

Department of Homeland Security

Budget Overview

Fiscal Year 2007
Congressional Budget Justification

Table of Contents

Introduction	1
Performance Goals and Measures by DHS Strategic Goal – Programs, the means and strategies to achieve goals, their resources and their past and planned performance.	
1. AWARENESS - Identify and understand threats, assess vulnerabilities, determine potential impacts and disseminate timely information to our homeland security partners and the American public.....	3
2. PREVENTION - Detect, deter and mitigate threats to our homeland.....	4
3. PROTECTION - Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters and other emergencies.	17
4. RESPONSE - Lead, manage and coordinate the national response to acts of terrorism, natural disasters, and other emergencies.	24
5. RECOVERY - Lead national, state, local, and private sector efforts to restore services and rebuild communities after acts of terrorism, natural disaster, or other emergencies.....	25
6. SERVICE - Serve the public effectively by facilitating lawful trade, travel and immigration.	26
7. ORGANIZATIONAL EXCELLENCE - Value our most important resource, our people. Create a culture that promotes a common identity, innovation, mutual respect, accountability and teamwork to achieve efficiencies, effectiveness, and operational synergies.	28

B. Changes In Goals and Performance Measures Based on the Achievement of Goals in FY 2005	

DEPARTMENT OF HOMELAND SECURITY

Overview

This is the Department of Homeland Security's Performance Budget. It demonstrates the performance levels associated with the FY 2007 President's Budget and implementation of the first year of the Department's Future Years Homeland Security Program, FY 2007 to FY 2011.

This performance budget is submitted in compliance with the Government Performance and Results Act of 1993 ("GPRA" or the "Results Act") requirements for an Annual Performance Plan following Office of Management and Budget (OMB) guidance. The performance goals and measures targets contained in this Overview are those for subsequent reporting in the Department's Annual Performance and Accountability Report for FY 2006.

The overview begins by stating what DHS intends to accomplish to fulfill its mission and achieve its goals and objectives for the level of funding requested, thus accomplishing its vision:

The mission of the Department of Homeland Security is:

We will lead the unified national effort to secure America. We will prevent and deter terrorist attacks and protect against and respond to threats and hazards to the nation. We will ensure safe and secure borders, welcome lawful immigrants and visitors, and promote the free-flow of commerce.

What DHS intends to accomplish in FY 2007 by strategic goal including:

- **The Programs, which are the means and strategies to achieve goals**
- **Program Performance Goals and Measures,**
- **Resource budgets, both dollars and staffing levels by program,**
- **Past performance accomplishments in meeting targets.**

The following tables show the contribution of DHS programs to achieve the DHS strategic goals as demonstrated by program performance goals, measures and targets. Programs are the means and strategies to accomplish the strategic plan. For each program the staff levels and budget including component allocated overhead are shown to achieve the performance goals. Program tables are arrayed under the DHS strategic goal they most strongly support, although may support multiple DHS goals and objectives. Each program table shows all the DHS strategic objectives it supports.

This document has purposely been kept brief, in the belief that too much information can overwhelm rather than inform. Yet, by providing key information on programs it provides a comprehensive understanding of DHS is plans. For further details, additional information is available from three primary sources:

- The body of the DHS Congressional Justification for the President Budget, which includes detailed information by DHS's components,
- Supplemental information to this Overview is available at www.dhs.gov.
 - Appendix A on verification and validation of measured values,
 - Appendix B on changes in goals and performance measures based on the achievement of goals in FY 2005.
- Classified supplements available as appropriate.

STRATEGIC GOAL - 1. AWARENESS - Identify and understand threats, assess vulnerabilities, determine potential impacts and disseminate timely information to our homeland security partners and the American public.

Objectives established by the Department to achieve this goal are:

- 1.1 - Gather, fuse, and analyze all terrorism and threat related intelligence.
- 1.2 - Identify and assess the vulnerability of critical infrastructure and key assets.
- 1.3 - Provide timely, actionable, accurate, and relevant information based on intelligence analysis and vulnerability assessments to homeland security partners, including the public.
- 1.4 - Develop a Common Operating Picture for domestic situational awareness, including air, land, and sea.

Principle means and strategies to achieve these objectives are the following programs.

Program: Analysis and Operations						
Performance Goal: Deter, detect, and prevent terrorist incidents by sharing domestic situational awareness through national operational communications and intelligence analysis.						
DHS strategic objectives supported and % allocation of activities: 1.3 - 100.0%						
Measure: Percent of Federal, State and local agencies that maintain connectivity with the Homeland Security Operations Center (HSOC) via Homeland Security Information Network (HSIN) and participate in information sharing and collaboration concerning infrastructure status, potential threat and incident management information	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	33% (Baseline Estimate)	Sensitive	Sensitive
	Actual	None	None	7%	N/A	N/A
Lead Organization: Analysis and Operations	\$ Thousands	N/A	N/A	N/A	\$255,500	\$298,663
	FTE	N/A	N/A	N/A	406	475

Program: Intelligence						
Performance Goal: 100 percent distribution of sensitive threat information relative to Department of Homeland Security / Transportation Security Administration components, field elements and stakeholders.						
DHS strategic objectives supported and % allocation of activities: 1.1 - 100.0%						
Measure: Number of successful attacks resulting from mishandling or misinterpreting intelligence information received by TSA intelligence service.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	0	0	0
	Actual	None	None	0	N/A	N/A
Lead Organization: Transportation Security Administration	\$ Thousands	None	None	\$14,000	\$21,000	\$21,000
	FTE	None	None	99	95	95

Program: Transportation Vetting and Credentialing						
Performance Goal: Prevent known or suspected terrorist from gaining access to sensitive areas of the transportation system.						
DHS strategic objectives supported and % allocation of activities: 1.3 - 50.0%, 2.5 - 50.0%						
Measure: Number of successful attacks to the transportation system that should have been prevented by the program.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	None	0	0
	Actual	None	None	0	N/A	N/A
Lead Organization: Transportation Security Administration	\$ Thousands	None	None	240,686	\$389,296	\$130,801
	FTE	None	None	104	125	128

STRATEGIC GOAL - 2. PREVENTION - Detect, deter and mitigate threats to our homeland.

Objectives established by the Department to achieve this goal are:

- 2.1 Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws.
- 2.2 Enforce trade and immigration laws.
- 2.3 Provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities.
- 2.4 Coordinate national and international policy, law enforcement and other actions to prevent terrorism.
- 2.5 Strengthen the security of the nation's transportation systems.
- 2.6 Ensure the security and integrity of the immigration system.

Principle means and strategies to achieve these objectives are the following programs.

Program: Border Security Inspections and Trade Facilitation at Ports of Entry						
Performance Goal: Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.						
DHS strategic objectives supported and % allocation of activities: 2.1 - 67.7%, 6.4 - 32.3%						
Measure: Advanced Passenger Information System (APIS) Data Sufficiency Rate. (Percent)	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	94.2%	99.1%	99.2%	99.3%
	Actual	None	98%	98.6%	N/A	N/A
Measure: Border Vehicle Passengers in Compliance with Agricultural Quarantine Regulations (percent compliant).	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	96.4%	94.6%	94.6%
	Actual	None	None	93.68%	N/A	N/A
Measure: International Air Passengers in Compliance with Agricultural Quarantine Regulations (percent compliant).	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	97%	97%	97%	97%
	Actual	None	97%	95.8%	N/A	N/A
Measure: Percent of canines with 100% detection rate results in testing of the Canine Enforcement Team.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	98.7%	99.0%	99.0%
	Actual	None	None	99%	N/A	N/A
Measure: Number of foreign mitigated examinations waived through the Container Security Initiative.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	10,000	24,000	28,000
	Actual	None	2,416	25,222	N/A	N/A
Measure: Percent of worldwide U.S. destined containers processed through Container Security Initiative (CSI) ports	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	68%	81%	86%
	Actual	None	48%	73%	N/A	N/A
Measure: Compliance rate for Customs - Trade Partnership Against Terrorism (C-TPAT) members with the established C - TPAT security guidelines.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	98%	90%	88%
	Actual	None	None	97.0%	N/A	N/A
Measure: Percent of Sea Containers Examined using Non - Intrusive Inspection Technology (NI)	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	5%	5%	5.25%	5.5%
	Actual	None	5.2%	8.1%	N/A	N/A

Continued on next page

Measure: Percent of Truck and Rail Containers Examined using Non - Intrusive Inspection (NII) Technologies	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	10%	10%	10.25%	10.5%
	Actual	None	26.2%	28.9%	N/A	N/A
Lead Organization: Customs and Border Protection	\$ Thousands	None	\$3,293,889	\$3,282,459	\$3,490,801	\$3,616,633
	FTE	None	25,007	26,123	26,247	26,387

Program: Border Security and Control between Ports of Entry						
Performance Goal: To gain operational control of the U.S. border in areas deemed as high priority for terrorist threat potential or other national security objectives.						
DHS strategic objectives supported and % allocation of activities: 2.1 - 73.2%, 2.3 - 26.8%						
Measure: Apprehensions and seizures at checkpoints - effectiveness of checkpoint operations in apprehensions and seizures as they relate to border enforcement activities.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	5% - 10%	5% - 10%	5% - 10%
	Actual	None	None	6.2%	N/A	N/A
Measure: Border Miles Under Operational Control	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	150 miles	338	388
	Actual	None	None	288	N/A	N/A
Lead Organization: Customs and Border Protection	\$ Thousands	None	\$2,253,767	\$2,401,016	\$2,643,981	\$3,271,266
	FTE	None	13,718	13,468	14,457	16,089

Program: Automation Modernization						
Performance Goal: Improve the threat and enforcement information available to decision makers from legacy and newly developed systems for the enforcement of trade rules and regulations and facilitation of U.S. trade.						
DHS strategic objectives supported and % allocation of activities: 2.3 - 100.0%						
Measure: Percent of internal population using ACE functionality to manage trade information	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	8%	14%	26%
	Actual	None	None	8%	N/A	N/A
Measure: Percent of trade accounts with access to ACE functionality to manage trade information	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	1%	4%	11%
	Actual	None	None	1%	N/A	N/A
Measure: Percent of time the Treasury Enforcement Communication System (TECS) is available to end users.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	90%	92%	94%
	Actual	None	None	96.15%	N/A	N/A
Lead Organization: Customs and Border Protection	\$ Thousands	None	\$438,520	\$449,909	\$451,440	\$461,207
	FTE	None	11	35	62	62

Program: Air and Marine Operations						
Performance Goal: Deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.						
DHS strategic objectives supported and % allocation of activities: 2.1 - 100.0%						
Measure: Percentage of no - launches to prevent acts of terrorism and other illegal activities arising from unlawful movement of people and goods across the borders of the United States.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	Baseline (estimate)	23%	23%
	Actual	None	None	4.41%	N/A	N/A
Lead Organization: Customs and Border Protection	\$ Thousands	None	0	\$388,971	\$558,153	\$497,575
	FTE	None	0	1,010	1,220	1,220

The following six programs are for the Domestic Nuclear Detection Office created in FY 2006

Program: Systems Engineering and Architecture						
Performance Goal: Develop the systems architecture, conduct all associated systems engineering, and develop technology roadmaps for risk areas in nuclear detection.						
DHS strategic objectives supported and % allocation of activities: 2.3 - 100.0%						
Measure: Percentage of Architecture layers assessed.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	N/A	22%
	Actual	N/A	N/A	N/A	N/A	N/A
Measure: Number of Architecture layers defined.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	9	N/A
	Actual	N/A	N/A	N/A	N/A	N/A
Lead Organization: Domestic Nuclear Detection Office	\$ Thousands	N/A	N/A	N/A	\$20,129	\$30,158
	FTE	N/A	N/A	N/A	3	17

Program: Systems Development and Acquisition						
Performance Goal: Incrementally design, develop, acquire, and support the deployment of a system capable of rapid and high - reliability detection and identification of special nuclear material with out restriction to commerce.						
DHS strategic objectives supported and % allocation of activities: 2.3 - 100.0%						
Measure: Number of next generation detection systems acquired.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	112	155
	Actual	N/A	N/A	N/A	N/A	N/A
Measure: Number of Cargo Advanced Automated Radiography Systems acquired.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	N/A	2 proto-types
	Actual	N/A	N/A	N/A	N/A	N/A
Measure: Number of individual Urban Area Security Designs prepared for the Securing the Cities Program.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	N/A	1
	Actual	N/A	N/A	N/A	N/A	N/A
Measure: Number of multi agency working group program reviews held for the Securing the Cities Program.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	3	6
	Actual	N/A	N/A	N/A	N/A	N/A
Lead Organization: Domestic Nuclear Detection Office	\$ Thousands	N/A	N/A	N/A	\$186,802	\$293,158
	FTE	N/A	N/A	N/A	3	22

Program: Transformational Research and Development						
Performance Goal: Develop the future nuclear detection technologies that will be capable of detecting all nuclear material entering the United States Homeland.						
DHS strategic objectives supported and % allocation of activities: 2.3 - 100.0%						
Measure: Percent of proposals awarded.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	3%	6%
	Actual	N/A	N/A	N/A	N/A	N/A
Measure: Number of advanced detection technologies successfully demonstrated.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	N/A	1
	Actual	N/A	N/A	N/A	N/A	N/A
Lead Organization: Domestic Nuclear Detection Office	\$ Thousands	N/A	N/A	N/A	\$56,955	\$102,519
	FTE	N/A	N/A	N/A	2	9

Program: Assessments						
Performance Goal: Develop the tools and methodology for and to assess the Nation's domestic nuclear detection capabilities through a combination of developmental and operational test and evaluation, as well as active red-teaming exercises.						
DHS strategic objectives supported and % allocation of activities: 2.3 - 100.0%						
Measure: Number of tests conducted annually to assess system capability.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	2	2
	Actual	N/A	N/A	N/A	N/A	N/A
Measure: Number of Red Teaming exercises conducted.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	N/A	1
	Actual	N/A	N/A	N/A	N/A	N/A
Measure: Number of Net Assessments performed.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	N/A	1
	Actual	N/A	N/A	N/A	N/A	N/A
Lead Organization: Domestic Nuclear Detection Office	\$ Thousands	N/A	N/A	N/A	\$26,668	\$38,198
	FTE	N/A	N/A	N/A	3	15

Program: Operations Support						
Performance Goal: Establish and maintain a real-time situational awareness and support capability for the national nuclear detection architecture, including information analysis, technical reachback, and the development of training and operational response protocols.						
DHS strategic objectives supported and % allocation of activities: 2.3 - 100.0%						
Measure: Number of personnel trained in radiological and nuclear preventive detection skills.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	300	1,200
	Actual	N/A	N/A	N/A	N/A	N/A
Lead Organization: Domestic Nuclear Detection Office	\$ Thousands	N/A	N/A	N/A	\$26,838	\$54,055
	FTE	N/A	N/A	N/A	3	43

Program: Radiological and Nuclear Forensics and Attribution						
Performance Goal: Provide the Nation with the ability to determine the origin and method of nuclear or radiological attack for the purpose of prosecution or other U.S. Government action.						
DHS strategic objectives supported and % allocation of activities: 2.3 - 100.0%						
Measure: New program for FY 2007; Measure to be developed.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	N/A	N/A	N/A	N/A	N/A
	Actual	N/A	N/A	N/A	N/A	N/A
Lead Organization: Domestic Nuclear Detection Office	\$ Thousands	N/A	N/A	N/A	N/A	\$17,700
	FTE	N/A	N/A	N/A	N/A	6

Program: Accreditation						
Performance Goal: Accredit all Federal law enforcement training.						
DHS strategic objectives supported and % allocation of activities: 2.4 - 100.0%						
Measure: Total number of programs accredited and re-accredited through Federal Law Enforcement Training Accreditation (FLETA).	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	N/A	2	5	9
	Actual	None	N/A	2	N/A	N/A
Lead Organization: Federal Law Enforcement Training Center	\$ Thousands	None	None	\$1,643	\$1,356	\$1,290
	FTE	None	None	9	9	7

Program: Law Enforcement Training						
Performance Goal: Provide the knowledge and skills to enable law enforcement agents and officers to fulfill their responsibilities.						
DHS strategic objectives supported and % allocation of activities: 2.4 - 100.0%						
Measure: Percent of students that express excellent or outstanding on the Student Quality of Training Survey (SQTS).	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	64%	66%	67%
	Actual	None	None	64%	N/A	N/A
Measure: Percent of federal supervisors that rate their FLETC basic training graduate's preparedness as good or excellent	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	Baseline	73%	73%	74%
	Actual	None	73.4	90%	N/A	N/A
Measure: Percent of Partner Organizations (POs) that express an agree or strongly agree on the Partner Organization Satisfaction Survey (POSS)	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	Baseline	78%	80%	82%	82%
	Actual	79%	92.7	92.7%	N/A	N/A
Lead Organization: Federal Law Enforcement Training Center	\$ Thousands	None	None	\$225,925	\$278,178	\$243,266
	FTE	None	None	940	992	1,009

Program: Detention and Removal						
Performance Goal: Remove all removable aliens from the United States.						
DHS strategic objectives supported and % allocation of activities: 2.2 - 100.0%						
Measure: Number of aliens with a final order removed in a quarter/Number of final orders that become executable in the same quarter (demonstrated as a percent).	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	61%	79%	81%	81%	85%
	Actual	77.7%	80.7%	65.6	N/A	N/A
Lead Organization: United States Immigration and Customs Enforcement	\$ Thousands	None	\$1,377,528	\$1,585,739	\$1,814,540	\$2,494,286
	FTE	None	4,940	4,798	6,086	6,937

Program: Office of Investigations						
Performance Goal: Prevent the exploitation of systemic vulnerabilities in trade and immigration that allow foreign terrorists, other criminals, and their organizations to endanger the American people, property, and infrastructure.						
DHS strategic objectives supported and % allocation of activities: 2.2 - 100.0%						
Measure: Percent of closed investigations which have an enforcement consequence (arrest, indictment, conviction, seizure, fine or penalty).	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	N/A	Baseline	38.5%	39.0%
	Actual	None	N/A	37.9	N/A	N/A
Lead Organization: United States Immigration and Customs Enforcement	\$ Thousands	None	\$1,042,462	\$1,427,133	\$1,577,906	\$1,686,635
	FTE	None	7,431	7,845	8,393	8,864

Program: Screening Coordination and Operations Office (SCO)						
Performance Goal: Enable Federal Immigration and Border Management agencies to make timely and accurate risk and eligibility decisions through coordination of screening capability policies, business strategy and processes, data, information systems, and technology to further enhance security and immigration, travel, and credentialing experiences.						
DHS strategic objectives supported and % allocation of activities: 2.1 - 50.0%, 6.4 - 50.0%						
Measure: Number of biometric watch list hits for visa applicants processed at consular offices.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	600	800	725
	Actual	None	None	897	N/A	N/A
Measure: Ratio of adverse actions to total biometric watch list hits at ports of entry.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	N/A	33%	36%
	Actual	None	None	30%	N/A	N/A
Measure: Number of biometric watch list hits for travelers processed at ports of entry.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	1,925	1,850	1,850
	Actual	None	None	2,059	N/A	N/A
Lead Organization: Screening Coordination Operations	\$ Thousands	None	None	\$345,000	\$340,495	\$403,454
	FTE	None	None	84	134	166

Program: Biological Countermeasures						
Performance Goal: Provide dependable risk analyses, effective systems for surveillance and detection, and reliable bioforensic analyses to protect the nation against biological attacks.						
DHS strategic objectives supported and % allocation of activities: 2.3 - 100.0%						
Measure: Number of bioaerosol collectors deployed in the top three cities.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	None	223	223

STRATEGIC GOAL - 3. PROTECTION - Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters, and other emergencies.

Objectives established by the Department to achieve this goal are:

- 3.1 Protect the public from acts of terrorism and other illegal activities.
- 3.2 Reduce infrastructure vulnerability from acts of terrorism.
- 3.3 Protect our nation's financial infrastructure against crimes, to include currency and financial systems.
- 3.4 Secure the physical safety of the President, Vice President, visiting world leaders, and other protectees.
- 3.5 Ensure the continuity of government operations and essential functions in the event of crisis or disaster.
- 3.6 Protect the marine environment and living marine resources.
- 3.7 Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters, or other emergencies.

Principle means and strategies to achieve these objectives are the following programs.

Program: Mitigation						
Performance Goal: Reduce the impact of natural hazards on people and property through the analysis and reduction of risks and the provision of flood insurance.						
DHS strategic objectives supported and % allocation of activities: 3.7 - 100.0%						
Measure: Potential property losses, disasters, and other costs avoided (\$ in billions).	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	\$1.1B	\$1.949B	\$1.757B	\$2.27B	\$2.4B
	Actual	\$1.1B	\$1.949B	\$1.895	N/A	N/A
Measure: Number of communities taking or increasing action to reduce their risk of natural or man - made disaster.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	500	500	710	585	585
	Actual	750	735	1,286	N/A	N/A
Measure: Percent of the national population whose safety is improved through the availability of flood risk data in Geospatial Information System (GIS) format.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	10%	10%	50%	50%	60%

STRATEGIC GOAL - 4. RESPONSE - Lead, manage and coordinate the national response to acts of terrorism, natural disasters, and other emergencies.

Objectives established by the Department to achieve this goal are:

- 4.1 Reduce the loss of life and property by strengthening response readiness.
- 4.2 Provide scalable and robust all-hazard response capability.
- 4.3 Provide search and rescue services to people and property in distress.

Principle means and strategies to achieve these objectives are the following programs.

Program: Response						
Performance Goal: Ensure the capability and readiness of all FEMA disaster response teams and logistics capabilities to respond quickly and effectively to provide assistance when and where needed.						
DHS strategic objectives supported and % allocation of activities: 4.1 - 67.6%, 4.2 - 32.4%						
Measure: Average percent of response teams reported at operational status.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	None	50%	85%	88%
	Actual	None	None	50%	N/A	N/A

STRATEGIC GOAL - 7. ORGANIZATIONAL EXCELLENCE - Value our most important resource, our people. Create a culture that promotes a common identity, innovation, mutual respect, accountability, and teamwork to achieve efficiencies, effectiveness, and operational synergies.

Objectives established by the Department to achieve this goal are:

- 7.1 Value our people
- 7.2 Drive toward a single Departmental culture
- 7.3 Continually improve our way of doing business

Principle means and strategies to achieve these objectives are the following programs.

Program: Audit, Inspections, and Investigations Program						
Performance Goal: Add value to the DHS programs and operations; ensure integrity of the DHS programs and operations; and enable the OIG to deliver quality products and services.						
DHS strategic objectives supported and % allocation of activities: 7.3 - 100.0%						
Measure: Percentage of recommendations made by OIG that are accepted by the Department of Homeland Security.	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	None	Baseline	75%	79%	83%

	FTE	None	20	71	87	102

Verification and Validation of Measured Performance Values

For each performance measure presented in this Performance Budget Overview a description of the means used to verify and validate reported measured values is reported in Appendix A which is posted on the DHS web site at www.dhs.gov under "Organization – Budget".

The appendix includes for each measure the source of the data, how it is collected, and an assessment of the reliability of data. Reliability is classified either as:

- **Reliable** – the standard for reliability is determined by Office of Management and Budget guidance, OMB Circular A-11, Section 230 (f). At minimum, performance data are considered reliable if agency managers and decision makers use the data on an ongoing basis in the normal course of their duties. Performance data are considered reliable if transactions and other data that support reported performance measures are properly recorded, processed, and summarized to permit the preparation of performance information in accordance with criteria stated by management. Performance data need not be perfect to be reliable, particularly if the cost and effort to secure the best performance data possible will exceed the value of any data so obtained.
- **Inadequate** – the data does not meet the standard for reliable. In this instance, an explanation of plans to make the information reliable is included.
- **T. B. D. New Measure** – a new measure for which reliability will be determined.

Future year targeted levels of performance reflect the informed business judgment of program managers. Historical information informs these estimates. In a limited number of instances where historical information is not available targets are identified as estimates.

Interim Adjustments to the Strategic Plan

Continuous use of the DHS strategic plan during FY 2005 resulted in realization that some of the strategic objectives could be revised. Accordingly adjustments were selectively made that do not produce widespread changes in the plan, but are reportable under provisions of OMB Circular A-11, Section 210.4. The original and revised objectives are:

Original Objective	Revised Objective
1.1 – Gather and fuse all terrorism related intelligence; analyze, and coordinate access to information related to potential terrorist or other threats.	1.1 - Gather, fuse, and analyze all terrorism and threat related intelligence.
1.3 - Provide timely, actionable and valuable information based on intelligence analysis and vulnerability assessments.	1.3 - Provide timely, actionable, accurate, and relevant information based on intelligence analysis and vulnerability assessments to homeland security partners, including the public.
1.4 – Ensure quick and accurate dissemination of relevant intelligence information to homeland security partners, including the public.	1.4 - Develop a Common Operating Picture for domestic situational awareness, including air, land, and sea.
2.1 - Secure our borders against terrorists, means of terrorism, illegal drugs and other illegal activity.	2.1 - Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws.
2.4 – Ensure national and international policy, law enforcement and other actions to prepare for and prevent terrorism are coordinated.	2.4 - Coordinate national and international policy, law enforcement and other actions to prevent terrorism.
3.3 - Protect against financial and electronic crimes, counterfeit currency, illegal bulk currency movement and identity theft.	3.3 - Protect our nation's financial infrastructure against crimes, to include currency and financial systems.
7.1 Protect confidentiality and data integrity to ensure privacy and security. 7.3 Ensure effective recruitment, development, compensation, succession management and leadership of a diverse workforce to provide optimal service at a responsible cost.	7.1 Value our people
7.2 Integrate legacy services within the Department improving efficiency and effectiveness.	7.2 Drive toward a single Departmental culture
7.4 Improve the efficiency and effectiveness of the Department, ensuring taxpayers get value for their tax dollars. 7.5 Lead and promote E-Government modernization and interoperability initiatives. 7.6 Fully integrate the strategic planning, budgeting and evaluation processes to maximize performance. 7.7 Provide excellent customer service to support the mission of the Department.	7.3 Continually improve our way of doing business

FY 2007 Budget Overview

	FY 2005 Revised Enacted ¹		FY 2006 Revised Enacted ²		FY 2007 Pres. Budget		FY 2007 +/- FY 2006		Percent FY 2007 +/- FY 2006	
	FTE	\$000	FTE	\$000	FTE	\$000	FTE	\$000	FTE	\$000
Net Discretionary:	161,290	\$ 28,917,594	163,684	\$ 30,773,529	167,871	\$ 30,950,671	4,187	\$ 177,142	3%	\$ 177,142
Discretionary Fees:	-	2,993,579	-	2,659,854	-	4,454,906	-	1,795,052	-	1,795,052
Less rescission of prior year carryover: ³	-	(104,760)	-	(148,603)	-	(16,000)	-	132,603	-	132,603
Gross Discretionary	161,290	31,806,413	163,684	33,284,780	167,871	35,389,577	4,187	2,104,797	3%	2,104,797
Mandatory, Fee, Trust Funds:	18,199	6,563,104	18,407	7,060,567	18,421	7,313,245	14	252,678	-	252,678
Total Budget Authority (excl. BioShield):	179,489	\$ 38,369,517	182,091	\$ 40,345,347	186,292	\$ 42,702,822	4,201	\$ 2,357,475	2%	\$ 2,357,475
Project BioShield: ⁴	-	\$2,507,776	-	-	-	-	-	-	-	-
Supplemental: ⁵	157	\$67,329,867	40	\$ 332,383	-	-	-	-	-	-
Less rescission of prior year supplemental: ⁶	-	-	-	\$ (23,409,300)	-	-	-	-	-	-

1/ FY 2005 includes rescission (\$20,224 million) pursuant to P.L. 108-447 (applicable to BioShield funding) and rescissions pursuant to P.L. 109-13 for Defense, Global War on Terror and Tsunami relief (-\$165 million); - \$85.2 million - ICE, -\$76 million - CBP.

2/ FY 2006 reflects a one percent across the board rescission (-\$307.124 million), and USCG Operating Expenses rescission (-\$260.533 million) pursuant to P.L. 109-148.

3/ Reflects scorekeeping adjustment for rescission of prior year unobligated balances: FY 2005 enacted rescission of prior year unobligated balances from CBP (-\$63,010 million), FEMA (-\$5 million), and USSS (-\$750 thousand), USCG (-\$16 million) and Working Capital Fund (-\$20 million); FY 2006 enacted rescission of prior year unobligated balances from USCG (-\$100,103 million), TSA (-\$3.5 million), S&T (-\$20 million), Counterterrorism Fund (-\$8 million), and Working Capital Fund (-\$15 million); FY 2007 President's Budget proposes a rescission of prior year unobligated balances from the Counterterrorism Fund (-\$16 million).

4/ In order to obtain comparable totals, BioShield funding is excluded from total Budget Authority. Funds appropriated in FY 2005 are part of an advance appropriation available for obligation through FY 2008.

5/ In order to obtain comparable totals, the above chart excludes FY 2005 supplemental funding pursuant to: P.L. 108-324 for Hurricane Relief (\$6,534 billion - FEMA, and \$3,367 million - USCG), P.L. 109-13 for Defense, Global War on Terror and Tsunami relief (\$796.5 million - ICE, and \$176.3 million - CBP), P.L. 109-61 for Hurricane Katrina (\$10 billion - FEMA) and P.L. 109-62 (\$60 billion - FEMA, \$15 million - OIG); FY 2006 supplemental funding pursuant to P.L. 109-148 for Hurricane Katrina (\$283.1 million - USCG, \$3.6 million - FEMA, \$10.3 million - PREP, \$13 million - ICE, \$34.5 million - CBP) and for Avian Flu (\$47,283 million - provided to Office of the Secretary and Executive Management for distribution throughout the Department).

6/ Reflects scorekeeping adjustment pursuant to P.L. 109-148 for rescission (-\$23,409,300 billion) of prior year unobligated balances from P.L. 109-62 Hurricane Katrina supplemental for FEMA Disaster Relief.

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Overall

There are a number of changes that merely adjust the fiscal years and involve re-numbering to reflect the proposed deletions. Fiscal year adjustments are included in proposed Sections 503, 504, and 516.

Proposal to Delete Language from Prior Section 503

SEC. 503. (a) None of the funds provided by this Act, provided by previous appropriations Acts to the agencies in or transferred to the Department of Homeland Security that remain available for obligation or expenditure in fiscal year [2006] 2007, or provided from any accounts in the Treasury of the United States derived by the collection of fees available to the agencies funded by this Act, shall be available for obligation or expenditure through a reprogramming of funds that: (1) creates a new program; (2) eliminates a program, project, or activity; (3) increases funds for any program, project, or activity for which funds have been denied or restricted by the Congress; *or* (4) **proposes to use funds directed for a specific activity by either the House or Senate Committees on Appropriations for a different purpose; or (5) contracts out any functions or activities for which funds have been appropriated for Federal full-time equivalent positions;** unless the Committees on Appropriations of the Senate and the House of Representatives are notified 15 days in advance of such reprogramming of funds.

[(d) Notwithstanding subsections (a), (b), and (c) of this section, no funds shall be reprogrammed within or transferred between appropriations after June 30, except in extraordinary circumstances which imminently threaten the safety of human life or the protection of property.]

Explanation: For item (4), language is proposed for deletion to eliminate potential inconsistencies in reconciling House Reports, Senate Reports and the Joint Explanatory Statement. For item (5), language is proposed for deletion to eliminate the restrictions on contracting out functions for which funds have been appropriated for Federal FTEs. Circumstances may warrant from time to time that contracting out functions can be prudent and judicious use of federal funding resources.

Item (d) is proposed for deletion to provide the Department with greater flexibility with respect to timing of potential reprogrammings.

Proposal to Delete Old Section 504

[SEC. 504. None of the funds appropriated or otherwise made available to the Department of Homeland Security may be used to make payments to the "Department of Homeland Security Working Capital Fund", except for the activities and amounts allowed in section 6024 of Public Law 109-13, excluding the Homeland Secure Data

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Network: *Provided*, That any additional activities and amounts must be approved by the committees on Appropriations of the Senate and the House or Representatives 30 days in advance of obligation.]

Explanation: This section is proposed for deletion since the April 11, 2005 report referenced in Section 6024 of P.L. 109-13 does not include any FY 2007 data. The FY 2007 Congressional Budget Justification includes FY 2007 funding estimates for each Working Capital Fund activity.

Proposal to Delete Language in New Section 504

Proposed changes include deleting [a request] and [for approval] and inserting ‘notice thereof’].

Explanation: Proposed deletions would clarify that submissions pursuant to this section are notifications.

Proposal to Delete Language in New Section 508

Proposes to delete [approval] and substitute *notification*.

Explanation: Proposed deletions would clarify that submissions pursuant to this section are notifications.

Proposal to Delete Old Section 513

[SEC. 513. The Secretary of Homeland Security shall take all actions necessary to ensure that the Department of Homeland Security is in compliance with the second provision of section 513 of Public Law 108-334 and shall report to the Committees on Appropriations of the Senate and House of Representatives biweekly beginning on October 1, 2005, on any reasons for non-compliance: *Provided*, That, furthermore, the Secretary shall take all possible actions, including the procurement of certified systems to inspect and screen air cargo on passenger aircraft, to increase the level of air cargo inspected beyond that mandated in section 513 of Public Law 109-334 and shall report to the Committees on Appropriations of the Senate and House of Representatives every six months on the actions taken and the percentage of air cargo inspected at each airport.]

Explanation: This provision is proposed for deletion because the Transportation Security Administration (TSA) is already in compliance with Section 513 of P. L. 108-334. TSA will keep the Committees on Appropriations of the Senate and House of Representatives apprised on the air cargo program.

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Proposal to Delete Old Section 514

[SEC. 514. Notwithstanding section 3302 of title 31, United States Code, for fiscal year 2006 and thereafter, the Administrator of the Transportation Security Administration may impose a reasonable charge for the lease of real and personal property to Transportation Security Administration employees and for use by Transportation Security Administration employees and may credit amounts received to the appropriation or fund initially charged for operating and maintaining the property, which amounts shall be available, without fiscal year limitation, for expenditure of property management, operation, protection, construction, repair, alteration, and related activities.]

Explanation: This section is not required for FY 2007 because it was made permanent in FY 2006.

Proposal to Delete Old Section 515

[SEC. 515. For fiscal year 2006 and thereafter, the acquisition management system of the Transportation Security Administration shall apply to the acquisition of services, as well as equipment, supplies, and materials.]

Explanation: This section is not required for FY 2007 because it was made permanent in FY 2006.

Proposal to Delete Old Section 516

[SEC. 516. Notwithstanding any other provision of law, the authority of the Office of Personnel Management to conduct personnel security and suitability background investigations, update investigations, and periodic reinvestigations of applicants for, or appointees in, positions in the Office of the Secretary and Executive Management, the Office of the Under Secretary for Management, Analysis and Operations, Immigration and Customs Enforcement, Directorate for Preparedness, and the Directorate of Science and Technology of the Department of Homeland Security is transferred to the Department of Homeland Security: *Provided*, That on request of the Department of Homeland Security, the Office of Personnel Management shall cooperate with and assist the Department in any investigation or reinvestigation under this section: *Provided further*, That this section shall cease to be effective at such time as the President has selected a single agency to conduct security clearance investigations pursuant to section 3001(c) of the Intelligence Reform and Terrorism Prevention Act of 2004 (Public Law 108-458; 50 U.S.C. 435b) and the entity selected under section 3001(b) of such Act has reported to Congress that the agency selected pursuant to such section 3001(c) is capable of conducting all necessary investigations in a timely manner or has authorized the entities within the Department of Homeland Security covered by this section to conduct their own investigations pursuant to section 3001 of such Act.]

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Explanation: This provision is no longer necessary per the direction in Executive Order 13381, "Strengthening Processes Relating to Determining Eligibility for Access to Classified National Security Information". OMB Memorandum 05-17 allocates the responsibilities within EO 13381. The Office of Personnel Management was selected as the agency responsible for the day-to-day supervision and monitoring of security clearance investigations.

Proposal to Delete Old Section 517

[SEC. 517. Hereafter, notwithstanding any other provisions of law, funds appropriated under paragraphs (1) and (2) of the State and Local Programs heading under title III of this Act are exempt from section 6503(a) of title 31 United States Code.]

Explanation: This section is not required for FY 2007 because it was made permanent in FY 2006.

Proposal to Delete Old Section 518

[SEC. 518. (a) None of the funds provided by this or previous appropriations Acts may be obligated for deployment or implementation, on other than a test basis, of the Secure Flight program or any other follow on or successor passenger prescreening programs, until the Secretary of Homeland Security certifies, and the Government Accountability Office reports, to the Committees on Appropriations of the Senate and the House of Representatives, that all ten of the elements contained in paragraphs (1) through (10) of section 522(a) of Public Law 108-334 (118 Stat. 1319) have been successfully met. (b) The report required by subsection (a) shall be submitted within 90 days after the certification required by such subsection is provided, and periodically thereafter, if necessary, until the Government Accountability Office confirms that all ten elements have been successfully met. (c) During the testing phase permitted by paragraph (a) of this section, no information gathered from passengers, foreign or domestic air carriers, or reservation systems may be used to screen aviation passengers, or delay or deny boarding to such passengers, except in instances where passenger names are matched to a government watch list. (d) None of the funds provided in this or any previous appropriations Act may be utilized to develop or test algorithms assigning risk to passengers whose names are not on government watch lists. (e) None of the funds provided in this or previous appropriations Acts may be utilized for data or a database that is obtained from or remains under the control of a non-Federal entity: *Provided*, That this restriction shall not apply to Passenger Name Record data obtained from air carriers.]

Explanation: This provision is proposed for deletion as it restricts the Department's flexibility to execute this program in an effective and efficient manner.

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Proposal to Delete Old Section 519

[SEC. 519. None of the funds made available in this Act may be used to amend the oath of allegiance required by section 337 of the Immigration and Nationality Act (8. U.S.C. 1448).]

Explanation: DHS has stated in the past that the Executive branch should continue to be responsible for the actual language of the Oath of Renunciation and Allegiance. Through the Immigration and Nationality Act, the Congress has already provided a clear mandate on the necessary content and substance of the Oath.

Proposal to Delete Old Section 520

[SEC. 520. None of the funds appropriated by this Act may be used to process or approve a competition under Office of Management and Budget Circular A-76 for services provided as of June 1, 2004, by employees (including employees serving on a temporary or term basis) of Citizenship and Immigration Services of the Department of Homeland Security who are known as of that date as Immigration Information Officers, Contact Representatives, or Investigative Assistants.]

Explanation: This provision is proposed for deletion as it restricts the Department's flexibility. The Administration has adopted a reasoned and responsible approach for ensuring the fair and effective application of public-private competition. Management decisions about public-private competition, and accountability for results, should be vested with the USCIS. Agencies across the Government are using competitive sourcing in a reasoned and responsible manner to reduce costs and improve program performance. On a Government-wide basis, competitions completed in FYs 2003 and 2004 are expected to generate \$2.5 billion in savings over 3 to 5 years.

Proposal to Delete Old Section 523

[SEC. 523. The Department of Homeland Security processing and data storage facilities at the John C. Stennis Space Center shall hereafter be known as the "National Center for Critical Information Processing and Storage".]

Explanation: This provision is unnecessary for FY 2007 as the FY 2006 provision named the facility.

Proposal to Delete Old Section 524

[SEC. 524. The Secretary, in consultation with industry stakeholders, shall develop standards and protocols for increasing the use of explosive detection equipment to screen air cargo when appropriate.]

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Explanation: This provision is unnecessary as the directive was completed during FY 2006.

Proposal to Delete Old Section 525

[SEC. 525. The Transportation Security Administration (TSA) shall utilize existing checked baggage explosive detection equipment and screeners to screen cargo carried on passenger aircraft to the greatest extent practicable at each airport: *Provided*, That beginning with November 2005, TSA shall provide a monthly report to the Committees on Appropriations of the Senate and the House of Representatives detailing, by airport, the amount of cargo carried on passenger aircraft that was screened by TSA in August 2005 and each month thereafter.]

Explanation: This section is proposed for deletion because TSA already has ample existing authority to use Transportation Security Officers (TSO) and screening equipment for the screening of cargo carried on passenger aircraft based on a risk assessment of the appropriate use of those resources for that purpose.

Proposal to Delete Old Section 526

[SEC. 526. None of the funds available for obligation for the transportation worker identification credential program shall be used to develop a personalization system that is decentralized or a card production capability that does not utilize an existing government card production facility: *Provided*, That no funding can be obligated for the next phase of production until the Committees on Appropriations of the Senate and the House of Representatives have been fully briefed on the results of the prototype phase and agree that the program should move forward.]

Explanation: This provision is proposed for deletion in order to provide sufficient flexibility in implementing this program in an effective and efficient manner.

Proposal to Delete Old Section 527

[SEC. 527. (a) From the unexpended balances of the United States Coast Guard "Acquisition, Construction, and Improvements" account specifically identified in the Joint Explanatory Statement (House Report 108-10) accompanying Public Law 108-7 for the 110-123 foot patrol boat upgrade, the Joint Explanatory Statement (House Report 108-280) accompanying Public Law 108-90 for the Fast Response Cutter/110-123 foot patrol boat conversion, and in the Joint Explanatory Statement (House Report 108-774) accompanying Public Law 108-334 for the Integrated Deepwater System patrol boats 110-123 foot conversion, \$78,630,689 are rescinded.

(b) For necessary expenses of the United States Coast Guard for 'Acquisition, Construction, and Improvements', an additional \$78,630,689, to remain available until September 30, 2009, for the service life extension program of the current 110-foot Island

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Class patrol boat fleet and accelerated design and production of the Fast Response Cutter.]

Explanation: This provision is proposed for deletion as it was a one-time rescission in FY 2006.

Proposal to Delete Old Section 528

[SEC. 528. The Secretary of Homeland Security shall utilize the Transportation Security Clearinghouse as the central identity management system for the development and operation of the registered traveler program and the transportation worker credential program for the purposes of collecting and aggregating biometric data necessary for background vetting; providing all associated record-keeping, customer service, and related functions; ensuring interoperability between different airports and vendors; and acting as a central activation, revocation, and transaction hub for participating airports, ports, and other points of presence.]

Explanation: This provision is proposed for deletion in order to provide sufficient flexibility in implementing this program. Restrictions on such critical programs serve only to limit their effectiveness and efficiency.

Proposal to Delete Old Section 529

[SEC. 529. None of the funds made available in this Act may be used by any person other than the privacy officer appointed pursuant to section 222 of the Homeland Security Act of 2002 (6 U.S.C. 142) to alter, direct that changes be made to, delay, or prohibit the transmission to Congress of any report prepared pursuant to paragraph (5) of such section.]

Explanation: This provision is proposed for deletion as it is inconsistent with the President's constitutional authority to coordinate and supervise all replies and comments from the Executive Branch to Congress.

