (CFIUS) and Federal Communications Commission (FCC) requests for technical assessments of telecommunications companies.
- Published Code Division Multiple Access (CDMA) Signaling Control Point (SCP) standard.
- Analyzed the Electromagnetic Pulse (EMP) vulnerability of backbone Internet Protocol (IP) networks.
- Developed a route diversity methodology and conducted proof of concept testing for three federal agencies.
- Continued development of Next Generation Priority Service (NGPS) reference architecture (Version 2) based on industry trends.

Critical Infrastructure Programs:

- Provided 24x7 NCC Watch operations in support of the NS/EP telecommunications and telecommunications Information Sharing and Analysis Center (ISAC) mission.
- Expanded membership of NCC Telecom-ISAC to broaden the base of member expertise
- Refined NCC Communications-ISAC procedures and policies and addressed cross-sector issues with other ISAC entities.
- Continued to coordinate with appropriate operational and policy bodies including the Homeland Security Operations Center (HSOC), the National Infrastructure Coordination Center (NICC), the National Cyber Security Division's US-CERT and the White House Office of Science and Technology Policy (OSTP).
- Evaluated and expanded the Alerting and Coordination Network (ACN) membership and conducted multiple ACN operational exercises.
- Ensured SHARES readiness in support of the NS/EP telecommunications mission and addressed membership participation.
- Exercised COOP/ECG procedures and increased the knowledge and skills of staff in these procedures.
- Co-sponsored a classified Inter-Agency test program that provided a quantitative assessment of the communications capabilities of federal departments and agencies (D/As) as described in the COOP Communications Plan (CCP).
- Participated in international bilateral discussions, including activities with Mexico, Canada, U.K., Japan, India and the Netherlands.
- Authored the Telecommunications Annex of the U.S. International CIP Strategy document and coordinated the document through the Department of State.
- Authored telecommunications inputs to the White House Security and Prosperity Partnership (SPP) security agenda.
- Examined the undersea cable system for vulnerabilities (to include impacts on voice and data traffic) and developed an issue paper to describe those vulnerabilities.
- Coordinated with industry on the development of policy and procedures for sharing, handling and protecting sensitive and proprietary Telecommunications data and analyses.
- Activated national and regional elements for ESF #2 in response the emergency conditions created by Hurricanes Dennis, Emily, Katrina, Rita, and Wilma.
- Supported assessment, recovery, and restoration of communications services (wireline, wireless, broadcast, and Public Safety radio) in the Gulf Coast region.

- Coordinated with industry on the development of a Standard Operating Approach to describe the communications service restoration process in the aftermath of Hurricanes Katrina and Rita.

Industry - Government and Interagency Processes:

- Provided Secretariat support for the President's National Security Telecommunications Advisory Committee (NSTAC).
- Conducted analysis of industry trends and emerging technologies.
- Provided Secretariat support for the NCS Committee of Principals (COP), to include technical, logistical, executive, planning and managerial support in the identification, development, and analysis of communications issues and solutions.
- Participated in the Continuity of Communications Working Group (CCWG) to develop an architecture that will support the performance of Federal Executive Branch minimum essential functions and processes under all circumstances, including crisis or emergency, attack, recovery, and reconstitution.
- Developed a description of the Next Generation Networks (NGN) and analyzed how the NS/EP functional requirements, user requirements, and responsibilities will change on the NGN, and tested NGN service scenarios against possible threats.
- Worked to exercise our responsibilities as Sector Specific Agency for Telecommunications as part of HSPD-7 and the National Infrastructure Protection Plan.

In FY 2006, NS/EP plans to accomplish the following goals:

Priority Telecommunications:

- Increase total WPS users to 30,000.
- Implement Special Routing Arrangement Service (SRAS) in the MCI and Sprint networks
- Implement SRAS access and routing features in local exchange networks.
- Complete deployment of WPS FOC in the Cingular network.
- Complete development of CDMA FOC Phase 1 - WPS features in Lucent switches and base stations.
- Complete development of WPS modifications in Qualcomm Q-SEC 2700 handsets.
- Commence development of CDMA FOC Phase 2 - WPS features in Nortel and Lucent switches and base stations.
- Complete deployment of CDMA FOC Phase 2 in T-Mobile.
- Engineer and develop UMTS WPS Phase 1.
- Deploy FOC Phase 1 in initial CDMA carrier network.
- Provide outreach to qualified NS/EP personnel that will increase the WPS user base.
- Provide operations and maintenance support required to meet goals for authorizing new WPS users and responding to customer requests for support.
- Increase total GETS cards to 118,000.
- Identify, develop and implement routing and signaling enhancements in the AT&T network.
- Deploy AT&T GETS/SRAS Internet Protocol (IP) Common Backbone IOC.
- Commence development of AT&T GETS/SRAS IP Common Backbone FOC features.

Study and Enhance Telecommunications:

- Conduct NS/EP communications modeling and analysis studies.
- Maintain and enhance modeling capabilities (tools and data).
- Respond to CFIUS and FCC requests for technical assessments of telecom companies

- Continue to conduct route diversity analyses with individual departments and agencies, as requested.
- Continue to develop prototype capability for priority services over the Internet.
- Investigate technology solutions in support of route diversity e.g., broadband wireless access (BWA), WiMax.
- Conduct environmental performance testing of technology solutions in support of route diversity.
- Develop SCADA communications modeling and analysis capability.
- Investigate next generation monitoring and control networks in support of electric power
- Conduct real-time electric utilities network performance characterization in support of control system modeling.
- Work with industry standards organizations to ensure that Emergency Telecommunications Service (ETS) security requirements are included in NGN standards.
- Coordinate enhancements to signaling systems in support of ETS.
- Ensure that the developing Next Generation Networks - Release 1 requirements includes support for NS/EP priority services.
- Continue research on Telecommunications Electromagnetic Disruptive Effects (TEDE).
- Continue research on satellite systems utility and vulnerabilities.
- Expand GPS timing utilization and vulnerability investigations.
- Continue analysis of NGN and wireless communications vulnerabilities.

Critical Infrastructure Programs:

- Participate in international exchanges/bilateral agreement development and apply lessons learned to NCC operations.
- Coordinate Homeland Security Telecommunications Link (HSTL) installations on behalf of Secretary Chertoff.
- Execute ESF #2 response and recovery duties and conduct readiness training under the NRP.
- Support Telecom- ISAC functions; expand direction / memberships; assess technology impacts.
- Maintain 24x7 NCC Watch operations in support of NS/EP communications ISAC mission.
- Chair the NATO CCPC Ad Hoc Working Group on Response to Terrorism and to revise NATO document AC/98-D7184 "Censorship of International Communications in Time of War".
- Continue to participate in semi-annual bilateral meetings with Mexico and Canada.
- Share Wireless Priority Service engineering protocols and GETS functions for cross border functions with Canada.
- Move to new location - new 24x7 Watch facility.
- Continue to sponsor and host NCC semi-annual meeting at the NCC with participation from the Communications ISAC and NCC industry and government membership.
- Continue the development and orchestration of cross-sector forum discussions with other ISACs for the purpose of identifying interdependencies and cross-sector vulnerabilities.
- Finalize, implement and document an analytical framework for conducting up to four in-depth telecommunication assessments of high profile geographical areas.
- Establish a "Core Analytical Team"- composed of representatives from several organizations- along with standard operating procedures to support the analytical needs of emergency response operations.

- Identify, evaluate, and select a framework to assess the dependency between telecommunications and other critical infrastructures to calculate the criticality of the relationships.
- Conduct risk assessments on a minimum of 50 "high interest" telecommunication assets.
- Provide analytical support during emergency operations and on an as requested basis.
- Develop, test and implement a methodology to serve as the focal point for state and local telecommunication data and analytical requests.
- Plan in the development, coordination and execution of exercises and as a result assess vulnerabilities of the telecommunications networks.

Industry - Government and Interagency Processes:

- Provide secretariat support for the President's National Security Telecommunications Committee (NSTAC), including four quarterly NSTAC Principal conference calls, an annual full-committee meeting, monthly Industry Executive Subcommittee meetings, and over 200 task force, working group, and ad hoc meetings.
- Submit NSTAC membership analysis and recommendations for committee composition to the President
- Hold an R&D Exchange for industry, Government and academia.
- Provide secretariat support for the NCS Committee of Principals (COP) to include: technical, logistical, executive, planning and managerial support in the identification, development, and analysis of NS/EP communications issues and recommended solutions.
- Support an NCS COP working group to help develop an architecture that will support the performance of Federal Executive Branch minimum essential functions and processes under all circumstances, including crisis or emergency, attack, recovery, and reconstitution.
- Support an NCS COP working group to address current and emerging priority telecommunications services.
- Revise or establish NCS Issuances on NS/EP policies, programs, and procedures.

In FY 2007, NS/EP plans to accomplish the following goals:

Priority Telecommunications:

- Increase total WPS users to 39,000.
- Begin development of vendor software to migrate WPS functionality with NGN.
- Identify, develop and implement routing and signaling Next Generation Network IP enhancements in the GSM Carriers' networks (UMTS).
- Complete development of CDMA FOC Phase 2 WPS features in Nortel switches and base stations.
- Achieve Lucent CDMA FOC Phase 2 General Availability.
- Deploy FOC Phase 2 in two CDMA carrier networks.
- Increase total GETS cards to 136,000.
- Begin to engineer the migration of GETS and SRAS functionality to an all IP network infrastructure.
- Identify, develop and implement routing and signaling NGN enhancements in the AT&T, MCI and Sprint networks.
- Test and implement GETS/SRAS in AT&T's IP Common Backbone FOC network.
- Provide outreach to qualified NS/EP personnel that will grow the GETS user base.

Study and Enhance Telecommunications:

- Conduct NS/EP communications modeling and analysis studies.
- Maintain and enhance modeling capability (tools and data).
- Respond to CFIUS and FCC requests for technical assessments of telecom companies.
- Conduct route diversity analyses with individual departments and agencies, as requested.
- Continue development of prototype priority mechanism for voice, video, and other services over IP networks.
- Investigate technology solutions in support of route diversity e.g., broadband wireless access (BWA), WiMax.
- Conduct environmental performance testing of technology solutions in support of route diversity.
- Continue research on Telecommunications Electromagnetic Disruptive Effects (TEDE).

Critical Infrastructure Programs:

- Coordinate next generation network application ideas and issues with Canadian counterparts.
- Host quadrilateral discussions with representatives from the U.K., Canada and Mexico to share ideas and vet appropriate procedures aimed at decreasing vulnerabilities.
- Coordinate Homeland Security Telecommunications Link (HSTL) installations on behalf of Secretary Chertoff.
- Continue to represent the U.S. in NATO's CCPC and provide expertise and guidance to CCPC white papers.
- Participate in bilateral meetings and present ideas with a focus on the telecommunications infrastructure in support of the Under Secretary for Preparedness.
- Continue to study open architecture GIS programs to meet operational capability requirements.
- Maintain 24x7 NCC Watch operations in support of the NS/EP Communications ISAC mission.
- Continue the development and orchestration of cross-sector forum discussions with other ISACs for the purpose of identifying interdependencies and cross-sector vulnerabilities.
- Perform ESF #2 duties in support of events and ensured readiness through planning and participation in training activities.
- Conduct and document up to 6 in-depth telecommunication assessments of high profile geographical areas.
- Apply a framework to assess the dependency between telecommunications and other critical infrastructures to calculate the criticality of the relationships.
- Conduct risk assessments on a minimum of 50 "high interest" telecommunication assets.
- Provide analytical support during emergency operations and on an as requested basis.
- Serve as the focal point for state and local telecommunication data and analytical requests.
- Coordinate an infrastructure interdependency exercise/table-top with at least five critical infrastructures.
- Coordinate government/private sector participation in emergency response exercises.
- Participate in the planning, coordination and execution of Exercise TOPOFF 4 and PINNACLE.
- Produce the biennial Assessment of the Risk to the Security of the Public Network.
- Sponsor a vulnerability assessment and/or cyber exercise.

Industry - Government and Interagency Processes:

- Provide continued support to the NCS Committee of Principals, to include: technical, logistical, executive, planning and managerial support in the identification, development, and analysis of NS/EP communications issues and recommended solutions.
- Maintain strong relations with the telecommunications industry and the NCS COP to facilitate joint planning, operational activities, coordination of assessments, information sharing, and restoration and recovery of the critical telecommunications infrastructure.
- Provide continued support to the President's National Security Telecommunications Advisory Committee (NSTAC), comprised of up to 30 chief executives, which provides policy-based recommendations to the President regarding NS/EP communications.
- Collaborate with the National Infrastructure Advisory Council (NIAC) and other industry and governmental bodies involved in continuity communications, critical infrastructure protection, and homeland security.
- Provide Secretariat support for the President's National Security Telecommunications Committee (NSTAC), including four quarterly NSTAC Principal conference calls, an annual full-committee meeting, monthly Industry Executive Subcommittee meetings, and over 200 task force, working group, and ad hoc meetings.
- Submit NSTAC membership analysis and recommendations for committee composition to the President.
- Support NCS COP working groups to address emerging continuity communications matters and minimum essential functions and processes under all circumstances, including crisis or emergency, attack, recovery, and reconstitution.
- Continue to assist industry in analyzing convergence issues in Next Generation Networks with regard to NS/EP functional and user requirements.
- Continue to support industry and Government preparations regarding telecommunications for National Security Special Events (NSSE).
- Assist in the implementation of the National Response Plan, particularly the Emergency Support Functions relating to Communications and Information Technology.
- Revise or establish NCS Issuances on NS/EP policies, programs, and procedures.
- Contribute to the implementation and management of activities of the National Infrastructure Protection Plan.
- Continue to monitor the implementation of the Telecommunications Sector Specific Plan in response to Homeland Security Presidential Directive-7.

IV. Program Justification of Changes

**Department of Homeland Security
Preparedness Directorate
Infrastructure Protection and Information Security
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Homeland Security Presidential Directive – 7 and the National Infrastructure Protection Plan

Strategic Goal(s) & Objective(s): Protection 3.2 - 100%: Reduce infrastructure vulnerability from acts of terrorism.

PPA: Critical Infrastructure Outreach and Partnerships

Program Increase: Positions ____ FTE ____ Dollars \$35,000

Funding Profile

* The Preparedness Directorate did not exist prior to FY 2006. Please see the Departmental Overview section of the Budget for FY 2005 Actuals from the legacy agencies of BTS, IAIP, and OSLGCP.

Description of Item

A total increase of \$35 million is requested for Homeland Security Presidential Directive – 7 and the Nation Infrastructure Protection Plan (NIPP). Of this total \$5 million is for the NIPP program office and \$30 million is for NIPP implementation.

Justification

Homeland Security Presidential Directive – 7 directs DHS to coordinate the national infrastructure protection effort. The NIPP is the risk-based framework and strategy that guides this effort. The NIPP Program Management Office will coordinate, socialize and implement the NIPP through partnerships across all CI/KR sectors, measure program effectiveness and provide on-going NIPP program maintenance through annual and triennial reviews, and promote the education and training of federal, state, and local officials and private sector stakeholders. Additionally, program management support will be provided to the Sector-Specific Agencies (SSA) for each of the 17 sectors on final development and approval of the Sector-Specific Plans. As part of the Department’s support of national CI/KR protection missions, goals and objectives DHS will support the implementation of sector-specific plans (SSP) by coordinating with sector-specific agencies to: 1) develop sector-specific criteria, tools and requirements; 2), measure sector program effectiveness and 3) conduct outreach and engagement with sector security partners.

- 1) Development of Sector-specific criteria, tools, and requirements
DHS will work with SSA and sector security partners to develop sector-specific criteria, tools, and requirements to support SSP implementation that may include, but is not limited to:
 - Asset Identification Criteria (including cyber and international)
 - Prioritization Criteria
 - Vulnerability Assessment Tools
 - Interdependencies between and among assets, systems, and sectors
 - Recommended protective measures
 - Best practices and lessons learned
 - Information protection processes and procedures
 - Information sharing mechanisms
 - Training modules and programs

- 2) Measure sector program effectiveness
DHS will work with the SSA to establish sector-specific metrics and measures to evaluate SSP implementation and overall program effectiveness. This will include consideration of possible resource requirements and identifying and communicating obstacles to effective infrastructure protection.

- 3) Conduct outreach and engagement with security partners
The NIPP Base Plan and SSP implementation and the Outreach and Engagement process will require DHS and SSA to build partnerships and alliances with inter-governmental and sector-specific security partner constituencies involved with and supportive of the implementation process; to develop mechanisms for wider, direct public and private sector participation in the implementation process; to communicate and initiate NIPP Base Plan and SSP implementation as the basis for all our actions; and to enter into dialogue with as wide a range of the target audience as possible.

The approach to establishing stakeholder engagement is divided into three components: inter-governmental, state, territorial, local, and tribal governments, and private sector security partners. Although these three components speak to distinct constituencies, the engagement will occur concurrently. They represent venues for promoting common efforts and ensuring two-way exchange of information. DHS in coordination with the SSA will facilitate meetings and conferences in order to begin development of a consensus positions on the way forward for implementing and engaging our security partners on the plans.

- *Inter-Governmental Stakeholder Engagement* - DHS will work directly with the SSA and the NIPP Senior Leadership Council to implement and address inter-governmental engagement activities. DHS, SSA, and the NIPP Senior Leadership Council recognize that they must continue to work closely with all executive branch departments and agencies in order to meet expectations for an effective and inclusive process to implement the NIPP Base Plan and the SSP. This process will create a forum for education and discussion of the national critical infrastructure protection effort by agencies or parts of agencies.
- *State, territorial, local, and tribal governments* - DHS will work directly with the SSA to coordinate and address all state, territorial, local, and tribal engagement and implementation activities. In order to advance this process, significant involvement from the state, territorial, local, and tribal entities is required.

- o *Private Sector Security Partners* - DHS will work directly with the SSA to coordinate and address all security partner engagement activities associated with the implementation of the NIPP Base Plan and the SSP.

Since March 2003, much has been accomplished to protect the Nation's CI/KR but much more is needed. The NIPP will be issued during 2006. In 2007, sector specific plans will be fully developed for each of the 17 CI/KR sectors. These plans will outline the steps DHS and other Federal agencies will take in identifying assets, systems and networks; assessing vulnerabilities and consequences; and developing protection initiatives and priorities based upon the risk management framework. For 2007, \$30 million is requested for the Office of Infrastructure Protection for sector specific protective programs targeted at the highest priority initiatives that are considered nationally critical. This funding will enable DHS to be responsive to closing the most critical vulnerabilities that may arise unexpectedly but must be addressed immediately. This funding will be a critical component of the overall NIPP risk based resource allocation process that will encompass all infrastructure protection programs, initiatives, and priorities across all CI/KR sectors. When combined with the prioritized funding requests from the sector specific agencies and the federal grant programs targeted at CI/KR, these funds will enable the Office of Infrastructure Protection to respond to our nation's most urgent CI/KR vulnerabilities while we are ensuring that we are applying our resources towards our most critical needs across the 17 CI/KR sectors.

NIPP Implementation

Sector Building Activities	Process Development Activities
<p>Private Sector Engagement:</p> <ul style="list-style-type: none"> ✓ Develop stakeholder engagement process <ul style="list-style-type: none"> ▪ DHS create sector-specific stakeholder plans and calendars ✓ Implement security partner engagement process 	<p>Asset Identification</p> <ul style="list-style-type: none"> ✓ DHS coordinate with SSA regarding data collection needs <ul style="list-style-type: none"> ▪ Describe DHS/SSA approach to data collection needs ▪ Develop bulletin ▪ Hold technical assistance meeting between DHS, SSA, and support agencies
<p>SSA Engagement</p> <ul style="list-style-type: none"> ✓ DHS re-engages with SSA following NIPP Base Plan delivery ✓ Develop guidance on revising the SSP ✓ Engage with SSA regarding security partner engagement <ul style="list-style-type: none"> ▪ DHS and SSA meet to discuss impacts of engagement strategy ✓ Engage with SSA regarding SSP revision process <p>Issue guidance on annual reports/SSP updates</p>	<p>Vulnerability Assessment</p> <ul style="list-style-type: none"> ✓ Conduct Vulnerability Assessments ✓ Determine process for collecting and protecting VA data from SSA and security partners ✓ Determine process for sharing vulnerability information back with sectors ✓ Review vulnerability assessments for common themes ✓ Develop default methodologies for sectors

Program measurement	Program measurement
Outcomes: Operating SCC and GCC State NIPP plans	Outcomes: Implement NIPP Base Plan Revised SSP
Impact on Performance (Relationship of Increase to Strategic Goals)	

DHS, in close coordination with the SSA, will:

- Distribute Security Partner Engagement Guidance
- Draft Engagement Plan
- Schedule Engagement Activities
- Begin Implementation

The NIPP is consistent with, and is a cornerstone of the department’s implementation of HSPD -7, the critical infrastructure identification, prioritization, and protection, as well as the Secretary of Homeland Security’s Risk Management goals. DHS, in close coordination with the SSA and in compliance with departmental guidance, will develop and implement the NIPP Processes at the National and sector levels:

- Training;
- Asset identification;
- Prioritization criteria;
- Vulnerability assessment;
- Performance metrics & reporting;
- Interdependencies;
- Information protection;
- Information sharing;
- Cyber element;
- Human element;
- Physical element & protective measures;
- Risk assessment/definition; and,
- International.

Program Increase 2: Chemical Security Office

Strategic Goal(s) & Objective(s): Protection 3.2 - 100%: Reduce infrastructure vulnerability from acts of terrorism.

PPA: Protective Actions

Program Increase: Positions ___ FTE ___ Dollars \$10,000

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									\$0
Program Increase									\$10,000
Total Request						\$0			\$10,000

Description of Item

A total of \$10,000,000 is requested for the establishment of a Chemical Security Office.

Justification

The Office of Infrastructure Protection will establish a Chemical Security Office to reduce the risk posed to the chemical sector from a potential terrorist attack. Security of the chemical sector is vitally important: It is a very high priority for DHS to reduce the risk from terrorism by implementing collaborative security strategies with federal, state, local, and private sector partners—to protect the nation’s chemical infrastructure.

DHS has determined that a chemical security office would help ensure that DHS have the proper tools to address threats facing the chemical industry, now and in the future. To close the existing gaps and reduce risk across the chemical sector, the office would adhere to certain core principles.

- Not all facilities present the same level of risk, and that the most scrutiny should be focused on those that, if attacked, could endanger the greatest number of lives, have the greatest economic impact or present other very significant risks. There are certainly many chemical facilities in the United States that pose relatively low risk.
- Facility security should be based on reasonable, clear, equitable performance standards. The Department should develop enforceable performance standards based on the types and severity of potential threats posed by terrorists, and facilities should have the flexibility to select among appropriate site-specific security measures that will effectively address those threats.

DHS has identified five areas as the focus of our primary preparedness work with the industry: (1) access and access control; (2) operational security; (3) process control; (4) facility systems operations; and (5) local first responder and external response and recovery coordination. The new office would work with industry in these areas to ensure the current scope and level of protection efforts will be sufficient to address gaps and threats.

2486

Impact on Performance (Relationship of Increase to Strategic Goals)

The establishment of a Chemical Security Office to establish standards and ensure strong safeguards are in place will reduce the chemical industry critical infrastructure vulnerability from acts of terrorism and natural disasters.

IPIS - 56

PPA Mission Statement					
The IPIS M&A PPA includes the salary costs of FTE salary and locality pay, including benefits and awards. The administrative costs for IPIS include non-GSA rent, facilities fit out, office supplies, training and travel expenses. A portion of the DHS working capital fund items that are directly correlated to the FTE are funded out of M&A. Additionally, the administrative costs include support from the Office of the Under Secretary, including the CIO, Business Operations office, Front Office and Administrative Operations.					

Summary Justification and Explanation of Changes				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$0	\$49,269	\$56,839	\$7,570
Salaries and Benefits includes costs for 445 FTEs. The FY 2007 request includes an increase of \$960,741 for the proposed January 2007 2.2 percent increase in personnel compensation, \$6,609,326 increase for annualization of previously vacant IPIS positions which were half year funded in FY 2006. The FY 2007 request includes an assumption of 95% staffed.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$0	\$378	\$389	\$10
Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations. The FY 2007 request includes a non-pay increase of \$10,000 due to the number of travelers increasing.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$0	\$766	\$766	\$0
GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes a similar level of rent covered by IPIS M&A, \$766,000.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Rent	\$0	\$3,950	\$4,017	\$67
Other rent includes all payments to a non-federal source for rental space, land, and structures. The FY 2007 request includes an increase of 67,000 in WCF technical programmatic adjustments.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$5,117	\$82	(\$5,036)
Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes technical programmatic decreases of \$5,036,000 that partly funds the increased salary and benefit requirements in FY 2007.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$0	\$19,825	\$15,295	(\$4,530)
Advisory and assistance services include services acquired by contract from non-federal sources (that is the private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY2007 request includes a technical programmatic decrease of \$2,862,000.				

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$0	\$0	\$133	\$133
Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY2007 request includes increases of \$133,000 in technical programmatic increases.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Purchase from Government Accounts	\$0	\$2,303	\$3,138	\$835
Purchases from Government Accounts include costs for purchases from other federal government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$835,000 in WCF technical programmatic increases.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Operation & maintenance of facilities	\$0	\$800	\$3,381	\$2,581
Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another federal government account. The FY 2007 request includes an increase of \$2,581,000 for Guard Services and other technical programmatic increases.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$0	\$100	\$610	\$510
Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY2007 request includes WCF increases for this object class of \$510,000.

PPA Mission Statement

CIOP develops and maintains an organizational structure, operational tools and defined processes to assure a continuous state of awareness and alert. A robust organizational framework in support of all stakeholders facilitates the identification, prioritization, coordination, and protection of critical infrastructures/key resources. It also provides forums and networks to encourage sharing of information about threats, vulnerabilities, incidents, potential protective measures, and best practices that enhance response, mitigation and restoration activities.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$429	\$156	\$216	\$60

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations. The FY 2007 request includes increases of \$59,754 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$0	\$0	\$104	\$104

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes \$103,544, which was included in IPIS M&A PPA in FY 2006.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$4,694	\$6,283	\$1,589

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes an increase of \$1,589,279 for program changes to CIOP.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$55,524	\$65,825	\$90,303	\$24,477

Advisory and assistance services include services acquired by contract from non-federal sources (that is the private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request increases by \$24,477,586. This is due in part to the program increase of NIPP Management and NIPP Sector Specific Plans, and the transfer out of CFIUS, a \$1,650,000 decrease to CIOP's FY 2007 Base.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$132	\$10,655	\$0	(\$10,655)

Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decrease of \$10,654,637 as funding for the datacenter at Stennis is not being requested in FY 2007.

2499

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$34,685	\$12,846	\$352	(\$12,494)

Purchases from Government Accounts include costs for purchases from other federal government agencies or accounts that are not otherwise classified. The FY 2007 request decreases by a net of \$12,494,242 as the datacenter at Stennis is not being requested in FY 2007, which includes an increase of \$351,944 for Program Changes.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & maintenance of facilities	\$3,628	\$0	\$70	\$70

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another federal government account. The FY 2007 request includes an increase of \$70,000 for operations charges previously captured in IPIS M&A.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$0	\$10,551	\$0	(\$10,551)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another federal government account. The FY 2007 request decreases by \$10,551,107 as the datacenter at Stennis is not being requested in FY 2007.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$27	\$275	\$10	(\$265)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2007 request includes a reduction of \$264,783 for technical program adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$3,761	\$3,363	\$897	(\$2,466)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request does not include a request for the datacenter at Stennis, resulting in a decrease of \$2,465,764.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Land & Structures	\$0	\$2,690	\$2,866	\$176

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements. The FY 2007 request includes a WCF technical programmatic adjustment increase of \$175,819.

PPA Mission Statement

CIIE carries out vulnerability assessments of critical infrastructure and key assets of the United States, and communicates standards to the infrastructure owners and key stakeholders. CIIE collects, verifies, and analyzes vulnerability and protective measure information on critical infrastructure and key assets from private sector owners and operators, public sector owners and operators, regulatory agencies within the Federal Government, and state and local governments so that protective measures can be prioritized.

Travel	\$105	\$189	\$2,100	\$1,911
Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations. The FY 2007 request includes an increase of \$1,911,017 for technical programmatic increases in travel.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$0	\$0	\$123	\$123
GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes \$123,000, which was included in IPIS M&A PPA in FY 2006.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$2,877	\$4,520	\$1,643
Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$1,643,000 in WCF technical programmatic increases.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$35,394	\$27,174	\$34,110	\$6,935
Advisory and assistance services include services acquired by contract from non-federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. This FY 2007 increase includes a transfer of \$4,000,000 from the Protective Actions PPA to Critical Infrastructure Identification and Evaluation for Control Systems funding, and \$2,935,495 increase for mission requirements.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$4	\$2,607	\$0	(\$2,607)
Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decreases of \$2,607,000 for technical programmatic adjustments.				

2502

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$5,734	\$26,665	\$25,800	(\$865)

Purchases from Government Accounts include costs for purchases from other federal government agencies or accounts that are not otherwise classified. The FY 2007 request includes a decrease of \$865,000 for technical programmatic reductions.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$2,414	\$186	\$0	(\$186)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another federal government account. The FY 2007 request includes a decrease of \$186,000 for technical programmatic reductions.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$34	\$64	\$0	(\$64)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2007 request includes a decrease of \$64,000 for technical programmatic reductions.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$0	\$6,411	\$2,948	(\$3,463)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes a decrease of \$3,463,000 for technical programmatic reductions and changes in mission needs.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Land & Structures	\$0	\$1,643	\$2,030	\$388

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements. The FY 2007 request includes an increase of \$387,834 for WCF technical programmatic increases.

PPA Mission Statement

NISAC provides a comprehensive modeling and simulation capability to perform an analysis of critical infrastructures, their interdependencies, complexities, and the consequences of disturbances. NISAC promotes nationwide involvement in infrastructure-related modeling analysis by enabling contributions from a wide range of sources and supports consequence mitigation strategy development by predicting the cascading effects of potential operational disruptions to U.S. infrastructure.

Summary Justification and Explanation of Changes				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$0	\$360	\$345	(\$15)
Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations. The FY 2007 request includes a decrease of \$15,376 for technical programmatic reductions.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$0	\$0	\$28	\$28
GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes \$27,501, which was included in IPIS M&A PPA in FY 2006.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$837	\$996	\$159
Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$158,803 in WCF technical programmatic increases to the NCA IT costs.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$19,290	\$2,927	\$2,216	(\$712)
Advisory and assistance services include services acquired by contract from non-federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a decrease of \$711,707 for technical programmatic reductions.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$0	\$4	\$0	(\$4)
Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decrease of \$4,435, which is included in the IPIS M&A PPA in FY 2007.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Purchase from Government Accounts	\$0	\$15,172	\$11,983	(\$3,189)
Purchases from Government Accounts include costs for purchases from other federal government agencies or accounts that are not otherwise classified. The FY 2007 request includes a decrease of \$3,189,054 for technical programmatic reductions.				

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$0	\$18	\$0	(\$18)
Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2007 request includes a decrease of \$18,445 for technical programmatic reductions.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Land & Structures	\$0	\$480	\$454	(\$25)
Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements. The FY 2007 request includes a decrease of \$25,158 for WCF technical programmatic reductions.

PPA Mission Statement					
PA assists Federal, state, local, tribal, and private sector organization in devising protection strategies, programs, and best practices. Training is also provided to infrastructure owners and operators and the local law enforcement entities that help protect them. Best practice activities reduce the vulnerability of and coordinate the protection of critical infrastructure and key resources. Critical infrastructure and key resources provide the essential services that underpin American society and must be protected.					

Summary Justification and Explanation of Changes				
	2005	2006	2007	2006 - 2007

PPA Mission Statement

Cyber Security works collaboratively with public, private, and international entities to secure cyberspace and America's cyber assets.

Summary Justification and Explanation of Changes				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$260	\$ 553	\$ 551	(\$1)
Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations. There is a technical program decrease of \$1,000 for travel in FY 2007.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$0	\$ -	\$ 158	\$158
GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes \$158,000, which was included in IPIS M&A PPA in FY 2006.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$16	\$ 4,182	\$ 6,006	\$1,824
Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$1,824,000 in WCF technical programmatic increases to the NCA IT costs.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$47,787	\$ 77,143	\$ 74,167	(\$2,976)
Advisory and assistance services include services acquired by contract from non-federal sources (that is the private sector, foreign governments, state and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a technical program negative adjustment of \$2,976,000.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$0	\$ 358	\$ 318	(\$40)
Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a technical program negative adjustment of \$40,000.				

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Purchase from Government Accounts	\$4,858	\$ 7,617	\$ 8,149	\$533
Purchases from Government Accounts include costs for purchases from other federal government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$129,000 in non-pay inflation and \$403,000 in technical program adjustments.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Operation & Maintenance of equipment	\$1,224	\$ 92	\$ 95	\$3
Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$1,570 for non pay inflation and a WCF technical adjustment of \$1,100.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$22	\$ 197	\$ 110	(\$86)
Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2007 request includes a technical program negative adjustment of \$86,000.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$38	\$ 37	\$ 37	(\$0)
Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. There is no change.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Land & Structures	\$0	\$ 2,238	\$ 2,614	\$376
Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements. The FY2007 request includes a WCF technical programmatic adjustment increase of \$376,000.

PPA Mission Statement

NSEP provides mission-critical communications for federal, state and local governments, and private industry through the following functions: (1) Administering the National Coordinating Center for Telecommunications to facilitate the initiation, coordination, restoration and reconstitution of NE/EP Telecommunications services or facilities under all circumstances; (2) Developing and ensuring the implementation of plans and programs that support telecommunications infrastructure hardness, redundancy, mobility, connectivity and security; and (3) Serving as the focal point for joint industry - Government and interagency NS/EP telecommunications planning and partnerships.

Summary Justification and Explanation of Changes				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$439	\$478	\$491	\$13
Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations. The FY 2007 request includes increases of \$13,000 in non-pay inflation.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$0	\$0	\$246	\$246
GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes \$246,000, which was included in IPIS M&A PPA in FY 2006.				
	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$5,968	\$8,904	\$2,935
Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes an increase of \$2,834,540 in WCF technical programmatic increases to the NCA IT costs. The request also includes non pay inflation of 101,460.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Preparedness Directorate
Biodefense Countermeasures

I. **Biodefense Countermeasures Overview**

A. Mission Statement for Biodefense Countermeasures:

Biodefense Countermeasures provides secure medical countermeasures to strengthen the Nation's preparedness against bioterrorism attacks, including promoting the removal of barriers to development and production processes and pre-purchasing critically needed vaccines or medication for biodefense. Funding for the program facilitates the development and production processes that the Government undergoes to pre-purchase critical vaccines or medication for biodefense upon subject matter expert approval of the vaccine placement into the Strategic National Stockpile.

B. Budget Activities:

The Biodefense Countermeasures funding will support the Government's efforts to secure medical countermeasures to strengthen the Nation's preparedness against bioterrorism attacks, including promoting the removal of barriers to development and production processes and pre-purchasing critically needed vaccines or medication for biodefense. The current timeline for developing, procuring, and licensing vaccines and medicines to counter bioterrorism can be years, which in some cases may discourage countermeasures.

In FY 2005 the Biodefense Countermeasures focused on strengthening the Government's efforts to secure medical countermeasures to strengthen the Nation's preparedness against bioterrorism attacks, including promoting the removal of barriers to development and production processes and pre-purchasing critically needed vaccines or medication for biodefense.

In FY 2006 and FY 2007, Biodefense will continue to coordinate efforts to remove barriers to development and production processes and will allow the Government to pre-purchase critically needed vaccines or medication for biodefense as soon as experts agree the vaccines and medications are safe and effective enough to place in the Strategic National Stockpile.

C. Budget Request Summary:

The Biodefense Countermeasures was transferred to the Preparedness Directorate from FEMA under the Department's Second Stage Review (2SR) and received no program enhancements. The program will continue to operate using advance appropriations from FY 2004 and FY 2005 for the period FY 2005 – FY 2008. In FY 2006, \$2,324,009,000 was available for obligation through FY 2008. The Biodefense program under direction of the DHS Chief Medical Officer (CMO) will continue to provide secure medical countermeasures to strengthen the Nation's preparedness against bioterrorism attacks, including promoting the removal of barriers to development and production processes and pre-purchasing critically needed vaccines or medication for biodefense.

Preparedness does not request any funding in FY 2007 for this activity because funding is provided through advanced appropriations.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Biodefense Countermeasures funding, provided through advanced appropriations, will support the Government's efforts to secure medical countermeasures to strengthen the Nation's preparedness against bioterrorism attacks, including promoting the removal of barriers to development and production processes and pre-purchasing critically needed vaccines or medication for biodefense.

In FY 2005, The Biodefense Countermeasures program achieved the following accomplishments:

- Awarded the contract for recombinant protection antigen (rPA) in November, 2004 for 75 million doses anticipating delivery completion in November 2006.
- Awarded the Pediatric Formulation (Liquid) Potassium Iodide (KI), (licensed in January, 2005) contract in March 2005 for 1.7 million bottles, with initial delivery in May, 2005, anticipating delivery completion in September 2005.
- Awarded the Anthrax Vaccine Adsorbed (AVA) contract in May 2005, with initial delivery in May, 2005, anticipating delivery completion in September 2005.
- The program secured enough botulism antitoxin, (both mono and heptavalent types) to double our Nation's readiness capabilities to a botulism event. These antitoxins are currently stored in the Strategic National Stockpile.

In FY 2006, Biodefense is planning on accomplishing the following goals:

- Coordinate efforts to remove barriers to development and production processes and will allow the Government to pre-purchase critically needed vaccines or medication for biodefense as soon as experts agree the vaccines and medications are safe and effective enough to place in the Strategic National Stockpile.

BIO COUNTERMEASURES - 3

2524

In FY 2007, Biodefense is planning on accomplishing the following goals:

- Continue to leverage efforts to remove barriers to development and vaccine production to facilitate biodefense vaccines and medications for acquisition for the Strategic National Stockpile.

PPA Mission Statement

Biodefense Countermeasures provides secure medical countermeasures to strengthen the Nation's preparedness against bioterrorism attacks, including promoting the removal of barriers to development and production processes and pre-purchasing critically needed vaccines or medication for biodefense. Funding for the program facilitates the development and production processes that the Government undergoes to pre-purchase critical vaccines or medication for biodefense upon subject matter expert approval of the vaccine placement into the Strategic National Stockpile.

A. Mission and Description of the Preparedness Directorate

Following the attacks of September 11, 2001, the President together with the Congress, began the process of the largest restructuring of the Federal government in half a century, creating the Department of Homeland Security (DHS). For more than two years, the men and women from 22 different Federal agencies have come together with one mission under this Department. As a unified team, we have done the important and often difficult work of strengthening the security of the United States. We have created mechanisms for sharing information across Federal, state, and local governments as well as the private sector, and worked to identify and secure the Nation's critical infrastructure.

In October 2005, after a systematic evaluation of the Department's operations, policies and structure, the DHS organization was realigned and the Preparedness Directorate was created. The establishment of the Preparedness Directorate intended "to enhance coordination of preparedness" and "increase overall preparedness, particularly for catastrophic events." All the Department's existing preparedness efforts – including planning, training, exercising, and funding – are now consolidated into a single Directorate led by the Under Secretary for Preparedness, George Foresman.

The Preparedness Directorate's primary responsibility is to build and sustain the preparedness of the United States to:

- Prevent terrorist attacks and minimize the impact of non-terrorist related events in the United States by increasing the Nation's level of preparedness,
- Reduce America's vulnerability to terrorism, and
- Enhance federal, state, and local response to terrorist attacks and other emergencies, both natural and manmade.

The Preparedness Directorate will become both the Department and U.S. Government's focal point for building our Nation's preparedness to defend and secure the United States of America from terrorist attack, and to respond to and recover from attacks, major disasters, and other emergencies. To accomplish this, the new Directorate will lead the preparedness efforts across the Department, coordinate preparedness efforts across the U.S. government, and partner with state and local governments, tribal organizations, the private sector, and the American people to ensure a Nation prepared.

The primary goals of the Preparedness Directorate are to:

1. Build, sustain, and improve the Nation's capability to prevent terrorist attacks in the United States.
2. Build, sustain, and improve the Nation's capability to protect against terrorist attacks in the United States and other catastrophic threats to the Nation's population and critical infrastructure.
3. Build, sustain, and improve the Nation's capability to respond to terrorist attacks, major disasters, and other emergencies, with an emphasis on catastrophic incidents.
4. Build, sustain, and improve the Nation's capability to recover from terrorist attacks, major disasters, and other emergencies, with an emphasis on catastrophic incidents.
5. Ensure development of national standards and measures of effectiveness for preparedness.

6. Promote and institutionalize mechanisms for information sharing and collaboration to enhance preparedness.
7. Foster an adaptive, risk-based approach to preparedness that maintains an all-hazard incident management foundation and focuses on preparedness enhancements for catastrophic threats to population and infrastructure, where appropriate.
8. Demonstrate stewardship of public resources by identifying opportunities for synergy between terrorism preparedness and non-terrorism preparedness.
9. Create, operate and promote a premier learning organization by providing professional development, education and other opportunities to ensure the highest caliber of staff working in a professional environment in support of the goals and objectives of the Department.
10. Streamline and speed delivery of preparedness activities and services.

The Preparedness Directorate including the Office of the Under Secretary is comprised of 1,028 full-time equivalent employees in FY 2007. These employees are critical to the Preparedness mission accomplishment providing preparedness leadership across the Department, coordinating preparedness across the U.S. Government, and partnering with state and local governments, tribal organizations, the private sector and the American public to ensure national preparation for terrorist attacks, natural disasters, and other emergencies.

The major organizational components of the Preparedness Directorate are the Office of the Under Secretary, Assistant Secretary for Infrastructure Protection, Assistant Secretary for Cyber Security and Telecommunications, Assistant Secretary for Grants and Training, U.S. Fire Administration, Chief Medical Officer and the Office of National Capital Region Coordination. The program offices for these components are spread across the Washington, DC metropolitan area and in Emmitsburg, MD.

B. Major Activities and Key Strategic Issues

The Preparedness Directorate will focus on strengthening the preparedness posture of the Nation and integrating preparedness planning among the Office of the Assistant Secretary for Infrastructure Protection and the Office of the Assistant Secretary for Cyber and Telecommunications, the Office of National Capital Region Coordination, the Office of the Assistant Secretary for Grants and Training, the Office of the Chief Medical Officer (CMO), Chemical Stockpile Emergency Preparedness Program, the Radiological Emergency Preparedness Program, the U.S. Fire Administration, and the Biodefense Countermeasures program. In FY 2006, the Preparedness Directorate is funded at \$4,041,132,000.

The major activities for the Preparedness Directorate in FY 2007, highlighted below, are presented in the structure of the performance based budget as reflected in the DHS Future Year Homeland Security Program (FYHSP) and include: *National Preparedness Leadership and Coordination, Infrastructure Protection, Cyber and Telecommunications, Grants Training and Exercise, Medical Coordination, and Fire Prevention Assistance.*

National Preparedness Integration and Coordination works to strengthen the Nation's capacity to prepare for and respond to natural or other disasters. This activity includes the *Office of the Under Secretary for Preparedness, the National Preparedness Integration Program, National Capitol Region Coordination, and the Evaluation and National Assessment Program.*

Office of the Under Secretary (OUS) for Preparedness received \$15,918,000 in FY 2006 and manages and administers the daily business of the Directorate, and enables mission integration and execution among the Preparedness Operations offices. It provides policy oversight, program review and evaluation, oversees disclosures of information and records management, and supports the Directorate's business affairs in the areas of budget, finance and acquisition, human capital, security, information technology, and facilities. The OUS activities include the *State and Local Government Coordination (SLGC) Office* which will continue to coordinate state, territorial, tribal and local government activities for the Department of Homeland Security and provide them with regular information, research, and technical support to assist their efforts in securing the homeland. Additionally, SLGC develops processes for receiving meaningful input from state, territorial, tribal and local governments to assist in the implementation of the national strategy for combating terrorism and other homeland security activities.

National Preparedness Integration Program (NPIP) is a new program in FY 2007. This program is a Directorate-wide effort to synchronize government, private sector, and citizen preparedness goals, plans and processes in advance of disaster – Americans will know who does what, when. This budget includes specific efforts to align Federal, state, and local command and control processes; improve catastrophic planning efforts for our most vulnerable citizens – children, the elderly, and those with special needs; enhance communication systems available in an emergency; harmonize medical coordination across all levels of government and provider systems; and encourage and implement innovative ideas and methods for preparedness.

National Capital Region Coordination (NCRC) received \$883,000 in FY 2006 and oversees and coordinates Federal programs for and relationships with state, local, and regional authorities in the National Capital Region.

Evaluation and National Assessment Program received \$14,157,000 in FY 2006 to gather, analyze and interpret National and program specific data. As the focal point for information collection and evaluation, this program reviews and assesses the execution of state strategies against the supporting threat, vulnerability, and needs assessment data. As data is evaluated, meaningful and timely feedback highlighting best practices can be identified for replication, and knowledge gaps can be addressed and mitigated. This information is then fed back out to states and jurisdictions by Grants and Training. This program will continue in FY 2007.

Infrastructure Protection (IP) serves the public by ensuring that the entities/people responsible for securing the Nation's critical infrastructure assets and key resources have the knowledge, skills, and equipment to accomplish their mission. The IP programs include *Critical Infrastructure Identification and Evaluation (CIIE)*, *National Infrastructure Simulation and Analysis Center (NISAC)*, *Critical Infrastructure Outreach and Partnerships (CIOP)*, *Radiological Emergency Preparedness Program (REPP)*, *Targeted Infrastructure Protection (TIP) Grants*, *Protective Actions (PA)*, and *Chemical Stockpile Emergency Preparedness (CSEPP)*.

Critical Infrastructure Identification and Evaluation (CIIE) received \$67,815,000 in FY 2006. CIIE carries out vulnerability assessments of critical infrastructure and key assets of the United States, and communicates standards to the infrastructure owners and key stakeholders. CIIE collects, verifies, and analyzes vulnerability and protective measure information on critical infrastructure and key assets from private sector owners and operators, public sector owners and operators, regulatory agencies within the Federal Government, and state and local governments so that protective measures can be prioritized.

National Infrastructure Simulation and Analysis Center (NISAC) received \$19,800,000 in FY 2006. These funds are used to provide a comprehensive modeling and simulation capability to perform an analysis of critical infrastructures, their interdependencies, complexities, and the consequences of disturbances. NISAC will continue to promote nationwide involvement in infrastructure-related modeling analysis by enabling contributions from a wide range of sources and will continue to support consequence mitigation strategy development by predicting the cascading effects of potential operational disruptions to U.S. infrastructure.

Critical Infrastructure Outreach and Partnerships (CIOP) received \$111,055,000 in FY 2006, including \$49,500,000 for the National Center for Critical Information Processing and Storage (NCCIPS). These funds are used to develop and maintain organizational structure, operational tools and defined processes to assure a continuous state of awareness and alert. CIOP will continue to manage the robust organizational framework supporting all stakeholders to facilitate the identification, prioritization, coordination, and protection of critical infrastructures/key resources. The program will also provide forums and networks to encourage sharing of information about threats, vulnerabilities, incidents, potential protective measures, and best practices that enhance response, mitigation and restoration activities.

Radiological Emergency Preparedness Program (REPP) FY 2006 budget authority is \$18,096,000 (-\$1,266,000 net of collections)¹. REPP assists state, local, and tribal governments in the development of offsite radiological emergency preparedness plans within the emergency planning zones of Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities. The REPP fund is financed from user fees assessed and collected from the NRC licensees to cover budgeted costs for radiological emergency planning, preparedness, and response activities in the subsequent year. REPP will continue to support the development of offsite radiological emergency preparedness plans for the emergency planning zones of NRC licensees of commercial nuclear power facilities.