Proposal to Delete Old Section 531

[SEC. 531. Except as provided in section 44945 of title 49, United States Code, funds appropriated or transferred to Transportation Security Administration "Aviation Security" and "Administration" in fiscal years 2004 and 2005 that are recovered or deobligated shall be available only for procurement and installation of explosive detection systems for air cargo, baggage, and checkpoint screening systems: *Provided*, That these funds shall be subject to section 503 of this Act.]

Explanation: This provision is proposed for deletion in an effort to provide greater flexibility in the use of appropriated resources and consider the most pressing needs in our efforts to protect our Homeland.

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Proposal to Delete Old Section 532

[SEC. 532. Not later than 60 days from the date of the enactment of this Act, the Secretary of Homeland Security shall conduct a survey of all ports of entry in the United States and designate an airport as a port of entry in each State that does not have a port of entry.]

Explanation: This provision is no longer required as it is a one-time directive.

Proposal to Delete Old Section 533

[SEC. 533. Notwithstanding any other provision of law, the Secretary of Homeland Security shall consider eligible under the Federal Emergency Management Agency Public Assistance Program the costs sufficient to enable the city to repair and upgrade all damaged and undamaged elements of the Carnegie Library in the City of Paso Robles, California, which was damaged by the 2003 San Simeon earthquake, so that the library is brought into conformance with all local code requirements for new construction: *Provided*, That the appropriate Federal share shall apply to approval for this project.]

Explanation: This provision is no longer required as it is a one-time directive.

Proposal to Delete Old Section 534

[SEC. 534. Notwithstanding any other provision of law, the Secretary of Homeland Security shall consider eligible under the Federal Emergency Management Agency Public Assistance Program costs for the damage to canals and wooden fumes, which was incurred during a 1996 storm and subsequent mudslide in El Dorado County, California, to the El Dorado Irrigation District, base on fifty percent of the costs of the Improved Project of the Mill Creek to Bull Creek tunnel proposed in a November 2001 Carleton Engineering Report: *Provided*, That the appropriate Federal share shall apply to approval for this project.]

Explanation: This provision is no longer required as it is a one-time directive.

Proposal to Delete Old Section 535

[SEC. 535. Notwithstanding any other provisions of law, the Secretary of Homeland Security shall consider eligible under the Federal Emergency Management Agency Public Assistance Program the costs sufficient to enable replacement of research and education materials and library collections and for other non-covered losses at the University of Hawaii Manoa campus, Hawaii, resulting from an October 30, 2004, flood event.]

Explanation: This provision is no longer required as it is a one-time directive.

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Proposal to Delete Old Section 536

[SEC. 536. Section 101(a)(15)(H)(ii)(a) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15)(H)(ii)(a)) is amended by striking “the Internal Revenue Code of 1954 and agriculture as defined in section 3(f) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(f)),” and inserting “the Internal Revenue Code of 1986, agriculture as defined in section 3(f) of the Fair Labor Standards Act of 1938 (29 U.S.C. 203(f)), and the pressing of apples for cider on a farm.”.]

Explanation: This provision is no longer required as it permanently amended the United States Code.

Proposal to Delete Old Section 537

[SEC. 537. Using funds made available in this Act, the Secretary of Homeland Security shall provide that each office within the Department that handles documents marked as Sensitive Security Information (SSI) shall have at least one employee in that office with authority to coordinate and make determinations on behalf of the agency that such documents meet the criteria for marking as SSI: *Provided*, That not later than December 31, 2005, the Secretary should submit to the Committees on Appropriations of the Senate and the House of Representatives: (1) Department-wide policies for designating, coordinating and marking documents as SSI; (2) Department-wide auditing and accountability procedures for documents designated and marked SSI; (3) the total number of SSI Coordinators within the Department; and (4) the total number of staff authorized to designate SSI documents within the Department: *Provided further*, That not later than January 31, 2006, the Secretary shall provide to the Committees on Appropriations of the Senate and the House of Representatives the title of all DHS documents that are designated as SSI in their entirety during the period October 1, 2005, through December 31, 2005: *Provided further*, That not later than January 31 of each succeeding year, starting on January 31, 2007, the Secretary shall provide annually a similar report to the Committees on Appropriations of the Senate and the House of Representatives on the titles of all DHS documents that are designated as SSI in their entirety during the period of January 1 through December 31 for the preceding year: *Provided further*, That the Secretary shall promulgate guidance that includes common but extensive examples of SSI that further define the individual categories of information cited under 49 CFR 1520(b)(1) through (16) and eliminates judgment by covered persons in the application of the SSI marking: *Provided further*, That such guidance shall serve as the primary basis and authority for the marking of DHS information as SSI by covered persons.]

Explanation: This provision is proposed for deletion because the reporting requirement has been completed.

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Proposal to Delete Old Section 538

[SEC. 538. For grants to States pursuant to section 204(a) of the REAL ID Act of 2005 (Division B of Public Law 109-13), \$40,000,000, to remain available until expended: *Provided*, That of the funds provided under this section, \$34,000,000 may not be obligated or allocated for grants until the Committees on Appropriation of the Senate and the House of Representatives receive and approve and implementation plan for the responsibilities of the Department of Homeland Security under the REAL ID Act of 2005 (Division B of Public Law 109-13), including the proposed uses of the grant monies: *Provided further*, That of the funds provided under this section, not less than \$6,000,000 shall be made available within 60 days from the date of enactment of this Act to States for pilot projects on integrating hardware, software, and information management systems.]

Explanation: This provision is proposed for deletion as this was a one-time appropriation.

Proposal for New Section 515 (Revisions to Old Section 539)

SEC. [539. For activities related to the] 515. *The* Department of Homeland Security Working Capital fund, [subsection (f) of] *established, pursuant to* section 403 of Public Law 103-356 (31 U.S.C. 501 note), [is amended by striking "October 1, 2005" and inserting "October 1, 2006] *shall continue operations during fiscal year 2007.*

Explanation: This provision provides for continued operations of the Department of Homeland Security Working Capital Fund during FY 2007.

Proposal to Delete Old Section 540

[SEC. 540. For fiscal year 2006 and thereafter, notwithstanding section 553 of title 5, United States Code, the Secretary of Homeland Security shall impose a fee for any registered traveler program undertaken by the Department of Homeland Security by notice in the Federal Register, and may modify the fee from time to time by notice in the Federal Register. *Provided*, That such fees shall not exceed the aggregate costs associated with the program and shall be credited to the Transportation Security Administration registered traveler fee account, to be available until expended.]

Explanation: This section is not required for FY 2007 because it was made permanent in FY 2006.

Proposal to Delete Old Section 541

[SEC. 541. A person who has completed a security awareness training course approved by or operated under a cooperative agreement with the Department of Homeland Security

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

using funds made available in fiscal year 2006 and thereafter or in any prior appropriations Acts, who is enrolled in a program recognized or acknowledged by and Information Sharing and Analysis Center, and who reports a situation, activity or incident pursuant to that program to an appropriate authority, shall not be liable for damages in any action brought in a Federal or State court which result from any act or omission unless such person is guilty of gross negligence or willful misconduct.]

Explanation: This section is not required for FY 2007 because it was made permanent in FY 2006.

Proposal to Delete Old Section 542

[SEC. 542. Of the unobligated balances available in the "Department of Homeland Security Working Capital Fund", \$15,000,000 are rescinded.]

Explanation: This provision is proposed for deletion as it was a one-time rescission in FY 2006.

Proposal to Delete Old Section 543

[SEC. 543. Of the unobligated balances from prior year appropriations made available for Transportation Security Administration "Aviation Security", \$5,500,000 are rescinded.]

Explanation: This provision is proposed for deletion as it was a one-time rescission in FY 2006.

Proposal to Delete Old Section 544

[SEC. 544. Of funds made available for the United States Coast Guard in previous appropriations Acts, \$6,369,118 are rescinded, as follows: (1) \$499,489 provided for "Coast Guard, Acquisition, Construction, and Improvements" in Public Law 105-277; (2) \$87,097 provided for "Coast Guard, Operating Expenses" in Public Law 105-277; (3) \$269,217 provided for "Coast Guard, Acquisition Construction, and Improvements" in Public Law 107-87; (4) \$8,315 provided for "Coast Guard, Acquisition, Construction, and Improvements" in Public Law 106-69; and (5) \$5,505,000 for "Coast Guard, Acquisition, Construction, and Improvements" in Public Law 108-90.]

Explanation: This provision is proposed for deletion as it was a one-time rescission in FY 2006.

Proposal to Delete Old Section 545

[SEC. 545. Of the unobligated balances from prior year appropriations made available for the "Counterterrorism Fund", \$8,000,000 are rescinded.]

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Explanation: This provision is proposed for deletion as it was a one-time rescission in FY 2006.

Proposal to Delete Old Section 546

[SEC. 546. Of the unobligated balances from prior year appropriations made available for Science and Technology “Research, Development, Acquisition, and Operations”, \$20,000,000 are rescinded.]

Explanation: This provision is proposed for deletion as it was a one-time rescission in FY 2006.

Proposal to Delete Old Section 547

[SEC. 547. SECURITY SCREENING OPT-OUT PROGRAM. Section 44920 of title 49, United States Code, is amended by adding at the end of the following:

“(g) OPERATOR OF AIRPORT.—Notwithstanding any other provision of law, an operator of an airport shall not be liable for any claims for damages filed in State or Federal court (including a claim for compensatory, punitive, contributory, or indemnity damages) relating to—

“(1) such airport operator’s decision to submit an application to the Secretary of Homeland Security under subsection (a) or section 44919 or such airport operator’s decision not to submit an application; and

“(2) any act of negligence, gross negligence, or intentional wrongdoing by—

“(A) a qualified private screening company or any of its employees in any case in which the qualified private screening company is acting under a contract entered into the Secretary of Homeland Security or the Secretary’s designee; or

“(B) employees of the Federal Government providing passenger and property security screening services at the airport.

“(3) Nothing in this section shall relieve any airport operator from liability for its own acts or omissions related to its security responsibilities, nor accept as may be provided by the Support Anti-Terrorism by Fostering Effective Technologies Act of 2002 shall it relieve any qualified private screening company or its employees from any liability related to its own acts of negligence, gross negligence, or intentional wrongdoing.”.]

Explanation: This provision is no longer required as it permanently amended the United States Code.

Department of Homeland Security
FY 2007 Explanation of Changes - General Provisions

Proposal to Delete Old Section 548

[SEC. 548. The weekly report required by Public Law 109-62 detailing the allocation and obligation of funds for "Disaster Relief" shall include: (1) detailed information on each allocation, obligation, or expenditure that totals more than \$50,000,000 categorized by increments of not larger than \$50,000,000; (2) the amount of credit card purchases by agency and mission assignment; (3) obligations, allocations, and expenditures, categorized by agency, by State, and for New Orleans, and by purpose and mission assignment; (4) status of the Disaster Relief Fund; and (5) specific reasons for all waivers granted and a description of each waiver: *Provided*, That the detailed information required by paragraph (1) shall include the purpose; whether the work will be performed by a governmental agency or a contractor, and, if the work is to be performed by a contractor, the name of the contractor, the type of contract let, and whether the contract is sole-source, full and open competition, or limited competition.

Explanation: This provision is proposed for deletion as the Department of Homeland Security continues to provide this data to the Committees on Appropriations of the Senate and House of Representatives on a weekly basis.

Proposal to Add New Section 516

Section 44940 of title 49, United States Code, is amended by striking subparagraph (c) in its entirety and inserting the following:

"(c) Limitation on Fee. – (1) For fiscal year 2007 and subsequent fiscal years, fees imposed under subsection (a)(1) may not exceed \$5.00 per one-way trip in air transportation or intrastate air transportation that originates at an airport in the United States."

Explanation: The proposed provision would change the airline passenger security fee to a \$5.00 flat fee per one-way trip, regardless of the number of segments flown by a passenger. For passengers who fly two or more legs on a one-way trip, there will be no change to their fee. For passengers only flying one leg on a one-way trip, the fee will increase from \$2.50 to \$5.00. The change in fee structure will provide a more equitable distribution of fees per user. The additional fees provide a further offset toward fully recovering costs for federal aviation security operations as prescribed by the Aviation and Transportation Security Act.

Department of Homeland Security

U.S. Customs and Border Protection

Fiscal Year 2007

Overview

Congressional Justification

i. Summary of FY 2007 Budget Estimates by Appropriation

Department of Homeland Security
U.S. Customs and Border Protection
Summary of FY 2007 Budget Estimates by Appropriation
Total Appropriations
(Dollars in Thousands)

Budget Activity	FY 2005 Actual*		FY 2006 Revised Estimate		FY 2007 Request		Increase (1) or Decrease (2) For FY 2007					
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	Total (1) or (2)		Program Changes		Adjustments to Base	
							FTE	AMOUNT	FTE	AMOUNT		
Salaries and Expenses	32,232	\$4,638,544	33,675	\$4,802,190	35,447	\$5,519,022	1,772	\$716,832	1,137	\$537,091	635	\$179,741

CBP-ii

iii. Status of Congressionally Requested Studies and Reports**Department of Homeland Security
U.S. Customs and Border Protection****Status of Congressionally Requested Studies, Reports, and Evaluations**

1. House Report 109-79, page 28 directs the Commissioner to report on specific performance metrics that will be applied to the America's Shield Initiative (ASI). Report currently under review process in DHS. Target response to Committee February 10, 2006.
2. House Report 109-79, page 28 directs CBP to report on the problems raised in the GSA IG audit report, including specific actions CBP has taken to ensure strong contract management and oversight, and ensuring that it uses competition to ensure the best price and performance of this critical system. Report currently under review process in DHS. Target response February 10, 2006.
3. House Report 109-79, page 29 directs CBP to report on the Interior Repatriation Program performance, including cost, associated full-time equivalent, and statistics relating to the numbers repatriated and any data on recidivism for individuals repatriated. Report pending OMB clearance. Target response February 10, 2006.
4. House Report 109-79, page 26 directs CBP to report on how the Non-Intrusive Inspection (NII) system selection and use could be improved, and the pros and cons of CBP involvement in financing or otherwise supporting NII systems at Container Security Initiative (CSI) ports. Report currently under review process in CBP. Target response February 10, 2006.
5. House Report 109-79, page 22 directs the Under Secretary to report on the progress that CBP and ICE are making with respect to the eight recommendations contained in the IG report (OIG-05-07, December 2004) on the use of stolen passports from visa waiver countries to enter the U.S., and continue reports until in full compliance with IG recommendations. CBP target response February 10, 2006 and August 10, 2006.
6. House Report 109-79, page 31 directs the Department to conduct a review, in conjunction with appropriate Washington State and Canadian entities, and to report back to the Committee all relevant Departmental issues related to the Vancouver Olympic and Paralympic Games, including, but not limited to, expected border flow, border security, estimated border wait times, and the possible need for increased border personnel. Report currently under review process in DHS. Target response February 10, 2006.
7. House Report 109-79, page 27 directs CBP to report on its projected spending for maintenance and replacement of large-scale NII systems (including truck and mobile truck x-ray systems, VACIS systems) for fiscal years 2006-2010. Target response February 10, 2006.
8. House Report 109-79, page 26 directs the Commissioner to report on (1) the status of the Radiation Portal Monitor (RPM) program, in terms of deployment, systems in the pipeline, and the gap that remains to be filled; (2) steps being taken by CBP to maximize

CBP-iii

- the effectiveness of RPMs to detect radioactive material; (3) the explicit tradeoffs made to reduce false positives and negatives, but to also minimize the risk that nuclear material will evade detection; (4) the spending plan for RPM investment and operation for fiscal years 2006-2010; (5) the results of pilot testing of systems to detect biological, chemical or explosive materials or weapons. Target response February 10, 2006.
9. House Report 109-79, page 26 states the Committee also supports the investigation by CBP into ways to improve security of domestic cargo containers that move or transit the United States as "in-bond" shipments, and includes \$1,018,000 to continue this program, as requested. The Committee awaits the interim report on that effort, and reminds the Department that a report on the achievements of the program in fiscal year 2005 is due to the Committee on January 1, 2006. Report pending OMB clearance. Target response February 2006.
 10. Senate Report 109-280, page 18 directs CBP to report on Integrated Surveillance Intelligence System—semi-annual update on master plan for the nationwide deployment of the ISIS program. Target response February 10, 2006.
 11. Senate Report 109-83, page 24 directs CBP to establish a permanent Border Patrol facility in the U.S. Virgin Islands no later than March 1, 2006. If intelligence is available indicating this action is unnecessary, CBP should provide a report to the Committee, in classified and unclassified form, stating the specific reasons why such a facility is not required. Target response February 10, 2006.
 12. Senate Report 109-83, page 26 directs the Department to report to the Committee no later than December 1, 2005, on its compliance with the recent arbitration ruling on the legacy Customs inspectors and CBP officers who received basic training at Federal Law Enforcement Training Center (FLETC) between January 1, 2002, and October 1, 2004, were not compensated for the sixth day of training for each week during that period. Report pending OMB clearance. Target response February 10, 2006.
 13. Senate Report 109-83, page 23 directs the Department to provide a report to the Committee, no later than February 18, 2006, on the specific steps the Department has taken to work with host governments to explain the CSI targeting methods so as to overcome any reluctance to inspect potentially suspect containers, how CSI teams coordinate their efforts with Department of State personnel, what actions have been taken or consideration has been given to withdrawing CSI personnel from a CSI port if cooperation with CSI teams has not improved and the specific actions taken and planned to implement the recommendations made by the Government Accountability Office [GAO] in its April 2005 report (GAO-05-557), "A Flexible Staffing Model and Minimum Equipment Requirements." Report currently under review process in CBP. Target response February 10, 2006.
 14. Senate Report 109-83, page 18 states on June 9, 2005, the Department submitted a report on cargo container security which was 4 months overdue. This report did not meet the needs outlined in the statement of managers accompanying the conference report on the Department of Homeland Security Appropriations Act, 2005 (Public Law 108-334). The Department is directed to conduct the review again and submit a new report in full compliance with the stated requirements of the Committee. Report pending OMB clearance. Target response February 10, 2006.
 15. Senate Report 109-83, page 27 directs the Department, in conjunction with the United States Department of Agriculture (USDA), to submit a report by February 18, 2006,

- which details the specific actions each agency will take, or has already taken, to address the apparent 32 percent reduction in agriculture inspections and the lack of coordination and access between the Departments to targeting and planning intelligence information. Target response February 18, 2006.
16. Senate Report 109-83, page 23 directs Department to submit a report to the Committee, by February 18, 2006, on the CSI and C-TPAT programs, to include the following: (1) the most rigorous performance measures, including outcome-oriented indicators, which have been developed and implemented for CSI and C-TPAT; (2) a human capital plan that clearly describes how the programs will recruit, train, and retain staff overseas as the programs expand; and (3) the plans currently in place that lay out the goals, objectives, and detailed implementation strategies of the programs. Further, the report should include the results of the CSI and C-TPAT programs for each of fiscal years 2004 and 2005 and the specific actions taken and planned to implement the recommendations made by the GAO in its March 2005 report (GAO-05-128SU), ‘Partnership Program Grants Importers Reduced Scrutiny with Limited Assurance of Improved Security.’ Target response February 10, 2006.
 17. Senate Report 109-83, page 28 states the Committee believes that ACE and CBP modernization should be integrated, if not from the core, of DHS information system and border security technology, including the Container Security Initiative and Automated Targeting Systems. The Committee directs CBP to address such issues in its quarterly reports on ACE implementation progress. Target response March 1, 2006, June 1, 2006, September 1, 2006, and January 1, 2007.
 18. Senate Report 109-83, page 26 directs the Department, in consultation with the U.S. Department of Treasury, to report on automating the interface between the Alcohol and Tobacco Tax and Trade Bureau [TTB] and CBP as a part of the on-going Automated Commercial Environment [ACE] project. This report should include projected costs of developing and supporting the interface between CBP and TTB, a projected timeline for developing this interface, the associated software changes to ACE required to automate the tobacco import process, the impediments to manually verifying each TTB import permit number, and any further actions planned by CBP to implement a verification process of certifications required under the Imported Cigarette Compliance Act of 2000 (Public Law 106-476). Report currently under review process in DHS. Target response February 10, 2006.
 19. Conference Report 109-241, page 43 states the conferees are aware the Department has announced a plan to expand its expedited removal program, following success in reducing the overall cost of detention housing for other than Mexican nationals in the Laredo and Tucson sectors, in reducing the number of aliens released on their own recognizance, and in increasing deterrence. The conferees direct the Department to report not later than February 10, 2006, on Border Patrol costs associated with the expanded expedited removal program. Report currently under review process in DHS. Target response February 10, 2006.
 20. Conference Report 109-241, page 44 directs CBP to confirm that it has completed all of the initiatives, processes, and procedures identified in its February 2005 report to the Committees on Appropriations (including Attachment 1) regarding implementation of the recommendations that were contained in the U.S. Treasury Department Office of the Inspector General report on the Continued Dumping and Subsidy Offset Act. Further,

the conferees direct CBP to implement the five recommendations for executive action contained in the GAO report (GAO-05-979) dated September 2005. If those processes and procedures have not been completed, CBP is directed to provide an explanation as to why they have not been completed, and a deadline for when they will be completed. This includes the deadlines for implementing the processes and procedures for verification, including, in particular, the development of the sampling methodology to validate the claimed amount; the testing plan; and all accompanying aspects of verification. Report is currently under review process in CBP. Report currently under review process in DHS. Target response February 10, 2006.

21. Conference Report 109-241, page 46 directs CBP to provide a spending plan and a revised master plan to the Committees on Appropriations that reflects this funding (Senate Report 109-83, page 30 directs the Department to submit a detailed spending plan for the following projects: construction associated with 1,000 new Border Patrol Agents, the San Diego Sector fence, Tucson Sector tactical infrastructure, and the Advanced Training Center by February 18, 2006. The spending plan should include, but not be limited to, the following information for each project and sub-project: a detailed cost breakout for construction, design, planning, project management; total estimated project and sub-project cost; and date each phase of the project and subproject is scheduled to begin and be completed). Report currently under review process with DHS. Target response February 10, 2006.
22. Conference Report 109-241, page 24 directs not later than 60 days from the date of the enactment of this Act, the Secretary of Homeland Security shall conduct a survey of all ports of entry in the United States and designate an airport as a port of entry in each State that does not have a port of entry. Report currently under review with DHS. Target response February 2006.
23. Conference Report 109-241, page 44 directs the Department to report to the Committee by February 18, 2006, on how the funds for textile transshipment enforcement were used in fiscal years 2004 and 2005, and include in that report a 5-year enforcement strategy to reduce textile transshipment. Report currently under review in CBP. Target response February 10, 2006.
24. Conference Report 109-241, page 5 and 45 states Automated Commercial Environment: Provided, That none of the funds made available under this heading may be obligated for the Automated Commercial Environment until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that (1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7; (2) complies with the Department of Homeland Security information systems enterprise architecture; (3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government; (4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project; (5) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland Security, and the Office of Management and Budget; and (6) is reviewed by the Government Accountability Office. Report currently under review process in DHS. Target response February 10, 2006.

25. Conference Report 109-241, page 43 states the Committee is aware scanners used to read and verify the identity of Mexican citizens via the swiping of Border Crossing Cards, or laser visas, are not deployed at all primary inspection lanes—including passenger vehicle lanes—along the Southwest border. The Committee believes these cards are a valuable identification tool and requests a report by February 18, 2006, on the plans to continue use of the Border Crossing Cards and the card scanners, the analysis performed to decide not to deploy scanners to all primary vehicle inspection lanes along the Southwest border, and the security benefits derived from the use of card scanners. Report currently under review process in DHS. Target response February 10, 2006.
26. Conference Report 109-241, page 46 states the conferees withhold \$10,000,000 from the CBP Salaries and Expenses appropriation until the Committees on Appropriations receive a five-year strategic plan for CBP Air (and marine, if complete) that addresses missions, structure, operations, equipment, facilities and resources, including deployment and command and control requirements. This report is to include a modernization plan, including milestones and funding required to recapitalize its fleet and operations, as well as a detailed staffing plan showing current on-board positions, annual targets, and a timetable with associated costs to achieve full staffing to meet all mission requirements. No due date assigned in report language. Target response March 2006.
27. Conference Report 109-241, page 43 states by June 30, 2006, CBP is to provide the Committees on Appropriations with an update of its report submitted on July 7, 2005, describing interagency efforts to create a coordinated plan to increase antidumping and countervailing duty collections, particularly related to cases involving unfairly traded Asian imports. The report should break out the non-collected amounts for fiscal years 2004 and 2005, by order and claimant, along with a description of the specific reasons for the non-collection with respect to each order. Target response June 2006.
28. Conference Report 109-241, page 43 directs CBP to continue to work with the Department of Commerce, the Department of Treasury, the Office of the United States Trade Representative, and all other relevant agencies, to provide semiannual reports on its efforts to collect past due amounts and to increase current collections. Target response April 30, 2006 and October 30, 2006.

iv: Schedule of Authorized/Unauthorized Appropriations by PPA

Department of Homeland Security
U.S. Customs and Border Protection
 Schedule of Authorized/Unauthorized Appropriations by Program Project/Activity
 (Dollars in Thousands)

Budget Activity	Last Year of Authorization		Authorized Level	Appropriation in Last Year of Authorization	FY 2007 Request
	Fiscal Year		Amount	Amount	Amount
Salaries and Expenses	2003		\$2,739,695 1/	\$3,195,094 2/	\$5,525,252
Salaries and Expenses	2002	3/	such sums	730,710	5,525,252

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. Customs and Border Protection**
SALARIES AND EXPENSES**I. Appropriation Overview****A. Mission Statement for Salaries and Expenses:**

Following the creation of the Department of Homeland Security (DHS), the Administration established the U.S. Customs and Border Protection (CBP) within the Department's Border and Transportation Security Directorate. CBP is the result of a merger of the inspection and trade functions from the legacy U.S. Customs Service (Customs) with all of the immigration inspection functions from the former Immigration and Naturalization Services (INS), the agricultural border inspection function from the Department of Agriculture's Animal and Plant Health Inspection Service, and the entire Border Patrol. The resulting 41,000-strong CBP created, for the first time, one federal agency entrusted with all significant U.S. border responsibility.

As a result, CBP is the federal agency principally responsible for security of our nation's borders, both at and between the ports of entry. For the first time, one United States border agency can develop and implement a comprehensive strategy for security and enforcement of all laws at our borders.

Homeland security is CBP's priority mission. Most importantly, that means preventing terrorists and terrorist weapons from entering the United States. An important aspect of this priority mission involves improving security at our borders and ports of entry, but it also means extending our zone of security beyond our physical borders. This extended border strategy is essential to creating smart borders and a layered defense-in-depth strategy.

CBP also performs its traditional missions. These include apprehending individuals attempting to enter the U.S. illegally, stemming the flow of illegal drugs and other contraband, protecting our agricultural and economic interests from harmful pests and diseases, regulating and facilitating international trade, collecting import duties, and enforcing U.S. trade laws.

CBP carries out its primary homeland security mission and its traditional missions without restricting the flow of legitimate trade and travel so important to our nation's economy. Accordingly, CBP has a dual mission – to prevent terrorists and their weapons of mass destruction from entering the U.S. and to facilitate legitimate trade and travel. CBP has found that by using advance information, risk management and technology, and by partnering with other nations and private industry, these goals need not be mutually exclusive.

CBP's primary field occupations include CBP Officers, Border Patrol agents, pilots, marine officers, import and entry specialists, and agricultural specialists. Its field organization is focused around 20 Border Patrol Sectors, 142 stations and substations, 20 Field Operations Offices and over 300 associated ports of entry. Field personnel use a mix of air and marine assets, non-intrusive technology

CBP - 1

such as large-scale x-rays and radiation portal monitors, targeting systems, and automation to ensure the identification and apprehension of high-risk travelers and trade and the facilitation of legitimate traffic.

Mission Statement

We are the guardians of our Nation's borders.

We are America's frontline.

We safeguard the American homeland at and beyond our borders.

We protect the American public against terrorists and the instruments of terror.

We steadfastly enforce the laws of the United States while fostering our Nation's economic security through lawful international trade and travel.

We serve the American public with vigilance, integrity, and professionalism.

Core Values

Vigilance: Vigilance is how we ensure the safety of all Americans. We are continuously watchful and alert to deter, detect, and prevent threats to our Nation. We demonstrate courage and valor in the protection of our Nation.

Service to Country: Service to Country is embodied in the work we do. We are dedicated to defending and upholding the Constitution of the United States. The American people have entrusted us to protect the homeland and defend liberty.

Integrity: Integrity is our cornerstone. We are guided by the highest ethical and moral principles. Our actions bring honor to our agency and ourselves.

B. Budget Activities:

Headquarter Management and Administration

Headquarters Management and Administration provides critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Border Security Inspections and Trade Facilitation at the Ports of Entry

Inspections, Trade and Travel Facilitation at the Ports of Entry facilitates the flow of legitimate travel and trade across U.S. borders while ensuring that threats to the U.S. are not allowed entry. This is accomplished by using technology, intelligence and risk information, targeting and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists' instruments of terror and contraband from entering the U.S. while facilitating the legal flow of people and trade by deploying CBP officers to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory

import/export guidance while increasing the security of the U.S. CBP has extended its zone of security beyond its physical borders through the use of bilateral and private-sector partnerships, targeting and scrutinizing advance information on people and products coming into this country. CBP is cultivating "smart borders" through the use of technology, has established a layered defense strategy and created "unifying CBP," a unified, recognizable presence at the border that combines and capitalizes on the authorities and skills of our diverse workforce.

Border Security and Control Between the Ports of Entry

The primary purpose of the Border Security and Control Between the Ports of Entry program is to establish and maintain operational control of U.S. borders by detecting responding to, and interdicting border penetrations. A national strategy that consists of five objectives has been established to achieve the mission of this program: 1) Establish substantial probability of apprehending terrorist attempting to illegally enter between ports of entry, 2) Deter illegal entries through improved enforcement, 3) Detect, apprehend, and deter smugglers of humans, drugs and other contraband, 4) Leverage "Smart Border" technology to multiply the effect of enforcement personnel, and 5) Reduce crime in border communities and consequently improve quality of life and economic vitality of targeted areas. The national strategy requires increasing our national security by augmenting enforcement resources along the northern and southern border. The proper balance in the deployment of personnel, equipment, intelligence, support, technology, and infrastructure is critical. Reducing our vulnerability to the entry of terrorists, illegal aliens and drugs by increasing personnel and resources, is the key to the successful implementation of this strategy.

CBP Air – Salaries

CBP Air - Salaries support a staff of over 1,200 pilots, law enforcement officers, operational support and administrative positions. It provides funding to enhance skills and expertise to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the U.S.

TRANSFER OF MANDATORY FUNDING (\$75.7M)

In December 2004, the Congress passed and the President signed the Commercial Spectrum Enhancement Act (CSEA, Title II of P.L. 108-494), creating the Spectrum Relocation Fund (SRF) to streamline the relocation of Federal systems from certain spectrum bands to accommodate commercial use by facilitating reimbursement to affected agencies of relocation costs. The Federal Communications Commission has allocated this spectrum for Advanced Wireless Services, and plans to auction it as early as June 2006. Funds will be made available to agencies following the crediting of auction receipts to the SRF, anticipated in FY 2007. Following the transfer of funds from the SRF to agency accounts, system relocation efforts will commence. The amounts reported here are the agency's estimated relocation costs, and as reported to the Congress by the Department of Commerce in December 2005. Funds are mandatory and will remain available until expended, and agencies will return to the SRF any amounts received in excess of actual relocation costs.

CBP will use the \$75.7 million to replace microwave transmitters, receivers, multiplexers and interfaces as needed, in keeping with engineering studies that will be undertaken to move from the current bands to the new bands.

C. Budget Request Summary:

The CBP Salaries and Expense requests 36,584 positions, 35,447 FTE, and \$5,519,022,000 for FY 2007 Request. Total adjustments-to-base is 635 FTE and \$179,741,000. Program increases include 2,274 positions, 1,137 FTE, and \$537,091,000.

Secure Border Initiative (\$639M) – Within the request is funding that supports the Secure Border Initiative (SBI). DHS developed a three-pillar approach under the SBI that will focus on controlling the border, building a robust interior enforcement program, and establishing a Temporary Worker Program. SBI, a performance-driven, department-wide enterprise will use resources from the Department's components to make dramatic changes in the border security system. It will cover every facet of how we sanction, manage, adjudicate, and remove persons caught crossing the border; deter illegal migration overall; manage immigration violators currently in the country; and interact with States and localities at the front lines of immigration problems.

Funding dedicated to SBI efforts facilitates a complete program encompassing many administrative, legal, and regulatory actions. Substantial resource enhancements provided in 2005 and 2006 will pave the way for an effective SBI program, and 2007 will be a turning point towards meeting long-term border security objectives.

\$140 million of the \$639 million is funded from the Construction account, with the remainder funded from the Salaries and Expense account. The following are a few of the key investments in CBP for SBI:

- **Border Patrol Agents** – \$458.9 million to increase the agent workforce by 1,500 agents, bringing the total of new agents added since 2005 to 3,000; this brings the overall total number of agents to nearly 14,000. This addition increases the size of our Border Patrol Agent workforce to 42% above the level prior to the September 11th attacks. Operational control of our borders over the long term can only be attained with significant increases of the agent workforce.
- **Border Technology** – \$100 million for border technology will enhance electronic surveillance and operational response ability. In 2006, DHS will solicit and award a contract to complete the transition from the current, limited-scope technology plan to one that addresses the Department's comprehensive and integrated technological needs, as well as the multitude of inputs necessary to secure our borders. Funding requested in the 2007 President's Budget will provide significant procurement investments needed to begin an aggressive deployment plan.
- **San Diego Border Infrastructure System** – \$30 million to fund the continued construction of the San Diego Border Infrastructure System (BIS) project that includes multiple fences and patrol roads enabling quick enforcement response. Completion of this project gives the United States full operational control of the most urbanized corridor of our border with Mexico.

Total Change 2006-2007	60	30	1,739

CBP requests \$1.3 billion for this activity. This is a net increase of \$1.7 million over FY 2006 after nonrecrurals of \$2.3 million for FY 2006 initiatives and a total program increase of \$4 million for Procurement Staffing and Internal Control Audit.

CURRENT SERVICES PROGRAM DESCRIPTION:

Headquarters Management and Administration provides critical policy and operational direction, mission support, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

The largest support organizations funded under CBP's Headquarters Management and Administration includes:

Office of Training and Development

The Office of Training and Development (OTD) is responsible for centralized leadership and direction of all CBP training programs. OTD directly executes career development programs, basic and advanced training to all occupations, management and executive development programs, and develops and implements the annual training plan for the agency. CBP is also responsible for operation of the advanced training facility in Harpers Ferry, West Virginia.

Office of Information and Technology

The Office of Information and Technology (OIT) provides integrated, comprehensive technical support to carry out the mission of CBP. OIT is responsible for developing, acquiring, testing, and maintaining existing technology and engineering new technology solutions; for managing the CBP Modernization Program; for overseeing the forensic and scientific analysis provided by the CBP laboratory system; for designing, developing, maintaining and training personnel on CBP's automated systems; for overseeing the tactical wireless radio program; and for ensuring the reliable performance of our infrastructure. OIT also manages the computer security program; establishes automated interfaces between CBP, trade participants, and other government agencies; and provides reference library and electronic information resources.

Office of Finance

The Office of Finance (OF) provides high quality, cost-efficient financial management services through customer involvement and modern, integrated financial systems, in support of CBP's goal of developing and promoting more effective and efficient methods to obtain and manage financial data, resources, and capital assets, consistent with the needs of customers and stakeholders. OF is responsible for acquiring and effectively managing the assets needed to accomplish CBP's frontline mission. This includes translating workloads and requirements into budget requests for needed resources, allocating and distributing funds after resources are made available, acquiring and distributing personnel, goods, and services that are used to accomplish CBP's mission, managing and paying for those goods and services, and reporting on costs and use of personnel, goods, and services.

Office of Human Resources

The Office of Human Resources (HRM) is responsible for ensuring effective delivery of the following services: filling positions, providing employee services and benefits, processing personnel actions, and facilitating workforce effectiveness. HRM promotes and enables mission accomplishments through human capital planning and utilization, strategic leadership with regard to CBP employees, and efficient processes and practices to meet customers' operational needs. HRM also manages the Safety and Health Program.

Other Organizations

Other organizations funded under Headquarters Management and Administration includes the following:

- Office of the Commissioner (OC)
- Office of the Chief Counsel (CC)
- Office of Congressional Affairs (OCA)
- Office of Management Inspections and Integrity Assurance (MIIA)
- Office of Public Affairs (OPA)
- Office of Strategic Trade (OST)
- Office of Regulations and Rulings (ORR)

PPA: BORDER SECURITY INSPECTIONS AND TRADE FACILITATION AT
POE's

	Perm. Pos.	FTE	Amount
2005 Actual	15,379	15,379	\$1,242,800
2006 Enacted	15,372	15,372	1,249,648
2007 Adjustments-to-Base	26,454
2007 Current Services	15,372	15,372	1,276,102
2007 Program Change	42	21	6,000
2007 Request	15,414	15,393	1,282,102
Total Change 2006-2007	42	21	32,454

CBP requests \$1.3 billion for this activity. This is an increase of \$32.5 million over FY 2006 for pay and non-pay inflation, as well as a total program increase of \$6 million for the Immigration Advisory Program and Fraudulent Document Analysis Unit.

CURRENT SERVICES PROGRAM DESCRIPTION:

Registered Traveler Programs

Since the terrorist attacks of September 11th, CBP has placed great emphasis on developing and expanding registered traveler programs for passengers and commercial truck drivers at the land borders with Canada and Mexico, and developing similar programs for international air passengers. These International Registered Traveler (IRT) programs identify low-risk, pre-cleared travelers through an application, vetting and fingerprint/name check process, thereby allowing resources to be focused on more high-risk, unknown travelers. Currently, CBP has five credentialing programs – NEXUS Highway, NEXUS Air, the Free and Secure Trade (FAST) and the Secure Electronic Network for Traveler's Rapid Inspection (SENTRI) Highway and SENTRI Pedestrian. The FY 2006 Appropriations Act provided funding for FAST/NEXUS/SENTRI under C-TPAT (see C-TPAT for descriptions of these programs). CBP will launch another air program (US PASS) at John F. Kennedy International Airport in New York, in 2006.

United States Passenger Accelerated Service System (US-PASS)

The purpose of the United States Passenger Accelerated Service System (US-PASS) is to implement a single integrated passenger processing system that will expedite the movement of international low-risk, frequent air travelers by providing an alternative primary inspection process for pre-approved, pre-screened eligible travelers. The US-PASS pilot program will be implemented at John F. Kennedy (JFK) International Airport, Terminal 4, in 2006. Proposed expansion includes the other major international terminals at JFK, and the 21 other major airports in the US and Canada (pre-clearance locations).

Global Enrollment System (GES)

CBP, in coordination with OIT, has developed a Global Enrollment System (GES) for

all CBP registered traveler programs to be operational on the CBP national network. The GES has integrated the independent CBP enrollment and validation processes into a single solution, and provides a more efficient platform to share data and perform real-time watchlist and lookout checks. This system will also reduce the redundancy of maintaining several application processes and allow for a quicker and accurate manner to process applications.

A single online, paperless application process is being developed by CBP to support the GES and will allow a traveler to apply a single time for enrollment in all of the programs. It is envisioned that once GES is fully operational, CBP will have a single Registered Traveler program that will have a one-time application process that will allow a person to be registered in land, sea, or air programs.

Customs Automated Operations System (CAOS)

CAOS is a national client-server computer system running at the port of entry level that schedules enforcement operations and officer lane rotations in an unpredictable manner, uses illuminated signage to order operations or lane changes, and tracks all enforcement activity. The unpredictability of the system is designed to combat surveillance activity by smugglers, to deny the willful violator his choice of lane and to lessen the possibility of internal conspiracy.

The database records the particulars of all enforcement operations and has a number of statistical and analytical reports available. CAOS has been a highly effective tool for our field personnel, ensuring officer integrity, avoiding the predictability of operations, increasing accountability, and maximizing productivity.

Advanced Passenger Information System (APIS)

The Advance Passenger Information System (APIS) allows carriers to transmit passenger manifests to CBP, electronically, in advance of a vessel or aircraft arrival. Advanced electronic receipt of passenger and crew information gives CBP the opportunity to target individuals prior to arrival in order to concentrate our time on persons of interest and facilitate the flow of legitimate goods and services through the Federal Inspection Process. APIS is used as the backbone for the US-VISIT program and Automated Targeting System (ATS).

License Plate Readers

The License Plate Reader (LPR) system automatically locates, reads and communicates license plate information to the Treasury Enforcement Communication System (TECS). TECS then automatically queries its database for law enforcement information associated with that license plate and provides the CBP officer with the response information. As an enhancement to the LPR system, the Vehicle Counter System (VCS) capability utilizes the LPR equipment to count the number of vehicles passing through each lane as they enter the United States. There are currently 388 LPR lanes and 58 VC Systems deployed in the field.

Immigration Advisory Program (IAP)

CBP officers will be deployed overseas to perform a tactical function, the goal of which is to prevent the onward movement of people identified as national security threats. IAP works to disrupt and deter the transportation of inadmissible aliens and the use and proliferation of fraudulent documents. IAP provides information to host countries, or appropriate authorities regarding travelers of interest. IAP uses current targeting and passenger analysis information provided by the National Targeting Center (NTC) to focus on high-risk persons. These efforts are intended to lead to the apprehension and prosecution of criminals and persons of national security interest by host countries, the disruption of attempts to smuggle aliens and contraband, and the disruption of attempts to enter the United States with fraudulent documents. IAP will work with the host country's immigration and/or customs control authority and the air carrier who will take the appropriate action to prevent the person from boarding the flight. In FY 2006, CBP plans to deploy IAP to London and Tokyo.

Air Transit Program

The Air Transit Program (ATP) is a security-enhanced International-to-International (ITI) in-transit program that allows certain applicants for admission to transit through the United States without being in possession of a nonimmigrant visa. ATP allows the rapid facilitation of persons with and without visas to transit the United States without leaving sterile inspection areas of international U.S. ports of entry.

Fraudulent (Travel) Document Program

The Fraudulent Document Analysis Unit (FDAU), the Office of Field Operations entity connected with the National Targeting Center, was implemented on January 1, 2005. In response to *The 911 Commission Report*, it gathers in one location all the fraudulent documents intercepted at the ports of entry nationally. From these documents and their accompanying apprehension reports, analysts compile profiles of smugglers, then target persons whose travel was probably arranged by a smuggler for close scrutiny at entry. FDAU analysts also gather intelligence information, write regular reports and reports customized for the DHS requester, plot trends, generate document seizure statistics, and give briefings on international travel using fraudulent documents. Although the unit examines all fraudulent travel documents, it focuses on documents from terrorist-linked countries and documents presented by persons with a connection to terrorism. The products generated by the FDAU also benefit government intelligence units within DHS and other parts of the Federal Government, including Congress.

Admissibility Review Office

In January 2005, CBP created a new Admissibility Review Office (ARO) to provide a dedicated resource with institutional knowledge and a consistent approach in making determinations of admissibility, inadmissibility, and the exercise of discretion for inadmissible aliens under the Immigration and Nationality Act (INA). The ARO works extensively with the Department of State to determine whether inadmissible aliens may be permitted to travel as nonimmigrants with waivers. This process consists of reviewing applications submitted by aliens who have been determined by CBP officers or consular officers to be ineligible to be admitted to the United States because of one or more

grounds of inadmissibility under section 212(a) of the INA. The ARO must first review the record to determine whether the alien, in fact, is inadmissible and if so, whether, in the exercise of discretion, to approve authorization so that the alien may be admitted to the United States despite the existing ground(s) of inadmissibility. Each case requires an assessment of the risk of harm to society if the alien is to be admitted, balancing the risk of harm to the United States against the alien's reasons for wanting to travel.

In FY 2006, the ARO will provide authorizations to DOS for American consulates to issue boarding letters to permanent resident aliens who are overseas but have reported lost or stolen permanent resident cards. Other work that will transition to the ARO when a permanent location and staffing are secured includes:

- I-192 nonimmigrant waiver decisions made at all other ports (in addition to the preclearance workload already performed).
- Transition seat of government nonimmigrant waivers to the ARO.
- Establish process to consider immigrant waivers for returning aliens who have already been accorded permanent resident status but who have subsequently been determined to be inadmissible.
- Transition decision-making authority for all NSEERS waivers from field offices to the ARO.

Since January 2005, the ARO has received approximately 2600 Forms I-192 from preclearance sites and has been making decisions on 300-350 cases per month from consular posts worldwide since June 1, 2005.

Canine Enforcement Program

The Canine Enforcement Program (CEP) plays a crucial role in CBP's anti-terrorism and interdiction efforts. The Canine Enforcement Training Center (CETC), located in Front Royal, Virginia, provides training for all Office of Field Operations CBP Officers (K9); and on a reimbursable basis, to other Federal, state, local and foreign law enforcement agencies. The mission of the CEP is to develop, execute and oversee customer-driven policy needs for the allocation, training and support of canine resources. These valuable resources interdict explosives, chemicals, concealed humans, currency, narcotics, and prohibited agricultural products while facilitating legitimate trade and travel. CEP will continue to advance and develop the anti-terrorism aspects of our mission while maintaining the traditional roles of narcotics interdiction.

Trade Agreements Program

The current ambitious strategy of the United States in negotiating free trade agreements (FTAs) underscores the importance of trade for building international alliances for national security purposes and promoting economic prosperity. The OFO Trade Agreements Branch (TAB) represents CBP at FTA negotiations to ensure security and operational concerns are incorporated into final agreements. In addition to existing trade programs, the TAB has implemented three new FTAs in the past two years (Singapore, Chile, and Australia) and is preparing to implement three more in the next six to 12 months (Central America Free Trade Agreement, Bahrain, and Morocco). New FTAs

with 12 more countries are under negotiation and several more have been proposed, including the creation of a comprehensive Middle East Free Trade Area and the proposed Free Trade Agreement of the Americas, which will span the entire Western Hemisphere. The Panama FTA, the Thailand FTA, and the Andean FTA, which includes Ecuador, Colombia, and Peru, are scheduled for implementation by 2007. The TAB works with the Office of Regulations and Rulings (ORR), the Office of Information Technology (OIT), and the Office of Strategic Trade (OST) to interpret and monitor the FTAs, and provide training to CBP field offices and technical advice to the trade community.

Automated Commercial System (ACS) Reconciliation Prototype

The ACS Reconciliation Prototype allows participating importers to file entry summaries with CBP with the best available information, with the mutual understanding that certain elements, such as the declared value, remain outstanding. At a later date, when the specifics have been determined, the importer files a reconciliation, which provides the final and correct information. The Reconciliation is then liquidated, with a single bill or refund, as appropriate.

Currently over 2,000 companies participate in the prototype, including many of the largest and busiest importers in the country. Participants may "flag" entries for Reconciliation at any port. However, Reconciliation entries may only be filed at one of thirteen assigned processing ports. CBP has reviewed and liquidated thousands of Reconciliation entries since the prototype's inception.

Remote Location Filing Prototype

Remote Location Filing (RLF) allows approved customs brokers or importers to submit electronic entry data for clearance from a location other than the port of arrival. RLF was created as one of the Customs Modernization Act provisions enacted in December 1993. Approved importers and brokers transmit electronic entry data via the Automated Broker Interface (ABI) to RLF-trained CBP ports. This transaction includes an electronic invoice when requested. RLF may be used for processing formal (entry type 01) and informal (entry type 11) entries. This completely electronic, paperless transaction will be the "process model" for entry filing under the Automated Commercial Environment (ACE).

Account Management Program

The account management program (AMP) is designed to meet CBP's goal of changing the way CBP does business with the international trade community in order to facilitate and improve the flow of trade while enhancing homeland security. The AMP was established in 1997 to regulate and facilitate international trade and has since expanded in scope to include preventing terrorism. Implementation of the AMP's policies and procedures shifted the agency's method of conducting business from the traditional transactional approach to an account-based approach. All agency activities related to a particular account are linked and associated under this approach. Importantly, account management facilitates the measurement and tracking of account compliance and processing activities as information is compiled by account, rather than by transaction. Consequently, the agency manages its workload more efficiently.

Cargo Release Program

The Cargo Release program has responsibility for and oversight over the release by CBP Officers of all cargo arriving in the U.S. Cargo release is the process that allows merchandise to move into the commerce of the U.S. after it arrives at a U.S. port of entry. It begins with information provided to CBP by importers, customhouse brokers or other interested parties electronically and on paper. It continues through the review phase of processing, including targeting and selectivity and continues through the examination process. At the conclusion of the process, the reviewed and evaluated or examined merchandise is allowed to enter the commerce of the U.S.

Section 343 (a) of The Trade Act of 2002 (Public Law 107-210), as amended by section 108 of the Maritime Transportation Security Act of 2002 (Public Law 107-295), mandates the collection of electronic cargo information by CBP prior to the arrival of the cargo into the United States by any mode of commercial transportation. The information required must consist of information about the cargo that is determined to be reasonably necessary for CBP to identify high-risk shipments, ensure cargo safety and security and prevent smuggling pursuant to the laws that CBP enforces and administers. In addition, Cargo Selectivity information and ATS targeting results are provided with entry and manifest information to allow the CBP Officers to make informed release decisions. The OFO Cargo Release program maintains an ongoing relationship with the Office of Information Technology (OIT) to develop and refine both legacy systems (ACS) and new initiatives (ACE). The program also maintains a close working relationship with the electronic targeting areas of CBP. The program is responsible for the oversight of the Compliance Measurement (security) examination process and the trade examination process.

In all of the environments and modes of transportation, the Cargo Release program analyzes existing or proposed processes, assists in the development or amending of regulations, develops operational procedures and policies, communicates this policy and procedure to internal and external stakeholders and oversees implementation of these changes to reduce the negative impact of large scale changes. The program played a significant role in the development of procedures for and implementation of initiatives including the Bioterrorism Act, the Trade Act of 2002, the ACE releases and FAST.

Drawback Program

Drawback is a revenue program whereby CBP refunds monies previously paid on imported merchandise. Due to the programs complexity and because it refunds monies, it must have exceptionally tight internal control procedures.

Textile Enforcement and Operations Program

The Textile Enforcement and Operations Program (TEOD) has oversight over the implementation and enforcement of Free Trade Agreements (FTA), various trade legislation programs. The Program is also responsible for the implementation of all quotas, including those on agricultural products.

Outbound Programs

Outbound Programs is responsible for enforcing U.S. export laws and regulations and ensuring that weapons of mass destruction do not fall into the hands of criminals or terrorists. The mission is to interdict illegal exports of military and dual-use commodities controlled under the U.S. Munitions List and the Commerce Control List, enforce sanctions and embargoes against specially designated terrorist groups, rogue nations, organizations and individuals, interdict the illicit proceeds from narcotics and other criminal activities in the form of unreported and smuggled currency, interdict stolen vehicles, increase export compliance, and develop and utilize the Automated Export System (AES) to collect electronic export information and export manifest data that can be used to target illicit exports and increase targeting effectiveness. Outbound programs enforce the following laws and regulations; the International Traffic in Arms Regulations (ITAR) for the Department of State, the Export Administration Regulations (EAR) for the Department of Commerce, and sanctions and embargoes for the Department of Treasury's Office of Foreign Assets Control (OFAC). Additionally, Outbound Programs are responsible for ensuring that exports of Foreign Military Sales are done in accordance with the Department of State and Department of Defense regulations.

Antidumping Countervailing Duty (AD/CVD) Program

The AD/CVD program administers and oversees port operations with regard to Department of Commerce (DOC) AD/CVD orders. This includes sending electronic messages regarding DOC orders and other instruction to the ports to follow. When a DOC order is published, CBP must immediately suspend the liquidations of the entries affected and hold them suspended until DOC sends CBP a message to liquidate the entries. At that time CBP ports must identify all the entries and liquidate them. However, often times, when DOC sends a message to liquidate, private parties disagree with the instructions in them and go into court and get injunctions. When an injunction is received by CBP the agency must ensure that it prevents the liquidation of the entries specified in the injunction until the injunction is lifted and DOC sends further liquidation instructions. There are approximately 350 DOC orders for CBP to administer.

Commercial Enforcement Program

CBP must monitor importations to detect fraudulent or other non-compliant behavior by importers. The Headquarters office supports field offices that investigate all forms of commercial fraud throughout the country. These offices blend the expertise of import specialists, CBP officers, regulatory auditors and International Trade Specialists to fight fraud. Types of fraud schemes include, Counterfeiting, False Country of Origin, false merchandise descriptions, under valuation, misclassification all done to avoid the payment of duties or to enter prohibited goods into the United States.

Intellectual Property Rights (IPR) Enforcement Program

IPR enforcement is a priority trade issue for DHS (CBP and ICE) and also is coordinated with the Administration's government-wide STOP initiative (Strategy Targeting Organized Piracy). CBP enforces trademarks, trade names, and copyrights on its own statutory authority, and also enforces patents and other forms of intellectual property

pursuant to exclusion orders issued by the International Trade Commission under the authority in 19 U.S.C. 1337 and pursuant to court orders.

Seizures and Penalties Program

The Seizures program is responsible for oversight of the construction, maintenance, and security of agency permanent seized property storage facilities. Additionally, the program monitors the destruction of controlled substances and management and disposition of seized property stored in agency permanent seized property storage facilities.

The program, administered by Headquarters was created about 5 years ago to improve oversight and control of high risk seized property (drugs, guns, money), and to improve risk management relative to storage of seized property in agency controlled facilities. In recent years, the focus of the program has been to create strict internal controls, develop meaningful training, and to create automated tools to assist Headquarters in performing more effective oversight of field offices. Additionally, the focus has moved toward conducting unannounced inspections of agency permanent seized property storage facilities to determine compliance with established policies and procedures. Additionally, FY 2004 has seen the integration of legacy INS, Border Patrol and Agriculture into this program. The program has developed a unified standard protocol for the processing of asset forfeitures.

Agricultural Liaison

This program is responsible for developing policy and planning for CBP Agriculture programs, liaison issues, procedures, manual changes, and Memorandum of Agreement with USDA. The liaison coordinates stakeholders including agricultural subject matter experts (SME) for the Office of Inspector General (OIG) and the General Accounting Office (GAO), and coordinates congressional issues, pending legislation, and agriculture related training. Responsible for issue papers, reports, fact sheets, and briefing books.

Agricultural Safeguarding Programs

This program is responsible for development/negotiation of inspection guidelines, alerts, risk analysis, Agricultural Quarantine Inspection (AQI) Self Assessment, quality assurance liaison, monitoring methods and tools, cargo release protocols, staffing models (based on risk), new technology, export/transit issues, and civil penalty policy. Responsible for resolving complex AQI issues, developing plans for special operations in the agriculture environment, and liaison internally and externally (United States Department of Agriculture, Food and Drug Administration, Center for Disease Control, etc.) on all issues listed above.

Bio/Agro Terrorism

This program is responsible for Bio/Agro-terrorism strategies, planning and conducting internal test exercises, facilitating selection of agriculture criteria for targeting rules, developing intelligence sources internally and externally (in conjunction with NTS) for bio/agro-terrorism countermeasures and special operations, and developing liaison and expertise internally and externally related to bio/agro-terrorism. The program also

collects, analyzes, and reports on bio/agro-terrorism vulnerabilities and threats; uses subject matter experts to develop specialized training, and develops partnerships to enable CBP to assess risk, anticipate, target, and intercept sources of bio/agro-terrorism.

Agricultural Food Safety and Endangered Species Program

CBP Office of Field Operations directs program and policy guidance with respect to the detection of food and agricultural shipments that require inspection intervention for one or more agencies that enforce trade and conservation laws. As the border agency with an overall primary legal jurisdiction over U.S. imports and exports, CBP coordinates the reporting, tracking and operational response to shipments that require primary governmental intervention for safety and regulatory purposes.

Air/Sea Cargo Security Program

The Cargo Security Verification Program addresses maritime and air cargo security matters, with a primary mission of securing cargo against terrorists and the transport of terrorist weapons within the cargo arena, and the coordination of maritime/air programs with other law enforcement agencies to ensure the maximization of efforts in these environments. The program provides a critical component in the facilitation and coordination among other law enforcement agencies of combined anti-terrorism efforts while ensuring the facilitation of trade continues with minimal effect on our economy. The component elements are:

Maritime – CBP has the lead for cargo security controls and measures to mitigate the risk of suspect shipments arriving from or departing to foreign destinations. These efforts support the CBP Cargo Security Strategy and other DHS initiatives such as implementation of the Maritime Transportation Security Act (MTSA). CBP works in collaboration with DHS and its components agencies, (i.e., USCG) on cargo and port security matters. This program supported the development of the Homeland Security Presidential Directive 13 (HSPD-13) National Strategy for Maritime Security and is involved in various aspects of the implementation of the Strategy for CBP and field offices.

Air Cargo – Implementation is underway of a national targeting strategy in support of the CBP Cargo Security Strategy. Additional coordination is being conducted with DHS and TSA to maximize efforts in the air cargo security environment. Under this program, CBP is supporting the DHS/Israeli work group in addressing air cargo security measures and identifying best practices.

The Cargo Security Verification Program plays an instrumental role in addressing maritime and air cargo security issues identified in the Security and Prosperity Partnership for North America and will participate in various working groups comprised of U.S., Mexican and Canadian government representatives.

Lastly, in support of the President's Proliferation Security Initiative (PSI), the Cargo Verification Program representatives participate in the U.S. interagency workgroup addressing maritime and air cargo operational matters.

PPA: HARBOR MAINTENANCE FEE (HMF) COLLECTION

	Perm. Pos.	FTE	Amount
2005 Actual	\$3,000
2006 Enacted	3,000
2007 Adjustments-to-Base	26
2007 Current Services	3,026
2007 Program Change
2007 Request	3,026
Total Change 2006-2007	26

CBP requests \$3 million for this activity. This is an increase of \$26,000 over FY 2006 to cover non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Harbor Maintenance Fee is an Army Corps of Engineers (COE) fee, which is collected for the operation and maintenance, as well as improvements, of U.S. channels and harbors. CBP is reimbursed for a portion of the costs associated with the collection of the fee for COE.

PPA: CONTAINER SECURITY INITIATIVE (CSI)

	Perm. Pos.	FTE	Amount
2005 Actual	143	94	\$126,096
2006 Enacted	155	149	137,402
2007 Adjustments-to-Base	...	6	1,910
2007 Current Services	155	155	139,312
2007 Program Change
2007 Request	155	155	139,312
Total Change 2006-2007	...	6	1,910

CBP requests \$139.3 million for this activity. This is a net increase of \$1.9 million over FY 2006 to cover pay and non-pay inflation of \$2.6 million and nonrecrurals of \$0.7 million from FY 2006 initiatives.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Container Security Initiative will continue its mission to prevent terrorists and terrorist weapons from entering the United States, while also facilitating the flow of legitimate trade. As of August, 2005, CSI was operational in 41 ports in Europe, Asia, Africa and North America, and covered over 73 percent of the volume of maritime containers destined to the United States. Today, CSI is the only multinational program in the world actually protecting the primary system of global trade – containerized shipping – from being exploited or disrupted by international terrorists.

The four core elements of CSI are:

- Identify high-risk containers. CBP uses automated targeting tools to identify containers that pose a potential risk for terrorism, based on advance information and strategic intelligence.
- Prescreen and evaluate containers before they are shipped. Containers are screened as early in the supply chain as possible, generally at the port of departure.
- Use technology to prescreen high-risk containers to rapidly complete the process without impeding the movement of trade.
- Use smarter, more secure containers that allow CBP officers at domestic States ports of arrival to identify containers that have been tampered with during transit.

Through the CSI program, CBP deploys multi-disciplined teams that include agents, intelligence analysts and CBP officers to selected foreign seaports throughout the world, to protect the United States and its citizens from potential terrorist attacks in the maritime cargo environment and to help secure the primary system of international trade: containerized shipping from a container loaded with a weapon of mass destruction or effect (WMD/E) such as a biological, chemical, radiological, nuclear or explosive device.

By the end of FY 2007, CSI will continue to work toward locating its ports in additional areas of the world where terrorist weapons can be detected, and specifically intends to expand CSI to over 53 ports covering about 81 percent of the volume of maritime containers destined to the United States.

CSI will continue fostering partnerships with other countries and our trading partners in order to inspect all high-risk containers before they are loaded on board vessels to the

United States. CBP will ensure effective coordination with host countries by conducting periodic risk evaluations of ports to assess the level of staffing and other resource needs. CBP will also encourage interagency cooperation by developing a capacity to collect and share information and trade data gathered from CSI ports.

PPA: OTHER INTERNATIONAL PROGRAMS

	Perm. Pos.	FTE	Amount
2005 Actual	100	100	\$57,300
2006 Enacted	100	100	8,543
2007 Adjustments-to-Base	158
2007 Current Services	100	100	8,701
2007 Program Change
2007 Request	100	100	8,701
Total Change 2006-2007	158

CBP requests \$8.7 million for this activity. This is an increase of \$158,000 over FY 2006 to cover pay and non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

The goal of Other International Programs is to develop and implement a framework of standards to secure and facilitate global trade that is based upon principles designed and implemented by CBP to be implemented by the 164 World Customs Organization members. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat trans-national crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is all accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, representation of CBP positions in various international forums, international technical assistance and training, and the negotiation of international agreements.

In FY 2007, CBP will continue to implement the standards to secure and facilitate global trade that is based upon principles designed and implemented by the 164 World Customs Organization members.

PPA: CUSTOMS-TRADE PARTNERSHIP AGAINST TERRORIST (C-TPAT)/
FAST/SENTRI/NEXUS

	Perm.		
	Pos.	FTE	Amount
2005 Actual	263	203	\$ 37,828
2006 Enacted	263	263	74,515
2007 Adjustments-to-Base	1,394
2007 Current Services	263	263	75,909
2007 Program Change
2007 Request	263	263	75,909
Total Change 2006-2007	1,394

CBP requests \$75.9 million for this activity. This is an increase of \$1.4 million over FY 2006 to cover pay and non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP recognizes that safe and secure international supply chains are critical components to securing our nation's borders against terrorism and to facilitate legitimate trade. C-TPAT provides the business community and government a venue to exchange ideas, information, and best practices in an ongoing effort to create a secure supply chain, from the foreign factory floor to U.S. ports of entry.

Supply Chain Security Specialists provide CBP with a cadre of personnel dedicated to providing advice and guidance to customs field officers and trade community representatives on supply chain security issues. In addition, the Supply Chain Security Specialists conduct C-TPAT validations, identify supply chain security vulnerabilities, and work with/monitor company initiatives that address those vulnerabilities. Validations conducted by Supply Chain Security Specialists serve to determine the accuracy and effectiveness of companies' security profiles as applied to their supply chain, both foreign and domestic.

To better secure and facilitate the flow of goods into the United States, CBP will ensure that existing and new C-TPAT partners fulfill their commitments by verifying that agreed security measures have been implemented. CBP will also work with its C-TPAT partners to further finalize minimum, applicable supply chain security criteria and security best practices. CBP will send teams of specialists around the globe, to visit members, their vendors, and vendors' plants to validate that supply chain security meets C-TPAT minimum security criteria and best practices and that procedures used are reliable, accurate, effective and meet the agreed upon security standards. CBP will continue

providing tools and creating incentives for the private sector to join C-TPAT, which is a prerequisite for the FAST program and other CBP expedited processing programs.

FAST

FAST is the cargo equivalent to facilitative programs in the passenger environment such as SENTRI and NEXUS. Through FAST, importers, commercial carriers, truck drivers, and manufacturers who enroll in the program and meet agreed upon security criteria, including participation in the C-TPAT program, are entitled to expedited clearance at the port of entry. Using electronic data transmission and transponder technology, CBP expedites clearance of approved trade participants. The FAST program fosters more secure supply chains and enables CBP to focus security efforts and inspections where they are needed most – on high-risk commerce. Proposed expansion sites for FY 2005 are: Oroville, WA, International Falls, MN; Sault Sainte Marie, MI; Ogdensburg, NY; Massena, NY; Houlton, ME; Calais, ME; Tecate, CA; Douglas, AZ; San Luis, AZ; Santa Teresa, NM; Eagle Pass, TX; Rio Grande City, TX; and Del Rio, TX.

NEXUS Highway

NEXUS is an enrollment program that identifies, through a complete background check and fingerprinting, low-risk travelers. Once an applicant is identified as low-risk they are enrolled in the NEXUS program and given a radio frequency identification card (RFID) that is specific to the traveler. The RFID card allows the traveler to utilize the NEXUS dedicated commuter lane, which is a specific primary lane at the land border port of entry that can only be used by NEXUS enrollees. The use of the NEXUS lane facilitates the movement of low-risk travelers. Possible expansion sites for NEXUS Highway in the next three to five years are: Lewiston Bridge, Buffalo, New York; Alexandria Bay, New York; Houlton, Maine; Pembina, North Dakota; and Sault Sainte Marie, Michigan.

NEXUS Air

NEXUS Air is an airport border clearance pilot project, pursuant to the *Accord on our Shared Border* and the *Smart Border Declaration* between Canada and the United States. The Canada Border Services Agency (CBSA) and CBP have jointly designed, developed, and implemented NEXUS Air at Vancouver International Airport, Vancouver, British Columbia, Canada. It is based upon the NEXUS Highway program and the Canadian CANPASS Program, formerly Expedited Passenger Processing System (EPPS). NEXUS Air has been developed as an alternate primary inspection process that will facilitate and expedite secure passage into Canada and the United States for pre-approved, low-risk frequent air travelers using automation to process through primary customs and immigration screening. This will allow CBSA and CBP officers to focus their efforts on unknown, potentially higher-risk travelers and goods.

Secure Electronic Network for Traveler's Rapid Inspection (SENTRI)

SENTRI is an enrollment program that identifies, through a complete background check and fingerprinting, low-risk travelers. Once an applicant is identified as low-risk they are enrolled in the SENTRI program and given a radio frequency identification card (RFID) that is specific to the traveler. The RFID card allows the traveler to utilize the SENTRI dedicated commuter lane, which is a specific primary lane at the land border port of entry

that can only be used by SENTRI enrollees. The use of the SENTRI lane facilitates the movement of low-risk travelers. SENTRI has been expanded to Brownsville, Laredo, and El Paso, Texas; Zaragosa Nogales, Arizona, Calexico, California and is pending installation at Hidalgo, TX.

PPA: INSPECTION AND DETECTION TECHNOLOGY

	Perm. Pos.	FTE	Amount
2005 Actual	71	71	\$145,159
2006 Enacted	71	71	62,394
2007 Adjustments-to-Base	19,923
2007 Current Services	71	71	82,317
2007 Program Change	106	53	12,000
2007 Request	177	124	94,317
Total Change 2006-2007	106	53	31,923

CBP requests \$94.3 million for this activity. This is an increase of \$31.9 million over FY 2006 to cover pay and non-pay inflation and program increases of \$12 million for Weapons of Mass Destruction Technology Staffing.

CURRENT SERVICES PROGRAM DESCRIPTION:

As trade increases, CBP's reliance on Non-Intrusive Inspection (NII) technology, the cornerstone of CBP's multi-layered strategy to secure the borders, becomes more and more critical. In conjunction with CBP's many other initiatives (C-TPAT, ATS, NTC, CSI, etc.), NII allows us to work "smarter."

An adversary can defeat any single sensor or device, and therefore, CBP does not rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon or weapons grade material will be detected.

CBP also uses NII technology to detect and interdict narcotics, currency and other contraband secreted in large containers and commercial shipments. Technologies deployed to our nations' land, sea and airports of entry include large-scale X-ray and gamma-imaging systems as well as a variety of portable and handheld technologies and include our recent focus on radiation detection technology.

NII technologies are viewed as force multipliers that enable CBP Officers to screen or examine a larger portion of the stream of commercial traffic while easing the flow of legitimate trade, cargo and passengers.

PPA: SYSTEMS FOR TARGETING

	Perm. Pos.	FTE	Amount
2005 Actual	8	7	\$ 29,800
2006 Enacted	8	8	27,970
2007 Adjustments-to-Base	(672)
2007 Current Services	8	8	27,298
2007 Program Change
2007 Request	8	8	27,298
Total Change 2006-2007	(672)

CBP requests \$27.3 million for this activity. This is a net decrease of \$0.7 million below FY 2006 due to cover pay and non-pay inflation of \$0.5 million and nonrecurrents of \$1.2 million for FY 2006 initiatives.

CURRENT SERVICES PROGRAM DESCRIPTION:

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is the ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law-abiding travelers and commerce to move without unnecessary delay. Recent legislation and regulatory action, such as the Trade Act of 2002 and the 24-hour rule, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based software to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possible intensive inspection.

The main platform used to perform this analysis is the Automated Targeting System (ATS). APIS and ACS provide CBP Officers (including those stationed overseas at CSI ports) with advanced notice of travelers and goods arriving at U.S. ports of entry, allowing them to cross-check the passenger and cargo manifests against databases such as Treasury Enforcement Communications System (TECS), the Interagency Border Inspection System (IBIS), and National Crime Information Center (NCIC) for "lookouts" for unlawful activity. CBP also uses ATS to analyze data in the Automated Export System (AES) on shipments leaving the U.S. ATS enhances the APIS, ACS, and AES data by running rules developed by CBP's subject matter experts to identify travelers and shipments with high-risk travel patterns. ATS also allows CBP officers to conduct advanced queries of these and other government databases to reveal new threat patterns. The ATS Land module expands the targeting methodology to include vehicles arriving at land border ports of entry, a mode of transportation without advanced arrival information.

Future targeting system enhancements will focus on increasing data collection from internal and external sources and improving graphical unit interface display capabilities.

PPA: NATIONAL TARGETING CENTER (NTC)

	Perm. Pos.	FTE	Amount
2005 Actual	54	39	\$ 16,100
2006 Enacted	54	54	16,530
2007 Adjustments-to-Base	305
2007 Current Services	54	54	16,835
2007 Program Change	60	30	6,800
2007 Request	114	84	23,635
Total Change 2006-2007	60	30	7,105

CBP requests \$23.6 million for this activity. This is a net increase of \$7.1 million over FY 2006 due to pay and non-pay inflation of \$0.3 million and program increases of \$6.8 million for NTC.

CURRENT SERVICES PROGRAM DESCRIPTION:

The priority mission of CBP's National Targeting Center (NTC) is to provide around-the-clock tactical targeting and analytical research support for CBP antiterrorism efforts.

NTC is primarily staffed by CBP Officers, Border Patrol Agents, and Field Analysis Specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments.

The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the U.S. NTC supports all CBP field elements, including CSI personnel stationed in countries around the world, with additional research assets from passenger and cargo examinations.

Targeting capabilities are also enhanced by participation of other government agency liaisons working alongside experienced CBP Targeters and Analysts.

NTC has integrated all key aspects of CBP targeting programs including CSI, the IAP and the US-VISIT program. In addition to providing targeting support for the expanding IAP and CSI programs, NTC is responsible for the real-time targeting of all international passengers departing from or arriving in the United States, to ensure that subjects of the No-Fly list are not permitted to board these flights. During FY 2006, NTC assumes all high risk international passengers will be screened prior to boarding with the implementation using the Advanced Passenger Information System (APIS).

NTC will continue to provide support to the IAP in FY 2006, when CBP deploys Officers to London and Tokyo. NTC provides real-time research and analysis for CBP IAP officers working with the host country immigration control authority and the air carrier to take appropriate action to prevent high risk individuals from boarding flights to the United States.

CSI is operational in 41 ports in Europe, Asia, Africa and North America and covers over 73 percent of the volume of maritime containers destined to the United States. As CSI expands to other ports in FY 2006, NTC will continue assist and augment targeting resources for CBP Officers detailed overseas and at the NTC for the Container Security Initiative.

PPA: OTHER TECHNOLOGIES

	Perm.		
	Pos.	FTE	Amount
2005 Actual	\$1,000
2006 Enacted	1,008
2007 Adjustments-to-Base	19
2007 Current Services	1,027
2007 Program Change
2007 Request	1,027
Total Change 2006-2007	19

CBP requests \$1 million for this activity. This is an increase of \$19,000 over FY 2006 to cover non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2005, Congress directed CBP to identify, acquire and test container sensors designed to track and monitor agricultural shipments transiting the United States under bond. Through legislative language, Congress provided CBP with \$1,000,000 to support such activities.

Members of Congress were aware that approximately 10 to 15 thousand agricultural shipments transit the United States for non-U.S. delivery each year. It is well recognized that these transshipments present some degree of identified risk to agriculture and livestock industries and to public health if these shipments were diverted and introduced into the United States. Some of the plant pests and animal diseases that could be harbored within these shipments, if established in the United States, could cause billions of dollars of damage per year in losses to domestic and export markets.

To identify viable technology, CBP established operational requirements which include devices capable of tracking and monitoring containers transiting the U. S. under bond, providing tamper status detection and notification, recording U.S. departures, and automating the entry closure processes at the point of U.S. departure.

To satisfy this operational requirement CBP, in cooperation with the Department of Homeland Security’s Science and Technology Directorate (S&T) has begun to identify, acquire, test and – ultimately - certify containerized cargo sensor and tracking technology. Such technology will:

- meet or exceed operational security requirements, e.g., physical security and container sensing technological capability,
- function and operate under laboratory and field conditions,
- have the capacity for field-wide implementation, and
- be compatible with other programs.

CBP, in cooperation with S&T, will continue to identify technologies supportive of the evolution of the container security device and the advanced container security device. The collaborative efforts of CBP and S&T will assure that duplicative efforts are avoided, while bringing into line existing and /or emerging technologies.

PPA: AT THE PORTS TRAINING

	Perm. Pos.	FTE	Amount
2005 Actual	\$23,800
2006 Enacted	24,107
2007 Adjustments-to-Base	457
2007 Current Services	24,564
2007 Program Change
2007 Request	24,564
Total Change 2006-2007	457

CBP requests \$24.6 million for this activity. This is an increase of \$0.5 million over FY 2006 to cover non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

At the Ports Training Programs are responsible for:

- (1) CBP Academy
- (2) OTD/Firearms and Tactical Training Division
- (3) OTD/Leadership Center
- (4) Anti-Terrorism
- (5) Regulatory Auditor Training
- (6) Cross-Occupational Training
- (7) Other Training
- (8) In-Service Training

The Office of Training and Development (OTD), through the National Training Plan (NTP), provides the CBP's national leadership with a comprehensive and accurate assessment of all standard, recurring training, and provides each individual in CBP the opportunity to round out their professional portfolio, while learning more about other offices and employees. The NTP provides CBP's headquarters and field managers an opportunity to advance the goal of "unifying CBP" by bringing the workforce together to train. It also emphasizes CBP's anti-terrorism mission as a strategic imperative, providing a robust menu of anti-terrorism related courses of every level of sophistication and covering a wide range of specialization. The NTP will continue to modernize and streamline the training and development infrastructure and ensure support of pivotal training such as firearms and tactical training, leadership, and advanced training programs. CBP will continue to utilize the NTP to successfully plan and execute training resources to effectively meet the ever expanding and evolving mission.

CBP Academy

The CBP Academy is located at the Federal Law Enforcement Training Center in Glynco, Georgia. The Academy is responsible for the development and delivery of basic-, mid-, and advanced-level training programs for mission critical occupations (e.g., CBP Officers, Agriculture Specialists, Import Specialists, Entry Specialists). This training represents key components of the goal to improve border security, improve inspection and control, facilitate trade, and combat terrorism.

OTD/Firearms and Tactical Training Division

The OTD/Firearms and Tactical Training Division (OTD/FTTD) manages, tracks, and controls all firearms and tactical training for approximately 18,000 armed CBP Officers. The OTD/FTTD ensures appropriate and continuous training in tactical, defensive, and use-of-force procedures for armed officers throughout their CBP career. Two Armories track, distribute, repair, and destroy firearms and body armor. These armories also conduct training and are located in Fort Benning, Georgia and Harpers Ferry, West Virginia.

OTD/Leadership Center

The OTD/Leadership Center, designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. The OTD/Leadership Center provides core leadership/supervisory/management courses to meet organization, occupational, and individual needs.

Anti-Terrorism

OTD will continue to oversee anti-terrorism training programs, ensuring employee preparedness and skill development to confront the threat of terrorist incidents or infiltration along our borders.

Regulatory Auditor Training

The OTD in partnership with the Office of Strategic Trade provides basic-, mid-, and advance-level training for Regulatory Auditors. Basic training includes introduction to government auditing and CBP-specific auditing functions to include automated audit documents, report writing, interviewing techniques, valuation, and focused assessment audits. Intermediate and advanced training includes valuation, drawback, advanced writing skills, and continuing professional education needs. Other training focuses on balancing legitimate trade with security (basic and advanced financial investigations).

Cross-Occupational Training

Provides delivery of courses through local vendors to groups of employees from multiple occupations. Training courses include topics such as creative problem solving, managing multiple priorities, and advanced briefing techniques. Training is coordinated through OTD.

Other Training

OTD/Headquarters sponsors other basic and specialized training programs for various occupations offered CBP-wide. These training programs are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

In-service Training

Funding is provided to each CBP Office for discretionary individual and group training at the local level. Funding is allocated to individual organizations to conduct mandatory or job skills refresher training in areas such as Continuing Professional Education requirements and automation training obtained through various vendors.

PPA: BORDER SECURITY AND CONTROL BETWEEN THE POE'S

	Perm.		
	Pos.	FTE	Amount
2005 Actual	12,255	11,955	\$1,517,720
2006 Enacted	13,573	12,944	1,725,547
2007 Adjustments-to-Base	...	629	133,072
2007 Current Services	13,573	13,573	1,858,619
2007 Program Change	2,006	1,003	385,000
2007 Request	15,579	14,576	2,243,619
Total Change 2006-2007	2,006	1,632	518,072

CBP requests \$2.2 billion for this activity. This is an increase of \$518.1 million over FY 2006 (not including Headquarters and Administration costs) to cover annualization of \$131.2 million, pay and non-pay inflation of \$31.7 million, non-recurrents of \$29.8 million, program increases of \$385 million for additional Border Patrol Agents, and the Arizona Border Control Initiative.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Border Patrol (OBP) is responsible for detecting and interdicting illegal border crossers - including terrorists, illegal aliens, and smugglers - seeking to enter the U.S. between the ports of entry.

In FY 2007, OBP will continue to advance its mission of preventing illegal aliens, smugglers, narcotics and other contraband from entering the United States, as these measures directly impact the safety and security of the United States. To carry out its missions, the Border Patrol has a clear strategic goal: to establish and maintain operational control of the border of the United States.

To achieve the strategic goal, OBP has established a national strategy that consists of five objectives:

- 1) Establish substantial probability of apprehending terrorists attempting to illegally enter between ports of entry.

The Border Patrol has a number of actions it will take to meet this objective. Among these initiatives are enhancements of partnerships with other federal, state, local, and tribal law enforcement agencies. In addition, the Border Patrol will pursue the strategic deployment of monitoring and sensing platforms to increase the ability to detect, respond to, and interdict cross-border incursions. This will ensure that the Border Patrol responds to changes in criminal tactics in a comprehensive fashion, leaving minimal weaknesses to be exploited by terrorists or other criminals. It will also ensure that law enforcement officers can adjust to

changes brought about by increased enforcement in adjoining sectors, ports of entry, or other vulnerable areas.

Continued testing, acquisition, and deployment of technologies and initiatives to identify terrorists and their weapons will be critical. Examples include the Integrated Automated Fingerprint Identification System (IAFIS), and radiation detection and monitoring equipment at Border Patrol checkpoints and other strategic locations. These technologies will be complemented by rapid response teams such as the Border Patrol Tactical Team (BORTAC), the Border Patrol Search, Trauma, and Rescue Team (BORSTAR), Special Response Teams (SRT), and bomb and alien detection canines.

The Border Patrol will increase the use of targeting information from the NTC and other data and intelligence sources to identify potential terrorists. In coordination with CBP's Office of Anti-Terrorism, the Border Patrol will also increase participation in Joint Terrorism Task Force units where operationally feasible. In addition, the Border Patrol will rely on CBP's overseas assets in key locations, such as Canada and Mexico City, for information and operational support.

2) Deter illegal entries through improved enforcement

Past success has demonstrated that effective deployment of the proper mix of assets increases the "certainty of apprehension" of those intending to illegally cross our borders. Certainty of apprehension, along with a vigorous prosecution strategy for recidivists and smugglers, has established a deterrent effect in targeted locations. This strategic approach to border control has set the foundation for establishing focused operational control for other areas along our Nation's borders, especially in high-traffic/high-threat areas where illegal border-crossing and smuggling is prevalent.

CBP must continue similar strategies to gain, maintain, and expand operational control to other priority corridors. These priority areas will be defined by threat analysis to guide resource deployment and decision-making. Maintaining and expanding a strong enforcement posture along U.S. borders, including sufficient flexibility to address dynamic enforcement challenges, is critical to bringing operational control to our borders. Coordination with the OFO and potential impact on ports of entry will be included in planning and analysis, as will partnership with the Offices of Anti-Terrorism and Intelligence.

3) Detect, apprehend, and deter smugglers of humans, drugs, and other contraband.

The Border Patrol also maintains its traditional mission of preventing the entry and smuggling of illegal aliens, narcotics, and other contraband from entering the United States between official ports of entry. Drug and alien smuggling has become an increasingly sophisticated and complex criminal enterprise. The

Border Patrol will continue to deploy its resources in order to meet geographic and threat requirements to detect, interdict, and respond to alien smugglers, smugglers of illicit narcotics, and other contraband. The ability to collect, share, and process intelligence, data, and other information will be important to the detection, identification, and prosecution of criminal aliens, smugglers, and their networks. The Border Patrol and the Office of Information Technology must continue to test, acquire, and deploy technology to assist agents to detect and identify alien smugglers, criminals, and narcotics traffickers. Further partnership with the National Targeting Center, the development and use of tactical and strategic intelligence, and the expansion of IAFIS is also important to this objective.

The Border Patrol, in coordination with US ICE, will continue to expand its ability to target cross-border smuggling operations, consistent with agreed upon roles and responsibilities. The Border Patrol's continued participation and expansion in task force operations will also be a component of achieving this objective when operationally feasible and necessary.

- 4) Leverage "Smart Border" technology to multiply the effect of enforcement personnel.

The Border Patrol currently uses a mix of agents, information, and technology to control the border. The Border Patrol's ability to establish situational awareness, monitor, detect, respond to, and identify potential terrorists, instruments of terrorism, and criminals relies heavily on interdiction and deterrence-based technology. Having the necessary technology to support the Border Patrol priority and traditional missions cannot be overstated. In the future, there must be continued assessment, development, and deployment of the appropriate mix of personnel, technology, and information to gain, maintain, and expand coverage of the border and ensure that resources are deployed in a cost-effective, efficient fashion.

Technology which enhances operational awareness and effectiveness includes camera systems for day/night/infrared work, biometric systems such as IDENT/IAFIS, processing systems like Enforcement Case Tracking System (ENFORCE), sensoring platforms, large-scale gamma X-rays, and aerial platforms, and other systems. Technologies requiring modernization include wireless and tactical communications and computer processing capabilities.

Coordination between Border Patrol and inspectional personnel at the ports of entry ensures the most efficient use of trained personnel and technology. In the future, the Border Patrol will take advantage of the targeting and selectivity tools made available in the ACE and the NTC. The continued testing, evaluation, acquisition, and deployment of appropriate border enforcement technologies will be pursued vigorously so that the maximum force-multiplier effect is achieved in support of both the priority and traditional missions.

- 5) Reduce crime in border communities and consequently improve quality life and economic vitality of targeted areas.

Past successes in border enforcement operations such as Operation Gatekeeper and the Arizona Border Control Initiative have demonstrated that a border under operational control directly correlates to reduced crime associated as high levels of illegal border incursions significantly impact border communities. The overall quality of life of border residents, economic expansion, and environmental protection significantly improves in areas where the Border Patrol's Strategy has been successfully implemented. The Border Patrol will continue to deploy resources and conduct public outreach in areas deemed high-threat or high-priority to improve the overall quality of life, reduce social service costs, and decrease crime in border areas.

By maintaining an active presence in border communities, Border Patrol agents provide a deterrent to active smuggling, partner with local residents to identify illegal activity, and support cooperative local law enforcement efforts in both urban and remote areas of the country. The Border Patrol will also continue to expand and strengthen its current Border Safety Initiative to enhance the safety of migrants and border residents.

An effective border enforcement strategy requires a mixture of personnel and resources, as well as a wide variety of enforcement activities to be effective. The required resources (personnel, aircraft, technology, special initiatives, and tactical infrastructure) of a border enforcement system must be deployed in a balanced manner to complement the proactive national strategy. The OBP will continue in FY 2007 to utilize a variety of programs and initiatives to support strategic objectives.

PPA: BORDER TECHNOLOGY

	Perm. Pos.	FTE	Amount
2005 Actual	\$84,667
2006 Enacted	30,971
2007 Adjustments-to-Base	588
2007 Current Services	31,559
2007 Program Change	100,000
2007 Request	131,559
Total Change 2006-2007	100,588

CBP requests \$131.6 million for this activity. This is an increase of \$100.6 million over FY 2006 to cover non-pay inflation and a program increase of \$100 million for improved technology.

CURRENT SERVICES PROGRAM DESCRIPTION:

To carry out its mission and use the best technology available, CBP established a border technology program. Border technology supports the Border Patrol both tactically and strategically. At the tactical level, on-scene agents are provided with near real-time information on attempted border crossings by illegal aliens, terrorists, or smugglers. The installation of surveillance and sensory systems enables monitoring of targets expanses of the border. Strategically, knowledge of this capability will likely deter illegal aliens and smugglers from attempting to cross the border as they realize the increased potential for apprehension.