Targeted Infrastructure Protection (TIP) Grants received \$386,100,000 in FY 2006 for various infrastructure protection efforts. The program is designed to enhance the security of the Nation's critical infrastructure, which represents a high priority for the Department. For FY07, funds provided through this program will directly enhance the ability of the owners and operators of key transit systems, ports, and other infrastructure assets to prevent and respond to large scale incidents. The program will continue to build on enhancements made in prior years by shifting to a discretionary approach for all program elements, allowing the Secretary greater flexibility to address vulnerability gaps.

Protective Actions (PA) received \$90,485,000 in FY 2006. These funds are used to assist Federal, state, local, tribal, and private sector organizations in devising protection strategies, programs, and best practices. Training is also provided to infrastructure owners and operators and the local law enforcement entities that help protect them. PA will continue to implement best practice activities to reduce the vulnerability of and coordinate the protection of critical infrastructure and key resources, which provide the essential services that underpin American society and must be protected.

¹ A proposed FY 2006 reprogramming action for the Radiological Emergency Preparedness Program is anticipated to be submitted to request an increase in the FY 2006 collection authority to meet anticipated FY 2007 budget expenditures.

Chemical Stockpile Emergency Preparedness (CSEPP) will enable Preparedness Operations to enhance existing local, tribal, and state capabilities to protect the health and safety of the public, workforce, and the environment from the effects of a chemical accident or incident involving the eight United States Army chemical stockpile sites. The funding for this program is provided through a reimbursable agreement with the Department of the Army.

Cyber Security and Telecommunications (C&T) The C&T programs include *Cyber Security (CS)* and *National Security/Emergency Preparedness Telecommunications (NS/EP Telecommunications)*. C&T works collaboratively with public, private, and international entities to secure cyberspace and U.S. cyber assets, reduce risk to the vulnerability of the Nation's telecommunications and information technology infrastructures, enable timely response and recovery under all circumstances, including crises or emergencies from natural disasters and terrorist activity, and coordinate the planning for and provision of national security and emergency preparedness for cyber security and communications for the Federal government.

Cyber Security (CS) received \$92,416,000 in FY2006 and will work to accomplish the following strategic goals: (1) establish a National Cyberspace Security Response System to prevent, detect, respond to, and reconstitute rapidly after cyber incidents; (2) work with public and private sectors to reduce vulnerabilities and minimize the severity of cyber attacks; (3) promote a comprehensive national awareness program to empower all Americans—businesses, the general workforce, and the general population to secure their own parts of cyberspace; (4) foster adequate training and education programs to support the Nation's cyber security needs; (5) coordinate with the intelligence and law enforcement communities to identify and reduce threats to cyber space; and (6) build a world-class organization that aggressively advances its cyber security mission and goals in partnership with its public and private stakeholders.

National Security/Emergency Preparedness Telecommunications (NS/EP Telecommunications) received \$141,206,000 in FY2006. These funds are used to provide mission-critical communications for Federal, state and local governments, and private industry through the following functions: (1) Administering the National Coordinating Center for Telecommunications to facilitate the initiation, coordination, restoration and reconstitution of NS/EP Telecommunications services or facilities under all circumstances; (2) Developing and ensuring the implementation of plans and programs that support telecommunications infrastructure hardness, redundancy, mobility, connectivity and security; and (3) Serving as the focal point for joint industry - Government and interagency NS/EP telecommunications planning and partnerships. NS/EP will continue to provide these mission-critical communications activities on an ongoing basis.

Grants, Training, and Exercise serves the public by equipping American first responders – firefighters, police officers, and emergency medical providers. Multiple Grants and Training programs provide agencies with grant resources to acquire equipment, training, or technical assistance to prepare them to prevent, deter, and respond to terrorist acts and natural disasters. These Programs include *State Preparedness Grants, Targeted Infrastructure and Capability Grants, National Exercise Program, State and Local Training Program, and the Technical Assistance Program.*

State Preparedness Grants Program received \$1,212,750,000 in FY 2006 and manages and oversees the implementation of three grant programs intended to provide a baseline level of security to state, local and territorial level jurisdictions. The first program in the portfolio is the State Homeland Security Grant Program. This program awards grants to all 50 states, the District of Columbia, Puerto Rico and 4 U.S. Territories and is based on risk and need. The second program, the Citizen Corps

Program, is the Department's grass-roots initiative to actively involve all citizens in hometown security through personal preparedness, training, and volunteer service. The third program is the Emergency Management and Performance Grants (EMPG) Program. The EMPG Program provides funds to support comprehensive emergency management at the state and local levels and encourages the improvement of mitigation, preparedness, response, and recovery capabilities for all hazards. These grant programs will be continued to provide security to state and local level jurisdictions.

Urban Area Security Initiative (UASI) Regional Grant Program received \$757,350,000 in FY 2006. These grants are awarded on the evaluation of both risk and need and provide a second layer of security to the nation's high risk urban areas. This grant program will be continued to strengthen the nation's urban areas and critical infrastructure.

National Exercise Program received \$51,480,000 in FY 2006 and oversees the Department's Federal, state and local exercise programs, which includes the Top Officials (TOPOFF) exercise series. It also remains responsible testing capacity at the state and local levels to effectively implement best practices and deploy response plans and assets efficiently and effectively. This program will incorporate lessons learned from TOPOFF 3 and will conduct the TOPOFF (4) program in FY 2007.

State and Local Training Program received \$207,900,000 in FY 2006 and manages the development of and approves training to prepare emergency responders for a WMD terrorism event. This program identifies training needs of state and local communities and prioritizes those needs in order to facilitate the identification of existing and new funding for course development. This program also consists of the Center for Domestic Preparedness, the only WMD training facility that provides hands-on training to civilian emergency responders in a toxic chemical agent environment, and the National Domestic Preparedness Consortium, who also play a major role in delivering training to America's first responders. The program will continue to manage training for emergency responders in FY 2007.

Technical Assistance Program received \$19,800,000 in FY 2006 and provides direct assistance to state and local jurisdictions to improve their ability to prevent, respond to, and recover from threats or acts of WMD terrorism. The primary objective of the TA program is to enhance the capacity of state and local jurisdictions as well as special needs jurisdictions such as port authorities and mass transit agencies to develop, plan, and implement effective strategies for WMD preparedness. This program will continue to provide assistance to state and local jurisdictions in FY 2007.

Medical Coordination includes the *Chief Medical Officer*, *Biosurveillance*, and the *Biodefense Countermeasures Program (BioShield)* and establishes the capability to rapidly identify and characterize threats, and plan for and deploy targeted defenses against bioterrorist attacks. The Biosurveillance data streams provide indications data for both disease surveillance and bioterrorism warnings. This program also strengthens the Nation's preparedness against bioterrorist attacks by pre-purchasing critically needed vaccines and other countermeasures for biodefense.

Chief Medical Officer received \$1,980,000 in FY 2006 and will ensure internal and external coordination of all medical preparedness activities of the Department. CMO Functions include: (1) Serve as the Secretary's principal advisor on medical issues, through the Under Secretary, and advise other Departmental elements on medical issues; (2) Serve as the Department's primary point of contact for external entities on medical preparedness issues; (3) Coordinate medical intelligence and surveillance activities of the Department; (4) Discharge the Department's responsibilities for Project BioShield; (5) Establish doctrine and priorities for the National Disaster Medical System (NDMS), consistent with National Incident Management System (NIMS) and the National Response Plan

(NRP), and ensure NDMS mission readiness; (5) Coordinate with other Department organizational elements on their medical preparedness activities to provide technical guidance and direction; such activities include, but are not limited to, Noble Training Center, National Biosurveillance Information System (NBIS), and the Metropolitan Medical Response System (MMRS) program. CMO will continue to coordinate medical preparedness activities for the Department in FY 2007.

Biosurveillance received \$13,959,000 in FY 2006. These funds are used to improve the Federal Government's capability to rapidly identify and characterize a potential bioterrorist attack by enhancing ongoing surveillance and analysis capabilities in areas such as human health, hospital preparedness, State and local preparedness, vaccine research and procurement, animal health, food and agricultural safety, and environmental monitoring. This interagency initiative promotes data sharing and joint analysis at the Federal, state, local, and tribal levels. The preparedness portion of this effort involves the integration of current and new efforts into a comprehensive system that provides a real-time operating picture. The program will operate the national Biosurveillance system to facilitate the shaping of current and proposed disease surveillance systems and guide research and development of technologies and capabilities.

Countermeasures Program (Bioshield) will continue to execute FY 2004 and FY 2005 appropriated funding in FY 2006. Bioshield provides secure medical countermeasures to strengthen the Nation's preparedness against bioterror attacks, including promoting the removal of barriers to development and production processes and pre-purchasing critically needed vaccines or medication for biodefense. Funding for the program facilitates the development and production processes that the Government undergoes to pre-purchase critical vaccines or medication for biodefense upon subject matter expert approval of the vaccine placement into the Strategic National Stockpile. Advanced appropriations made \$884,749,000 available in FY 2004, and \$2,507,776,000, was provided as an advanced appropriation available for obligation through FY 2013. The program will continue to secure medical countermeasures in FY 2007.

Fire and Emergency Assistance includes the *United States Fire Administration (USFA)* and *Assistance to Firefighter Grants*, to improve the effectiveness of firefighter and emergency responder capability. *The United States Fire Administration (USFA)* received \$44,499,000 in FY 2006 and will continue to reduce life and economic losses due to fire and related emergencies, through leadership, coordination, and support and also to prepare the Nation's first responder and emergency response managers and leaders through ongoing and, when necessary, expedited training regarding how to evaluate and minimize community risk, improve protection to critical infrastructure, and be better prepared to react to all hazard and terrorism emergencies of all kinds.

Assistance to Fire Fighter Grants received \$648,450,000 to award one-year grants directly to fire departments to support the Nation's firefighters to improve the effectiveness of firefighting operations throughout the United States. Through the Office of Grants and Training, the program will continue to provide Fire Fighter grants in FY 2007.

Strategic issues facing the Preparedness Directorate include:

1. Ensuring the development of coordinated, national standards and measures of effectiveness for preparedness.
 - a. Developing a preparedness baseline that measures the effectiveness of our planning for preventing, protecting against, and responding to terrorist acts or disasters.
 - b. Defining an optimal state of preparedness. This must include standards articulated with sufficient clarity to allow a preparedness posture based upon objective measures of risk and performance.
 - c. Monitoring and measuring the preparedness status of the Nation's diverse needs, risks, and abilities.
2. Allocating human and financial resources to meet the optimal state of preparedness. In order to address threats that pose risk of catastrophic consequences, develop new tools and enhance existing tools to prevent, respond, or recover from catastrophic scenarios.
3. Identifying opportunities for synergy between preparedness for terrorism and preparedness for other hazards.
4. Expanding and strengthening relationships within the Directorate, and beyond the Directorate, to ensure a complete, systemic exchange of information with all entities and governments that have responsibilities in national preparedness activities.
 - a. Publishing of open standards for preparedness.
 - b. Exercising preparedness, response, and recovery activities.
 - c. Ensuring strong linkages with operations, response, and recovery agencies.

C. Resources Requested and Performance Impact

In FY 2007, the Department is requesting \$3,419,989,000 for the Preparedness Directorate, a decrease of \$621,143,000 over the FY 2006 appropriation of \$4,041,132,000. The Preparedness Directorate plans to bolster its base staffing to 1050 positions, 1028 FTE (excluding reimbursables: 42 FTP and 42 FTE from CSEPP), in FY 2007, an increase of 62 FTE from a base of 966 FTE in FY 2006. Preparedness and the Department have identified critical enhancements to existing programs and prioritized new undertakings to accomplish its mission.

In FY 2007, Preparedness is requesting the following new initiatives and enhancements:

National Preparedness Integration Program:

\$50,000,000, 14 FTE, 28 positions

This is a new program in FY 2007 intended to address DHS priorities of 1) Augmenting the national level of preparedness and 2) Integrating the operational elements of the Department into an aligned and cohesive force to protect the homeland. This program will strengthen the preparedness posture of the nation by activities in the following areas: 1) catastrophic planning, 2) alignment of command and control functions, 3) emergency communications systems, 4) medical preparedness, and 5) identification, fostering and knowledge sharing of innovative planning, response, or coordination methods.

National Capital Region Coordination:*\$1,108,000, 1 FTE, 2 positions*

The funding request will allow the NCRC to continue to oversee and coordinate Federal programs for and relationships with state, local and regional authorities, private and non-profit sectors in the National Capital Region (NCR) and will specifically allow NCRC to focus on implementation and exercise of the NCR Homeland Security Strategic Plan.

Chief Medical Officer*\$3,000,000, 5 FTE, 10 positions*

This funding will enable the CMO to coordinate Department medical preparedness and response activities. The CMO will advise the Secretary and Deputy Secretary on medical issues, provide coordination and oversight on behalf of the Secretary for the Department's biodefense programs, advocate for public health issues to the DHS Secretary, and ensure a unified approach to medical preparedness and response among the U.S. health community. Additionally, the CMO will represent DHS, externally and internally, on medical issues.

Office of the Under Secretary*\$1,150,000, 1 FTE, 2 positions*

The additional personnel will support acquisition and the Department's objective of increasing the number of contracts that are released for full and open competition. The department requests \$1,000,000 to conduct an internal controls audit, which is an unfunded legal requirement. Public Law 108-330, The Department of Homeland Security Financial Accountability Act, directs the Department to perform an annual Performance and Accountability Report (PAR), and to provide by an audit opinion and the Secretary's assertion of the adequacy of internal controls that apply to financial reporting.

United States Fire Administration*\$1,500,000, 1 FTE, 2 positions*

The additional personnel will develop and upgrade course structures and materials to remain current with evolving technologies, techniques, and threats.

Critical Infrastructure Outreach and Partnerships*\$35,000,000, 0 FTE, 0 positions*

The request will increase funding for Critical Infrastructure Outreach and Partnerships by \$35,000,000. This amount includes \$30,000,000 for implementing Sector-Specific Plans in accordance with the National Infrastructure Protection Plan (NIPP) and a \$5,000,000 enhancement for NIPP program management. Program management support will be provided to Federal agencies for each of the 17 infrastructure sectors on final development and approval of sector-specific protection plans. The NIPP Program Management Office will also begin to oversee the implementation of sector-specific plans. The management office will also conduct annual and triennial reviews, and promote the NIPP to federal and non-federal stakeholders. Funding to implement sector-specific plans will enable DHS to address protection efforts across the country based on national-level priorities based on risk and need. Under the NIPP framework, DHS will focus infrastructure protection resources towards the areas of greatest need.

Chemical Site Security*\$10,000,000 0 FTE, 0 positions*

The increase will establish an office to oversee chemical site security. DHS will classify facilities into risk-based tiers, establish standards for each tier and ensure strong safeguards are in place to protect against the public disclosure of any sensitive information gathered by the Office.

Major Changes to Base:**Grants and Training: Targeted Infrastructure Protection***\$213,900,000, 0 FTE, 0 positions*

The request will increase the Targeted Infrastructure Protection program grants to total of \$600,000,000. The enhancement will augment Preparedness' ability to award risk and need based grants to enhance security of the Nations critical infrastructures such as key transit systems and port assets.

Grants and Training: State Homeland Security Grants*\$88,500,000, 0 FTE, 0 positions*

The request will increase the State Homeland Security Grant program to \$633,000,000. The enhancement will provide additional funding for flexible risk and need based grants to enhance state and local homeland security efforts.

Grants and Training: Citizen Corps*\$15,200,000, 0 FTE, 0 positions*

The request will increase the Citizen Corps Preparedness program to \$35 million, providing increased support for citizen preparedness activities at the state and local level.

Radiological Emergency Preparedness Program*Fee Funded², 40 FTE, 40 Positions*

Due to new terrorism-based initiatives and an increase in nuclear and radiological responsibilities, REPP requires 40 additional Headquarters and Regional FTE. The FTE increase will be covered in the user fees collected from the Nuclear Regulatory Commission licensees.

² A proposed FY 2006 reprogramming action for the Radiological Emergency Preparedness Program is anticipated to be submitted to request an increase in the FY 2006 collection authority to meet anticipated FY 2007 budget expenditures.

PART Results

The Preparedness Directorate continues to improve the integration of its performance planning and programs budgeting as depicted in OMB's Program Assessment Rating Tool (PART) Review to refine and develop focused, meaningful measures for Preparedness programs in order to demonstrate planned results. The development of clear long-term performance goals, measures and targets enables the Preparedness Directorate to track the successful accomplishment of its mission and realization of its vision by ensuring accurate and valuable data is disseminated to all stakeholders, including decision makers and state and other Homeland Security Partners in a timely manner.

Cyber Security and Telecommunications PARTed Programs**National Security/Emergency Preparedness (NS/EP) Telecommunications Program**
Moderately Effective

PART Findings:

- The National Communications Service is fulfilling its mission to ensure required telecommunications to respond to and recover from national disasters or incidents, including war. Call completion rates for the Government Emergency Telecommunications Service during national events such as 9/11, 2002 Winter Olympic Games in Salt Lake City, and the 2004 Florida Hurricanes exceeded 90%
- The Government Emergency Telecommunications Service has 100,000 users/subscribers and is available in all 50 states. This service allows government officials to place priority calls ahead of the general public during an incident.

The program is taking the following actions to improve performance:

- Working with program partners to improve accountability, cost-effectiveness, and performance.

Cyber Security Program
Results Not Demonstrated

PART Findings:

- The National Cyber Security Division has not established meaningful annual or long-term performance measures. For example, no baseline for performance has been set. This lack of information limits the ability of the program to evaluate itself.
- The National Cyber Security Division needs to ensure independent evaluations are regularly conducted. While internal periodic reviews have begun, regular external reviews should be implemented. The Division recognizes that reviews help ensure programs are aligned with its mission.

The program is taking the following actions to improve performance:

- Developing baselines and targets for performance measures.
- Establish external processes to evaluate effectiveness of cyber security programs.

Grants, Training and Exercise PARTed Programs**National Exercise Program (FY 2007)**

Effective

PART Findings:

- The National Exercise Program supports a robust, well-coordinated series of exercises at the national, state, and regional levels. The program is a key component of evaluating the performance of homeland security grant recipients. However, the exercise schedule and reporting requirements have not been fully aligned to allow for a robust assessment of many state and local capabilities.
- Implementation of standardized exercise procedures and reporting requirements have improved exercise quality. However, compliance with reporting requirements was less than 50% by exercise organizers in FY04 and FY05.
- The National Exercise Program has improved coordination with other Federal agencies participating in homeland security exercises. However, more progress can be made to improve coordination with other Federal agency exercises. As of August 2005, the Program had not submitted the National Exercise Plan that would address such coordination issues.

The program is taking the following actions to improve performance:

- Defining scope of National Exercise Program needed to support other Grants and Training performance measures.
- Increasing state and local compliance with exercise and evaluation doctrine and reporting requirements.
- Submitting the National Exercise Plan for interagency review and approval by the Homeland Security Council.

State and Local Training Program (FY 2007)

Adequate

PART Findings:

- The Program has developed training that addresses critical skills and abilities needed by state and local responders to prepare, prevent, and respond to a terrorist incident. It still lacks independent evaluations, or a methodology for comparing the performance of different training programs and providers.
- Coordination and consistency with other Federal preparedness training programs is limited. Little progress has been made on developing a broader interagency preparedness training framework required under Homeland Security Presidential Directive 8.
- Funding and available training slots are not well targeted. Funding for several major training centers is based on appropriation earmarks, not competition or effectiveness. Training slots are allocated by state population, not by risk of terrorist attacks.

The program is taking the following actions to improve performance:

- Standardizing assessments of homeland security knowledge, skills and abilities, and using this data to compare the impact of training among trainees, training providers, and programs.
- Completing development of the National Training Program required under Homeland Security Presidential Directive 8, in coordination with DHS components and Federal agency partners.

- Pursuing greater flexibility in allocation of grant funding to training partners, and certifying more state/local training providers.

Technical Assistance Program (FY 2007)

Adequate

PART Findings:

- The program provides a wide range of expertise to state and local grantees to assist in developing and implementing homeland security programs. However, in responding to shifting priorities, the program has until recently lacked clear long-term goals for improving grantees' planning and management capabilities.
- The program has broadened its range of services provided to keep pace with the range of capabilities eligible for DHS grant funding. Some of these services are similar to technical assistance services provided by other Federal agencies, and do not reflect a clear "core competency" of the Office of Grants and Training.
- The program's funding level is not transparent, with actual expenditures exceeding estimates in the President's Budget and Congressional appropriations. Relation of actual funding levels to goals and results is unclear.

The program is taking the following actions to improve performance:

- Implementing long-term performance measures focused on key outcomes, especially the improvement of grant management and homeland security planning.
- Clarifying the most critical state and local problems that the program intends to address.
- Developing an FY06 spending plan and FY07 request that more clearly identify program resources, with linkages to performance.

State Homeland Security Grants Program (FY 2006)

Results Not Demonstrated

PART Findings:

- At the national level, grants are allocated by formulas that do not incorporate risks, threats, or unmet capabilities. Allocation procedures at the state level vary, with some aligned to state homeland security strategies, and others based on per capita formulas.
- The programs has lacked performance measures that measure specific preparedness capabilities or aggregate state-level preparedness. The National Preparedness Goal under development by DHS will identify national priorities and target capabilities for incorporation into a national assessment system.
- The lack of consistent assessments for state and local homeland security capabilities has significantly hampered efforts to set priorities, target grant funding, and evaluate results.

The program is taking the following actions to improve performance:

- Restructure the grant allocation process, providing the Secretary with greater discretion to award funds based on risks, threats, and vulnerabilities.
- Accelerating implementation of performance measures based on National Preparedness Goals.
- Completing a detailed needs assessment of state and local capabilities to guide Federal, state and local funding allocations.

Assistance to Firefighters Grants Program (FY 2005)
Results Not Demonstrated

PART Findings:

- Grants funding is not targeted for jurisdictions with higher rates of fire deaths, injuries, or hazards; or to activities with the greatest impact on health and safety. Grants primarily supplement locally funded procurement efforts.
- Performance measures reflect the program's purpose, but data collection has been inconsistent. Performance targets are not ambitious, and do not account for the general decline in public fire deaths and injuries. Evaluations have focused on grant procedures, not results.
- In focusing on investments that have long been local funding responsibility, the Program has provided little support for fire departments' preparedness for terrorism and other catastrophic event. While such activities are eligible under statute, Congressional and administrative guidance have discouraged giving greater priority to national homeland security priorities.

The program is taking the following actions to improve performance:

- Increasing the maximum grant size for large cities to \$2 million, and administratively establish a minimum grant amount.
- Strengthen performance measures, and ensure that grantee reports incorporate such measures. Implement independent evaluations.
- Terrorism and mass-casualty preparedness needs will be among the competitive priorities. Future budgets will propose greater priority for homeland security capabilities.

D. How Preparedness Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

The following Preparedness programs are listed with their DHS performance goal:

National Preparedness Leadership and Coordination

National Capital Region Coordination

Coordinate activities of the Department to build, sustain, and improve NCR's capability to protect against terrorist attacks in the United States and other catastrophic threats to the Nation's population and critical infrastructure.

Protection 3.7 — Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Evaluation and National Assessment

Improve process and procedures by implementing recommendations of reviewing authorities (i.e. IG, OMB, GAO).

Protection 3.7 — Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

National Preparedness Integration Program

Synchronize and publicize government, private sector, and citizen preparedness goals, plans and processes in advance of disaster.

Protection 3.7 — Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Infrastructure Protection

Critical Infrastructure Identification and Evaluation

Identify Critical Infrastructure and Key Resources (CI/KR) and characterize and prioritize these assets based upon the application of appropriate assessment processes and methodologies, using need-specific assessment criteria, sector/segment-specific characterizations, and relevant potential threat information.

Awareness 1.2 — Identify and assess the vulnerability of critical infrastructure and key assets.

National Infrastructure Simulation and Analysis Center

Provide comprehensive infrastructure related modeling, simulation and analytic capabilities to support protective action planning and implementation decision processes.

Protection 3.2 — Reduce infrastructure vulnerability from acts of terrorism.

Radiological Emergency Preparedness Program

Provide preparedness programs by developing offsite radiological emergency preparedness plans within the emergency planning zones of Nuclear Regulatory Commission (NRC) licensees of commercial nuclear power facilities to effectively protect against disasters within the United States.

Protection 3.7 — Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Critical Infrastructure Outreach and Partnerships

Improve the protection of critical infrastructure by building strategic partnerships and two-way information sharing.

Protection 3.2 –Reduce infrastructure vulnerability from acts of terrorism.

Protective Actions

Build sustainable protective capacity by developing and facilitating the implementation of protection strategies, security best practices and protective programs that reduce the risk from current CI/KR.

Protection 3.2 –Reduce infrastructure vulnerability from acts of terrorism.

Targeted Infrastructure Protection Grants

Improve the protection of our Nation's ports and critical transportation systems (rail, mass transit, and intercity bus) from terrorism, especially explosives and non-conventional threats that would cause major disruption to commerce and significant loss of life, through the award of grant funds.

Protection 3.2 –Reduce infrastructure vulnerability from acts of terrorism.

Cyber Security and TelecommunicationsCyber Security

Prevent, detect and respond to Cyber Security events.

Protection 3.2 -- Reduce infrastructure vulnerability from acts of terrorism.

National Security/Emergency Preparedness Telecommunications

Ensure Government Emergency Telecommunications System (GETS) provides effective communication in all operational circumstances.

Protection 3.2 -- Reduce infrastructure vulnerability from acts of terrorism.

Grants, Training and ExerciseState Preparedness Grants

Enhances the capability of States, territories and local jurisdictions to prevent, protect against, respond to, and recover from all-hazard events through the provision of grants.

Protection 3.7 -- Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Urban Area Security Initiative (UASI) Grants

UASI enhances the capability of high risk urban areas to prevent, protect against, respond to, and recover from all-hazard events through the provision of grants.

Protection 3.7 –Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

State and Local Training

Enhance the capability of the Nation's first responders to prevent, protect against, respond to, and recover from all-hazard events by administering a comprehensive training program tailored to responder communities.

Protection 3.7 - Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

National Exercise Program

Improve the capability of the nation's first responders to prevent, respond to, and recover from acts of terrorism by periodically exercising together, thereby enhancing the nation's preparedness.

Protection 3.7 --Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Technical Assistance

Enhance state and urban area all-hazards homeland security strategies through the provision of information resources, stand-alone tools, and customized on-site assistance.

Protection 3.7 --Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Medical CoordinationOffice of the Chief Medical Officer (CMO)

Serve as the principal advisor to the Secretary for medical issues within the Department. Provide Department-wide coordination by building a network of all medical assets in the Department. CMO is responsible for the coordination of medical issues with other Federal government entities.

Protection 3.7 -- Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Biosurveillance

Function as the lead agency in the development and operation of the National Biosurveillance Integration System (NBIS) to detect biological and chemical attacks and coordinate the real-time integration of bio-surveillance data with threat information and recommended responses.

Protection 3.7 --Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies

Biodefense Countermeasures

Bioshield program pre-purchases critically needed vaccines and medications to place in the Strategic National Stockpile based on determination of material threat by the Secretary of Homeland Security and the Secretary of Health and Human Services.

Protection 3.7 --Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Fire Prevention AssistanceUnited States Fire Administration (USFA)

United States Fire Administration - reduce the effect of fire and all hazard emergencies through improving the delivery of state and local fire and emergency services.

Protection 3.7 Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

Assistance to Firefighters Grants Program

Enhance the health and safety of firefighting personnel and the public against fire-related hazards and improve the capability of firefighting personnel to prevent, protect against, respond to, and recover from fire-related disasters through funding and direct assistance.

Protection 3.7 --Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters and other emergencies.

E. Performance Based Budget Highlights by Program

For each FYHSP program, the performance goal, performance measure/s, budget including allocation of non-programmatic overhead and FTE are:

National Preparedness Integration and Coordination

Performance Goal: Strengthen the Nation's capacity to prepare for and respond to terrorism and natural disasters.

Measure: Percent of recommendations made by reviewing authorities (i.e., IG, OMB, GAO) that are implemented within 1 year.	Fiscal Year	FY2005	FY2006	FY2007
Target		N/A	90%	90%
Actual				
Program: National Preparedness Integration and Coordination	\$ Thousands	N/A	\$15,260	\$76,551
	FTE	N/A	32	47

Infrastructure Protection

Performance Goal: Protect the Nation's high risk and most valued critical infrastructure and key resources (CI/KR) by characterizing and prioritizing assets, modeling and planning protective actions, building partnerships, and issuing targeted infrastructure protection grants.

Measure: Percent of high-priority critical infrastructure for which a Buffer Zone Protection Plan (BZPP) has been implemented.	Fiscal Year	FY2005	FY2006	FY2007
Target		70%	28%	38%
Actual		18%		
Measure: Percent of identified high-priority critical infrastructure/key resources sites at which at least two suitable protective actions (PA) have been implemented.	Fiscal Year	FY2005	FY2006	FY2007
Target		N/A	10%	20%
Actual		N/A		
Measure: Percent of high-priority critical infrastructure/key resources (CI/KR) sites at which a vulnerability assessment (VA) has been conducted	Fiscal Year	FY2005	FY2006	FY2007
Target		10%	15%	25%
Actual		14%		
Measure: Percent of bus facility security enhancement projects completed per period	Fiscal Year	FY2005	FY2006	FY2007
Target		N/A	55%	55%
Actual		N/A		
Measure: Percent of bus vehicle security enhancement projects completed per period	Fiscal Year	FY2005	FY2006	FY2007
Target		N/A	55%	55%
Actual		N/A		
Measure: Percent of goals and objectives identified in Regional Transit Security Strategies addressed by grantee projects	Fiscal Year	FY2005	FY2006	FY2007
Target		N/A	53%	86%
Actual		N/A		
Measure: Percent of identified port-related vulnerabilities addressed per period	Fiscal Year	FY2005	FY2006	FY2007
Target		N/A	30%	30%
Actual		N/A		
Measure: Percent of identified target community trained in highway security domain awareness	Fiscal Year	FY2005	FY2006	FY2007
Target		N/A	65%	90%
Actual		N/A		
Measure: percentage of REP Program communities with a nuclear power plant that are fully capable of responding to an accident originating at the site.	Fiscal Year	FY2005	FY2006	FY2007
Target		N/A	100%	100%
Actual		N/A		
Program: Infrastructure Protection	\$ Thousands	N/A	\$730,808	\$878,505
	FTE	N/A	437	478

Note: Includes adjustment for other funding sources.

Cyber Security and Telecommunications

Performance Goal: Improve the security of America's cyber and emergency preparedness telecommunications assets by working collaboratively with public, private, and international entities				
Measure: Government Emergency Telecommunications (GETS) call completion rate during periods of network congestion.	Fiscal Year	FY2005	FY2006	FY2007
	Target	90% (Baseline estimate)	90%	90%
	Actual	95.5%		
PART Measure: Number of Government Emergency Telecommunications (GETS) cards issued.	Fiscal Year	FY2005	FY2006	FY2007
	Target	103,000	109,000	115,000
	Actual	110,540		
PART Measure: Number of WPS authorized users.	Fiscal Year	FY2005	FY2006	FY2007
	Target	13,000	15,000	17,000
	Actual	23,079		
PART Measure: Number of Cyber Security work products disseminated.	Fiscal Year	FY2005	FY2006	FY2007
	Target	50	55	60
	Actual	466		
PART Measure: Length of time to notify (as applicable) the Government Forum for Incident Response and Security Teams (GFIRST) and/or law enforcement officials within two hours of verifying a Category 1 or a Category 2 cyber security event.	Fiscal Year	FY2005	FY2006	FY2007
	Target	120 minutes	115 minutes	110 minutes
	Actual			
Measure: Percent of targeted stakeholders who participate in or obtain cyber security products and services.	Fiscal Year	FY2005	FY2006	FY2007
	Target	N/A	50%	55%
	Actual	N/A		
Program: Cyber Security & Telecommunications	\$ Thousands	N/A	\$266,314	\$272,980
	FTE	N/A	153	152

Grants, Training and Exercise

Performance Goal: Enhance the Nation's preparedness by increasing the capability of states, territories, and local jurisdictions to prevent, protect against, respond to, and recover from terrorism and all-hazard events through the provision of grants, first responder training, technical assistance, and exercises.				
Measure: Percent of state and local homeland security agency grant recipients reporting measurable progress towards identified goals and objectives to prevent and respond to terrorist attacks.	Fiscal Year	FY2005	FY2006	FY2007
	Target	50%	90%	100%
	Actual	35%		
Measure: Percent progress toward implementation of state homeland security strategies	Fiscal Year	FY2005	FY2006	FY2007
	Target	N/A	75%	80%
	Actual	N/A		
PART Measure: Average satisfaction rating by exercise participants.	Fiscal Year	FY2005	FY2006	FY2007
	Target	4.1	4.2	4.2
	Actual	4.1		
PART Measure: Percent of jurisdictions demonstrating acceptable performance on applicable critical tasks in exercises using Grants and Training approved scenarios	Fiscal Year	FY2005	FY2006	FY2007
	Target	23%	60%	64%
	Actual	40%		
PART Measure: Percentage of action items identified in After-Action Reports (AAR) that were implemented.	Fiscal Year	FY2005	FY2006	FY2007
	Target	41%	65%	68%
	Actual	7%		
PART Measure: Average percentage increase in	Fiscal Year	FY2005	FY2006	FY2007

Weapons of Mass Destruction (WMD) and other knowledge skills, and abilities of state and local homeland security preparedness professionals receiving training from pre and post assessments.	Target	37%	38%	38%
	Actual	38.5%		
PART Measure: Average satisfaction with Technical Assistance (TA) services provided to State and local jurisdictions.	Fiscal Year	FY2005	FY2006	FY2007
	Target	86%	90%	92%
	Actual	96%		
PART Measure: Percentage of homeland security strategies that are compliant with DHS planning requirements at the submission date.	Fiscal Year	FY2005	FY2006	FY2007
	Target	N/A	50%	84%
	Actual	-		
Measure: Percent of participating urban area grant recipients reporting measurable progress made towards identified goals and objectives to prevent and respond to terrorist attacks	Fiscal Year	FY2005	FY2006	FY2007
	Target	50%	90%	100%
	Actual	8%		
Measure: Percent progress toward implementation of urban area homeland security strategies observed by preparedness officers.	Fiscal Year	FY2005	FY2006	FY2007
	Target	N/A	75%	80%
	Actual	-		
Program: Grants, Training & Exercise	\$ Thousands	-	\$2,316,906	\$1,835,367
	FTE	-	169	169

Medical Coordination

Performance Goal: Ensure a coordinated and unified approach to represent medical readiness among the United States health community by providing data-driven, scientifically based policy and advice to advocate public health needs.

Measure: Percent of partner agencies providing timely bio-surveillance information to the National Biosurveillance Integration System (NBIS).	Fiscal Year	FY2005	FY2006	FY2007
	Target	N/A	15%	20%
	Actual	-		
Measure: The number of agencies participating in the Integrated Medical Readiness Network (IMRN).	Fiscal Year	FY2005	FY2006	FY2007
	Target	N/A	4	7
	Actual	-		
Program: Medical Coordination	\$ Thousands	N/A	\$17,901	\$15,045
	FTE	N/A	20	25

Fire Prevention Assistance

Performance Goal: Maximize the health and safety of the public and firefighting personnel against fire and fire-related hazards by providing assistance to fire departments and by training the Nation's fire responders and health care personnel to prevent, protect against, respond to, and recover from fire-related events

Measure: Percent of jurisdictions demonstrating acceptable performance on applicable critical tasks relevant to the fire service in exercises using Grants and Training approved scenarios.	Fiscal Year	FY2005	FY2006	FY2007
	Target	23%	60%	64%
	Actual	42%		
Measure: Ratio of on-scene firefighter injuries to the total number of firefighters.	Fiscal Year	FY2005	FY2006	FY2007
	Target	N/A	3.4%	3.4%
	Actual	-		
Measure: Civilian Deaths from Fire (Percent reduction in the rate of loss of life from fire-related events.)	Fiscal Year	FY2005	FY2006	FY2007
	Target	N/A	3,380	3,380
	Actual	-		
Program: Fire Prevention Assistance	\$ Thousands	N/A	\$693,943	\$341,541
	FTE	N/A	156	157

Excludes: Change
 If the FY 2007 Budget request reflects a total of 245 FTE in FY 2006 which is an increase of 11 FTE over the 234 FTE reflected in the President's Budget Request.
 *USDA - The President's budget request reflects a total of 245 FTE in FY 2006 which is an increase of 11 FTE over the 234 FTE reflected in the President's Budget Request.
 *OIGEA - Due to an adjustment on FY 2007 FTE used in President's Budget Request as different than the FY 2007 FTE total reported.

iii. Status of Congressionally Requested Studies and Reports

**Department of Homeland Security
Departmental Management and Operations
Status of Congressionally Requested Studies, Reports, and Evaluations**

Under Secretary for Management

1. Senate Report 109-83 - Contract Staffing--The Committee notes that the Department has not yet submitted its report on contract staffing, as required by the statement of managers accompanying the conference report on the Department of Homeland Security Appropriations Act, 2005 (Public Law 108-334). The Committee still expects to receive this report. In addition the Department is directed to submit an updated report containing the number of contract staff occupying positions budgeted to be filled by Federal employees during fiscal year 2005 and projected for fiscal year 2006. The Committee expects the Department to make progress in replacing contract staff personnel with Federal employees. Accordingly, the Department is to include in its report a plan for accomplishing this objective.
 - a. **STATUS – On Target for 20 Jan 06 submission**

2. Conference Report 109-241/ Senate Report 109-83 - Procurement Officers--The Committee directs the Chief Procurement Officer to submit a report to the Committees on Appropriations by February 10, 2006, that provides the number of procurement officers in the Department, including the number for each organization, for fiscal years 2004 and 2005 and proposed for fiscal year 2006, and provide an assessment of the adequacy of the number and training of those personnel.
 - a. **STATUS - On Target for 20 Jan 06 submission**

3. House Report 109-79 -- Quarterly DHS Management Integration -- In March 2005, the Government Accountability Office (GAO) reported that, while DHS has made some progress in its management integration efforts, it should implement a more comprehensive and sustained approach. GAO recommended that the Under Secretary for Management: (1) develop an overarching management integration strategy for the Department, (2) designate the Business Transformation Office (BTO) as the dedicated implementation team for the Department's management integration, and (3) provide the BTO with the requisite authority and responsibility to help set priorities and make strategic decisions to drive the integration across all functions. The Under Secretary for Management is directed: (1) to report to the House Committee on Appropriations, no later than August 1, 2005, on whether BTO has sufficient authority to serve as a dedicated implementation team to help set priorities and make strategic decisions to drive integration across all functions, and (2) to report quarterly, beginning on January 1, 2006, on the progress of DHS management integration.
 - a. **STATUS – On Target for 20 Jan 06 submission**

4. Conference Report 109-79 – Shared Services -- Problems and confusion over the administration of shared services between Immigration and Customs Enforcement (ICE), Customs and Border Protection (CBP), and Citizen and Immigration Services (CIS) continue to plague the Department. The problem stems from the difficulty in adjusting to changes in these agencies' previous structure and systems found in the Immigration and Naturalization Service (INS) and Customs Service, and lack of guidance during the transition into the new structure. Field managers lack information about how shared services are handled. The Committee directs the Secretary to submit a report not later than January 16, 2006, on how shared services are defined, what policies are in place to guide managers on how to administer those services, and what mechanism is in place to resolve interagency disputes.
 - a. **STATUS - On Target for 20 Jan 06 submission**

Office of the Chief Information Officer

1. Senate Appropriations Conference Report 109-241 (Title I, page 2 and 39) requires an *Expenditure Plan for its Information Technology Projects*. The expenditure plan should include each specific project funded, key milestones, all funding sources for each project, details of annual and lifecycle costs, and projected cost savings or cost avoidance to be achieved by the project for information technology services, security activities, and wireless programs. The plan needed to be submitted to the Committees on Appropriations of the Senate and the House of Representatives, not more than 60 days from the date of enactment of this Act. The required plan is currently in clearance.
2. House Report 109-79 (Title I, page 18) requires a *Geospatial* report to the Appropriations Committee. The report is to document the CIO's efforts to develop a complete and accurate Global Geospatial Intelligence, Geographic Information System (GGI/GIS) border mapping inventory of critical U.S. infrastructure and assets through its Department-wide enterprise GIS (E-GIS) system. This report on Geospatial Information Management is targeted to be produced by the requested date of February 10, 2006.
3. Conference Report 109-241 (Title I, page 18) requires an *IT System Inventory* report by February 10, 2006. The report is to include an update of the information technology system inventory dated September 15, 2005; the status and timeline of security certifications for each system; the status of aligning each system with an appropriate investment portfolio; and the status of identifying the systems and/or applications that will migrate to the National Center for Critical Information Processing and Storage during fiscal year 2006. This IT System Inventory report is targeted to be produced by the requested date of February 10, 2006.
4. House Appropriations Report 109-79 (Title 1, p. 18) requires an *Information Security plan* by October 1, 2005, to address the weaknesses in DHS' information security. The Inspector General is directed to review the CIO's plan and report back to the Committee on the thoroughness of the CIO's plan. The report was developed and delivered by October 1, 2005 and the DHS Inspector General provided its assessment of the report at the beginning of December 2005.

5. Conference Report 109-241, House Report 109-79, and House Bill HR 2360 EH (Title I, p. 3 & 39, Title I, p. 17, and Title I, p. 4) require a report on *Enterprise Architecture Strategic Planning*. The report is due to the Committees on Appropriations of the Senate and the House of Representatives, not more than 180 days from the date of enactment of this Act, following approval by the Office of Management and Budget and review by the Government Accountability Office. The report is to include (1) an enterprise architecture, (2) an Information Technology Human Capital Plan, to include an inventory of current IT work force knowledge and skills, a gap analysis of any shortfalls, and a plan for addressing any shortfalls; (3) a capital investment plan for implementing the enterprise architecture, and (4) a description of the information technology capital planning and investment control process. Is targeted to be produced by the requested date of April 16, 2006.

6. Conference Report 109-241 and Senate Report 109-83 ("Title III, p. 71 and Title IV, p. 84) requires a *National Center for Critical Information Processing and Storage (NCCIPS) report* to the Appropriations Committees. The report, due no later than February 10, 2006, is to detail the progress of further developing NCCIPS. The OCIO is assisting the Preparedness directorate on this report and the report is targeted to be produced by the requested date of February 10, 2006.

Office of the Chief Financial Officer

1. Conference Report 108-774 directs OCFO to submit a monthly budget execution report to Congress. FY 2005 June Report – target submission to Congress is January 15, 2006
2. Conference Report 108-774 directs OCFO to submit a monthly budget execution report to Congress. FY 2005 September Report – target submission to Congress is February 15, 2006

Office of the Secretary and Executive Management

1. House Appropriations Report 108-169 (Title II, p 22) Detention and Removal Policies and Procedures. In process of getting final signature at DHS.
2. Appropriations Conference Report 108-774 (Title I, p 30) Data Mining, Office of Privacy. Report is being finalized.
3. Appropriations Conference Report 109-359 DOD Appropriations Act, DHS Supplemental (p 501) Policy Office Program Plan. Report submitted for OMB clearance.
4. Appropriations Conference Report 109-241 (Title I, p 33) Transportation Security. Report is being finalized.
5. Appropriations Conference Report 109-241 (Title I, p 2 & 33) Immigration Enforcement Strategy/Internal Transport of Illegal Aliens. Report is being written.
6. Appropriations Conference Report 109-241 (Title IV, SEC 538, p 26 & 86) REAL ID Act Grant Implementation Plan. Report in progress.
7. Senate Report 109-83 (Title I, p 11) Base Realignment and Closure. Report in process.

--

OFFICE OF THE SECRETARY AND EXECUTIVE MANAGEMENT

I. Appropriation Overview

A. Mission Statement for Appropriation Name:

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) provides leadership, direction, and management to the Department. It supports the Department and all of its components to prevent and deter terrorist attacks, protect against and respond to threats and hazards to our nation, ensure safe and secure borders, welcome lawful immigrants and visitors, and promote the free-flow of commerce. OSEM establishes and implements policy, obtains resources, and provides oversight to all entities within the Department. It is the responsibility of OSEM to deliver quality customer support services while eliminating redundancies and reducing support costs. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

The OSEM is a separate appropriation within Departmental Operations and Management, providing funds and FTE resources for 12 separate offices that individually report to the Secretary. A summary of these offices is briefly described below.

B. Budget Activities:

Immediate Office of the Secretary: The Office of the Secretary provides central leadership, management, and direction, and oversight for all the Department's components. It is the Secretary's role to serve as the top representative of DHS to the President, Congress, and the general public.

Immediate Office of the Deputy Secretary: The Office of the Deputy Secretary directly supports the Office of the Secretary in providing leadership to the Department. This office focuses on internal management and direction, ensuring the Department operates efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to provide internal oversight to all Departmental Operations, to allow the Secretary to focus more on external matters concerning DHS.

Chief of Staff: The Chief of Staff promotes the coordination of the Department agencies, directorates and offices. The Chief of Staff's Office is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities for the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new Department, reorganization, consolidation, and several new offices, the Chief of Staff's Office seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

OSEM - 1

Office of Policy: The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning which will ensure consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and it strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and resource priorities. A central DHS policy office that bridges multiple headquarters' components and operating agencies will improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. It will also create a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

Executive Secretary: The mission of the Office of the Executive Secretary is to establish effective and proficient protocol in the processing of all internal communication, decision management, briefings, liaison activity between the Department and its components, and external correspondence for the Immediate Office of the Secretary and all directorates. The department-wide scope of this office facilitates achievement of the Department's goals by developing channels of internal communication and of correspondence to be implemented by all offices and by establishing policies for the approval and dissemination of internal and external communication.

Office of Public Affairs: The Office of Public Affairs oversees and manages all external and internal communications at the Departmental level. This office responds to national media inquires, maintains and updates the Department's web site, writes speeches for principals, and coordinates speaking events for Department officials across the country. The Office of Public Affairs also develops and manages various public education programs.

Office of Legislative and Intergovernmental Affairs: The Office of Legislative and Intergovernmental Affairs serves as the Secretary's principal liaison with Capitol Hill and other governmental entities. The office fosters working relationships with Members of Congress and staff to engender legislative support for the DHS programs, policies and initiatives that will secure America.

Office of General Counsel: The Office of General Counsel is responsible for all legal activities within the Department to ensure full implementation of the Department's statutory responsibilities and all policies set forth by the Administration, the Secretary, and all officials of the Department. The Office of General Counsel provides legal counsel for all DHS offices (except those specifically excluded by regulation or directive), determines the Department's position in order to provide effective legal services dealing with claims, protests, litigation, and alternative dispute resolution, and represents the Department in all legal forums.

Office of Civil Rights and Civil Liberties: The mission of the Office of Civil Rights and Civil Liberties is to protect civil rights and civil liberties, provide policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. It is the responsibility of this office to review and to assess information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and by officials of the Department. The Office of Civil Rights and Civil Liberties also has responsibility for overseeing the Department's equal employment opportunity program, bringing all civil rights-related issues under the jurisdiction of one office.

Citizenship and Immigration Services Ombudsman: The mission of the Citizenship and Immigration Services (CIS) Ombudsman is to assist individuals and employers in resolving problems with citizenship and immigration services. This office provides oversight of the US Citizenship and Immigration Services (USCIS) and, to the extent possible, proposes changes in administrative practices to mitigate problems. It is the role of the CIS Ombudsman to review complaints to help enhance customer service and improve the efficiency of USCIS operations. Thus, the Ombudsman will identify major systemic obstacles to efficient processing of immigration benefits and services and provide USCIS with recommendations as to the means for resolving and/or mitigating these obstacles.

Privacy Officer: The Privacy Officer protects the collection, use, and disclosure of personal and Departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of the Department, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens. The Privacy Office has oversight of all privacy policy matters, including compliance with the Privacy Act of 1974, the Freedom of Information Act, and the completion of privacy impact assessments on all new programs, as required by the E-Government Act of 2002 and Section 222 of the Homeland Security Act.