In FY 2007, new technology will be deployed based on prioritized threats and integrated with command, control, and situational awareness elements between the ports of entry. CBP will also evaluate and incorporate technology to support the maritime mission as it develops.

PPA: BETWEEN THE PORTS TRAINING

	Perm. Pos.	FTE	Amount
2005 Actual	\$21,700
2006 Enacted	21,981
2007 Adjustments-to-Base	416
2007 Current Services	22,397
2007 Program Change	23,291
2007 Request	45,688
Total Change 2006-2007	23,707

CBP requests \$45.7 million for this activity. This is an increase of \$23.7 million over FY 2006 to cover non-pay inflation and a program increase of \$23.3 million for Border Patrol Training.

CURRENT SERVICES PROGRAM DESCRIPTION:

Between the Ports Training Programs are responsible for:

- (1) Border Patrol Academy
- (2) OTD/Firearms and Tactical Training Division
- (3) OTD/Leadership Center
- (4) Anti-Terrorism
- (5) Border Patrol Agent Training
- (6) Cross-Occupational Training
- (7) Other Training
- (8) In-Service Training

The Office of Training and Development (OTD), through the National Training Plan (NTP), provides the CBP's national leadership with a comprehensive and accurate assessment of all standard, recurring training, and provides each individual in CBP the opportunity to round out their professional portfolio, while learning more about other offices and employees. NTP provides CBP's headquarters and field managers an opportunity to advance the goal of "unifying CBP" by bringing the workforce together to train. The NTP emphasizes CBP's anti-terrorism mission as a strategic imperative, providing a robust menu of anti-terrorism related courses of every level of sophistication and covering a wide range of specialization. The NTP will continue to modernize and streamline the training and development infrastructure and ensure support of pivotal training such as firearms and tactical training, leadership, and advanced training programs. CBP will continue to utilize the NTP to successfully plan and execute training resources to effectively meet the ever expanding and evolving mission.

Border Patrol Academy

The U.S. Border Patrol Academy identifies and provides core operational training for Border Patrol Agents to accomplish their mission of protecting the boundaries of the United States. The Border Patrol Academy is currently located in Artesia, New Mexico. Basic training for Border Patrol Agents is provided at Artesia. Advanced-level training and instructor training is held at Artesia and field delivered.

OTD/Firearms and Tactical Training Division

The OTD/Firearms and Tactical Training Division (OTD/FTTD) manages, tracks, and controls all firearms and tactical training for approximately 18,000 armed CBP Officers. The OTD/FTTD ensures appropriate and continuous training in tactical, defensive, and use-of-force procedures for armed officers throughout their CBP career. Two armories track, distribute, repair, and dispose of firearms and body armor. These armories also conduct training and are located in Fort Benning, Georgia and Harpers Ferry, West Virginia.

OTD/Leadership Center

The OTD/Leadership Center, designs, develops, delivers, and evaluates training and development activities for CBP supervisors, managers, and executives. The

OTD/Leadership Center provides core leadership/supervisory/management courses to meet organization, occupational, and individual needs.

Anti-Terrorism

The fight against terrorism remains the top priority for CBP. In support of that primary mission, the OTD will continue to oversee the anti-terrorism training program throughout FY 2005, ensuring employee preparedness and skill development to confront the threat of terrorist incidents or infiltration along our borders.

Border Patrol Agent Training

Border Patrol Agent Training is a new NTP component for FY 2005. Training courses focus on technical, intelligence, or specialized training for Border Patrol Agents. Training courses include Office of Border Patrol Technical Course for Supervisors, Border Patrol Agent In Charge (PAIC) Intel Course, Emergency Medical Technician Certification, Border Patrol Search, Trauma and Rescue (BORSTAR), and Snowmobile Instructor Training.

Cross-Occupational Training

Provides delivery of courses through local vendors to groups of employees from multiple occupations. Training courses include topics such as creative problem solving, managing multiple priorities, and advanced briefing techniques. Training is coordinated through OTD.

Other Training

OTD/Headquarters sponsors other basic and specialized training programs for various occupations offered CBP-wide. These training programs are funded through the NTP but are often coordinated with other NTP Training Leads, CBP organizations, and program managers for scheduling, facilities, instructors, etc.

In-service Training

Funding is provided to each CBP Office for discretionary individual and group training at the local level. Funding is allocated to individual organizations to conduct mandatory or job skills refresher training in areas such as Continuing Professional Education requirements and automation training obtained through various vendors.

PPA: AIR AND MARINE OPERATIONS - SALARIES

	Perm. Pos.	FTE	Amount
2005 Actual	1,010	1,010	\$131,436
2006 Enacted	1,220	1,220	\$161,924
2007 Adjustments-to-Base	(2,048)
2007 Current Services	1,220	1,220	\$159,876
2007 Program Change
2007 Request	1,220	1,220	\$159,876
Total Change 2006-2007	(2,048)

CBP requests \$159.9 million for this activity. This is a net decrease of \$2 million from FY 2006, due primarily to the \$5 million transfer from National Capitol Region to the U.S. Coast Guard and pay adjustments and non-pay inflation of \$3 million.

CURRENT SERVICES PROGRAM DESCRIPTION:

CBP Air secures the borders against terrorists, acts of terrorism, drug smuggling and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers.

CBP Air utilizes the "system of systems" approach to tie various informational and operational elements together in a law enforcement environment. This established and proven model maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP Air partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders, source, transit and arrival zone operations, interior law enforcement support and support to other agencies. In fulfilling the priority mission of CBP to protect the borders, CBP Air's geographical mission has a strong focus along the southern border, with a recent expansion of coverage on the northern border.

The CBP Air Salaries and Expenses (S&E) appropriation covers Personnel Compensation and Benefits. If funds are available, this appropriation also covers expenses such as PCS moves, ammunition, firearms, administrative training and travel, school tuition for dependents of employees in foreign countries.

IV. Program Justification of Changes

**Department of Homeland Security
U.S. Customs and Border Protection
Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: National Targeting Center

Strategic Goal(s) & Objective(s): 2.3 – Provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities.

PPA: National Targeting Center

Program Increase: Positions 60 FTE 30 Dollars \$6,800

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							54	54	16,835
Program Increase							60	30	6,800
Total Request	39	39	16,100	54	54	16,530	104	84	23,635

Description of Item

Funding in the amount of \$6.8 million is requested for positions and resources to support the physical expansion of the National Targeting Center (NTC) from one site to two sites in support of international passenger and cargo targeting operations and responsibility.

The NTC responds to high-risk cargo, conveyances, passengers and baggage entering or departing the U.S. in support of the CBP anti-terrorism mission. NTC staff strives to detect, deter and mitigate potential terrorism 24x7 by analyzing, researching and coordinating CBP anti-terrorism operations in all international modes of transportation, at and between each port of entry. The NTC is a key centralized communication point that facilitates field reporting and fosters interagency information exchange.

The greatest resource of the NTC is its professional staff. As the NTC staff gain experience in using intelligence reporting and automated analytical techniques and in leveraging other agency and international government targeting efforts, it is evident that to remain at peak performance substantial training and development is required for the current officers to properly employ actionable intelligence, develop internal information, and utilize automated information management tools to improve targeting. Additionally, the NTC collaboratively interacts with all CBP anti-terrorism border security initiatives, which requires the staff to remain cognizant of each. The budget funds requested are to

support the original and expanded NTC facilities, including personnel staffing, training, and general operating expenses related to staffing the NTC, as well as the anti-terrorism targeting, research and field support operations.

Justification

Increased resources are to support the original and expanded NTC facilities, including personnel staffing, training, and general operating expenses related to staffing the NTC, as well as the anti-terrorism targeting, research and field support operations. The FY 2006 level for the current NTC facility is \$16.7 million, including 82 FTE.

Current space is inadequate for the needs of the NTC's mission to conduct timely research and targeting, in addition to the importance of maintaining liaisons with other agencies involved in the nation's anti-terrorism. A large portion of the existing building is being converted into a secure facility. A major impact of this conversion will be to exclude officers without appropriate security clearances from moving freely in the building. Liaisons from foreign government agencies will not be permitted to locate in the building. As a result, National Targeting & Security (NTS) recognized the need for an additional NTC facility and has taken steps to expand the facility to its targeting operations. The expanded NTC facility will host all cargo operations currently located at the original NTC location. This includes personnel supporting all cargo targeting rule development, Laboratory and Scientific Services (LSS), CSI, Food and Drug Administration (FDA), foreign nationals, Animal and Plant Health Inspection Service (APHIS) and Food Safety and Inspection Service (FSIS). U.S. Coast Guard, Department of Energy (DOE), and other groups requiring access to both sights to support passenger, crew, cargo and vessel targeting will have dedicated hot-desk locations to support their needs. Additionally, audio and visual communications will be expanded to support both facilities and provide seamless telephonic service to CBP field officers. To adequately staff both facilities, CBP needs a total of 112 FTE. The request will fill the gap between current and necessary staffing.

Impact on Performance (Relationship of Increase to Strategic Goals)

The increase in NTC staffing will enable the NTC to continue its progressive standards of excellence in pursuit of supporting DHS's mission. The NTC directly promotes the detection and deterrence of anti-terrorism threats to the homeland while balancing efforts to improve the facilitation of legitimate travel and trade.

Ideally, as DHS matures in its systematic integration of program and process development to protect the homeland, the implementation will require highly skilled professional personnel to coordinate efforts and facilitate those programs within CBP. The NTC is an excellent representation of CBP working with other DHS subcomponents and integrating other Department's resources. As an example, the NTC hosts liaisons with ICE, U.S. Coast Guard, Transportation Security Administration (TSA), FDA, USDA, and Department of Justice (DOJ). The integrated working environment optimizes rapid coordination and response to tactical, minute-by-minute operations for all represented DHS subcomponents involved in passenger and cargo anti-terrorism interdiction opportunities. Due to the NTC multi-agency collaboration it maximizes

support for the DHS strategic missions of awareness and prevention. However, only by stationing skilled and professional staff at the NTC will it continue to optimize the use of CBP and other agency liaison resources to detect, deter and mitigate threats to our homeland.

CBP's NTC is a subprogram of Border Security Inspections and Trade Facilitation at Ports of Entry program, which went through the Performance and Rating Tool (PART) evaluation in preparation for the FY 2007 Budget Cycle. As a result of PART, CBP developed new performance and efficiency measures, including one that highlights the cost/time savings that result from the centralized operations at the NTC. Since the NTC was established to facilitate field operations and coordinate communications with other DHS subcomponents and other Department agencies, it improves the response time efficiency and eliminates the need for other agency liaisons at each of the ports of entry.

The PART measures estimate that in 2007 operating efficiencies and economies of scale will result from the centralizing of operations at the NTC. This centralization will have secondary benefits for ports of entry by allowing them to focus more on continuous inspection operations while the NTC performs the necessary extended research and coordination. The secondary benefits will be a contributing factor in the -PART Measures for improved facilitation of legitimate travel and trade.

Program Increase 2: WMD Technology Staffing

Strategic Goal(s) & Objective(s): 2.3 – Provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities

PPA: Non-Intrusive Inspection Technology

Program Increase: Positions 106 FTE 53 Dollars \$12,000

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							71	71	82,317
Program Increase							106	53	12,000
Total Request	71	71	145,189	71	71	62,394	177	124	94,317

Description of Item

The program increase of \$12.0 million and 106 positions will enhance CBP's ability to detect illicit radiological materials concealed within shipments, conveyances or containerized cargo entering the United States. The additional staff will support the deployment of WMD detection systems deployed through S&T's WMD procurement program. The new positions will ensure CBP will have dedicated personnel to resolve alarms from Radiation Portal Monitors (RPMs) and to conduct radiological examinations at our Nation's busiest seaports. Funding of \$178.0 million within the Domestic Nuclear Detection Office (DNDO) of the S&T Directorate will ensure that a total of 621 RPMs will be deployed by FY 2007 to 94 terminals within the 22 largest domestic seaports.

Justification

Beginning in FY 2006, procurement and deployment of WMD detection technology systems are being funded by DNDO. The deployment and use of RPMs across the country requires that CBP have the staffing needed to use the equipment for increasing levels of inspection. The request proposes 106 CBP Officer positions tied to weapons of mass destruction (WMD) technology. This staff will ensure enough dedicated CBP personnel to conduct sufficient levels of WMD inspections at our Nation's seaports of entry. The requested personnel will be deployed to our 22 biggest seaports of entry. These top 22 seaports handle approximately 98 percent of the sea containers arriving in the United States. Preventing terrorists and cargo with radiological weapons of mass destruction from entering the United States is a core CBP mission.

Impact on Performance (Relationship of Increase to Strategic Goals)

In support of the DHS strategic goal to secure our borders against terrorists and means of terrorism, CBP has set goals to screen all cargo and conveyances for radiological materials with radiation portal monitors (RPM's)/radiation detection technology, per CBP's RPM Project Execution Plan. CBP's current baseline for screening of truck and sea containers for illicit radiological materials with radiation portal monitors is approximately 61 percent. In order to achieve CBP's goal of screening all shipments and conveyances for illicit radiological materials with radiation portal monitors, per CBP's RPM Project Execution Plan by the end of FY 2009, adequate funding must be received until full planned deployment of the equipment is achieved. Non-Intrusive Inspection equipment has become a critical tool for CBP to fulfill its mission of protecting our borders from WMDs, radiological materials and contraband. The initiative dramatically enhances the ability of CBP to inspect cargo and conveyances for components of weapons of mass destruction and other articles and instruments used in support of terrorist activities while facilitating legitimate commercial traffic through the Nation's ports of entry. Failure to obtain adequate funding to achieve full planned deployment will result in a reduction in CBP's ability to identify and interdict potential WMDs, possible WMD components and contraband from entering the United States through the ports of entry.

CBP - 40

Program Increase 3: Immigration Advisory Program/ Fraudulent Document Analysis Unit

Strategic Goal(s) & Objective(s): 2.3 – Provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities.

PPA: Inspections, Trade & Travel Facilitation at POE's

Program Increase: Positions 42 FTE 21 Dollars \$6,000

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							---	---	4,000
Program Increase							42	21	6,000
Total Request	---	---	2,000	---	---	4,000	42	21	10,000

Description of Item

Immigration Advisory Program (IAP):

An additional funding of \$4.8 million will allow CBP to fund continued deployment of officers in the Netherlands, Poland and at the NTC at planned deployments to the UK, Japan, and up to three additional locations. The request includes \$3.4 million to hire an additional 30 CBP officers for this expansion. Currently, CBP has deployed a total of eight overseas Officers between Poland and the Netherlands, four in each location and three at NTC in support of IAP. The remaining \$1.4 million will be used to cover operational costs.

Fraudulent Document Analysis Unit (FDAU):

Additional funding of \$1.2 million will allow CBP to hire additional CBP officers and trade specialists requested to track documents, perform analysis, and carry out targeting functions based on document interceptions. The request seeks \$1.0 million for 12 CBP positions. CBP currently has a total of two permanent CBP officers performing this activity. The remaining \$0.2 million will be used to cover operational costs.

Justification

Immigration Advisory Program (IAP):

IAP will improve border security against the threat of terrorism by enabling CBP to identify and intercept suspected terrorists and undocumented passengers before boarding aircraft bound for the U.S. from these locations. The implementation of the IAP Program at the port of departure is the natural next step in expanding the existing international programs designed to segregate high-risk passengers. IAP further accomplishes CBP's efforts in extending our zone of security beyond our physical borders, which will improve border security against terrorist threats without stifling the flow of legitimate travel.

IAP will also save CBP's costs associated with processing, detaining, and removing inadmissible and inadequately documented aliens by interdicting those aliens before they board a U.S. bound aircraft. In addition, airlines will benefit by a reduction in fines as the result of increased carrier training and having a CBP officer on-site to review passenger documentation.

The requested amount will fund continued deployments of officers in the Netherlands, Poland and at NTC and the anticipated deployments to the UK, Japan, and up to three additional locations.

Fraudulent Document Analysis Unit (FDAU):

CBP created the FDAU in January 2005 to collect these documents and to provide the ports with analysis of document trends, intelligence information, and to target persons being smuggled into the U.S. using fraudulent documents. By the end of December 2005, the FDAU received 40,875 fraudulent documents confiscated at ports of entry and mail facilities. These documents can be tracked directly to the officer that seized the document at the port of entry. Helped by information provided by the FDAU, CBP anticipates taking 50,000 fraudulent documents out of circulation in FY 2007, and increasing the number by 5 percent in the years afterwards.

As part of a pilot operation, FDAU assigned one person for individual targeting. The results were very positive. From March until June of FY 2005, the FDAU apprehended 51 individuals using fraudulent documents. With the budget request, FDAU projects a 20 percent increase in the individuals apprehended per quarter.

The FDAU will distribute to the ports and the intelligence community 12 publications per year on document trends, interceptions, and intelligence derived from intercepted documents.

Impact on Performance (Relationship of Increase to Strategic Goals)

Immigration Advisory Program (IAP):

The increase of funding will allow IAP to expand to additional foreign locations enabling CBP to identify and intercept high-risk and improperly documented passengers prior to boarding flights bound for the United States. Prescreening travelers and travel documents at these expanded locations, will increase CBP's efforts and decrease these occurrences. The decline of improperly documented/high-risk travelers will reduce the U.S. Government's processing and the removal costs and the fines/penalties levied on air carriers.

IAP will play a major role in impacting the overall commercial air industry security by preventing high-risk passengers from boarding aircrafts. IAP also helps avoid, to the extent possible, situations where entire flights are delayed, cancelled, returned or diverted due to concerns about individual passengers.

In removing fraudulent documents from circulation, the FDAU prevents them from falling into the hands of individuals who pose threats to U.S. security. Intelligence derived from the seized documents allows us to perform advance targeting, which helps to prevent inadmissible persons from attempting entry into the U.S. The information that the FDAU develops assists other offices to evaluate travel programs, such as the Visa Waiver Program, and focuses on vulnerabilities in travel documents.

Program Increase 4: Headquarters Management and Administration/ Internal Controls Audit/Procurement Staffing

Strategic Goal(s) & Objective(s): 7.3 – Continually improve our way of doing business
 PPA: Headquarters Management and Administration at the POE

Program Increase: Positions 60 FTE 30 Dollars \$4,000

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	---	---	---	---	---	---	---	---	---
Program Increase	---	---	---	---	---	---	60	30	4,000
Total Request	---	---	---	---	---	---	60	30	4,000

Description of Item

Additional funding of \$4.0 million is requested for Headquarters Management and Administration. Of these funds, \$1.0 million will be used for internal control reporting, and \$3.0 million to expand procurement capacity.

Justification

An increase of \$1.0 million is requested as CBP's share of the cost for compliance with Public Law 108-330, *The Department of Homeland Security Financial Accountability Act*. The Act requires that the annual Performance and Accountability Report (PAR) include an assertion by the Secretary on the adequacy of internal controls that apply to financial reporting. In addition, the Act requires the Secretary to include an audit opinion over the Department's internal controls over financial reporting.

Requirements for internal control reporting and audit impose significant management challenges and resource demands on the Department and its components. To comply with the Act the Department's components must obtain contractor support to:

- provide training,
- develop internal control process analysis documentation,
- perform internal control test of design and test of operating effectiveness,

- develop significant remediation strategies for material weaknesses in internal control, and
- provide project management support for the Department’s Internal Control Committee.

With respect to procurement, the request seeks an additional 60 positions to increase CBP’s capacity to effectively procure goods and services. This request is in direct response to recent GAO analysis which found procurement shortcomings in several components of the Department, including CBP.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding will improve CBP’s internal control/audit function and improve the procurement process.

Program Increase 5: Arizona Border Control Initiative

Strategic Goal(s) & Objective(s): 2.1 – Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws.

PPA: Border Security and Control Between the POEs

Program Increase: Positions 0 FTE 0 Dollars \$8,500

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	---	---	---	---	---	---	---	---	1,000
Program Increase	---	---	---	---	---	1,000	---	---	8,500
Total Request	---	---	---	---	---	1,000	---	---	9,500

Description of Item

Additional funding in the amount of \$8.5 million dollars is requested for travel, lodging and overtime of 110 Border Patrol Agents to Tucson, Arizona; Yuma, Arizona; and flanking Sectors. These agents will be detailed to these areas to enhance enforcement operations being conducted under Arizona Border Control Initiative (ABCI).

Justification

Detailed agents will be assigned to camp details to raise manpower levels. The campsites are positioned within the desolate/high traffic areas for illegal alien crossings. These campsites are manned 24 hours a day, 7 days a week thereby creating enforcement presences in areas that would otherwise not be patrolled other than periodically.

Deployment of the detailed personnel will occur during the high traffic time period of the year, which is also historically the most dangerous time of the year for illegal aliens traveling through these areas due to high seasonal temperatures.

Sixty of the 110 detailed personnel will be special operations personnel. These personnel are trained to handle medical emergency situations, which will occur during the identified detail time period. These agents will perform search and rescue operations and administer medical assistance to those illegal aliens who fall into distress.

Additional detailed personnel will be deployed to transportation hubs within other sectors. These transportation hubs have been identified as being utilized by smugglers who operate in Arizona. These smugglers use the Arizona/Sonoran Border as an entry point into the United States and then, utilizing the routes of egress within Arizona, transport undocumented aliens to these hubs. Undocumented aliens are then transported from these hubs to various states within the United States.

The additional personnel will be utilized as a force multiplier to the manpower permanently assigned to Arizona and will be deployed to high traffic areas in Arizona and transportation hubs outside of Arizona to confront illicit cross border traffic utilizing the Arizona/Sonora Border to effect entry into the United States.

Although significant gains were made in the first two years of the ABCI effort, illegal cross-border traffic and smuggling organizations continue to operate along the Arizona/Sonora border. A significant permanent shift of illegal cross border traffic out of Arizona has not been identified. These Arizona criminal organizations use available Mexican and U.S. infrastructure (routes of egress, staging areas, and transportation hubs), such as Hermosillo, Sonora, Mexico, and Phoenix and Tucson, Arizona. This illegal cross border traffic negatively impacts the communities along the southern Arizona border and creates a chaotic environment. Social services, crime rates, migrant desert exposure deaths, smuggler-induced migrant deaths and availability of law enforcement are all negatively impacted by illegal cross border traffic in Arizona.

Within this chaotic environment the potential exists for terrorist to exploit the clutter produced by high levels of illicit border traffic. Terrorists could blend in with this clutter to effect entry into the United States. A sustained commitment of resources for ABCI is necessary to effect operational control of the Arizona Border. This measure directly impacts the safety and security of the United States.

Impact on Performance (Relationship of Increase to Strategic Goals)

Strategically placing additional personnel, camp details, infrastructure and technologies in high traffic areas raise the effectiveness of law enforcement operations. This creates a deterrent effect as the result of smuggling organizations inability to operate effectively in these areas. Smuggling organizations will not be willing to absorb the monetary loss to their operations and will cease to conduct operations in the area. The deployment of the additional personnel will lead to bringing the Arizona border to a controlled status.

The ABCI set out to accomplish the following operational goals:

- Achieve operational control of the Arizona Border in support of the primary mission of anti-terrorism, detection, arrest, and deterrence of all cross-border illicit trafficking.
- Significantly impair the ability of the smuggling organizations to operate.
- Decrease the rate of violent crime and reduce the need for social services in southern Arizona.

The \$8.5 million dollars requested for fiscal year 2007 will allow for the deployment of 110 agents which will further decrease the illicit cross border traffic, mitigate desert deaths and bring the Arizona Border to a control status. FY 2007 ABCI activities will be conducted based on the lessons learned for FY 2004 and FY 2005, and threat assessment based on the latest intelligence.

Program Increase 6: Increased Border Patrol Presence between POEs

Strategic Goal(s) & Objective(s): 2.1 – Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws.

PPA: Security and Control between Ports of Entry

Program Increase: Positions 2006 FTE 1003 Dollars \$399.8

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request

Program Increase							2,006	1,003	399,791
Total Request	12,255	11,955	1,671,387	13,573	12,944	1,778,499	15,789	14,786	2,420,866

*Funding in FY 2005 was provided by Congress as part of the Emergency Supplemental P.L. 109-13.

Description of Item

Additional funding in the amount of \$399.8 million is requested to hire, train, and equip 1,500 Border Patrol Agents and 506 operational/mission support personnel. The request will provide for upgrades of information technology system infrastructure in the Border Patrol sectors, cover required relocation expenses, and expand Border Patrol training operations. CBP is seeking an additional \$59.1 million in Construction Appropriations for new or expanded facilities to accommodate significant increases in Border Patrol Agents and support staff.

Justification

Agents & Support (\$316.8 million). To secure our borders, CBP recommends that Border Patrol Agent levels should continue to increase. As a result of the FY 2005 Emergency Supplemental and the FY 2006 Appropriations Act, CBP's Border Patrol will realize an increase of 1,500 agents by the end of FY 2006. This will put the total on-duty number of agents at approximately 12,300. An additional 1,500 agents in FY 2007 will allow CBP to make significant strides toward achieving operational control of the border. In addition, 506 new Border Patrol support personnel will allow agents, who are currently performing non-enforcement functions, to return to traditional enforcement activities.

Information Technology (\$47.3 million). A significant increase in agent staffing requires sector information technology system upgrades in support of the new agents.

Relocation (\$12.4 million). On average, CBP requires one supervisory position for every seven Border Patrol Agents. Additional funds will be required to cover relocation expenses since experienced supervisors may need to be moved from other locations.

Training (\$23.3 million). Resources are required to expand the training capacity of the CBP Border Patrol Training Academy in Artesia, New Mexico to accommodate the increased number of Agents. This funding is needed to equip the CBP Border Patrol Academy with sufficient infrastructure, technology, and instructors. Of the funds requested, CBP plans to reimburse FLETC \$4.7 million to cover additional costs associated with large increase in the number of trainees.

Impact on Performance (Relationship of Increase to Strategic Goals)

Anomalies within an area must be independently addressed and then integrated into the coordinated structure for the sector to ensure the unique enforcement needs of the sector are met. General characteristics of operational areas make some locations attractive as illegal border crossings. CBP can identify these characteristics and determine the likelihood that an area will be exploited to determine the appropriate level of resources required to secure the area. In addition, the higher the resolve of the people seeking to enter the U.S. illegally, the more agents needed to thwart their actions. As a result, the proper balance of personnel, technology, infrastructure, and rapid response capabilities must be tailored to the distinctive environments that exist in the sectors.

Ensuring a sufficiently mobile workforce, as well as testing, acquisition and deployment of sensing and monitoring platforms will be crucial to efficiently gain and maintain operational control of the borders. Operational control is defined in the National Border Patrol Strategy as the ability to detect, respond, and interdict border penetrations in areas deemed as high priority for threat potential or other national security objectives. Operational control may be limited to specific smuggling corridors or other geographically defined locations. All Border Patrol efforts are focused on this goal. Operational control is achieved when the proper combination of resources is deployed to ensure that illegal intrusions are deterred, detected and interdicted.

Prioritized deployment and development of the appropriate mix of workforce, technology, and infrastructure will ensure resources are used. Because the components are inter-dependent, every component is critical to the strategy's success. A system with the technological ability to predict, detect, identify, and survey illegal entries and criminal activity, but without the human capability for a rapid response or interdiction, cannot complete the enforcement mission. Conversely, enforcement personnel with inadequate intelligence, poor technological infrastructure to provide situational awareness, transportation, or equipment necessary to conduct enforcement activity are much less likely to be effective in today's dynamic border enforcement environment.

Program Increase 7: Secure Border Initiative Technology

Strategic Goal(s) & Objective(s): 2.3 – Provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities.

PPA: Secure Border Initiative Technology

Program Increase: Positions 0 FTE 0 Dollars \$100,000

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							---	---	31,559
Program Increase							---	---	100,000
Total Request	---	---	84,667	---	---	30,971	---	---	131,559

Description of Item

Funding in the amount of \$100.0 million is requested in support of border technology deployment. Resources will be used for additional surveillance and detection technology between the ports of entry. This proposal also includes funding for tactical communications to support Agent operations where technology is deployed.

Justification

Today, vast areas of our border are unmonitored severely complicating CBP's effort to secure our border for anti-terrorism, illegal immigration counter-drug and other law enforcement purposes. Without electronic monitoring of our borders using advanced technology we cannot detect illegal border crossings and we cannot secure our borders.

DHS will provide an integrated technology, process, and systems framework to support operations at the borders and provide full situational awareness along our borders, between the ports of entry. The system will be designed to identify illegal border crossings so they can be effectively interdicted. It will provide the necessary situational awareness that comes from not only capturing and viewing surveillance data, but also

comprehensively analyzing that data with the appropriate targeting tools, modeling it and sharing it with those that need it, at the front lines and with necessary partners. With its ability to facilitate communications and information sharing, this system will help CBP build key bridges and connections with other interested agencies at the federal, state, local and tribal level.

DHS, through the SBI coordination office, will secure a technology integrator during FY 2006. The integrator will be charged with reviewing operational requirements in the variety of environments in which we operate, and identifying the type of technology that will give us the detection and identification/ classification solution. The \$100.0 million required for FY 2007 will be applied to the following activities and milestones:

- Determine and deploy transformational technology to secure our nation's border.
- Initiate complete first Pilot project in Tucson Sector that will provide full detection capability, situational awareness, and support tactical and strategic decision making processes.
- Deploy mobile technology to bring operational capability up to "Monitored" in Tucson and El Paso Sectors. "Monitored" Capability is defined as high probability of detection, however, accessibility and apprehension are below optimal effectiveness based on validated baseline activity levels.
- Continue development and begin deployment of Common Operational Picture to provide situational awareness for tactical operations. Provide this capability to Agents in the field to reduce response time and provide situational awareness.
- Initiate deployment plans for all fixed technology (i.e., non-mobile assets) in Tucson, El Paso, and Yuma Sectors.
- Begin communication backbone upgrade to support high-speed data, voice, and video in Tucson Sector.
- Provide the capability to share detection capability within all DHS organizations.

Impact on Performance (Relationship of Increase to Strategic Goals)

Information collected and analyzed by technology will vastly improve the strategic placement of personnel and tactical infrastructure, which, combined with a clearly defined risk management approach, will enable CBP to quickly assess and effectively address threats facing the border. CBP's goal is to achieve operational control of the border, and the ability to link technology, information, and process improvements together will provide us the key means to do this swiftly and measurably.

Technology will identify all illegal borer crossings, using advanced technologies, so they can be interdicted:

- Prevent or thwart terrorists' activities before they can be carried out.
- Minimize the impact of terrorist activities by preventing them from being fully carried out.

- Assist in the response of terrorist attacks and all other hazards by providing surveillance and improved detection technology between ports of entry.
- Provide more effective use of agent resources through increased use of detection technology and improved communications.
- Pose a physical deterrence to potential terrorists and other aliens of criminal intent to protect Federal Government operations.

Technology will assist in strengthening national security at the borders and will provide the capability for on-scene agents to receive and respond to real-time intelligence information to:

- Prevent the incidences of intrusion by illegal alien, smugglers, and drug traffickers and their contraband across the U.S. borders with the assistance of technology.
- Improve agent and alien safety.
- Provide the ability for local Border Patrol Sectors to perform trend analyses.
- Provide more effective use of agent resources.
- Provide deterrence of illegal immigration between Ports of Entry by increasing the CBP's capability to detect and apprehend unlawful intruders.
- Reduce false and nuisance alarms, and
- Pose as a physical deterrence to potential contraband traffickers.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

Department of Homeland Security
U.S. Customs & Border Protection
Justification of Proposed Changes in Salaries and Expenses
Appropriation Language

For necessary expenses for enforcement of laws relating to border security, immigration, customs, and agricultural inspections and regulatory activities related to plant and animal imports; [acquisition, lease, maintenance and operation of aircraft;] purchase and lease of up to 4,500 ([3,935] 3,500 for replacement only) police-type vehicles; and contracting with individuals for personal services abroad; [\$4,826,323,000] \$5,519,022,000; of which \$3,000,000 shall be derived from the Harbor Maintenance Trust Fund for administrative expenses related to the collection of the Harbor Maintenance Fee pursuant to section 9505(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 9505(c)(3)) and notwithstanding section 1511(e)(1) of the Homeland Security Act of 2002 (6 U.S.C. 551(e)(1)); of which not to exceed \$45,000 shall be for official reception and representation expenses; of which not less than [\$163,560,000] \$159,876,000 shall be for Air and Marine Operations; of which such sums as become available in the Customs User Fee Account, except sums subject to section 13031(f)(3) of the Consolidated Omnibus Budget Reconciliation Act of 1985 (19 U.S.C. 58c(f)(3)), shall be derived from that account; of which not to exceed \$150,000 shall be available for payment for rental space in connection with preclearance operations; of which not to exceed \$1,000,000 shall be for awards of compensation to informants, to be accounted for solely under the certificate of the Secretary of Homeland Security: *Provided*, That for fiscal year [2006] 2007, the overtime limitation prescribed in section 5(c)(1) of the Act of February 13, 1911 (19 U.S.C. 267(c)(1)) shall be \$35,000; and notwithstanding any other provision of law, none of the funds appropriated in this Act may be available to compensate any employee of United States Customs and Border Protection for overtime, from whatever source, in an amount that exceeds such limitation, except in individual cases determined by the Secretary of Homeland Security, or the designee of the Secretary, to be necessary for national security purposes, to prevent excessive costs, or in cases of immigration emergencies[: *Provided further*, That of the total amount provided, \$10,000,000 may not be obligated until the Secretary submits to the Committees on Appropriations of the Senate and the House of Representatives all required reports related to air and marine operations: *Provided further*, That no funds shall be available for the site acquisition, design, or construction of any Border Patrol checkpoint in the Tucson sector: *Provided further*, That the Border Patrol shall relocate its checkpoints in the Tucson sector at least once every seven days in a manner designed to prevent persons subject to inspection from predicting the location of any such checkpoint].

CBP - 51

Explanation of Changes:

Aviation Assets - Eliminates language pertaining to the acquisition, lease, maintenance and operation of aircraft. In FY 2006, Border Patrol air assets were transferred to Air and Marine Interdiction, Operations, Maintenance and Procurement.

Vehicles - Language is modified to allow for the purchase and lease of up to 1,000 new vehicles to accommodate the additional 1,500 Border Patrol Agents requested in FY 2007.

Congressional Reports - Eliminates language which withholds funds until required reports related to air and marine operations are provided to the Committees on Appropriations. Reports have been submitted to Congress.

Border Patrol Checkpoints - Language prohibiting the obligation of funds to construct Border Patrol checkpoints in the CBP's Tucson sector is proposed for deletion. CBP's report to Congress on the proposed establishment of permanent checkpoints included the location, estimated design costs, and benefits of each proposed Tucson sector permanent checkpoint.

Language directing CBP to relocate its tactical checkpoints in the Tucson sector at least every 7 days is proposed for deletion. The report to Congress on the establishment of permanent checkpoints in the Tucson sector identified the benefits derived from CBP Border Patrol checkpoints that create a strong deterrent to illegal cross border crime in the targeted corridor while operational. Predictable or routine closures, as currently mandated by Congress in the Tucson sector, can reduce checkpoint effectiveness and create unwarranted vulnerabilities. The current language effectively creates enforcement vacuum--specifically in southern Arizona--that directly affects the efficiency of the overall enforcement effort along the southwest border.

Headquarters Management and Administration

Headquarters Management and Administrative provides critical policy and operational direction, mission support, including equipment, training, and technical expertise to CBP front-line personnel. This program is essential in carrying out CBP's dual mission of protecting our homeland while facilitating legitimate trade and travel.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$361,941	\$408,994	\$418,833	\$9,839

Salaries and Benefits includes costs for 3,524 FTEs. The FY 2007 request includes an increase of \$8,259,000 for the proposed FY 2007 increase in personnel compensation, \$1,580,000 in program increases associated with Procurement Staffing.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$22,074	\$24,944	\$25,544	\$600

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$562,000 in non-pay inflation, \$38,000 in program increases associated with Procurement Staffing.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$3,804	\$4,300	\$4,319	\$19

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes increases of \$19,000 in non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
GSA rent	\$184,181	\$208,125	\$210,496	\$2,371

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes increases of \$2,371,000 in non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Rent	\$3,673	\$4,152	\$6,904	\$2,752

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 request includes an increase of \$2,464,000 in non-pay inflation and \$238,000 in program increases associated with Procurement Staffing.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$38,061	\$43,009	\$43,344	\$335

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$335,000 in non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$5,960	\$6,735	\$7,145	\$410

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes an increase of \$407,000 in non-pay inflation and \$3,000 in program increases associated with Procurement Staffing.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Contractual Services	\$347,862	\$393,086	\$399,683	\$6,597

Other Contractual Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$6,290,000 in non-pay inflation, \$1,509,000 in program increases associated with Procurement Staffing and Internal Control. There is also a decrease of \$1,203,000 for non-recurrents.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$25,294	\$29,806	\$29,789	(\$17)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (e) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$1,195,000 in non-pay inflation, \$12,000 in program increases associated with Procurement Staffing. There is also a decrease of \$1,224,000 for non-recurrents.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$95,638	\$130,753	\$109,463	(\$21,290)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$1,015,000 in non-pay inflation, \$571,000 in program increases associated with Procurement Staffing. There is also a decrease of \$22,376,000 for non-recurrents.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Land & Structures	\$172	\$194	\$199	\$5

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2007 request includes increases of \$5,000 in non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Indemnity	\$2,085	\$2,550	\$2,664	\$114

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2007 request includes an increase of \$114,000 in non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Unvouchered	\$0	\$0	\$5	\$5

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting. The FY 2007 request includes an increase of \$5,000 in non-pay inflation.

Inspections, Trade & Travel Facilitation at POEs

The purpose of Inspections, Trade and Travel Facilitation at POEs is to facilitate the flow of legitimate travel and trade across U.S. borders, while ensuring that threats to the United States are not allowed entry, using technology, intelligence and risk information, targeting and international cooperation in the screening of entering international cargo and travelers and departing export cargo. This program reduces the potential of terrorists instruments of terror and contraband from entering our country while facilitating the legal flow of people and trade by deploying inspectors and import specialists to the ports of entry. The goal of this program is to improve compliance with trade regulations and other mandatory import/export guidance while increasing the security of the United States.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$1,143,793	\$1,145,695	\$1,168,348	\$22,653

Container Security Initiative

The mission of CSI is to enhance the security of containerized shipping from exploitation by terrorists. CSI's goal is three-fold: (1) to expand operations to new critical international seaports; (2) to secure and improve operations at existing ports; and (3) to encourage global efforts to enhance container security through capacity building.

Working with foreign administrations, CSI is a four-part program designed to achieve a more secure maritime trade environment while ensuring the need for efficiency in global commerce. The four core elements of the program are: (1) establishing security criteria to identify high-risk containers; (2) pre-screening those containers identified as high-risk prior to arrival at U.S. ports; (3) using technology to quickly pre-screen high-risk containers; and (4) developing and using smart and secure containers.

	Actual	Revised Enacted	Request	Change
Supplies & materials	\$1,748	1,937	\$1,951	\$14

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$11,000 in non-pay inflation and \$3,000 in annualization.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$22,344	\$24,770	\$24,464	(\$306)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$319,000 in non-pay inflation. There is also a decrease of \$625,000 for non-recurrents.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Unvouchered	\$49	\$54	\$55	\$1

Unvouchered includes expenditures made lawfully for confidential purposes, including authorized payments made by law enforcement personnel to informants, which are not subject to detailed vouchering or reporting. The FY 2007 request includes an increase of \$1,000 in non-pay inflation.

Other International Programs

The goal of Other International Programs is to develop and implement a framework of standards to secure and facilitate global trade that is based upon principles designed and implemented by Customs and Border Protection to be implemented by the 164 World Customs Organization members. This program's efforts foster and facilitate legitimate international trade, increase compliance, build alliances to combat transnational crime, reduce corruption, strengthen border controls, promote the rule of law and enhance economic stability throughout the world. This is all accomplished through the development and maintenance of collaborative relations with foreign governments, the development of international strategies, representing CBP positions in various international forums, delivering international technical assistance and training, and negotiating or supporting the negotiation of international agreements.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$6,920	\$6,116	\$6,227	\$111

Salaries and Benefits includes costs for 100 FTEs. The FY 2007 request includes an increase of \$111,000 for the proposed FY 2007 increase in personnel compensation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$632	\$558	\$578	\$20

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes an increase of \$20,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Transportation of Things	\$24	\$22	\$23	\$1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes an increase of \$1,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$55	\$49	\$52	\$3

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes an increase of \$3,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Contractual Services	\$1,506	\$1,331	\$1,348	\$17

Other Contractual Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$17,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$169	\$149	\$150	\$1

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. C-TPAT/FAST/NEXUS/SENTRI

The Customs-Trade Partnership Against Terrorism (C-TPAT) is a partnership between the Federal government and industry. It is an effort that CBP has undertaken with the business community to secure the supply chain. The goal of C-TPAT is to develop and maintain a secure supply chain, from factory floor to port of entry, which enables CBP to facilitate trade and ensure safe and secure borders. C-TPAT is designed to use and enhance the security processes and procedures currently employed by the trade community and ensure that international shipments are not compromised nor diverted by terrorists or their accomplices.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
	\$17,385	\$38,212	\$38,688	\$476

Salaries and Benefits includes costs for 263 FTEs. The FY 2007 request includes an increase of \$476,000 for the proposed FY 2007 increase in personnel compensation.

	2005	2006	2007	2006 - 2007

Inspection and Detection Technology

As trade increases, CBP's reliance on Non-Intrusive Inspection (NII) technology to secure the borders becomes more and more critical. In conjunction with CBP's many other initiatives (C-TPAT, ATS, NTC, CSI, etc.), NII allows us to work "smarter". An adversary can defeat any single sensor or device, and therefore, CBP does not rely on any single technology or inspection process. Instead, CBP uses various technologies in different combinations to substantially increase the likelihood that a nuclear or radiological weapon or weapons grade material will be detected. In addition, CBP uses NII technology to detect and interdict narcotics, currency and other contraband secreted in large containers and commercial shipments.

NII technology has been the cornerstone of CBP's multi-layered strategy. Technologies deployed to our nation's land, sea and airports of entry include large-scale X-ray and gamma-imaging systems, as well as a variety of portable and handheld technologies, to include our recent focus on radiation detection technology. NII technologies are viewed as force multipliers that enable us to screen or examine a larger portion of the stream of commercial traffic while facilitating the flow of legitimate trade, cargo and passengers.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007

Systems for Targeting

At the core of CBP's ability to achieve its critical border security objectives and maintain the flow of lawful commerce is CBP's ability to identify high-risk travelers and goods for inspection while allowing the vast majority of law abiding travelers and commerce to continue to their destination without unnecessary delay. Recent legislation and regulatory action, such as the Trade Act of 2002 and the 24-hour rule, respectively, have made it mandatory to provide advance information about passengers and goods arriving in the U.S. CBP uses computer technology and rule-based software to analyze the data provided on passengers and shipments arriving in the U.S. CBP applies its targeting methods against the data to determine which passengers or shipments need to be segregated for a closer look and possibly inspection.

The main platform CBP uses to analyze arriving passenger and shipment data is the Automated Targeting System (ATS). CBP also uses ATS to analyze data in the Automated Export System (AES) on shipments leaving the U.S. In addition, the Advance Passenger Information System (APIS) provides CBP Officers with advanced notice of travelers arriving at international airports. CBP Officers cross-check the flight manifests against databases such as the Treasury Enforcement Communications System (TECS), the Interagency Border Inspection System (IBIS), and the National Crime Information Center (NCIC) to see if there are any "lookouts" for unlawful activity.

National Targeting Center

The priority mission of the U.S. Customs and Border Protection's (CBP's) National Targeting Center (NTC) is to provide around the clock tactical targeting and analytical research support for CBP anti-terrorism efforts. NTC is primarily staffed by CBP Officers and Field Analysis Specialists who are experts in passenger and cargo targeting for air, sea, and land operations in the inbound and outbound environments. The NTC staff develops tactical targets from raw intelligence in support of the CBP mission to detect and prevent terrorists and terrorist weapons from entering the United States. NTC supports all CBP field elements, including Container Security Initiative personnel stationed in countries throughout the world, with additional research assets for passenger and cargo examinations.

Training at the Ports of Entry

The Office of Training and Development exists to develop and deliver basic-, mid-, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., CBP Officers, Agriculture Specialists, Intelligence Analysts, Import Specialists, Entry Specialists) at the ports of entry. This training enables CBP employees to achieve the goals of improving border security, facilitating trade, and combating terrorism at the ports of entry.

Border Security and Control Between the POEs

The Office of Border Patrol (OBP) has been delegated with the authority and responsibility to deliver the Executive Branch Program for "Border Security and Control between the Ports of Entry." The primary purpose of this program is to prevent the entry of terrorists and their instruments of terror, illegal immigrants, and contraband, while facilitating the legitimate flow of people, goods, and services on which the economy depends. The program will be accomplished through the judicious use of resources including personnel, surveillance technology, communications, and transportation, facilities, and mission support activities.

Border Patrol agents deter uncontrolled entry into the interior of the U.S. by: the rapid detection, interception, and apprehension of illegal entrants at or near the border; interdicting or deterring illegal aliens, drug smugglers, potential terrorists and criminals from attempting illegal entry between ports-of-entry; and causing persons seeking admission into the U.S. to present themselves at designated ports for inspection.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$1,273,066	\$1,523,115	\$1,864,312	\$341,197

Salaries and Benefits includes costs for 14,576 FTEs, and increase of 1,632 FTEs from FY2006. The FY 2007 request includes increases of \$25,759,000 for the proposed FY 2007 increase in personnel compensation, \$173,151,000 in annualization and \$142,287,000 in program increases associated with the hiring of 1,500 additional Border Patrol Agents.

Air Program Operations and Maintenance

The Air Program Operations and Maintenance program ensures the operations and maintenance of the Border Patrol's fleet of helicopters and fixed wing aircraft, which provide additional support to Border Patrol agents as they work to prevent and protect our nation's borders between the ports of entry.

In order to achieve increased effectiveness and economies of scale with CBP Air Assets, CBP has merged in air assets from Air and Marine Operations and Office of Border Patrol to create CBP Air. Funds related to Border Patrol air assets, therefore, has been transferred to the Air and Marine Interdiction, Operations, Maintenance, and Procurement Appropriation.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007

Unmanned Aerial Vehicles

The purpose of this program is to procure, deploy, and operate a system of unmanned aerial vehicles to support the Border patrol or other components of CBP in accomplishing its mission through augmentation of modern law enforcement techniques, intelligence gathering, and technology. The use of UAVs to monitor remote areas of our northern and southern borders would be a significant step forward in providing security in those areas.

In order to achieve increased effectiveness and economies of scale with CBP Air Assets, CBP has merged in air assets from Air and Marine Operations and Office of Border Patrol to create CBP Air. Funds related to Border Patrol air assets, therefore, has been transferred to the Air and Marine Interdiction, Operations, Maintenance, and Procurement Appropriation.

Border Technology

Border Technology, formerly known as America's Shield Initiative (ASI) supports the U.S. Border Patrol (USBP) both tactically and strategically. At the tactical level, on-scene agents are provided with near real-time information on attempted border crossings by illegal aliens, terrorists, or smugglers. The installation of surveillance and sensory systems enables monitoring of targeted expanses of the border. Strategically, knowledge of this capability will likely deter illegal aliens and smugglers from attempting to cross the border as they realize the increased potential for apprehension.

Training between the Ports of Entry

The Office of Training and Development exists to develop and deliver basic-, mid-, and advanced level training programs for all CBP employees, especially mission critical occupations (e.g., Border Patrol Agents) between the ports of entry. This training enables CBP employees to achieve the goals of improving border security and combating terrorism between the ports of entry. This training ensures that CBP is able to rapidly deploy both on a temporary and permanent basis, a highly motivated, well-trained workforce who can quickly respond to potential terrorist threats, shifts in smuggling patterns and other national security threats.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$0	\$0	\$4,020	\$4,020

Salaries and Benefits includes costs Object Classes 11 and 12. The FY 2007 request includes an increase of \$4,020,000 in program increases associated with training additional 1,500 Border Patrol Agents.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$4,934	\$5,005	\$6,110	\$1,105

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$235,000 in non-pay inflation, \$870,000 in program increases associated with training additional 1,500 Border Patrol Agents.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$2	\$2	\$1,322	\$1,320

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes increases of \$1,320,000 in program increases associated with training additional 1,500 Border Patrol Agents.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Rent	\$1	\$1	\$1	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charge:	\$45	\$46	\$52	\$6

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$6,000 in non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Contractual Services	\$12,438	\$12,619	\$27,880	\$15,261

Other Contractual Services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$150,000 in non-pay inflation, and \$15,111,000 in program increases associated with training additional 1,500 Border Patrol Agents.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$863	\$875	\$889	\$14

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$14,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$3,384	\$3,433	\$5,414	\$1,981

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$11,000 in non-pay inflation and \$1,970,000 in program increases associated with training additional 1,500 Border Patrol Agents.

*FY 2005 obligations are provided by CBP's Financial system - SAP (Systems, Applications and Products).

Air and Marine Operations - Salaries

The purpose of Air and Marine Salaries is to apply the skills and expertise of CBP air and marine personnel to deter, interdict, and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States. Having aircraft and vessels along the borders reduces the quantity of drugs entering the U.S. and minimizes threat levels. The goal of this program is to deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against the United States.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$131,353	\$156,821	\$154,595	(\$2,226)

Salaries and Benefits includes costs for 1,220 FTEs. The FY 2007 request includes an increase of \$2,774,000 for the proposed FY 2007 increase in personnel compensation. There is also a decrease of \$5,000,000 for the transfer to U.S. Coast Guard.

CBP - 101

BUDGET REQUEST AND SUPPORTING INFORMATION
--

U.S. CUSTOMS AND BORDER PROTECTION
AUTOMATION MODERNIZATION

I. Appropriation Overview**A. Mission Statement for Automation Modernization:**

To further the U.S. Customs and Border Protection (CBP) mission of securing our nation's borders while facilitating legitimate trade, CBP began modernizing its information systems. The first automation effort is the implementation of the Automated Commercial Environment (ACE), which is being developed and deployed in increments, and will eventually replace the current trade management system, the Automated Commercial System. ACE will provide tools and enhance the business processes that are essential to securing U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information. The Critical Operations Protection & Processing Support (COPPS) mission is to consolidate all CBP Information Technology (IT) infrastructure requirements together.

B. Budget Activities:**Automated Commercial Environment (ACE)/ International Trade Data System (ITDS)**

CBP is modernizing its business processes, information technology systems, and infrastructure to provide the functionality needed to support its mission and sustain its global leadership position in the years to come. ACE is CBP's response to the explosive growth in trade volume and will supplement and replace the Automated Export System (AES) and the Automated Commercial System (ACS). Within DHS, ACE is a much-needed tool to combat illegal activities and terrorist threats to the United States. In addition, ACE satisfies numerous legislative mandates that could not otherwise be achieved. The International Trade Data System (ITDS) is intended to be a secure, integrated, government-wide system for the electronic collection, use, and dissemination of trade and transportation data. To become a single window to the trade, ITDS will require the participation of about 78 Federal entities.

Critical Operations Protection & Processing Support (COPPS)

COPPS supports CBP IT infrastructure. The systems supported by CBP's IT infrastructure allow for "One Face at the Border" by providing more efficient and effective sharing of information and images among trade and law enforcement agencies. IT systems are vital tools CBP and other federal employees use to defend our borders. They assist CBP Officers in identifying potential catastrophic threats, including terrorists, weapons of mass destruction, and biological agents, as they attempt to enter the country.

C. Budget Request Summary:

CBP requests 62 FTE and \$461,207,000. The total adjustments-to-base is \$9,767,000 and there are no program increases.

CBP - 2

III. Current Services Program Description by PPA

Department of Homeland Security
Customs and Border Protection
Automation Modernization
Program Performance Justification
(Dollars in thousands)

PPA: ACE/ITDS

	Perm. Pos.	Work - years	Amount
2005 Actual	48	35	\$321,690
2006 Enacted	62	62	316,800
2007 Adjustments to Base	---	---	1,690
2007 Current Services	62	62	318,490
2007 Request	62	62	318,490
Total Change 2006-2007	---	---	1,690

* The FY 2005 column represents enacted budget authority pursuant to P.L. 108-334

CBP requests \$318.490 million for ACE/ITDS. This is an increase of \$1.7 million over FY 2006 for pay and non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

FY07 Automated Commercial Environment Planned Functionality

There are three planned drops (subset releases within overarching releases) that will provide functionality during FY07. These drops include the: Entry Summary, Accounts, and Revenue (Release 5) Master Data and Enhanced Accounts (Drop A1); e-Manifest: All Modes and Cargo Security (Release 6) e-Manifest: Rail and Sea (Drop M1); and ACE Screening & Targeting Advanced Targeting Tools (Release S3).

Entry Summary, Accounts, and Revenue (Release 5) Master Data/Enhanced Accounts (Drop A1)

This release expands on prior ACE releases by adding most account types and corresponding system master data. Release 5 expands the current importer, broker, and carrier accounts management activities to treat "any entity" doing business with CBP as an account. In addition to the expansion of account types, Master Data and Accounts (Drop A1) will provide trade representatives with the ability to register for CBP programs on-line. These programs will initially include on line application processing for Customs Trade Partnership Against Terrorism, Trusted Accounts, and other CBP programs, such as Free and Secure Trade (FAST). The ability for brokers to view client accounts will also be enabled in Drop A1. In Drop A1, the creation and maintenance of all master data elements and related reference files will originate in ACE and be distributed to other CBP systems (i.e., ACS, Automated Export System) for the following: Accounts master data (Trade Profiles), Tariffs, Manufacturer IDs, Organizational Data (i.e., port codes, FIRMS codes), Country, Reference data to support ESAR transactions, EDI Profiles, and Account Status.

CBP - 4

e-Manifest: All Modes and Cargo Security (Release 6) e-Manifest: Rail and Sea (Drop M1)

The initial delivery of Release 6 provides an electronic manifest for the Rail and Sea modes of transportation. Release 6 extends to Rail and Sea the automated manifest processes for determining the admissibility of crew, cargo, conveyance, and equipment that was previously delivered for trucks in Release 4. This release will convert Rail and Sea electronic manifests, along with electronic truck manifests already being received by ACE, into the multi-modal application.

Along with the ability to view screening and targeting results for Rail, Sea and Truck shipments and entries, Release 6 provides the inspector with the capability to document potential enforcement issues in the TRACER subsystem that will record and track information associated to potential or actual noncompliance. The delivered functionality brings the ability to create, update, or close issues from the ACE truck manifest application to the Rail and Sea modes of transportation.

ACE Screening & Targeting Advanced Targeting Tools (Release S3)

The ACE Advanced Targeting Tools (Release S3) extends both screening and targeting. Release S3 delivers criteria management and execution functionality (i.e. impact analysis repository) to host enhanced business rules. Validation of the new supply chain or other external data sources that improve screening and targeting, as well as knowledge management and data source expansion, will be incorporated into the Advanced Targeting Tools (Release S3) functionality. This release supports completion of the Risk Management circle. Release S3 provides capability for initial risk identification, modeling, profiling, and mitigation design functionality. It closes the findings feedback loop and delivers a consolidated findings repository for analyzing and evaluating criteria. In this release, there are capabilities to measure operational effectiveness of screening and targeting criteria. In addition, there are extended criteria reporting capabilities, including criteria effectiveness for evaluation purposes and the ability to refine criteria based on findings. The release includes pattern recognition functionality to generate new criteria based on positive findings.

Release S3 automates a number of risk-related actions. The system generates criteria requests for enforcement/tracers based on user decisions and requests. Additional analytical tools allow users to analyze disparate data and track linkages and patterns that are suspicious. Link analysis capabilities enhance CBP knowledge of complex criminal networks.

PPA: COPPS

	Perm. Pos.	Work - years	Amount
2005 Actual	---	---	\$128,219
2006 Enacted	---	---	134,640
2007 Adjustments to Base	---	---	8,077
2007 Current Services	---	---	142,717
2007 Request	---	---	142,717
Total Change 2006-2007	---	---	8,077

* The FY 2005 column represents enacted budget authority pursuant to P.L. 108-334

CBP requests \$142.717 million for COPPS. The ACE appropriation represents the lower limit the Department is required to expend on the ACE program. The \$8.1 million increase comprises the remaining non-pay inflationary resources from ACE and non-pay inflationary adjustments to the COPPS programs.

CURRENT SERVICES PROGRAM DESCRIPTION:

Critical Operations Protection & Processing Support (COPPS) supports the U.S. Customs and Border Protection (CBP) Information Technology (IT) infrastructure. The systems supported by CBP's IT infrastructure allow for "One Face at the Border" and provide for more efficient and effective sharing of information and images amongst trade and law enforcement agencies. The IT systems are vital tools CBP and other Federal employees use to defend our borders. The systems assist CBP Officers in identifying potential catastrophic threats, including terrorists, weapons of mass destruction, and biological agents, as they attempt to enter the country. These IT systems provide the means to enforce U.S. Criminal and Trade Laws and to collect over \$25 billion each year in tariffs and taxes associated with international trade and commerce.

CBP will facilitate trade growth, economic development, and enhance the efficient processing of international travelers through the use of comprehensive, integrated surveillance, detection, scientific, forensic, and information systems technology. The CBP infrastructure is the backbone supporting all of these capabilities. The technology utilized within CBP's infrastructure enables CBP to continually improve the selectivity of low-risk and high-volume cargo, vehicles, and people while expediting clearance processes. The infrastructure provides the basis for maintaining a sound trade management system that maximizes compliance with the law, moves legitimate cargo efficiently, targets high risk shipments, secures our borders, facilitates movement of international travel, protects the public from contraband, and maintains a strong support structure to achieve desired business results for both CBP and stakeholders. CBP's IT infrastructure fully supports the DHS mission of protecting our borders and facilitating trade. COPPS' goals are to assure that all CBP IT systems are available when needed to accomplish CBP's mission. The CBP IT infrastructure is a modern, technologically advanced, economically efficient system involving multiple operating platforms and the latest interoperability and integration technologies, tools, and capabilities.

COPPS provides networks, voice communications, Data Center, a Technical Support Center (help desk), and e-mail. COPPS serves as the backbone for mission critical trade and law enforcement

systems. The major mission critical systems, applications, and programs supported include the Automated Commercial System (ACS); Treasury Enforcement Communications System (TECS); Automated Export System (AES); Advanced Passenger Information System (APIS); Free and Secure Trade (FAST); Seized Asset and Case Tracking System (SEACATS); CBP's Financial and HR Management Systems; Fingerprinting and Identification System (IDENT); and the Arrival Departure Information System (ADIS). These systems directly support CBP's mission:

- ACS is the comprehensive system used by CBP to track, control, and process all commercial goods imported into the United States. ACS facilitates merchandise processing, reduces paper work and cuts processing costs for both CBP and the trade community. ACS facilitates overall cargo processing to speed imports to the trade community and into the national economy. ACS applies sophisticated analytical techniques such as the Border Release Advanced Selectivity System (BRASS) to enforce border and transportation security while enabling implementation of NAFTA. ACS collaborates electronic data collection and distribution services with other government agencies.
- TECS is used by CBP and other federal and state agencies to provide intelligence and warning data for passengers and people entering the United States. TECS is responsible for providing border and transportation security at border locations and foreign locations that are part of the CSI and US-VISIT projects.
- AES is the comprehensive system used by CBP, the Foreign Trade Division of the Bureau of Census (Commerce), the Bureau of Export Administration (Commerce), the Office of Defense Trade Controls (State), other Federal agencies, and the export trade community to track, control, and process all goods exported from the United States. AES is the central point through which export shipment data required by multiple agencies is electronically filed and is used to identify exports with potential safety and security risks, such as HAZMAT and munitions type cargo. AES provides improved information sharing, enhances the quality of decision making through shared information, and supports intelligence, border and transportation security.
- APIS permits research on passengers on international flights before their arrival in the United States. APIS collects biographical information (name, date of birth, country of residence, etc.) from international air passengers before their departure for the U.S.A. Air carriers submit passenger data at takeoff, allowing the data to be checked against the Interagency Border Inspection System (IBIS) before the passengers arrive. IBIS includes data from the databases of CBP, the State Department, and twenty-one other federal agencies. Passengers' names also are checked against the wanted person files at the FBI's National Crime Information Center (NCIC).
- SEACATS is the cradle-to-grave system for tracking all activity associated with seized and forfeited property from the initial enforcement interest in the property until its final disposal. SEACATS tracks the flow of any expenses and movement of the property from one site and location to another throughout the forfeiture process. SEACATS also provides the system of administrative adjudication for all CBP Fines and Penalty processing. The system interfaces with other internal CBP systems and with the Internal Revenue Service, the Justice Department and Treasury Forfeiture Funds and supports requirements for seized and forfeited property, fines, penalties, and liquidated damages.

CBP - 7

- CBP's Financial and Human Resource (HR) Management Systems manage administrative systems. These systems include SAP financial management, payroll, various inventory systems to track assets from helicopters to badges, as well as HR.
- An interface to Automated Biometric Identification System (IDENT) is deployed with the Enforcement Apprehension Booking Module (EABM). IDENT allows CBP to track individuals that have had previous encounters with CBP, and provides statistical and intelligence data based on biometrics. IDENT allows CBP to identify known criminal aliens and individuals with active wants and warrants.
- An interface to Integrated Automated Identification System (IAFIS) currently has a limited deployment with EABM. The IAFIS capability allows CBP to positively identify any individual in the FBI Criminal Master File that has a criminal record. These responses are sent to the user along with the Criminal "Rap Sheet" in approximately three (3) minutes.

Other IT systems funded by and described under other accounts could not function without the basic IT infrastructure provided by COPPS. Among these systems are the United States Visitor Immigration Status Indication Technology (US VISIT), the Automated Commercial Environment (ACE), the Automated Targeting System (ATS), and the Border Patrol Enforcement Tracking System (BPETS). High-priority CBP programs, such as the Container Security Initiative (CSI), depend on the IT infrastructure for their effectiveness. In addition, newly developed and implemented systems are supported (e.g., the Global Enrollment System, or GES, and the Cargo Enforcement Reporting Tracking System, or CERTS).

Network and communications provided by COPPS include Blackberry servers, voice telephone (landline and cellular), audio/video conferencing, Internet, extranet and help desk and Value Added Network (VAN) connections. Communications also includes network bandwidth and fiber optic capabilities. Hardware includes back up generators, scanners, hand held computers, a network operations center, LANs, WANs, routers, encryptors, gateways, firewalls, mainframe computers, workstations, file/email/database/-application servers, modems, and VAN connections. Supporting software includes application development tools, Operating Systems, Program and Configuration Management tools, Office Automation tools, Section 508 tools, testing tools, LAN/WAN administration tools, and other management tools.

The CBP National Data Center (NDC) houses the centralized infrastructure equipment supporting mission critical systems. Extensive connectivity and support facilities exist at the NDC, ranging from a large computer room and control center to back up power, storage, and generators. The primary technical environments for major applications are mainframe and UNIX environments. The mainframe systems run z/OS, CICS, DATACOM/DB, WebSphere, MQ Series, supporting applications written in Assembler, COBOL, and Java. The UNIX systems run Solaris OS, Oracle, MQ Series, and applications developed in C, C++, and Java. The magnitude of the workload supported by the NDC is illustrated by the fact that the mainframes support over 100,000 users, involving the largest Fujitsu/Unix server environment of its kind in North America, the highest volume transaction volume against a Datacom database in the world, and the largest message processing organization in the world. The IT infrastructure supports CBP staff at over 1,500 field sites, more than 100 Federal, State, local, international government agencies, and more than 2,000 financial institutions and over 2,000 trade

partners. COPPS supports 47,000 total workstations/PCs, laptops, network printers, host printers, switches, and domain controllers numbered in the thousands; application servers (Microsoft/Intel based), and Novell Servers numbered in the hundreds. The Data Center also houses four mainframes that provide the large processing capacities required to support the volumes of data processing required. The mainframes are periodically upgraded to maintain processing capacity within acceptable performance standards. Support is also provided to wireless devices, such as Blackberry devices.

By keeping the IT infrastructure stable, available, and reliable, CBP greatly enhances the ability of CBP Officers to make timely decisions and to take appropriate action in protecting our Nation's borders. CBP's infrastructure requirements continue to grow, both in response to greater DHS requirements and in response to the natural and beneficial growth of international trade and immigration. CBP's trade systems continue to receive data from over 12,500 brokers, freight forwarders, and others representing the trade community. Based on historical measures, CBP expects workload to increase approximately 20 percent each year. The infrastructure must be augmented to accommodate this growth, as well as the growth associated with information systems development and enhancements, such as CERTS and ACE implementation. This does not mean that costs increase 20 percent per year, but it does mean that CBP must stay current in technology to ensure that our systems can keep up with demand and maintain response times that are consistent with industry best practices. Software and Hardware maintenance costs increase at an average rate of 10% per year. Critical system licenses include Veritas, IBM, Tivoli, Mainframe support, Oracle, DB2, Fujitsu, and Websphere MQ. Mainframe and Unix DASD (direct access storage device) growth continues at an average rate of 15% per year, and is currently in excess of 250 terabytes (TB).

DHS Infrastructure Transformation Program

The Department's Infrastructure Transformation Program (ITP), led by the Office of the Chief Information Officer (OCIO), will integrate the IT infrastructures of the 22 legacy components into "One Infrastructure". Currently, most of the Department's components fund and are supported by separate and largely stove-piped IT infrastructures. This environment makes it difficult to share information across components and has resulted in redundant investments and wasted resources. The ITP will eliminate the duplicative infrastructures and provide common capabilities and services for all components to leverage.

The ITP consists of five domains with a Department component assigned as a steward responsible and accountable for the performance of each domain. The domains and their stewards are listed below:

- Network Services led by Customs and Border Protection (CBP);
- Data Center Services led by CBP;
- Email Services led by U.S. Coast Guard (USCG);
- Help Desk Services led by USCG; and
- Video Operations Services led by Federal Emergency Management Agency (FEMA).

The OCIO oversees the work of the stewards and the other components to ensure operational requirements are met and investments and resource allocations are balanced across the components.

Implementation of the ITP will eliminate the need for components to spend resources on improving their own infrastructures. Instead, some of the investment funding previously used for stovepiped

infrastructures will be used to support the department-wide ITP effort. For example, CBP's IT initiatives such as the Automated Commercial Environment will benefit from the capabilities and services the ITP will provide such as network access, data center hosting, email/collaboration services, wireless access, integrated help desk, voice access, video services, and on-site support. Rather than independently developing new capabilities or augmenting legacy capabilities within CBP, the ITP will provide enterprise-level services that will benefit all components.

By investing in the ITP, DHS components will benefit from economies of scale while promoting Department integration, and improving information sharing and interoperability. The amount of IT investment funding from components to support the ITP is still under deliberation and any such proposal will be fully vetted with the Congress prior to any actions being taken.

ACE/ITDS Mission Statement

To further the CBP mission of securing our nation's borders while facilitating legitimate trade, CBP began modernizing its information systems. The first automation effort is the implementation of the Automated Commercial Environment (ACE), which is being developed and deployed in increments, and will eventually replace the current trade management system, the Automated Commercial System. ACE will provide tools and enhance the business processes that are essential to securing U.S. borders from terrorists by providing intelligence required to target illicit goods, while ensuring the efficient processing of legitimate goods. ACE capabilities have been designed to identify potential risks, analyze information prior to arrival of people and cargo, and provide intelligence in easy-to-use formats. As a web-based system, ACE will provide users from government and the trade community with new, more efficient ways of accessing, processing, and sharing trade-related information.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$5,604	\$7,527	\$7,707	\$180

Salaries and Expenses includes cost for 62 FTE. The FY 2007 request includes an increase for the proposed FY 2007 pay raise.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Travel	\$1,104	\$384	\$384	\$0

Provides for travel to and from the many localities where ACE is being deployed to provide support to the IT infrastructure, ACE application, and for training of personnel.

COPPS Mission Statement

The Critical Operations Protection & Processing Support (COPPS) mission is to consolidate all U.S. Customs and Border Protection (CBP) Information Technology (IT) infrastructure requirements together.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$290	\$383	\$383	\$0

Provides for travel to and from the many localities (over 1,000) where CBP maintains Information Technology (IT) systems, such as Ports of Entry, to provide support to the IT infrastructure, and for training of personnel.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$16,836	\$22,236	\$22,236	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$3,268	\$4,236	\$4,540	\$304

Acquisition of commercial services to support the CBP Information Technology (IT) infrastructure, including systems and LAN engineering, and enterprise-wide IT system security.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Other Services	\$46,899	\$60,787	\$65,161	\$4,374

Acquisition of services to provide support related to the use of proprietary systems (e.g., for configuration management and e-mail), and network systems.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$5,257	\$6,814	\$7,304	\$490

Contractors install, operate and maintain the CBP National Data Center's equipment (including mainframes, servers, printers, extensive communications equipment, and environmental controls) as well as that of the CBP IT networks, including voice communications systems. Contractors also install and maintain desktop equipment, associated networks and printers, and provide support for various wireless communications technologies.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$66	\$87	\$93	\$6

Enterprise licenses for large-scale database management systems, magnetic tapes for backing up data at the CBP National Data Center, and general supplies such as printer toner and paper.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Equipment	\$30,360	\$40,097	\$43,000	\$2,903

Acquisition of software licenses and IT hardware. Licenses include those for mainframe computer systems (including MIPS, Million Instructions per Second), WAN and LAN operating systems, desktop systems (such as Windows and Microsoft Office), and anti-virus software. Hardware related to IT systems includes increasing the capacity of mainframes, servers, and storage (such as DASD, Direct Access Storage Devices).

BUDGET REQUEST AND SUPPORTING INFORMATION
--

U. S. CUSTOMS AND BORDER PROTECTION
CONSTRUCTION PROGRAM

I. Appropriation Overview**A. Mission Statement for Construction**

Provide the facilities and tactical infrastructure U. S. Customs and Border Protection (CBP) needs to perform its enforcement and trade facilitation missions.

B. Budget Activities:**Major Construction**

Plan, design, construct and outfit new buildings and associated infrastructure (e.g. parking lots, utilities).

Tactical Infrastructure

Plan, design, construct, and maintain tactical infrastructure (e.g. fences, patrol roads, vehicle barriers, and lights) required by CBP, Office of the Border Patrol, to achieve operational control U. S. borders. The Office of the Border Patrol employs a mix of tactical infrastructure, personnel, and technology to achieve operational control of U. S. borders and this appropriation funds the construction and maintenance of tactical infrastructure.

Minor Construction and Alterations

Plan, design, and construct small structures and buildings; correct functional and physical inadequacies in existing facilities by planning, designing, and executing major renovation projects.

Lease Acquisition Base

Plan, design, and construct the build out of leased facilities used by the CBP, Office of the Border Patrol.

Operations, Maintenance and Repair

Fund service contracts and the purchase of materials needed to maintain and repair facilities.

Planning

Funds special studies that align the construction program with CBP's long-range strategies. The studies ensure facility and tactical infrastructure investments are consistent with CBP's operational strategies and are not a one-for-one replacement program.

CBP Construction-1

C. Budget Request Summary:

The CBP Construction Program requests \$255,954,000 for FY 2007. The total adjustments-to-base is (\$161,669,000). The program increase is \$139,923,000 to:

- Construct facilities for the additional Border Patrol agents CBP is requesting in FY 2007, \$59,100,000.
- Accelerate construction of tactical infrastructure in San Diego, CA, \$30,000,000.
- Accelerate construction of tactical infrastructure in Western Arizona, \$50,823,000.

CBP Construction-2

III. Current Services Program Description by PPA

**Department of Homeland Security
U.S. Customs and Border Protection
Construction
Program Performance Justification
(Dollars in thousands)**

PPA: CONSTRUCTION

	Perm Pos	FTE	Amount
2005 Actual	\$ 143,593
2006 Enacted	\$ 277,700
2007 Adjustments-to-Base	\$(161,669)
2007 Current Services	\$116,031
2007 Program Change	\$139,923
2007 Request	\$255,954
Total Change 2006-2007	\$(21,746)

CBP requests \$256 million for this activity. This is a decrease of \$21.7 million below FY 2006. Adjustments to base of \$161.7 million reflect non-recurring costs associated with FY 2006 initiatives.

CURRENT SERVICES PROGRAM DESCRIPTION:

The mission of the Construction program is to provide the facilities and tactical infrastructure CBP needs to perform its enforcement and trade facilitation missions. CBP's priority mission is to prevent terrorists and terrorist weapons from entering the United States. As the nation's unified border agency CBP also interdicts illegal drugs and aliens, facilitates legitimate global trade and travel, and protects the nation's food supply and agriculture industry from pests and disease.

The current services program provides environmental planning, site planning, site acquisition, design services, and construction of new buildings and tactical infrastructure. It builds out leased space, and repairs, renovates, and alters government owned and leased space. The program also funds routine facility operations and maintenance. The current services program of \$116M includes costs for the following: major construction \$46M, tactical infrastructure \$25M, minor construction and alterations \$9M, lease acquisition \$9M, operations, maintenance and repair \$25M, and planning \$2M.

CBP requires facilities to support the workforce and equipment it uses to secure America's borders. Buildings and structures include but are not limited to office space, ports of entry, laboratories, aviation hangars, marine piers, classrooms, small arms ranges, training facilities that simulate operating environments, Border Patrol stations, and Border Patrol sector headquarters. In addition to buildings, CBP's Office of Border Patrol uses tactical infrastructure to achieve operational control of U. S. borders. Tactical infrastructure (e.g. fences, vehicle barriers, lights, roads) serves as a force multiplier by providing physical impediments to illegal entry and expediting Border Patrol agent movement.

CBP Construction-4

Border Patrol sector headquarters provide operational command, control and communications in the sector's area of responsibility. Missions and capabilities supported by these buildings include remote video surveillance of the border, intelligence analysis and planning, vehicle maintenance and storage, operational planning, training, personnel support, and training. Sector headquarters also plan the strategic deployment of agents to Border Patrol stations and camp details within the sector.

Strategically located Border Patrol stations facilitate Border Patrol agent mobility and deployment to areas of illegal activity. Border Patrol station activities include command, control and communications, illegal alien detention and processing, air and marine operations, search and rescue, tactical team staging, intelligence unit support, canine and horse operations, interior repatriation, remote video surveillance of the border, vehicle maintenance and storage, administration, training, and law enforcement coordination.

Mobile and self-sustaining Border Patrol forward operating bases placed in remote locations facilitate rapid responses to shifting patterns of criminal activity. Forward operating bases provide habitability for Border Patrol agents in addition to providing communications support.

The program provides environmental planning, site planning, site acquisition, design services, and construction of new buildings and tactical infrastructure. It builds out leased space, and repairs, renovates, and alters government owned and leased space. The program also funds routine facility operations and maintenance.

One of the program's major users is CBP's Office of Border Patrol. The Office of Border Patrol's new national strategy includes adding a significant number of agents and expanded use of tactical infrastructure. The construction program provides facilities for the additional agents and constructs tactical infrastructure.

Description of Item

Provide funds to construct facilities for the 1,500 Border Patrol agents requested elsewhere in the budget.

Justification

CBP does not have adequate facilities to sufficiently house additional Border Patrol agents. Failure to provide proper facilities will result in less than optimal performance from the additional agents, thereby reducing the government's return on its investment.

Impact on Performance (Relationship of Increase to Strategic Goals)

The addition of new and expanded Border Patrol Stations will provide strategically located bases to facilitate agent mobility and rapid deployment to areas of heaviest illegal activity. Missions and capabilities enabled by these facilities include staging and deployment of Border Patrol Agents, tactical teams and search and rescue teams; command, control and communications; detention and processing, air and marine operations, intelligence unit support, canine and horse operations, interior repatriation, remote video surveillance of the border, fleet maintenance and storage, administrative, training, and law enforcement coordination.

Program Increase 2: Tactical Infrastructure Western Arizona

Strategic Goal(s) & Objective(s): 2.1 – Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws

PPA: Construction

Program Increase: Positions 0 FTE 0 Dollars \$50,823

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-		-	-		-	-	\$7,000
Program Increase	-	-		-	-		-	-	\$50,823
Total Request	-	-	\$7,000	-	-	\$7,000	-	-	\$57,823

Description of Item

Funding to accelerate construction of tactical infrastructure in Western Arizona. This initiative will construct approximately 39 miles of permanent vehicle barriers in Western Arizona. Tactical infrastructure prevents and deters illegal border crossings and provides a force-multiplier by enhancing agent efficiency in responding to and interdicting illegal entrants. Funding provided for 2006 will be used to plan, engineer, and construct vehicle barriers.

Justification

CBP, Office of Border Patrol's national strategy involves using a combination of tactical infrastructure, personnel, and technology to achieve operational control of U. S. borders. An Office of Border Patrol operational priority is achieving operational control of the Western Arizona border in the Cabeza Prieta National Wildlife Refuge and the Barry M. Goldwater Range.

Tactical infrastructure has generally been funded from the CBP construction base. The funds were used for planning, engineering, and purchase of construction materials and Department of Defense military units were used to construct the tactical infrastructure. Using this traditional approach would take until 2010 or longer to construct the tactical infrastructure needed to achieve operational control of the Western Arizona border. This initiative funds a commercial contract to construct almost one-half of the vehicle barriers required to achieve operational control of the Western Arizona border.

Impact on Performance (Relationship of Increase to Strategic Goals)

The strategic goal of the Border Patrol is to achieve operational control of the border, defined as the ability to deter, detect and interdict illegal border penetrations. The combined effect of the Tactical Infrastructure is to stop, slow and channel illegal border crossers into enforcement zones and to decrease agent response times. In areas where Tactical Infrastructure has been fully implemented in combination with personnel and technology, operational control of the border has been achieved. The trend in these controlled areas is an initial increase in apprehensions followed by a significant reduction crossing attempts as the futility of avoiding detection and apprehension is realized.

Program Increase 3: San Diego Fence (Border Infrastructure System)

Strategic Goal(s) & Objective(s): 2.1 – Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws
 PPA: Construction

Program Increase: Positions 0 FTE 0 Dollars \$30,000

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-		-	-		-	-	\$5,250
Program Increase	-	-		-	-		-	-	\$30,000
Total Request	-	-	\$0	-	-	\$34,650	-	-	\$35,250

Description of Item

Funding to accelerate construction of the San Diego Fence (Border Infrastructure System). FY 2007 funding will be used to purchase land needed for construction and to continue construction of the five miles of border infrastructure (multiple fences and roads) remaining to be built. Nine of fourteen miles has been constructed and this request when combined with the FY06 appropriation will provide about two-thirds of the funds needed to complete construction.

Justification

Section 102 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) in 1996 mandated construction of a 14-mile multi-tiered fence with patrol roads along the border in the vicinity of San Diego, CA. Approximately nine of the required fourteen miles are in place. CBP estimates it will cost approximately \$66,300,000 to finish the system using a combination of commercial contracts and military labor. System construction would be completed in 2011 using this approach. This initiative provides almost half of the funds needed to complete the system and keep the project on schedule for a 2011 completion date.

Impact on Performance (Relationship of Increase to Strategic Goals)

The strategic goal of the Border Patrol is to achieve operational control of the border, defined as the ability to deter, detect and interdict illegal border penetrations. The combined effect of the Tactical Infrastructure is to stop, slow and channel illegal border crossers into enforcement zones and to decrease agent response times. In areas where Tactical Infrastructure has been fully implemented in combination with personnel and technology, operational control of the border has been achieved. The trend in these controlled areas is an initial increase in apprehensions followed by a significant reduction crossing attempts as the futility of avoiding detection and apprehension is realized.

V. Exhibits and Other Supporting Materials**A. Justification of Proposed Legislative Language**

Department of Homeland Security
U. S. Customs and Border Protection
Justification of Proposed Changes in Construction
Appropriation Language

For necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration, [\$270,000,000], **\$255,954,000** to remain available until expended [*Provided*, That of the total amount provided under this heading, \$35,000,000 shall be available for the San Diego sector fence; \$35,000,000 shall be available for Tucson sector tactical infrastructure; and \$26,000,000 shall be available for the Advanced Training Center]. (*Department of Homeland Security Appropriations Act, 2006.*)

Explanation of Changes:

Proposed changes in language will support Border Patrol's National Strategy and account for additional funding to support other CBP construction initiatives.

CBP Construction-15

NAME OF CONSTRUCTION INITIATIVE
Border Patrol Facilities and Tactical Infrastructure

1. Project Description, Justification and Scope

Provide the facilities and tactical infrastructure CBP needs to secure the nation's borders.

Facilities: The proposed construction budget addresses facility requirements at CBP's Advanced Training Center, and at Border Patrol sectors, stations, checkpoints and forward operating bases.

Tactical Infrastructure: The proposed tactical infrastructure budget addresses requirements for systems such as fencing, vehicle barriers, high intensity lighting, bridges, drainage structures and road improvements. CBP's Office of the Border Patrol employs tactical infrastructure to physically prevent or slow illegal border crossing activity, channel illegal flows to enforcement zones, and improve agent freedom of movement.

2. Significant Changes

CBP's Office of the Border Patrol is at a critical point implementing its national strategy. Although the strategy has been implemented in certain locations, additional personnel and tactical infrastructure are required to achieve optimum deterrence and operational effectiveness. To support the strategy, this year's new initiatives accelerate construction of tactical infrastructure in Western Arizona and San Diego, CA, and builds facilities for additional Border Patrol agents requested elsewhere in the budget. These new initiatives are in addition to the program's responsibility to maintain and construct facilities/tactical infrastructure associated with program base.

3. Project Schedule

5. Cost Estimate Detail and Changes
(Dollars in Thousands)

Detailed cost estimates for Tactical Infrastructure, Minor Construction and Repairs and Lease Acquisition Base are developed once funding has been obtained and projects have been prioritized. For Major Construction, a typical breakout by phase is below:

Major Construction <i>(Detailed Breakdown of Project phases)</i>	Estimate
Planning, Environmental, Site Acquisition (6%)	\$ 2,743
Design (6%)	\$ 2,743
Site Improvement/Utilities (10%)	\$ 4,572
Buildings (35%)	\$ 16,002
Auxiliary Costs - cabling, furniture, equipment, security (5%)	\$ 2,286
Construction Management (4%)	\$ 1,829
Project Management (2%)	\$ 914
Contractors General Conditions and Profit (23%)	\$ 10,515
Escalation to mid point of construction (4%)	\$ 1,829
Contingencies: Construction Phase (5%)	\$ 2,286
Project Total:	\$ 45,719

6. Method of Performance

Facility and Tactical Infrastructure construction requirements are executed through the Architect-Engineer Resource Center (AERC) of the US Army Corps of Engineers. Through a Memorandum of Agreement, the AERC provides CBP consolidated program management for real estate planning and acquisition, planning and programming, environmental protection, design and cost engineering, construction and warranty enforcement and integrated occupancy services. On many tactical infrastructure projects, National Guard units and the Department of Defense Joint Task Force North perform a portion of the labor. By leveraging their ability to deploy tactical infrastructure required by CBP, significant labor savings are experienced because the Joint Task Force uses the projects as training, therefore the labor costs to CBP are zero.

For facilities and construction projects, the schedule and funding are tracked within the current CBP SAP ERP system. The SAP system includes modules that store specific information on each asset. That information is automatically linked to key information systems and includes modules that cover all aspects of the assets. The real property profile performance data can be used to produce financial, procurement, and real property indices for measuring the performance of the assets. Projects In Progress (facilities and tactical infrastructure) are tracked and reported on a monthly basis by Project Managers in the field. The tracking consists of monitoring the project delivery for construction and leasing through industry standards, including tracking each specific project's schedule, scope, and budget.

CBP Construction-20

The major performance indices include:

1. Facility Condition - Condition surveys are performed on a periodic basis to ascertain the true condition of the asset. A Strategic Resource Assessment will be the primary means by which this information will be generated in the future.
2. Facility Utilization - These indices tracks the square footage of space and the number of FTE's assigned.
3. Operating Costs - These indices tracks the cleaning / janitorial, maintenance and utility costs at the asset level.
4. Mission Dependency - The primary categories include: Mission Critical, Mission Dependent Not Critical, and Non Mission Dependent.
5. Energy Consumption - As part of the Operating Costs Indices, energy consumption and conservation measures are tracked separately.
6. National Historical Preservation Assets - Real Property Assets that could be eligible for the National Historical Preservation List are tracked.
7. Miles of Border Under Operational Control - Evaluate on an annual basis the number of miles under operational control, using the definition of threats and measurements of control developed by OBP Facilities and Operations. Specific criteria and methodology has been developed by OBP and provided to the Sectors, as part of Operations Planning and Analysis. Annual reports will be provided.