Office of Counternarcotics Enforcement: The Office of Counternarcotics Enforcement coordinates DHS policy within the Department, other Federal departments and agencies, and State and local agencies with respect to stopping the entry of illegal drugs into the United States. It ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department better fulfill its responsibility to stop the entry of illegal drugs into the United States. The office is also a representative of the Department on all task forces, committees, or other entities whose purpose is to coordinate the counternarcotics enforcement activities of the Department and other Federal, State or local agencies.

C. Budget Request Summary:

The OSEM requests a total of 451 FTE and \$97,508,000 in FY 2007. This represents an increase of 35 FTE and a decrease of (\$28,390,000) from the FY 2006 enacted. The FY 2007 request includes \$4,625,000 for annualizations and technical adjustments, as well as pay and non-pay inflationary adjustments, \$21,000 for transfers, \$14,247,000 for program enhancements and a decrease of (\$47,283,000) due to the non-recurring Pandemic Flu Supplemental P.L. 109-148.

Total Change 2006-2007	527

The Office of the Secretary and Executive Management requests \$1.1 million for this activity. This is an increase of \$527,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Deputy Secretary supports the Office of the Secretary in providing leadership to the Department. This office focuses on internal management and direction, ensuring the Department operates efficiently and effectively in carrying out its mission. It is the Deputy Secretary's role to

provide internal oversight to all Departmental Operations, to allow the Secretary to focus more on external matters concerning the DHS.

PPA: CHIEF OF STAFF

	Perm Pos	FTE	Amount
2005 Actual	25	15	\$3,915
2006 Enacted	12	12	2,221

Total Change 2006-2007	680

The Office of the Secretary and Executive Management requests \$2.9 million for this activity. This is an increase of \$680,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Chief of Staff's Office is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities for the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new Department, reorganization, consolidation, and several new offices, the Chief of Staff's Office seeks to streamline, coordinate, and deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

PPA: OFFICE OF POLICY

	Perm Pos	FTE	Amount

Total Change 2006-2007	25	15	10,587

The Office of the Secretary and Executive Management requests \$8 million for this activity. This is an increase of \$10.5 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning which will ensure consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple

components of the homeland security network and it strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges multiple headquarters' components and operating agencies will improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. It will also create a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

PPA: EXECUTIVE SECRETARY

Total Change 2006-2007	911

The Office of the Secretary and Executive Management requests \$5 million for this activity. This is an increase of \$911,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of the Executive Secretary has established effective and proficient protocol in the processing of all internal communication, decision management, briefings, liaison activity between the Department and its components, and external correspondence for the Immediate Office of the Secretary and all directorates. The department-wide scope of this office facilitates achievement of the Department's goals by developing channels of internal communication and of correspondence to be implemented by all offices and by establishing policies for the approval and dissemination of internal and external communication.

The Office of the Secretary and Executive Management requests \$2.9 million for this activity. This is an increase of \$1 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Counternarcotics Enforcement coordinates policy within DHS and between the Department and other Federal departments and agencies, and between the Department and State and local agencies with respect to stopping the entry of illegal drugs into the United States. It ensures the adequacy of resources within the Department and recommends the appropriate financial and personnel resources necessary to help the Department better fulfill its responsibility to stop the entry of illegal drugs into the United States.

IV. Program Justification of Changes

**Department of Homeland Security
Component Name (CN)
Appropriation Name
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Senior Leadership Travel Initiative

Strategic Goal(s) & Objective(s): Continually improve our way of doing business.

PPA: Immediate Offices of the Secretary, Deputy Secretary and Chief of Staff

Program Increase: Positions 0 FTE 0 Dollars \$1,794

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	807
Program Increase							0	0	1,794
Total Request	0	0	\$1,574	0	0	807	0	0	\$2,601

Description of Item

Office of the Secretary requests an increase of \$694,000, the Office of the Deputy Secretary requests an increase of \$500,000, and the Chief of Staff requests an increase of \$600,000 to its non-personnel budget to support the travel needs of the Department's Senior Leaders.

Justification

The responsibilities of the Secretary of Homeland Security, like those of the Secretaries of State, Defense, the Attorney General, and the Directors of the CIA and the FBI, are such that he requires secure communications capability with the White House, the Department of Homeland Security, and other agencies. In addition, in an emergency, he must be able to return to Washington, or to proceed to other destinations, on an expedited basis. Moreover, the Secretary has a heightened need for security because his official duties and public visibility substantially increases the likelihood of threats to his personal safety. As a result, the President has determined that, like travel by the Secretaries of State and Defense, the Attorney General, and the Directors of the CIA and FBI, travel by the Secretary of Homeland Security constitutes "required use travel".

The designation of "required use travel" by the Secretary requires the Secretary to use Government aircraft instead of commercial transportation. As a result, the Secretary must use air transportation provided by the U.S. Coast Guard (USCG), Federal Aviation Agency (FAA) or the U.S. Air Force (USAF), which is significantly more expensive than commercial transportation. Depending on the aircraft, the cost ranges from \$790 to \$8,936 per flight hour. Below is chart with the current rates per flight hour by the various aircraft provided by USCG, FAA and USAF:

Agency	Aircraft	Cost Per Hour
USCG	C-37 (G-V)	\$8,936
USCG	HU-25 (Falcon)	\$5,744
USCG Operating Lease	G-200	\$7,400
FAA	G-IV	\$2,590
FAA	CE560 XL	\$790
USAF	C-37 (G-V)	\$4,332
USAF	C-20 (G-IV)	\$4,249

It is important to note that the charges for each flight are based on the cost per flight hour for the aircraft used. For example, a five hour flight on USCG's G-V aircraft would cost \$44,680.

Impact on Performance (Relationship of Increase to Strategic Goals)

This request will enhance performance by allowing the Secretary to continually improve our way of doing business and impact the Strategic Goal of Organizational Excellence.

Program Increase 2: Secure Border Initiative (SBI)

Strategic Goal(s) & Objective(s): Continually improve our way of doing business.
PPA: Office of Policy

Program Increase: Positions 4 FTE 2 Dollars \$4,000

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request

Current Services Level							0	0	0
Program Increase							10	6	4,000
Total Request	0	0	\$0	0	0	\$4,000	10	6	\$4,000

Description of Item

Office of Policy requests an increase of \$4 million to support the DHS components participating in the Secure Border Initiative (SBI).

Justification

The SBI needs four professional senior policy analysts, a legal analyst and one program support person to manage the program requirements of SBI. Subject-matter and legal experts are needed to implement an integrated systems approach to border security and to provide analysis of matters related to detention and removal, visas, worksite enforcement, budget and financial matters, Congressional inquiries, technology implementation, and interior enforcement issues. A full compliment of professional analysts will enable the Secretary and DHS officials to receive timely and accurate information regarding complex subject matters of priority to President and the Secretary. The first year cost for the 10 professional analysts is \$1.2 million. Furthermore, additional support is needed to deepen the policy expertise in administering the Congressional and administrative requirements; develop an interior enforcement strategy; conduct and analyze field data; and to map strategies to

integrate DHS-wide border security functions into a unified structure. The funding required for this support is \$2.8 million.

Impact on Performance (Relationship of Increase to Strategic Goals)

This request will enhance performance by allowing the Office of Policy to support this critical DHS initiative.

Program Increase 3: Weapons of Mass Destruction, Preparedness and Disaster Response Initiative

Strategic Goal(s) & Objective(s): Continually improve our way of doing business.
PPA: Office of Policy

Program Increase: Positions 4 FTE 2 Dollars \$1,000

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase							4	2	1,000
Total Request	0	0	\$0	21	21	\$4,160	25	22	\$5,160

Description of Item

Office of Policy requests an increase of \$1 million to support a professional staff with expertise in weapons of mass destruction immigration reform and disaster preparedness.

Justification

The Policy Directorate will hire professional staff with expertise in weapons of mass destruction (WMD), immigration reform, preparedness and disaster response. These analysts will effectively guide and coordinate the policies, planning, and international issues that meet the strategic goals and priorities of the Department. Specifically, policy staff with expertise in biological threats, nuclear weapons threats, intelligence policy, preparedness, and/or immigration policy is critical in developing comprehensive border security. The first year cost for the four positions is \$488,000 and \$512,000 will be used to support the creation of this new staff.

Impact on Performance (Relationship of Increase to Strategic Goals)

This request will enhance performance by allowing the Office of Policy to Departments initiatives and to continually improve our way of doing business by enhancing the expertise need to develop Departmental policy enhancing the ability for DHS to respond to disasters and threats of mass destruction.

Program Increase 4: Office of Policy Staffing Initiative

Strategic Goal(s) & Objective(s): Continually improve our way of doing business.

PPA: Office of PolicyProgram Increase: Positions 11 FTE 7 Dollars \$3,053Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							6	6	1,498
Program Increase							11	7	3,053
Total Request	5	5	\$1,287	6	6	\$1,498	17	13	\$4,551

Description of Item

Office of the Secretary requests an increase of \$3.053 million to fund critical staffing requirements for the Committee on Foreign Investments in the United States, International Affairs and the Homeland Security Advisory Counsel.

Justification

Presently the Committee on Foreign Owned Investments (CFIUS) does not have permanent staff. This initiative request \$1.053 million in funding with 5 positions and 3 FTE to create a dedicated office to assess the vulnerability and risk of specific CFIUS cases and allows the committee to become fully operational. Creating this new office will require expert assistance and therefore a request for contract support is included. Creating a permanent staff will allow CFIUS to increase compliance monitoring tasks to improve its early warning program and perform vulnerability baseline assessments. The funding needed to support the first year costs for 5 positions is \$610,000 and additional contract support needed to setup the permanent staff is \$443,000.

The primary mission of the Office of International Affairs (OIA) is to promote DHS' goals and objectives, while coordinating the activities of the DHS activities outside the United States. International Affairs requests \$1.669 million to fund four positions to create an international attaché program, a Director of European and Multicultural Affairs position and an international training and technical assistance program. The Attachés will serve Mexico and Canada as direct representatives of the Secretary on-site to promote the vision and objectives of U.S. homeland security. This initiative contributes to building the staffing structure needed to effectively execute the DHS international mission which includes the OIA's statutory as well as expected responsibilities. The funding needed to support the first year costs of 4 positions is \$908,000. In addition to the position funding, OIA is requesting an increase of \$824,000 in support to setup the attaché program, to initiate the international training program and to provide second year costs for European Union position funded in the Office of the Secretary and Executive Management FY 2006 appropriation.

The mission of the Homeland Security Advisory Counsel (HSAC) is critical to each Homeland Security Presidential Directive (HSPD). Our Council and Committees serve as the external stakeholder group that recommends policy toward HSPD implementation efforts. This body serves the Department and the Secretary by providing critical recommendations to the development of policy related to - and implementation of - various HSPDs. The members are critical in providing support for

Presidential Directives amongst external stakeholders. HSAC needs \$221,000 to cover first year cost for 2 positions.

Impact on Performance (Relationship of Increase to Strategic Goals)

This request will enhance the performance of the Office of Policy and to continually improve our way of doing business by increasing resources needed to expand offices which play a critical role in Departmental policy development and impact the Strategic Goal of Organizational Excellence.

Program Increase 5: Office of General Counsel Staffing Initiative

Strategic Goal(s) & Objective(s): Continually improve our way of doing business.
PPA: Office of the General Counsel

Program Increase: Positions 17 FTE 11 Dollars \$2,612

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request

Program Increase							17	11	2,612
Total Request	19	19	\$3,366	19	19	\$3,510	36	30	\$6,207

Description of Item

The Office of the General Counsel (OGC) requests an increase of \$2.6 million in order to better meet the legal advisory needs of the Department. The requested 17 positions and 11 FTE will help alleviate the current understaffing in the General Counsel's Office.

Justification

OGC requests 17 positions and \$2.6 million dollars to cover the first year costs to hire attorneys.

- 2 attorneys to draft legal opinions of the Department and provide written opinions and oral advice in response to requests from the Secretary and other senior executives of the Department as well as other agencies and components within the Department.
- 4 attorneys to provide legal support for issues arising from or relating to MaxHR and for providing legal support on all other DHS labor and employment law policy and litigation.
- 2 attorneys to assist the Department in meeting its statutory reporting obligations and provide timely responses to Congressional requests. OGC needs resources to manage a centralized system for ensuring that the Department's legal obligations to the Congress are being addressed, including delivering testimony, responding to questions for the record, issuing reports to Congress, offering views on proposed legislation, and responding to Congressional correspondence.

- 4 attorneys to establish appropriate legal support the Office of Procurement Operations and its approximately \$2 billion per year in contracts. Providing superficial legal support will subject the department to avoidable waste, thereby depriving scarce homeland security funds from their best and highest use.
- 1 attorney to provide more tailored and widely available ethics training for Department personnel through the development of ethics training materials and courses for use throughout DHS, including use of interactive computer training vehicles such as the Bureau of Public Debt's Ethicsburg system, and maintaining a robust Departmental ethics web presence to effectively assist employees in learning about and complying with the Standards of Conduct.
- 2 attorneys to provide timely advice and counsel on all areas of intellectual property (science and technology) affecting the development and use systems being used or supported by DHS and the transfer of federally owned technology.
- 1 attorney to support the National Communications Division (NCD), a part of Information Analysis Directorate. The NCD was transferred from DoD to DHS by the Homeland Security Act of 2002. However, legal and other support continued to be provided by DoD under an interagency service support agreement while the NCD remained on a DOD compound in northern Virginia. The NCD is now moving from the DOD installation to DHS space.
- 1 attorney to further the accomplishment of the Department's mission by improving the quality and content of catastrophic response planning decisions and help ensure the effectiveness of emergency response providers to terrorist attacks, major disasters, and other emergencies.

Impact on Performance (Relationship of Increase to Strategic Goals)

This OGC request will enhance performance and improve our way of doing business by alleviating the current understaffing in critical areas that impact the Strategic Goal of Organizational Excellence.

Program Increase 6: Executive Secretary Office Expansion

Strategic Goal(s) & Objective(s): Continually improve our way of doing business.

PPA: Executive Secretary

Program Increase: Positions 4 FTE 2 Dollars \$788

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							35	35	4,213
Program Increase							4	2	788
Total Request	35	35	\$3,500	35	35	\$4,090	0	0	\$5,001

Description of Item

This request is to fund the Office of the Executive Secretary in its mission of supporting the Office of the Secretary by providing effective and proficient policy and guidance in the processing of all internal communication, decision management, inter agency liaison and external correspondence for the Immediate Office of the Secretary and all directorates.

Justification

This initiative facilitates achievement of the Department's goals by establishing protocol and procedures to be implemented by all offices. The increase in funding will be used to cover the first year cost of four positions totaling \$488,000 as well as an increase of \$300,000 to meet training, equipment and contract needs to support the executive correspondence process. Appropriate funding will allow the Office of the Executive Secretary to be fully staffed with the equipment and training necessary to have highly skilled and professional staff members able to fully support the Office of the Secretary.

Impact on Performance (Relationship of Increase to Strategic Goals)

This requested increase will directly impact the performance of the office and directly support the strategic goal of continually improving the way of doing business by providing the level of positions and funding needed to adequately support the communications needs of the Secretary and executive management of the Department.

Program Increase 7: Office of Counter Narcotics Enforcement Program Expansion

Strategic Goal(s) & Objective(s): Continually improve our way of doing business.
PPA: Office of Counter Narcotics Enforcement

Program Increase: Positions 4 FTE 2 Dollars \$1,000

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Program Increase							4	2	1,000
Total Request	11	11	\$1,860	11	11	\$1,841	15	13	\$2,878

Description of Item

Office of Counternarcotics Enforcement (OCNE) requests an increase of \$1 million to fully staff the office and provide equipment and training necessary to have highly skilled and professional staff members able to fully support the DHS counternarcotics efforts.

Justification

The OCNE needs additional staff expertise to provide the Secretary with the information he needs to make national level policy decisions on how the US will effectively counter the international drug threat. This increase will provide funding to fully staff the office, meet travel requirements and increase communications capabilities. OCNE will use \$439,000 to fund 4 positions and the remaining \$561,000 to fund communications, and special IT services supporting OCNE and equipment.

Impact on Performance (Relationship of Increase to Strategic Goals)

This OCNE request will enhance performance and continually improve our way of doing business and impact the Strategic Goal of Organizational Excellence by increasing the Department's ability to counter the international drug threat.

PPA Mission Statement

The Chief of Staff promotes the coordination of the agencies and directorates that have been consolidated into the Department of Homeland Security. The Chief of Staff's Office is responsible for all operational functions that relate to the Immediate Office of the Secretary (budget, information technology, and personnel), and coordinates activities with the Department Headquarters continuity of operations. With the inherent challenges of a concurrent creation of a new Department, reorganization, consolidation, and several new offices, the Chief of Staff's Office seeks to streamline, to coordinate, and to deliver highly effective initiatives and policies that will ensure our safety, response capacity, and our freedoms.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007

PPA Mission Statement

Strengthen homeland security by developing and integrating Department-wide policies, planning, and programs in order to better coordinate the Department's prevention, protection, response and recovery missions.

The Office of Policy is the primary coordinator of Department-wide policies, programs, and planning which will ensure consistency and integration of missions throughout the entire Department. It provides the Department with a central office to develop and communicate policies across multiple components of the homeland security network and it strengthens the Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges multiple headquarters' components and operating agencies will improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. It will also create a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

The Policy Directorate brings together the Office of International Affairs, Homeland Security Advisory Council, Office of Private Sector Liaison, Office of Immigration Statistics, and expands the Border and Transportation Security Policy Office to include all aspects of the department. It also creates a Strategic Planning Office.

Summary Justification and Explanation of Changes

PPA Mission Statement

The mission of the Office of the Executive Secretary is to establish effective and proficient protocol in the processing of all internal communication, decision management, briefings, liaison activity between the Department and its components, and external correspondence for the Immediate Office of the Secretary and all directorates.

The Office of the Executive Secretary will use its FY 2006 allocated resources to ensure the prompt and proper coordination of information and documents to and from the Department's Principals, directorates, overseas posts and other government agencies. Funding will be used to support the Executive Secretary's External Correspondence Office, which is responsible for reviewing, tracking and responding to all correspondence received within the Office of the Secretary.

PPA Mission Statement

The Assistant Secretary for Public Affairs oversees all external and internal communications for Homeland Security. On a daily basis, Public Affairs responds to national media inquiries, maintains and updates the department's web site, and coordinates speaking events for department officials across the country. The Office of Public Affairs also develops and manages various public education programs. The Office of Public Liaison, within Public Affairs, fosters strategic communication with the department's external stakeholders. The department's organizational identity, including the Homeland Security seal and wordmark, was designed and implemented by the Office of Public Affairs. Public Affairs directs the department's Incident Communications program that guides overall federal incident communication activity and coordinates with state, local and international partners to ensure accurate and timely information to the public during a crisis.

FY 2006 base funding will be used to continue ongoing FY 2005 OPA activities. OPA will continue to aggressively communicate the department's operational and policy successes to the American public, accomplished through such efforts as creating an Office of Public Liaison to reach various communities, as well as an Office of Speechwriting established to serve the Secretary and Deputy Secretary and ensure that all remarks echo and reinforce homeland security policies and issues.

PPA Mission Statement

The Office of Legislative Affairs is responsible for the development and advancement of the Department's legislative agenda. This includes the establishment and maintenance of constructive congressional relations, the development of Departmental protocols for interaction with Congress and contributing to the formulation of and communication of the Department's strategic message.

Specifically, OLA coordinates and develops material for congressional hearings to include creating briefing books and editing written testimony. OLA assists with witness preparation of oral testimony, including coordinating and scheduling policy and subject-focused pre-briefing prior to a hearing date. They also coordinate and manage legislative briefings in advance of a hearing. The briefings provide the policy landscape, possible questions and answers, information on other witnesses, and other last minute insights. Additionally, OLA staff coordinates and tracks deliverables which result from hearings, including questions for the record. Further, OLA is responsible for all congressional mail sent to the DHS. This involves recording and tracking correspondence, assigning due dates, ensuring letters are answered in a timely manner and proofing and editing all correspondence for the Assistant Secretary's signature.

OLA interacts with each directorate to monitor and manage the volume of correspondence to facilitate and expedite responses on high profile topics when needed. The Department of Homeland Security has an Enterprise Correspondence Tracking (ECT) System in place to assist with providing a consistent and timely response to these requests for information. This computer-based system will streamline the correspondence process and gain insight into topics where consistent answers are critical. OLA will be heavily involved in this initiative to better track and respond to requests for information. Funding also supports OLA's preparation of departmental witnesses to appear before Congressional Hearings. With over 80 Congressional committees and subcommittees claiming jurisdiction over some portion of the DHS, the volume of Congressional hearings has been extremely high since the creation of the DHS. Numerous positions in the DHS also require Senate confirmation, which includes additional paperwork, pre- and post-hearings questions, staff level interviews, and a hearing before at least one Committee of jurisdiction.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Salaries and Benefits	\$2,978,114	\$5,368,000	\$5,558,180	\$190,180

Salaries and Benefits include costs for 51 FTEs. The FY 2007 request includes an increase of \$190,180 for the proposed January 2007 increase in personnel compensation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$115,398	\$148,000	\$152,440	\$4,440

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$4,440 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Printing	\$1,535	\$5,000	\$5,150	\$150

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes increases of \$150 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$281,825	\$175,000	\$180,250	\$5,250

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes increases of \$5,250 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Other Services	\$18,455	\$18,000	\$18,540	\$540

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes increases of \$540 in non-pay inflation.

2615

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$570,750	\$473,000	\$487,190	\$14,190

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes increases of \$14,190 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Supplies & materials	\$85,175	\$55,900	\$57,577	\$1,677

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2007 request includes increases of \$1,677 in non-pay inflation.

	2005	2006	2007	2006 - 2007

PPA Mission Statement

The mission of the Office of Civil Rights and Civil Liberties is to protect civil rights and civil liberties, to support the DHS by providing policy advice on the full range of civil rights and civil liberties issues, and to serve as an information and communication channel with the public regarding all aspects of these issues. Section 705 of the Homeland Security Act provides that the Officer for Civil Rights and Civil Liberties shall:

Review and assess information alleging abuses of civil rights, civil liberties, and racial and ethnic profiling by employees and officials of the Department; and make public through the Internet, radio, television, or newspaper advertisements information on the responsibility and functions of, and how to contact, the Officer.

Submit to the President of the Senate, the Speaker of the House of Representatives, and the appropriate committees and subcommittees of Congress through the Secretary on an annual basis a report on the implementation of this section, including the use of funds appropriated to carry out this section, and detailing any allegations of abuses described under subsection (a)(1) and any actions taken by the Department in response to such allegations.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Salaries and Benefits	\$2,591,422	\$4,587,000	\$5,726,675	\$1,139,675

Salaries and Benefits include costs for 39 FTEs. The FY 2007 request includes an increase of \$139,675 for the proposed January 2007 increase in personnel compensation and a shift of \$1,000,000 from Advisory and Assistance Services to annualize the 10 additional FTE appropriated in FY 2006 and to fund first year costs of the 5 FTE requested in FY 2007. Civil Rights and Civil Liberties did not request additional funds to cover the cost of the additional 15 FTE.

PPA Mission Statement

The mission of the Citizenship and Immigration Services (CIS) Ombudsman is to assist individuals and employers in resolving problems with United States Citizenship and Immigration Services (USCIS). Section 452 of the Homeland Security Act of 2002 requires that the Ombudsman assist individuals and employers in resolving problems with the Bureau of Citizenship and Immigration Services (CIS), identify areas in which individuals and employers have problems in dealing with CIS, and to the extent possible, propose changes in the administrative practices of the CIS to mitigate problems.

The Ombudsman's goals include: (1) The reduction of backlogs for immigration benefits, as these backlogs are both the source of numerous opportunities for fraud and resulting threats to national security, as well as a frustration to the immigration customer. (2) The enhancement of customer services to promote the flow of commerce, increase economic activity and promote family unity, while reducing complaints. (3) The streamlining of the immigration process to improve efficiencies, so that CIS resources can be effectively utilized.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$1,354,480	\$2,545,000	\$4,184,627	\$1,639,627

Salaries and Benefits include costs for 24 FTEs. The FY 2007 request includes an increase of \$68,715 for the proposed January 2007 increase in personnel compensation and a base adjustment of \$1,570,912 to fully annualize salary and

benefits costs associated with 24 FTE appropriated in fiscal year 2005.

PPA Mission Statement

The Department of Homeland Security's Privacy Office protects the collection, use, and disclosure of personal and departmental information. The Privacy Office ensures that appropriate access to information is consistent with the vision, mission, and core values of the DHS, and implements the policies of the Department to defend and to protect the individual rights, liberties, and information interests of our citizens.

Through internal educational outreach and the establishment of internal clearance procedures and milestones for program development, the Privacy Office is helping the DHS components to consider privacy whenever developing new programs or revising existing ones. The Privacy Office is evaluating the use of new technologies to ensure that privacy protections are given primary consideration in the development and implementation of these new systems. In this process, the DHS professionals have become educated about the need to consider—and the framework for considering—the privacy impact of their technology decisions.

The Chief Privacy Officer and the staff review Privacy Act systems notices before they are sent forward and ensure that they collect only those records that are necessary to support the DHS mission. The Privacy Office also guides the DHS agencies in developing appropriate privacy policies for their programs and serves as a resource for any questions that may arise concerning privacy, information collection or disclosure. The Privacy Office of course works closely with various Department policy teams, the Office of the General Counsel, and the Chief Information Officers to ensure that the mission of the Privacy Officer

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Salaries and Benefits	\$1,091,770	\$1,855,000	\$1,910,650	\$55,650

Salaries and Benefits include costs for 16 FTEs. The FY 2007 request includes an increase of \$55,650 for the proposed January 2007 increase in personnel compensation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$122,289	\$154,000	\$156,618	\$2,618

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$2,618 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Transportation of Things	\$13,007	\$22,000	\$22,374	\$374

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes increases of \$374 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
GSA rent	\$33,243	\$30,500	\$31,019	\$518

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes increases of \$518 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Printing	\$22,072	\$26,000	\$26,442	\$442

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes increases of \$442 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$11,649	\$22,500	\$22,883	\$382

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes increases of \$382 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Other Services	\$2,202,518	\$1,870,000	\$1,901,946	\$31,946

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes increases of \$31,946 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$217,307	\$243,000	\$247,131	\$4,131

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes increases of \$4,131 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Supplies & materials	\$63,786	\$64,000	\$65,088	\$1,088

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2007 request includes increases of \$1,088 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Equipment	\$49,881	\$50,000	\$50,850	\$850

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$850 in non-pay inflation.

A. Mission and Description of the Office of the Secretary and Executive Management

The Department of Homeland Security (DHS) Office of the Secretary and Executive Management (OSEM) supports the Department and all of its components to prevent and deter terrorist attacks, protect against and respond to threats and hazards to our nation, ensure safe and secure borders, welcome lawful immigrants and visitors, and promote the free-flow of commerce. OSEM establishes and implements policy, obtains resources, and provides oversight to all entities within the Department to meet these missions. It is the responsibility of the OSEM to deliver quality customer support services while eliminating redundancies and reducing support costs. The Department continues to work toward integration and consolidation of its resources and operations to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

B. Major Activities and Key Strategic Issues

OSEM provides resources for 12 separate offices that individually report to the Secretary. These offices include the Immediate Office of the Secretary, the Office of the Deputy Secretary, the Office of the Chief of Staff (including the Office of Counternarcotics Enforcement), the Office of Policy, Planning and International Affairs, the Office of the Executive Secretariat, the Office of Public Affairs, the Office of Legislative and Intergovernmental Affairs, the Office of General Counsel, the Office of Civil Rights and Civil Liberties, the Office of the Citizenship and Immigration Ombudsman, and the Privacy Office.

Key Strategic Issues

DHS Second Stage Review

Secretary Chertoff initiated a comprehensive Second Stage Review of the Department's organization, operations and policies to ensure that every element of the Department is mission-focused and best organized to meet potential threats to our nation. This review was conducted with several core principles in mind:

- DHS must base its work on priorities that are driven by risk.
- The Department must drive improvement with a sense of urgency.
- Our enemy constantly changes and adapts, so we as a Department must be nimble and decisive.
- DHS must be an effective steward of public resources.
- DHS work must be guided by the understanding that effective security is built upon a network of systems that span all levels of government and the private sector.

On July 13, 2005 DHS announced a major reorganization that reflects the findings of the Second Stage Review and the OSEM has led and will continue to lead the drive to implement the findings. This implementation is a key strategic issue in FY 2006 and will continue to be a prominent strategic issue in FY 2007.

Office of Policy

OSEM created the Office of Policy in FY 2006. The Office of Policy will be the primary coordinator of Department-wide policies, programs, and planning which will promote consistency and integration of missions throughout the Department. It provides the Department with a central office to develop and communicate policies across multiple components and it strengthens the

Department's ability to maintain policy and operational readiness needed to protect the homeland. It also provides the foundation and direction for Department-wide strategic planning and budget priorities. A central DHS policy office that bridges multiple headquarters' components and operating agencies will improve communication among DHS entities, eliminate duplication of effort, and translate policies into timely action. It will also create a single point of contact for internal and external stakeholders that will allow for streamlined policy management across the Department.

C. Resources Requested and Performance Impact

The DHS OSEM is requesting a total of 475 positions, 451 FTE, and \$97,508,000 for FY 2007, a net increase of 59 positions, 35 FTE, and \$18,893,000 over the FY 2006 revised enacted level. In FY 2006 OSEM received a revised enacted appropriation of 416 positions, 416 FTE, and \$78,615,000. In addition, OSEM received \$47,283,000 from the pandemic flu supplemental in the DOD Appropriations Bill P.L. 109-148. Non-recurring the \$47,283,000 supplemental in FY 2007 results in a decrease of \$28,390,000 in total changes between FY 2006 and FY 2007.

FY 2005 Accomplishments: Secretary Chertoff initiated and the Department completed a comprehensive Second Stage Review of the Department's organization, operations and policies to ensure that every element of the Department is mission-focused and best organized to meet potential threats to our nation.

FY 2006 Planned Accomplishments: OSEM created the Office of Policy in FY 2006. OSEM plans to have the Office of Policy execute coordination of Department-wide policies, programs, and planning which will promote consistency and integration of missions throughout the Department. Additionally, OSEM will lead implementation of the findings of the Second Stage Review.

FY 2007 Projected Accomplishments: OSEM will continue to provide critical Department-wide leadership, direction, and management on a wide range of homeland security related issues, including coordination with other Federal partners, state and local governments, industry, academia, and non-profit organizations.

Immediate Office of the Secretary, Immediate Office of the Deputy Secretary and Chief of Staff
Office of the Secretary requests an increase of \$694,000, the Office of the Deputy Secretary requests an increase of \$500,000, and the Chief of Staff requests an increase of \$600,000 to its non-personnel budget to support the travel needs of the Department's Senior Leaders.

This request will enhance performance by allowing DHS Leadership to continually improve our way of doing business by enhancing their ability to conduct official duties and substantially improve public visibility and decrease the likelihood of threats to their personal safety. This increase will impact the Strategic Goal of Organizational Excellence by making official transportation available to those who lead the Department.

Secure Border Initiative (SBI)

Office of Policy requests an increase 10 positions and \$4 million to support the DHS components participating in the Secure Border Initiative (SBI).

The SBI needs subject-matter and legal experts to implement an integrated systems approach to border security and to provide analysis of matters related to detention and removal, visas, worksite

enforcement, budget and financial matters, Congressional inquiries, technology implementation, and interior enforcement issues. A full compliment of professional analysts will enable the Secretary and DHS officials to receive timely and accurate information regarding complex subject matters of priority to the President and the Secretary.

This request will enhance performance by allowing the Office of Policy to support the DHS Secure Border Initiative and achieve the Strategic Goal of Organizational Excellence.

Weapons of Mass Destruction, Preparedness and Disaster Response Initiative

The Policy Directorate will use \$1 million to hire professional staff with expertise in weapons of mass destruction (WMD), immigration reform, preparedness and disaster response. These analysts will effectively guide and coordinate the policies, planning, and international issues that meet the strategic goals and priorities of the Department. Specifically, policy staff with expertise in biological threats, nuclear weapons threats, intelligence policy, preparedness, and/or immigration policy is critical in developing comprehensive border security. The first year cost for the 4 positions is \$488,000 and \$512,000 will be used to support the new staff.

This request will enhance performance by allowing the Office of Policy to support the Department's initiatives and to continually improve our way of doing business by enhancing the expertise needed to develop Departmental policy enhance the ability for DHS to respond to disasters and threats of mass destruction.

Office of Policy Staffing Initiative

Presently the Committee on Foreign Owned Investments (CFIUS) does not have permanent staff. This initiative request \$1.053 million in funding to create a dedicated office to assess the vulnerability and risk of specific CFIUS cases and allows the committee to become fully operational. Creating this new office will require expert assistance and therefore a request for contract support is included. Creating a permanent staff will allow CFIUS to increase compliance monitoring tasks to improve its early warning program and perform vulnerability baseline assessments. The funding needed to support the first year costs for 5 positions is \$610,000 and additional contract support needed to setup the permanent staff is \$443,000.

The primary mission of the Office of International Affairs (OIA) is to promote DHS' goals and objectives, while coordinating the activities of the DHS activities outside the United States. International Affairs requests \$1.669 million to create an international attaché program, a Director of European and Multicultural Affairs position and an international training and technical assistance program. The Attachés will serve Mexico and Canada as direct representatives of the Secretary on-site to promote the vision and objectives of DHS. This initiative contributes to building the staffing structure needed to effectively execute the DHS international mission which includes the OIA's statutory as well as expected responsibilities. The funding needed to support the first year costs of 4 positions is \$908,000. In addition to the position funding, OIA is requesting an increase of \$824,000 in support to setup the attaché program, to initiate the international training program and to provide second year costs for the European Union position funded in the Office of the Secretary and Executive Management FY 2006 appropriation.

The mission of the Homeland Security Advisory Counsel (HSAC) is critical to each Homeland Security Presidential Directive (HSPD). Our Council and Committees serve as the external stakeholder group that recommends policy toward HSPD implementation efforts. This body serves the Department and the Secretary by providing critical recommendations to the development of

policy related to - and implementation of - various HSPDs. The members are critical in providing support for Presidential Directives amongst external stakeholders. HSAC needs \$221,000 to cover first year cost for 2 positions.

This request will enhance the performance of the Office of Policy by providing the personnel and expertise needed to continually improve the way the Office of Policy is doing business. By increasing resources needed to expand offices which play a critical role in Departmental policy development and impact the Strategic Goal of Organizational Excellence.

Office of General Counsel Staffing Initiative

The Office of the General Counsel (OGC) requests an increase of \$2.6 million in order to better meet the legal advisory needs of the Department. The requested 17 positions and 11 FTE will help alleviate the current understaffing in the General Counsel's Office.

- 2 attorneys to draft legal opinions of the Department and provide written opinions and oral advice in response to requests from the Secretary and other senior executives of the Department as well as other agencies and components within the Department.
- 4 attorneys to provide legal support for issues arising from or relating to MaxHR and for providing legal support on all other DHS labor and employment law policy and litigation.
- 2 attorneys to assist the Department in meeting its statutory reporting obligations and provide timely responses to Congressional requests.
- 4 attorneys to establish appropriate legal support to Office of Procurement Operations and its approximately \$2 billion per year in contracts
- 1 attorney to provide more tailored and widely available ethics training for Department personnel through the development of ethics training materials and courses for use throughout DHS.
- 2 attorneys to provide timely advice and counsel on all areas of intellectual property (science and technology) affecting the development and use of systems being used or supported by DHS and the transfer of federally owned technology.
- 1 attorney to support the National Communications Division, a part of Information Analysis Directorate
- 1 attorney to further the accomplishment of the Department's mission by improving the quality and content of catastrophic response planning decisions and help ensure the effectiveness of emergency response providers to terrorist attacks, major disasters, and other emergencies.

This OGC request will enhance performance and improve our way of doing business by alleviating the current understaffing in critical areas that impact the Strategic Goal of Organizational Excellence.

Executive Secretary Office Expansion

OSEM - 4

This initiative facilitates achievement of the Department's goals by establishing protocol and procedures to be implemented by all offices. The increase in funding will be used to cover the first year cost of four positions totaling \$488,000 as well as an increase of \$300,000 to meet training, equipment and contract needs to support the executive correspondence process. Appropriate funding will allow the Office of the Executive Secretary to be fully staffed with the equipment and training necessary to have highly skilled and professional staff members able to fully support the Office of the Secretary.

This requested increase will directly impact the performance of the office and directly support the strategic goal of continually improving the way of doing business by providing the level of positions and funding needed to adequately support the communications needs of the Secretary and executive management of the Department.

Office of Counter Narcotics Enforcement Program Expansion

The OCNE need additional staff expertise to provide the Secretary with the information he needs to make national level policy decisions on how the US will effectively counter the international drug threat. This increase will provide funding to fully staff the office, meet travel requirements, and increase communications capabilities. OCNE will use \$439,000 to fund 4 positions and the remaining \$561,000 to fund communications, and special IT services supporting OCNE and equipment.

This OCNE request will enhance performance and continually improve our way of doing business and impact the Strategic Goal of Organizational Excellence by increasing the Department's ability to counter the international drug threat.

D. How Component Name Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

Office of the Secretary and Executive Management: Provide comprehensive leadership, management, oversight, and support to improve the efficiency and effectiveness of the Department.

7.3 Continually improve our way of doing business.

E. Performance Based Budget Highlights by Program

The OSEM FYHSP performance goal, performance measure, budget, and FTE are:

Performance Goal: Provide comprehensive leadership, management, oversight, and support to improve the efficiency and effectiveness of the Department.					
Measure: Percent of the DHS strategic objectives with programs that meet their associated quarterly performance targets.	Fiscal Year	FY2004	FY2005	FY2006	FY2007
	Target	32%	44%	90%	95%
	Actual	32%	84.9%		
Program: Office of the Secretary and Executive Management	\$ Thousands	\$80,317	82,700	\$125,898	\$97,508
	FTE	359	319	416	451

BUDGET REQUEST AND SUPPORTING INFORMATION**UNDER SECRETARY FOR MANAGEMENT****I. Appropriation Overview****A. Mission Statement for Under Secretary of Management**

The Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department of Homeland Security to lead the unified national effort to secure America.

The DHS Management Directorate provides the business framework that enables the Department of Homeland Security to achieve its mission. It does so by providing policy, guidance, operational oversight and support, and innovate solutions for the management needs of the entire Department.

B. Budget Activities:**Immediate Office of Under Secretary of Management (OUSM)**

The Immediate Office of the Under Secretary for Management's primary mission is to deliver quality administrative support services providing leadership and oversight for all departmental management functions which include information technology, budget and financial management, procurement and acquisition, human capital, and administrative services.

Business Transformation Office (BTO)

The Business Transformation Office (BTO) serves as the dedicated resource for providing guidance, evaluation, and facilitation for the functional integration of the Department's management process. The BTO provides program management standards to help the Under Secretary for Management (USM) track functional Lines of Business major initiatives and identify, monitor and report on the interdependencies between them. The BTO helps the USM in setting priorities and developing targeted goals to drive service improvement and integration across all functions. The BTO also evaluates the performance of USM functions by providing operational support services in a shared environment and managing the Tri-Bureau Shared Services Operations Board.

Office of the Administration (CAO)

Administrative Services includes all functional areas managed by the DHS Chief Administrative Services Officer (CAO) and OE Senior Administrative Services Officers. Administrative Services functional areas include asset management (logistics, real estate, personal property, aviation, transportation, fleet, marine vessels), mail screening and delivery, occupational safety and health,

environmental planning and management, historic preservation, energy management, records, directives, forms, library services, printing and graphics..

DHS Headquarters Project

To streamline departmental administrative functions and create a unified Department of Homeland Security, we will continue to find, design, renovate, improve, and secure a minimum number of DHS Headquarters facilities. Continued relocation of as much of the Department Headquarters as possible in collocated space will enable better communication and more efficient operations.

Office of Human Capital (CHCO)

The Office of Human Capital provides overall management and administration for the Department's human capital. This office establishes policy and procedures as well as provides oversight, guidance, and leadership for human resources functions within the Department of Homeland Security. CHCO is responsible for designing and implementing the new DHS human resources management system (called "Max^{HR}"), including the human resources strategy and technology components necessary for its successful deployment.

Office of Human Capital – Max^{HR}: The CHCO organization is responsible for creating, implementing, and operating DHS' new human resources system (Max^{HR}) and through it ensuring that organizational goals and individual work performance are linked, and that employees are compensated based on their contributions to agency performance.

Office of the Chief Procurement Officer:

The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of department-wide acquisitions, strategic sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. The office is responsible for developing DHS acquisition regulations and policies; strategic acquisition workforce planning to ensure accession, development, and retention of a professional workforce; and oversight and performance management of the DHS acquisition infrastructure. In addition to the acquisition policy development, this office is responsible for the developing DHS grant management regulations and policies; workforce planning to ensure accession, development, and retention of a professional workforce; and oversight and performance management of the DHS grant processing and grant management infrastructure.

Office of Security

The Office of Security is responsible for the security of all of the Department of Homeland Security's employees, facilities, information, and operations. The DHS Office of Security focuses on: coordinating and managing department-wide security functions at the Department level; developing new security initiatives, policies and procedures; and applying best security practices and policies at the component level to protect the full range of departmental activities. Additionally, the office investigates threats related to foreign intelligence, terrorism, or criminal activities within or directed against the DHS.

1/ The FY 2005 Emergency Supplemental Appropriation Act for Defense, the Global War on Terror, and the Tsumami Relief rescinded \$500K from the Office of Immigration Statistics and \$2.8M from the Under Secretary of Management (USM). As a result of the \$2.8M rescission to USM, \$2.8M in FY 2004 USM lapsed funding was transferred to a 2-year account (704/50111) in accordance with Section 504. Although \$2.8M was rescinded from USM's Office of Administrative Services in FY 2005, it was able to use this 2-year account for FY 2005 obligations. Total FY 2005 obligations for the Office of Administrative Services amounted to \$27,054,083, including obligations in 7050111 and 704/50111.

*The President's budget request reflects a total of 285 FTE in FY 2006 which is an increase of 11 FTE from the 254 FTE reflected in the President's Budget Appendix.

Under Secretary for Management requests \$2.017 million for this activity. This is an increase of \$.156 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Business Transformation Office serves as the Department's hub for designing, planning and supporting change across the DHS, as well as establishing appropriate standards and metrics. The BTO oversees the design, development, planning, and execution of functional integration initiatives impacting all core management functions. The BTO focuses on functional integration, including establishment of baseline servicing metrics and development of targeted goals for service improvement. It is responsible for directly supporting the transformational initiatives of the Department and ensuring the effective coordination of the enterprise-wide support systems initiatives of the Under Secretary for Management. The BTO ensures that standards are realized, stakeholders/customers are consulted, timelines are met, and resources are coordinated.

Total Change 2006-2007	29	15	41,749

Under Secretary for Management requests \$71.449 million for this activity. This is an increase of \$41.749 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

MAX^{HR} implementation continues with the design of the new market-based pay system, and initial creation of a compensation committee, along with final pay designs for further review and vetting. Supervisor and manager training have continued from FY 2005, as well as training for HR professionals. Non-bargaining unit employees from Headquarters, ICE, FLETC, FEMA, USCG, and all of U. S. Secret Service are in the process of converting to the new performance system, including linkage of organizational and individual performance expectations. Insofar as is legally permissible, the Homeland Security Labor Relations Board may be established, in accordance with legislative requirements, to enhance DHS workforce responsiveness while balancing collective bargaining obligations. In addition, training on the new performance system will commence for CBP and CIS.

Total Change 2006-2007	22	11	7,749

Under Secretary for Management requests \$58.514 million for this activity. This is an increase of \$7.749 million over FY 2006. This program was not part of the US/M appropriation in FY 05.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Security is responsible for the security of all of the Department of Homeland Security's employees, facilities, information, and operations. The DHS Office of Security focuses on: coordinating and managing department-wide security functions at the Department level; developing new security initiatives, policies and procedures; and applying best security practices and policies at the component level to protect the full range of departmental activities. Additionally, the office investigates threats related to foreign intelligence, terrorism, or criminal activities within or directed against the DHS.

DHS Infrastructure Transformation Program

The Department's Infrastructure Transformation Program (ITP), led by the Office of the Chief Information Officer (OCIO), will integrate the IT infrastructures of the 22 legacy components into "One Infrastructure". Currently, most of the Department's components fund and are supported by separate and largely stove-piped IT infrastructures. This environment makes it difficult to share information across components and has resulted in redundant investments and wasted resources. The ITP will eliminate the duplicative infrastructures and provide common capabilities and services for all components to leverage.

The ITP consists of five domains with a Department component assigned as a steward responsible and accountable for the performance of each domain. The domains and their stewards are listed below:

- Network Services led by Customs and Border Protection (CBP);
- Data Center Services led by CBP;
- Email Services led by U.S. Coast Guard (USCG);
- Help Desk Services led by USCG; and
- Video Operations Services led by Federal Emergency Management Agency (FEMA).

The OCIO oversees the work of the stewards and the other components to ensure operational requirements are met and investments and resource allocations are balanced across the components.

Implementation of the ITP will eliminate the need for components to spend resources on improving their own infrastructures. Instead, some of the investment funding previously used for stovepiped infrastructures will be used to support the department-wide ITP effort. For example, CBP's IT initiatives such as the Automated Commercial Environment will benefit from the capabilities and services the ITP will provide such as network access, data center hosting, email/collaboration services, wireless access, integrated help desk, voice access, video services, and on-site support. Rather than independently developing new capabilities or augmenting legacy capabilities within CBP, the ITP will provide enterprise-level services that will benefit all components.

By investing in the ITP, DHS components will benefit from economies of scale while promoting Department integration, and improving information sharing and interoperability. The amount of IT investment funding from components to support the ITP is still under deliberation and any such proposal will be fully vetted with the Congress prior to any actions being taken.

IV. Program Justification of Changes

**Department of Homeland Security
Under Secretary for Management
Justification of Program Changes**
(Dollars in Thousands)

Program Increase 1: **DHS Headquarters Project**
Strategic Goal(s) & Objective(s): 7.3 Continually Improve Our Way of Doing Business
PPA: DHS Headquarters Project
Program Increase: Positions 0 FTE 0 Dollars \$8,206

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)

Total Request	0	0	\$65,081	0	0	\$25,810	0	0	\$8,206

Description of Item

Planned projects for FY 2006

<u>Description</u>	<u>Estimate</u>
Security enhancements Includes final perimeter barriers, traffic control and other physical protective measures	\$2,000,000

2650

Campus-wide design and construction Architectural and engineering support	\$5,206,000
Tenant improvements Modifications to wall, furniture layout, and necessary electrical and mechanical work to support occupancy	\$1,000,000

Justification

As part of the effort to streamline departmental administrative functions and create a unified Department of Homeland Security, much work has gone into finding, designing, renovating, improving, enhancing security, and relocating to a minimum of locations. The Nebraska Avenue Complex has been chosen as the headquarters facility for DHS for the foreseeable future, and is augmented with other support space. Locating as much of the Department Headquarters as possible in collocated space will provide for better communication and for greater ease of operations.

Requested resources will provide funding for continuation of the phased approach for basic tenant improvements in support of essential Headquarters stand-up projects not funded by the General Services Administration (GSA) for infrastructure. DHS has occupied much of the space at the NAC and other locations in close to as-is condition and as swing space. These funds are for the implementation of the housing plan for the HQ.

However, several contingencies related to occupancy activities were realized in since FY 2004, including asbestos abatement, electrical and mechanical upgrades, and information technology demands. These contingencies required re-scoping and reprioritization of activities, resulting in postponement and rescheduling of various project phases. In FY 2007, DHS expects to be able to execute the rescheduled project elements and phases.