Mission Statement

Provide the facilities and tactical infrastructure U. S. Customs and Border Protection needs to perform its enforcement and trade facilitation missions.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Transportation of things	\$ 170	\$ 158	\$ 184	\$ 26

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidents to the transportation of things. The 2006-2007 change reflects minor change in estimated amounts due to different project mixes, \$26,000.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Communication, utilities, and misc. charges	\$ 85	\$ 79	\$ 92	\$ 13

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility service. The 2006-2007 change reflects minor change in estimated amounts due to different project mixes, \$13,000.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Other services	\$ 69,293	\$ 73,922	\$ 69,848	\$ (4,074)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The 2006-2007 change reflects non-recurring costs -\$4,074,000 associated with FY 2006 initiatives.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Operations & maintenance of facilities	\$ 2,975	\$ 3,168	\$ 3,200	\$ 32

Operations and maintenance includes costs for operation, maintenance, and minor repair of facilities, when done by contract with the private sector or another Federal Government account. The 2006-2007 change reflects minor change in estimated amounts due to different project mixes, \$32,000.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Equipment	\$ 4,420	\$ 8,833	\$ 6,253	\$ (2,580)

Equipment includes all costs for the purchases of personal property of a durable nature or the installation of equipment when performed under contract. The 2006-2007 change reflects non-recurring costs -\$2,580,000 associated with FY 2006 initiatives.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Land and Structures	\$ 133,174	\$ 211,736	\$ 176,377	\$ (35,361)

Purchase and improvement (additions, alterations, and modifications) of land and structures. The 2006-2007 change reflects non-recurring costs -\$35,359,000 associated with FY 2006 initiatives.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

U.S. Customs and Border Protection

Air and Marine Interdiction, Operation, Maintenance, and Procurement

I. Appropriation Overview

A. Mission Statement:

Customs and Border Protection (CBP) Air is responsible for the protection of the people and critical infrastructure of the United States. CBP Air identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. CBP Air has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, CBP Air has established a presence along the Northern Border. CBP Air has a staff of over 1,200 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangers. With the transfer of the Unmanned Aerial Vehicles (UAVs) and Border Patrol assets, U. S. Customs and Border Protection (CBP) will achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

B. Budget Activities:

National Air Missions and Operations - Oversees the daily operations of the Coastal field offices and further coordinates enforcement requirements that transcend the boundaries of individual field offices.

P-3 and National Security Missions -

Responsible for those functions at our Center locations that includes the Air and Marine Operations Center, Riverside, CA, the P3 Surveillance Support Branches in Corpus Christi, TX, and Jacksonville, FL, and the National Airspace Security Operations Center, and the Caribbean Air and Marine Operations Center.

Air and Marine Operations Center (AMOC) - The AMOC is located in Riverside, CA and provides CBP Air a 7X24 coordination and communications facility. In addition to fusing 250 Department of Defense (DoD) and Federal Aviation Administration (FAA) radars, the AMOC provides a common operating picture for air domain awareness. The AMOC coordinates their interdiction capability within CBP Air and other federal, state, and local agencies.

CBP Air & Marine-1

Asset Management - Provides oversight for our life cycle maintenance of aircraft and vessels as well as our procurement function. Presently in the procurement stage are three Dash 8 Multi-role Patrol Aircraft, two medium lift helicopters, two light enforcement helicopters, and one multi-role enforcement aircraft. Asset Management oversees the National Marine Center, St. Augustine, FL, vessel maintenance program.

Resource Management – The major administration effort of the headquarters element that encompasses the human resources and budget areas.

CBP Air and Marine Safety, Training and Standards - Oversees safety programs and centralized training within the Oklahoma City National Aviation Center, OK, and El Paso Flight Operations center, El Paso, TX, which provide advance aviation skills training, tactical training, land and water survival courses, and aircrew standardization and crew coordination. AAL&M also oversees the National Marine Center, St. Augustine, FL, which provides vessel standardization and training for the marine program.

C. Budget Request Summary:

The Air and Marine Interdiction, Operations, Maintenance, and Procurement requests \$337,699,000 for FY 2007 Request. The total adjustments-to-base is a decrease of \$58,530,000. There are no program increases.

** In FY 2005 Unmanned aerial vehicles were funded in the Salaries and Expense Appropriation.

CBP Air & Marine-3

III. Current Services Program Description by PPA

Department of Homeland Security
U. S. Customs and Border Protection
Air and Marine Interdiction, Operations, Maintenance, and Procurement
Program Performance Justification
(Dollars in thousands)

PPA: OPERATIONS AND MAINTENANCE

	Perm	
	Pos	FTE
		Amount
2005 Actual	...	\$196,535
2006 Enacted	...	260,319
2007 Adjustment to Base	...	5,647
2007 Current Services	...	265,966
2007 Program Changes
2007 Request	...	265,966
Total Change 2006-2007	...	5,647

CBP requests \$266 million for this activity. This is an increase of \$5.6 million over FY 2006. Adjustments to base reflect \$5.6 million for non-pay inflation and other technical adjustments.

Current Services Program Description:

CBP Air secures the borders against terrorists, acts of terrorism, drug smuggling and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. CBP Air utilizes the "system of systems" approach to tie various informational and operational elements together in a law enforcement environment. This established and proven model maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP Air partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders, source, transit and arrival zone operations, interior law enforcement support and support to other agencies. Truly crosscutting within the Department and the Federal government as a whole, the unique capabilities of CBP Air in bringing air and marine law enforcement expertise to bear through the system of systems

CBP Air & Marine-4

approach serves both as a stand-alone entity and as a force multiplier. In fulfilling the priority mission of CBP to protect the borders, our geographical disposition is focused along the southern tier with recent expansion to the northern border of the United States.

CBP Air's priority mission in FY 2007 is to continue protecting the American people and critical infrastructure by using an integrated and coordinated air and marine force of over 1,200 pilots, fixed wing and rotary helicopters, vessels, P-3 surveillance aircraft, and surveillance equipment, to detect, interdict and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States.

The integration of the two air programs produced a fleet of 253 fixed and rotary winged aircraft. In FY 2007 CBP will use base funding to purchase up to 30 fully equipped helicopters to assist in CBP's border enforcement mission. This is the second installment in CBP's efforts to recapitalize the border enforcement helicopter fleet.

PPA: UNMANNED AERIAL VEHICLES

	Perm		
	Pos	FTE	Amount
2005 Actual
2006 Enacted	10,180
2007 Adjustment to Base	173
2007 Current Services	10,353
2007 Program Changes
2007 Request	10,353
Total Change 2006-2007	173

CBP requests \$10.4 million for this activity. This is an increase of \$0.2 million over FY 2006. Adjustments to base reflect \$0.2 million for non-pay inflation and other technical adjustments.

Current Services Program Description:

UAV's will continue to be utilized in securing the border of the U.S. by providing operational support primarily along the southwest border along with targeted support on the northern border. CBP was the first Federal law enforcement agency to fly UAVs on a sustained basis, outside of controlled airspace, within the United States. In FY 2005, the first UAV was purchased. The FY 2006 budget includes funding for a second UAV and it is anticipated that the UAV acquisitions will continue into FY 2007.

Since the start of operations in 2004, UAVs have been instrumental in the apprehension of undocumented aliens, the seizure of drugs, and the recovery of stolen vehicles. UAVs have proven effective in locating subjects during the hours of darkness and providing a situational awareness and officer safety capability that is unparalleled.

CBP Air & Marine-5

PPA: PROCUREMENT

	Perm		Amount
	Pos	FTE	
2005 Actual	\$ 61,000
2006 Enacted	125,730
2007 Adjustment to Base	(64,350)
2007 Current Services	61,380
2007 Program Changes
2007 Request	61,380
Total Change 2006-2007	(64,350)

CBP requests \$61.4 million for this activity. This is an decrease of \$64.4 million below FY 2006. Adjustments to base reflect \$66.5 million of non-recurring costs associated with FY 2006 initiatives, an increase of \$2.1 million for non-pay inflation and other technical adjustments.

Current Services Program Description:

CBP Air secures the borders against terrorists, acts of terrorism, drug smuggling and other illegal activity by operating air and marine branches at strategic locations along the borders. Multi-mission aircraft with advanced sensors and communications equipment provide powerful interdiction and mobility capabilities directly in support of detecting, identifying and interdicting suspect conveyances, and apprehending suspect terrorists and smugglers. CBP Air utilizes the "system of systems" approach to tie various informational and operational elements together in a law enforcement environment. This established and proven model maximizes the capabilities of air and marine assets through a cohesive joint air operations model for centralized command and control and a responsive and integrated control system for decentralized execution.

CBP Air partners with numerous stakeholders in performing its missions throughout the continental United States and the Western Hemisphere. This includes domestic operations at the borders, source, transit and arrival zone operations, interior law enforcement support and support to other agencies. Truly crosscutting within the Department and the Federal government as a whole, the unique capabilities of CBP Air in bringing air and marine law enforcement expertise to bear through the system of systems approach serves both as a stand-alone entity and as a force multiplier. In fulfilling the priority mission of CBP to protect the borders, our geographical disposition is focused along the southern tier with recent expansion to the northern border of the United States.

The FY 2006 budget supports the acquisition of additional air assets, improvements in air search capabilities, improvements in aircraft supportability, and the establishment of a third CBP Air Branch along the northern border. New acquisitions will include additional covert surveillance aircraft, replacement helicopters for obsolete and costly single-engine assets, and unmanned aerial vehicles (UAVs), totaling over \$44 million. New multi-mode

CBP Air & Marine-6

radars will be procured for CBP P-3 long range tracker aircraft and efforts will begin to extend the service life of the P-3 fleet, with over \$30 million allocated for both activities. CBP Air will continue the development of northern border capabilities with the establishment of a branch at Great Falls, Montana, with about \$18 million allocated for personnel, facilities, air assets, support equipment, and services. Finally, about \$2 million is planned to be spent to begin work on a branch in North Dakota.

CBP Air's priority mission in FY 2007 is to continue protecting the American people and critical infrastructure by using an integrated and coordinated air and marine force of over 1,200 pilots, fixed wing and rotary helicopters, vessels, P-3 surveillance aircraft, and surveillance equipment, to detect, interdict and prevent acts of terrorism arising from unlawful movement of people and goods across the borders of the United States.

CBP Air Aircraft Replacement and Recapitalization Program

1. Project Description, Justification and Scope

Customs and Border Protection (CBP) Air protects the Nation's borders and the American public from the drug and terrorist smuggling threats with an integrated and coordinated air and marine interdiction force. To improve fleet efficiency and effectiveness of the rotary-wing fleet, CBP Air has begun replacing its aged fleet of Vietnam-era helicopters with new commercially available Federal Aviation Administration (FAA) type certified aircraft. Commercially available aircraft reduce procurement time and increase availability, ensure manufacturer and vendor commercial-off-the-shelf support, and reduce research and development cost and time. Acquisition of new aircraft and sensor technology will improve operational effectiveness of interdiction operations along the borders and in the transit zone. State-of-the-art sensor technology

CBP Air & Marine-14

will also provide investigative support to Federal, state and local law enforcement officers.

Medium lift helicopters (MLH) carry tactical teams to hotspots of illegal activity, support search and rescue operations, and allow the deployment of agents and resources to remote locations along the Nation's borders. The Black Hawk UH-60A (MLH), on loan from the U.S. Army, is well suited for overland operations due to its range, ruggedness and speed but it is not well suited to counter the maritime smuggling threat because it lacks the necessary equipment for nighttime over-water interdiction operations. UH-1H helicopters are also well suited for overland operations but they too are not well suited for mountainous or maritime patrol operations. High operating costs and a limited number of airframes have adversely impacted the capability of the current fleet of UH-60A and UH-1H helicopters to meet all of the CBP mission requirements. New FAA- certified multi-engine MLHs would improve mission effectiveness and operational availability and versatility.

Light single-engine enforcement helicopters support law enforcement operations that detect and interdict illegal aliens, terrorists and means of terrorism, drugs, and other contraband. A majority of that fleet will no longer be serviceable within the next 5 years. Each year more of the annual operating costs are being expended on upkeep of an aging and obsolete fleet. In addition to the decreasing return on investment associated with operating an aged fleet of aircraft, there is the negative impact on mission accomplishment. This recapitalization program would reverse those trends by deploying replacement assets for border security missions. Moreover, replacement airframes would be less expensive to maintain because they are supported by commercial sector resources and have far less down time per airframe. New helicopters would not only significantly enhance mission effectiveness; their drastically reduced operating costs would "amortize" the investment in a relatively short time.

Light enforcement helicopters (LEH) carry tactical teams to hotspots of illegal activity, support search and rescue operations, and allow the deployment of agents and resources to remote locations along the Nation's borders. They are also optimal aerial surveillance platforms in metropolitan areas because their vertical lift capability and maneuverability enable operations from off-airport sites and in close proximity to congested airports. Electro-optical/infrared sensors and video downlink provide intelligence that enhances covert surveillance operations and improves officer safety during high-risk operations. Video recorders document suspect activities for evidentiary use.

Light observation helicopters (LOH) are used to conduct daylight patrol and surveillance missions along the borders (sign cutting) providing real time intelligence and detection to agents on the ground. The LOH is the optimal platform for this mission because it can operate within close proximity to the ground without disturbing tracks and other telltale activity of human presence.

CBP Air & Marine-15

The LOH fleet is critically deficient in the following areas:

1. The light enforcement helicopters (OH-6s) currently in the fleet are extremely old and in need of replacement. The average age of the Vietnam era OH-6 aircraft is 37 years old. The published useful flight hour life of the OH-6 is 8,000 flight hours; however, more than 66% of the aircraft have exceeded the useful life standard and a few are close to 16,000 flight hours. The age of the aircraft poses a significant safety concern to the pilots and ground agents who are riding in them during mission performance. Structural cracks have recently been discovered in several of the airframes, causing additional safety concerns and, in some cases, rendering them unusable. Because of the extreme age of the aircraft, manufacturers are no longer making replacement parts and several parts, such as the rotor hub sub-assembly, can no longer be refurbished or purchased new or used. As these parts wear out the aircraft become unusable and the fleet will be reduced and the mission severely impacted. Due to the CBP Air's effective maintenance and parts program, they have been able to keep many of the aircraft flying well beyond the industry norm. In fact, CBP Air has the largest fleet in the world of OH-6 aircraft because of their maintenance system. However, since some of the parts are no longer available, no matter how efficient and effective the maintenance program, the LOH fleet and mission will be severely impacted. An additional effect of the age of the OH-6s is the downtime required for maintenance. Because of the age of the airframes and the technology used in the aircraft, their availability is greatly reduced due to scheduled and unscheduled maintenance. The cost of maintenance is also rising with the age of the aircraft and the time spent in the maintenance hanger. Over the past 5 years, the LOH fleet has been unavailable due to maintenance related issues (i.e., non-weather related) for an average of 30% of the time.
2. The capabilities of the current CBP Air light helicopter fleet are inadequate to perform all of the legacy and expanding missions, such as expansion along the Northern Border since 9/11. Aircraft from Branches along the southern tier, which were transferred to support Northern Border requirements, have created a drain of manpower and equipment. As more Sectors go to 24-hour operations, additional aircraft will be required to provide adequate air support. The number of hours flown by the CBP Air operations has also increased in recent years - putting a strain on the fleet. This investment would improve operational efficiencies along both borders and mitigate the adverse impact on other law enforcement missions.

What assumptions are made about this investment and why?

- CBP Air activities and field organizations will continue to operate in the same environments and conditions as current operations.
- Border security operations will be expanded along the Southern and Northern Borders. The current terrorist threat to homeland security is expected to continue and potentially escalate in the future as terrorist groups become more active and attempts can be made to exploit vulnerabilities and threaten key government personnel and the public.

CBP Air & Marine-16

- CBP Air performs mission requirements within the constrictions of diplomatic and environmental laws and regulations.

2. Significant Changes

CBP Air will use \$35.2M from base O&M to accelerate this project. An additional \$26.2M from Northern Border Initiative base funding will augment this amount for a total of \$61.4M.

3. Project Schedule

1. Program Approval Sep 17, 2004
2. Contract Awarded Sep 29, 2004
3. Acquisition Strategy for light single engine helicopter began: Oct 1, 2004
4. Acquisition of 10-12 LOH begins: Oct 1, 2005 - Sep 30, 2006

Completion date: OMB-approved baseline: Sep 30, 2012

Estimated completion date: Sep 30, 2012

4. Schedule of Project Funding

(Dollars in Thousands)

	Prior	FY 2005	FY 2006	FY 2007	Total
Appropriation	0	0	20,000	37,200	57,200
Obligation (actual and planned)	0	0	20,000	37,200	57,200
Expenditure (actual and planned)	0				
Break down of project related expenditures:					
Acquisition			20,000	35,200	55,200
Operations and Maintenance				2,000	2,000
Other Costs:					
Total Project Expenditures			20,000	37,200	57,200

6. Method of Performance

1. Is there a project (investment) manager assigned to the investment?

Yes

If so, what is his/her name?

Charles Bourquardez

2. Is there a contracting officer assigned to the investment?

Yes

If so, what is his/her name?

Diane Sahakian

3. Is there an Integrated Project Team?

Yes

If so, list the skill set represented.

The IPT is comprised of individuals from the Office of CBP Air, Office of Finance, Office of Information and Technology, Technology Systems Program Office (TSPO), Office of Chief Counsel and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.

4. Is there a sponsor/owner for this investment?

Yes

If so, identify the sponsor/process owner by name and title and provide contact information.

Michael C. Kostelnik, Assistant Commissioner, Office of CBP Air

CBP Air Multi-role Patrol Aircraft

2. Project Description, Justification and Scope

Customs and Border Protection (CBP) Air protects the Nation's borders and the American public from the drug and terrorist smuggling threats with an integrated and coordinated air force. To improve fleet efficiency and effectiveness, CBP Air has begun modernizing its fleet by acquiring commercially available FAA certified multi-mission aircraft such as the multi-role patrol aircraft (MPA). The MPA will be equipped with maritime radar, electro-optical/infrared (EO/IR) sensors and roll-on-roll-off technology to support various CBP missions, reduce fleet requirements and improve interoperability and diversity. For example, the MPA will be configured primarily for maritime patrol and enforcement support, but the design will enable reconfiguration to transport 30 personnel and support growth for potential missions such as long-range air tracker and intelligence collection.

The projected scope of this project is to acquire 15 sensor-equipped Dash 8 MPA to improve security of the borders between the ports of entry and reduce the importation of illegal drugs and other materials that are harmful to the public or may damage the American economy. Dash 8 MPA will have the range and endurance to extend the zone of security beyond our Nation's physical borders. This extended border strategy is essential in creating smarter borders through the use of technology, bilateral partnerships with transit zone nations, targeting known maritime smuggling routes, detection and

CBP-21

monitoring of illegal maritime smuggling activities and establishing a layered defense-in-depth strategy.

The most recent Interagency Assessment of Cocaine Movement estimates that more than 600 metric tons of cocaine depart South America for U.S. markets yearly via noncommercial maritime conveyances, such as go-fast and fishing boats. That transportation network is also used to transport terrorists who have fundamental, extreme and irreconcilable disagreements with the founding concepts of the United States. MPA equipped with state-of-the-art technology such as multi-mode surveillance radar and EO/IR sensors are currently the most effective method of detecting and identifying maritime smugglers but there are very few operating and even fewer dedicated to the border security and counter-drug missions.

CBP Air operates six sensor-equipped C-12M aircraft to detect maritime targets within waters adjacent to U.S. borders. Age-related problems and outdated technology have adversely impacted safety, operational readiness and mission effectiveness. Additionally, maritime smugglers have responded to C-12M interdiction capabilities and adjusted their strategies. For example, when drug smugglers learned about the maximum effective range of the C-12M, they changed their tactics to airdrop drugs to awaiting boats beyond that range. Additionally, boats departing South America have altered their transit routes to avoid territorial waters. Those types of smuggling tactics have created mission requirements that exceed the operational capability of the C-12M. MPA with greater range, endurance and payload are required to extend the borders and effectively combat the maritime smuggling threat.

To address the maritime smuggling threat, the FY 2002 Operations and Maintenance budget of the U.S. Customs Service, (now CBP) was increased by \$35,000,000 as part of the President's Western Hemisphere Drug Elimination Act (WHDEA) initiative. Recurring WHDEA appropriations were used to acquire 3 new Dash 8 MPA to replace aging C-12M aircraft. As of January 2006, CBP Air has taken possession of one Dash 8 MPA. The remaining two are in production and on schedule. The maintenance costs of this exhibit are the total costs for the MPA program including newly acquired DASH 8 and aged C-12M aircraft.

2. Significant Changes

WHDEA appropriations have been the primary source of funding to acquire MPA, but they have not been exclusively dedicated to that project. WHDEA funding in FY 2007 will be used to support other critical recapitalization efforts. As a result, CBP Air will not acquire another MPA in fiscal year 2007, thus, creating a slip to the original schedule.

CBP-22

3. Project Schedule

12/23/98: Customs RFI for MPA was released to replace the C-12M aircraft
 4/5/2001: Subsequent RFI for MPA was released to evaluate new technologies
 4/9/2001: Customs FY 2002 President's Budget that included \$20 million for a MPA was released
 5/11/2001: Evaluation of responses to the RFI was completed
 6/1/2001: Draft requirements for proposal (RFP) commenced
 8/27/2001: MPA working group comprised of operations and maintenance personnel reviewed & revised draft RFP
 9/20/2001: Executive Acquisition Board (EAB) was established to oversee the acquisition process
 10/19/2001: Acquisition team appointed by the EAB
 11/26/2001: Acquisition team visited NAVAIR and received their acquisition strategy
 12/4/2001: Acquisition team visited USAF Comm. Aircraft Acquisition Team and received their acquisition strategy
 12/4/2001: Acquisition team visited USAF Big Safari Team and received their acquisition strategy
 12/7/2001: Acquisition team visited U.S. Army CECOM and received their acquisition strategy
 12/19/2001: A survey was distributed to all of the evaluation participants
 1/11/2002: EAB met with Rear Admiral Stillman at USCG headquarters to discuss acquisition strategies
 1/29/2002: Customs Capital Investment Review Board approved the acquisition strategy for the MPA
 2/15/2002: USAF Big Safari Team submitted a draft memorandum of agreement (MOA) to Customs for review and comment
 2/25/2002: NAVAIR submitted a draft MOA to Customs for review and comment
 3/06/2002: Acquisition Team submitted a recommendation for Big Safari as acquisition execution agency for MPA
 3/22/2002: Assistant Commissioner, Office of Investigations, concurred with recommendations of Acquisition Team
 5/22/2002: The FY 2002 Expenditure Plan that included the MPA was approved and funding was released
 6/21/2002: A letter of intent was drafted and forwarded to the Commissioner
 6/28/2002: The final version of the draft MOA was completed
 7/11/2002: Commissioner approved the acquisition strategy for a new MPA
 8/01/2002: Big Safari briefed the EAB on their organizational structure and acquisition strategy
 8/13/2002: MPA program manager and COTR reviewed performance specification with Big Safari
 3/24/2003: Interagency agreement (IA) executed to acquire and modify first MPA
 3/17/2004: IA executed to acquire and modify second and third MPA

CBP-23

6/10/2005: Projected delivery of first MPA
 6/30/2006: Projected delivery of second MPA
 5/31/2007: Projected delivery of third MPA
 3/31/2008: Begin acquisition of 4th MPA
 3/31/2009: Begin acquisition of 5th MPA
 3/31/2010: Begin acquisition of 6th MPA
 3/31/2011: Begin acquisition of 7th MPA
 3/31/2012: Begin acquisition of 8th MPA
 3/31/2013: Begin acquisition of 9th MPA
 3/31/2014: Begin acquisition of 10th MPA
 3/31/2015: Begin acquisition of 11th MPA
 3/31/2016: Begin acquisition of 12th MPA
 3/31/2017: Begin acquisition of 13th MPA
 3/31/2018: Begin acquisition of 14th MPA
 3/31/2019: Begin acquisition of 15th MPA

Completion date: OMB-approved baseline: Sep 30, 2019

Estimated completion date: Sep 30, 2019

4. Schedule of Project Funding

Unmanned Aerial Vehicle (UAV)

1. Project Description, Justification and Scope

The Secretary of the Department of Homeland Security, in a memorandum dated October 25, 2004, directed the establishment of an operational Unmanned Aerial Vehicle (UAV) capability along the Southern border of the U.S. in FY 2005. This is an ongoing project. However, it does not require construction initiatives, it is prepared in accordance with OMB guidance, and is incrementally funded.

In full support of the Commissioner's priorities, and at the direction of the Secretary of the Department of Homeland Security, the unmanned aerial vehicle pilot program developed an operational capability along the southern border in FY 2005. The program will continue to expand its capability in FY 2006.

Funding would be expended for the UAV service provider, and for coordination with the Federal Aviation Administration, the Department of Defense, the Federal Communications Commission, perspective airspace managers, environmental assessments, required land use agreements, travel, contract support for mission planning and execution, preparation of required documentation to include Letters of Procedure with Range Management Offices, Concept of Operations documents, a Certificate of Authorization application, daily mission summaries and reports.

CBP-28

2. Significant Changes

Changes from what was identified in the information submitted to Congress in the FY 2006 budget reflect additional requirements to support a permanent CBP UAV operational site to include Hangar, Ku Band SATCOM for beyond line of sight control (BLOS) and Government travel.

3. Project Schedule

None.

Northern Border Initiative

1. Project Description, Justification and Scope

The purpose of this project is to secure the Northern Border against terrorists, means of terrorism, illegal drugs and other illegal activity by establishing permanent CBP Air Branches at strategic locations along that border. To secure the Northern Border against terrorists, acts of terrorism, drug smuggling and other illegal activity, Customs and Border Protection is establishing CBP Air Branches at strategic locations along that border. New multi-mission aircraft equipped with electro-optical/infrared sensors, weather radar, satellite communications and video downlinks will be acquired to collect, record and transmit real-time imagery to tactical and strategic command and control centers. In a region where terrain, weather, and distance pose significant obstacles to travel between ports, air support serves as a force multiplier because it provides responsive and efficient movement of border agents and equipment. The communications, command and control infrastructure at the Air and Marine Operations Center will also be enhanced to improve connectivity and fill voids in Northern Border radar coverage.

CBP-33

The northern frontier of the United States has historically presented significant response challenges to all Federal agencies and a joint coordinated approach between CBP Air and U.S. Coast Guard (USCG) aviation assets would ensure coordinated Department of Homeland Security enforcement operations, effective command and control, and more efficient utilization of resources. This project would leverage existing USCG assets during the planning phase of this project to maximize synergy and efficiencies between those aviation forces and strengthen the DHS presence on the Northern Border. Sensor-equipped aircraft would support CBP border security mission requirements and emergency response operations in the Northern Border region. In that region where terrain, weather, and distance pose significant obstacles to movement between ports, air support serves as a force multiplier because it provides a rapid-response capability for law enforcement and emergency personnel and equipment. Coverage along the northern tier would mirror the law enforcement coverage that has been achieved along the southern tier.

In FY 2006, the Northern Border Initiative provided \$26.2M to acquire two medium lift helicopters (MLH). Since the total acquisition costs are estimated to be \$32M, the remaining funds needed to acquire the two helicopters are provided from the Western Hemisphere Drug Elimination Act (WHDEA).

The project funds do not reflect all of the required S&E dollars needed to hire and transfer skilled personnel that would operate and maintain the facilities and equipment. Northern Border Branches are funded from the CBP Air base and the shortfall has impacted Southern border security operations.

2. Significant Changes

CBP Air will use \$35.2M from base O&M to accelerate aircraft recapitalization. An additional \$26.2M from Northern Border Initiative base funding will augment this amount for a total of \$61.4M. This includes a 1% program rescission.

3. Project Schedule

12/1999: Initial concept developed for the establishment of Northern Border Air and Marine Branches
 01/2000: Request for information (RFI) developed for MLH
 12/2001: RFI developed for MEA
 03/2002: Draft concept of operations developed for Northern Border combined mobile response teams
 03/2003: Statement of work developed for the MEA
 07/2003: Subsequent RFI developed for MLH
 09/2003: Statement of work developed for the MLH
 11/2003: Interagency agreement executed to modify first MEA
 07/2004: New contract, based on previous contract, awarded for LEH
 08/2004: Commissioning of Bellingham, Washington, Air and Marine Branch; Delivery of first MEA
 09/2004: Commissioning of Plattsburgh, New York, Air and Marine Branch

CBP-34

11/2004: Projected delivery of first LEH
 01/2005: Projected delivery of second MEA
 03/2005: Projected delivery of second LEH
Completion date: OMB-approved baseline: Sep 30, 2012
Estimated completion date: Sep 30, 2012

**4. Schedule of Project Funding
 (Dollars in Thousands)**

	Prior	FY 2005	FY 2006	FY 2007	Total
Appropriation	\$54,300	\$35,828	\$48,474	\$37,092	\$175,694
Obligation (actual and planned)	\$54,300	\$35,828	\$48,474	\$37,092	\$175,694
Expenditure (actual and planned)	\$0				
Break down of project related expenditures:					
LEH	\$12,800			\$26,200	\$39,000
MLH	\$19,700	\$18,000	\$26,200		\$63,900
MEA	\$16,000	\$3,600	\$7,000		\$26,600
Acquisition/Modification	\$4,400	\$6,900	\$10,000		\$21,300
Recurring Costs		\$3,800	\$4,000	\$9,000	\$16,800
Flight Hour Costs		\$528	\$1,274	\$1,892	\$3,694
Maintenance Equipment	\$1,400	\$500			\$1,900
AMOC		\$2,400			\$2,400
Planning		\$100			\$100
Total Project Expenditures	\$54,300	\$35,828	\$48,474	\$37,092	\$175,694

6. Method of Performance

1. Is there a project (investment) manager assigned to the investment?

Yes

If so, what is his/her name?

Charles Bourquardez

2. Is there a contracting officer assigned to the investment?

Yes

If so, what is his/her name?

Susan Baptist

3. Is there an Integrated Project Team?

Yes

If so, list the skill set represented.

The IPT is comprised of individuals from the Office of CBP Air, Office of Finance, Office of Information and Technology, Technology Systems Program Office (TSPO), Office of Chief Counsel and Office of Border Patrol representing systems acquisition, project management, systems engineering, legal review and test and acceptance.

4. Is there a sponsor/owner for this investment?

Yes

If so, identify the sponsor/process owner by name and title and provide contact information.

Michael C. Kostelnik, Assistant Commissioner, Office of CBP Air

Fiscal Year	Strategic Goal(s) Supported	Existing Baseline	Planned Performance Improvement Goal	Actual Performance Improvement Results	Planned Performance Metric	Actual Performance Metric Results
2007	DHS 2.1 Prevention (Secure our border against terrorists, means of terrorism, illegal drugs and other illegal activity)	Prior fiscal years FY05-06 baseline will be established by total # of patrol hours documented for the C12 and Dash 8.	Increase monthly hours of patrol to support interdiction to 100 hrs.		Tracking of actual flight hours per plane on a monthly basis.	
2007	DHS 2.1 Prevention (Secure our border against terrorists, means of terrorism, illegal drugs and other illegal activity)	FY06 Baseline total for MLH's are 1. Currently no safety or utility boats have been received.	2 additional MLH delivered by Fall FY07. 3 safety boats, 3 utility boats.		Equipment tracking by airframe.	
2007	DHS 2.1 Prevention (Secure our border against terrorists, means of terrorism, illegal drugs and other illegal activity)	Baseline FY06 Assisted Interdiction hours TBD	Improve assisted interdiction results by 5% annually.		Review tracking log of missions by collaborative agency interdictions.

Mission Statement

CBP Air is responsible for the protection of the people and critical infrastructure of the United States. CBP Air identifies, deters, interdicts, and investigates acts of terrorism and smuggling arising from unlawful movement of people and goods into and out of the United States with an integrated and coordinated air and marine force. CBP Air has historically conducted missions along the southern borders of the United States, Mexico, South America and the Caribbean. Since September 11, 2001, CBP Air has established a presence along the Northern Border. CBP Air has a staff of over 1,200 pilots, law enforcement officers, operational support, and administrative positions. Mission critical assets consist of aircraft (including fixed wing and rotary helicopters), marine vessels, P-3 surveillance aircraft, surveillance equipment, maintenance facilities and hangars. With the transfer of the Unmanned Aerial Vehicles (UAVs) and Border Patrol assets, U. S. Customs and Border Protection (CBP) will achieve increased effectiveness and economies of scale in the operation, procurement and maintenance of CBP's assets.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Travel (OC 21)	\$ 10,698	\$ 15,372	\$ 15,240	\$ (132)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The 2006-2007 change reflects non-recurring costs - \$132,000 associated with FY 2006 initiatives.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Transportation of Things (OC 22)	\$ 955	\$ 1,000	\$ 942	\$ (58)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidents to the transportation of things. The 2006-2007 change reflects non-recurring costs - \$58,000 associated with FY 2006 initiatives.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Other Rent (OC 23.2)	\$ 11,166	\$ 14,442	\$ 14,741	\$ 299

Payments to a non-Federal source for rental of space, land, and structures. The 2006-2007 change reflects non-pay inflation \$299,000.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Other Services (OC 25.2)	\$ 52,989	\$ 177,082	\$ 153,562	\$ (23,520)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The 2006-2007 change reflects carryover from FY 2006 of -\$25,994,000 and non-pay inflation increase of \$2,474,000.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Supplies & materials (OC 26.0)	\$ 60,256	\$ 61,644	\$ 66,523	\$ 6,879

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction of manufacture, (c) used to form a minor part of equipment of property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The 2006-2007 change reflects non-pay inflation increase of \$1,110,000 and \$5,769,000 for increased fuel cost.

	2005 Actual	2006 Revised Enacted	2007 Request	2006-2007 Change
Equipment (OC 31.0)	\$ 41,695	\$ 16,773	\$ 12,958	\$ (3,815)

Equipment includes all costs for the purchases of personal property of a durable nature or the installation of equipment when performed under contract. The FY 2006-2007 change reflects non-pay inflation, \$285,000 and non-recurring costs -\$4,100,000 associated with FY 2006 initiatives.

Mission Statement

The purpose of this program is to procure, deploy, and operate a system of unmanned aerial vehicles to support the Border Patrol or other components of CBP in accomplishing its mission through augmentation of modern law enforcement techniques, intelligence gathering, and technology. The use of UAVs to monitor remote areas of our northern and southern borders would be a significant step forward in providing security in those areas.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. CUSTOMS AND BORDER PROTECTION**
Consolidated Omnibus Budget Reconciliation Act (COBRA) User Fees**I. Appropriation Overview****A. Mission Statement for COBRA:**

Customs and Border Protection user fees are authorized under Title 19 U.S.C. 58c, fees for certain customs services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent/indefinite appropriation created by the user fee statute. CBP collects customs inspection fees to cover the cost of providing customs inspections of commercial operations, including, but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

The fees are deposited in the Customs and Border Protection User Fee Account (No Year) at the U.S. Treasury. The excess of collections over inspectional overtime and preclearance costs are available without fiscal year limitation, except that \$30 million of such excess remains in a contingency fund for use in any year in which receipts are insufficient to cover the costs of providing the services described in the statute.

The COBRA statute mandates that the fee collections be used to pay for (in the order listed):

- All inspectional overtime
- Premium Pay
- Civil Service Retirement and Disability Fund (Agency Contribution)
- Excess Preclearance
- Foreign Language proficiency Awards
- Enhanced Equipment and Support

B. Budget Activities:

Not Applicable

C. Budget Request Summary:

Collections for COBRA Fees in FY 2007 are estimated at \$387.8 million, an increase of \$22.3 million over FY 2006.

^{1/} Fees estimates for FY 2006 have been updated to reflect latest annual forecast. Based on strong growth in the airline industry in recent years, a 6.3% growth over 2005 is projected, which has led to a significantly higher estimate than originally projected.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
COBRA User Fee
Program Performance Justification
(Dollars in thousands)

PPA: COBRA User Fee

	Perm. Pos.	FTE	Amount
2005 Actual	1,412	1,412	\$324,665
2006 Enacted	1,412	1,412	365,521
2007 Increase in Collections	<u>22,283</u>
2007 Current Services	1,412	1,412	387,804
2007 Program Changes
2007 Request	1,412	1,412	387,804
Total Change 2006-2007	22,293

Most of the COBRA User fees have not been raised since original authority was given in the Consolidated Omnibus Budget Reconciliation Act of 1985. The fees are set legislatively and any rate adjustments require a statutory change. This has been amended in P.L. 108-357 Section 892. This extends COBRA's authority to increase fees for up to a ten percent increase in each user fee beginning in FY 2006.

The majority of funds for COBRA fees come from air passenger fees. For FY 2007, the COBRA collection increase reflects the 5.2% expected air passenger growth rate by the International Air Transport Association (IATA).

CURRENT SERVICES PROGRAM DESCRIPTION:

The components of the COBRA User fee account are: international air and sea passenger, commercial trucks, loaded rail cars, commercial vessels, private aircraft and vessels, dutiable mail, customs broker permits, barges/bulk carriers and cruise vessel passenger fees.

Mission Statement

Customs user fees are authorized under Title 19 U.S.C. 58 c, fees for certain Customs Services. The fees were created by the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). COBRA fees are made available through permanent/ indefinite appropriation created by the user fee statute. CBP collects customs inspection fees to cover the cost of providing customs inspections of commercial operations, including but not limited to, all costs associated with commercial passenger, vessel, vehicle, aircraft, and cargo processing.

(Dollars in Thousands)

Summary Justification and Explanation of Changes

Based on International Air Transport Association (IATA) and Federal Aviation Administration's (FAA) annualized growth rate for FY 2005 through FY 2014, CBP anticipates a 6.2% increase in international passengers. This will result in an increase of \$22,284,000 in CBP's share of international fees collected in FY 2007. The breakdown of the increase in fee by object class follows:

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Salaries and Benefits	\$ 297,938	\$ 313,290	\$ 332,387	\$ 19,097

Salaries and Benefits include costs for 1,412 FTEs.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Travel	\$ 1,512	\$ 5,644	\$ 5,988	\$ 344

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal Travel regulations.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Transportation of Things	\$ 259	\$ 251	\$ 286	\$ 15

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Other Rent	\$ 2,127	\$ 3,072	\$ 3,280	\$ 188

Other rent includes all payments to a non-Federal source for rental space, land and structures.

	2006 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Communications, Utilities, and miscellaneous	\$ 4,846	\$ 9,846	\$ 10,446	\$ 601
Communication, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.				
Printing	\$ -	\$ 181	\$ 192	\$ 11
Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities				
Advisory and Assistance Services	\$ 1,876	\$ -	\$ -	\$ -
Advisory and assistance services include services acquired by contract from non-Federal sources (the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.				
Other Services	\$ 9,318	\$ 28,069	\$ 29,769	\$ 1,710
Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25.				
Purchase from Government Accounts	\$ 1,992	\$ -	\$ -	\$ -
Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified				
Operation and maintenance of facilities	\$ 4	\$ -	\$ -	\$ -
Operation and maintenance of facilities includes all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal entity				
Operation & maintenance of equipment	\$ 3,136	\$ -	\$ -	\$ -

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. CUSTOMS AND BORDER PROTECTION**
Immigration User Fees (IUF)**I. Appropriation Overview****A. Mission Statement for Immigration User Fees:**

The Department of Justice Appropriation Act of 1987 (P.L. 99-591) authorized the collection of user fees for processing commercial air and sea passengers. This law codified as 8 U.S.C. 1356(h) established the two fees to generate revenues that would reimburse, "the appropriation for expenses incurred by the Attorney General in providing immigration inspection and pre-inspection services for commercial aircraft or vessels."

B. Budget Activities:

Not Applicable

C. Budget Request Summary:

Collections for IUF in FY 2007 are estimated at \$529.3 million, an increase of \$26.2 million over FY 2006.

II. Summary of FY 2007 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security
U.S. Customs and Border Protection

1/ Fee estimates for FY 2006 have been updated to reflect latest annual forecast. Based on strong growth in the airline industry in recent years, a 6.3% growth over 2005 was projected, which has led to a significantly higher projection than originally estimated.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Customs and Border Protection
Immigration User Fee
Program Performance Justification
(Dollars in thousands)

PPA: Immigration User Fee

	Perm.		Amount
	Pos.	FTE	
2005 Actual	4,058	4,058	\$478,997
2006 Enacted	4,058	4,058	503,137
2007 Increase in Collections	26,163
2007 Current Services	4,058	4,058	\$529,300
2007 Program Changes
2007 Request	4,058	4,058	\$529,300
Total Change 2006-2007	26,163

CBP estimates \$529.3 million in fees. This is an increase of \$26.2 million over FY 2006 due to CBP's share of an anticipated fee growth. CBP's formula share of total fees is 83 percent, or \$529.3 million in 2007. U.S. Immigration and Customs Enforcement includes the remainder of the projected increase (i.e., \$8M) within its request.

The total Immigration User Fee level anticipated for FY 2007 is \$637.3 million. Based on International Air Transport Association (IATA) and Federal Aviation Administration's (FAA) growth rates for FY 2007 of 5.2% for international passengers, additional fees are estimated to total \$34 million in FY 2007.

CURRENT SERVICES PROGRAM DESCRIPTION:

These funds will be used for the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry, and the repair, maintenance, and construction of border facilities.

As authorized by law, funds from the immigration user fees are used by CBP and ICE to cover the costs of immigration inspection services. Specifically, the fees cover the costs of immigration personnel, the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry, and the repair, maintenance, construction of border facilities, and detention and removal services.

U.S. CUSTOMS AND BORDER PROTECTION
Land Border Inspection Fee

I. Appropriation Overview**A. Mission Statement for Land Border Inspection Fee:**

The Department of Justice Appropriation Act of 1990 (P.L. 101-515), as codified as 8 U.S.C. 1356(q), authorizes the fees to recover costs incurred in the following categories involving the operation of various pilot programs:

- Overtime inspection services;
- Expansion, operation and maintenance of information technology systems for nonimmigrant control;
- The hiring of temporary and permanent inspectors;
- Minor construction costs associated with the addition of new traffic lanes;
- Detection of fraudulent travel documents; and
- Administrative expenses of account.

The following fees are deposited into the LBIF account:

- Fingerprint Fees for DCL (FD-258)
- Portpass Program Individual (I-823)
- Portpass Program Replace of Papers (I-823)
- Portpass Program Family (I-823)
- Dedicated Commuter Lane additional vehicle (DCL)
- Arrival/Departure Land Border (I-94)
- Non-Immigrant Visa Waiver (194W)
- Canadian Boat Landing Permit Individual (I-68)
- Canadian Boat Landing Permit Family (I-68)
- Replacement of Non-resident Mexican Crossing (I-190)
- NEXUS
- SENTRI
- Fast Driver Application Fee

1/ Obligations for FY 2006 Enacted do not include carryover of unobligated balances from FY 2005 in the amount of \$8.4 million.

Mission Statement

The Department of Justice Appropriation Act of 1990 (P.L. 101-515) authorized pilot programs, which would charge fees to recover expenses. The law, codified as 8 U.S.C. 1356(g), authorizes the fees to recover costs incurred in overtime inspection services; expansion, operation and maintenance of information technology systems for nonimmigrant control; the hire of temporary and permanent inspectors; minor construction costs associated with the addition of new traffic lanes; detection of fraudulent travel documents; and administrative expenses.