Impact on Performance (Relationship of Increase to Strategic Goals)

This project initiative is important to the Department in that it will ensure that as many staff and functions the Secretary regularly interacts with will be collocated in as efficient a manner as possible given the physical constraints of existing facilities. By having as many functions that work together in close proximity, travel time between various locations would be reduced or eliminated. This will have an immediate affect on all HQ components, and increased efficiency will affect the entire Department.

Total Request	0	0	\$36,000	12	12	\$29,7000	41	27	\$71,449

Description of Item

FY 2007 represents a major transition year for the DHS Human Capital organization. As provided in regulations published in the *Federal Register* on February 1, 2005, all aspects of the new DHS human resource system will be in some stage of operations by FY 2007. New performance management systems will be in effect for the vast majority of the DHS workforce, requiring a renewed emphasis on performance measurement and monitoring. The phased implementation of new pay-for-performance and market-sensitive systems will have also begun and with it new requirements for operations and maintenance of the new programs. Implementation of each of these new flexibilities will necessitate new human capital skill sets that are not currently funded or, in some cases, even in existence within today's DHS workforce. Specific activities to be supported by the requested increase include:

- 16 positions to administer the Department's new pay for performance compensation system;
- 1 position to support expanded learning management system requirements;
- 2 positions to ensure appropriate emphasis on MAX^{HR} performance measurement and evaluation; as legally permissible, 6 positions to continue staffing the Labor Board in FY 2007;
- 2 positions to address DHS hiring process improvements; and
- 2 positions to support similar process improvements within the executive resources arena.

Justification

16 positions to administer the Department's new pay for performance compensation system. New functions will include monitoring pay administration, conducting new job-based design processes, managing occupational clusters, defining and administering qualification assessment processes, and administering a market-based compensation program. Funding is also requested to support organizational surveys for market comparison. The vast majority of these functions, such as the setting of qualifications standards, establishment of pay scales, research on locality pay, and development of classification standards are currently centrally managed by the Office of Personnel Management on the behalf of all government agencies. Under its new system, DHS will need the capacity to manage these new programs for all Departmental components. An additional position is also required to support

expanded learning management system requirements – a primary vehicle for reaching and training a diverse and demographically dispersed workforce.

An additional 2 positions are required to ensure appropriate emphasis on MAX^{HR} performance measurement and evaluation. Implementation of the MAX^{HR} system and associated technology improvements requires an on-going, robust evaluation program to ensure that intended goals are being achieved. With most MAX^{HR} program provisions slated for implementation by FY 2007, and with an established regulatory sunset of FY 2009 for any needed program changes, it is necessary for CHCO staff to conduct robust program evaluation activities during the FY 2007 timeframe.

Finally, insofar as is legally permissible, the Department expects to establish the Homeland Security Labor Relations Board during FY 2006 and further anticipates a need to continue the Board's hiring into FY 2007. Six additional positions are required for the Labor Board in FY 2007 as the Board continues to hire additional staff. As the majority of MAX^{HR} program provisions are intended to reach the broadest audience in FY 2007, it is reasonable to expect an expanded workload for the Labor Board that will be charged with the timely adjudication of labor/management matters.

In addition to new MAX^{HR}-related program needs, 2 positions are required to address DHS hiring process improvements. DHS managers have overwhelmingly indicated that their number one priority for human capital is to speed the hiring process. These positions will support enterprise-wide hiring process improvements, including greater optimization of technology to facilitate the process. Also, 2 positions are required to support similar process improvements within the executive resources arena.

Impact on Performance (Relationship of Increase to Strategic Goals)

These increases are tied to multiple organizational excellence objectives in the DHS Strategic Plan and the corresponding Human Capital Strategic Plan. Increased funding supports improved service delivery and quality enterprise-wide, which directly affects DHS' mission accomplishment. More specifically, these funds support a centralized program management philosophy, rather than a decentralized approach. Research and experience have shown that costs increase when multiple-components' attempt to implement their own Human Capital programs and systems. Through centralization, enterprise-wide costs are reduced, and deployment consistency is ensured across the Department.

Funding of this request will make additional employees available to develop classification, cluster management, and qualification assessment processes; develop market-based pay processes, and conduct organizational surveys and interventions. These functions have a direct impact on successful implementation, and the overall performance of Human Capital across DHS. In addition, these funds will support requirements associated with the DHS Strategic Plan, including functional integration, and various government-wide initiatives related to hiring, placement, right-sizing, and competitive sourcing, and MAX^{HR}-related implementation. In addition, the Secretary has established a Chief Learning Officer position within the Office of the Chief Human Capital Officer. This functional priority will address DHS cultural issues related to functional integration, and will support the establishment of a continuous learning environment. The incumbent will conduct needs analyses (particularly in the area of executive development), identify "best practice" learning delivery models, and identify other opportunities for DHS-wide training initiatives.

Program Increase 3: CPO: WORKFORCE INCREASE

Strategic Goal(s) & Objective(s): 7.3 Continually Improve Our Way of Doing Business
 PPA: Office of Procurement

Description of Item

To fully implement customer-focused services with the highest degree of integrity in the DHS-wide Procurement Office.

Justification

Both the GAO and IG noted that resources assigned to this critical agency would enable the Office of the Chief Procurement Officer to successfully implement an effective and efficient organization.

Impact on Performance (Relationship of Increase to Strategic Goals)

The implementation of this increase would enable the Office of the Chief Procurement Officer to:

1. Establish customer-focused acquisition services with the highest degree of integrity in the Acquisition Program for DHS.
2. Establish customer-focused grants services with the highest degree of integrity in the Grants Program for DHS.
3. Support National Socio-Economic Programs.
4. Support the President's Management Agenda regarding Competitive Sourcing.
5. Realize significant savings and/or efficiencies through Strategic Sourcing opportunities.
6. Support the President's Management Agenda regarding e-Government initiatives.

Program Increase 4: CSO: Security Services Expansion

Program Increase							22	11	6,800
Total Request	0	0		94	94	\$50,765	116	105	\$58,514

Description of Item

Increase of the number of federal employees within the Office of Security and the implementation of the Smart Card Initiative

Justification

The Office of Security (OS) has several positions that are inherently federal positions; these positions rest within Office of Security's Operations, Internal Security and Special Investigations Divisions, Special Security Program Divisions, Administration Security Divisions, Physical Security Division and Security Training and OPSEC Division. As the Office of Security matures as an organization the need for government employees that can represent OS is becoming more important.

Homeland Security Presidential Directive (HSPD-12) calls for a mandatory, government-wide standard for secure and reliable forms of identification issued by the federal government to its employees and to the employees of federal contractors. The Office of Security is responsible for the fielding and implementation of this initiative. The DHS Chief Information is responsible for the technical aspects of the program.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Office of Security needs additional federal employees to perform inherent government functions that currently being performed by contractors. This will allow OS to adequately perform its mission of protecting personnel, information, facilities and operations. Additionally, this increase will allow DHS to be in compliance of HSPD 12 and will streamline the identification and credentialing process within the Department of Homeland Security.

Program Increase 5: OUSM: Immediate Office of the Under Secretary

Description of Item

Increase of federal employees by 4 positions, 2 FTE.

Justification

The Immediate Office of the Under Secretary needs these 2 additional FTEs to ensure management remains consistent across the Directorate. The Senior Level employee will function as a management specialist with broad knowledge of mission support in the functional areas of the Management Directorate, and will have a staff assistant to support administrative needs and day to day operations.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Immediate Office of the Under Secretary, using these additional resources, will be able to focus on the needs of the Directorate as well as the Department. These positions will enable the Directorate to identify new areas to explore, revise, and improve to enable quicker, faster, better responses to the needs of our customers.

Program Increase 6: BTO: Business Transformation Office

Strategic Goal(s) & Objective(s): 7.3 Continually Improve Our Way of Doing Business
 PPA: Business Transformation Office
 Program Increase: Positions 4 FTE 2 Dollars \$550

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							5	5	\$1,467
Program Increase							4	2	550
Total Request	5	5	920	12	12	\$1,861	9	7	\$2,017

Description of Item

Increase in the number of personnel by 4 positions and 2 FTE, and resources for advisory and assistance services, totaling \$550,000.

Justification

As the Business Transformation Office matures as an organization and ramps up its activities in support of the Under Secretary's efforts to achieve better functional integration in and amongst management lines of business, additional senior-level and administrative staff will be required to assist Line of Business Chiefs in that endeavor, and additional resources for best practices surveys and other management studies will be required as well. The Office will serve as an internal consultant to the Under Secretary and to the Lines of Business Chiefs in management theory and practice, and will better serve as the integration node within the Management Directorate.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Business Transformation Office will enable a greater realization of support program efficiencies and cost avoidance, by seizing on and capitalizing on synergies and interdependencies amongst Management Lines of Business.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Under Secretary for Management
Justification of Proposed Changes in Under Secretary for Management
Appropriation Language**

For necessary expenses of the Office of the Under Secretary for Management, as authorized by sections 701-705 of the Homeland Security Act of 2002 (6 U.S.C. 341-345), [\$168,835,000], ~~\$209,138,000~~; *Provided*, That not to exceed \$3,000 shall be for official reception and representation expenses: *Provided further*, That of the total amount provided, [\$26,070,000] \$8,206,000 shall remain available until expended solely for the alteration and improvements of facilities, tenant improvements, and relocation costs to consolidate Department headquarters operations.

Explanation of Changes:

No explanation necessary.

PPA Mission Statement

The Immediate Office of the Under Secretary of Management ensures the "front office" of our Directorate, are able to function effectively and efficiently in support of both the Department as a whole, and the Directorate itself. It provides a framework, and a process, to the Chiefs and staff in US/M in order to monitor and facilitate the Directorate's internal workings. In addition, this office responds directly to the Executive Secretariat in a variety of areas and missions.

The requested funding will allow the Immediate Office of US/M to manage the Directorate's workload; respond quickly to queries from within, and outside, the Department; and further our efforts for functional integration.

USM - 24

Summary Justification and Explanation of Changes

PPA Mission Statement

BTO oversees the design, development, planning, and execution of functional integration initiatives impacting all core management functions. The BTO focuses on functional integration, including establishment of baseline servicing metrics and development of targeted goals for service improvement. BTO ensures that standards are realized, stakeholders/customers are consulted, timelines are met, and resources are coordinated.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$266	\$1,576	\$1,044	(\$532)

Salaries and Benefits includes costs for 2 new FTEs, the realignment of 7 2SR billets, and an overall decrease in personnel compensation of \$532k.

	2005	2006	2007	2006 - 2007

PPA Mission Statement

To streamline departmental administrative functions and create a unified Department of Homeland Security, we will continue to find, design, renovate, improve, and secure a minimum number of DHS Headquarters facilities. Continued relocation of as much of the Department Headquarters as possible in collocated space will enable better communication and more efficient operations.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change

PPA Mission Statement

The Office of Human Capital is organized around two major components: (1) Office of Human Capital Programs and Policy and (2) Corporate Services. The Office of HC is responsible for the design and implementation of the new DHS human resources management system, MaxHR, including the human resources strategy and technology components necessary for its successful deployment.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$531	\$954	\$3,153	\$2,199

Salaries and Benefits includes costs for 15 new FTEs. The FY 2007 request includes costs of \$2,200k to cover pay and benefits for 15 new FTE and \$11k for COLA adjustments. \$2,200k includes one half year funding for 15 FTE and full year funding for 12 FTE.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$8	\$6	\$75	\$69

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The travel increase reflects an increase of \$69k to reflect additional travel expected to occur during those two fiscal years.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent		\$778	\$756	(\$22)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request is expected to decrease in FY 2007 based upon the allocation fo rental costs in the currently occupied space.

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$5	\$1,378	\$1,723	\$345

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes an increase as a result of the additional FTE.

2689

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing		\$20	\$100	\$80

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes an increase of \$80k due to the anticipated increase in supervisory training.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$7,676	\$25,037	\$63,984	\$38,947

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Costs are expected to increase by \$38,947k to pay for the additional cost of operating and maintaining the new MaxHR system; to pay for the additional costs of implementing MaxHR in CBP and CIS; and to pay for the cost of implementing the WIG buyout.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$311	\$112	\$130	\$18

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY2007 request includes an increase of \$18k for inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$2,869	\$875	\$880	\$5

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$ 5k for inflation.

PPA Mission Statement

The OCPO reports directly to the Under Secretary for Management, and is responsible for overall management, administration and oversight assistance, strategic sourcing and competitive sourcing programs. Functions of the OCPO include: Acquisition Policy and Oversight: Responsible for development of the DHS acquisition regulations and policies, strategic acquisition development, and retention of a professional workforce, and oversight and performance management of the DHS acquisition infrastructure.

Competitive Sourcing and Privatization: Responsible for the Department's implementation of the Federal Activities Inventory Reform, Circular A-76, and the President's Management Agenda (PMA) Competitive Sourcing Initiative.
Grant Policy and Oversight: Responsible for the development of the DHS grant management regulations and policies, workforce planning and retention of a professional workforce, and oversight and performance management of the DHS grant processing and management infrastructure.

Strategic Sourcing and Acquisitions Systems: Responsible for managing the DHS strategic sourcing program and acquisition systems and data management.

Summary Justification and Explanation of Changes

A. Mission and Description of Under Secretary for Management

The Management Directorate ensures delivery of effective and efficient business and management services throughout the Department, to enable the Department of Homeland Security to lead the unified national effort to secure America.

The DHS Management Directorate improves mission effectiveness by ensuring efficient service delivery and exceptional management services to the Department and providing policy guidance, operational oversight and support, and innovate solutions for the management needs of the entire Department.

The Directorate includes the Business Transformation Office, the Office of the Chief Administrative Officer, the Office of the Chief Human Capital Officer, the Office of the Chief Procurement Officer, and the Office of the Chief Security Officer. In addition, under two separate appropriations, the Office of the Chief Financial Officer and the Office of the Chief Information Officer are also a part of the Management Directorate. All offices are currently located in the District of Columbia Metropolitan Area.

B. Major Activities and Key Strategic Issues

In FY 2005, final regulations for the Department's new human resource program, MaxHR, were issued. These regulations will guide ongoing implementation of MaxHR and mark a major milestone in an intensive design effort conducted with representatives from the Department's components, union representatives, experts from our Chief Human Capital Office and the Office of Personnel Management as well as employees and others from around the country who commented on our proposed regulations. Work on the new human resources management systems focused on finalizing the regulations and continued development of the redesigned system.

The FY 2006 appropriation provided \$167.147 million and 265 FTE to the Under Secretary for Management. These resources are used to execute the necessary functions of leading, directing, and managing the Department. In addition to providing leadership to the Department, the Under Secretary for Management is responsible for the oversight, integration, and optimization of the Department's human resources and personnel, financial management, budget and appropriations, procurement and administrative services.

Functional operations within the Department continue to identify and realize savings for the entire Department by reducing and consolidating the number of disparate processes and systems. The goal is to balance available resources in order to provide effective and efficient services to the Department.

Immediate Office of the Under Secretary for Management: Base funding for FY 2006 is \$1.670million and 6 FTE. Funding allows for continued management and oversight of Directorate operations and activities. Key efforts in FY 2006 and FY 2007 will focus on continued efforts to respond as a Directorate to internal requirements.

Business Transformation Office: Base funding for FY 2006 is \$1.861 million and 12 FTE, which included 7 Second Stage Review (2SR) billets which are transferred to other offices within the Management Directorate in FY 2007. Funding is focused on the BTO's function as the dedicated resource for providing guidance, evaluation, and facilitation for the functional integration of the Department's management process. The BTO provides program management standards to help the Under Secretary for Management (USM) track functional Lines of Business major initiatives and identify, monitor and report on the interdependencies between them.

Office of Administration: Base funding for FY 2006 is \$39.6 million and 45 FTE. The Administrative Services Officer is responsible for a wide variety of activities such as mail screening and delivery, courier services, shuttle and sedan drivers, personal property internal controls, facilities and space planning, occupational health and safety, environmental programs, records and forms management, directives and printing, as well as the Executive Service Center. While these activities are aimed to coordinate and direct these functions across the Department, the office is also responsible for providing operating support for these functions at the HQ, where most of the current resources are used.

FY 2005 Accomplishments: Completed functional integration FY 2005 milestones for Administrative Services; achieved Green for progress on President's Management Agenda for real property; identified necessary standards and metrics for Administrative Services functions; developed initial set of scorecards to measure component performance for Administrative Functions; developed strategy and structure to sustain HQ operations/support; initiated Enterprise Records Management System pilot program; initiated Risk Management Information System planning for work safety and health; consolidated HQ Rent billing through the Working Capital Fund; and awarded Department-wide package service contract.

FY 2006 Planned Accomplishments: Complete Administrative Services FY 2006 functional integration milestones; achieve Administrative Services FY 2006 PMA milestones; complete scorecards and measure performance for all Administrative Services functions for all components; augment strategy and structure to sustain HQ operations and start up components; initiate DHS HQ emergency preparedness program; and leverage Department-wide resources for savings and efficiencies in delivering certain shared services with consolidated billing through the working capital fund which include Mail Operations, Executive Sedan Service, Shuttle Service, Parking, and Transit Subsidy.

FY 2007 Projected Accomplishments: The FY 2007 request is \$40.218 million and 46 FTE. Complete Administrative Services FY 2007 functional integration milestones; achieve Administrative Services FY 2007 PMA milestones; measure

performance for all Administrative Services functions for all components; support HQ operations and start up components; and maintain DHS HQ emergency preparedness program.

DHS Headquarters Project: Base funding for FY 2006 is \$25.81 million. We recognize that the NAC is not a suitable long term location for the Department Headquarters.

FY 2005 Accomplishments: Initiated planning and programming of space requirements for HQ elements; updated housing plans; updated overall project plan, down scoping tenant improvements to identify funds for priority security upgrades; provided necessary funds for DHS portion of Navy move costs; and commenced necessary work to effect tenant improvements, power upgrades, and tenant moves.

FY 2006 Planned Accomplishments: Continue next phase of security upgrades, including vehicle and visitor screening; and continue additional work for tenant improvements and moves of additional available space. Continue security upgrades and minor alterations to space at the NAC. DHS will also support other project management and costs related to relocating and realigning headquarters space.

FY 2007 Projected Accomplishments: The funds (\$8.206m) will be used to support Headquarters facilities requirements at multiple locations. Complete security upgrades and minor alterations to space at the NAC and continue with tenant improvements. Support relocations, procurement of furniture, project management and project development costs related to ongoing adjustments of consolidating headquarters facilities, including headquarters back office functions in efficient and economical space.

Office of Human Capital: Funding for FY 2006 is \$8.811 million and 50 FTE. The base is largely salaries and some additional funding for internal training, travel, supplies, contractor support and license/fees. HR Operations funding increased in FY 2006 which included a request for an additional FTE. In addition, a technical correction for funding of staff was requested (and received). In FY 07, three additional FTE associated with the Second Stage Review reorganization will be included as a transfer in the FY 2007 request.

FY 2005 Accomplishments: The Office of Human Capital authored its Human Capital Strategic Plan, completed the payroll provider consolidation of the eight payroll providers into one for the entire Department; implemented the human capital functional integration directive (including alignment of human capital goals with strategic plan priorities); completed a DHS Workforce Plan and an initial study on DHS learning management systems; issued new policies on telework, employee assistance programs, and incident response; and developed a department-wide recruitment brand. In addition, the SES Performance Management System received OPM certification. The Headquarters' Personnel Operations managed a full range of personnel services for all Headquarter components, including meeting or exceeding the 45-day hiring timeline.

FY 2006 Planned Accomplishments: The additional FTE will perform work related to Workforce Strategy and Analysis which includes conducting DHS employee surveys funded in FY 2006. Other plans include: implementing the DHS Workforce Plan to close gaps in mission-critical occupations and executive positions; continuing to refine the DHS hiring processes in order to improve on the Federal standard of 45 days, leveraging technology and personnel security processes to minimize the hiring timeframe; providing the Secretary, Deputy Secretary, and Components Heads an annual evaluation of human capital programs, to include a strategic plan and assessment of each component's functional performance in the human capital line of business; developing and implementing action plans to address top priority issues identified in the Federal Human Capital Survey, including employee morale, satisfaction, and culture issues; continuing to establish DHS human capital policies and operating procedures; developing a process to identify and assess DHS component's human capital practices that provide the best and most cost effective operations and Centers of Excellence; establishing an Executive Leadership and Learning Center that will leverage existing facilities and resources across DHS, while ensuring the delivery of Department-wide recommended, non-technical training; cultivating high-performing workforces within CHCO and the human capital community, including development of HR professional certification standards; and modernizing and leveraging the use of technology to support HR process improvement and cost efficiencies across DHS. In addition, a Chief Learning Officer position will be established and the incumbent will conduct needs analyses (particularly in the area of executive development), identify "best practice" learning delivery models, and identify other opportunities for DHS-wide training initiatives.

FY 2007 Projected Accomplishments: In FY 2007, an increased emphasis will be placed on establishing corporate services through alliances with DHS components, reaping economies of scale and improving cost effectiveness and customer service. Other major efforts will be leveraging the Executive Leadership and Learning Center created in FY 2006 to meet executive training program needs and to create other training mechanisms to inculcate a "team" spirit across the DHS. Program evaluation will be expanded to begin measuring the effect of changes implemented through new corporate services and new training models.

Office of Human Capital – Max^{HR}: The MAX^{HR} program received base funding of \$29.7 million and 12 FTE in FY 2006. Funding is dedicated to the development and fielding of the Department's new human capital system. During FY 2005, the MAX^{HR} program made significant strides in the design of the new performance management system and training of executives, supervisors, and managers on the new performance management system. Subsequent to the submission of the President's FY 2006 budget, the MAX^{HR} program's FY 2006 deployment schedule was revised and its associated funding request reduced from \$53 million to \$32.5 million. (\$29.7 million was received in the DHS FY 2006 appropriation.) The change in the program's implementation schedule will mean increased deployment activity in FY 2007 for which the program requires an additional \$41.749 million. The new pay system (i.e. pay pool establishment) for those employees originally scheduled to convert to the new market-based compensation system in FY 2006 (but will now be converted in FY 2007) is an additional

\$15 million. A \$22 million increase is required to fund MAX^{HR} implementation and operational costs associated with moving to a market and performance-based compensation system, which has also been scheduled to begin in FY 2007. Total funding in FY 2007 is \$71.449 million (and this includes HSLRB support).

FY 2005 Accomplishments: The Office of Human Capital drafted and published final regulations for Max^{HR}; provided all employees with a comprehensive briefing and satellite broadcast concurrent with release of new regulations; conducted 30 employee focus groups on performance management; surveyed 500 employees to define organizational competencies and surveyed all DHS employees for competency validation; finalized design and management directives for adverse actions, appeals, and labor relations and drafted management directives for performance and pay; developed DHS-wide performance standards; analyzed 300+ DHS positions for job cluster assignment and market pricing (including benchmarking workshops with DHS components); defined DHS occupational clusters and paybands; developed performance leadership training program for all DHS managers and supervisors, delivering over 100 training classes; planned and hosted the annual SES training conference; developed and implemented continuing collaboration procedures; developed a staffing plan and interim operating procedures for establishment of the Homeland Security Labor Relations Board; procured a case tracking system for the labor board; established deployment teams and a facilitator network for component readiness; and conducted labor and employee relations training for DHS HR professionals and train-the-trainer for subsequent supervisory training.

FY 2006 Planned Accomplishments: In FY 2006 Max^{HR} implementation will continue. Design of the new market-based pay system will be completed; the compensation committee will be established; and final pay design decisions will be finished and vetted. Supervisor and manager training will continue as well as training for HR professionals. Non-bargaining unit employees from Headquarters, ICE, FLETC, FEMA, USCG, and all of U. S. Secret Service will be converted to the new performance system, including linkage of organizational and individual performance expectations. Insofar as is legally permissible, the Homeland Security Labor Relations Board will be established, in accordance with legislative requirements, to enhance DHS workforce responsiveness while balancing collective bargaining obligations. In addition, training on the new performance system will commence for CBP and CIS.

FY 2007 Projected Accomplishments: In FY 2007 employees in Headquarters, FLETC, FEMA, USCG, and U. S. Secret Service will be converted to the new market-based pay system. CBP and CIS employees will be converted to the new performance system, as well as any employees who were previously excluded from conversion in FY 2006.

Chief Procurement Office: The FY 2006 base funding is \$8.930 million and 46 FTE. The Office of the Chief Procurement Officer (OCPO) is responsible for the overall management, administration, and oversight of department-wide acquisitions, strategic

sourcing, and competitive sourcing programs, including direct management and oversight of the Office of Procurement Operations. The office is responsible for developing DHS acquisition regulations and policies; strategic acquisition workforce planning to ensure accession, development, and retention of a professional workforce; and oversight and performance management of the DHS acquisition infrastructure. In addition to the acquisition policy development, this office is responsible for the developing DHS grant management regulations and policies; workforce planning to ensure accession, development, and retention of a professional workforce; and oversight and performance management of the DHS grant processing and grant management infrastructure.

FY 2005 Accomplishments: Strategic Sourcing and Acquisition Systems successfully implemented and expanded the commodity councils (the workgroups that identify and work savings opportunities) from 12 to 16 as well as a significant increase in the number of specific savings initiatives identified by the existing councils. The Strategic Sourcing Program for FY 2005 accomplished a cost savings of \$104.5 million and an additional \$1.7 million in cost avoidance totaling \$106.2 million in savings. APO increased staff to assist in establishing an oversight program and to develop Departmental policies for specific acquisition authorities. APO also performed on-going oversight and audit functions for over \$20 billion of acquisition and financial assistance programs. The Grants division established a grant oversight program using the e-Grant initiative. This initiative was used to oversee the \$10 billion dollar grants program.

FY 2006 Planned Accomplishments: The priorities of our workforce are focused on establishing a world-class acquisition program, providing support to all Headquarters and Departmental client offices, supporting national socio-economic programs, establishing a Grants Management Program, supporting the President's Management Agenda on Competitive Sourcing and e-Government initiatives, realizing significant savings and efficiencies through strategic sourcing opportunities, and providing oversight and direction to all elements of the DHS Acquisitions Program.

FY 2007 Projected Accomplishments: Implement a central DHS-wide Program Management Support Office. Increase procurement operations by 25 FTEs to implement an efficient procurement operations and strategic sourcing teams. Establish DHS-wide acquisition workforce training to meet requirements of Public Law 104-106 Section 37(h)(1) funding levels and OFPP Policy letter 05-01 (section 6) of April 2005.

Office of Security: Base funding in FY 2006 is \$50.765 million and 94 FTE which will be used for the security of all of the Department's employees, facilities, information, and other physical assets. The DHS Office of Security focuses on: coordinating and managing department-wide security functions at the Department level; developing new security initiatives, policies, and procedures; and applying best security practices and policies at the component level to protect the full range of departmental activities. This program was not a part of the USM appropriation in FY 2005, but was moved to USM in FY 2006 as a result of the Second Stage Review (2SR) organizational changes. In FY 2006 Office of Security (OS) will continue to streamline the personnel security process

significantly reducing the average turnaround time for background investigations (anticipated reduction is X percent from FY 2005). Additionally, OS will have enough resources to ensure the protection of the intelligence program and the security of information received from the intelligence community. OS will implement Computer Based Training (CBT) covering several security areas, to include safeguarding Sensitive-but-Unclassified (SBU) information. In addition, the OS will provide security awareness training to state and local officials as well as assist in the certification of State Emergency Operations Centers (EOC) for the role out of Homeland Security Information Network (HSIN-S). For FY 2007, OS will continue its FY 2006 activities as well as accomplish the initial planning and implementation of the Smartcard initiative which allow for compliance of HSPD-12.

C. Resources Requested and Performance Impact

In FY 2007, the Under Secretary for Management is requesting a total of 317 FTE and \$209.138 million representing an increase of 52 FTE and an increase of \$41.991 million over the FY 2006 enacted appropriation.

Immediate Office of the Under Secretary: Key efforts in FY 07 will focus on continued efforts to respond as a Directorate to internal requirements. The increase of 2 FTEs will enable us to not only manage USM as a Directorate, but will also enable us to move forward in functional integration.

Office of Administration: FY 2007 request is \$40.218 million and 46 FTE. The two largest costs are Rent at \$10,000,000, and Salaries and Benefits at \$6,924,000. Complete Administrative Services FY 2007 functional integration milestones; achieve Administrative Services FY 2007 PMA milestones; measure performance for all Administrative Services functions for all components; support HQ operations and start up components; and maintain DHS HQ emergency preparedness program

DHS Headquarters Project: FY 2007 funds (\$8.206 million) will be used to support Headquarters facilities requirements at multiple locations. Remaining work on security upgrades and minor alterations to space at the NAC will account for \$2.0 million. \$1.0 will be used for tenant improvements. The remainder, \$5.206 million, will be used to support relocations, furniture, project management and project development costs of related to ongoing adjustments of consolidating headquarters facilities, including headquarters back office functions in efficient and economical space.

Office of Human Capital: In FY 2007, funds provided (\$9.827 million) will be used to place an increased emphasis on establishing corporate services through alliances with DHS components, reaping economies of scale and improving cost effectiveness and customer service. Other major efforts will be leveraging the Executive Leadership and Learning Center created in FY 2006 to meet executive training program needs and to create other training mechanisms to inculcate a "teaming" spirit across the DHS.

Program evaluation will be expanded to begin measuring the effect of changes implemented through new corporate services and new training models.

Office of Human Capital – Max^{HR}: In FY 2007 employees in Headquarters, FLETC, FEMA, USCG, and U. S. Secret Service will be converted to the new market-based pay system. CBP and CIS employees will be converted to the new performance system, as well as any employees who were previously excluded from conversion in FY 2006.

Chief Procurement Office FY 2007 Planned Accomplishments using funding of \$16.895million, include implementing a central DHS-wide Program Management Support Office, increasing procurement operations by 25 FTE's to implement an efficient procurement operations and strategic sourcing teams, and Establishing DHS-wide acquisition workforce training to meet requirements of Public Law 104-106 Section 37(h)(1) funding levels and OFPP Policy letter 05-01 (section 6) of April 2005.

Office of Security: For FY 2007, the Security Office will continue its FY06 activities as well as accomplish the initial planning and implementation of the Smartcard initiative which allow for compliance of HSPD-12, using a funding level of \$58.514 million.

D. How Under Secretary for Management Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

The following list of Under Secretary for Management programs with their performance goals are followed by the DHS strategic objective or objectives they support.

Under Secretary for Management - Consolidate support services under the control of the Department of Homeland Security in order to maximize management efficiencies and ensure continuity of services in the near term.

- 7.1 Value our people.
- 7.2 Create a Single Departmental Culture.
- 7.3 Continually Improve Our Way of Doing Business.

E. Performance Based Budget Highlights by Program

For each FYHSP program, the performance goal, performance measure/s, budget including allocation of non-programmatic overhead, and FTE are:

Performance Goal: DHS program units receive world class policy and low cost management support services, which enable them to efficiently achieve or exceed the DHS strategic goals and meet the standards of the President's Management Agenda.					
Measure: Percentage of President's Management Agenda initiatives with a green rating.	Fiscal Year	FY2004	FY2005 ¹	FY2006	FY2007
	Target	BASELINE	40%	50%	60%
	Actual	30%	40%	TBD	TBD
Program: Office of the Under Secretary for Management	\$ Thousands	\$64,427	\$147,853	\$167,147	\$209,138
	FTE	129	173	265	317

¹ Figures for FY 2005 and prior years do not include funding and FTE that transferred in to OCFO as part of the Secretary of Homeland Security's Second Stage Review.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

DEPARTMENTAL MANAGEMENT AND OPERATIONS
OFFICE OF THE CHIEF FINANCIAL OFFICER

I. Appropriation Overview**A. Mission Statement for Appropriation Name:**

The mission of the Office of Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, investment review, and strategic planning functions to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies. The OCFO has five goals: (1) to increase efficiency and effectiveness by producing financial data that is timely, reliable, and useful to decision makers; (2) to strengthen accountability by ensuring that internal controls are in place across the Department and appropriate oversight reviews are conducted; (3) to reduce costs by consolidating functions, systems, and processes and by instituting best business practices; (4) to achieve results through the use of rigorous planning, measurement, and evaluation processes; and (5) to ensure financial leadership for the Department by continuously developing our employees.

B. Budget Activities:

Under the OCFO, the following divisions fulfill these functions:

Performance Analysis and Evaluation (PA&E):

- Develops policies and provides guidance and oversight on matters pertaining to program analysis and evaluation
- Composes, presents, and defends the Future Years Homeland Security Program (FYHSP), and justifies resource requests
- Meets the performance-based budget requirements set by OMB
- Develops analytic tools, data, and methods for analyzing DHS planning and resource allocation
- Provides support to the DHS Investment Review Board by reviewing requirements and analyzing performance and life-cycle costs
- Serves as Executive Secretary of the Joint Requirements Council

Budget:

- Responsible for the Departmental budget, appropriations, and expenditures of funds
- Coordinates with PA&E to formulate annual budget submissions, assures these properly reflect the requirements of DHS, and assists in the presentation and defense of submissions to OMB and the Congress
- Assists PA&E with preparation of the FYHSP
- Coordinates and reviews budget execution for each component and appropriation, at the macro level; conducts spend plan and execution reviews; and acts on requests for modifications

- Conducts special studies and analyses of execution of financial plans and recommends reprogramming necessary for effective funds utilization
- Prepares budgetary reports as necessary or as required by OMB and the Congress
- Administers funds not specifically allotted to other component of DHS, such as the Counterterrorism Fund
- Coordinates with the Office of Legislative Affairs in preparing for Congressional hearings
- Tracks status of reports to Congress required by appropriations bills
- Ensures technical accuracy and consistency of budget-related materials among the components and in accordance with OMB or Congressional guidance
- Manages and coordinates components entering their budgets into the President's electronic on-line MAX (budget preparation) data system
- Analyzes and reviews pending legislation, reports to Congress, testimony, and other documents for budgetary impact
- Coordinates and reviews apportionments, reappropriations, and allotments for all appropriations across all components

Financial Management and Policy:

- Responsible for the development and oversight of Departmental financial management policy; coordination of government-wide financial management initiatives in the Department
- Ensures effective internal control over Departmental resources and consistency of internal control across components
- Implements the *Federal Managers' Financial Integrity Act*, *CFO Act*, and the *Federal Financial Management Improvement Act*
- Coordinates the Financial Management Improvement Initiative of the President's Management Agenda
- Prepares the Department's consolidated financial statements and other required financial information included in the Performance and Accountability Report
- Operates the Department's Working Capital Fund
- Administers the DHS Bankcard (purchase, travel, and fleet) Program, develops and documents bankcard policy, provides training and establishes and maintains internal control to provide reasonable assurance that the goals and objectives of the Bankcard Program are met and safeguards against fraudulent, improper, abuse, untimely payment, etc. are identified on a timely basis and appropriate corrective action is taken

Resource Management Transformation Office (RMTO):

- Responsible for the oversight, administration, and maintenance of DHS business and financial systems across the enterprise; RMTO is focused on improving resource management and enabling DHS components to improve the efficiency and effectiveness of their core support functions
- Leads transformation efforts to implement DHS-wide enterprise solutions and to merge, improve, integrate and leverage on-going component initiatives and capabilities to create a world-class best value environment in which they can operate
- Implements the Department's eTravel solution across all components

GAO and OIG Audit Liaison:

- Coordinates the Department's engagement in Government Accountability Office (GAO) and Office of the Inspector General (OIG) audits, including entrance and exit conferences, and the Department's response to audit reports and findings
- Tracks audit recommendations and the Department's implementation of those recommendations
- Provides oversight and guidance to component-level GAO and OIG audit liaison offices and to DHS employees involved in audit investigations

C. Budget Request Summary:

The OCFO requests 116 positions, 102 FTE, and \$44,380,000 for FY 2007. The total adjustment-to-base is 5 FTE and \$18,362,000. The program increases include 20 positions, 10 FTE, and \$6,807,000 to increase CFO staffing in the Budget, Program Analysis and Evaluation, and Financial Management and Policy Divisions, and to fund additional contractor technical assistance to implement Public Law 108-330, the *Department of Homeland Security Financial Accountability Act*. The 10 FTE will fund 20 new positions for one half-year. The additional resources will help OCFO meet the requirements of the DHS Financial Accountability Act; enable DHS OCFO staff to evaluate and report on the effectiveness of the Department's internal control over financial reporting; help the OCFO to provide Departmental oversight of management processes, findings and remediation efforts; increase budget reviews and conduct more thorough analysis of components' execution of their appropriations; and help further the Department's functional integration of the financial management line of business. These initiatives are integral in supporting the Department's plan to achieve an unqualified audit opinion with no material weaknesses.

III. Current Services Program Description by PPA

Department of Homeland Security
Departmental Management and Operations
Office of the Chief Financial Officer
Program Performance Justification
(Dollars in thousands)

DHS Infrastructure Transformation Program

The Department's Infrastructure Transformation Program (ITP), led by the Office of the Chief Information Officer (OCIO), will integrate the IT infrastructures of the 22 legacy components into "One Infrastructure". Currently, most of the Department's components fund and are supported by separate and largely stove-piped IT infrastructures. This environment makes it difficult to share information across components and has resulted in redundant investments and wasted resources. The ITP will eliminate the duplicative infrastructures and provide common capabilities and services for all components to leverage.

The ITP consists of five domains with a Department component assigned as a steward responsible and accountable for the performance of each domain. The domains and their stewards are listed below:

- Network Services led by Customs and Border Protection (CBP);
- Data Center Services led by CBP;
- Email Services led by U.S. Coast Guard (USCG);
- Help Desk Services led by USCG; and
- Video Operations Services led by Federal Emergency Management Agency (FEMA).

The OCIO oversees the work of the stewards and the other components to ensure operational requirements are met and investments and resource allocations are balanced across the components.

Implementation of the ITP will eliminate the need for components to spend resources on improving their own infrastructures. Instead, some of the investment funding previously used for stovepiped infrastructures will be used to support the department-wide ITP effort. For example, CBP's IT initiatives such as the Automated Commercial Environment will benefit from the capabilities and services the ITP will provide such as network access, data center hosting, email/collaboration services, wireless access, integrated help desk, voice access, video services, and on-site support. Rather than independently developing new capabilities or augmenting legacy capabilities within CBP, the ITP will provide enterprise-level services that will benefit all components.

By investing in the ITP, DHS components will benefit from economies of scale while promoting Department integration, and improving information sharing and interoperability. The amount of IT investment funding from components to support the ITP is still under deliberation and any such proposal will be fully vetted with the Congress prior to any actions being taken.

IV. Program Justification of Changes

**Department of Homeland Security
 Departmental Management and Operations
 Office of the Chief Financial Officer
 Justification of Program Changes**
 (Dollars in Thousands)

Program Increase 1: OCFO Initiative

Strategic Goal(s) & Objective(s): 7.3 Continually improve our way of doing business

Program Increase: Positions 20 FTE 10 Dollars \$6,807

Description of Item

This program increase provides 20 Positions, (10 FTE,) and \$2,224,000 for increased staffing in the Budget, Program Analysis and Evaluation, and Financial Management and Policy Divisions of the Office of the Chief Financial Officer, and \$4,583,000 for advisory and assistance services.

Justification

The increase of 20 Positions, (10 FTE,) and \$2,224,000 requested is for half-year funding of salary and benefits, plus travel, training, supplies, and Working Capital Fund charges. The most pressing needs for additional FTE in the OCFO are:

- 1) To provide greater guidance to and oversight of components in the areas of budget execution, financial reporting, and audit remediation. The majority of the new positions will be devoted to this effort. Despite previous staffing increases, the OCFO remains understaffed in these areas. Additional positions will enable the Department to conduct more thorough analysis of components' execution of their appropriations, provide assistance to components in financial reporting, and more closely monitor components' progress in remediation of weaknesses identified by the financial statement auditors.
- 2) To develop timely, accurate, useful Department-level financial and management data to support decision-making. The OCFO will improve data capabilities through eMerge², HR systems, financial reporting, program analysis and evaluation, and efforts such as managerial cost accounting, and will need to turn that raw data into useful information. This need necessitates a focused, central effort by the OCFO to collect, compile, analyze, and present data in a manner that is useful to the Department's managers.

- 3) To meet the requirements of the *DHS Financial Accountability Act*, including requirements for an audit of internal controls, and other new reporting and financial requirements. DHS needs to standardize financial management across the Department and to develop a robust program of internal controls to ensure accountability. These efforts necessitate a stronger headquarters financial policy staff. Functional integration of the financial policy function is not possible because it is an inherently departmental function. No component has a financial policy function that could provide the service or that OCFO could capitalize. (The former U.S. Customs Service, for example, received financial policy guidance from the Treasury Department. OCFO must now provide the components guidance but does not have a sufficient financial policy staff.)
- 4) To further the functional integration of the Department's financial management line of business by developing and executing plans to consolidate segments of financial management, particularly in the operations area to reduce costs and improve efficiencies. To further the consolidation of segments of financial management requires a much deeper understanding of and involvement in financial operations of the various DHS components than the OCFO has developed since the Department's inception. A deep understanding of and involvement in component day-to-day financial operations is not typical for Department level OCFOs to maintain, however, in order to consolidate, the DHS OCFO must develop this understanding and become more involved in component financial operations. Increased staff is needed to shepherd initiatives and work with the components to make functional integration effective.

The increase of \$4,583,000 for advisory and assistance services is needed to further the implementation of the *Department of Homeland Security Financial Accountability Act*. As part of the DHS internal controls and financial management standardization program, the OCFO needs contract technical assistance to help DHS develop and implement policy, procedures and internal controls and fully comply with all regulation. The technical assistance will assist OCFO staff to:

- 1) evaluate and report on the effectiveness of the Department's internal control over financial reporting;
- 2) provide Departmental oversight of management processes, findings, and remediation efforts as the Department scopes and executes its plan for implementing the *DHS Financial Accountability Act*;
- 3) perform assessments on IT-related internal control structural changes brought on by the eMerge² migration; and
- 4) Analyze opportunities for further functional consolidation of segments of financial management.

The Department's FY 2007 budget includes a coordinated, cross-organizational effort to improve internal controls over financial reporting. This initiative is part of DHS' ongoing effort to improve internal controls and financial reporting, so that we can improve safeguards against potential waste, fraud, and abuse. This effort is also necessary to comply with the *DHS Financial Accountability Act*. Combined with the resources appropriated to the OCFO in FY 2006, the additional funding requested for the OCFO and component organizations in FY 2007 is expected to fully fund the cost of our internal controls assessment, testing, and remediation. We anticipate that it will take approximately three years to make the necessary improvements in our controls structure, after which the cost of both the controls work and the audit costs should taper off significantly. The funding requested in the DHS CFO's budget will support the cost of headquarters internal control improvements, the cost of work as smaller organizations such as the U.S. Secret Service, and as necessary in the larger organizations where extensive material weaknesses exist. Improvements in controls to support the Secretary's required assurance statement on controls, and the audit of controls, is mandated by the *DHS Financial Accountability Act*.

FY 2007 Enhancement Requests for Internal Controls Improvements

COMPONENT	FY 2007 Enhancement Request
Customs & Border Protection	\$1,000,000
Federal Emergency Management Agency	\$1,000,000
Immigration & Customs Enforcement	\$1,000,000
Transportation Security Administration	\$1,000,000
Under Secretary for Preparedness	\$1,000,000
Under Secretary for Science & Technology	\$1,000,000
US Coast Guard	\$2,000,000
Office of the Chief Financial Officer	\$4,583,000
TOTAL	\$12,583,000

The increase in FY 2007 is also needed because the Office of the Chief Financial Officer will incur certain costs for the first time that year. The results of the audit will likely make corrective action efforts necessary in FY 2007. Additional requirements (beyond the internal controls requirements) brought on by the *DHS Financial Accountability Act*, such as reviews and analyses required of all CFO Act agencies create the need for increased funding. These efforts are integral to the Department's plan to achieve an unqualified audit opinion with no material weaknesses by FY 2007.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested program increase supports DHS Strategic Goal 7.3 – Continually improve our way of doing business. By improving financial management in the Department, the Office of the Chief Financial Officer is supporting the accountability, efficiency, and economy of all DHS components and enabling maximum direction of resources toward the Homeland Security mission.

Increased staff in the OCFO Budget, Program Analysis and Evaluation, and Financial Management and Policy Divisions will enable OCFO to increase oversight of the components budget execution and financial management. The increased staffing will allow the OCFO to work closely with the components on integrating the financial management line of business at DHS, to undertake material weakness remediation efforts, and to ensure proper management of the Department's resources.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Departmental Management and Operations
Justification of Proposed Changes in Office of the Chief Financial Officer
Appropriation Language**

For necessary expenses of the Office of the Chief Financial Officer as authorized by section 103 of the Homeland Security Act of 2002 (6 U.S.C. 113), [19,405,000] **\$44,380,000, of which \$18,000,000 shall be for the eMerge² program.** (Department of Homeland Security Appropriations Act, 2006.)

Explanation of Changes:

eMerge² – The eMerge² system was funded in the Office of the Chief Information Officer prior to FY 2007.

PPA Mission Statement

The mission of the Office of the Chief Financial Officer (OCFO) is to provide guidance and oversight of the Department's budget, financial management, investment review, and strategic planning functions to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policy. The OCFO has five goals: (1) to increase efficiency and effectiveness by producing financial information that is timely, reliable, and useful to decision makers; (2) to strengthen accountability by ensuring that internal controls are in place across the Department and appropriate oversight reviews are conducted; (3) to reduce costs by consolidating functions, systems, and processes and by instituting best practices; (4) to achieve results through the use of rigorous planning, measurement, and evaluation processes; and (5) to ensure financial leadership for the Department by continuously developing our employees.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$8,318	\$11,795	\$13,534	\$1,739

Salaries and Benefits includes costs for 102 FTE. The FY 2007 request includes an increase of \$239,000 for the proposed January 2007 increase in personnel compensation, \$78,000 in annualization for the January 2006 increase, a technical adjustment of \$502,000 from OC 25.1 to reflect the technical increase of 5 FTE, and \$1,004,000 for half-year funding of 20 new positions.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$63	\$75	\$100	\$25

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$2,000 in non-pay inflation and \$23,000 in program increases due to increased staffing levels.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Transportation of Things	\$1	\$0	\$10	\$10

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes program increases of \$10,000.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$100	\$265	\$375	\$110

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes increases of \$5,000 in non-pay inflation, a transfer in of \$32,000 with the eMerge2 program, and program increases of \$73,000 due to increased staffing levels.

2736

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Rent	\$0	\$0	\$0	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 request does not request any funding for other rent.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$0	\$608	\$3,937	\$3,329

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$10,000 in non-pay inflation, a transfer in of \$2,531,000 with the eMerge2 program, and \$788,000 in program increases due to higher staffing levels.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$77	\$156	\$159	\$3

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes an increase of \$3,000 in non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$2,377	\$5,150	\$16,648	\$11,498

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$179,000 in non-pay inflation, a transfer in of \$7,238,000 with the eMerge2 program, a technical decrease of (\$502,000) to move funds to OC 11 & 12 to account for the technical adjustment of 5 FTE, and a program increase of \$4,583,000.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$155	\$590	\$625	\$35

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY2007 request includes increases of \$10,000 in non-pay inflation, and a transfer in of \$25,000 with the eMerge2 program.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Purchase from Government Accounts	\$1,650	\$523	\$680	\$157

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$9,000 in non-pay inflation, a transfer in of \$34,000 with the eMerge2 program, and program increases of \$114,000 due to higher staffing levels.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Operation & maintenance of facilities	\$0	\$0	\$789	\$789

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes transfer in of \$607,000 with the eMerge2 program, and program increases of \$182,000 due to higher staffing levels.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Research and Development	\$0	\$0	\$0	\$0

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2007 request does not include funding for research and development.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Medical Care	\$0	\$0	\$0	\$0

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2007 request does not include funding for medical care.