(Dollars in Thousands)

Summary Justification and Explanation of Changes

Based on International Air Transport Association (IATA) and Federal Aviation Administration's (FAA) annualized growth rate for FY 2007 through FY 2014, CBP anticipates a 5.2% increase in international passengers. This will result in an increase of \$4,102,000 Land Border Fees during FY 2007.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$ 31,831	\$ 23,639	\$ 27,686	\$ 4,047

Salaries and Benefits include costs for 292 FTEs.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Travel	\$ 9	\$ 6	\$ 7	\$ 1

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. CUSTOMS AND BORDER PROTECTION**
IMMIGRATION ENFORCEMENT FINES**I. Appropriation Overview****A. Mission Statement for Immigration Enforcement Fines:**

The Immigration Enforcement account was established under Section 382 of the Illegal Immigration Reform and Immigrant Responsibility Act (IIRIRA) of 1996. Previously, similar fines were collected and deposited into the Immigration User Fee account. In addition to creating this account, IIRIRA also added new types of fines, such as those fines levied against aliens for failure to depart the United States after being so ordered.

The authorized uses of this fund consist of: the identification, investigation, apprehension, detention and removal of criminal aliens; the maintenance and updating of systems to track criminal and illegal aliens on the border in areas with high apprehensions to deter illegal entry; and the repair, maintenance, and construction of border facilities.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. CUSTOMS AND BORDER PROTECTION**
Animal & Plant Health Inspection Service (APHIS) User Fee**I. Appropriation Overview****A. Mission Statement for APHIS:**

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USDA to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agriculture Quarantine and Inspection (AQI) fees, known to CBP as the APHIS user fees. The six established processing fees are for international air passenger, commercial aircraft clearance, commercial vessel, commercial truck, commercial truck decal and loaded rail car. The revenues from these fees are used to reimburse the full costs incurred in providing the inspectional activities associated with the APHIS user fees.

^{1/} Obligations for FY 2006 Enacted do not include carryover of unobligated balances from FY 2005 in the amount of \$6.8 million.

Mission Statement

Section 2509 of the Food, Agriculture, Conservation and Trade Act of 1990 (P.L. 101-624) authorized USDA to collect user fees for various services. The law codified as 21 U.S.C. 136 established seven types of Plant Protection and Quarantine (PPQ) user fees, six of which are the Agricultural Quarantine Inspection (AQI) fees, known to CBP as the APHIS user fees. The revenues from these fees are used to reimburse the full costs incurred in providing the inspectional activities associated with the APHIS user fees.

(Dollars in Thousands)

Summary Justification and Explanation of Changes

Based on the Memorandum of Understanding between CBP and Department of Agriculture, CBP anticipates an increase of \$3,167,000 in APHIS Fees during FY 2007. Breakdown of increase in fees by object class follows:

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Salaries and Benefits	\$ 175,202	\$ 171,135	\$ 173,702	\$ 2,567

Salaries and Benefits include costs for 1,722 FTE.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Travel	\$ 2,050	\$ 2,002	\$ 2,032	\$ 30

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal Travel regulations.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Transportation of things	\$ 21	\$ 21	\$ 21	\$ -

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
GSA Rent	\$ 9,114	\$ 8,902	\$ 9,036	\$ 134

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Other Rent	\$ 103	\$ 100	\$ 102	2

Other rent includes all payments to a non-Federal source for rented space, land, and structures.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Communication, Utilities, and misc charges	\$ 1,916	\$ 1,872	\$ 1,900	28

Communication, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2005 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Other Services	\$ 15,514	\$ 15,154	\$ 15,381	227

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object 25.

	2006 Actual	2006 Enacted	2007 Request	2006 to 2007 Change
Relocation Storage	\$ 333	\$ 325	\$ 330	\$

	2005 Actual	FY 2006 Enacted	FY 2007 Request	2006 to 2007 Change
Supplies & materials	\$ 1,823	\$ 1,790	\$ 1,807	27

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2006 Actual	FY 2006 Enacted	FY 2007 Request	2006 to 2007 Change
Equipment	\$ 10,083	\$ 9,829	\$ 9,976	147

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. CUSTOMS AND BORDER PROTECTION**
SMALL AIRPORT USER FEE**I. Appropriation Overview****A. Mission Statement for Small Airport User Fee:**

Small Airport Facilities authorized under Title 19 U.S.C. 58b and administered under Title 19 U.S.C. 58c(b)(9)(A)(i)

The User Fee Airports program authorizes inspection services to be provided to participating small airports on a fully reimbursable basis. The fees charged under this program are set forth in a Memorandum of Agreement between the small airport facility and the agency, and may be adjusted annually as costs and requirements change.

B. Budget Activities:**C. Budget Request Summary:**

Collections for Small Airport User Fees in FY 2007 are estimated at \$6.2 million, an increase of \$182,000 over FY 2006.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. CUSTOMS AND BORDER PROTECTION**
PUERTO RICO TRUST FUND**I. Appropriation Overview****A. Mission Statement for the Puerto Rico Trust Fund:****Duties and Taxes Related to Puerto Rico authorized under Title 48 U.S.C. 740**

The duties and taxes collected in Puerto Rico are paid into the treasury of Puerto Rico to be expended as required by law for the government. CBP oversees the use of these funds and, in cooperation with U.S. Immigration and Customs Enforcement (ICE), has entered into an agreement with the Commonwealth of Puerto Rico for the purposes of enhancing the enforcement of United States laws. Criminal elements have increasingly focused upon Puerto Rico as a port of entry to the United States utilizing this as a gateway to illegally introduce narcotics into the mainland of the United States.

A. Mission and Description of U.S. Customs and Border Protection

Homeland security is Custom and Border Protection’s (CBP) priority mission. Most importantly, that means preventing terrorists and terrorist weapons from entering the United States. An important aspect of this priority mission involves improving security at our borders and ports of entry, but it also means extending our zone of security beyond our physical borders. This extended border strategy is essential to creating smart borders and a layered defense-in-depth strategy.

CBP also continues to perform its traditional missions. These include apprehending individuals attempting to enter the U.S. illegally, stemming the flow of illegal drugs and other contraband, protecting our agricultural and economic interests from harmful pests and diseases, regulating and facilitating international trade, collecting import duties, and enforcing U.S. trade laws.

CBP carries out its primary homeland security mission and its traditional missions without restricting the flow of legitimate trade and travel so important to our nation’s economy. CBP has found that by using advance information, risk management and technology, and by partnering with other nations and private industry, these missions need not be mutually exclusive.

CBP’s primary field occupations include CBP officers, Border Patrol agents, pilots, marine officers, import and entry specialists, and agricultural specialists. Its field organization is focused around 20 Border Patrol Sectors with 34 permanent border checkpoints and 67 tactical checkpoints between the ports of entry, 142 stations and substations, 20 Field Operations Offices and 322 ports of entry. Field personnel use a mix of air and marine assets, non-intrusive technology such as large-scale X-rays and radiation portal monitors, targeting systems, and automation to ensure the identification and apprehension of high-risk travelers and trade and the facilitation of legitimate traffic.

CBP-1

B. Major Activities and Key Strategic Issues

CBP uses the resources appropriated by Congress to achieve its strategic goals and priorities. During the development of these goals and priorities, careful consideration has been given to the National Strategy for Homeland Security, The Presidential Directive on National Security, the National Drug Control Strategy, Executive Orders, the Department of Homeland Security (DHS) Strategic Plan, and the CBP 2005-2010 Strategic Plan to ensure alignment and mutual support. CBP's investments also reflect the goals and objectives of programmatic plans such as the National Border Patrol Strategy and the Customs-Trade Partnership Against Terrorism (C-TPAT) Strategic Plan. Finally, the results of work done under the President's Management Agenda (PMA) and of evaluations conducted by the Government Accountability Office (GAO), and the Office of the Inspector General and using Performance Assessment Rating Tool (PART) processes have been used to prioritize effort and target capital investments.

Major Activities

To ensure that CBP is focused on carrying out its vital mission, CBP has developed the FY 2005-2010 Strategic Plan based on the priorities and guidance outlined in the various related National Strategies, Strategic Plans and Executive Orders. The CBP Strategic Plan outlines six goals:

1. Preventing Terrorism At Ports of Entry
2. Preventing Terrorism Between Ports of Entry
3. Unifying As One Border Agency
4. Facilitating Legitimate Trade and Travel
5. Protecting America and Its Citizens
6. Modernizing and Managing

CBP developed nine CBP Homeland Security Priorities to focus implementation of these six strategic goals during FY 2006 – FY 2007. Resources appropriated for FY 2006 and requested in FY 2007 President's Budget will be used to fund CBP programs and activities consistent with CBP's six strategic goals and the following nine priorities, which will collectively drive CBP's strategic direction in FY 2006 and FY 2007:

1. Gain operational control over the U.S. land borders between the ports of entry – Using the most effective mix of personnel and technology, aided by strategically placed infrastructure, CBP will markedly increase its detection and apprehension rate between the U.S ports of entry. Key to these efforts, which are essential to preventing terrorist penetration of our borders, will be strong training and recruitment programs for both operational and mission essential support personnel; well-managed technology; facilities and infrastructure deployment; and solid partnerships with other government agencies. Also essential is the integration of air and marine programs to better control the airspace above our land borders, improve marine operations adjacent to our land borders, and enhance our rapid response capabilities.
2. Prevent the entry of terrorists at the ports of entry – By improving our Automated Targeting System (ATS) for passengers focused on terrorist risk factors, extending the Immigration Advisory Program, leveraging pre-departure passenger information, and strengthening consolidated anti-terrorism secondary inspection, CBP will perfect its multi-layered strategy to prevent the entry of terrorists into the United States. CBP will continue to refine its use of

CBP-2

ATS-P (a passenger screening system), Intelligence Driven Special Operations (IDSOs) and alerts.

3. Strengthen supply chain security against the entry of terrorist weapons, including chemical, biological, radiological, nuclear and agriculture terrorist weapons – CBP will work with Domestic Nuclear Detection Office (DNDO), Department of Energy (DOE) and other partners to implement a comprehensive strategy to deter, detect and prevent terrorist weapons and their precursors from entering the U.S., through the deployment of detection technology, international security standards and extension of the U.S. zone of security outward. CBP will work to assure that Container Security Initiative (CSI) and C-TPAT are dynamically upgraded to reach their potential as key elements of our cargo security strategy. This will allow CBP to focus targeting, inspection and enforcement actions on high-risk cargo in the sea, land and air environments while facilitating low risk shipments and conveyances. Further, CBP will implement security technologies, such as improved container seals and the “Smart Box,” for use in the international supply chain. CBP will also use the information and processes developed as part of these programs to ensure global security and continuity of operations in our trade lanes.
4. Strengthen risk-based operational decision-making and resource allocation – CBP will enhance its current intelligence, analytical, management, communication and logistical capabilities to ensure that personnel and assets are directed to meet its priority mission and the greatest identified threats quickly and effectively. We will make certain that operations respond to current intelligence using rapid response mechanisms at and between the ports of entry. We will design planning and budgeting processes to reflect risk management principles so that resource allocation directly supports agency priorities.
5. Implement World Customs Organization Framework of Standards – CBP will take the lead in seeing that the World Customs Organization (WCO) Framework is broadly implemented throughout the world, in order to improve the security and facilitation of global trade. These efforts will include a strong capacity building program within CBP to coordinate our own activities within the U.S. and with world aid organizations, as well as with other customs administrations around the world.
6. Increase mechanisms to facilitate legitimate trade and travel – CBP will expand its “Trusted Traveler” programs such as NEXUS, Secure Electronic Network for Traveler’s Rapid Inspection (SENTRI) and Free and Secure Trade (FAST) and make processing and support of these programs more efficient through the Global Enrollment System. CBP will launch a trusted air passenger program, United States Passenger Accelerated Service System (US PASS), and enter into appropriate bilateral trusted air passenger programs with other nations, e.g., NEXUS AIR. Further, CBP will continue to refine targeting of cargo and conveyances to ensure that enforcement resources are not spent inspecting low risk trade.
7. Strengthen technology acquisition and deployment – To ensure successful deployment of new technology platforms, CBP will support strong program management offices for its major new technology programs, such as the Automated Commercial Environment (ACE), and the Secure Border Initiative (SBI), which will facilitate the integration of experts in procurement, information and technology systems, planning, measurement and oversight and operational deployment of the technology platforms. These offices are charged with coordinating with stakeholders, navigating the investment and budget processes, identifying requirements,

CBP-3

meeting testing and deployment schedules, overseeing project accountability and firmly managing contractual obligations to meet mission requirements.

8. Strengthen employee base and integrity assurance – In support of its mission and operational activities, CBP will strengthen its human capital resources. CBP will undertake initiatives to strengthen retention, recruitment and support of operational and mission support employees. In addition, CBP managers, many of whom have taken on significant new roles and responsibilities, will be supported by strengthened management training, development and staff support. And CBP will strengthen integrity among our frontline officers by undertaking proactive initiatives to identify and prevent corruption, ensuring that officers know to whom they should report concerns about corruption, and seeing that prompt action is taken in cases of corruption. CBP will also ensure adherence to key antiterrorism policies through the implementation of a robust Management Inspection Division annual plan.
9. Unification as one border agency – CBP will complete all actions needed to create “One Face at the Border,” i.e., one unified border agency in the United States. CBP will fully integrate its immigration and entry control authorities to pursue its priority mission and work to rationalize and streamline its authorities in this area. In addition, CBP will complete the integration of its air and marine assets and enhance operational efficiency and effectiveness.

Key Strategic Issues

CBP faces tremendous internal and external challenges in carrying out homeland security and traditional missions mandated by law, and in implementing the CBP strategic goals and priorities. They include:

Combating Terrorism and Crime

Criminals hold distinct advantages over the law enforcement community by using sophisticated international criminal cooperation and the use of legitimate businesses as cover. Terrorists use established smuggling and illegal immigration routes. The capability of criminals to leverage technology to conduct and hide crimes, and to leverage social concerns for privacy and justice challenges the law enforcement community. Increased enforcement efforts at the ports of entry may cause terrorists to shift the focus of criminal efforts toward identified or perceived vulnerabilities between the ports. The globalization of terrorism and crime also requires strong law enforcement partnerships with foreign partners.

Impact of Globalization

The safety of global trade is both an economic issue and a security concern. A weapon of mass destruction or weapon of mass effect, detonated at a United States port of entry, could cause a \$1 trillion disruption to the economy. Increased global trade bring more diverse product design and production methods, more stakeholders and modes of transportation, and with all of this, greater opportunities for criminals and terrorists to profit from or disrupt the U.S. economy. CBP will have difficulty effectively enforcing trade rules because of the growing world population and the corresponding purchasing power associated with growth, trade liberalization and uncertain product valuation due to cross-border production and intellectual capital. More duty-free goods will require increased oversight to ensure eligibility for decreased duty rates. To fight illegal trade practices, the government must continue inspecting for illegal imports and enforcing trade laws. Foreign governments, shippers, vendors and the trade community must be relied upon to collect and share information and to assure that supply-chain processes are secure. Increased passenger travel and

CBP-4

trade volumes also lend themselves to being efficient carriers of highly pathogenic influenza, which border management agencies must anticipate and be prepared to control.

Facilitating Travel and Trade While Ensuring Security and Safety

In 2005, 431 million people crossed into the U.S. at ports of entry, 259 million of whom are non-citizens. In addition, approximately 25.3 million rail, truck, and vessel containers were processed. CBP will continue to face the challenge of enhancing mechanisms to facilitate legitimate trade and travel to keep terrorists and their weapons out of the United States. CBP must obtain and improve the quality of advance information to target high-risk travelers and trade, in the face of continued global migration and diverse international passenger travel. The public's expectation of speedy, consistent processing and global trade needs for tailored, speedy delivery will require CBP to find more efficient ways to process passenger, conveyances and freight securely. Key in these efforts will be partnerships with Canada and Mexico, with whom CBP will pursue tightening border security while trying to reduce delays and improve relations.

Technology and Inventions

Innovative technology solutions for monitoring, inspection, information sharing, and enforcement will grow, but will also bring implementation and standardization challenges. A new electronic system for tracking cargo coming into ports will save both shippers and the United States government money, but will require investments by the trade community. Using an integrated solution of technology, supported by staffing and infrastructure, will help to secure operational control of the border. Advanced technology and a distributed, open, wireless, and mobile environment will be available to CBP, but technological advances and new products will also challenge the workforce requiring different skill sets and training.

A Unified CBP Workforce

CBP continues to respond to the challenges posed by reorganization and integration of the homeland security mission, including extension of a new culture, carrying out established priorities, and training employees. In addition, the more general challenges of the 21st Century involve growing workforce complexity, diversity, mobility, continual training, instant electronic connectivity and independence. To ensure the government can prevent and respond to threats to domestic security, federal managers must be able to maintain and upgrade the critical infrastructures needed to accomplish the CBP mission and strategic goals.

C. Resources Requested and Performance Impact

The FY 2007 funding request will allow CBP to fulfill its priority mission of preventing terrorists and terrorist weapons from entering the United States while facilitating travel and trade. Not only will this request provide CBP the opportunity to improve the security at our physical borders and ports of entry, but it will also provide additional means for extending our zone of security beyond our physical borders – so that American borders are not the first line of defense against terrorism. Furthermore, CBP will be able to continue to focus on its traditional mission of enforcing all laws of the United States, including trade, agriculture, and immigration laws at our borders. CBP will continue to reallocate resources from lower to higher priorities to meet its strategic goals and objectives.

CBP-5

Resources Requested

CBP requests a total increase of \$646.323 million in FY 2007 over the FY 2006 Revised Enacted Appropriations. This increase in funding will not only allow CBP to maintain current services level, but it will also improve its mission capability by providing additional support for important activities and programs in CBP. In addition to program funding, the FY 2007 budget increase will allow CBP to increase direct FTE from 33,737 to 35,509, including 1,137 FTE for new positions and annualization of 1,000 additional Border Patrol Agents, 258 operational/mission support personnel, and 12 CBP Officers for Container Security Initiative provided by Congress in the FY 2005 Emergency Supplemental and the FY 2006 Appropriations.

Performance Impacts

Funds for program enhancements have significant performance impact for CBP. The following is a list of programs or activities for which CBP seeks additional funding in FY 2007 and its anticipated performance impact:

- National Targeting Center – Enable CBP Officers at the National Targeting Center (NTC) to facilitate field operations and coordinate communications with other DHS subcomponents and other Department agencies to detect, deter, and mitigate threats to our homeland. Additional funding for NTC will increase the response time efficiency and eliminates the need for other agency liaisons at each of the ports of entry.
- Weapons of Mass Destruction Detection Technology Staffing – Enhance CBP's ability to detect illicit radiological materials concealed within shipments, conveyances or containerized cargo entering the United States. Using Radiation Portal Monitors (RPMs) provided by the Domestic Nuclear Detection Office (DNDO), new CBP officers will screen a larger percentage of the commercial cargo and private vehicle traffic while permitting the flow of legitimate trade and travel.
- Immigration Advisory Program/Fraudulent Document Analysis Unit – Expand the Immigration Advisory Program (IAP) to additional foreign locations enabling CBP to identify and intercept high-risk and improperly documented passengers prior to boarding flights bound for the United States. Further, CBP will be able to better remove fraudulent documents from circulation, thereby preventing them from falling into the hands of individuals who pose threats to U.S. security.
- Internal Audit/Procurement Staffing – Improve internal control/audit functions and CBP's procurement process.
- Arizona Border Control Initiative – Strategically place additional personnel, camp details, infrastructure and technologies in high traffic areas to raise the effectiveness of law enforcement operations.
- Increased Border Patrol Presence between POEs – Make significant strides towards achieving operational control of the border by strategically deploying additional Border Patrol Agents in areas of highest priority.
- Secure Border Initiative Technology – Improve surveillance technologies that enable Border Patrol Agents to better detect, locate and identify terrorists, smugglers and illegal aliens;

CBP-6

support Border Patrol Agents' ability to resolve illegal breaches of the border and events-of-interest between the Ports of Entry; and increase the Border Patrol's deterrence capabilities.

- Tactical Infrastructure Western Arizona – Prevent and deter illegal border crossings and provide a force-multiplier by enhancing agent efficiency in responding to and interdicting illegal entrants.
- San Diego Border Infrastructure System – Complete the construction of the final five miles of the San Diego Border Infrastructure System, which will close gaps in the BIS and fully allow Border Patrol to deter, detect and interdict illegal border penetrations in the San Diego urban area.

These program impacts and other performance measure data are used by CBP to assist decision makers in determining both our funding request and our budget execution plans. CBP's responsibility for securing our nation's borders is such a tremendous task that it is critical that CBP invest its resources in programs that are proven to be effective and efficient.

Program evaluations and Office of Management and Budget (OMB) Program Assessment and Rating Tool (PART) findings also play a critical role in resource investment decisions, management action and legislative proposals. CBP has completed four PART reviews: Border Patrol (FY 2005), Container Security Initiative (FY 2005), Inspection Technology (FY 2006), and Border Security, Inspections and Trade Facilitation at the Ports of Entry (FY 2007). In response to the findings of these reviews and other evaluations, CBP has undertaken significant planning efforts that include development of an overarching strategic plan that serves as a guide to the allocation of resources, formalizes performance milestones, and aligns programmatic efforts with strategic goals and priorities.

To address specific PART recommendations, CBP developed long-term performance goals and outcome and efficiency performance measures for all major programs that illustrate program investments. These goals and measures are used as in the resource allocation process to ensure support is provided to programs which produce measurable results or need additional resources to be fully effective, and redirected from less effective programs. Guided by the President's Management Agenda, PART and other evaluation results, and the DHS Future Year's Homeland Security Plan process, CBP is more tightly aligning the investment review process and budget decision-making with the CBP and DHS Strategic Plans, and insights to operations provided by performance measures.

During the review of CSI, one of the earliest PART evaluations, OMB reported that while "CBP had done an excellent job launching this program and partnering with foreign customs administrators and the program has a clear purpose and is well designed," there were few specific long-term performance measures and unclear targets and timeframes. CSI was included in this year's comprehensive PART of Border Security, Inspections and Trade Facilitation at the Ports of Entry (FY 2007), where several performance measures address CSI. In addition, CSI extensively and regularly uses performance measures to evaluate the program's success and identify programmatic issues. Since the FY 2005 PART of CSI, CSI has developed a strategic plan that includes clear goals, objectives and strategies, as well as strong performance measures. While CSI has not requested an increase in funding in the President's Budget, these factors were important in determining the overall level of resources supporting this program.

CBP-7

- In another example, during the preparation of the FY 2007 President's budget, performance impact was identified and assessed, and action was taken on PART recommendations. PART recommendations for the Border Patrol stated CBP needed to develop meaningful performance measures. Since that time, new performance measures have been developed and are used to assess programmatic issues at the entire border, replacing the previous measures that focused primarily to the southwest border. Additionally, the Border Patrol completed a Strategic Plan, which identified strategic goals and objectives, and laid the framework for development of additional performance metrics. The Border Patrol's program performance will be enhanced by the resources requested for the Arizona Border Control Initiative, Increased Border Patrol Presence, Secure Border Initiative Technology, Western Arizona Tactical Infrastructure and the San Diego Border Infrastructure System. CBP believes that these investments will raise the effectiveness of law enforcement operations, increase operational control of the border by resolving illegal breaches of the border and events-of-interest and increase the Border Patrol's deterrence capabilities; and enhance agent efficiency in responding to and interdicting illegal entrants.
- When Inspection Technology was originally PARTed, OMB reported the Inspection Technology program was unable to demonstrate results due to a lack of comprehensive, outcome-based performance measures or ambitious targets for performance goals. The majority of the performance measures for the Inspection Technology program were either "under development" or "new." There were no targets, goals, or actual data from previous years to use to measure future performance. In response to these findings, the Administration has developed useful long-term performance and efficiency measures for this program. Inspection Technology was included in this year's comprehensive PART of (FY 2007), where several performance measures address Inspection Technology. Inspection Technology programs extensively and regularly use performance measures to evaluate their successes and to identify programmatic issues. The development of these measures, their continued use, and validation during the FY 2007 PART was a favorable factor in determining whether an increased level of investment should be proposed in the FY 2007 President's Budget. The performance impact of these funds will be seen in the increased percentage of the commercial cargo and private vehicle traffic screened by CBP officers, while still permitting the flow of legitimate trade and travel.

Overall, lessons learned from previous PART evaluations have improved the management of CBP's programs, through the use of strategic goals and objectives, and linking of performance metrics to these goals. Such progress was shown in the results of the current PART evaluation on Border Security, Inspections and Trade Facilitation at the Ports of Entry, which received an "Effective" rating.

D. How CBP Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

Border Security Inspections and Trade Facilitation at POE's Long Term Performance Goal – Improve the targeting, screening, and apprehension of high-risk international cargo and travelers while providing processes to facilitate the flow of safe and legitimate trade and travel.

- 2.1 Secure our borders against terrorists, means of terrorism, illegal drugs and other illegal activity.
- 6.4 Facilitate the efficient movement of legitimate cargo and people.

CBP-8

Border Security and Control Between POE's Long Term Performance Goal – To gain operational control in areas deemed as high priority for terrorist threat potential or other national security objectives through the establishment of the Operational Requirements-Based Budgeting Program.

- 2.1 Secure our borders against terrorists, means of terrorism, illegal drugs and other illegal activity.
- 2.3 Provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities.

Automation Modernization Long Term Performance Goal – Improve the threat and enforcement information available to decision makers from legacy and newly developed systems for the enforcement of trade rules and regulations and facilitation of U.S. trade.

- 2.3 Provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities.

Air and Marine Operations Long Term Performance Goal – Deny the use of air, land and coastal waters for conducting acts of terrorism and other illegal activities against, the United States.

- 2.1 Secure our borders against terrorists, means of terrorism, illegal drugs and other illegal activity.

E. Performance Based Budget Highlights by Program

For each FYHSP program, the performance goal, performance measure/s, budget including allocation of non-programmatic overhead, and FTE are:

Program: Border Security Inspections and Trade Facilitation at Ports of Entry						
Performance Goal: Improve the targeting, screening, and apprehension of high - risk international cargo and travelers to prevent terrorist attacks, while providing processes to facilitate the flow of safe and legitimate trade and travel.						
DHS strategic objectives supported and % allocation of activities: 2.1 - 63.0%, 6.4 - 37.0%						
Measure: Air Passengers Compliant with Trade Regulations (%)	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	99%	99.2%	99.3%	99.2%	99.0%
	Actual	99%	99.2%	99.01%	N/A	N/A
Measure: Land Border Passengers Compliant with Trade Regulations (%)	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	99.8%	99.9%	99.9%	99.9%	99.9%
	Actual	99.9%	99.9%	99.9%	N/A	N/A
Measure: Advanced Passenger Information System (APIS) Data Sufficiency Rate. (Percent)	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	94%	94.2%	99.1%	99.2%	99.3%
	Actual	98%	98%	98.6%	N/A	N/A
Measure: Border Vehicle Passengers in Compliance with Agricultural Quarantine Regulations (percent compliant).	Fiscal Year	FY 2003	FY 2004	FY 2005	FY 2006	FY 2007
	Target	96%	96%	96.4%	94.6%	94.6%
	Actual	96%	96%	93.68%	N/A	N/A

iii. Status of Congressionally Requested Studies and Reports TAB C

Department of Homeland Security
U.S. Immigration and Customs Enforcement

Status of Congressionally Requested Studies, Reports, and Evaluations

1. House Report 108-541, page 33, directs ICE to conduct a review of its detention programs, and evaluate the benefits and costs associated with developing a national detention contract. The report should list current facilities and contracts with associated staffing levels, assess the option of regional facilities, and weigh benefits and costs associated with such plans. **Target response to Committee is February 24.**
2. Senate Report 108-280, page 25, directs ICE to submit a quarterly report that compares the number of deportation, exclusion, and removal orders sought and obtained by ICE. The report should be broken down by district in which the removal order was issued; by type of order; by agency issuing the order; by the number of cases in each category in which ICE has successfully removed the alien; and by the number of cases in each category in which ICE has not removed the alien. **Target response to Committee is February 24.**
3. Senate Reprogramming Approval, dated May 20, 2005, directs DHS to provide updates on the fiscal status of ICE, while the management situation within ICE is being resolved. **Target response to Committee is February 24.**
4. House Report 109-79 directs the Secretary of Homeland Security to report monthly on ICE's financial condition, with the initial report, due no later than November 1, 2005, to cover the actions taken in fiscal year 2005. **Target response to Committee is February 28.**
5. Senate Report 108-280, page 25, directs DHS to submit a quarterly report that compares the number of deportation, exclusion, and removal orders sought and obtained by ICE. The report should be broken down by district in which the removal order was issued; by type of order; by agency issuing the order; by the number of cases in each category in which ICE has successfully removed

ICE - iii

- the alien; and by the number of cases in each category in which ICE has not removed the alien. **Target response to Committee February 28.**
6. Conference Report 109-241, page 48, directs the Department to report within 30 days from the enactment of this Act on the total number of beds to be funded in fiscal year 2006, by funding source, and the fiscal year 2006 spend plan for expedited removal. Further, the Department is directed to include bedspace utilization and funding obligations in its regular immigration enforcement reporting to the Committees on Appropriations. **Target response to Committee is February 24.**
7. House Report 109-79, page 35, directs the Secretary of Homeland Security to report monthly on ICE's financial condition. **Target response to Committee is February 28.**
8. Conference Report 109-241, page 47, directs the Department to submit a plan for the expanded use of IEAs not later than December 1, 2005. House language further directs ICE to identify in their plan how their additional personnel will satisfy the immigration enforcement requirements of underserved States. **Target response to Committee is February 24.**
9. House Report 109-79, page 35, directs the Secretary of Homeland Security to report monthly on ICE's financial condition. **Target response to Committee is February 24.**
10. House Report 109-79, page 35, directs the Secretary of Homeland Security to report monthly on ICE's financial condition. **Target response to Committee is February 28.**
11. Conference Report 108-774, page 6, directs the Secretary of Homeland Security to provide an Automation Modernization Plan. None of the funds appropriated under this heading may be obligated until the Committees on Appropriation of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that: (1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7; (2) complies with the Department of Homeland Security enterprise information systems architecture; (3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government; (4) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland; and the Office of Management and Budget; and (5) is reviewed by the Government Accountability Office. **Target response to Committee is February 28.**

12. House Report 109-79, page 37, directs ICE to submit a report on the cost and schedule for co-locating personnel, broken out by each field office location. Included should be an estimate for co-locating offices within a significantly shorter period than five to seven years. **Target response to Committee is February 24.**
13. House Report 109-79, page 37, requests that ICE submit a report that provides statistical detail on basic, advanced, and specialized training from fiscal year 2003 through fiscal year 2006, to include: number and position of personnel trained, title and purpose of training, and location of training. **Target response to Committee is February 24.**
14. Conference Report 109-241, page 48, The Assistant Secretary of Immigration and Customs Enforcement is directed to provide on a quarterly basis, a report on the (1) current estimate of illegal aliens in the U.S. including absconders (those who have not appeared for immigration hearings or fled after receiving orders for deportation) and criminal aliens; (2) current estimate of foreign born aliens in the U.S. prison system, and of those, how many ICE estimates are deportable; (3) the number of aliens who are apprehended by ICE, broken down by ICE office location and specific ICE program such as the Fugitive Operations teams or Compliance Enforcement; (4) the number of aliens who are apprehended by other law enforcement agencies and delivered to ICE; (5) the number of aliens who are released on their own recognizance; (6) the number of aliens so released who fail to appear for their immigration hearings; (7) the number of bed spaces available and the number of bed spaces actually occupied; (8) the number of aliens removed; (9) number of individuals placed in alternatives to detention; (10) types of alternatives to detention used; (11) number of worksite enforcement operations and inspections conducted; (12) the number of positions and FTE dedicated to administrative enforcement; and (13) staffing, to include on-board staffing, new hires and attrition broken down by function, such as Special Agents, IEAs, and Deportation Officers. Further, the Department is directed to include bedspace utilization and funding obligations in its regular immigration enforcement reporting to the Committees on Appropriations. **Target response to Committee is February 24.**
15. Conference Report 109-241, page 48, directs ICE to report not later than February 10, 2006, on obligating these funds, as well as those appropriated in fiscal years 2004 and 2005. The report should include staffing levels in fiscal years 2003-2006, differentiated by position, as authorized in section 352 of the Trade Act of 2002, and include a five-year enforcement plan. **Target response to Committee is February 24.**
16. House Report 109-79, page 42, directs the Assistant Secretary, in consultation with the Director of the FPS, to immediately correct late payment problems and to submit to the Committee a report on actions taken. **Target response to Committee is February 24.**

ICE - v

17. Senate Report 109-83, page 35, is requested to provide a report to the Committee on lower cost alternatives to current detention services, including portable housing. **Target response to Committee is February 24**
18. Senate Report 109-83, page 36, requests the Department to report on its response to the specific recommendations of the Commission regarding detention decisions for asylees and the steps it has taken to ensure consistent application of standards for asylum and credible fear within the Department. **Target response to Committee is February 24**
19. Senate Report 109-83, page 36, The Department, in consultation with EOIR, is directed to report to the Committee on the net cost of expanding the Legal Orientation Program nationwide, and the timetable for such an expansion. **Target response to Committee is February 24**
20. Conference Report 109-241, page 33, requests DHS to assume responsibility for the joint DHS/DOJ report due by February 10, 2006, on the efforts each Department will take to reduce the absconder rate, including proposed changes to existing policies, procedures, and laws to further assist in reducing the absconder population. **Target response to Committee is February 24**
21. Senate Report 109-83, page 37, directs ICE to submit a report on the costs and need for establishing a suboffice in southeastern Utah. **Target response to Committee is February 24.**
22. Conference Report 109-241, page 48, requests ICE to submit a quarterly report to the Committee which compares the number of deportation, exclusion, and removal orders sought and obtained by ICE. The report should be broken down by district in which the removal order was issued; by type of order (deportation, exclusion, removal, expedited removal, and others); by agency issuing the order; by the number of cases in each category in which ICE has successfully removed the alien; and by the number of cases in each category in which ICE has not removed the alien. **Target response to Committee is February 28.**
23. Conference Report 109-241, page 48, directs the Department to submit quarterly reports on the fee estimates. **Target response to Committee is February 24.**
24. Senate Report 109-83, page 43, directs the Chief Financial Officer to submit a plan that outlines the steps taken to improve the management of ICE, and any further corrective actions planned to ensure program increases funded for fiscal year 2006 are executed in a timely manner. **Target response to Committee is February 24.**

25. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is March 1.**
26. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is April 1.**
27. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is May 1.**
28. Conference Report 109-241, page 48, requests ICE to submit a quarterly report to the Committee which compares the number of deportation, exclusion, and removal orders sought and obtained by ICE. The report should be broken down by district in which the removal order was issued; by type of order (deportation, exclusion, removal, expedited removal, and others); by agency issuing the order; by the number of cases in each category in which ICE has successfully removed the alien; and by the number of cases in each category in which ICE has not removed the alien. **Target response to Committee is May 10.**
29. Conference Report 109-241, page 48, directs ICE to provide on a quarterly basis, a report on the (1) current estimate of illegal aliens in the U.S. including absconders (those who have not appeared for immigration hearings or fled after receiving orders for deportation) and criminal aliens; (2) current estimate of foreign born aliens in the U.S. prison system, and of those, how many ICE estimates are deportable; (3) the number of aliens who are apprehended by ICE, broken down by ICE office location and specific ICE program such as the Fugitive Operations teams or Compliance Enforcement; (4) the number of aliens who are apprehended by other law enforcement agencies and delivered to ICE; (5) the number of aliens who are released on their own recognizance; (6) the number of aliens so released who fail to appear for their immigration hearings; (7) the number of bed spaces available and the number of bed spaces actually occupied; (8) the number of aliens removed; (9) number of individuals placed in alternatives to detention; (10) types of alternatives to detention used; (11) number of worksite enforcement operations and inspections conducted; (12) the number of positions and FTE dedicated to administrative enforcement; and (13) staffing, to include on-board staffing, new hires and attrition broken down by function, such as Special Agents, IEAs, and Deportation Officers. Further, the Department is directed to include bedspace utilization and funding obligations in its regular immigration enforcement reporting to the Committees on Appropriations. **Target response to Committee is May 10.**

30. Conference Report 109-241, page 48, directs the Department to submit quarterly reports on the fee estimates. **Target response to Committee is May 10.**
31. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is June 1.**
32. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is July 1.**
33. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is August 1.**
34. Conference Report 109-241, page 48, requests ICE to submit a quarterly report to the Committee which compares the number of deportation, exclusion, and removal orders sought and obtained by ICE. The report should be broken down by district in which the removal order was issued; by type of order (deportation, exclusion, removal, expedited removal, and others); by agency issuing the order; by the number of cases in each category in which ICE has successfully removed the alien; and by the number of cases in each category in which ICE has not removed the alien. **Target response to Committee is August 10.**
35. Conference Report 109-241, page 48, directs ICE to provide on a quarterly basis, a report on the (1) current estimate of illegal aliens in the U.S. including absconders (those who have not appeared for immigration hearings or fled after receiving orders for deportation) and criminal aliens; (2) current estimate of foreign born aliens in the U.S. prison system, and of those, how many ICE estimates are deportable; (3) the number of aliens who are apprehended by ICE, broken down by ICE office location and specific ICE program such as the Fugitive Operations teams or Compliance Enforcement; (4) the number of aliens who are apprehended by other law enforcement agencies and delivered to ICE; (5) the number of aliens who are released on their own recognizance; (6) the number of aliens so released who fail to appear for their immigration hearings; (7) the number of bed spaces available and the number of bed spaces actually occupied; (8) the number of aliens removed; (9) number of individuals placed in alternatives to detention; (10) types of alternatives to detention used; (11) number of worksite enforcement operations and inspections conducted; (12) the number of positions and FTE dedicated to administrative enforcement; and (13) staffing, to include on-board staffing, new hires and attrition broken down by function, such as Special Agents, IEAs, and Deportation Officers. Further, the Department is directed to include bedspace utilization and funding obligations in its regular immigration enforcement reporting to the Committees on Appropriations. **Target response to Committee is August 10.**

36. Conference Report 109-241, page 48, directs the Department to submit quarterly reports on the fee estimates. **Target response to Committee is August 10.**
37. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is September 1.**
38. Conference Report 109-241, page 47, directs the amounts appropriated, \$5,000,000 shall not be available for obligation until the Secretary of Homeland Security submits to the Committees on Appropriations of the Senate and the House of Representatives a national detention management plan, including the use of regional detention contracts and alternatives to detention. **No time is established.**
39. Conference Report 109-241, page 49, directs that none of the funds made available under this heading may be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that: (1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7; (2) complies with the Department of Homeland Security information systems enterprise architecture; (3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government; (4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project; (5) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland Security, and the Office of Management and Budget; and (6) is reviewed by the Government Accountability Office. **No time is established.**
40. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is October 1.**
41. House Report 109-79, page 35, directs the Secretary to report monthly on ICE's financial condition. **Target response to Committee is November 1.**
42. Conference Report 109-241, page 47, directs the Department to submit a status report not later than November 1, 2006, on the operation and impact of the increase in IEA positions. **Target response to Committee is November 1.**

43. Conference Report 109-241, page 48, requests ICE to submit a quarterly report to the Committee which compares the number of deportation, exclusion, and removal orders sought and obtained by ICE. The report should be broken down by district in which the removal order was issued; by type of order (deportation, exclusion, removal, expedited removal, and others); by agency issuing the order; by the number of cases in each category in which ICE has successfully removed the alien; and by the number of cases in each category in which ICE has not removed the alien. **Target response to Committee is November 10.**
44. Conference Report 109-241, page 48, requests the Assistant Secretary of Immigration and Customs Enforcement is directed to provide on a quarterly basis, a report on the (1) current estimate of illegal aliens in the U.S. including absconders (those who have not appeared for immigration hearings or fled after receiving orders for deportation) and criminal aliens; (2) current estimate of foreign born aliens in the U.S. prison system, and of those, how many ICE estimates are deportable; (3) the number of aliens who are apprehended by ICE, broken down by ICE office location and specific ICE program such as the Fugitive Operations teams or Compliance Enforcement; (4) the number of aliens who are apprehended by other law enforcement agencies and delivered to ICE; (5) the number of aliens who are released on their own recognizance; (6) the number of aliens so released who fail to appear for their immigration hearings; (7) the number of bed spaces available and the number of bed spaces actually occupied; (8) the number of aliens removed; (9) number of individuals placed in alternatives to detention; (10) types of alternatives to detention used; (11) number of worksite enforcement operations and inspections conducted; (12) the number of positions and FTE dedicated to administrative enforcement; and (13) staffing, to include on-board staffing, new hires and attrition broken down by function, such as Special Agents, IEAs, and Deportation Officers. Further, the Department is directed to include bedspace utilization and funding obligations in its regular immigration enforcement reporting to the Committees on Appropriations. **Target response to Committee is November 10.**
45. Conference Report 109-241, page 48, directs the Department to submit quarterly reports on the fee estimates. **Target response to Committee is November 10.**

BUDGET REQUEST AND SUPPORTING INFORMATION
--

U.S. Immigration and Customs Enforcement
Salaries and Expenses

I. Appropriation Overview**A. Mission Statement for Appropriation Name:**

Salaries and Expenses programs contribute to the ICE mission charged with bringing a unified and coordinated focus to the enforcement of federal immigration laws and customs laws. The Salaries and Expense resources are used to combat terrorism and illegal immigration activities through investigating, detaining and prosecuting criminal aliens and other aliens, domestic gangs, as well as those participating in organized criminal activities that are intended to do harm to the infrastructure and/or inhabitants within the United States.

B. Budget Activities:**Investigations**

OI Domestic – The Office of Investigations (OI), divides itself into three broad investigative categories: National Security, Financial and Trade, and Smuggling and Public Safety.

OI International – The Office of International Affairs (OIA) conducts OI investigative efforts to over 50 foreign locations. The OIA represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services (USCIS), U.S. Customs and Border Protection (CBP), and other DHS components. The OIA works with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond U.S. borders. OIA operates ICE's Visa Security Program (VSP).

Intelligence Operations

Intelligence Operations collects, analyzes and shares information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. Intelligence Operations utilizes data and information on the movement of people, money and materials into, within and out of the United States to provide accurate and timely reporting to ICE leadership and field agents. Contained within Intelligence Operations are Field Intelligence Units (FIUs), which are the agency's primary vehicle for intelligence analysis in support of field operations and enforcement. FIUs serve as the link between headquarters and other field components for intelligence collection, integration, analysis, and dissemination.

Detention and Removal Operations

Custody Operations program –provides safe, secure, and humane confinement for removable aliens and seeks to ensure that aliens in ICE custody appear for their immigration hearings and subsequent removal from the United States.

Fugitive Operations program –locates and apprehends fugitive aliens in the United States. It strives to identify and apprehend all fugitives, creating a deterrent to potential absconders and increasing the integrity of the immigration enforcement process.

Alternatives to Detention - places low-risk aliens under various forms of intensive supervision rather than traditional detention as a cost-effective way to ensure their appearance for an immigration hearing or for removal. This program lowers the risk that aliens will be fugitives.