2738

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$138	\$0	\$0	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request does not include funding for operation and maintenance of equipment.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Subsistence & Support of Persons	\$0	\$0	\$0	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2007 request does not include funding for subsistence and support or persons.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$42	\$46	\$110	\$64

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$1,000 in non-pay inflation, a transfer in of \$33,000 with the eMerge2 program, and program increases of \$30,000 due to higher staffing levels.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$15	\$3	\$7,413	\$7,410

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes a transfer in of \$7,320,000 with the eMerge2 program and \$90,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Land & Structures	\$2	\$0	\$0	\$0

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2007 request includes no funding for land and structures.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Grants/Subsidies/Contributions	\$0	\$0	\$0	\$0

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY2007 request includes no funding for Grants/Subsidies/Contributions.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Indemnity	\$0	\$0	\$0	\$0

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2007 request includes no funding for indemnity.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Unvouchered	\$0	\$0	\$0	\$0

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting. The FY 2007 request includes no funding for unvouchered expenditures.

A. Mission and Description of the Office of the Chief Financial Officer (OCFO)

The Office of the Chief Financial Officer (OCFO) is responsible for the fiscal management, integrity, and accountability of the Department of Homeland Security (DHS). The mission of the OCFO is to provide guidance and oversight of the Department's budget, financial management, and investment review to ensure funds necessary to carry out the Department's mission are obtained, allocated, and expended in accordance with the Department's priorities and relevant law and policies. The OCFO provides the financial management policy and oversight necessary to support the Department in achieving its strategic goals of preventing terrorist attacks within the United States, reducing America's vulnerabilities to terrorism, and minimizing the damage and recovering from attacks that may occur. The OCFO is also responsible for the Department's interactions with the GAO and OIG. The OCFO is continually progressing toward meeting its goal of achieving the financial management integration and consolidation needed to create a seamless organization that shares services, information, and best practices across previously stove-piped organizations.

B. Major Activities and Key Strategic Issues

In FY 2006, the Office of the Chief Financial Officer received an appropriation of 87 FTE and \$19,211,000. The OCFO is using these resources to carry out the necessary functions of leading, directing, and managing the Department's finances. The FY 2006 base funding contains \$11,795,000 for personnel compensation and benefits for 87 FTE (for the Budget Division, Program Analysis and Evaluation Division, Financial Management and Policy Division, Resource Management Transformation Office, and the Government Accountability Office/Inspector General Liaison Staff) and \$7,416,000 for non-personnel costs, such as contract support for internal controls audit preparation, the development of financial management standard operating procedures, budget analysis services, the Future Years Homeland Security Program (FYHSP), the FY 2007 Congressional Budget Justification and Budget-in-Brief, and the FY 2005 Performance and Accountability Report (PAR).

One of the most important initiatives for the OCFO in FY 2006 and beyond is complying with Public Law 108-330, The *Department of Homeland Security Financial Accountability Act*. The Act subjects DHS to the provisions of the *Chief Financial Officer's Act*, thereby requiring the Department to comply with the provisions of the *Federal Financial Management Improvement Act (FFMIA)* and undertake biennial reviews of user fees. The law required that beginning in FY 2005 the PAR include an assertion by the Secretary of DHS regarding the adequacy of internal controls that apply to financial reporting in the Department, and that beginning in FY 2006 the PAR include an audit opinion of DHS's internal controls over our financial reporting. Using resources provided in FY 2006 (5 new FTE and \$4,000,000 for contract support) the OCFO is making substantial progress with the documentation and preparation work for the audit of internal controls. The *DHS Financial Accountability Act* requirements regarding internal control reporting, coupled with the related requirements of the CFO Act and the FFMIA, impose significant management challenges and resource demands on the Department.

Another very important initiative for OCFO is improving visibility into the budget execution and financial management of DHS components. OCFO has increased oversight and guidance of components and is conducting frequent FY 2006 budget execution reviews. OCFO continues to provide technical assistance to components and is providing extensive training to component staffs

on Planning, Programming, Budgeting, and Execution (PPBE). This oversight and guidance is critical to improving financial performance throughout DHS and the overall financial position of the Department. Oversight will continue to strengthen in FY 2007 and beyond as more frequent OCFO reviews become institutionalized. OCFO will continue to exercise authority in component hiring for key leadership positions in the budget and financial management areas.

In FY 2007, the OCFO will continue its efforts to standardize and functionally integrate the financial management line of business activities at DHS. Having reduced and consolidated the number of accounting providers from 19 at the Department's inception to eight, the OCFO's Resource Management Transformation Office (RMTTO) is pursuing the *eMerge*² "Center of Excellence" (CoE) concept to consolidate further financial systems and accounting providers within DHS. The RMTTO will continue to lead the Department's consolidation of financial systems and accounting providers, DHS's migration to eTravel, and will continue to develop the Department's financial metrics dashboard to deliver timely, useful information to Departmental and component financial managers.

The OCFO will design and implement Department-wide financial management policies, procedures, and internal controls, and provide component staff with training on financial management and the cycle of PPBE. The OCFO continues to conduct short- and long-range audit planning in order to systematically and continually reduce and eventually eliminate material weaknesses and achieve an unqualified audit opinion on the consolidated financial statements. The OCFO will also continue to conduct thorough program analysis and evaluation and provide the Department's executive leadership with sound and informative data upon which to base decisions about the Department's resource allocation and capital investments, and performance.

C. Resources Requested and Performance Impact

The DHS OCFO is requesting a total of 116 positions, 102 FTE, and \$44,380,000 for FY 2007, a net increase of 25 positions, 15 FTE, and \$25,169,000 over the FY 2006 revised enacted level. The FY 2006 revised enacted appropriation of 91 positions, 87 FTE, and \$19,211,000 is adjusted for FY 2007 to 96 positions, 92 FTE, and \$37,573,000. The request includes program increases of 20 positions, 10 FTE, and \$6,807,000 to: a) increase staffing in the Budget and Financial Management and Policy Divisions to provide increased oversight, more thorough analysis, stronger policy guidance, and better information for decision making; and b) to increase contractor technical support of the Department's evaluation of internal control, remediation efforts, and assessment of potential IT-related internal control financial system changes that could improve internal controls.

The OCFO will continue all functions and activities from FY 2006 in FY 2007. OCFO plans in FY 2007 to continue consolidation of DHS financial management concurrent with the rollout of the Department's *eMerge*² solution. For FY 2007, the OCFO requests that funding for the *eMerge*² program planning and acquisition be transferred from the Office of the Chief Information Officer (OCIO), Department-wide Information Technology Investments to the OCFO. By consolidating the *eMerge*² program in the OCFO, the dual reporting responsibility caused by funding split between OCIO and OCFO will be eliminated. This will place ultimate accountability for the program in the hands of the Chief Financial Officer. The primary reason that *eMerge*² program investment funding was appropriated to the OCIO was to ensure that the program was coordinated from a Departmental enterprise architecture perspective. Given the new Center of Excellence (CoE) approach to the *eMerge*² solution, the program is now shifting focus to financial

OCFO - 2

management, internal control, and financial policy aspects, which are not directly related to systems enterprise architecture per se. Thus, the requested transfer of the *eMerge*² program into the OCFO will ensure effective coordination with Departmental and component financial management and policy.

Sound financial management at DHS is absolutely critical to mission accomplishment. Integrating 22 disparate financial management systems and cultures while complying with contemporary financial accountability requirements is a challenge unprecedented in the Federal government. At the requested funding level, the OCFO will be better able to ensure that resources are deployed effectively toward securing the homeland, which will ensure that DHS can meet its strategic goals. Program increases will enable DHS to develop timely, accurate, useful Department-level financial and management data to support decision-making, to meet the requirements of the *DHS Financial Accountability Act*, including requirements for an audit of internal controls, and other new reporting and financial requirements, and to further the functional integration of the Department's financial management line of business by developing and executing plans to consolidate segments of financial management.

D. How Component Name Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

Chief Financial Officer Program Performance Goal – Develop and maintain a Department-wide financial system that produces financial data that is timely, reliable, and useful to decision makers; strengthen accountability by ensuring that internal controls are in place across the Department and oversight reviews are conducted.

7.3 Continually improve our way of doing business.

E. Performance Based Budget Highlights by Program

The OCFO FYHSP performance goal, performance measure, budget, and FTE are:

Performance Goal: Develop and maintain a Department-wide financial system that produces financial data that is timely, reliable, and useful to decision makers; strengthen accountability by ensuring that internal controls are in place across the Department and oversight reviews are conducted.					
Measure: Percentage decrease in the number of reportable conditions that are considered to be material weaknesses at the consolidated level	Fiscal Year	FY2004	FY2005 ¹	FY2006	FY2007
	Target	BASELINE	20%	25%	100%

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Office of the Chief Information Officer

I. Appropriation Overview

A. Mission Statement for the Office of the Chief Information Officer:

The Department of Homeland Security (DHS) Office of the Chief Information Officer (OCIO), in collaboration with the DHS Chief Information Officer (CIO) Council, is responsible for implementing the necessary programs to align the information Technology (IT) organization, including all of the systems and infrastructure, to support the missions and activities across the Department within each of the Components.

Under the leadership of the DHS OCIO, IT will help speed the transformation of the Department into a high-performance, highly integrated organization by providing the right technologies and systems. This transformation will collapse silos of information delivery resources into an enterprise-level delivery capability that meets DHS and Components missions, business, and IT requirements. To that end, the DHS OCIO and the CIO Council are committed to providing the following:

- A secure means of sharing appropriate information to all internal and external stakeholders;
- A set of advanced tools that enables the DHS workforce to rapidly and efficiently process, retrieve, deliver, and share information;
- A single, DHS-wide IT infrastructure environment that is reliable, scalable, flexible, maintainable, and secure;
- A clear set of performance metrics and efficient business processes;
- IT standards and frameworks that provide for integration;
- A single, consistent IT governance model;
- An enterprise-wide IT delivery capability; and
- A mature and fully detailed Enterprise Architecture.

The Department continues to overcome challenges related to IT resource allocation and prioritization of supported operational initiatives. To ensure the right people have the right information at the right time, the DHS OCIO has established the following five strategic objectives:

1. Improve project management and alignment of budget and enterprise architecture;
2. Improve infrastructure and consolidation;
3. Continue cyber security improvements;
4. Transition projects into actions and operations; and
5. Improved information sharing and data collaboration/integration.

B. Budget Activities:

OCIO - 1

Salaries and Expenses

Salaries and Expenses is a crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to all offices within the DHS OCIO.

Department-wide Technology Investments

Information Technology Services – A program which supports development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, the integration of the Department's financial management system activities (eMerge²), the IT framework for the Department's Human Resources System (including MaxHR), geospatial technologies, and information sharing.

Security Activities – A set of programs that provide for the integration and protection of sensitive DHS information.

Wireless Program – A program whose mission it is to ensure the effective operation, management, budgeting, and procurement of all wireless technology department-wide, and the development of policy and wireless program performance metrics and standards for DHS.

Homeland Secure Data Network (HSDN) – A classified wide area network for DHS and its components, with specific and controlled interconnections to the intelligence community and federal law enforcement resources.

C. Budget Request Summary:

The OCIO requests 87 positions, 87 FTE and \$323.765 million for the FY 2007 Request. The total adjustments-to-base are 9 positions, 9 FTE and (\$15.834) million. The program increases include \$45.342 million to:

- Improve telecommunications capabilities of the National Center for Critical Information Processing and Storage and build-out the infrastructure required to support an enterprise-wide active directory and email system focused on easing administrative overhead while improving the Department's ability to oversee the capability from a central point and at the same time supporting local control (\$36.342 million).
- Enable the Infrastructure Transformation Program (ITP) to continue on a minimal level of effort to build-out useable floor space for hosting applications within the National Center for Critical Information Processing and Storage to support the enterprise data management needs of the Department (\$9.000 million).

II. Summary of FY 2007 Budget Estimates by Program/Project Activity (PPA)

2007 Request	87	87	79,521
Total Change 2006-2007	9	9	4,522

CURRENT SERVICES PROGRAM DESCRIPTION:

Salaries and Expenses enhances mission success by leveraging the best available information technologies and management practices. It provides shared services and coordinates acquisition strategies to minimize cost and improve consistency. OCIO Operations supports executive leadership in performance-based management by maintaining an enterprise architecture that is fully integrated with other management processes, and it advocates and enables business transformation in support of enhanced homeland security.

Information Security Program: Promote Federal Information Security Management Act (FISMA) and National Institute of Standards and Technology (NIST) compliance for the Department and provides a secure and trusted computing environment that enables the Department to leverage IT and effectively share information and data in support of its mission. The DHS Information Security Program is responsible for:

Security Policy - Implements DHS information security policies and guidance to ensure the protection of DHS information resources, and incorporates new information security requirements and best practices promulgated by the Office of Management and Budget (OMB), Homeland Security Presidential Directives (HSPDs) and NIST. Issues updated DHS Information Security policy directives that address new security standards and requirements, and issues system configuration hardening guidance for the most common operating systems.

Security Architecture - This activity supports information sharing and interoperability by integrating information security architecture with DHS Enterprise Architecture (EA) and Capital Planning Investment Control (CPIC) processes, and integrating information security controls in functional domains. Issues security architecture with design guidance to ensure effective deployment of security control and effective use of common security features and services.

Develops and promulgates department-wide security architecture design guidance. Defines trust domains in support of IT infrastructure transformation. Performs technology assessments to evaluate technologies that show the greatest promise for enhancing information sharing and security and can be scaled for enterprise application.

Certification and Accreditation (C&A) Remediation - This project specifically addresses a short-term need to remediate legacy IT systems to be minimally compliant with FISMA. When the Department stood-up in March 2003, it inherited legacy systems that had not been certified and accredited to operate as required by FISMA and OMB policy. The full scope of this problem was first realized following the completion of the initial DHS IT system inventory in August 2005 and was much larger than anticipated. There are between 500 and 800 total IT systems that are unaccredited throughout the Department.

The goal of this project is to rapidly certify and accredit legacy systems within a year's timeframe in order to elevate the security status to an acceptable baseline. This project will create a baseline security status, by assisting Components in documenting risks associated with the operation of individual systems, based on existing implemented security controls. Once this baseline is established, remediation of specific weaknesses will be the responsibility of individual Components, and the DHS Information Security Program will oversee continued compliance. Actual remediation costs for each system will be borne by individual Program Offices when weaknesses are identified.

Compliance and Oversight - Compliance includes management and oversight of IT system inventory assessment, C&A process, Plan of Actions and Milestones (POA&M) management, FISMA reporting, implementation of security management tools, and component compliance assist visits. The program also includes oversight of C&A weakness remediation to resolve residual IT security weaknesses. Oversight involves conducting compliance reviews, assistance visits, and program management to verify and validate compliance with DHS security requirements. This effort monitors DHS component activities to complete system accreditations, tracks progress with resolving weaknesses identified in the Component's POA&Ms, and establishes standards for performance reporting. This activity supports enhancements to security tools to integrate functionality for FISMA compliance management and reporting.

IT Security Awareness and Training - This activity supports content development of role-based IT security training for personnel with significant security responsibilities, and increased user training on security tools and processes for FISMA compliance. The goal of this activity is to develop a knowledgeable and security aware workforce in accordance with NIST SP 800-50 and SP 800-16 guidance through awareness and specialized training.

FY 2007 funding supports monitoring the accelerated efforts to close the security gap with certifying unaccredited legacy systems under the DHS C&A remediation program. The increase in the number of IT systems across the department expanded the scope of program reviews, independent verification and validation, performance reporting, and monitoring progress towards meeting information security goals. These activities address specific audit findings by the DHS Inspector General (IG) and the Government Accountability Office (GAO) to improve the consistency and integration of information security processes and improve data accuracy and integrity. In addition, the increase in the number of IT systems across the department expanded the scope of compliance and oversight, performance reporting, and assistance visits required to oversee successful implementation of FISMA.

Salaries and Expenses: This supports the management and support of IT programs and requirements. The funding includes salary and benefits, as well as the associated facilities, supplies, communications, and travel. The anticipated work requires a complex set of skills, combining legal and policy analysis, specialized technology knowledge, senior-level negotiation and communication. It involves development, application and assessment of techniques and processes for which there are no established precedents.

Infrastructure Operations and Applications Operations & Maintenance: Infrastructure Operations provides the network, e-mail, internet, intranet, and telecommunications infrastructure, as well as all end user services including desktop computing, telecommunications, cell phones, Blackberry devices, printers, and peripheral equipment to users in DHS Headquarters (HQ), Science and Technology (S&T) directorate, and the restructured components of the Information Analysis and Infrastructure Protection (IAIP) directorate.

Applications Operations capabilities provide the web-hosting environment on which all other information sharing and communications applications within the Department reside and depend. Applications Operations must plan, build, maintain, and protect these capabilities so that they remain immediately available. DHS must protect and maintain the applications operations infrastructure backbone and its applications in order to ensure that there is no adverse impact on DHS' ability to share information. This initiative supports the ongoing maintenance and an operation of these critical applications operations infrastructure capabilities, optimizes the delivery of these services, and achieves cost savings without affecting service delivery.

This funding will provide operations and maintenance for two (2) data centers, i.e., Stafford and Ashburn, which supports the DHS HQ and other DHS components. This area also supports DHS applications like DHS.gov, Listo.gov and DHS Interactive.

This funding is required to maintain the existing operations and maintenance support for users in the National Capital Area, including the Nebraska Avenue Complex. DHS Headquarters continues to mature while DHS as a whole continues to evolve. These changes include increases in headquarters personnel, moves and consolidations of office space in existing and new locations, and extensive renovations of facilities such as the Nebraska Avenue Complex (NAC) in order to support DHS operational and security requirements, and the expansion of mission applications with associated requirements for infrastructure capabilities. These maturing processes at DHS headquarters place a heavy demand on the IT infrastructure.

The infrastructure includes local area network (LAN), private branch exchange (PBX), and video teleconference (VTC) equipment, engineering and operational support required to deliver data, voice and video services at three classification levels. The amount requested is needed to maintain capabilities and services for a National Capital Area (NCA) user population which grew by 50 percent in FY 2005 and is expected to grow by an additional 20 percent in FY 2006.

The Mission Critical Infrastructure Support function at Mount Weather has been tasked to consolidate and restore all capabilities from every component organization into an integrated Homeland Security Operations Center (HSOC) environment. This includes significant work in support of classified mission areas. In order to accomplish this, funding is required to implement core infrastructure hardware and telecommunications components that will allow the department to effectively communicate with DHS components, as well as other Federal, state and international governments.

One immediate requirement is the continued operations and maintenance of the Secure VTC capabilities, which provides the Secretary with direct classified communications with the Governors. The funds requested funds will support the build-out and operational readiness of the HSOC environment and its components as a 'warm' site that will serve as the DHS headquarters location in the event of a national emergency.

IT infrastructure capabilities provide the backbone upon which all other information sharing and communications applications reside and depend. Therefore, DHS must plan, build, maintain, and protect these capabilities so that they remain immediately available. DHS must protect the IT infrastructure backbone of its electronic government applications and maintain interoperability for information sharing purposes in order to ensure that there is no adverse impact on DHS' ability to share information in times of national emergency and to carry out its day-to-day mission of detecting potential terrorist activity and preventing terrorist attacks on the homeland. The majority of the Infrastructure Operations and Applications Operations Maintenance budget is required to pay for fixed costs contracted under multi-year leases to supply hardware, software and applications support.

The Secure VTC operated from Mount Weather is a direct resource allowing DHS to communicate at the Secret level via video teleconferencing with state and local governments. This capability was utilized heavily during the London bombing incident, the Presidential elections, and in responses to hurricanes Katrina and Rita. Lack of a secure VTC capability would severely limit DHS' ability to coordinate intelligence, analysis, and responses during national emergencies. The consolidation of capabilities is vital to DHS' ability to respond to crises. Recent events highlighted the need for enhanced coordination among DHS components, and the integrated HSOC environment will provide the technical infrastructure to support such improvements. Without funding services would have to be discontinued or re-hosted at another location at significant cost to stand-up temporarily until the permanent hosting location is developed.

Applied Technology & Research Services: This project establishes a DHS-wide provision of IT research and advisory services to support IT management decisions, standards, and practices. In the absence of a single-source contract, DHS Components must subscribe to/contract for these services individually resulting in non-uniform levels of access, service, and cost. Additionally, this effort revises the DHS Technology Vision document (a forecast of emerging technology suitability for adoption) as an input and guidance to Enterprise Architecture evolution and acquisition.

Applied Technology and Research Services are primarily subscription services that incur no subsequent operations and maintenance cost. The specific services subscribed to in any year may be altered to address DHS and Component priorities. DHS actively collects and reports monthly usage metrics for each subscription, membership and consulting service to ensure that services are being used and that DHS is receiving value.

Subscription and membership services continue one-year from award. Consulting services make available a limited number of consulting days from a subscription service provider. These days are applied to custom advice for DHS, its components or projects. The DHS IT Vision document update refreshes a rolling technology forecast that serves as a basis for DHS Enterprise Architecture planning and guidance.

PPA: INFORMATION TECHNOLOGY SERVICES

	Perm Pos	FTE	Amount
2005 Actual			\$70,340
2006 Revised Enacted			82,609
2007 Adjustments-to-Base			(21,596)
2007 Current Services			61,013
2007 Program Change			0
2007 Request			61,013
Total Change 2006-2007			(21,596)

CURRENT SERVICES PROGRAM DESCRIPTION:

The Information Technology Services supports the development, implementation, and maintenance of a comprehensive and integrated Enterprise Architecture, the integration of the Department's financial management system activities (eMerge²), the IT framework for the Department's Human Resources System (Max^{HR}), geospatial technologies, and information sharing.

Geospatial: The Geospatial Management Office (GMO) is tasked with providing oversight and guidance to DHS component organizations for geospatial policy and technology matters. The mission and authorities of the GMO include establishing and executing a comprehensive program that enables the effective, collaborative, and coordinated application of geospatial capabilities and resources to provide crucial support to the homeland security mission. DHS requires coordinated, and in some cases consolidated, enterprise geospatial solutions for emergency management, law enforcement, and other homeland security mission objectives. To assure efficient and shared use (and re-use) of geospatial assets, the GMO's program plans must integrate capabilities and enable access to resources among all levels of government, first responders, and service providers in the private sector. These plans will support integration of capabilities and resources across all levels and functions of government to provide standards-based, interoperable solutions and services. In support of the mission of the Department, the guidance and oversight processes of the GMO will maximize use of enterprise geospatial assets across the federated mission systems. The GMO supports the Departmental effort to establish the necessary framework, organizational structure, and requisite resources to geospatially enable the DHS enterprise. This includes enhancing the situational awareness capabilities of the Homeland Security Operations Center and other Departmental elements tasked with critical disaster response, intelligence, and law enforcement missions.

Enterprise Architecture (EA): A "blueprint" for systematically and completely defining DHS' as-is (current or baseline), to-be (desired or target) environment, and transition plan. This program helps the Department establish a Department-wide roadmap to improve mission effectiveness and efficiency and eliminate existing stovepipe systems and increase interoperability and information sharing. This program promotes the development of a common IT environment that directly supports the Department's mission. The EA program is a key governance tool to assure that mission needs drive technology investments, and that they inform the Capital Planning and Investment Control (CPIC) process as well as the DHS Joint Requirements Council (JRC) and Investment Review Board (IRB).

Solutions Engineering: The Solutions Engineering (SE) division is the section of Infrastructure Operations that provides system engineering services to integrate components application. Efficiency considerations necessitate common services across DHS rather than multiple sets of similar services. Solutions Engineering assists DHS components by implementing initial Service Oriented Architecture (SOA) core services. The general approach advocated by SE is to:

- Leverage IT integration to improve information sharing;
- Support both near-term and longer-term mission rationalization objectives; and
- Employ a common architecture to support both internal and external information sharing and integration.

The SE program ensures DHS Department-wide coordination and oversight with regard to identifying and deploying common services with Components contributing to the stand-up and operation of these services.

Enterprise Portal: The DHS Enterprise Portal Program will develop and implement the enterprise solution for the Department and to support the implementation and dissemination of common solutions. This program develops the key components as well as coordinates the integration of different enterprise systems. This program is closely aligned to Solutions Engineering, Enterprise Architecture and the Chief Information Security Officer (CISO) with its support of the implementation and build out of the "common building blocks" and support of enterprise programs to ensure EA standards are met. The vision of the DHS Enterprise Portal Program is to provide a secure, always-on, interoperable universal point of access to information, services, and applications for all internal and external DHS user communities. The overarching mission is to develop an user-centric portal architecture to improve DHS communications, collaboration, and operational efficiency.

The Enterprise Portal Program is an on-going effort to support the enterprise programs throughout the Department. A modernization of the DHS portal beginning in FY 2007, which will be the to-be capability environment, will provide DHS more services than the current portal's capability. A central portal/portal capability becomes a virtual service that supports information sharing capability at the Department by enabling approximately 150,000 registered DHS users and stakeholders the ability to collaborate in a secure environment.

The cost for the development and stand up of the planned to-be platform will support DHS requirements aligned with the DHS Enterprise Architecture, DHS strategic goals and have improved information sharing services. New or enhanced collaborative, identity management, information sharing, web-content management (enabling search services), work flow, and document and data management services will become a part of the DHS environment that do not exist today. As portal services are delivered into the DHS environment via the new portal, DHS components will have access to these services. As enterprise services are turned on, identified redundant component services can be turned off. As the Department evolves, successive services will be added for inclusion starting in FY 2008.

Enterprise Application Delivery and Operations (EADO): The DHS CIO's Enterprise Application Delivery and Operations office is responsible for the operations, management and delivery of enterprise solutions for the Department. The role of this office is to engineer and implement Enterprise

Architecture requirements that have been determined by the DHS Enterprise Architecture Office and provide these requirements as services for DHS. One example is the establishment of Service Oriented Architecture (SOA) that supports information sharing for DHS, and the deployment of an enterprise toolset that includes program management, capital planning, enterprise architecture, and security that can interrelate to one another. This office will ensure the essential evolution of information systems and development of a common IT environment that directly supports and promotes the Department's mission.

Our methodology emphasizes '*Business First*'; shifting power and responsibility to the users -- customers and business domain experts. These planned enterprise services toolsets will help DHS establish Department-wide capabilities to improve mission effectiveness and efficiency and eliminate existing stovepipe systems. Implementation and maintenance of EAD will result in the evolution of information systems and the development of a common IT environment that directly supports and promotes the Department's mission.

The purpose of the Enterprise Application strategy is to develop DHS-wide capabilities reducing duplicative functions, gaining economies of scales, creating efficient processes and structure. Each of the capabilities listed below constitute portal and application infrastructure functions that are necessary to support corporate portal and applications management services. These departmental services create and support computing services that allows any DHS component a level of comfort to migrate away from their current environments. Each capability is intertwined and is built on layers of functionality, with dependencies throughout.

- *Enterprise Application Integration* - DHS is supporting several information integration efforts including the Watch List and the US VISIT program. These applications build a common information bus with the support of the Solutions Engineering to ensure the active deployment of this service to the Department.
- *Application Modernization and Common Solutions* - This initiative is primarily focused on application development as well as technology tools and software used to analyze existing applications, configure Commercial-off-the Shelf (COTS) software, or build and integrate applications for the Department. In the past two years 49 projects have been requested by the OCIO. This supports Congressional, Secretarial, and components requests for services outside the normal COTS products and services, i.e., a 'Common Operating Environment (COE), that support IT infrastructure requirements that become the operating systems and hardware platforms for the department. Another infrastructure support function will be the transportation of data and information across a common mechanism, such as an Enterprise Service Bus (ESB). This creates the opportunity to have departmental interfaces using standards and best practices to allow DHS to share information without needing a new interface for each application whether it is a COTS or proprietary application. Having the ESB developed will reduce the development costs for interfaces software and the subsequent operations and maintenance for these interfaces. This also supports mission critical activities and upgrades when requested.
- *Document Management* – DHS is in the process of developing a universal document management system used by all DHS enterprise programs and their components. Funding provides requirements analysis, alternative analysis and core funding to compete and buy a document management tool for the DHS. Key programs for this effort support and include capabilities for the records management program, portal program, knowledge management program, and historian program.

Program Management Support: This initiative plans and executes an effective resource allocation program to support the IT investments of the Department. Specific characteristics of the initiative include the following:

- Support of the OCIO budget (including planning, formulation, and execution activities), development of and providing advice on budget policies and procedures, and development of metrics and performance trend analyses.
- Support of DHS IT acquisition strategy, execution, and support (including development, execution, and monitoring of the acquisition management plan), prioritization of acquisitions, management of contract technical evaluations, monitoring of contract performance, and oversight of the contract administration process.
- Compliance with the OMB policy to fully implement the Program Assessment Rating Tool (PART) reporting, monitoring Component progress and compliance with DHS performance objectives, and supporting the DHS Investment Review Process (IRP), the DHS Investment Review Board (IRB), the Joint Requirements Council (JRC), and the Enterprise Architecture Board (EAB).
- Compliance with the President's Management Agenda (PMA) and OMB policy to implement the Capital Planning and Investment Control (CPIC) control phase, Earned Value Management (EVM), and Operational Analysis (OA) reporting as required in OMB Circular A-11.
- Ensuring a portfolio management program, data and analyses is available to the OCIO to make critical decisions regarding IT investment trade-offs.

eMERGE2: The eMerge2 Program is a DHS-wide initiative to provide department-wide integrated resource management information rather than the current agency-centered models. The eMerge2 Program will equip DHS managers with the critical business information and management environment necessary to improve decision-making and service delivery (both operationally and strategically). As such, eMerge2 will eliminate stovepipes between and within components and identify opportunities to establish common business practices and architecture.

The eMerge² Program assessed and recommended methodologies that optimize investments in core resource management systems through:

- Standardized and integrated resource management data and processes
- Reduction of implementation costs by eliminating duplicative investments
- Streamlining and building repeatable processes

Human Resources Information Technology (HR IT): In 2003, a group of Human Resource Information Technology (HRIT) staff was convened to form the DHS HRIT Council that conducted research around improving and consolidating HR systems across DHS. The HRIT council included full participation from the United States Coast Guard (USCG,) the United States Secret Service (USSS,) the Transportation Security Administration (TSA,) Customs and Border Protection (CBP) and other DHS components. In FY 2004, an initial OMB 300 was submitted to support DHS' primary organizational mission for consolidating and modernizing its over 144 human resource (HR) systems into a common set of enterprise systems supporting "the business" of Human Capital across *one* DHS. The OMB 300 was approved and the Human Capital Business Systems (HCBS) team was formed under the auspices of the Chief Human Capital Officer to support the implementation of enterprise-wide HR systems in partnership with the various components. This year's budget request includes support for major modernization programs such as MAX^{HR}. The MAX^{HR} program centers on new

business rules required for “pay for performance” and includes a new performance management system.

Through leveraged resources and business practices, HCBS acquires enterprise-wide HR systems through coordination and collaboration with DHS components and CIO offices. In addition to acquisition activities, HR IT funding supports new projects and operational activities such as requirements analysis, enterprise testing, system training, and system certification and accreditation (C&A). Furthermore, HR IT funding provides support to the MAX^{HR} project through changes to the enterprise payroll and personnel systems in order to support the new MAX^{HR} pay for performance systems and policies across DHS.

Currently, HCBS has cost-effectively acquired enterprise-wide systems for:

- 1) Time & Attendance, a system that supports both time entry and labor distribution (WebTA),
- 2) PeopleSoft HR Personnel system that supports core HR processing (EmpowHR), and
- 3) Performance Management (Softscape), a system that helps to administer the new performance plans and policies for DHS.

As a cross-departmental effort pulling in support from the Department of Interior (DOI), Department of Transportation (DOT), the Department of Agriculture (USDA) and DHS, the ePayroll initiative involved the consolidation of DHS payroll systems into one payroll system at the National Finance Center (NFC). The ePayroll effort in FY 2005 involved the migration of 70,000 DHS employee records (USCG, TSA and the Federal Air Marshal Service [FAMS]) to the new payroll system, which represented a substantial portion of DHS. Not only were these employee records migrated to the new payroll system, but TSA, USCG and FAMS moved over to the new Time & Attendance and PeopleSoft personnel systems.

All HR system implementations will be deployed in a phased approach in order to leverage resources and obtain component support for each implementation activity. This approach also affords the team the ability to apply lessons learned from each phased rollout, in order to fine tune the end-state product. Planned projects in FY 2006 and FY 2007, such as eRecruitment which targets outdated recruitment processes and related HR systems with the goal to consolidate and modernize this area of HR systems and processes, continue to follow the HCBS acquisition and deployment approach.

eGov Initiatives: The eGov Program Oversight (EPO) is responsible for securing the success of meeting identified e-Gov milestones and objectives. The ultimate goal of the EPO is to ensure that the Department’s IT systems and the supporting investments are aligned and/or consolidated with eGov initiatives and lines of business (LoB) and the Federal Enterprise Architecture. The eGov Project Manager is responsible for developing policy and establishing procedures related to the requirements of the eGovernment Act of 2002, the President’s Management Agenda, and related Federal guidance. The Project Manager serves as the Department’s focal point for all matters related to the President’s Management Agenda (PMA) and e-Government initiatives and is responsible for developing and executing an eGovernment Strategic Plan. The Project Manager is also responsible for working with designated subject matter experts and selected points of contact, to ensure the Department’s eGovernment Program is in compliance with legislative mandates. In addition the project manager ensures that issues and concerns with individual projects are escalated appropriately in a timely manner and assists all parties in clearing barriers that may be prohibiting them from successfully completing their tasks in a timely manner. The EPO will be the entity responsible for coordinating the two eGov initiatives for which DHS is the Managing Partner, while working with the Managing Partners of other

initiatives and LoBs that are managed by other government agencies. Responsibilities of the EPO also include activity management, performance management, risk management, issue management, and other support activities. The EPO is responsible for responding to the Office of Management and Budget (OMB) data calls and requests.

DHS will perform a comprehensive analysis of all of its information systems in relation to eGov initiatives and LoBs. A transition strategy will be developed, in compliance with the Homeland Security Enterprise Architecture, for those services that can be delivered as a shared service by eGov initiatives. DHS will identify existing information systems that may be candidates for LoB centers of excellence. Specific eGov integration opportunities that have already been identified include the integration of GSA's eAuthentication capability with the DHS Disaster Management and eLearning programs, coordination with the Consolidated Health Informatics including EA alignment review and reporting and coordination with USA Services by conducting an inventory of DHS call centers and analyzing call center procedures.

Identity and Credentialing (Smartcard): The Smartcard program supports development and maintenance of strong, high-quality and interoperable credentials for authorized users of DHS facilities and systems, including compliance with Homeland-Security Presidential Directive (HSPD) 12, *Policy for a Common Identification Standard for Federal Employees and Contractors*. This program supports the CIO strategic goals of improving both cyber security and information sharing. The DHS strategy for digital credentials addresses physical and cyber identification with a single, interoperable Smartcard that can be recognized by building-access systems and is interoperable with DHS computer systems. The DHS strategy also provides for interoperable authentication to resources of DHS, DoD and other Federal Agencies, and first responders.

The Smartcard program will also mitigate one of the most difficult problems facing any information-services provider: maintaining a current and accurate list of authorized users. By centralizing authentication and authorization data and providing a unified single sign-on capability for validated users, the program will lower costs and improve security of information sharing.

In FY 2007, the Department will begin the first significant issuance of HSPD-12-compliant Personal Identity Verification II (PIV II) credentials, beginning with DHS headquarters card issuance pilot and enabling initial applications for cyber access using the PIV II credential.

In FY 2006, the Smartcard program will provide a minimum level of support to preserve the Federal Bridge certification of the Digital Identity Management Center (DIMC). The DIMC is the DHS Public Key Infrastructure (PKI) root certificate authority and is Federal Bridge cross-certified (a requirement for compliance with HSPD-12/FIPS 201). Currently, Immigration Customs Enforcement (ICE) is the steward for the DIMC initiative.

These smart card credentials provide strong authentication of the identification of the card bearer and proof that the credentials are still valid, i.e. they have not been revoked. Relying parties determine specific cyber and physical access controls and privileges to be granted based on the strength of the credential (medium assurance level).

COMSEC Modernization: Communications Security (COMSEC) Modernization supports the Department's activities for acquisition and fielding of replacement communications security equipment, and technical training for equipment installers, maintainers, users, and custodians. The

program provides for mandatory equipment upgrades dictated by the National Security Agency (NSA) to ensure a viable and integrated program that enables the Department to communicate securely internally and externally to federal, state and local government entities. This initiative establishes regional technical training on new COMSEC equipment used to secure transmission of the Department's classified National Security, Terrorist Threat and Intelligence Information.

COMSEC Modernization supports the acquisition and fielding of the following assets: 240 High Assurance Internet Protocol Encryption (HAIPE) upgrades for TACLANes (KG-175s) and 300 new secure DTD 2000 systems (SDS) to replace obsolete data transfer devices. In addition, DHS must obtain 20 Local Management Devices/Key Processors (LMD/KPs) and 10 Local Management Devices so that classified keying material can be shared electronically with the Components.

NSA HAIPE upgrades to the TACLANE (KG-175s) give DHS classified systems the ability to communicate internally and ensure information sharing with our business partners. Terrorist threat information will be shared electronically.

Other encryption devices are also scheduled for replacement in the near future such as RASP (used for remote access to classified networks), KG-84 data encrypters, KIV-7 ATM data encrypters, KG-194 bulk encrypters, AN/CYZ-10V3 data transfer devices, STU IIIR devices for secure teleconferencing bridges, and KY-57s for aircraft radio encryption will be handled in this program.

PPA: SECURITY ACTIVITIES

	Perm Pos	FTE	Amount
2005 Actual			\$24,816
2006 Revised Enacted			18,810
2007 Adjustments-to-Base			(13)
2007 Current Services			18,797
2007 Program Change			45,342
2007 Request			64,139
Total Change 2006-2007			45,329

CURRENT SERVICES PROGRAM DESCRIPTION:

Security Activities provides for the integration and protection of sensitive DHS information and supports the terrorist watch list integration, which establishes operational system interfaces for DHS organizations that receive data from the Terrorist Screening Center (TSC). This activity supports Homeland Security Presidential Directives (HSPDs) 6 and 11, and conforms to Executive Order 13356 (Terrorism Information Sharing Environment).

Terrorist Watch List Integration: The DHS Watch List Technical Integration Program is responsible for technology integration and limited operational support to enhance terrorist screening systems and processes in DHS. Consistent implementation of terrorist screening decreases the likelihood of missed opportunities to thwart terrorist attacks, and increases citizen satisfaction in their interaction with DHS

screeners. The DHS Watch List Integration program will provide to current and new DHS screening operations real-time, reliable, consistent and policy-compliant updated records regarding individuals known or appropriately suspected to be or have been engaged in conduct constituting, in preparation for, in aid of, or related to terrorism. The Watch List Technical Integration program will support screening operations by coordinating additional identifying information to be included in the Watch List by the National Counter-Terrorism Center (NCTC) and the TSC, or available from sources within DHS.

Information Security & Infrastructure: The Infrastructure Transformation Program (ITP) was established in the spring of 2004 as part of an effort by the DHS Secretary to centrally manage services, including information technology (IT), across all components of DHS. The primary objective of the ITP is to provide IT infrastructure products and services, enabling DHS business units to accomplish their missions. The specific requirements of the ITP are to remove lag time and complexity in accessing data, to create a platform on which to quickly launch new capabilities, and provide a cost-effective, secure, and reliable IT infrastructure. Meeting these requirements will result in improved information sharing across the Department.

In May 2004, the DHS CIO Council identified infrastructure projects for priority implementation based on the following criteria: achieving strategic goals, improving customer satisfaction, and reducing overall IT infrastructure cost. Those project service areas (domains) were Network, Data Center, Email, Help Desk and Related Services, Desktop, Site, Video, Voice, and Wireless. Upon Second Stage Review by the Deputy Secretary, the ITP and DHS CIO Council developed an operations model for these domains based upon centralized governance and oversight and decentralized execution.

Of these domains, currently four are active – Network, Data Center, Email and Video.

By accomplishing these objectives, the ITP will improve information sharing via an enterprise-wide, consolidated IT infrastructure supporting all of DHS' strategic goals and business objectives: awareness, prevention, protection, response, recovery, service and organizational excellence. Paramount to meeting DHS' strategic goals is the ability to gather, distribute and share both tactical and strategic intelligence and other information throughout the organization. Mission and business applications running on a homogeneous, integrated IT infrastructure will facilitate the sharing of data from any point to point within DHS. In addition, DHS will realize significant cost savings through the consolidation of assets as well as through procurement savings.

The ITP specifically supports two of the five objectives set by the DHS CIO:

CIO Strategic Objective #2 – Improved infrastructure and consolidation, and
CIO Strategic Objective #5 – Improved information sharing and data collaboration/integration

The DHS Infrastructure Transformation Program includes the following main business processes:

1. Oversight of the IT infrastructure base within the existing DHS components.
2. Transformation of the disparate IT infrastructure capabilities into a standardized and interoperable DHS IT infrastructure in all areas.
3. Enhancement of the DHS IT infrastructure via future capital Investments.
4. Strategic planning for the implementation of future IT infrastructure projects.

PPA: WIRELESS PROGRAM

	Perm Pos	FTE	Amount
2005 Actual			\$97,690
2006 Revised Enacted			85,140
2007 Adjustments-to-Base			1,298
2007 Current Services			86,438
2007 Program Change			0
2007 Request			86,438
Total Change 2006-2007			1,298

CURRENT SERVICES PROGRAM DESCRIPTION:

The Wireless Management Office (WMO) was established under DHS Management Directive 4100 with, "the purpose ... to set forth wireless technology policy and overall DHS goals in an effort to improve homeland security while reducing technology costs." The WMO goal is to oversee the effective operation, management, budgeting, and procurement of all department-wide wireless technology, policies performance metrics and standards for DHS as it pertains to homeland security and maritime safety. In addition, the WMO works with other federal agencies to identify common requirements and to develop and procure joint solutions that promote communications interoperable for day-to-day and emergency operations. The Wireless programs support both DHS wireless voice and data communications requirements.

In FY 2006, the WMO received funding in the following three appropriations categories:

- Replace Legacy Border Components
- New Investments in Radio Infrastructure – Borders
- Infrastructure Optimization and Upgrade

Funding associated with the three appropriations categories supports activities across key programs managed by the WMO — the Integrated Wireless Network (IWN) and Technical Operations Support (TOS). The WMO will build upon the capabilities established in prior years and continue to focus on narrowband upgrades and infrastructure consolidation initiatives. These initiatives align with funding appropriations categories and map to the FY 2006 goals and objectives of the Office of the CIO.

Replace Legacy Border Components: WMO supports the operation and maintenance (O&M) of DHS components' wireless systems nationwide, with emphasis on requirements in legacy wireless systems in the border areas. This initiative provides mission-critical tactical wireless communications support to DHS users.

New Investments in Radio Infrastructure – Borders: Activities within the New Investment in Radio Infrastructure Borders are focused on the IWN program. IWN provides system integration and related equipment, products, and services to support the modernization and upgrade of DHS components' current separate wireless communications systems. The IWN provides a more cost-

effective convergence and transition of DHS components' wireless communication environment. The IWN provides state-of-the-art, digital, encrypted, standards-based wireless communications products and services used by federal agents and officers to support their mission-critical law enforcement, protective services, homeland defense, and disaster response activities across the Nation. This initiative encompasses tactical wireless communications and the application of emerging technologies pertaining to domestic law enforcement and counter/anti-terrorist operations (including missions in the U.S. Territories), and first responders. The scope of this effort includes new tactical wireless systems and legacy systems in terrestrial, aeronautical, and maritime environments. The IWN is managed by the Joint Program Office, a collaborative initiative among the DHS, Justice (DOJ), and the Treasury.

The benefits of implementing the IWN as a joint initiative include: (1) improved interoperability through common design and standards; (2) cost savings through shared spectrum, shared infrastructure, shared operations and maintenance; and (3) economies of scale, and more favorable pricing through consolidated procurements.

IWN activities support the following FY 2006 initiatives:

Initiative 1: Expand the IWN (New Investments in Radio Infrastructure – Borders)

Initiative 2: Execute IWN acquisition strategy (New Investments in Radio Infrastructure – Borders); evaluate system integrator proposals and award the design of the IWN in the first service area (i.e., Southwest border region).

Initiative 3: Acquire wireless subscriber units and infrastructure equipment interoperable with DHS wireless standards and requirements (New Investments in Radio Infrastructure – Borders).

- Mission Essential Modernization and Upgrades – Identify, prioritize, and address components' mission-essential gaps in existing wireless capabilities.
- Acquire and deploy digital narrowband subscriber units to DHS agents and officers to enhance communications capabilities by replacing outdated analog equipment.

Initiative 4: Continue development of a wireless component of DHS Enterprise Architecture (EA) to enhance: requirements and solutions integration; configuration management; asset visibility; and tracking and reporting of program performance. Update and expand the DHS EA Technical Reference Model (TRM) to ensure standardization of wireless throughout DHS as well as to facilitate improved interoperability with other federal, state, local, and tribal entities.

Infrastructure Optimization and Upgrade: This initiative provides additional DHS WMO support to the IWN program as well as support to the TOS program. The activities are described in the following four areas.

- Operational, Technical, & Program Support – consists of the following WMO support activities:
 - Wireless Operational Support - Acquire wireless communications equipment and support for DHS headquarters elements (e.g., Homeland Security Operations Center (HSOC)) in support of contingency/crisis/disaster response operations (Infrastructure Optimization and Upgrade).

— Technical Operations Support (TOS) - Addresses the migration of body wire systems to a digital environment for the core TOS DHS components: Immigrations and Customs Enforcement (ICE), U.S. Secret Service (USSS), Federal Law Enforcement Training Center (FLETC) and the Office of Security. This digital conversion replaces clear audio transmission with Low Probability of Interception (LPI)/ Low Probability of Detection (LPD) spread spectrum technology (addressing key security vulnerability), improves range and voice clarity, and provides digital voice and metadata for improved analysis capability. Lastly, TOS addresses deployment of video and tracking tools used to conduct investigations.

Technical Investigative (TI) equipment promotes officer safety and greatly increases evidence gathering capabilities. Tactical intercept of criminal activities using body wires enables law enforcement officers to capture tangible evidence. The result of this coordinated use of TI assets is that violent crime is reduced and illegal assets are seized.

- WMO Program Support – Provides planning, communications, reporting, procurement activities, financial management, portfolio management, and other administrative support to the WMO.
- Spectrum and Frequency Management - Support to manage spectrum related activities including meetings and forums, certification requests, etc.; as well as fees paid to the National Telecommunications and Information Administration (NTIA).
- FPIC Support – Provide technical and operational support for the Federal Partnership for Interoperable Communications (FPIC).
- WMO Facilities and Asset Management– Provides resources towards WMO facilities, IT infrastructure upgrades, and other asset management support efforts.

Spectrum Relocation: In December 2004, the Congress passed and the President signed the Commercial Spectrum Enhancement Act (CSEA, Title II of P.L. 108-494), requiring the relocation of Federal systems from certain spectrum bands to accommodate non-Federal use, and creating the Spectrum Relocation Fund (SRF) to facilitate reimbursement to affected agencies of relocation costs. The National Telecommunications and Information Administration (NTIA) are tasked with coordinating agency relocation. OMB is tasked with administering the SRF.

PPA: HOMELAND SECURE DATA NETWORK

	Perm Pos	FTE	Amount

CURRENT SERVICES PROGRAM DESCRIPTION:

The Homeland Secure Data Network (HSDN) is a classified wide-area network for DHS and its components, with specific and controlled interconnections to the intelligence community and federal law enforcement resources. HSDN provides a pathway for secure information to reach federal agencies that are involved in homeland security. With HSDN capabilities, DHS has the ability to collect, disseminate and exchange both tactical and strategic intelligence information throughout DHS and DHS partners.

During FY 2005, HSDN achieved Initial Operational Capability and Interim Authority to Connect by building the core system network (i.e. wide area network, primary data center, help desk, network and security operations centers); fielding approximately 56 DHS component field sites; and establishing connection to the Secret Internet Protocol Routed Network (SIPRNet). The FY 2006 current program base maintains and builds upon HSDN capabilities deployed during FY 2005. The current base provides for:

- Operations and maintenance of the core system network (i.e. wide area network, primary data center, help desk, network and security operations centers) and an installed base of DHS component field sites, consisting of approximately 60 sites and 540 seats.
- Performing necessary updates and technology improvements to the baseline HSDN system in order to improve system availability, customer service/satisfaction and to comply with established service level agreements. Includes special projects such as organizational messaging and redundant SIPRNet connections.
- Continuing the transition of DHS legacy secret sites into the HSDN system capabilities and deployment of additional HSDN field sites to DHS components.
- Continuing efforts to increase the end-user base through outreach to Other Government Agencies (OGAs) at the Federal and State government levels.
- Improvement in overall system-wide operational costs and efficiencies to reduce overall system life cycle costs.
- Maintaining effective program management oversight to ensure that HSDN complies with DHS, OMB and Congressional mandates.

The HSDN system will provide key benefits/outcomes toward supporting homeland security. These benefits/outcomes include:

- Access to secure, classified data and information for conducting daily operations of surveillance, monitoring, interdiction, situational awareness, predictive analysis and decision making, emergency management, and federal law enforcement associated with homeland security.
- A reliable and scaleable network capable of supporting the growth and evolution of the DHS mission.
- A secure, classified network that meets Certification and Accreditation (C&A) for classified information systems and meets all DHS system security policies, processes, standards procedures and direction.

- Consolidating stove-piped, outdated and inefficient legacy secret-classified networks into a single infrastructure that modernizes and streamlines the classified data capabilities of DHS. This infrastructure consolidation facilitates high quality and high-value classified data communication and collaboration within DHS and with other federal agencies and organizations.

IV. Program Justification of Changes

**Department of Homeland Security
Office of the Chief Information Officer
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Information Security & Infrastructure

Strategic Goal(s) & Objective(s): 7.3: Continually improve our way of doing business
PPA: Security Activities

Program Increase: Positions 0 FTE 0 Dollars \$36,342

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	8,910
Program Increase							0	0	36,342
Total Request	0	0	\$9,000	0	0	\$8,910	0	0	45,252

Description of Item

In FY 2007, the OCIO Information Security and Infrastructure account program increase of \$36,342,000 will fund Department IT Infrastructure Transformation Program (ITP) capital investments. The additional funds will support the integration of DHS IT infrastructures of the 22 legacy components into "One Infrastructure" and will eliminate duplicative infrastructures and provide common capabilities and services for all components to leverage.

In FY 2007, the ITP will leverage the increase in funds to improve the telecommunications capabilities of the National Center for Critical Information Processing and Storage. Funds will also be used to build-out the infrastructure required to support an enterprise-wide active directory and email system focused on easing administrative overhead while improving DHS' ability to oversee the capability from a central point and at the same time supporting local control.

Also in FY 2007, the ITP will leverage the increase in funds to implement an active-active Security Operations Centers (SOC) environment by completing the build-out of a second SOC, along with continuing our effort to implement an active-active Network Operations Center (NOC) environment by investing in the development of a second NOC. The ITP will also finalize the initial build of a test lab/modeling environment, which will be used to ensure acceptable network performance levels are maintained as DHS continues to move towards "One Infrastructure."

Justification

The \$36,342,000 increase in the FY07 request is required to fund new investments in the IT Infrastructure Transformation Program (ITP), which will integrate the Department's IT infrastructure in a manner consistent with the Deputy Secretary's recent directive (see attached memorandum dated 7/11/2005). The ITP is a DHS Level 1 investment (>\$50 million and critical to the Department) with the objective to achieve "One Infrastructure," which is consistent with DHS' Strategic Planning

Priority #1: "Stronger Information Sharing and Infrastructure Protection." The ITP projects a 10 percent return on investment over the ten year lifecycle of the investment.

The \$36,342,000 increase will be used for investments in establishing the Department's enterprise capabilities to include development of an enterprise wide user authentication capability into mission and enterprise applications through the email services project, and continue building out an enterprise network and security operations center environment and completion of a test lab/modeling environment in the network services project.

Funding will be applied to investments in establishing a common IT infrastructure environment within the network, email, and data center services areas. These investments will enable DHS to host multiple mission-specific and enterprise applications. In addition, it will serve as the foundation for information sharing and agile responses to threats against the homeland and provide universal access to DHS users.

ITP investments will incorporate requirements outlined in the security architecture established by the Information Security Program.

Impact on Performance (Relationship of Increase to Strategic Goals)

The ITP directly supports Strategic Goal 7.2: Integrate legacy services within the Department to improve efficiency and effectiveness and the DHS' FY 2005 Strategic Planning Priorities #1: Stronger Information Sharing and Interoperability and #7: 21st Century Department—One Network. The increase in FY 2007 Information Security and Infrastructure funds for the ITP will result in better performance of IT infrastructure assets through improved enterprise network reliability, availability, maintainability and survivability and will serve to improve DHS' information sharing capability with other Federal, state, local, and tribal governments and first responders.

Following the investment of FY2007's fund increase, the capability for improving the operations and maintenance of standardized systems will increase and lead to the reduction of the time and practices associated with responding to trouble calls and the lowering of costs by taking advantage of continuous improvements in cost and capacity in the technology industry.

Failure to fund this fund increase would impact the Department's ability to establish a common IT infrastructure environment upon which critical DHS programs such as USCG's Rescue 21, and US VISIT's screening capability, rely on to provide the foundation they will leverage to satisfy mission objectives. This failure to fund the increase would severely handicap the Department's ability to carry out mission objectives by not leveraging information collected and validated at a single entry point throughout the enterprise. This requires additional resources to duplicate record entry as well as overhead to ensure the accuracy and reliability of the information. It would also result in the inability of the program office to oversee the implementation of a program that is critical to DHS' communications response in case of a catastrophic or terrorist event.

Program Increase 2: Data Center Development

Strategic Goal(s) & Objective(s): 7.3: Continually improve our way of doing business
 PPA: Security Activities

Program Increase: Positions 0 FTE 0 Dollars \$9,000

Description of Item

The Infrastructure Transformation Program (ITP) was established in the spring of 2004 as part of an effort by the DHS Secretary to centrally manage services, including IT, across all components of DHS. The primary objective of the ITP is to provide IT infrastructure products and services, enabling DHS business units to accomplish their missions. The specific requirements of the ITP are to remove lag time and complexity in accessing data, to create a platform on which to quickly launch new capabilities, and provide a cost-effective, secure, and reliable IT infrastructure. Meeting these requirements will result in improved information sharing across the Department. As such developing Data Center capabilities plays a critical role within the ITP.

The objective of the Data Center Development is to establish an environment upon which DHS will be able to co-locate and consolidate mission-specific and enterprise applications from sixteen data centers down to two as well as support new requirements as they arise.

Justification

The \$9,000,000 increase will enable the ITP to continue on a minimal level of effort to build-out useable floor space for hosting applications within the National Center for Critical Information Processing and Storage (NCCIPS) to support the enterprise data management needs of the Department. This funding is required to continue the build-out of the Department's initial Data Center which provides the foundation for information sharing and agile responses to threats against the homeland.

Failure to fund this requirement would severely impact the Department's ability to establish a common IT infrastructure environment upon which critical DHS programs such as, US VISIT's screening capability.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase will support the build out of an additional 8% of the Department's initial Data Center and increase the Data Center's total completion percentage to 68% in FY 2007.

The ITP directly supports Strategic Goal 7.3: Continually improve our way of doing business and the DHS' FY 2005 Strategic Planning Priorities #1: Stronger Information Sharing and Infrastructure Protection. The Department's efforts in this area have already been hampered due to the impact hurricane Katrina had on the build out of the NCCIPS facility, resulting in a critical shortage of floor

2772

space to host these systems. Failure to fund this increase would perpetuate the Department's lack of Continuity of Operations (COOP) capability as identified in DHS Inspector General reports and compromise the Department's communications response in case of a catastrophic or terrorist event.

PPA Mission Statement

A crosscutting program that provides technology-management, shared services, acquisition strategy, executive leadership support, process development, and business transformation to several offices within the DHS Office of the CIO.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$9,608	\$14,743	\$16,525	\$1,782

Salaries and Benefits includes costs for 83 FTEs. The FY 2007 change is due to an inflationary increase.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Travel	\$236	\$315	\$315	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$21	\$22	\$23	\$1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 change is due to an inflationary increase.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
GSA rent	\$0	\$1,482	\$1,487	\$5

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Other Rent	\$14	\$15	\$15	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Enacted</u>	<u>Request</u>	<u>Change</u>
Communication, Utilities, and miscellaneous charges	\$111	\$19,929	\$20,106	\$177

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Enacted</u>	<u>Request</u>	<u>Change</u>
Printing	\$0	\$30	\$30	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Enacted</u>	<u>Request</u>	<u>Change</u>
Advisory and Assistance Services	\$23,179	\$14,775	\$15,933	\$1,158

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Enacted</u>	<u>Request</u>	<u>Change</u>
Other Services	\$1,937	\$2,307	\$2,400	\$93

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$20,829	\$14,143	\$14,971	\$828

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$227	\$238	\$248	\$10

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Supplies & materials	\$129	\$135	\$141	\$6

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Equipment	\$10,194	\$6,865	\$7,327	\$462

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 change is due to an inflationary increase and technical adjustment.

PPA Mission Statement

A set of programs that provide for the integration and protection of sensitive DHS information.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$35	\$27	\$90	\$63

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 change is due to technical adjustments and program increases.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
GSA rent	\$0	\$371	\$1,199	\$828

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$0	\$4,283	\$4,168	(\$115)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 change is due to a change in the Working Capital Fund.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$18,996	\$9,744	\$43,796	\$34,052

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 change is due to technical adjustments and program increases.

PPA Mission Statement

A program whose mission it is to ensure the effective operation, management, budgeting, and procurement of all wireless technology department-wide, and the development of policy and wireless program performance metrics and standards for DHS.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$32	\$28	\$28	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
GSA rent	\$0	\$1,684	\$1,616	(\$68)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 change is due to an inflationary increase and technical adjustment.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$5	\$4	\$4	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$12,640	\$9,321	\$9,534	\$213

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 change is due to an inflationary increase.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Other Services	\$869	\$757	\$768	\$11

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 change is due to an inflationary increase.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$53,317	\$46,411	\$47,137	\$726

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 change is due to an inflationary increase.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$25	\$22	\$22	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$18,452	\$16,064	\$16,313	\$249

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 change is due to an inflationary increase.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Supplies & materials	\$50	\$44	\$44	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

2794

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Equipment	\$9,411	\$8,193	\$8,320	\$127

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 change is due to an inflationary increase.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Land & Structures	\$3,000	\$2,612	\$2,652	\$40

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2007 change is due to an inflationary increase.

TABLE OF CONTENTS

I. STRATEGIC CONTEXT FOR FY 2007 BUDGET

- A. Mission and Description of the Office of the Chief Information Officer 1
- B. Major Activities and Key Strategic Issues 1
- C. Resources Requested and Performance Impact 4
- D. How the Office of the Chief Information Officer Performance Goal Aligns to and Supports the DHS Strategic Plan Objectives. 5
- E. Performance Based Budget Highlights by Program 5
- F. Digest Tables by FYHSP Programs 6

A. Mission and Description of the Office of the Chief Information Officer

The Department of Homeland Security (DHS) Office of the Chief Information Officer (OCIO), in collaboration with the DHS Chief Information Officer (CIO) Council, is responsible for implementing the necessary programs to align the Information Technology (IT) organization, including all of the systems and infrastructure, to support the missions and activities across the Department and within each of the Components.

Under the leadership of DHS OCIO, IT will speed the transformation of the Department into a high-performance, highly integrated organization by providing the right technologies and systems. This transformation will collapse silos of information delivery resources into an enterprise-level delivery capability that meets DHS and Components missions, business, and IT requirements. To that end, the DHS OCIO and the CIO Council are committed to providing the following:

- A secure means of sharing appropriate information to all internal and external stakeholders;
- A set of advanced tools that enables the DHS workforce to rapidly and efficiently process, retrieve, deliver, and share information;
- A single, DHS-wide IT infrastructure environment that is reliable, scalable, flexible, maintainable, and secure;
- A clear set of performance metrics and efficient business processes;
- IT standards and frameworks that provide for integration;
- A single, consistent IT governance model;
- An enterprise-wide IT delivery capability, and;
- A mature and fully detailed Enterprise Architecture.

B. Major Activities and Key Strategic Issues

a. Major Activities

The OCIO program is divided into five subprograms: Salaries and Expenses, Information Technology Services, Security Activities, Wireless Program and Homeland Secure Data Network. The OCIO provides a myriad of Information Technology related services and support throughout the Department of Homeland Security. The most significant accomplishments for FY 2005, FY 2006 and FY 2007 include:

FY 2005 accomplishments:

Salaries and Expenses

- Completed the Department's first inventory of DHS' IT systems.
- Established the Continuity of Operations (COOP) site located at a hardened location for activation in case of a man-made or natural disaster.

OCIO-1

- Completed a "Volume Purchase Agreement" contract with Oracle Corporation, which greatly reduces prices and software maintenance cost.
- Designed policies to ensure that our computer systems are accessible to disabled consumers and employees.
- Aligned approximately \$2 Billion worth of investments to the new portfolio management framework.
- Negotiated a bridge extension to the Information Technology Managed Services (ITMS) contract to provide unclassified local area network (LAN) support for engineering, security, application and end user services resulting in significant savings.

Information Technology Services

- The OMB ranked the Homeland Security (HLS) Enterprise Architecture (EA) version 2 in the top Seven (7) of federal agencies (OMB addresses the maturity and the degree that the EA is utilized in the agency in this assessment).
- Established an interim Data Center for Enterprise Solutions.
- Finalized the Enterprise Architecture (EA) for the Detention & Removal functions of the Secure Border Initiative, People Screening and the Common Operational Picture for Homeland Security Operation Center (HSOC).
- 215,000 collaborative and Intranet weekly users accessed our network with 99.7 percent availability.
- Aligned 40 programs with the Homeland Security EA.
- Deployed the initial core of the DHS OneNet, which will allow the shutdown of the individual component networks resulting in significant savings.
- Built the primary Network Operation Center (NOC) and Security Operation Center (SOC) to monitor OneNet performance, thus eliminating six other NOCs and SOCs within the Department.

Security Activities, Wireless Program

- Reduced the backlog of radio frequency assignment renewals from over 3,000 to 8.
- Established support services for 33K Secret Communication users.
- Completed a joint DHS/DOJ interoperable Integrated Wireless Network (IWN) system in Seattle/Blaine, WA.

Homeland Secure Data Network

- Fielded 56 Secret Homeland Secure Data Network (HSDN) sites and completed connecting HSDN to the DoD's Secret Internet Protocol Routed Network (SIPRNET).

FY 2006 Planned Accomplishments:

In FY 2006, the OCIO received \$294.257 million and will use these funds to achieve the following high-level accomplishments.

Salaries and Expenses

- Complete 85% of IT projects within 10% of the cost and schedule dates.
- Process Capital Asset Plan and Business Case Exhibit 300s with 100% being marked Green (acceptable) by Office of Management and Budget (OMB).

- Realize \$15M in savings from the consolidation of the Infrastructure and the Screening Portfolios.
- Complete 85% of the OMB's Electronic Government (eGov) alignment milestones.
- Migrate 30% of eligible IT contracts to enterprise contract vehicles.

Information Technology Services

- Achieve a 100% Technical Reference Model (TRM) Selection and 5% reduction in DHS Data Center Operations Costs & GIS Software Costs.
- Increase the interoperability of DHS data across components by 30%.

Security Activities, Wireless Program

- Develop and meet all project milestones for the Wireless Management Office and Integrated Wireless Network (IWN) project plan; including designing a Concept of Operations (CONOPS) for both wireless and emergency tactical communications.

FY 2007 Projected Accomplishments:

Salaries and Expenses

- Consolidate IT support for the unclassified, secret, and top secret LANs into a single vendor to achieve improvements in service delivery while reducing costs for operations and maintenance.
- Extend the Headquarters (HQ) Metropolitan Area Network to support additional DHS components, including Customs and Border Protection (CBP), Transportation Security Administration (TSA), and United States Secret Service (USSS), eliminating overlapping network assets.
- Build out unclassified and Sensitive Compartmented Information Facilities (SCIF) in support of DHS directorate operational and continuity of operations needs, and conduct planning and requirements for development of the new DHS HQ location.

Information Technology Services

- Standardize and consolidate GIS software, data, and data warehouse investments to achieve operating efficiencies and synergies in mission data.
- 90% of DHS Level 1, 2 and 3 IT initiatives within 10% of cost and schedule variance.
- 90% of OMB eGov alignment milestones achieved.
- 40% of eligible contracts migrated to enterprise contract vehicles.

Security Activities, Wireless Program

- Migrate CBP, Federal Emergency Management Agency (FEMA), Federal Law Enforcement Training Center (FLETC), DHS HQ, Science and Technology (S&T), United States Coast Guard (USCG) and (1) Operations and Analysis and (2) Preparedness to OneNet.
- Complete construction of the National Center for Critical Information Processing and Storage (remaining 20K sq ft for a total of 100K sq ft.). Complete at least 20k sq feet of second data center, and begin migration of systems into DHS Data Center Environment.
- Mitigate all Plan of Actions and Milestones (POA&Ms) and IT material weaknesses identified in FY 2005 and FY 2006.

b. Key Strategic Issues

The Department continues to overcome challenges related to IT resource allocation and prioritization of supported operational initiatives. To ensure the right people have the right information at the right time, the DHS OCIO has established the following five strategic objectives:

1. Improve project management and alignment of budget and enterprise architecture;
2. Improve infrastructure and consolidation;
3. Continue cyber security improvements;
4. Transition projects into actions and operations; and
5. Improve information sharing and data collaboration/integration.

Accomplishing these priorities will significantly enhance the Department's ability to seamlessly share information, integrate business processes and leverage information technology to increase mission effectiveness and transform the 22 component organizations into "One DHS".

C. Resources Requested and Performance Impact

In FY 2007, the OCIO is requesting a total of 87 FTE (78 FTE in FY 2006) and \$323.765 million (\$294.257 million in FY 2006) for the following areas: Salaries and Expenses - \$79.521 million (\$74.999 million in FY 2006), Information Technology Services - \$61.013 million (\$82.609 million in FY 2006), Security Activities - \$64.139 million (\$18.810 million in FY 2006), Wireless Program - \$86.438 million (\$85.140 million in FY 2006) and Homeland Secure Data Network - \$32.654million (\$32.699 million in FY 2006).

To align the OCIO resources to the OCIO and DHS mission, the total program change in FY 2007 is 9 positions, 9 FTE and \$29.508 million. This includes an adjustment-to-base of 9 positions, 9 FTE and (\$15.824) million and program changes totaling \$45.342 million.

The adjustment-to-base includes inflation, transfers and technical adjustments. Adjusted inflation is \$.301 million and \$2.065 million for pay and non-pay respectively. Transfers are 3 positions, 3 FTE and \$.412 million transfer in from the Under Secretary of Management (USM), Business Transformation Office (BTO) resulting from a 2SR (Second Stage Review) FTE realignment and (\$17.820) million out of the OCIO in support of eMERGE2. Technical adjustments include; 4 positions 4 FTE, derived from the approved FY 2005 Geospatial reprogramming, 2 positions 2 FTE for the Homeland Secure Data Network and \$3.066 million within Salaries and Expenses and (\$3.858) million within Information Technology Services.

To improve mission capability, the OCIO is requesting \$45.342 million for program increases over the current services level. Program increases include \$36.342 million for Information Security & Infrastructure and \$9.000 million for Data Center Development. Improved performance expected from program increases are addressed in the Congressional Justification, section IV. Program increases support the OCIO mission to transform legacy systems and infrastructure into a Department-wide information security certified and accredited organization that ensures information security, reliable data exchange and disaster recovery.

OCIO-4

D. How the Office of the Chief Information Officer Performance Goal Aligns to and Supports the DHS Strategic Plan Objectives.

The following lists the OCIO performance goal, followed by the DHS strategic objectives supported.

Office of the Chief Information Officer – The Department of Homeland Security components and stakeholders have world class information technology leadership and guidance enabling them to efficiently and effectively achieve their vision, mission, and goals.

- 1.1: Gather, fuse, and analyze all terrorism and threat related intelligence.
- 7.3: Continually improve our way of doing business.

E. Performance Based Budget Highlights by Program

For the OCIO, the performance goal, performance measure, budget including allocation of non-programmatic overhead, and FTE are:

Performance Goal: The Department of Homeland Security components and stakeholders have world class information technology leadership and guidance enabling them to efficiently and effectively achieve their vision, mission and goals.					
Measure: The percentage of major IT projects that are within 10% of cost/schedule/performance objectives.	Fiscal Year	FY2004	FY2005	FY2006	FY2007
	Target	Baseline	70%	85%	90%
	Actual	52%	81%		
Program: Office of the Chief Information Officer	\$ Thousands	\$265,047	\$275,270	\$294,257	\$323,766
	FTE	78	82	78	87

iii. Status of Congressionally Requested Studies and Reports

Department of Homeland Security
Analysis and Operations

Status of Congressionally Requested Studies, Reports, and Evaluations

1. Conference Report 109-241, page 40 directs the Department to submit a detailed expenditure plan for Analysis and Operations describing the intended use of this funding. The plan shall be provided no later than 60 days from the date of enactment of this Act. The work is ongoing and target date to the Committee is February 29, 2006.
2. Conference Report 109-241, page 40 directs that the Secretary shall submit to the Committee on Appropriations no later than February 10, 2006 a report that identifies staffing and other resource requirements that reconciles the Department's intelligence mission responsibilities under the various Acts and executive orders. Target response to Committee is February 10, 2006.
3. House Report 109-79, page 103 directs the Department to review the mission and functions of IAIP in light of the passage of the Intelligence Reform and Terrorism Prevention Act of 2004, the creation of NCTC and TSC, and provide a report on the future role IAIP will have in the intelligence community. The Department should include in this review how they reconcile the requirements of the Homeland Security Act of 2002, with those in the Intelligence Reform and Terrorism Prevention Act of 2004 and any recommended changes in IAIP's focus or mission, staffing and organizational structure. Target response to the Committee is February 10, 2006.
4. House Report 109-79, page 108 directs IAIP to provide a report on the implementation of HSIN, including who is connected, what training and outreach is provided, and what types of information is shared. The work is ongoing and the target response to the Committee is February 10, 2006.

BUDGET REQUEST AND SUPPORTING INFORMATION**ANALYSIS AND OPERATIONS****I. Appropriation Overview****A. Mission Statement for Analysis and Operations:**

The Analysis and Operations account provides the resources to improve the analysis and sharing of threat information. This account supports the activities of the Office of Intelligence and Analysis and the Directorate of Operations. Even though these two offices are different and distinct in their missions, they work together to improve intelligence, information sharing, and coordination. In addition, these offices work with DHS to develop specific protective measures and countermeasures to these threats. In FY 2005, as part of the second Stage Review, DHS transferred monitoring resources such as the Homeland Security Operations Center and the intelligence activities of the Information Analysis and Infrastructure Protection (IAIP) Directorate to Analysis and Operations. Funding for legacy intelligence and monitoring activities are now funded in this account.

B. Budget Activities:

Office of Intelligence and Analysis (I&A) I&A leads the DHS Intelligence Enterprise and is responsible for the Department's intelligence and information gathering and sharing capabilities for and among all components of DHS. The Assistant Secretary for Intelligence & Analysis (ASIA) leads I&A, and is also the Department's Chief Intelligence Officer (CINT) reporting directly to the Secretary. I&A ensures that information is gathered from all relevant DHS field operations and is fused with information from other parts of the Intelligence Community to produce accurate, timely and actionable analytic intelligence products and services for DHS stakeholders.

Directorate of Operations The Directorate's mission is to disseminate threat information, provide domestic situational awareness, perform incident management, and to ensure operational coordination among the DHS components with specific threat responsibilities. Many of these functions are performed through the Homeland Security Operations Center. The Directorate of Operations works with component leadership and other federal partners to translate intelligence data and policy into actions, and to ensure that those actions are joint, well-coordinated and executed in a timely fashion.

C. Budget Request Summary:

The Analysis and Operations account requests 487 positions, 475 FTE and \$298,663,000 for the FY 2007 Request. The total adjustments-to-base is 57 FTE and \$16,559,000. The program increases include 24 positions, 12 FTE, and \$29,164,000.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

OFFICE OF INSPECTOR GENERAL
AUDITS, INSPECTIONS & INVESTIGATIONS PROGRAM

I. Appropriation Overview

The DHS Office of Inspector General (OIG) was established by the *Homeland Security Act 2002* (P.L. 107-296), by amendment to the *Inspector General Act of 1978*. The Inspector General (IG) has a dual reporting responsibility, to the Secretary of Homeland Security and to the Congress. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations.

A. Mission Statement for the Office of Inspector General:

The IG is responsible for conducting and supervising audits, investigations, and inspections relating to the programs and operations of the Department. The OIG examines, evaluates and, where necessary, critiques these operations and activities, recommending ways for the Department to carry out its responsibilities in the most economical, efficient, and effective manner possible.

In addition, the OIG is responsible for the oversight of the management and expenditures of all contracts, grants, and governmental operations related to the on-going hurricane relief efforts. This oversight is to be accomplished through internal control reviews and contract audits to ensure appropriate control and use of disaster assistance funding. The OIG will ensure this oversight encompasses an aggressive and on-going audit and investigative effort designed to identify and address fraud, waste, and abuse as early as possible. The OIG will also coordinate audit activities of other inspectors general, who oversee funds transferred to their respective departments and agencies by FEMA to aid in disaster relief assistance.

B. Budget Activity:

Audit, Inspections & Investigations Program - The OIG has one budget activity which consists of the following components:

Executive Office: This office consists of the IG, the Deputy IG, a congressional liaison and media affairs officer, and support staff. It provides executive leadership to the OIG with eight full-time equivalent (FTE) employees.

Office of Counsel to the Inspector General: The Office of Counsel to the IG provides legal advice to the IG; supports audits, inspections, and investigations by ensuring that applicable laws and regulations are followed; is the OIG's designated ethics office; manages the OIG's *Freedom of Information Act* and *Privacy Act* responsibilities; and furnishes attorney services for the issuance and enforcement of

OIG subpoenas, *False Claims Act* and *Civil Monetary Penalty Act* claims, as well as suspension and debarment actions. The office has 12 FTE.

Office of Audits: The Office of Audits conducts and coordinates audits and program evaluations of the management and financial operations of DHS. Auditors examine the methods employed by agencies, bureaus, grantees, and contractors in carrying out essential programs or activities. Audits evaluate whether established goals and objectives are achieved and resources are used economically and efficiently; whether intended and realized results are consistent with laws, regulations, and good business practice; and whether financial accountability and the reliability of financial statements are ensured. The office has 215 FTE, of which 40 are currently detailed to the Office of Gulf Coast Hurricane Recovery.

Office of Gulf Coast Hurricane Recovery: The Office of Gulf Coast Hurricane Recovery is responsible for providing an aggressive and ongoing audit and investigative effort designed to ensure that disaster relief funds are being spent appropriately, while identifying waste, fraud, and abuse as early as possible. The office works to ensure accountability and to prevent problems before they occur. The focus is weighted heavily toward prevention, including reviewing internal controls; and monitoring and advising Department officials on contracts, grants, and purchase transactions before they are approved. The office also meets with applicants, contractors, and grantees to advise them of the requirements and assess their capability to account for the funds. Approximately 100 permanent and temporary employees will be dedicated to Gulf Coast Hurricane Recovery operations during FY 2006.

Office of Inspections and Special Reviews: The Office of Inspections and Special Reviews complements the work of the OIG by providing quick and less structured reviews of those DHS programs and operations that are of pressing interest to Department managers, the Congress, or the IG. This office has 41 FTE.

Office of Information Technology: The Office of Information Technology conducts audits and evaluations of DHS' information management, cyber infrastructure, and systems integration activities. The office reviews the cost effectiveness of acquisitions, implementation, and management of major systems, and telecommunications networks across DHS. In addition, it evaluates the systems and related architectures of DHS to ensure they are effective, efficient, and implemented according to applicable policies, standards, and procedures. The office also assesses DHS' information security program as mandated by the *Federal Information Security Management Act* (FISMA). This office has 41 FTE.

Office of Investigations: The Office of Investigations conducts investigations into allegations of criminal, civil, and administrative misconduct involving DHS employees, contractors, and grantees. This office examines specific allegations, reports, or other information indicating possible violations of laws or regulations. Additionally, it monitors the investigative activity of the Department's various internal affairs offices. This office has 189 FTE, approximately 20 of whom are dedicated to the work generated by Hurricanes Katrina and Rita.

Office of Administration: The Office of Administration provides critical administrative support functions, including OIG strategic planning; development and implementation of administrative directives; the OIG's information and office automation systems; budget formulation and execution; and oversight of the personnel, procurement, travel, and accounting services provided to the OIG, on a

reimbursable basis, by the Bureau of Public Debt. The office also prepares the OIG's annual performance plans and the Semiannual Reports to the Congress. This office has 34 FTE.

FY 2005 Accomplishments:

- During fiscal year 2005, the OIG issued 52 management reports (audits and inspections). In addition, we issued 53 audit reports on grants and contracts, and processed 208 reports on DHS programs that were issued by other organizations. As a result of these efforts, \$58.7 million of questioned costs were identified, of which \$26.7 million were determined to be unsupported. Additionally, audit recoveries totaled \$24.5 million. The OIG is most pleased, however, with the positive response our reports have received from Departmental management. This is demonstrated by the fact that management has concurred with over 90% of our recommendations.
- In the investigative area, we issued 498 reports. Our investigations resulted in 200 arrests, 135 indictments, and 109 convictions. Our investigators closed 639 investigations and 12,219 complaints received through the hotline. Additionally, investigative recoveries, fines, restitutions and administrative cost savings totaled \$97.7 million.

C. Budget Request Summary:

The OIG is requesting 548 positions, 545 FTE, and \$96.185 million for FY 2007. The adjustments-to-base are 0 positions, 0 FTE and \$1.558 million. The program increases include 10 positions, 5 FTE, and \$12.44 million.

- Gulf Coast Hurricane Oversight - The funding will allow the OIG to continue its oversight of contracts, grants, and governmental operations related to hurricane relief. Specifically, the OIG, will: monitor operations at the FEMA Emergency Operations Center to stay current on all disaster relief operations and provide on-the-spot advice; provide advice and perform proactive procedures related to the joint field offices' internal activities to ensure the appropriate control and use of FEMA funds; coordinate with the respective Federal, state, and local law enforcement agencies and prosecutors; handle allegations received through a single, OIG-wide, hurricane relief fraud hotline; work with the Attorney General's Hurricane Fraud Task Force; review the administration of major contracts awarded with hurricane-relief funds to ensure that appropriate Federal acquisition regulations are being adhered to, and that expenditures are necessary and reasonable; provide continuous oversight of FEMA's control environment, financial and operational processes, and the effectiveness of internal controls to identify financial reporting issues early; and, closely monitor FEMA's approval of public assistance projects. (0 positions, 0 FTE, and \$11 million)
- Personnel and Contract Support - The additional resources will help the Office of Investigations to facilitate the expeditious resolution of incoming allegations of criminal conduct or egregious administrative misconduct on the part of DHS employees, contractors, and grantees. The additional resources will also allow the Office of Audits to provide needed audit coverage in high priority areas such as the Department's major procurement efforts (e.g., MaxHR, Deepwater, US-VISIT, UNISYS, and ACE). (10 positions, 5 FTE, and \$1.44 million)

III. Current Services Program Description by PPA

Department of Homeland Security
OFFICE OF INSPECTOR GENERAL

2007 Request	548	545	96,185
Total Change 2006-2007	10	5	13,998

The OIG requests \$96.2 million for FY 2007, an increase of \$14 million over FY 2006. \$11 million of the requested increase is associated with Gulf Coast Hurricane Recovery. At the end of FY 2005, the OIG received \$15 million in supplemental funding to investigate and audit recovery activities related to Hurricane Katrina. This funding will be used to support OIG efforts in FY 2006. The requested funding for FY 2007 will enable the OIG to continue its investigation and audit efforts into FY 2007 and expand OIG's scope to include all of the hurricanes that affected the Gulf Coast during 2005.

CURRENT SERVICES PROGRAM DESCRIPTION:

The OIG's key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations;
- Conduct and supervise audits, investigations, and reviews relating to the Agency's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other Federal, state, and local governmental agencies, and non-governmental entities regarding the mandated duties of the IG;
- Inform the Secretary of the DHS and the Congress of serious problems and recommend corrective actions and implementation measures;
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO); avoid duplication of GAO activities; and
- Report violations of Federal criminal law to the U.S. Attorney General.

FY 2007 performance will be similar to the expected FY 2006 performance which is described below.

- **Audit** -The OIG plans for FY 2006 include issuing 30 program and financial audits in process at the end of FY 2005, as well as 23 new program audits that are to be initiated in FY 2006. It is anticipated that 30 grant audits will be issued. The OIG will continue to work closely with DHS management and Congressional oversight committees to identify potential audit work that will promote the effectiveness, efficiency, and economy of Departmental programs and operations.
- **Information Technology (IT)** - In FY 2006, OIG's IT office will evaluate the Department's progress in establishing a cost-effective and secure IT infrastructure. Specifically, the IT office will assess the progress DHS is making in consolidating its myriad networks and implementing a standard IT platform across the Department. In addition, OIG will evaluate the U.S. Coast Guard's Deepwater program to determine if it is following sound IT systems development and procurement practices. OIG will also assess DHS' data mining efforts to determine if they comply with security and privacy laws, policies, and procedures, and will evaluate the effectiveness of efforts to improve information sharing with state and local governments through the Homeland Secure Information Network. Further, OIG will conduct a series of reviews addressing the security aspects of laptop computers, radio frequency identification devices, and the Transportation Worker Identification Credentialing program. Finally, the IT office will assess DHS efforts to address significant deficiencies identified in the IT security program by ensuring that progress is made in developing components' plans of action and milestones; ensuring that security policies and procedures are implemented Department-wide; and ensuring that all systems are adequately certified and accredited.
- **Office of Inspections and Special Reviews (ISP)** - This office's resources are employed to evaluate the effectiveness and vulnerabilities of DHS programs. ISP emphasizes reviews of DHS operations involving intelligence information management, infrastructure protection and mitigation, and the screening of foreign travelers. In addition to FY 2006 work surveying DHS intelligence components, ISP oversees DHS compliance with E.O. 12333 (intelligence on US persons) and reports quarterly to the President's Intelligence Oversight Board. ISP also will report on the incorporation of threat and risk based assessments into DHS' port security grant program. With respect to infrastructure protection and mitigation, ISP will review the National Asset Data Base and DHS' inventorying of critical infrastructure/key resources. In addition, ISP will examine DHS' coordination with other Federal agencies having cognizance for public sectors under the Emergency Support Functions of the National Response Plan; for example, DHS' work with the United States Department of Agriculture and the Food and Drug Administration regarding protection of the Food Sector. With respect to border screening, ISP has reported on and will continue to study aspects of DHS' role in visa integrity matters, remote surveillance technologies, and land border and maritime enforcement strategies. Lastly, ISP completed a special review on whether Immigration and Customs Enforcement and Customs and Border Protection should be merged; that review generated recommendations to DHS that will be the subject of a follow-up review in FY 2006. ISP also will complete a special review of FEMA's preparation for and response to Hurricane Katrina. ISP is also designed to provide a quick response capability for the IG and DHS management when new controversies arise or as new DHS program initiatives may warrant.

- Investigations - The office will conduct internal inspections of the OIG Office of Investigations' Chicago, Miami, San Diego, and Dallas field offices as well as headquarters operations to ensure compliance with the President's Council for Integrity and Efficiency (PCIE) standards. External oversight reviews will be conducted at the U.S. Coast Guard's Investigative Service, the Federal Law Enforcement Training Center, and possibly of the Federal Air Marshal Program. Additionally, the Office of Investigations will conduct a PCIE peer review of the Housing and Urban Development OIG's Office of Investigations.

In addition to upgrading the OIG case management system's hardware and software, when applicable and resources allow, we will also develop new features such as electronic receipt of complaints from the DHS bureaus, an agent time tracking module, and automating the submission and review of reports of investigation. These upgrades will result in greater customer support for our stakeholders, i.e., quicker response and retrieval time will allow for a more efficient and effective case management system.

Program Increase # 1: Gulf Coast Hurricane Recovery

Strategic Goal(s) & Objective(s): 7.3 Continually improve our way of doing business.
PPA: Audits, Inspections and Investigations

Program Increase: Positions 0 FTE 0 Dollars \$11,000

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$0
Program Increase # 1							0	0	11,000
Total Request	0	0	\$0	0	0	\$0	0	0	\$11,000

Description of Item

The program increase will enable the OIG to continue its audit and investigative activities of the Gulf Coast hurricane recovery efforts in FY 2007. The OIG received a \$15 million transfer at the end of FY 2005 to support its oversight of recovery efforts related to Hurricane Katrina. It is anticipated that by the end of FY 2006, these initial funds will be obligated. Additional funds will be required to continue the Hurricane Katrina oversight in FY 2007, while expanding the scope to include the other hurricanes that impacted the Gulf Coast during 2005.

Justification

The OIG will use the \$11 million to: monitor operations at the FEMA Emergency Operations Center to stay current on all disaster relief operations and provide on-the-spot advice; provide advice and

perform proactive procedures related to the joint field offices' internal activities to ensure the appropriate control and use of FEMA funds; coordinate with the respective Federal, state, and local law enforcement agencies and prosecutors; handle allegations received through a single, OIG-wide, hurricane relief fraud hotline; work with the Attorney General's Hurricane Fraud Task Force; review the administration of major contracts awarded with hurricane-relief funds to ensure that appropriate Federal acquisition regulations are being adhered to, and that expenditures are necessary and reasonable; provide continuous oversight of FEMA's control environment, financial and operational processes, and the effectiveness of internal controls to identify financial reporting issues early; and, closely monitor FEMA's approval of public assistance projects.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase has a direct correlation to the achievement of DHS objective 7.3: continually improve our way of doing business. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations.

The OIG is responsible for the oversight of the management and expenditures of all contracts, grants, and governmental operations related to the on-going hurricane relief efforts. This oversight is to be accomplished through internal control reviews and contract audits to ensure appropriate control and use of disaster assistance funding. The OIG will ensure this oversight encompasses an aggressive and on-going audit and investigative effort designed to identify and address fraud, waste, and abuse as early as possible. The OIG will also coordinate audit activities of other inspectors general, who oversee funds transferred to their respective departments and agencies, by FEMA, to aid in disaster relief assistance. As a result, the OIG's efforts will impact the performance of FEMA, other components of DHS, and other Federal agencies as well.

Program Increase # 2: Personnel and Contract Support

Strategic Goal(s) & Objective(s): 7.3 Continually improve our way of doing business.
PPA: Audits, Inspections and Investigations

Program Increase: Positions 10 FTE 5 Dollars \$1,440

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	538	492	\$82,109	538	540	\$82,187	538	540	\$83,745
Program Increase # 2							10	5	1,440
Total Request	538	492	\$82,109	538	540	\$82,187	548	545	\$85,185

Description of Item

The program increase will enable us to: add additional criminal investigators to existing investigative field offices and provide a greater level of audit oversight in areas that the Secretary has designated as being high priorities of the Department.

Justification

- The additional resources will help to facilitate the expeditious resolution of the overwhelming number of incoming allegations of criminal conduct or egregious administrative misconduct on the part of DHS employees, contractors, and grantees. Currently, the average caseload per agent equals 13, which is approximately 3 times the average caseload in the law enforcement community (1794 open cases divided by 138 working field agents = DHS OIG agent to case ratio of 1/13).
- The additional resources will allow the Office of Audits to provide needed audit coverage in high priority areas such as the Department's major procurement efforts (e.g., MaxHR, Deepwater, US-VISIT, UNISYS, and ACE). With the additional resources, the Office of Audits will be able to issue two more audit reports per year in areas of interest to the Secretary, Congress, and the American people.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase has a direct correlation to the achievement of DHS objective 7.3: continually improve our way of doing business. The OIG serves as an independent and objective inspection, audit, and investigative body to promote economy, efficiency, and effectiveness in DHS programs and operations, and to prevent and detect fraud, waste, and abuse in such programs and operations. Funding our request will improve our performance in several respects.

In the Investigations area, we will be in a better position to process our investigations in a more expeditious manner. We will be able to reduce the caseload per agent, while also being able to investigate more of the allegations that we have had to delegate to component internal affairs offices, given our current staffing level. This fiscal year we were unable to investigate 616 allegations of wrongdoing we might otherwise have pursued were it not for the limited investigative resources. Increased staffing will enable the OIG to meet the challenge of investigating many more of the complaints received in FY 2007 than is currently possible.

The Acquisition Management Division of Audit reviews and analyzes DHS' major acquisition programs and procurement efforts. Additional staff in this division will increase our ability to review and monitor DHS contracts. The reports issued from their efforts should lead to better contracting and financial management practices that will strengthen the Department's ability to capture, analyze, and disseminate data. As well as protect the Department from potential mismanagement and abuse.

Overall, in the Audit area, the additional personnel will allow the IG to better assess the Department's ability to prevent, respond, and recover from terrorist attacks and to prepare, respond, and recover from disasters by:

- providing oversight and timely recommendations for improving DHS management and operations in a greater number of acquisition programs;
- getting involved and influencing management direction and positive change in the early phases of new DHS programs and initiatives;
- providing continuous monitoring and evaluation of programs;

- providing a more timely response to requests for reviews on issues brought forth from Congress, and reducing the impact these requests have on the planned audits;
- developing more in-depth research and background into the audit areas, developing more effective recommendations for the auditees and management;
- monitoring recommendations to audit findings, reporting auditee achievements, and ensuring adequate response to needed program internal controls;
- ensuring more comprehensive audit follow-up for high-risk programs.

With respect to the impact of our reports, we have been able to document a significant level of success in developing recommendations that are accepted by Departmental management.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
OFFICE OF INSPECTOR GENERAL
Justification of Proposed Changes in Department of Homeland Security
Appropriation Language**

For necessary expenses of the OIG in carrying out the provisions of the *Inspector General Act of 1978* (5 U.S.C. App.), [\$83,017,000] \$96,185,000, of which not to exceed \$100,000 may be used for certain confidential operational expenses, including the payment of informants, to be expended at the direction of the IG. (*Department of Homeland Security Appropriations Act, [2006] 2007.*)

Explanation of Changes:

No substantive changes are proposed.

Audits, Inspections & Investigations Program Mission Statement

The IG is responsible for conducting and supervising audits, investigations, and inspections relating to the programs and operations of the Department. The OIG examines, evaluates and, where necessary, critiques these operations and activities, recommending ways for the department to carry out its responsibilities in the most economical, efficient, and effective manner possible.

H. PPA Budget Justifications (Cont)**Summary Justification and Explanation of Changes**

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Revised Enacted</u>	<u>Request</u>	<u>Change</u>
Salaries and Benefits	\$55,997	\$57,277	\$66,526	\$9,249

Salaries and Benefits includes costs for 545 FTEs. The FY 2007 request includes an increase of \$1,145,000 for the proposed January 2007 2.4 percent increase in personnel compensation, and \$8,104,000 in program increases.

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Revised Enacted</u>	<u>Request</u>	<u>Change</u>
Travel	\$4,000	\$4,046	\$6,699	\$2,653

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with federal travel regulations. The FY 2007 request includes increases of \$67,000 in non-pay inflation, and \$2,586,000 in program increases.

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Revised Enacted</u>	<u>Request</u>	<u>Change</u>
Transportation of Things	\$177	\$76	\$96	\$20

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes increases of \$1,000 in non-pay inflation and \$19,000 in program increases

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Revised Enacted</u>	<u>Request</u>	<u>Change</u>
GSA rent	\$4,777	\$7,426	\$7,550	\$124

GSA rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes increases of \$124,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	<u>Actual</u>	<u>Revised Enacted</u>	<u>Request</u>	<u>Change</u>
Other Rent	\$1,547	\$613	\$623	\$10

Other rent includes all payments to a non-federal source for rental space, land, and structures. The FY 2007 request includes an increase of \$10,000 in non-pay inflation.

H. PPA Budget Justifications (Cont)

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous char	\$2,537	\$2,922	\$3,081	\$159

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$49,000 in non-pay inflation and \$110,000 in program increases.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Printing	\$2	\$40	\$41	\$1

Printing includes all costs for printing and reproduction obtained from the private sector or from other federal entities. The FY 2007 request includes an increase of \$1,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$3,132	\$583	\$1,779	\$1,196

Advisory and assistance services include services acquired by contract from non-federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the federal government. The FY 2007 request includes an increase of \$10,000 in non-pay inflation and \$1,186,000 in program increases.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$838	\$1,595	\$1,671	\$76

Other services include report contractual services with non-federal sources that are not otherwise classified under Object Class 25. The FY2007 request includes increases of \$27,000 in non-pay inflation and \$49,000 in program increases.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change

A. Mission and Description Office of Inspector General

The Homeland Security Act of 2002 provided for the establishment of an OIG to ensure independent and objective audits, inspections, and investigations of the operations of the DHS.

An Inspector General (IG), who is appointed by the President and confirmed by the Senate, reports directly to both the Secretary of DHS and the Congress. Barring narrow and exceptional circumstances, the IG may inspect, audit, or investigate anyone in the Department, or any program or operation of the Department. To ensure the IG's independence and objectivity, the OIG has its own budget, contracting, and personnel authority, separate from that of the Department. Such authority enhances the OIG's ability to promote economy, efficiency, and effectiveness within the Department, and to prevent and detect fraud, waste, and abuse in the Department's programs and operations.

Specifically, the OIG's key legislated responsibilities are to:

- Promote economy, efficiency, and effectiveness in the management of the Department's programs and supporting operations;
- Conduct and supervise audits, investigations, and reviews relating to the Agency's programs and support operations;
- Detect and prevent fraud, waste, and abuse;
- Review existing and proposed legislation and regulations and make appropriate recommendations;
- Maintain effective working relationships with other Federal, state, and local governmental agencies, and non-governmental entities regarding the mandated duties of the IG;
- Inform the Secretary of the DHS and the Congress of serious problems and recommend corrective actions and implementation measures;
- Comply with the audit standards of the Comptroller General of the Government Accountability Office (GAO);
- Avoid duplication of GAO activities; and
- Report violations of Federal criminal law to the U.S. Attorney General.

For fiscal year 2007, the OIG is requesting 545 full-time equivalent (FTEs) work years. Of these FTEs, approximately 44% will be located in the Washington, D.C. headquarters office. The remainder will be located in 26 field offices in the following locations: Atlanta, Boston, Buffalo, Jersey City/New York, Marlton/Philadelphia, Northern Virginia (Washington Field Office), Miami, San Juan, St. Thomas, Chicago, Detroit, Indianapolis, Kansas City, Denton/Dallas, Houston, McAllen, El Paso, Del Rio, Laredo, Yuma, Tucson, El Centro, San Diego, El Segundo/Los Angeles, Oakland/San Francisco, and Seattle.

Approximately 59% of OIG employees are policy/program professional staff including auditors, management and program analysts, and information technology experts; approximately 30% of OIG employees are criminal investigators; and the remaining employees are senior executives, attorneys, management and administrative staff, and clerical employees.

B. Major Activities and Key Strategic Issues

During its first couple of years of existence, DHS has faced the challenge of effectuating the largest reorganization of the Federal government in more than half a century, and creating the third largest Cabinet agency with the critical, core mission of protecting the country against another terrorist attack. While DHS has made progress, it still has much to do to establish a cohesive, efficient, and effective organization.

In the FY 2006 report of management challenges, the OIG identified the following as the most serious management challenges facing DHS:

- Disaster Response and Recovery
- Consolidating the Department's components
- Contract Management
- Grants Management
- Financial Management
- Human Capital Management
- Integration of Information Systems
- Security of Information Technology (IT) Infrastructure
- Infrastructure Threat Assessment
- Border Security
- Transportation Security
- Trade Operations and Security

In addition, keeping with the priorities of both the Secretary and the Congress, the OIG will focus attention on DHS' "non-homeland" missions. Particular attention will be given to the Coast's Guard's "non-homeland" mission, as mandated by the *Homeland Security Act*, and to disaster response and recovery activities.

These programs and functions are not an all-inclusive inventory of the Department's activities. Rather, they represent those activities that are the core of the Department's mission and strategic objectives. By answering certain fundamental questions within each of these program and functional areas, the OIG will determine how well the Department is performing and will be able to recommend ways to improve the efficacy of the Department's programs and operations.

During FY 2005, we completed significant audit, inspection, and investigative work to promote the economy, efficiency, and effectiveness of DHS programs and operations. Similar accomplishments are anticipated for FY 2006 and FY 2007.

- During fiscal year 2005, the OIG issued 52 management reports (audits and inspections). In addition, we issued 53 audit reports on grants and contracts, and processed 208 reports on DHS programs that were issued by other organizations. As a result of these efforts, \$58.7 million of questioned costs were identified, of which \$26.7 million were determined to be unsupported.
- Additionally, audit recoveries totaled \$24.5 million. The OIG is most pleased, however, with the positive response our reports have received from Departmental management. This is

demonstrated by the fact that management has concurred with over 90% of our recommendations.

- In the investigative area, we issued 498 reports. Our investigations resulted in 200 arrests, 135 indictments, and 109 convictions. Our investigators closed 639 investigations and 12,219 complaints received through the hotline. Additionally, investigative recoveries, fines, restitutions and administrative cost savings totaled \$97.7 million.

We have a dual reporting responsibility, to the Congress as well as to the Secretary. During the reporting period, we continued our active engagement with Congress through numerous meetings, briefings, and dialogues with members and staff of the Department's authorizing and appropriations committees and subcommittees on a range of issues relating to our work and that of the DHS. The IG's statements for the record and the reports cited in the testimony are available on the OIG website at www.dhs.gov.

The key strategic issue facing the OIG is the ability to provide oversight of the most serious management challenges facing the Department, while providing oversight of Gulf Coast hurricane recovery operations. The additional resources requested in the FY 2007 budget will support the growing demands in these areas.

C. Resources Requested and Performance Impact

Current Services - FY 2007 performance will be similar to the expected FY 2006 performance. Expected FY 2006 performance is described below.

- **Audit** -The OIG plans for FY 2006 include issuing 30 program and financial audits in process at the end of FY 2005, as well as 23 new program audits that are to be initiated in FY 2006. It is anticipated that 30 grant audits will be issued. The OIG will continue to work closely with DHS management and Congressional oversight committees to identify potential audit work that will promote the effectiveness, efficiency, and economy of Departmental programs and operations.
- **Information Technology (IT)** - In FY 2006, OIG's IT office will evaluate the Department's progress in establishing a cost-effective and secure IT infrastructure. Specifically, the IT office will assess the progress DHS is making in consolidating its myriad networks and implementing a standard IT platform across the Department. In addition, OIG will evaluate the U.S. Coast Guard's Deepwater program to determine if it is following sound IT systems development and procurement practices. OIG will also assess DHS' data mining efforts to determine if they comply with security and privacy laws, policies, and procedures, and will evaluate the effectiveness of efforts to improve information sharing with state and local governments through the Homeland Secure Information Network. Further, OIG will conduct a series of reviews addressing the security aspects of laptop computers, radio frequency identification devices, and the Transportation Worker Identification Credentialing (TWIC) program. Finally, the IT office will assess DHS efforts to address significant deficiencies identified in the IT security program by ensuring that progress is made in developing components' Plans of Action and Milestones; ensuring that security policies and procedures are implemented Department-wide; and ensuring that all systems are adequately certified and accredited.

- Office of Inspections and Special Reviews (ISP) - This office's resources are employed to evaluate the effectiveness and vulnerabilities of DHS programs. ISP emphasizes reviews of DHS operations involving intelligence information management, infrastructure protection and mitigation, and the screening of foreign travelers. In addition to FY 2006 work surveying DHS intelligence components, ISP oversees DHS compliance with E.O. 12333 (intelligence on US persons) and reports quarterly to the President's Intelligence Oversight Board. ISP also will report on the incorporation of threat and risk based assessments into DHS' port security grant program. With respect to infrastructure protection and mitigation, ISP will review the National Asset Data Base and DHS' inventorying of critical infrastructure/key resources. In addition, ISP will examine DHS' coordination with other Federal agencies having cognizance for public sectors under the Emergency Support Functions of the National Response Plan; for example, DHS' work with the United States Department of Agriculture and the Food and Drug Administration regarding protection of the Food Sector. With respect to border screening, ISP has reported on and will continue to study aspects of DHS' role in visa integrity matters, remote surveillance technologies, and land border and maritime enforcement strategies. Lastly, ISP completed a special review on whether Immigration and Customs Enforcement and Customs and Border Protection should be merged; that review generated recommendations to DHS that will be the subject of a follow-up review in FY2006. ISP also will complete a special review of FEMA's preparation for and response to Hurricane Katrina. ISP is also designed to provide a quick response capability for the IG and DHS management when new controversies arise or as new DHS program initiatives may warrant.
- Investigations - The office will conduct internal inspections of the OIG Office of Investigations' Chicago, Miami, San Diego, and Dallas Field Offices as well as Headquarters Operations to ensure compliance with the President's Council for Integrity and Efficiency (PCIE) standards. External oversight reviews will be conducted at the U.S. Coast Guard's Investigative Service, the Federal Law Enforcement Training Center, and possibly of the Federal Air Marshal Program. Additionally, the Office of Investigations will conduct a PCIE Peer Review of the Housing and Urban Development (HUD) OIG Office of Investigations.

In addition to upgrading the OIG case management system's hardware and software, when applicable and resources allow, we will also develop new features such as electronic receipt of complaints from the DHS bureaus, an agent time tracking module, and automating the submission and review of Reports of Investigation. These upgrades will result in greater customer support for our stakeholders, i.e., quicker response and retrieval time will allow for a more efficient and effective case management system.

Program Increases – The OIG is requesting 10 positions, 5 FTE and \$12.44 million for FY 2007. The additional resources will provide the following:

- Gulf Coast Hurricane Recovery – The \$11 million increase will allow the OIG to continue its oversight of contracts, grants, and governmental operations related to hurricane relief. Specifically, the OIG, will: monitor operations at the FEMA Emergency Operations Center to stay current on all disaster relief operations and provide on-the-spot advice; provide advice and perform proactive procedures related to the joint field offices' internal activities to ensure the appropriate control and use of FEMA funds; coordinate with the respective Federal, state, and local law enforcement agencies and prosecutors; handle allegations received through a single, OIG-wide, hurricane relief fraud hotline; work with the Attorney General's Hurricane Fraud

Task Force; review the administration of major contracts awarded with hurricane-relief funds to ensure that appropriate Federal acquisition regulations are being adhered to, and that expenditures are necessary and reasonable; provide continuous oversight of FEMA's control environment, financial and operational processes, and the effectiveness of internal controls to identify financial reporting issues early; and, closely monitor FEMA's approval of public assistance projects.

Personnel and Contract Support – The 10 positions, 5 FTE, and \$1.44 million will provide the following:

- The additional resources will help to facilitate the expeditious resolution of the overwhelming number of incoming allegations of criminal conduct or egregious administrative misconduct on the part of DHS employees, contractors, and grantees. Currently, the average caseload per agent equals 13, which is approximately 3 times the average caseload in the law enforcement community (1794 open cases divided by 138 working field agents = DHS OIG agent to case ratio of 1/13).
- The additional resources will allow the Office of Audits to provide needed audit coverage in high priority areas such as the Department's major procurement efforts (e.g., MaxHR, Deepwater, U.S. VISIT, UNISYS, and ACE). With the additional resources, the Office of Audits will be able to issue two more audit reports per year in areas of interest to the Secretary, Congress, and the American people.

D. How Component Name Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives

The OIG program, and its performance goal are reflected below, followed by the DHS strategic goal/objective that the OIG program supports.

Audit, Inspections, and Investigations Program – Add value to the DHS programs and operations; ensure integrity of the DHS programs and operations; and enable the OIG to deliver quality products and services.

Organizational Excellence: 7.3 – Continually improve our way of doing business.

E. Performance Based Budget Highlights by Program

For the FYHSP program, the performance goal, performance measure, budget including allocation of non-programmatic overhead, and FTE are:

Performance Goal: Add value to the DHS programs and operations; ensure integrity of the DHS programs and operations; and enable the OIG to deliver quality products and services						
Measure: Percentage of recommendations made by OIG that are accepted by the Department of Homeland Security.	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007

DEPARTMENT OF HOMELAND SECURITY
WORKING CAPITAL FUND

I. WORKING CAPITAL FUND OVERVIEW

A. Mission Statement and Description for Working Capital Fund (WCF)

Mission: To provide the most cost-effective support services throughout DHS. Through the WCF costs for shared services can be easily and efficiently distributed and recouped, an assessment of the most cost-effective service providers can be conducted, and oversight of shared services is centralized to ensure compliance with applicable laws and regulations.

The DHS WCF maintains and operates a fund that promotes economy, efficiency, and accountability. The WCF supports selected services, activities, and programs that benefit more than one DHS organizational component. Furthermore, the WCF supports the funding for government-wide initiatives as well as DHS crosscutting initiatives approved by OMB and Congress.

Implementation of the WCF allows DHS to apply best practices from the public and private sectors for improving organizational performance, operational efficiencies, and fully promote full cost recovery of goods and services for selected DHS agency-wide programs, activities, and services.

B. Current Budget Major Activities and Key Strategic Issues

The key WCF activities are organized under the five activity categories listed below:

Fee for Service Activity

DHS WCF activity managers provide or coordinate delivery of a specific service or benefit to DHS components. The benefit/cost for providing the WCF activity is tangible and is directly linked to a component's use of services or products. These activities may include subscription-type services such as providing access to electronic services, for example the Library of Congress' FEDLINK. These WCF activities earn revenue from the provision of services, and have characteristics typical of a business enterprise. The costs for operating the "business" are reimbursed by billing customers for the provision of goods and services, through rates that are pre-approved by the Chief Financial Officer (CFO) and reviewed by component customers. Each fee for service activity is expected to recover its operational costs, usually at a much lower cost as the components benefit from economies of scale. Examples include IT services, human resource services, procurement operations, and financial management services.

Tri-Bureau Service Activity

The WCF Tri-Bureau Service activity supports selected administrative services provided by and to Immigration and Customs Enforcement (ICE), U.S. Citizenship and Immigration Services (USCIS), and Customs and Border Protection (CBP). These services include human resources, and IT services supplied by DOJ.

Government-Wide Service Activity

Government-wide activities are Administration sponsored initiatives that are managed by a designated Federal department, to improve overall government performance. Other departments are assessed for the cost of supporting the activity. The activities should also provide a direct benefit to participating components. Examples include the government-wide E-Government initiatives related to the President's Management Agenda.

DHS Crosscutting Activity

The DHS crosscutting activities are department-wide programs managed by a single office that yield some benefit to all DHS components. The actual costs of the programs are recouped by redistributing the costs to the components based on their share of the discretionary budget, staffing or some other fair and equitable pro-rata basis.

WCF Management Activity

The WCF Management Activity includes funding for the staff that develops WCF policy and procedures, formulates and executes the WCF budget and negotiates issues between activity managers and customers.

Initiatives: The WCF office was established in FY 2004, and the WCF program has made considerable progress in FY 2005. The most important improvement was getting the WCF in synchronization with the appropriated budget request. Other initiatives included continued folding of common administrative services into the WCF, so that charges against components are consolidated. DHS also continued to improve cost methodologies for determining customer assessments for products and services received.

The WCF is improving visibility into the budget formulation and financial management of the WCF. During the last three cycles, the Office of the Chief Financial Officer (OCFO) developed a robust governance process and has made great strides to make the WCF fund transparent to all organizations within DHS, and to OMB and the Congress. In order to achieve the goals and objectives of the WCF, we will continue to:

- Incorporate the WCF programs fully into the DHS budget and FYHSP cycle, so customers can anticipate future charges and service providers can develop long-range plans.
- Continue to refine rate/pricing structures, so that the methodology logically relates to the particular services provided.

- Develop a robust review and oversight process to ensure activities funded by the WCF are in compliance with laws and regulations governing the centralized services.
- Integrate improved accountability by cascading performance goals and measures for each activity within the WCF. Performance guidance is in the development stages. Performance plans from each of the activity managers will be required for FY 2007 execution.
- Develop and conduct training for DHS staff, activity managers, and customers on WCF operating principles and procedures. Training is an ongoing part of the WCF budget formulation and execution process.

C. Budget Resource Request and Performance Impact Summary

The DHS WCF operating requirements for FY 2007 are estimated to be 279 FTEs and \$474,426,448 reimbursable authority and 16,690,458 unobligated balance carried forward. This is an increase of \$33,676,532 and 93 FTEs over the FY 2006 level. These funds are reimbursable from DHS organization elements and therefore, do not include any direct appropriated funds. The \$16,690,458 unobligated balance carry forward will be used to maintain a positive cash balance for the fund as the WCF does not collect from components in advance and for prior year adjustments to existing WCF activities. Prior year adjustments will be billed to the applicable components so that the WCF recovers full cost of the funds.

In FY 2007, the WCF will continue most services and activities from FY 2006. The FY 2007 increase is primarily attributable to an additional 93 FTEs spread across the initiatives supported by the WCF and \$12,963,052 approved for the office of procurement operations; \$8,656,724 for Microsoft Licenses; \$6,000,000 for operation and maintenance costs associated with the SMARTCARD, \$4,891,564 for NFC payroll processing and \$1,165,192 for base adjustments. Program increases will ensure that DHS can provide centralized administrative services at a cost savings to the components. The total amount requested also reflects the lower anticipated costs for Tri-Bureau services and government-wide services as compared to 2006.

D. How WCF Programs and Their Performance Goals Align To and Support DHS Strategic Plan Objectives.

WCF Program Performance Goal – Develop and maintain a WCF business model to provide centralized administrative services at a fair and equitable cost to organizations within DHS, as well as to maximize customer satisfaction, the utilization of resources and the benefits derived from a WCF.

Strategic Plan Objective 7.4: Improve the efficiency and effectiveness of the Department, ensuring taxpayers get value for their tax dollar.

E. Summary of FY 2007 Budget Estimates by WCF Activity Category

Digest of FY 2007 Budget Estimates by WCF Activity Category

3. Justification of Program Changes

Description of Item

Working Capital Fund (WCF) – Base Adjustments: \$1,165,192 and Program Changes: \$32,511,340 and 93 FTEs for a total increase of \$ 33,676,532 and 93 FTEs

Justification

(1) Fee for Services Activities – Base Adjustments: \$1,789,033 and Program Changes: \$32,511,340 and 93 FTEs

DHS WCF requests additional funding for the Fee for Services Activities. The base adjustment increase for inflation amounts to \$1,789,033. The following activities request a program change in order to provide full services to DHS customer components:

- Procurement Operations (\$12,963,052 and 93 FTE) – The additional requested resources will provide Office of Procurement Operations (OPO) the growth to meet procurement and industry standards and best practices. OPO provides full service acquisition support to the Office of the Secretary, the Undersecretary for Management, Science and Technology, U.S. Citizenship and Immigration Services, Preparedness Directorate, Office of Intelligence and Analysis and Office of Operations Coordination and Intel Analysis, and US Visit. In addition, OPO provides acquisition services for department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS. Services provided include acquisition planning, training, execution, and administrative services.

In response to a GAO report, the Chief Procurement Officer in 2004 commissioned a study to determine the staffing levels needed to support the procurement and acquisition support required of the clients the OPO serves. As a result of this study, The CPO has requested a planned increase in OPO FTE for FY 2005 and FY 2007. OPO requires the increase of 93 FTE for FY 2007, allowing for sustained growth to meet procurement and industry standards and best practices. As a fee for service organization, the OPO ensures the Components competitive pricing and will lead the department in acquisition quality and innovation.

- SmartCard (\$6,000,000) – The additional requested resources will provide DHS with digital certificates and certificate validation services for the DHS smartcards. There is a clear need for secure and reliable forms of identification for both cyber and physical access, as required by Homeland Security Presidential Directive (HSPD)-12 dated 27 August 2004. HSPD-12, entitled “Policy for a Common Identification Standard for Federal Employees and Contractors,” directed implementation of a Federal standard identification card for secure and reliable forms of identification for Federal employees and contractors to be used for both physical and cyber authentication. It further specified secure and reliable identification that is issued based on: sound criteria for verifying an individual

employee's identity, strongly resistant to identity fraud, tampering, counterfeiting, and terrorist exploitation, can be rapidly authenticated electronically, by providers whose reliability has been established by an official accreditation process and a common, secure and reliable form of identification is in keeping with the Department of Homeland Security Strategic Plans.

There is also a need to increase Department efficiency by providing an authentication basis for Single Sign On (SSO), reduce identity fraud, and protect personal privacy and to have a universal standard for secure and reliable forms of identification issued by the Department to its employees and contractors (including contractor employees). Current identification and credentialing has been issued by the Department's twenty-two (22) diverse agencies across a spectrum of non-standardized documents and tokens creating management complications and problems for both cyber and physical security.

This program provides Public Key Infrastructure (PKI) services which include issuance of Identification, Signature and E-Mail Encryption certificates for 174,800 smart card users. It includes certificate validation services designed to support mission critical applications and support for each certificate user. This investment will support integration of and support single sign on for work processes that are being simplified or otherwise redesigned to reduce lifecycle costs, improve effectiveness, and make maximum use of commercial, off-the-shelf technology.

The Smart Card program is managed by the Office of the Chief Security Officer (OCSO) and the PKI program is managed by the Office of the Chief Information Officer (OCIO). The FY 2007 request is for PKI services which include: Identification, Signature and E-Mail Encryption certificates for 82,800 smart card users, certificate validation services and support for each user. This initiative combines the cyber security infrastructure and the physical security infrastructure in a single enterprise-wide security model by requiring a single universally accepted FIPS token, the DHS Access Card.

- Microsoft Licenses (\$8,656,724) – The additional requested resources will provide DHS with access on an enterprise basis for a core suite of specific Microsoft applications (MS Office, MS Windows, Core Cals), and to all other MS products on an ala carte basis. Microsoft products include the software needed for the individual desktop, laptop, and server platforms. Microsoft is utilized by over 95% of DHS and the Department achieves economies of scale using this contract vehicle.
- National Finance Center (NFC) Payroll Services (\$4,891,564) – The additional resources will provide DHS with the full amount estimated by NFC for payroll services and support. NFC Services provided to DHS components include payroll processing, payroll tax reporting, payroll accounting, debt management and earnings and leave statements and other payroll related services. In addition, NFC requires one point of contact with all Federal agencies for customer service,

therefore, Chief Human Capital Office (CHCO) continues to service in this capacity on behalf of the components. Any change in payroll requirements would be coordinated directly between CHCO staff and the NFC, on behalf of the components.

(2) Tri-Bureau Services – Base Adjustments: \$(896,186)

FY 2007 Tri-Bureau services net decrease is attributable to a reduction in IT services cost, which was initiated during the FY06 formulation process by the Department of Justice (DOJ) Working Group, who performed an analysis to clarify IT services that DHS would require from DOJ and all the associated costs. At the time the components involved were ICE, CBP, CIS, and HQ. Recently CBP migrated to their own Data Services Center and no longer require the services from DOJ, and therefore no longer have associated costs in either FY06 or FY07. The agreement with DOJ has been revised changing the estimated charges for ICE, CIS, and HQ.

(3) Government-wide Activities: Base Adjustments: \$(609,929)

The decrease in the amount for Enterprise HR Integration far exceeded the minor increases for the other Government-wide initiatives resulting in an overall decrease in the FY 2007 base.

(4) DHS Crosscutting Activities: Base Adjustments: \$858,389

DHS WCF requests additional funding for the Crosscutting activities to include additional contract support for the Capital Planning and Investment Control and Strategic Sourcing. Strategic Sourcing Operations plan to increase the number of Contract review boards to ensure that DHS gets the best price on major competitive contracts.

(5) WCF Management Activity- Base Adjustments: \$23,885

DHS WCF requests additional funding for the WCF operations to ensure compliance with Congressional guidance and provide oversight to the increased number of WCF activities approved for the WCF. The WCF will continue to improve cost methodologies in determining customer assessments for products and services received.

Please see the WCF Customer Service Activity Guide, beginning on page WCF 21, for a more thorough description of these activities.

4. Summary of Requirements by Object Class

A. Budget Justifications
1. Description of FY 2005 – FY 2007 Object Class Changes

Summary Justification and Explanation of Changes				
	FY 2005 Actual	FY 2006 Anticipated	FY 2007 Anticipated	FY 2007 Change
Salaries and Benefits	\$ 8,258	\$ 27,111	\$ 35,679	\$ 8,568
Salaries and Benefits includes costs for 279 FTEs. The FY 2007 request includes an increase of \$8,568,156 for annualization costs and an additional 93 FTE for Procurement Operations.				
Travel	\$ 50	\$ 3,075	\$ 3,171	\$ 96
Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increase to support the additional 93 FTE for procurement operations funded by the Working Capital Fund and increase in anticipated ridership using the shuttle service.				
Transportation of Things	\$ -	\$ 310	\$ 316	\$ 6
Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 increases reflects the additional cost to support staff and the inflationary cost factor.				
GSA rent	\$ 17,067	\$ 33,453	\$ 36,111	\$ 2,658
GSA Rent includes all payments to General Services Administration (GSA) for rental of workspace and related services for federal client agencies. The FY 2007 cost is estimated to increase \$2,658,249. This includes rate increase for changes in workspace requirements caused by the growing number of FTEs needed to support and fulfill the mission of the various headquarters activities, particularly the Office of Procurement Operations (OPO).				
Other Rent	\$ 61	\$ 690	\$ 716	\$ 26
Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 cost is projected to increase due to anticipated additional rental space requirements.				
Communication, Utilities, and miscellaneous	\$ 2,386	\$ 10,061	\$ 12,332	\$ 2,271
Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 increase is projected to be \$2,270,764 in support of the additional HQ personnel headcount based on a "per seat" cost. This increase includes charges for local phone services and long distance per seat. The remaining costs cover cell phones and miscellaneous costs that are required to support the mission.				
Printing	\$ -	\$ 69	\$ 50	\$ (19)
Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. A decrease is anticipated primarily due to efficiencies realized from common processes of duplicating, contractual printing and reproduction.				
Advisory and Assistance Services	\$ 50,242	\$ 9,571	\$ 9,836	\$ 265
Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 anticipated increase is attributable to the increased cost from inflation.				

	FY 2005 Actual	FY 2006 Anticipated	FY 2007 Anticipated	FY 2007 Change
Other Services	\$ 10,024	\$ 257,028	\$ 260,041	\$ 3,012
Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request included increases for several contracts as follows: Financial Statement Audit, Internal Control Audit, Tri-Bureau HR Services, and the Booz-Allen contract.				
	FY 2005 Actual	FY 2006 Anticipated	FY 2007 Anticipated	FY 2007 Change
Purchase from Government Accounts	\$ 183,706	\$ 530	\$ 548	\$ 18
Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. In FY 2007, the Increase is due primarily to the effect of inflation on goods and services and non-pay increases.				
	FY 2005 Actual	FY 2006 Anticipated	FY 2007 Anticipated	FY 2007 Change
Operation & maintenance of facilities	\$ -	\$ 100	\$ 102	\$ 2
Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.				
	FY 2005 Actual	FY 2006 Anticipated	FY 2007 Anticipated	FY 2007 Change
Operation & Maintenance of equipment	\$ 6,619	\$ 77,760	\$ 86,447	\$ 8,687
Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request reflects the addition of the SMARTCARD services and an increase for inflation in NCR services.				
	FY 2005 Actual	FY 2006 Anticipated	FY 2007 Anticipated	FY 2007 Change
Supplies & materials	\$ 197	\$ 717	\$ 1,026	\$ 309
Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. For FY 2007, the increase is due primarily to inflation.				
	FY 2005 Actual	FY 2006 Anticipated	FY 2007 Anticipated	FY 2007 Change
Equipment	\$ 2,687	\$ 19,773	\$ 27,551	\$ 7,777
Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request reflects an increase in the utilization of \$8,642,141 in Microsoft Enterprise Licenses and termination of one-time costs bringing the actual increase to \$7,777,419.				

B. Budget Details by Activity and Component

Working Capital Fund Customer Activity Guide

GSA Rent – Fee for Service Activity

Description of Service: GSA charges rent to over 100 federal agencies, which is deposited into the federal buildings fund and used to operate the government's buildings and pay rent to the private sector for lease space. GSA provides workspace and related services for over 100 federal client agencies serving more than one million workers through the Public Buildings Service (PBS). Whenever possible, client agencies are located in existing government-owned space. If suitable space in the government inventory is not available, PBS acquires leased space in privately owned buildings.

GSA also provides related real estate services including the operation and maintenance of buildings and out-leasing programs. GSA's Computer Integrated Facility Management program uses cutting-edge technology to look at a building's life cycle. Real estate services provided to clients appear in federal agencies' monthly electronic rent bills. GSA has simplified these bills so agencies have a clearer understanding of the costs they are charged for their workspace and services.

Cost Allocation Methodology: The cost allocation methodology is the amount of occupied space for each Component multiplied by the rate per square foot, as determined by GSA.

Full Time Equivalent (FTE): This activity requires two FTE.

FEDLINK (Library of Congress) – Fee for Service Activity

Description of Service: FEDLINK is an "Ask a Librarian" initiative which is a cooperative federal library project implemented and funded by the DHS Management Directorate. The project expands library services to workforce desktops using interactive chat, email or phone. Librarians from 25 federal agencies (including DHS staff librarians) answer questions, search databases and send materials directly to DHS staff, detailees, and contractors.

Cost Allocation Methodology: The cost allocation methodology is the unit contract costs multiplied by the number of users each Component requested.

Full Time Equivalent (FTE): This activity requires three FTE.

Sedan Services - Fee for Service Activity

Description of Service: Executive Sedan service is provided for senior staff that may have the need to travel between various locations in the course of their official duties. This sedan service allows these senior officials to maximize the effectiveness and efficiency of their time and provides a setting that allows them to conduct official business while in transit that would not be possible on Metro or in a cab.

Cost Allocation Methodology: The cost allocation methodology is the total cost of the Executive Sedan Service divided by the number of authorized users and allocated based on the number of authorized users in the Component.

Full Time Equivalent (FTE): This activity requires no FTE.

Shuttle Services - Fee for Service Activity

Description of Service: The shuttle service provides transportation for DHS personnel between various DHS Offices in the District and Arlington County, VA.. This service is of significant importance in allowing staff a safe and reliable method of access to the US Coast Guard Headquarters at Buzzards Point as well as to the Nebraska Avenue Complex, which has minimal Metro Bus Service.

Cost Allocation Methodology: The cost allocation methodology is the actual costs during the fiscal year of performance on an as needed basis.

Full Time Equivalent (FTE): This activity requires one FTE.

Transit Subsidy Program - Fee for Service Activity

Description of Service: The Commuter Transit Subsidy Program is required by law and executive order. This program provides a subsidy to Federal employees who commute to and from work on a regular basis using rapid transit, public or commuter buses, commuter rail, incorporated van pools, or any combination of the above. This helps reduce petroleum consumption, traffic congestion and air pollution by taking vehicles off the road that would otherwise be used in daily commuting.

Cost Allocation Methodology: The cost allocation methodology is allocated based on the actual costs of providing the benefit. Estimates are based on the prior fiscal year actual cost and are adjusted during the fiscal year of performance.

Full Time Equivalent (FTE): This activity requires no FTE.

DHS Mail Operations - Fee for Service Activity

Description of Service: The mail operations system currently provides the DHS Headquarters Staff, Management, Under Secretary for Preparedness, Operations Coordination & Intel and Analysis, and S&T a high-end industry standard mail operation capability for pick-up and delivery of classified and unclassified documents and packages from DHS Headquarters and other DHS facilities, Federal government facilities and non-government organizations/facilities in the Washington, DC Metropolitan area, including Northern Virginia and the Maryland suburbs. Planning is underway to consolidate all Component mail operations with DHS Headquarters Staff, Management, Under Secretary for Preparedness, Operations Coordination & Intel and Analysis, and S&T within the Washington, DC Metro area in FY 2007.

The mail operations system includes all the Components (facility, equipment, hardware, software, employees) primarily dedicated to the collection, distribution, and delivery of hard copy mail items, including methods for capturing data on mail users, their volume, and costs. The DHS Mail Operations System must have the capability to counter chemical, biological, radiological and explosive threats, and do so with nearly-100% effectiveness, in order to maintain uninterrupted mail service during, or after, a terrorist attack or mail exploitation event.

Cost Allocation Methodology: The cost allocation methodology will be based on estimates and will be adjusted to actual costs based on the business intelligence tool application that will be in use by FY 2006.

Full Time Equivalent (FTE): This activity requires no FTE.

Parking Spaces for DHS HQ Staff - Fee for Service Activity

Description of Service: The Administrative Services Office administers parking for Headquarters employees at the various headquarters locations housing handicapped employees, headquarters executives, and employees consistently required to work hours outside of the core business hours. There are currently two commercial parking garages providing 50 parking spaces, two government-run parking garages providing 125 parking spaces and one parking lot of 1,112 spaces that the Administrative Services Office oversees from a policy and operational perspective.

The Administrative Services Office currently needs one contractor and one FTE to oversee the contracts and administer the day to day activities of providing parking. The duties include policy development, development of procurement related documents – requirements, funding documents, contract administration, invoice certification, and assignment of spaces. Where necessary, the staff will be required to prepare the necessary documentation to the National Finance Center to provide W-2 for employees receiving parking valued in excess of \$195.00 per month. This is considered a taxable benefit for employees.

Cost Allocation Methodology: The cost methodology will be based on actual costs of parking spaces specifically identified to the benefiting Component.

Full Time Equivalent (FTE): This activity requires one FTE.

Financial Management (Finance & Accounting Shared Services) – Fee for Service Activity

Description of Service: The Office of the DHS Chief Financial Officer (CFO) has authority for financial systems in the Department of Homeland Security and sponsors, sets policy, and manages the development, implementation, operation and maintenance of the departmental financial management systems and related business processes. The CFO has determined that it is in the best interest of the Department to obtain selected financial management services from the Office of Financial Management, U.S. Immigration and Customs Enforcement, hereafter referred to as ICE OFM, on a reimbursable basis. ICE OFM will provide financial management services in support of the following Components:

- Departmental Operations, including the immediate offices of the Secretary, the Directorate for Management, etc.
- Directorate for Science and Technology
- Directorate for Preparedness
- Directorate for Operations Coordination and Intelligence and Analysis
- U.S. Citizenship and Immigration Services

ICE OFM will formulate and disseminate financial management policies, procedures, standards and maintain overarching internal controls in conjunction with the DHS CFO. The DHS CFO and ICE OFM will assist DHS HQ Components in the implementation, if needed. The activities with respect to this function include:

- Oversee the development and maintenance of OFM policies, standards, and procedures for serviced groups to ensure compliance, uniformity, and consistency with Federal Financial and Accounting regulations, guidelines, rules, and standards.
- Create and submit updates to be posted on the OFM intranet website.
- Ensure necessary continuation of operations plans are prepared, viable, and in place in the event of required use.
- Monitoring, adjustment, and execution of shared services agreement including the development/refinement of cost methodologies.
- Channels customer service requirements to service owners through formalized meetings, memorandums, issues papers, and other communication mechanisms.
- Establish points-of-contacts to support customer liaison and service requirements, and participate in customer meetings.
- Periodic review of internal business practices to identify means to improve operations in terms of effectiveness and efficiency.
- Create new FFMS transaction codes and process changes to the general ledger.
- Manage travel card services by processing new travel card applications; establishing hierarchies, maintaining user profiles, handling disputes, increasing limits, replacing cards, and contacting delinquent card holders.

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the historical cost of providing seven categories of financial support to each participating Component. The seven categories of financial support services include the following: (1) financial reports, (2) obligations and payment processing, (3) system usage, (4) receipts, (5) payroll, (6) overhead, and (7) travel and cash management services.

Full Time Equivalent (FTE): This activity requires no FTE.

Financial Statement Audit – Fee for Service Activity

Description of Service: DHS awards a contract to an independent CPA firm to perform a financial statement audit functions. The contract includes time and materials for audit services with the auditor providing the services and billing for hours worked at billing rates commensurate with the audit position being billed. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the Office of the Inspector General (OIG) as the Contracting Officer's Technical Representative (COTR). Award will be made under a GSA schedule contract.

The Financial Statement Auditor is selected through contracting procedures by the OIG (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent to the DHS Components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

The Office of the Chief Financial Officer (CFO) coordinates and prepares the DHS consolidated financial statements and in this role acts as primary liaison for the auditors. All DHS departmental CFOs coordinate with the Director of Financial Management in the preparation of financial statements and completion of the audit.

The Office of the Inspector General became the COTR in FY 2005. The WCF funds will be used to support the departmental financial statement audits with the OIG having the following responsibilities:

- Contracting with an independent public accounting firm to perform the FY 2007 DHS financial statement audit.
- Providing oversight of the contract auditor
- Providing estimated cost information that allows the OCFO to properly budget for audit costs
- Notify the OCFO of any potential cost overruns and the related reasons
- Review and approve invoices for payment. The OIG charges no fee to the WCF for these services.

Cost Allocation Methodology: The cost allocation methodology is the sum of the estimated auditor's billable hours multiplied by the hourly rate plus travel and incidental costs.

Full Time Equivalent (FTE): This activity requires no FTE.

Internal Audit – Fee for Service Activity

Description of Service: The contract includes time and materials for internal control audit services with the auditor providing the services and billing for hours worked at billing rates commensurate with the audit position being billed. The costs include travel and incidental costs associated with the performance of the audit as permitted by the contract maintained by the OIG as the COTR. Award will be made under a GSA schedule contract.

The Internal Control Auditor is selected through contracting procedures by the OIG (with the Bureau of Public Debt (BPD) acting as the procurement office) and must stay independent to the DHS Components that are being audited. The auditor selected commences work immediately and entrance conferences are held within a short time after award of the financial statement audit contract.

The Office of the Chief Financial Officer (CFO) coordinates the assessment process to support management's assertion and in this role acts as primary liaison for the auditors. All DHS departmental CFOs coordinate with the Director of Financial Management in the preparation of and completion of the internal audit.

Rates and Basis of Reimbursement DHS Components will be billed on GSA schedule rates, with any negotiated discounts, based on auditor hours worked multiplied by a per consolidated audit contract hourly rate. The details of the contract requirements and allowable labor rates and expenses are maintained by the COTR and BPD and are available for review. The formula used to calculate the fair and equitable portion of the Financial Statement audit for the major bureaus is as follows:

Cost Allocation Methodology: The cost allocation methodology is the sum of the estimated auditor's billable hours per Component multiplied by the hourly rate plus travel and incidental costs.

Full Time Equivalent (FTE): This activity requires no FTE.

Financial Management – Fee for Service Activity

Description of Service: The Department of Homeland Security, Office of the Chief Financial Officer, Department Operation Branch (DOB), provides financial management support to Departmental Management and Operations. Services include budget formulation and execution of the Departmental Management and Operations appropriation, which is comprised of four separate appropriations including: the Offices of the Secretary and Executive Management Offices (OS&EM); the Under Secretary for Management (US/M); the Chief Financial Officer and the Chief Information Officer. The Executive Management Offices are independent offices that report directly to the Secretary and operate without financial management personnel. These offices rely on DOB for financial management and budget support. It is estimated that the DOB

processes approximately 100 to 150 procurement requests per month. Procurement requests may vary in complexity and dollar value, ranging from \$25 to over \$1 million for one request. The Contractor provides the personnel and materials to perform the following budget execution activities as follows:

- Processing of Procurement Requests
- Commitment and Obligation of Funds
- Processing of Travel Authorizations and Vouchers
- Reconciling a Centrally Billed Travel Account
- Set up and Coordination of Purchase Cards
- Periodic Purchase Card reporting and review
- Invoice Processing and Certification
- Review and Accuracy of Financial Data
- Reconciliation of accounting records and financial data in FFMS
- Development of Status of Funds Reporting
- Financial Reporting as required or needed for special requests
- Periodic review of Payroll data to ensure accurate reporting

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each office within Departmental Operations' adjusted total budget divided by the total Departmental Operations' adjusted total budget multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires four FTE.

Bankcard Program - Fee for Service Activity

Description of Service: As part of the GSA SmartPay contract, DHS entered into a tailored task order with US Bank on June 25, 2003, for purchase card services. Under this task order, US Bank will be the sole provider of purchase cards for all organization elements within DHS. The inherent nature of purchase cards under the GSA SmartPay contract is issued to individual employees of an organization but are billed and paid centrally, or at the corporate level using each independent agency's funding string(s). Individual cardholders are not responsible for payment to the bank.

DHS has selected the U. S. Coast Guard (USCG) as the servicing agent to provide for a centralized invoicing and payment system for Components within DHS. The Finance Center (FINCEN) has developed and implemented a system that supports the receipt of daily invoices

for all of DHS from US Bank. This system assures payment of those invoices within one business day of receipt, and provides transmission of an electronic file containing transaction data to each Component's accounting system.

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the percent of each Component's number of Bankcard transactions processed divided by the total number of Bankcard transactions processed for all participating Components multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

Treasury Information Executive Repository (TIER) – Fee for Service Activity

Description of Service: The DHS CFO's office is responsible for creating the Department-wide financial statements. As part of this process, two software packages are used to process the work. These two products are the Treasury Information Executive Repository (TIER) and CFO Vision Software. The CFO's office has established procedures and guidance for the Components to use. The DHS use of TIER and CFO Vision has benefited the entire Department by the cost and time savings involved in being able to produce financial statements in a timely manner. This has been a huge benefit especially with the accelerated timeframes for producing the Performance and Accountability Report (PAR).

Cost Allocation Methodology: The cost allocation methodology for this activity is average cost equally distributed to the organization element.

Full Time Equivalent (FTE): This activity requires no FTE.

National Finance Center (NFC) Payroll/Services and Reporting – Fee for Service Activity

Description of Service: The NFC Payroll provides DHS with payroll/processing and reporting support. In addition, NFC provides the Components specific services. The Components are already paying into the WCF for these services. Therefore, administering the costs of these services through the WCF will provide for greater efficiencies through centralized management. In addition, any changes in payroll requirements would be coordinated directly between HCBS staff and the NFC, on behalf of the Component's.

COST AREA	COST DRIVER
☞ Postage-Earnings and Leave and Personal Benefits Statements	Pieces of mail
☞ Treasury FMS Postage Charges for Single Address Checks	Checks mailed
☞ USDA OIG Oversight of Non-USDA Payroll Processing	Avg # of employees paid
☞ Payroll Operations Branch Support	Avg # of employees paid
☞ Tax Reporting	Avg # of employees paid
☞ Payroll Policy Support	Avg # of employees paid
☞ e-Pay Policy Support	Avg # of employees paid
☞ Benefits Reconciliation and Liaison Area	Avg # of employees paid
☞ Payroll Accounting	Avg # of employees paid
☞ Certification	Avg # of employees paid
☞ Debt Management	Receivables established
☞ Data Center Operations (Other than FOCUS)	Avg # of employees paid
☞ Payroll/Personnel Baseline Services	Avg # of employees paid
☞ Ad-Hoc reporting (based on CPU Minutes used)	CPU Minutes

The last 4 items are the most expensive "unit cost" items.

Cost Allocation Methodology: The cost allocation methodology is based on the Components average number of employees paid.

Full Time Equivalent (FTE): This activity requires no FTE.

HQ Human Capital Services - Fee for Service Activity

Description of Service: Recruitment and hiring services have been provided to HQ through Customs and Border Protection (CBP) via a contract with Your Recruiting Company, Inc. (YRCI). The purpose of this contract and the HTRT was to assist HQ in "ramping up" staff to meet business requirements. Since the formation of the DHS structure, the bulk of HQ personnel needs have been in-sourced to CBP's Human Resources Management Division. The vast majority of these services were, in turn, outsourced to a private firm tasked with assisting in the heavy workload associated with the ramp-up of HQ organizations. Over this past year, for example, the incumbent contractor has received and reviewed over 15,000 applications for employment with DHS HQ organizations. In the last year alone, the contractor managed over 1300 staffing and classification request, resulting in over 600 DHS HQ positions being filled within the established 45-day timeline established by OPM. HC Operations will continue its emphasis on "ramping up" and responding to staffing/hiring needs and filling service gaps; however, the goal in FY 2007 is to expand this service strategy from its current primary emphasis on hiring to a more robust, full-service human capital organization (which includes providing more personnel staffing support).

The HC Services team provides coordination and oversight support for outsourced services supporting HQ Human Capital operational needs. The team ensures that the personnel processes for HQ's managers/employees and service providers (excluding the OIG), runs efficiently and effectively. Examples of services provided include: Staffing and Recruitment; Position Classification/Position Management; Performance Management; Payroll and Personnel Action Processing; Employee and Labor Relations Support; Retirements and Benefits Support; Time and Attendance Support.

The HC Services Team will provide: *coordinated and prioritized services* to all DHS customers; will ensure timely and effective recruitment of staff, effectively manage the "on-board" staffing process (which includes security clearances and collaboration with the Personnel Security Office), quality personnel staffing services; and, efficient and effective facilitation of staff exiting out of DHS HQ. Performance measures of effectiveness and customer satisfaction surveys will be developed and utilized to gauge our ability to service DHS customers.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each Component's number of FTE divided by the total number of participating component's FTE multiplied by total estimated cost of the activity.

Full Time Equivalent: This activity requires four FTE.

Human Capital Business Systems (HCBS) – Fee for Service Activity

Description of Service: The mission of the HCBS is to design, develop, acquire, implement, maintain and support DHS enterprise-wide HC business systems. The system capabilities meet the requirements specified by the user-community and provide services in a timely, user-sensitive and cost-effective manner.

As an example of the HCBS enterprise approach, two enterprise systems have been acquired; a PeopleSoft HRMS and a web based Time and Attendance system. Both systems are hosted at the National Finance Center (NFC) which already supports the DHS payroll system.² This yields a DHS leveraged, cost effective approach where three integrated systems are supported by one service provider. The HCBS unit managed the acquisition process utilizing Component participation through requirements gathering and vendor negotiations. In the past, several individual government entities purchased these systems "on their own", but none have been able to match the competitive pricing that DHS secured via the HCBS enterprise approach.

HCBS continues its enterprise acquisition strategies on behalf of all of DHS Components, avoiding considerable duplicative costs if DHS Components proceed independently. In addition to the T&A system mentioned above, this includes additional enterprise HR services and

² Please note that O&M costs for the PeopleSoft HRMS are included in the NFC Payroll/Reporting section and are charged only to TSA and Coast Guard in FY 2007. It has not yet been determined which additional Component's will wish to participate in and fund this NFC modernized system.

applications; web-based Performance Management (or “e-Performance); Employee/Labor Relations Case tracking; the Reward system for market-based pay analysis; Pay Tools/Utilities to assist with new pay cluster and band determinations; and an e-Classification/e-Recruitment enterprise system, to name a few. In each case the Components are supported by the HCBS unit in a collaborative and leveraged approach.

As this program focuses on reengineering human capital management and implementing information technology and associated business processes for the HC community, the composition of the HCBS team reflects the need for expertise in several areas, including: strategic planning; human capital business reengineering; business planning and requirements and integrated product development; system integration; data management; system security; and software development. Specifically, the HCBS will provide services and support such as: payroll conversion; personnel/payroll liaison; advocacy for the Component business interests and system changes; management of eGov initiatives such as eOPF and eTraining; supplemental training and end-user support; reporting and analysis; NFC reimbursable process; and centralized system changes for MAX^{HR}. In addition, the office will administer other CHCO programs, such as Worker’s and Unemployment Compensation, Flexible Spending Accounts, and Employee Express³, that will benefit all of the DHS organization or a group of specific Components, such as HQ.

In addition, HCBS will also provide oversight of the DHS eTraining initiative. One Program manager was hired in FY 2005 to oversee the DHS Headquarters (HQ) Learning Management System (LMS) – which, (in addition to the Government-wide “e-Gov” initiative), is included in the CIO’s WCF budget, and ensures that Learning Management training objectives are met. This staff person was new in FY 2005 and included in this FY 2007 base budget. Oversight responsibility includes LMS, ensuring courses align with strategic goals, and working with Components to align their e-learning activities.

Benefit to the Customer: HCBS’s services provide a strong value proposition for Components. Instead of each Component taking an individual approach, challenged by limited resources and competing initiatives, the HCBS offers a leveraged approach where it shares its resources and expertise towards deploying and managing enterprise solutions in collaboration and to the benefit of the Components. The role of the HCBS unit supports the enterprise perspective by capitalizing on lessons learned and industry best-practices to benefit the entire department. This type of centralized and collaborative approach with Components has proven to be successful and cost-effective for other Federal agencies.

HCBS is able to assist Components by providing an efficient means of acquiring technical services, contractual support, and subject matter experts (SME) with rare and difficult to hire skills. Specifically, the HCBS Team helps with: requirements development; system design;

³ We understand that functionality in NFC’s Personal Page is duplicated in Employee Express, however, Employee Express has interactive voice response functionality required by employees who have no access to computers. We are working with our Components to determine a shutdown schedule for Employee Express, where possible.

market surveys; software demonstrations; contract sourcing, evaluation, vendor negotiation, and administration; hosting selection and management; application software maintenance; security and Privacy Act compliance; user application training; and project management. Components can leverage this HCBS' expertise and departmental buying power benefiting from competitive pricing that DHS has been able to negotiate through its enterprise acquisition strategies. The HCBS unit further supports the Components by taking all enterprise solutions through the entire DHS approval process including Certification and Accreditation, Privacy Impact Assessment, Enterprise Architecture Review, Technology Insertion and Investment Review Processes required of all applications under a given program. This saves the Components precious time and expense as the HCBS team will complete all needed approval processes at the department level.

A specific example of HCBS services benefiting a component in FY 2007 is work being done for the U.S. Coast Guard (USCG). USCG will be converting to the NFC Payroll/Reporting System at the end of FY 2006, as will the Transportation Security Administration (TSA). HCBS staff will be assisting with configuration, deployment and maintenance support for EmpowHR (the new modernized front-end system) and their conversion for WebTA (the new modernized time and attendance system). HCBS staff will also be leading the development and implementation of NFC required business changes to support new MAX^{HR} pay and performance programs and, ultimately, planning for the within-grade buyout process. In essence, HCBS will be the largest source of NFC knowledge supporting these two Components post conversion.

HCBS has prioritized and coordinated services from NFC, including direct HCBS interface with NFC for faster and more efficient customer service. NFC is required to deal with one point of contact for each customer – and DHS is now one customer. It is to our (business) advantage to help NFC help us by providing a centralized customer service center.

Below is a more detailed description of enterprise HR applications and services that are mentioned on page one and will hopefully answer some of the “What are we getting for our money?” and “What does this do for me?” questions that we have received.

✓ e-Performance: To support the new performance management process, a Web-based tool powered by SoftScape, Inc. has been selected by DHS to assist employees and managers in their enhanced performance management responsibilities. SoftScape, which will be integrated into overall MAX^{HR} program changes, is a commercial performance management application that is used by 1.7 million customers in 42 countries, including several big name corporate, state, and local clients. Among its many features, the system offers the advantage of Web-based workflow to facilitate performance management processes such as:

- Interactive Goal Planning and Communication, allowing both employees and their supervisors to participate in the goal development process and to automatically link organizational goals to individual or team/unit performance plans.
- On-Line Journaling, facilitating better record keeping of employee accomplishments throughout the performance year. Both the supervisor and the employee will have access to this feature.

- Self Assessment, providing an opportunity for employees to complete an assessment of their own accomplishments for consideration by their supervisor at year's end.
- Peer review and manager feedback, accommodating subordinate input to supervisory performance reviews and facilitating the selection of peer review teams (i.e., customers, co-workers) as additional input sources for both employee and supervisor performance reviews.
- Embedded Competencies, facilitating development and coaching discussions throughout the performance year.

Use of an automated performance management tool will provide significant advantages in the department's efforts to monitor the administration of the new performance management system. For example, the automated system will provide real time status information on supervisory completion of goal planning and assessment activities.

✓ WebTA: The new Web-based time and attendance system, called WebTA, was recently selected as the DHS enterprise standard and will eventually be used across the department. Some of the planned features of the time and attendance tool—and their benefits to employees and supervisors—will include:

- A Web-based system replacing workstation-based systems that are currently only accessible to designated timekeepers. Employees will be able to input time themselves, from any location with Internet access.
- Paperless leave requests eliminating the need for paper-based leave request/authorization forms. Automated workflow will assist in routing and processing employee leave requests.
- Built-in calendaring functions allowing supervisors to view requested and approved leave time at a glance and to assist in leave planning for peak holiday periods.
- Automated leave transfer capability.

✓ e-Payroll: At the time of the department's formation, payroll services for DHS employees were handled by eight different payroll providers. During the past two years and working in conjunction with an Office of Personnel Management sponsored ePayroll initiative, DHS has made significant progress in consolidating payroll operations. Currently, there are only two remaining payroll providers for DHS: The National Finance Center (our target end state payroll provider) and the department of Transportation (which currently services TSA and Coast Guard). Final testing was done for migrating TSA and Coast Guard to the National Finance Center, and final conversion ended late August 2005. Through this conversion, TSA and Coast Guard are also availing themselves to new human resources processing capabilities, which are based on PeopleSoft commercial software. PeopleSoft commercial software was also chosen as a new DHS standard this past January and will eventually be phased to all DHS Components.

The benefits of these payroll and HR processing changes, while largely transparent to employees, provides the department with an important single source of payroll and HR information. Payroll consolidation is also an imperative precursor for the MAX^{HR} program, as many of our policy changes, like new occupational clusters and new pay bands, will have profound impact on the HR and payroll processing systems. It is highly preferable to work these system changes with one payroll provider, rather than many.

✓E-Recruitment: A variety of recruitment systems are currently in use by DHS Components. As part of the effort to consolidate and modernize the HR systems, the DHS HCBS unit will lead an effort to consolidate towards an automated DHS enterprise solution that can contribute to material improvements in the overall hiring process. Automated and paperless hiring systems are excellent tools that can support:

- Human Capital Management and Workforce Planning
- Maximizing the size and quality of candidate pools for positions at all levels of the Department
- Providing selecting officials with the best-qualified candidates in the minimum time
- Applicant tracking
- Evaluating candidate characteristics and diversity
- Entry on Duty processing
- Meeting or exceeding the 45-day hiring model under the President's Management Agenda
- Dramatically decreasing the time and effort of the applicant and selection process
- Achieving these outcomes with overall efficiency and the least expenditure of resources
- Applicant database mining
- Seamless movement of job seekers to agency automated recruitment system

The use of an automated recruitment solution is necessary to meet mission critical needs of the Department. Technology-enabled recruitment can deliver both time savings and improved results. E-Recruitment is a broad term that encompasses the five major Components of the hiring/recruitment process:

1. Workforce Planning: Demand planning; supply planning
2. Requisitioning: Job descriptions; approval workflow; job posting
3. Candidate Acquisition: Referral management; candidate application; candidate screening/assessment; candidate marketing; candidate scoring/search
4. Applicant Tracking: Applicant workflow; communications/correspondence management; interview management; background checking/drug screening; "on-boarding"
5. Reporting/Analytics: Regulatory reporting; standard reporting/analytics; advanced analytics

- ✓ REWARD™ is a suite of globally accessible compensation management applications that automates all aspects of compensation administration and pay delivery. Hosted by Watson Wyatt, REWARD is used in managing compensation programs. The Reward Suite is used to build and maintain compensation structures and broad bands, determine job levels by assessing internal job values and the competitive market, price jobs from REWARD's survey data warehouse, manage compensation survey data, market-price jobs and evaluate pay practices and link pay to performance.
- ✓ HSLRB Tracking System: Web-based system used to track the status of labor relations cases that are presented before Homeland Security Labor Relations Board (HSLRB).
- ✓ Pay Tools/Utilities: Web-based custom applications that are designed to provide support for HR specialists in setting pay, determining eligibility for pay, and other pay-related transactions. These tools will be based on the new pay rules and regulations.
- ✓ e-OPF - Replaces the paper Official Personnel Folder (OPF) with an electronic Official Personnel Folder (eOPF). Like the current paper folder, the eOPF will encompass employees' entire Federal work histories. The eOPF will comply with all OPM record-keeping guidelines and protections. In addition, employees will realize significant benefits with the eOPF, including:
 - Secure online access via the Internet. Official records will be electronically protected and backed up, and security controls will far exceed current manual paper handling processes. Strict adherence to privacy rules via a multi-level user security structure. The system provides an audit trail of who accessed and when.
 - Immediate access to the folder and the information it contains. Employees will be able to view or print their e-OPF online, at home, or at work to check their personnel file information or verify its accuracy. Employees will receive automatic email notification when documents are added or changes are made to their e-OPF.

Cost Allocation Methodology: DHS population serviced assumes billing based on the "average number of employees paid" (which is a snapshot for 12 mo. Pd prior to July 30, 2005 - which is consistent with NFC billing).

- ✓ For the T&A system, the population serviced is 75,583 - HQ, USSS, TSA, USCG.
- ✓ For the Performance Management system, the population serviced is 39,259 - USCG, HQ, USSS, FEMA, FLETC, and ICE.

It is important to note that for HRIT Systems, only those Components that are benefiting from specific systems are being charged in the year that they benefit – i.e., some Components system may be rolled out in FY 2007.

Full Time Equivalent: This activity requires sixteen FTE.

Flexible Spending Accounts (FSA) Administrative Costs – Fee for Service Activity

Description of Service: FSAs are employee-funded accounts that used by the employee account holder to pay for medical expenses that are tax deductible, but not reimbursed by any other source, as well as eligible dependent care costs. Contributions to the accounts come from an employee's pre-taxed salary; the Government does not make a contribution. There is a fee that is paid to the administrator of these accounts. The law now requires that agencies pay these fees on behalf of their employees.

The costs for this program are charged back based on actual invoices received in October and March of each calendar year. The March bill assesses a fee for employees of record as of January 1 of the calendar year. The October's bill makes an adjustment for any new employees who have entered the program since January 1. The October bill is generally small, but it is not received in time to be paid out of the appropriation for the year in which the cost was incurred. The Human Capital Business Office will manage the invoicing process with the FSA provider and charge the direct cost of the fees to the component based upon actual invoices received from the vendor.

Generally, the Department saves enough money in reduced payroll tax to cover administrative fees. We believe administering the costs of these services through the WCF will provide for greater efficiencies through centralized management.

Cost Allocation Methodology: The allocation methodology for the component assumes the total cost times the transaction % - which is the component's percentage of the population serviced (FTEs).

Full Time Equivalent (FTE): This activity requires no FTE.

DHS Executive Leadership Development – Fee for Service Activity

Description of Service: A well executed Executive Leadership Program is a key element in sustaining a "One DHS" culture. Developing and delivering the leadership curriculum in FY 2007 supports both the DHS Strategic Plan -- Goal 7: Organizational Excellence; Objective 7.3, and the Human Capital Strategic Plan. These efforts have also been addressed in Congressional testimony. For FY 2007, at a minimum the Executive Leadership Curriculum will consist of two DHS-wide leadership development activities:

- **Secretary's Senior Leadership Conference;**
- **Senior Executive Service Candidate Development Program (SES-CDP).**

The **Secretary's Senior Leadership Conference** is important as change management starts with top leadership. The purpose of this conference is to:

- Provide an opportunity for the Secretary to meet with DHS executives and for those executives to interact with each other;
- Broaden the perspective of DHS leadership by actively creating a forum for in-depth dialogue and discussion for cross-cutting Departmental issues;
- Allow executives to learn about both key DHS-wide and Component-specific strategic and tactical initiatives for the coming year, including implementation of MAX^{HR}, which is predicated on strategic linkage of resources, performance and results;
- Provide perspective from the White House, Congress, and others on issues important to DHS.

The DHS Senior Executive Service Candidate Development Program serves as a cornerstone for sustaining a corporate leadership identity (i.e., creating a “One DHS” culture) – as directed in the DHS Strategic Plan; contributes to meeting our succession planning goals; and creates a high-quality, SES leadership cadre. It is also a critical element in sustaining a “Green” under the President’s Management Agenda’s Human Capital Scorecard. Most cabinet level agencies have a corporate level succession planning program.

Recent workforce analysis focusing on DHS’ top leadership positions, indicates that over a third of this leadership cadre is eligible to retire or will be within two years. A formal succession planning program ensures that emerging leadership needs and critical competency gaps are adequately addressed.

Funding requested for the SES CDP is \$950K. We are estimating approximately 30 participants in the SES CDP at a cost of \$25,000 each (\$750K). This budget may also be used to fund one contractor to help implement the SES CDP (addition \$200K). This includes developing and implementing SES Candidate special events and activities, and collecting and conducting qualifications assessments of Component nominated candidates.

This centralized program is intended to complement and enhance the strengths of existing Component Leadership development initiatives across the Department and further facilitate **succession planning** opportunities. The SES CDP will use the DHS Leadership Competency Framework to guide the competency development process. The staff person implementing the SES CDP will collaborate with Components to identify participant competency gaps and to identify courses and development opportunities to address those gaps. The independent contractor will provide a formal assessment process for selecting participants, an assessment instrument for identifying participant development needs, and program consultation.

A key component of this program is the opportunity for participants to take advantage of developmental/rotational opportunities in other DHS Components, thereby, increasing participant’s “corporate” DHS knowledge and experience. In addition, Components benefit from these rotational assignments by having a senior staff person working with them on real issues and offering different perspectives and/or business experiences. One of the goals of this

program is for these candidates to be selected by OPM into the DHS SES corps. We ultimately seek to foster the development of a senior executive corps that operates with a DHS perspective in addition to a component perspective on critical issues.

Cost Allocation Methodology: The costs are allocated based on the percentage of SES slots a Component has relative to the total DHS SES (or SES equivalent) population excluding military. Allocation methodology for the Component's assumes the total cost times the transaction % - which is the Component's percentage of the population serviced.

Full Time Equivalent: This activity requires no FTE.

HQ Executive Leadership Development/General Workforce Training- Fee for Service Activity

Description of Service: The HQ ELDP provides executive level training to close potential competency gaps in our DHS Headquarters leadership. It supports both the DHS Strategic Plan – Goal 7: “Organizational Excellence”; Objective 7.3, and the Human Capital Plan Goal: Exhibit Human Capital Excellence by fostering a “One DHS” organizational climate. Programs to support Executive Leadership are provided through the following programs: The Treasury Executive Institute (TEI); the SES Forum; and, the Individual Executive Development Training and General HQ Workforce training. In addition to TEI and the SES forum, training opportunities could include attending courses in the Management Development Center (Shepardstown, WVA) or the Federal Executive Institute.

Cost Allocation Methodology: The allocation methodology for the Components is the total cost divided by the population serviced.

Full Time Equivalent (FTE): This activity requires one FTE.

HQ Employee Assistance Program (EAP)— Fee for Service Activity

Description of Service: The EAP program includes short term counseling for employees and family members, critical incident stress debriefing, peer support programs, short term counseling, management consultations, information and referral to community resources for mental health providers, mental health education training, and peer trauma team support. Early interventions may prevent or minimize long term emotional stress reactions of trauma victims and their families/colleagues. EAP assistance enables employees to achieve and maintain balance in their lives, increasing job performance, satisfaction, and morale. The development of a Peer Support Program will enhance management's ability to provide assistance in traumatic and critical incidents – both on the local level to our employees and on the national level to our employees and the public.

The EAP program is in support of DHS' Guiding Principle to Develop Human Capital and Strategic Objective 7.3: To ensure effective recruitment, development, compensation, succession management and leadership of a diverse workforce to provide optimal service at a reasonable cost. The EAP is mandated under 5 U.S.C. 7904, 42 U.S.C. 290dd-1(a), and 42 U.S.C. 290ee-1(a).

The EAP deals with a wide range of personal problems of employees that can adversely affect job performance, conduct or attendance. The EAP offers confidential, professional, short-term counseling to employees and their families who are experiencing, or are affected by, personal or behavioral problems including but not limited to alcoholism, drug abuse, job stress, family problems and mental health problems. EAP services include but are not limited to short term counseling, consultations with management, information concerning community resources and referral to such resources, health education, training, and response to traumatic incidents such as shootings, line of duty deaths and terrorist attacks. The EAP is designed to provide assistance to employees to enable them to achieve and maintain balance in their lives, thereby maximizing work performance, job satisfaction and morale. A Peer Support Program conducted under the auspices of the EAP will provide management with an additional resource for critical incident response.

Cost Allocation Methodology: The cost allocation methodology for this activity is the total cost of the EAP program divided by the population serviced – HQ – 3,244 FTE, which includes the Office of Inspector General. Allocation methodology for the Components assumes the total cost times the transaction % - which is the Components percentage of the population serviced.

Full Time Equivalent (FTE): This activity requires no FTE.

CIO/DHS Infrastructure Transformation Program – Fee for Service Activity

Description of Service: The DHS Consolidated IT Infrastructure serves the majority of the 180,000 employees who transferred into the new Department on March 1, 2003. Since the IT infrastructure provides the foundation for effective operations of DHS systems and applications, including information sharing across Components, a reliable and robust infrastructure is critical to the success of the DHS mission. From a business perspective, the goal of the IT infrastructure transformation is for the Department to be able to share data from any point in DHS to any decision maker.

The program seeks to create a robust platform on which to quickly launch new capabilities. For example, the newly combined Components support 15 separate targeting systems, 14 alerts and warnings systems, and a handful of identification and credentialing systems. Moreover, DHS runs 15 data centers, six wide area networks, and multiple local area networks with overlapping system circuitry. The data centers contain over 12,000 servers. Contrasting acquisition strategies and IT infrastructure policies among Components further complicate the DHS environment.

The Infrastructure Transformation Office (ITO) has been chartered by the CIO Council and resides within the Office of the CIO. The office is led by a Director and a CIO Council member executive sponsor and is supported by a senior executive steering group of CIOs, which is staffed by a team of technical experts hired by the Department HQ from the Components, several Components working group members, and contractor support. The project is broken down into the following four "areas":

Operations Center: Each Component currently employs its own helpdesk, network operations centers and security operations centers. The objective of this project team is to establish and implement one centrally managed, collocated DHS Integrated Help Desk/Network Operations Center/Security Operations Center that supports the entire DHS IT Infrastructure. These functions will ensure that user problems are identified, tracked and solved expeditiously, that the network is continuously monitored and maintained in an operational status, and that the IT infrastructure remains secure.

Data Center: DHS runs 15 data centers in the current environment. The objective of this team is to reduce the number of data centers down to no more than a handful as appropriate. The project team seeks to increase the efficiency and cost effectiveness of DHS data centers through first co-locating data centers and centralizing data center services, and then consolidating systems onto fewer platforms. DHS data centers will be implemented with the same standard configuration and will be mirrored for redundancy, fail over, and load balancing.

Network: DHS has identified six wide area networks and a multitude of local area networks. DHS must move toward a single, reliable, scalable, secure, and survivable data communications network (wide and local area networks) to support IT users as they employ mission and business-critical systems and applications to gather, transmit, store, secure, query, and retrieve the data required for them to do their jobs. The project team is in the process of streamlining and standardizing the network environment, minimizing the amount of redundant infrastructure and will develop a department-wide network topology with centralized processes and procedures. The network infrastructure will provide a transport mechanism allowing full interoperability within DHS to be accomplished in alignment with existing requirements.

Desktop & Collaboration: DHS currently supports various operating systems, desktops, and collaborative tools in its current desktop environments. Through this investment, DHS will deploy and manage a common desktop and collaborative environment. Users will conduct business using standard terminal devices and collaboration tools within a centrally managed infrastructure based on the foundation of one network. The standardized desktop and collaboration environment will provide interoperability as well as a stable foundation for incorporating new requirements and for providing regular upgrades and technology refreshments. The collaboration tools will provide DHS with a capability that will allow any DHS employee to communicate with any other DHS employee from any workstation or telephone that is part of the enterprise.

Cost Allocation Methodology: The cost allocation methodology is based on direct negotiations with the Components CFO's and CIO's.

Full Time Equivalent (FTE): This activity requires ten FTE to oversee the design, operations and deployment of the new desktop, operations centers and data center functions.

National Capital Region Infrastructure Operations (NCRIO) - Fee for Service Activity

Description of Service: The NCRIO will serve the majority of DHS Headquarters users for network, email, internet, intranet, and telecom infrastructure, as well as all end user desktop computing, telecom, and wireless services. NCRIO's Program Management Office (PMO) coordinates management and deployment of infrastructure resources along with build-out of new facilities and provides continuous operations, help desk, vendor management, financial management, and technology evaluation. Working with Directorate CIOs, NCRIO will ensure effective customer service, performance management and measurement for continuous availability of all critical infrastructure services along with vendor effectiveness and accountability. The WCF for the NCA IT Infrastructure includes expenditures for data (network), voice (phone) and video (VTC) support for users in DHS HQ, BTS Office of the Under Secretary and the Office of the Inspector General.

Cost Allocation Methodology: The FY07 WCF submission is allocated among the four participating organizational Components, USM, Under Secretary for Preparedness, S&T, and Operations Coordination. & Intel and Analysis as agreed upon in the Memorandum of Understanding for Shared Services Allocations. The MOU separates the NCAIO costs into service categories, which further allocate the costs by specifically agreed upon algorithms. For the purposes of meeting budget submission timelines some proxies to the MOU were made, i.e. seat counts were based on personnel projections as apposed to the count of end-user desktops and laptops. These proxies will be replaced by actual costing information throughout FY07 on a quarterly basis and each participating organizational component's costs will be adjusted.

For projection purposes, a personnel projection of 160 was included to capture the expected growth for DNDO and kept separate since it is not known where this organization will reside at DHS. The OCIO carries the cost for up to 830 DHS HQ staff. Under Secretary for Preparedness, S&T, Operations Coordination & Intel and Analysis, and US Visit are not included in the 830 headcount.

Full Time Equivalent (FTE): This activity requires nine FTE.

Software Enterprise Licenses - Fee for Service Activity

Description of Service: A standard and consistent DHS process provided by a centralized tool will facilitate compliance and oversight responsibilities of the Chief Information Security Officer (CISO) and the Office of Inspector General. The Department continues to pursue opportunities

to benefit from economies of scale, moving from component or office specific software licenses to larger enterprise licenses for common services.

Microsoft: The account provides for the funding and management of the Microsoft Enterprise Agreement awarded June 2003, which provides enterprise access to the Microsoft suite of products. The products include the software needed for both the individual desktop, laptop, and server platforms, such as MSOffice, MSProject, MSVisio, MS Advanced Server, etc. This agreement is utilized by all of DHS. The request reflects the contractual obligations of each of the Components.

Cost Allocation Methodology: The cost allocation methodology is the unit contract costs multiplied by the number of sites or licenses each Component requested.

Full Time Equivalent (FTE): This activity requires one FTE to facilitate compliance and oversight responsibilities of the various software licenses.

SMARTCARD - Fee for Service Activity

Description of Service: The Public Key Infrastructure (PKI) service provides digital certificates and certificate validation services for the DHS smartcards. The Smart Card program is managed by the OCSO and the PKI program is managed by the OCIO. The FY 2007 request is for PKI services which include: Identification, Signature and E-Mail Encryption certificates for 82,800 smart card users, certificate validation services and support for each user. The Smart Card Program provides for implementation of a Department-wide identification system for DHS federal employees, contractors and detailees in accordance with Homeland Security Presidential Directive (HSPD 12) of August 27th 2004 and NIST publication FIPS 201. This initiative combines the cyber security infrastructure and the physical security infrastructure in a single enterprise-wide security model by requiring a single universally accepted FIPS token, the DHS Access Card.

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each organizational element's Full Time Civilian Equivalent (FTE) divided by DHS's total Civilian FTE multiplied by total estimated cost of the activity. This activity only benefits Civilian personnel; therefore Military FTE is excluded in the Cost Allocation Methodology.

Full Time Equivalent (FTE): This activity requires no FTE.

Procurement Operations - Fee for Service Activity

Description of Service: The DHS Office of Procurement Operations (OPO) provides full service acquisition support to the Office of the Secretary, the Undersecretary for Management, Science and Technology, U.S. Citizenship and Immigration Services, and the US Visit Program Office. In addition, the OPO provides acquisition services for department-wide acquisition initiatives identified by both the Chief Information Officer and the various commodity councils within DHS. Services provided include acquisition planning, training, execution, and administrative services.

Cost Allocation Methodology: The cost allocation methodology for this WCF activity is based on 1.4% of the obligated dollars of the Component's purchases, the number of purchases, and the total number audited documents.

Full Time Equivalent (FTE): This activity requires 220 FTEs in FY 2007 to provide client support for procurement, grants and surge works. These FTE are reimbursable to OCPO and are new FTE and new hires. These FTE are physically organized under OCPO and are housed in OCPO facility space.

Board of Contract Appeals - Fee for Service Activity

Description of Service: The Federal Acquisition Regulation (FAR) requires that DHS establish a venue to hear and resolve contractor disputes, protests, and other issues within its jurisdiction related to DHS contractual matters. After analyzing the pros and cons to establishing a DHS Board of Contract Appeals, DHS determined establishing an interagency agreement with the Department of Transportation was the most cost effective way to provide these services.

The customer is provided a professional venue that provides both the contractor and the neutral forum to resolve contractor disputes and protests. Standards for timeliness and quality of services are defined in the FAR. This activity is an established venue with a long track record of professional services. The Component does not have to establish an interagency agreement for these services and DHS provides the initial good faith outlay.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's FTE divided by the total FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

Government Advisory Committee Survey Training - Fee for Service Activity

Description of Service: The Government Advisory Committee Survey Training is designed specifically to identify the critical success factors associated with active, engaged, and effective Federal Advisory Committees. The Advisory Committee Engagement Survey (ACES) gives measures needed to get the most from private-sector advisers. The ACES provides an objective assessment based upon feedback from the committee members and staff, which helps to fine-tune management approaches. In addition, "best practices" from world-class advisory committees can help to assure that committees are supporting the agency's mission effectively. The cost for each committee participating in the survey is \$1,000 which will cover the cost of the survey administration, training, and (including an expanded best practices briefing and a manual for use in implementing the survey results) briefing of committee managers on survey results.

Cost Allocation Methodology: The cost allocation methodology for this activity is based on the unit cost of providing survey administration and training multiplied by the number of committee surveys for each Component participating in the survey.

Full Time Equivalent (FTE): This activity requires no FTE.

Tri-Bureau Services Activity

Tri-Bureau Human Resources Shared Services – Tri-Bureau Service Activity

Description of Service: Customs and Border Protection provides human capital operations services to two additional DHS offices: Immigration and Customs Enforcement (ICE) and U.S. Citizenship and Immigration Services (USCIS). This shared service agreement is also known as "Tri-Bureau HR Services" and has as an underlying objective of shared services to ensure the most efficient and effective use of HR management resources through process improvement and automation. CBP is providing services related to hiring, staffing and classification of positions. In addition they maintain and support records management.

No funds are requested to provide oversight of HR services provided. CHCO will utilize an existing appropriated staff person to ensure coordination, collaboration and communication among and between all Tri-Bureau customers and service providers.

By moving this activity into the CHCO WCF, it moves DHS another step closer to "functional integration" and further promotes a "One DHS" corporate culture.

Cost Allocation Methodology: The cost allocation is based on the FTE population serviced and the amount of work provided to each agency serviced. The cost allocation methodology is a pro-rata share based on the percent of each component's FTE divided by the total number of participating Components' FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

IT Services from Department of Justice (DOJ) – Tri-Bureau Service Activity

Description of Service: The Department of Justice (DOJ) MOU Working Group was formed in October to perform an analysis that will clarify IT services that DHS requires from DOJ and the associated costs. The working group assists in defining the specific IT service requirements of each Component currently using DOJ as the provider ICE, CBP, USCIS, and HQ. The Tri-Bureau Components are legacy DOJ agencies. The working group is also preparing migration plans to transfer services to DHS over time.

DOJ provides the following IT services:

- **Data Center Services** - provide application hosting OS/390 platform for over 40 applications; application hosting on AIX Unix platform for over 25 applications; housing of DHS servers; and separate raised-floor computer room space and utilities.
- **Data Networks Wan Services** – provide Justice consolidated Network and FTS-2001 data services including long-distance voice and calling card services; Metropolitan Area Network; Data circuit ordering services; and secure messaging services.
- **Voice Networks WASP Services** - provide the Washington Area Switch Program that provides voice services to the Washington Metropolitan area.
- **JUST Message Switch** - provide the Justice Telecommunications Communications System (JUST) access to the National Crime Information Center (NCIC) and state and local law enforcement data for Federal Law Enforcement Agencies.
- **Web/Internet Services** – provide Internal and External Communications.

Cost Allocation Methodology: The cost allocation methodology is based on the actual usage as determined by Department of Justice.

Full Time Equivalent (FTE): This activity requires no FTE.

GOVERNMENT-WIDE SERVICE ACTIVITY

Interagency Council Funding - Government-wide Service activity

Description of Service: GSA provides oversight and administers the Interagency Council funds in consultation with the Chief Financial Officers Council, the Chief Information Officers Council, the Federal Acquisition Council and the Chief Human Capital Officers Council.

- **Chief Financial Officers (CFO) Council Funding Supports the Following Activities:**
 - Federal Audit Clearing House (FAC)
 - Grants Streamlining
- **Chief Information Officers (CIO) Council Funding Supports the Following Activities:**
 - A \$2 million contract to support the Portfolio Management Office for the ongoing E-government initiatives efforts.
 - Federal Enterprise Architecture (FEA) — the FEA PMO will continue their efforts to identify and develop collaboration and consolidation

opportunities across Federal agencies in support of the President's Management Agenda initiatives.

- **Federal Acquisition Council (FAC) Funding Request Supports the Following Activities:**
 - The Federal Competitive Sourcing Database (FCSD) is intended to facilitate comprehensive, consistent, and timely reporting of government actions related to competitive sourcing.
 - Acquisition Workforce Competency Development and Training - In 06, more agencies will use the Acquisition Career Management Information System (ACMIS) database providing workforce training data and OPM data to make strategic workforce decisions affect the agency training and certification requirements.
 - Government-wide Performance Measures for Socio-Economic Goals - Small business success is currently measured by meeting established statutory goals.
 - Procurement Center Representatives (PCRs) Online - In order to obtain the appropriate level of contributory review, and move the procurement along in a timely fashion, it would facilitate the requirement if the agencies and SBA used an online workload tool.
 - The Service Acquisition Reform Act SARA, Acquisition Advisory Panel and Report to Congress - Section 1423 of SARA requires the Administrator of OMB/OFPP to establish an advisory panel of recognized experts in acquisition law and policy to review laws and regulations regarding the use of commercial practices, performance-based contracting, the performance of acquisition functions across agency lines of responsibility, and the use of Government-wide contracts.
 - Acquisition Center of Excellence - SARA mandates the development and maintenance of a Center of Excellence in Contracting for Services.
- **Chief Human Capital Officers Council (CHCO) Funding Request Supports the Following Activities:**
 - CHCO Website - A critical component in advancing the government-wide goals of this management innovation will be the development and maintenance of a high-quality, component rich Web content delivery system. The creation of this site will establish the World Wide Web identity of the CHCO Council and provide a vehicle for sharing and exchanging information of interest to the Federal human resource management community. The system also will provide a forum for the exchange of information among members of the Council in both a public and private manner.

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each participating Component's adjusted total budget divided by DHS's total adjusted total budget (excluding grant funding) multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

Recruitment One-Stop- Government-wide Service activity

Description of Service: The Recruitment One-Stop (ROS) initiative is a Government-wide initiative led by the Office of Personnel Management (OPM). All agencies fund their portion of this program (based on employment levels). Regulations contained in 5 CFR Parts 330, 333, and 335 implement section 4 of Public Law 1054-52 and authorizes OPM to charge fees to agencies to pay the cost of providing Federal employment information and services.

This program seeks to simplify the process of locating and applying for Federal jobs. It delivers a number of new job seeker focused features including intuitive job searching; clean, concise, understandable and attractive job announcements; on-line resume submission; applicant data-mining; and on-line feedback on status and eligibility. USAJOBS Federal Employment Information System delivers state-of-the-art on-line recruitment services to job seekers including intuitive job searching, on-line resume submission, applicant data-mining, and on-line feedback on status and eligibility.

Managing Partner: OPM

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Civilian Equivalent (FTE) divided by DHS's total Civilian FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires no FTE.

E-Training – Government-Wide Service Activity

Description of Service: Creating a premier E-Training environment that supports development of the federal workforce through simplified and one-stop access to high quality e-training products and services, and, thus, advances the accomplishment of agency missions. Government-wide accomplishments derived from this activity are:

- Over 220,000 registered users and over 195,000 course completions to date
- Variable training costs have been reduced to less than a penny per student
- Launched IT security courses mapped to GISRA and NIST requirements

- Launched Module 3 which includes initial establishment of IT Communities of Practice (COP)/Knowledge Domain through the IT Workforce Development Roadmap; e- mentoring; upgraded performance support tools; and initial standardized reports.

Managing Partner: OPM

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent (FTE) divided by DHS's total FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

Enterprise HR Integration – Government-Wide Service Activity

Description of Service: EHRI is a collaborative e-Government initiative designed to transform the way Federal HR Specialists and Managers access human resource information and the way all Federal employees access their personnel file information. When fully implemented, EHRI will replace the current paper based Official Personnel Folder (OPF) with an electronic employee record for all Executive Branch employees, resulting in a comprehensive electronic personnel data repository covering the entire life cycle of Federal employment. In addition to streamlining personnel management actions, EHRI will provide HR managers and specialists with powerful workforce analytic and planning capabilities. Progress to date includes:

- In 2004 and 2005 TSA and USCG converted their OPFs to electronic format.
- In March – April, 2005 DHS/OPM Interagency Agreement (\$70K) - DHS and CBP conducted an Assessment with OPM, mapping out an enterprise approach for all of DHS.
- In June 2005 - Interagency Agreement (\$3.64M) to start the enterprise approach including needed hosting, software licensing and paper file conversions with CBP and CBP customers.
- Conversion of USSS, FLETC, and FEMA records is tentatively scheduled for FY 2007.
- FY 2007 and beyond will be in a steady state.

Managing Partner: OPM

Cost Allocation Methodology Costs for EHRI's products and services will be recovered by EHRI from all agencies on an equitable basis related to the size and usage of each participating agency. Charges to each agency will be established by distributing total EHRI costs to all clients on the basis of the number of OPFs or on the basis of actual cost, depending on the service. Usage audits will occur at OPM's discretion, but at least annually, and will be used to make adjustments to cost recovery through the Interagency Agreement (IAA). EHRI will notify DHS of their revised annual costs within DHS's annual cycle, at least 90 days prior to completion of the cycle. Billing will be done annually, in advance, using DHS's Agency Location Code (ALC) via the Department of Treasury's Inter-Governmental Payment and Collection system (IPAC).

Any optional services provided to DHS will be billed on a cost recovery basis at the time the service request is signed by both EHRI and DHS.

Full Time Equivalent (FTE): This activity requires no FTE.

Business Gateway - Government Wide Service Activity

Description of Service: Business Gateway reduces the burden on businesses by making it easy to find, understand, and comply with relevant laws and regulations at all levels of government. The Business Gateway will be the cross agency portal for businesses that integrates the content and functionality of number of federal business web sites (e.g., business.gov, businesslaw.gov, sba.gov). The goals of Business Gateway are as follows:

- Develop a catalog of federal forms for Business.gov.
- Expand harmonized miner reporting (Mine.gov) to include additional federal agencies and additional states.
- Develop the Business Gateway portal into the Federal cross-agency portal for businesses, integrating the content and functionality of SBA.gov, BusinessLaw.gov, Business.gov and related sites into one comprehensive site: business.gov.

Managing Partner: Small Business Administration (SBA)

Cost Allocation Methodology: The cost allocation methodology for this activity is pro-rata share based on the percent of each participating Component's adjusted total budget divided by DHS's adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

E-Rulemaking - Government Wide Service Activity

Description of Service: E-rulemaking is a collaborative, inter-agency activity whose purpose is to establish a common, automated and integrated approach to managing the federal government's rulemaking function. The activity consolidates rulemaking systems at the various departments and agencies and is centrally managed through a web-based environment offering such as one-stop access, search capabilities, and public commenting. E-rulemaking activities include:

- Establish and staff an e-Rulemaking Program Office to implement the Initiative, participate on an inter-agency advisory board comprised of federal agencies, and establish work groups to address projects and tasks essential to the successful execution of the initiative.
- Conduct meetings for the purpose of collaborating with other federal agencies to enhance the Initiative.

- Facilitates an effort under the Advisory Board develop to cost reimbursement formula for Agencies to support, migrate, and operate and maintain the Module 2 system.
- Develop an online rulemaking docket management system. Costs borne by EPA and reimbursed by DHS will reasonably will reasonably reflect DHS's share of the cost in FY07 to develop Module 3 and DHS's allocable share costs to support, migrate, operate, and maintain Module 2, Module 3, and related activities.
- Coordinate and ensure participating and partner members have an opportunity to review project management documentation, including Exhibit 300 of OMB Circular A-11, work breakdown structure, project plans, and statements of work.
- Execute interagency agreements to affect DHS's transfer of funds.

Managing Partner: Environmental Protection Agency

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating Component's adjusted total budget divided by DHS's adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

e-Travel – Government Wide Service Activity

Description of Service: This activity provides a government-wide web-based service that applies world-class travel management practices to consolidate federal travel, minimize cost and produce superior customer satisfaction. From travel planning and authorization to reimbursement, the e-Travel will leverage administrative, financial and information technology best practices to realize significant cost savings and improved employee productivity. Progress to date is as follows:

- 22 of 24 Agencies signed MOUs and submitted Migration plans to E-Travel.
- Completed Independent Verification & Validation and Initial Operational Capability activities.
- Achieved Full Operational Capability (FOC) – e-Travel Service (e-TS) vendors can accept task orders from Agencies.
- Awarded first e-TS task order.
- Published Federal Travel Regulation amendment requiring the 24 Agencies to have signed e-TS Task Orders by December 31, 2004 and will be deployed to e-TS on September 30, 2006.

Managing Partner: General Service Administration

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent (FTE) divided by DHS's total FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

Case Management Line of Business – Government Wide Service Activity

Description of Service: Case Management Line of Business is one of five lines of business supporting the President's Management Agenda goal to expand Electronic Government. The goal of the effort is to identify opportunities to reduce the cost of government and improve services to citizens through business performance improvements.

Managing Partner: Department of Justice

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Law Enforcement Full Time Equivalent (FTE) divided by DHS' total Law Enforcement FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

E-Grants – Government Wide Service Activity

Description of Service: E-Grants create a single portal for all federal grant customers to find, apply and manage grants on-line. The Grants.gov Storefront provides electronic functionality for applicant's grantees, and reduces the paper-based processes that currently challenge the Federal grants environment. The initiative is designed to reduce existing inefficiencies, meet E-Gov goals, and provide benefits to both citizens and the government. Specifically, the initiative enables the government to meet many of the streamlining activities required by Public Law (PL) 106-107, Federal Financial Assistance Management Improvement Act, and called in the President's Management Agenda, such as deploying a unified search/find capability for grant opportunities, standard data sets, and a common mechanism and processes for applying for Federal grants funds.

Managing Partner: Department of Health and Human Services

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each organization element grant funding divided by DHS's total grant funding multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

E-Authentication – Government-Wide Service Activity

Description of Service: The E-Authentication activity was implemented to minimize the burden on businesses, the public and government when obtaining services on-line by providing a secure infrastructure for on-line transactions, eliminating the need for separate processes for the verification of identity and electronic signatures. The goal of the E-Authentication Initiative is to provide trusted and secure standards-based authentication architecture to support the 24 government-wide e-government initiatives. This approach will provide a uniform process for establishing electronic identity and eliminate the need for each initiative to develop a redundant solution for the verification of identity and electronic signatures. E-Authentication's distributed architecture will also allow citizens and businesses to use non-government issued credentials to conduct transactions with the government.

Successful implementation of E-Authentication will produce numerous benefits for the public and the federal government. Citizens and businesses will have a secure, easy-to-use and consistent method of proving identity to the government and will be spared the burden of having to keep track of multiple sets of registration information. Federal agencies will be able to reduce authentication system development and acquisition costs and reallocate labor resources previously used to develop such systems

Managing Partner: General Service Administration

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Equivalent (FTE) divided by DHS's total FTE multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

Human Resources Line of Business (HRLOB) – Government-Wide Service Activity

Description of Service: HRLOB is one of five lines of business supporting the President's Management Agenda. Interagency teams will examine business and information technology data and best practices for each line of business – financial, human resources, grants, health, and case management systems. The goal of the effort is to identify opportunities to reduce the cost of government and improve services to citizens through business performance improvements.

Managing Partner: Office of Personnel Management

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Civilian Equivalent (FTE) divided by DHS's total Civilian FTE multiplied by the total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires no FTE.

E-gov Benefits – Government Wide Service Activity

Description of Service: The GovBenefits.gov activity provides a single point of access for citizens to locate and determine eligibility for government benefits and services. The site now offers links to 234 benefits programs, representing \$1.3 trillion in annual benefits. Program benefits are as follows:

- A partner room, with instructions on how to become a partner of GovBenefits and presentations about the project available to download.
- A press room, with general information, press releases and biographies of the management team.
- These enhancement goals to GovBenefits.gov are a direct response to citizen feedback that has been received about the site.

Managing Partner: Department of Labor

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Civilian Equivalent (FTE) divided by DHS's total Civilian FTE multiplied by total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires no FTE.

Financial Management Line of Business (FMLOB) – Government-Wide Service Activity

Description of Service: The FMLOB task force has set goals out to define, analyze, and implement options that will enhance cost savings in the financial management systems; provide for standardization of business processes and data models; promote seamless data exchange between Federal agencies; and strengthen internal controls through integration of core financial and subsidiary systems. The FMLOB task group's current objective is to evaluate alternatives and recommend overall strategy for: financial management enterprise architecture, standardization of business processes and data models, and business efficiencies in acquisition and delivery.

Managing Partner: Office of Management and Budget

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating Component's adjusted total budget divided by DHS's adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

E-gov Integrated Acquisition Environment – Government Wide Service Activity

Description of Service: The Integrated Acquisition Environment activity is a secure business environment that facilitates and supports cost-effective acquisition of goods and services in support of mission performance. The goals for the Integrated Acquisition Environment activity are as follows:

- Create a simpler, common, integrated business process for buyers and sellers that promote competition, transparency and integrity.
- Increase data sharing to enable better business decisions in procurement, logistics, and payment and performance assessment.
- Take a unified approach to obtaining modern tools to leverage investment costs for business related processes.

Program Objectives

- Deploy a single point of registration and validation of supplier data accessed by all agencies.
- Implement a central point for consolidated collection and access of statistical and management information related to government acquisitions.
- Implement a directory of contracts to simplify selection and facilitate leverage of Government buying.
- Develop a standard glossary and vocabulary to facilitate exchange of data between and within agencies.
- Transform intra-governmental ordering and billing to enable universal electronic processes, reduce payment and collection problems, and enable swift and accurate revenue and expense elimination processes for preparing consolidated financial statements.

Managing Partner: General Service Administration

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each Component's measurement of three contract acquisition variables divided by the total sum of all Component measurements of same three variables multiplied by total estimated cost of the activity. The three contract acquisition variables measured for each Component's is as follows: (1) the number of personnel providing contractor support, (2) number of contracts processed and (3) the dollar volume of contracts processed.

Full Time Equivalent (FTE): This activity requires no FTE.

E-gov Disaster Management – Government Wide Service Activity

Description of Service: Disaster Management is part of the e-Gov Act of 2002, Title II, and

Section 214 "Enhancing Crisis Management Through Advanced Information Technology" and is described in OMB M-03-18, "Implementation Guidance for the E-Government Act of 2002." This initiative, which will support disaster assistance and "all hazards" response, is a joint effort involving 10 other federal agencies that support disaster management. This initiative also supports many of the goals of the Initial National Response Plan dated October 2003.

The scope of the project covers all federal agencies that are involved in disaster recovery, as well as state, local and tribal disaster recovery organizations and individuals. The value of this program is its contribution to improving disaster preparedness and its potential to reduce property damage and loss of life. The initiative has the following goals:

Goal 1: An easy to use, unified point of access to Disaster Management knowledge and services.

Goal 2: Accelerated and improved quality of disaster mitigation and response.

Scope: The result of the initiative is a set of disaster services and information exchange delivery mechanisms that meet the nation's disaster planning and response needs. The three pillars of the Disaster Management initiative are:

- DisasterHelp.gov – A consolidated portal that provides disaster-related information and collaboration tools for the emergency management community.
- DMIS – A core incident management tool set and shared services for information exchange.
- Interoperability Standards –Interoperability standards to reduce costs and operational complexity to simplify the software interfaces needed to interact with many sources and dissemination systems.

Managing Partner: DHS / Chief Information Officer (CIO) / Science & Technology (S&T).

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's level of participation in Disaster Management divided by the total sum of all Component levels of participation in Disaster Management multiplied by total estimated cost of the activity. Levels of participation include measuring the active participation of sixteen elements of Disaster Management defined by Disaster Management E-Government Initiative Program Office, EP&R/FEMA. The sixteen elements of Disaster Management include the following: (1) transportation, (2) communications, (3) public works and engineering, (4) firefighting/incident command system, (5) information and planning, (6) mass care, (7) resource support, (8) health and medical services, (9) search and rescue, (10) hazardous materials, (11) food, (12) energy, (13) warnings and alerts, (14) research and development, (15) emergency/domestic preparedness, and (16) disaster relief. The sixteen elements are the cost drivers for each Component's assessment and because many Components are involved in various activities at different levels of participation, the cost for this activity is fairly uniform across the Components.

Full Time Equivalent (FTE): This activity requires no FTE.

<p>DEPARTMENT OF HOMELAND SECURITY CROSSCUTTING ACTIVITY</p>

Capital Planning & Investment Control (CPIC) – DHS Crosscutting Activity

Description of Service: Capital Planning and Investment Control (CPIC) is run jointly by the CFO (PA&E) and the CIO (Portfolio Management) to carry out the Department’s responsibilities for the quality and performance of its investment projects. A CPIC process is required to comply with the budget preparation guidance provided by OMB Circular A-11, Preparing, Submitting and Executing the Budget, and the management guidance provided by OMB Circular A-130, Management of Federal Information Resources, under the legislative authorities and requirements in the Clinger-Cohen Act and the Homeland Security Act. Project management offices throughout the Components prepare business cases to demonstrate to the Department and OMB that they are on-track and ready to effectively use the additional funding requested. These CPIC services include automated tools to assist with document preparation, document review and scoring, and formal training, informational briefings, and remedial coaching to improve document quality, as well as support to Program Management Offices (PMOs) in the review and feedback on briefings for DHS oversight.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating Component’s Exhibits 300 total divided by the total DHS Exhibit 300’s multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE.

Ready Campaign – DHS Crosscutting Activity

Description of Service: The DHS “Be Ready” campaign and Ready.gov web site. The campaign helps citizens make a kit of emergency supplies; make a plan of what to do in an emergency, and be informed of biological, chemical, explosion, nuclear blast and radiation threats.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating Components adjusted total budget divided by DHS’s adjusted total budget (excluding grant funding) multiplied by the total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires no FTE

Strategic Sourcing – DHS Crosscutting Activity

Description of Service: DHS has established Strategic Sourcing Group (SSG) to implement a department-wide approach to acquiring goods and services. The SSG has established commodity councils that are working to identify the department's needs for each commodity and developing more efficient purchasing mechanisms to address those needs. The total number of commodity councils established thus far is 16 covering such commodities as weapons and ammunition, uniforms, electricity, office supplies, airport services, copiers and office supplies

Cost Allocation Methodology: The cost allocation methodology is a pro-rata share based on the percent of each Component's measurement of three contract acquisition variables divided by the total sum of all Component measurements of same three variables multiplied by total estimated cost of the activity. The three contract acquisition variables measured for each Component's is as follows: (1) the number of personnel providing contractor support, (2) number of contracts processed and (3) the dollar volume of contracts processed.

Full Time Equivalent (FTE): This activity requires no FTE.

Competitive Sourcing – DHS Crosscutting Activity

Description of Service: Competitive Sourcing is required to implement the FAIR Act (P.L. 105-270) and Section 647(b) of the Consolidated Appropriations Act for FY 2004. This funding enables the Department to achieve savings and performance improvements required by the FYHSP RAPS and President's Management Agenda.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's Full Time Civilian Equivalent (FTE) divided by DHS's total Civilian FTE multiplied by total estimated cost of the activity. This activity only benefits civilian personnel; therefore, military FTE is not included in the cost allocation methodology.

Full Time Equivalent (FTE): This activity requires no FTE.

CPO Shared Reporting – DHS Crosscutting Activity

Description of Services: The DHS Shared Reporting - CPO system, known otherwise as the Homeland Security Contract Information System (HSCIS), is the acquisition data feeder system to the Federal Procurement Data System - Next Generation (FPDS-NG) that is required by statute. This data source is the primary source of all acquisition data for the federal government, used by U.S. agencies, governments around the world, the public, and the commercial world for planning marketing opportunities with the American government related to its \$310 trillion annual acquisition budget. DHS uses HSCIS to provide data to FPDS-NG and to monitor acquisition data.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each participating Component's adjusted total budget by DHS's adjusted total budget (excluding grant funding) multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires one FTE.

WCF MANAGEMENT ACTIVITY

Working Capital Fund Operations – WCF Management Activity

Description of Service: The Working Capital Fund Operations provides policy, procedures, budget formulation, execution and customer resolution services in managing the WCF. Services are provided to the activity managers as well as customer Components across DHS.

Activity Managers Budget Formulation Services:

- Oversee all budgets, make recommendations to the General Manager on all aspects of the WCF, and perform or direct all duties and responsibilities of financial management not reserved by the General Manager.
- Provide direction and assistance to program managers in the development of operating plans, budgets, and supporting documents relating to use of the WCF.
- In coordination with the Director, Budget Staff, make recommendations to the General Manager of the WCF on operating plans, rate structures and activities to be supported by the fund.

Activity Managers Budget Execution Services

- Review financial reports for conformance with program and financial plans, and inform the General Manager and other program management officials of trends and changes required in the financial plan.
- Conduct a Mid-Year Review and a Year-end Close of the Fiscal Year.

Cost Allocation Methodology: The cost allocation methodology for this activity is a pro-rata share based on the percent of each Component's WCF assessment amount divided by the total WCF assessment multiplied by total estimated cost of the activity.

Full Time Equivalent (FTE): This activity requires six FTEs to oversee all budgetary functions of the Working Capital Fund.