Institutional Removal Program (IRP) – The IRP ensures that aliens are not released back into the community before they are removed from the United States. ICE officers interview incarcerated aliens to determine whether they are eligible for immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

Transportation and Removal program - provides safe and secure transportation of aliens in ICE custody as well as prepares for and conducts the removals of aliens from the United States, as ordered by an immigration judge.

TRANSFER OF MANDATORY FUNDING (\$3.6M)

In December 2004, the Congress passed and the President signed the Commercial Spectrum Enhancement Act (CSEA, Title II of P.L. 108-494), creating the Spectrum Relocation Fund (SRF) to streamline the relocation of Federal systems from certain spectrum bands to accommodate commercial use by facilitating reimbursement to affected agencies of relocation costs. The Federal Communications Commission has allocated this spectrum for Advanced Wireless Services, and plans to auction it as early as June 2006. Funds will be made available to agencies following the crediting of auction receipts to the SRF, anticipated in FY 2007. Following the transfer of funds from the SRF to agency accounts, system relocation efforts will commence. The amounts reported here are the agency's estimated relocation costs, as approved by the Office of Management and Budget, and as reported to the Congress by the Department of Commerce in December 2005. Funds are mandatory and will remain available until expended, and agencies will return to the SRF any amounts received in excess of actual relocation costs.

ICE will use the \$3.6 million to replace equipment and interfaces as needed, in keeping with engineering studies that will be undertaken to move from the current bands to the new bands.

C. Budget Request Summary:

ICE requests 16,374 positions, 15,331 FTE, and \$3,902,291,000. The total adjustments-to-base is 626 FTE and \$261,619,000. The program increases include 1,360 positions, 681 FTE, and \$550,258,000.

Secure Border Initiative (\$541M) – The request highlights funding that supports the Secure Border Initiative (SBI). The Administration developed a three-pillar approach that will focus on controlling the border, building a robust interior enforcement program, and establishing a Temporary Worker Program. SBI, a performance-driven, department-wide enterprise will use resources from the Department's components to make dramatic improvements in the border security and interior enforcement. It will cover every facet of how the Department manages, adjudicates, and removes persons caught crossing the border illegally; how the federal government can deter illegal migration

overall; how to identify immigration violators currently in the country; and interact with States and localities at the front lines of immigration enforcement.

Funding dedicated to SBI efforts facilitates a complete program encompassing many administrative, legal, and regulatory actions. Substantial resource enhancements provided in 2005 and 2006 will pave the way for an effective SBI program, and 2007 will be a turning point towards meeting long-term border security objectives. The following are a few of the key investments in ICE for SBI:

- **Detention Bed Space** – Over \$400 million for an additional 6,700 detention beds, to bring the total number of beds to approximately 27,500. A key element of SBI is replacing a “catch and release” protocol for captured aliens with a “catch and return” process that will require a substantial expansion of bed space. In addition, new bed space will be used to detain criminal aliens upon release from State and local prisons until they can be removed from the country, and to detain alien absconders defying orders of removal after ICE apprehends them. This bed space request supports the detention and removal of at least another 100,000 apprehended persons annually.
- **Worksite Enforcement** – \$41.7 million for ICE worksite enforcement, to add 206 agents and support personnel. A strong worksite enforcement program that continues to expand will provide a strong deterrent to employers who knowingly hire illegal workers; reduce economic incentive for illegal immigration; and will restore the integrity of employment laws.
- **Fugitive Operations** – \$60 million for ICE Fugitive Operations apprehension teams, adding a total of 178 agents and support personnel. In addition to shoring up our borders and improving workplace oversight, the Department will increase efforts to catch the estimated 558,000 absconders around the country – a level that is growing every year. Funding will enable the number of Fugitive Operations teams to increase by 18, to a planned total level of 70 teams nationwide.

Total Change 2006-2007	368	455	125,475

U.S. Immigration and Customs Enforcement requests \$1.457 billion for this activity. This is an increase of \$66.9 million for pay and non-pay inflation, as well as a total program increase of \$58.5 million for additional Compliance Enforcement agents, Worksite Enforcement agents and Law Enforcement Technicians.

The above chart includes \$21.164 million FPS transferred in FY 2005 to the ICE S&E no year account. Funds were divided among Investigations and DRO PPAs. OI Domestic Ops received \$12.7 million.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of Investigations (OI) enforces trade and immigration laws through the investigation of activities, persons, and events that may pose a threat to the safety or security of the United States and its people. Investigations lead to the arrest and prosecution of perpetrators and/or result in the removal of individuals posing risks to national security or public safety. OI investigates illegal trafficking in weapons (including weapons of mass destruction); the smuggling of narcotics and other contraband; human smuggling and trafficking; money laundering and other financial crimes; fraudulent trade practices; child pornography; child sex tourism; and health and public safety dangers.

OI's success in disrupting and dismantling criminal organizations occurs through concerted efforts on three elements of criminal activity: of people, materials, and funding. There are critical and potential links to people, materials, and funding in every investigation initiated and OI uses its authorities to attack criminal organizations including systemic vulnerabilities that pose a threat.

OI identifies violators, prepares viable cases for prosecution, and, when appropriate, seizes illegally acquired assets--both in the United States and overseas (through cooperative host government law enforcement). A major contributor to the success of investigative efforts is close coordination and cooperation with Federal, state, local, and tribal law enforcement agencies. Through inter/intra governmental partnerships and the use of innovative investigative techniques supported by intelligence, OI:

- identifies and targets organizations and individuals engaged in identity and benefit fraud;

- investigates out-of-status and other aliens who pose a potential danger to the American people or infrastructure;
- reduces the number of criminals and terrorists who penetrate and pose a threat to the U.S. economy by gaining employment in critical and sensitive areas through worksite enforcement;
- identifies and dismantles criminal organizations that exploit the nation's financial systems;
- prevents the importation of Weapons of Mass Destruction (WMD) and other instruments of terror into the U.S. from abroad;
- prevents international terrorists from obtaining WMD materials and technologies, arms, funds, and other support from U.S. and foreign sources;
- disrupts criminal organizations involved in narcotics smuggling and money laundering through multi-defendant prosecutions and seizures of drugs and monetary assets;
- reduces potentially hazardous, harmful, and/or life threatening situations caused by the importation of prohibited or illegal commodities;
- enforces embargoes, trade agreements, and sanctions imposed by the United States government against foreign countries;
- protects Intellectual Property Rights (IPR), including trademarks and copyrights;
- investigates a variety of trans-border computer crimes being committed via the Internet;
- safeguards children and potential victims from exploitation through crimes involving pornography, sex tourism, and forced child/prison labor;
- disrupts those who deal in human trafficking; and
- denies safe haven to those who violate human rights.

OI's mission is to prevent acts of terrorism and ensure the safety and economic well being of our country. OI is divided into three broad categories of investigative effort: National Security, Financial and Trade, and Smuggling and Public Safety.

National Security Investigations works to deter and dismantle terrorist groups, individuals, and companies involved in the illegal procurement and movement of weapons of mass destruction and their materials and components. National Security Investigations personnel work closely with the Federal Bureau of Investigation's (FBI's) Joint Terrorism Task Forces (JTTFs). JTTFs utilize the collective resources of the participating agencies for the prevention, deterrence, and investigation of terrorism and related activities occurring in or affecting the United States.

Millions of nonimmigrant aliens enter the United States every year to visit, to work, and to attend school. An estimated 100,000 will overstay or violate the terms of their authorized period of admission, some for economic or personal reasons, and potentially for sinister reasons. In an effort to combat this threat to national security, the Federal Government has implemented the National Security Entry Exit Registration System (NSEERS), the Student and Exchange Visitor Information System (SEVIS), and U.S. Visitor and Immigrant Status Indicator Technology (US-VISIT) to track nonimmigrant aliens while in the United States. The responsibility for enforcing these systems lies with National Security Investigations.

The Threat Analysis Section (TAS) is part of the CEU. It is a specialized group of agents and intelligence analysts who proactively identify persons of interest from within the non-immigrant community of visitors, students, and temporary workers in the United States. The TAS uses the latest computer technology and unlimited access to immigration, law enforcement and intelligence information to identify hidden links and associations between persons and events that could indicate a previously unknown threat. The TAS employs an intelligence-based approach, whereas the CEU

operations section employs a violation-based approach. In this manner, the CEU is able to ensure there are consequences for routine immigration violations as well as ensure individuals are who they claim to be.

Cornerstone, a 21st century systemic approach to law enforcement, focuses on coordination and cooperation with the private sector to eliminate vulnerabilities in U.S. financial systems and disrupt and dismantle alternative financing mechanisms that terrorists and other criminals use to earn, move and store illicit funds.

The Commercial Fraud Unit and National Center for Intellectual Property Rights (IPR Center) target predatory and unfair trade practices that threaten our economic stability, restrict the competitiveness of U.S. industry in world markets, and place the public health and safety of the American people at risk. The Trade Transparency Unit (TTU) and Money Laundering Coordination Center (MLCC) provide the analytical infrastructure to support financial and trade investigations. The TTU provides the capability to identify and analyze complex trade-based money laundering systems, such as the estimated \$5 billion per year drug money laundering scheme known as the BMPE.

OI actively participates in collaborative investigative task forces with other Federal, state, local and international law enforcement agencies (e.g., High Intensity Financial Crime Area programs, Joint Vetting Units, Financial Action Task Forces) targeting terrorist financing and transnational money laundering.

Smuggling/Public Safety Investigations identify, deter, interdict, and investigate activities associated with the unlawful movement of people and goods into and out of the country. In addition to conducting investigations targeted at disrupting and dismantling activities of groups and individuals engaged in the smuggling of humans and contraband, OI investigates human rights violations, the exploitation of individuals, the importation of hazardous and prohibited items, identity and benefits fraud, critical infrastructure protection/worksite enforcement, and violent criminal aliens.

Agents are confronted with numerous challenges to combat drug traffickers and, ultimately, significantly reduce the amount of illegal drugs introduced into the U.S. each year. Drug smuggling organizations continue to develop new and sophisticated methods to smuggle drugs into the U.S. by land, air, and sea. They expend enormous amounts of money and time to thwart U.S. law enforcement's efforts by developing new concealment techniques, organizing internal conspiracies, using various transshipment routes, and even attempt to corrupt law enforcement officers.

Internal conspiracies operating in and around U.S. airports and seaports pose a significant problem to our counter-narcotics and homeland security efforts. In internal conspiracies, criminals target corrupt personnel within a company or transportation industry to introduce contraband into otherwise legitimate cargo or conveyances. Using such programs as the Maritime Port Security Program, OI is committed to eliminating the threats posed by internal conspiracies and smuggling organizations. Operation Safe Harbor focuses on investigative initiatives in the maritime port environment as well as non-investigative initiatives including cooperative programs with CBP and other DHS agencies.

Resources and support for these investigative efforts are enhanced through increased coordination and cooperation with other Federal, State, tribal, local, and foreign law enforcement agencies and through participation in task forces such as the Organized Crime Drug Enforcement Task Force, the High Intensity Drug Trafficking Area, and the High Intensity Financial Crime Area programs.

Identity and benefit fraud is a vulnerability of national security because it enables terrorists and criminals to exploit the legitimate immigration process and obtain "legal" status in the U.S. via fraudulent means. Benefit fraud also is an extremely lucrative form of organized white-collar crime, complex and challenging to investigate, and often involving sophisticated, multi-layered schemes with multiple co-conspirators that take years to investigate and prosecute. OI focuses on identifying and targeting the most significant, prolific, and egregious violators, and individuals and organizations that pose a risk to national security or public safety.

Violent criminal aliens, such as sexual predators and street gang members, pose a significant threat to public safety. In partnership with state and local law enforcement, OI investigates foreign-born sex offenders for violations of laws in order to remove them from the community and the country. Likewise, OI coordinates investigations with domestic and international law enforcement to disrupt and dismantle street gangs with foreign-born members which have been involved in various crimes with a nexus to the border, such as drug and human smuggling, weapons trafficking, document fraud, and the export of stolen goods. OI also works to deny safe haven to human rights violators in the U.S. by investigating their violations of U.S. criminal and immigration laws.

Through worksite enforcement initiatives, OI is working with the Federal and private sector to prevent criminals and terrorists from penetrating and crippling the U.S. economy by gaining employment in critical and sensitive areas. OI enforcement operations are prioritizing and targeting the most important, yet vulnerable, facilities for enforcement activity, and identifying and removing unauthorized facility workers through multi-agency screening and arrest operations. Furthermore, OI is applying sanctions to criminal employers whose employment practices constitute worker exploitation or have a nexus to alien smuggling or fraud. OI also conducts outreach to educate employers as to their legal responsibilities and provides information that will help them "stay clean" at the conclusion of ICE screening operations.

During FY 2005 OI successfully conducted the first joint IPR investigation by ICE agents and Chinese authorities (Internet sales of pirated motion picture DVDs) and, with FBI, first criminal enforcement action targeting individuals committing copyright infringement on peer-to-peer networks; conducted Textile Production Verification Team (TPVT) visits to 11 countries; in February, launched Operation Community Shield, which aims to disrupt and dismantle violent, transnational street gangs, arrested over 1,400 gang members by end of fiscal year; conducted numerous successful worksite enforcement investigations focusing on critical infrastructure and national security; reached record \$11 million civil settlement with a major company, as result of traditional worksite investigation; arrested 27 human rights violators for criminal offenses and an additional 20 for removal proceedings; first two years of Operation Predator resulted in over 6,600 child predator arrests and more than 3,400 removals from the U.S.; participated in the Arizona Border Control Initiative (ABCI), yielding more than 1,700 defendants, seizure of over \$11 million, and apprehension of over 610,000 illegal immigrants; coordinated WMD/delivery system training at selected Special Agent in Charge (SAC) offices; provided training to Australia Group (38 countries trying to minimize the risk of exporting or transshipping chemical and biological weapons); developed/implemented "train-the-trainer" program for agents on accessing SEVIS and U.S.-VISIT information; arrested 978 visa violators from Compliance Enforcement efforts; expanded Threat Analysis Section's tactical analysis capabilities; conducted Bulk Cash Smuggling (BCS) and Unlicensed Money Transmitting Businesses training and Cornerstone outreach/training; implemented BMPE initiative; began work to establish formal TTUs with three South American countries; with CBP, conducted operations targeting in-bond smuggling

and smuggling at Foreign Trade Zones and bonded facilities; conducted outreach to increase awareness of Forced Labor issues, IPR program, and Cornerstone program; continued development of ICE Mutual Agreement between Government and Employers (IMAGE) initiative (part of overall enforcement strategy to address document fraud, human smuggling, and worksite compliance priorities through industry outreach and employer self-policing); and, in coordination with foreign governments, continued task force efforts to identify/investigate "politically exposed persons."

In FY 2006 OI will bolster worksite and other immigration enforcement programs; continue WMD training; conduct Project Shield America visits to manufacturers/distributors/exporters of dual-use/military technology; implement Biometric Support Initiative, Designated School Official background check program, and school recertification program; in support of state and local law enforcement efforts to supplement Federal immigration law enforcement, provide training for voluntary entrants into the 287(g) program; implement initiative to eliminate systemic vulnerabilities in unlicensed Money Service Businesses (MSBs); create/chair interagency BCS Working Group and conduct joint operations with U.S. Postal inspectors; pilot BCS Unit at the Law Enforcement Support Center (LESC); continue implementation of BMPE initiative; create additional TTUs with interested foreign governments; continue Cornerstone's outreach/training for trade and financial business communities; target illegal importations of counterfeit cigarettes and unapproved/counterfeit/adulterated pharmaceuticals, and textile transshipments; conduct TPVT visits to 13 countries; expand Airport Security Program into top 50 international U.S. airports; conduct outreach to Maritime Shipping and Cruise Ship lines; expand outreach/partnership with Non-Government Organizations (NGOs) and business entities to educate and identify trends and activities of targeted criminal organizations; establish the Office of Investigations (OI) as DHS entity responsible for all investigative activities relating to human rights violators; expand investigations of identified human rights violators and their support networks; in coordination with foreign governments, continue task force efforts to identify/investigate "politically exposed persons"; expand the ability of the Cyber Crimes Center to provide additional data analysis, data archiving, disaster recovery, and advanced examinations within the digital evidence network; and accelerate entry of immigration enforcement information into the National Crime Information Center (NCIC) database.

In FY 2007 OI will expand Worksite Enforcement and Compliance Enforcement Programs; improve coordination with Department of State/Department of Defense tracking terrorist travel programs; increase participation in JTTFs; continue MSB initiative; implement BCS enforcement strategy/training; expand BCS Unit at LESC; create additional TTUs with interested foreign governments; continue BMPE initiative; implement enforcement action against fraudulent trade schemes used by terrorists/other criminal organizations to support their illegal activities; conduct public awareness campaign regarding IPR crime; conduct TPVT visits to about 13 countries; continue Cornerstone's outreach/training for trade and financial business communities; expand activities to disrupt/eliminate violent gangs and the most significant contraband/human smuggling/transportation organizations; implement targeted investigations of criminal sources/support networks; improve implementation of asset forfeiture as related to organizations involved in identity and benefits fraud; continue targeted investigations of identified human rights violators/support networks; in coordination with foreign governments, expedite task force efforts to identify/investigate "politically exposed persons"; improve inquiry response time at LESC; and continue to provide training for voluntary entrants into the 287(g) program.

Total Change 2006-2007	---	1	1,850

ICE requests \$104.7 million for this activity. This is an increase of \$1.9 million over FY 2006 for pay and non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Office of International Affairs' (OIA) Attaché offices, as the OI overseas component, conduct criminal investigations of violations of law involving contraband smuggling, immigration violations, money laundering, arms/technology trafficking and cyber crimes. OIA Attaché offices also acquire law enforcement intelligence and information; support other Department of Homeland Security (DHS) missions [(e.g., DHS security initiatives and trade programs, such as the Visa Security Program, Container Security Initiative, and the Trade Transparency Units (TTUs)]; conduct international training; develop and implement the Visa Security Program; and act as the in-country ICE liaison with foreign governments and Embassy staff.

The Attachés are also responsible for the enforcement of health and safety issues, including tainted or prohibited foodstuffs, unsafe toys and consumer products. They coordinate with foreign counterparts to share information under the bilateral agreements and Customs Mutual Assistance Agreements (CMAAs). They refer foreign leads to domestic ICE investigation offices and handle ICE investigative leads. The Attachés also investigate and enforce laws for other Federal agencies that have a Memorandum of Understanding with DHS; and any other matter as directed by the Secretary of DHS.

In implementing the Visa Security Program, OIA works with the State Department to review visa applications. In addition to preventing terrorists, criminals and other violators from receiving U.S. visas, VSP activities generate valuable threat information in the form of new watch list entries, intelligence reports, investigative leads, and identification of patterns in visa fraud. The Visa Security Program enhances the security of visa issuance at overseas posts by deploying highly skilled and experienced law enforcement officers who conduct an in-depth investigative review of visa

applications that raise security concerns; investigate concerns relating to visa fraud and other criminal activity which can exploit the visa system; and provide advice and training on security issues to Department of State consular officers, thereby enhancing their ability to screen security risks as they adjudicate visas, conduct information sharing, and liaison to support effective tactical operations.

In addition to supporting the goals of DHS, OIA's activities also support the goals set forth by the Department of State in the areas of regional stability, counter terrorism, homeland security, weapons of mass destruction, international crime and drugs, economic prosperity, and public diplomacy.

During FY 2005 OIA fully integrated legacy INS and Customs overseas enforcement offices; expanded background investigation of foreign visa applicants in high threat country; and selected and trained first permanent Visa Security Officers to be stationed in select U.S. Embassies around the world. Also coordinated joint successful enforcement and investigative efforts with foreign law enforcement in strategic/export, child pornography, and child sex tourism cases; and coordinated and conducted ICE-led international training projects on bulk cash smuggling, financial and money laundering, document fraud and counterfeit documents, child exploitation, and commercial fraud. OIA successfully conducted first joint Intellectual Property Rights (IPR) investigation by ICE agents and Chinese authorities (Internet sales of pirated motion picture DVDs). OIA provided logistical and coordination support for Textile Production Verification Team (TPVT) visits to 11 countries and participated as team members on two of these visits. The office also developed and implemented vetted foreign Human Trafficking and Smuggling units to combat Special Interest Alien Smuggling in Latin America.

In FY 2006 OIA will expand Visa Security Program into highest terror threat locations having U.S. visitor applicants; expand overseas efforts against Forced Child Labor; in coordination with foreign governments, expedite task force efforts to identify/investigate "politically exposed persons"; assist in the creation of additional TTUs with interested foreign governments; expand and increase joint ICE-foreign law enforcement efforts in all the investigative areas of ICE expertise; in coordination with the Department of State, conduct international training and visitors programs; continue support and assistance to CBP CSI and C-TPAT and all other DHS international programs; and provide logistical and coordination support for the TPVT visits to about 13 countries scheduled for FY 2006, and investigate leads from the TPVTs for potential transshipment violations.

In FY 2007 OIA will expedite task force efforts to identify/investigate "politically exposed persons"; assist in the creation of additional TTUs with interested foreign governments; provide logistical support and coordination for the TPVT visits scheduled for FY 2007 and investigate leads from the TPVTs for potential transshipment violations; and continue to support all ICE, CBP, and DHS international enforcement efforts.

2007 Program Change	---	---	103
2007 Request	345	333	57,932
Total Change 2006-2007	---	---	(670)

ICE requests \$57.9 million for this activity. This is a total decrease of \$670 thousand due to the realignment of the intelligence program.

CURRENT SERVICES PROGRAM DESCRIPTION

The ICE Headquarters Office of Intelligence is comprised of the following six program areas:

(1) Anti-Terrorism Unit (ATU)

The ATU performs the daily review of all-source intelligence reporting and ensures that intelligence - as it pertains to Homeland Security and potential terrorist threats - is evaluated and disseminated to ICE executive management and operational units.

(2) Arms and Strategic Technology Intelligence Unit (ASTIU)

The ASTIU provides comprehensive operational intelligence support to activities associated with export enforcement efforts by ICE's Office of Investigations.

(3) Human Smuggling and Alien Intelligence Unit (HSAIU)

The HSAIU provides a systematic and comprehensive review of intelligence and law enforcement reporting to identify organizations, groups or individuals who smuggle aliens and/or engage in human trafficking. The HSAIU supports field investigations and identifies leads or trends.

(4) Detention and Removal Operations/Human Intelligence Unit (DRO/HUMINT)

The DRO/HUMINT provides a systematic and comprehensive review of intelligence and law enforcement reporting involving immigration-related benefits, associated fraud, the processing of refugees and asylum seekers, and the detention and removal of aliens in ICE custody. DRO/HUMINT also screens Special Interest Aliens and other persons/detainees of interest through name vetting.

(5) Intelligence Support Division (ISD)

ISD enforcement personnel within ICE utilize new technology such as the Numerically Integrated Processing System. This is a powerful web-based analytical tool developed within ICE for ISD personnel to integrate, manipulate, compare, and analyze large data sets of commercial, passenger, financial, and enforcement data to identify anomalies that are indicative of criminal activity, to include illicit actions in support of terrorism, money laundering, tax evasion, weapons proliferation, immigration enforcement and drug smuggling.

(6) Mission Support Unit

The Mission Support Division of the Office of Intelligence provides major human, financial, material and information resources in support of personnel in Headquarters and field offices so that they might accomplish the ICE Intelligence mission.

The intelligence reporting and watch-list records resulting from intelligence operations conducted by ICE Office of Intelligence have led to the identification of special interest individuals and businesses involved in a wide-range of criminal and illicit activities. This intelligence provided law enforcement with critical information needed to perform seizures of contraband, vehicles, and arrests of individuals, as well as helped to establish criminal cases.

During FY 2005 the Office of Intelligence conducted 12 major operations. Operations Intelligence Collection Analysis Team (ICAT) and Foreign Intelligence Collection Team (FICT) targeted contraband and special interest alien smuggling activity in Mexico. Operations Potpourri, Masquerade, and Prevalence targeted fraudulent and counterfeit document schemes, immigration benefit fraud, and illicit finance activities – all of which could undermine the U.S. immigration system by allowing entry of potentially dangerous individuals. Operation Pronet targeted activities involving arms and strategic technology transfers. Operations Watchtower and Sea Hunt targeted maritime activities of commercial and small vessel traffic entering U.S. waterways and illegal or potentially dangerous cargoes and crews. Operation Swordfish targeted financial crimes involving potential terrorist activities. Operations Capistrano and Roswell targeted suspect travel, and Operation Last Call targeted special interest aliens in detention. Most of these operations will continue in FY 2006.

In FY 2006 - 2007 operations such as Last Call, Sea Hunt will be expanded to address the growing need for intelligence collection and reporting of activities in ICE detention facilities as well as maritime intelligence collection of major U.S. seaports.

ICE requests \$206.5 million for this activity. This is an increase of \$20.3 million over 2006 for pay and non-pay inflation as well as a total program increase of \$38.8 million for additional attorneys in support of the SBI.

CURRENT SERVICES PROGRAM DESCRIPTION

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or "OPLA") provides the legal advice, training, and services required to support the ICE mission while defending the immigration laws of the United States in the administrative and federal courts and is the legal representative for ICE. OPLA is the DHS legal component that is authorized to represent the government in immigration proceedings that end up in immigration courts.

OPLA consists of 11 divisions: (1) Appellate Counsel, (2) Commercial and Administrative Law Division, (3) Customs Enforcement Law Division, (4) Enforcement Law Division, (5) Ethics Office, (6) Human Rights Law Division, (7) Knowledge Management Division, (8) Legislative Counsel, (9) Mission Support, (10) National Security Law Division, (11) Training and Program Development Division. OPLA also provides training on legal and ethical issues to ICE employees. OPLA has 26 field Chief Counsel Offices that correspond with the 26 domestic areas of responsibility for the ICE Office of Investigations.

As the legal representative for the U.S. government at immigration court hearings, OPLA attorneys handle a variety of immigration-related issues, from contested removals to custody determinations to applications for administrative relief. Most hearings involve criminal aliens, terrorists, and human rights abusers, among others. The following highlights the primary duties and responsibilities of OPLA.

The Enforcement Law Division (ELD) is responsible for handling traditional immigration enforcement issues and general officer authority issues. ELD provides legal enforcement defense at proceedings brought before the Executive Office for Immigration Review (EOIR), as well as federal court litigation

on issues that include: statutory interpretation, relief from removal, evidence, stays, deferred action, access to counsel, incompetent aliens, contempt authority, expedited removals, collateral estoppels, record checks, reinstatements, habeas petitions and petitions for review, extraditions, requests for pardons and clemency, plea bargains, paroles, custody standards and regulations, unaccompanied minors, repatriations, forced feedings, chemical restraints, psychiatric evaluations, and alternatives to detention. ELD provides legal counsel to ICE program operations involving civil and criminal investigations, officer authority issues such as use of force, weapons carriage and firearms policy, arrests, search and seizure, emergency driving, worksite enforcement, benefits fraud, alien smuggling and trafficking, asset forfeiture, detention authority, fugitive operations, and denaturalization. ELD provides vital legal assistance and guidance with ICE's initiatives, such as Operation Predator and Operation Community Shield to bring them to a successful law enforcement conclusion and then litigate the cases at removal proceedings.

The Customs Enforcement Law Division (CELD) provides policy and legal advice involving investigations into violations of the customs laws and customs enforcement issues that include Title 19 (traditional customs import and export violations), Title 21 (narcotics violations), export control laws, commercial fraud, asset forfeiture, child sexual exploitation and financial crimes, such as money laundering and bulk currency smuggling. CELD also advises on the use of the summons/subpoenas, warrants, evidentiary and discovery issues and provides legal training on customs authorities. CELD attorneys review all Title III affidavits to ensure legal sufficiency and compliance with ICE policy: and CELD is the primary point of contact on all questions relating to undercover operations, including certification, personal assistance agreements, lease and hold harmless agreements, use of proceeds and threats to life. CELD attorneys participate with the Undercover Review Committee. CELD attorneys are situated in Washington, D.C., New York, Miami, Houston, Chicago and Los Angeles in addition to the 26 domestic field offices for the ICE Office of Investigations and in San Juan.

The Appellate Counsel Office is primarily responsible for handling emergency stay requests, adverse decision reports related to federal litigation where the government has not prevailed, and appeals of the Immigration Judges' decisions to the Board of Immigration Appeals.

The Commercial & Administrative Law Division (CALD) provides legal advice in the areas of fiscal law, personnel and labor law, civil rights and equal employment law, collective bargaining, garnishments, information disclosure law, federal tort claims, memoranda of understanding and other agreements, contract law, breached bonds, and a range of administrative law matters in support of ICE operations. CALD represents ICE before the Equal Employment Opportunity Commission, the Merit Systems Protection Board, General Accounting Office, and the Department of Transportation Board of Contract Appeals, among other administrative and judicial forums. CALD also adjudicates administrative tort claims and provides guidance and legal advice governing procurement/contract awards, and develops and coordinates ICE legal policy in these areas. Other central services provided by CALD include representing ICE at: bid protests and contract-related litigation before the General Accounting Office (GAO), the Court of Federal Claims (COFC), and the United States District Courts; disputes before the Department of Transportation Board of Contract Appeals (DOTBCA); and, ultimately, any appeal decisions to the United States Courts of Appeals, including the Court of Appeals for the Federal Circuit.

The Human Rights Law Division (HRLD) ensures that the U.S. is not a safe haven for persecutors and provides guidance in cases involving human rights violators. HRLD is on the cutting edge of the law. For example, HRLD successfully prosecuted the first alien charged with genocide. HRLD also successfully prosecuted the first alien charged with killing and torture activities prohibited pursuant to provisions enacted by the Intelligence Reform and Terrorism Prevention Act. The number of cases tracked by HRLD has grown from 400 cases in December 2003 to over 1,000 cases involving individuals from 85 different countries. In addition, HRLD has drafted legislation that would eliminate certain loopholes in the Immigration and Nationality Act through which human rights persecutors have been able to receive immigration benefits.

The National Security Law Division (NSLD) provides legal advice and overseas litigation involving special interest cases, including those involving international terrorism, counter-terrorism, espionage, and other national security matters. The work performed by NSLD is critical to ICE's efforts to protect the nation's security. NSLD attorneys are involved in a fast-paced practice, working closely with other Federal law enforcement and intelligence agencies, including the FBI, and routinely make decisions that have an immediate impact on national security. Specifically, NSLD attorneys oversee and coordinate removal proceedings involving terrorists and foreign intelligence agents; provide legal support to ICE's Office of Investigations (namely, the National Security Threat Protection Unit and the Visa Security Unit) and Office of Intelligence; and liaison with the Civil and Criminal Divisions of the Department of Justice.

During FY 2005 OPLA developed and deployed the national electronic file and case tracking system, General Counsel Electronic Management System (GEMS) and initiated the Six Sigma Management Program to enhance client services and management efficiency. Removal orders were successfully acquired against thousands of criminal aliens tied to multiple terrorist cases, child predators, and MS-13 gang members. NSLD was involved in approximately 800 cases associated with terrorist detection activity and export control. HRLD provided legal support in over 1,000 cases involving mass genocide, human enslaving and torture. CELD provided legal support for approximately 100 wiretaps and 50 umbrella undercover operations. CALD litigated or participated in disciplinary action of nearly 200 employees. And OPLA disseminated over 600 ethical opinions.

In FY 2006-2007, OPLA plans to increase the level of legal services by dedicating at least one attorney to the Student and Exchange Visitor Information System and more resources to client-field training as well as the training program at FLETC. OPLA also plans to focus on revising and revitalizing the attorney training program, reviewing career development initiatives, and developing leadership programs. Further, OPLA plans to analyze and review the immigration court process to make this operation more efficient. Through analysis, OPLA intends to improve the benefit/completion ratio that, in turn, will allow more attorney time for other mission needs.

ICE requests \$1.433 billion for this activity. This is an increase of \$136.2 million over FY 2006 for pay and non-pay inflation, as well as a total program increase of \$228.4 million for beds and staff to support the SBI.

The above chart includes \$21.164 million FPS transferred in FY 2005 to the ICE S&E no year account. Funds were divided among Investigations and DRO PPAs. DRO Custody Operation PPAs received \$8.5 million.

CURRENT SERVICES PROGRAM DESCRIPTION

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Often the number of apprehensions exceeds the detention space available and ICE must prioritize which cases will be detained. Custody Operations provides safe, secure, and humane confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

ICE secures bed space in detention facilities, and monitors these facilities for compliance with national Detention Standards. The standards specify the living conditions appropriate for detainees and ensure that detainees are treated with respect, dignity and the best possible care while they are in the custody. A special unit monitors conditions of confinement to ensure that facilities utilized for ICE detainees are safe, secure, and humane and that these facilities maintain appropriate conditions of confinement consistent with correctional industry standards and practices.

ICE operates eight secure detention facilities called Service Processing Centers (SPCs). They are located in Aguadilla, Puerto Rico; Batavia, New York; El Centro, California; El Paso, Texas; Florence, Arizona; Miami, Florida; Los Fresnos, Texas; and San Pedro, California. The newest SPC, the Buffalo Federal Detention Facility, accommodates 300 beds for detained aliens of which 150 beds are available for use by the U.S. Marshals Service. Nearing completion, the construction of two new Administration and Processing Complexes are expected to improve operational efficiency at the Kröme and Port Isabel SPC. With construction scheduled to begin during fiscal year 2006, design of new detention capacity

at Krome, Batavia, and Port Isabel Service Processing Centers is nearing completion.

ICE also has seven contract detention facilities. These facilities are located in Aurora, Colorado; Houston, Texas; Laredo, Texas; Seattle, Washington; Elizabeth, New Jersey; Queens, New York; and San Diego, California. ICE also uses state and local jails on a reimbursable basis and has joint federal facilities with the Bureau of Prisons, the Federal Detention Center in Oakdale, Louisiana, and the contractor owned and operated criminal alien facility in Eloy, Arizona.

ICE has launched an effort to consolidate facilities based on careful analysis of requirements and is currently developing plans to build a system which will consist of facilities with 1,000 beds or greater. ICE is currently developing plans to consolidate its detention capacity across the country by building a system which will consist of facilities of 1,000 beds or greater located strategically across the United States. These facilities will serve designated cases throughout the adjudication process and will increase efficiency due to the immediate proximity between the detainee and case management staff, attorneys, Executive Office of Immigration Review, and removal locations. The plan includes maximizing the utilization of existing facilities and excess detention capacity in an effort to reduce costs and activation time. Initiatives to consolidate populations have already been implemented in strategic geographic areas such as San Diego, Phoenix, San Antonio, Seattle, New York and Houston.

The Division of Immigration Health Services (DIHS) manages primary health care for alien detainees. The DIHS is located within the Bureau of Primary Health Care of the Public Health Service of the Department of Health and Human Services (HHS). Through comprehensive health screening and the provision of direct patient care and managed care services to approximately 20,000 detainees, DIHS serves as a model for global health services delivery. A managed healthcare program is being implemented system-wide to ensure adequate and appropriate care is provided to all detainees at the lowest possible cost.

The breadth of responsibilities within the detention program requires a readiness to respond to a variety of emergency situations. An example is mass migration planning. ICE has been an essential component in the development of Operational Plan Vigilant Sentry, delegating DRO responsibility for the security, custody, and transportation of arriving migrants during a mass migration event. ICE, in partnership with the Department of State and Department of Defense, has continually defined organizational responsibilities for management of migrants interdicted at sea and taken to the Migrant Operations Center in Guantanamo Bay, Cuba. ICE has modified existing buildings and created new structures to accommodate custody of interdicted migrants until their cases can be resolved.

The Custody Operations Program/Project Activity includes the Criminal Alien Program (CAP), formerly the Institutional Removal Program. Many removable aliens are currently incarcerated in federal or state prisons after having been convicted of a crime. If these aliens are released upon completion of their criminal sentence, they pose a potential danger to public safety and national security. The CAP ensures that these aliens are not released back into the community before they are entered into removal proceedings. Through the CAP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. This saves ICE significant detention resources because these aliens are at or near the end of the immigration court process at the time they are released into DRO custody at the conclusion of their criminal sentence. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

The CAP improves public safety by identifying and removing criminal aliens and by managing security threats within DRO's detained alien population. The CAP is responsible for formulating all DRO criminal alien management policy, conducting criminal alien program planning, defining and projecting criminal alien management requirements, programming and budgeting criminal alien management resources, and overseeing Field Office Director (FOD) execution of criminal alien management funding.

The CAP was previously with the Office of Investigations. Congress provided \$30 million in the FY 2005 appropriation to initiate the OI-to-DRO transfer of this program and to fund 279 positions to free up criminal investigative assets and to replace them with DRO immigration enforcement agents (IEAs). Criminal aliens comprise more than half of the total detained population and the numbers likely continue to rise due to enhanced enforcement efforts like CAP and 287(g) (local law enforcement authority to enforce immigration violations). Criminal aliens comprise a significant portion of the mandatory detention population. The mandatory population also contains those individuals who have received final orders of removal and whose removal is imminent, those who are pending expedited removal activities, and those who are otherwise required by law or policy to be detained.

In FY 2005, consistent with stringent detention standards, inspections were conducted for 312 of 350 facilities used for the temporary and safe housing of aliens. Of the 312 facilities inspected, 70% received a rating of acceptable or better. Efforts to improve the less-than-acceptable conditions at the remaining facilities are underway.

Service Processing Centers situated in Krome, Florida and Port Isabel, Texas were re-certified by the American Correctional Association (ACA). This is significant because an ACA accreditation attests to a facility's good-faith effort to improve conditions of confinement that make it a safer and more humane environment for staff and detainees.

Under the Criminal Alien Program (CAP), 5,000 incarcerated aliens were interviewed. Of those interviewed, 3,000 were placed in immigration proceedings for removal. The CAP remained in partial transition in FY 2005 from the Office of Investigations Institutional Removal Program to DRO.

In FY 2006, DRO plans to improve conditions at the sub-standard facilities that were inspected in FY 2005 and plans to pursue an aggressive inspection program that meets or exceeds standard-quality conditions for remaining detention facilities. DRO also plans to obtain ACA accreditation for all DRO-operated facilities.

DRO plans to expand the CAP to New York and California. DRO will also strive to efficiently manage the CAP resources and realize cost savings by increasing the percentage of incarcerated aliens placed in immigration proceeding and by reducing detention days - provided the program can effect an optimal level of turnover for incarcerated aliens requiring minimal (or no) detention upon discharge from prison. DRO plans to complete the final phase of the CAP migration from the Office of Investigations Institutional Removal Program.

In FY 2007 DRO will acquire an additional bed space 6,000 beds and the associated staff as part of the Secure Border Initiative (SBI). As a result, DRO plans to step up all levels of effort to provide increase detention capacity and to manage the subsequent growth in detention population.

DRO plans to: continue its aggressive inspection program; provide standard-quality conditions for additional facilities; and sustain ACA accreditation for all DRO-operated facilities.

DRO plans the further expansion of the CAP within New York and California. Plans also include expanding CAP to additional sites in Arizona and select sites in Texas.

The following table provides a detailed breakout of base and proposed levels of beds and the related staff within Custody Operations, as well as other areas of the DRO request.

DRO	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Custody Operations

PPA: Detention and Removal – Fugitive Operations

	Perm Pos	FTE	Amount
2005 Actual	173	166	\$80,815
2006 Enacted	435	400	\$108,912
2007 Adjustments-to-Base	---	30	4,736
2007 Current Services	435	430	113,648
2007 Program Change	179	90	60,136
2007 Request	614	520	173,784
Total Change 2006-2007	179	120	64,872

ICE requests \$173.8 million for this activity. This is an increase of \$4.7 million over FY 2006 for pay and non-pay adjustments, as well as a total program increase of \$60 million for additional fugitive operations teams.

CURRENT SERVICES PROGRAM DESCRIPTION

As of January 2006, there were approximately 558,000 alien absconders. This problem has emerged over time as the result of several factors, such as: the failure of aliens to appear for immigration hearings or removal; insufficient detention, case management, and removal resources; and statutory changes that have made more categories of aliens deportable. To address this problem, DRO has developed Fugitive Operations Units, which are dedicated to the location and apprehension of absconders. The Fugitive Operations Unit is comprised of two primary components: parts: Headquarters Operations and Field Teams. The field teams consist of a Supervisory Deportation Officer, four Deportation Officers, an Immigration Enforcement Agent and a Deportation Assistant. Their mission is to apprehend, process and remove from the United States aliens who have failed to surrender for removal or to comply with a removal order. Fugitive Operations Units work exclusively on fugitive cases, giving priority to the cases of criminal aliens. Fugitive Operations uses the data available from National Crime Information Center (NCIC) databases.

The first 16 Fugitive Operations Units were funded in FY 2004, and are in the following cities: Los Angeles (2 teams), Boston, San Francisco, Miami, Houston, NY City (2 teams), Chicago, Newark (2 teams), Detroit, Atlanta, Baltimore, San Diego, and Seattle. An additional 28 units were added in FY 2005. As part of Fugitive Operations, DRO has implemented a Ten Most Wanted Criminal Alien program that has successfully apprehended 20 Top Ten cases. This program takes nominations from DRO field offices, reviews the data received, ranks them by the severity of the crime and the ability to identify the subject, and determines who should be posted on the most wanted list. While all violent criminals are considered, those that fall under "Operation Predator" guidelines are given top priority.

Also, DRO has developed a "Hot Leads" program that identifies fugitive leads from a Treasury Enforcement Communications System (TECS)/ Deportable Alien Control System (DACS) interface.

This interface matches queries in TECS by U.S. Custom and Border Protection (CBP) inspectors at ports of entry with fugitives identified in DACS, and provides the latest information on the fugitive. DACS information is updated in TECS nightly. This program also receives "Hot Leads" from U.S. Citizenship and Immigration Services (CIS) Service Centers who are adjudicating applications for benefits. Although not a real-time operation, it supplies the FOU with timely information that is forwarded to local fugitive teams for follow-up.

In FY 2005 fugitive operations teams apprehended 15,208 individuals. Among the apprehended: 11,198 were fugitive aliens; 4,010 were charged with violation of immigration laws; 270 were sexual predators. A total of 10,469 were removed from the United States; and 4,739 were placed in immigration proceedings.

Hiring personnel to staff an additional eight teams is planned for FY 2006, to raise the cumulative total to 52 teams. The recently added eight teams will be fully operational in FY 2007. The performance target for each fugitive operations team is 1,000 apprehensions annually.

In FY 2007 the program increase provides resources for 18 additional fugitive operations teams. Added to the 52 teams funded through FY 2006, the number of fugitive operations teams in FY 2007 is expected to total 70. At least 24,125 apprehensions are anticipated.

PPA: Detention and Removal – Alternatives to Detention

	Perm Pos	FTE	Amount
2005 Actual	12	12	\$12,782
2006 Enacted	132	102	\$29,683
2007 Adjustments-to-Base	---	30	12,976
2007 Current Services	132	132	42,659
2007 Program Change	---	---	43
2007 Request	132	132	42,702
Total Change 2006-2007	---	30	13,019

ICE requests \$42.7 million for this activity. This is an increase of \$13 million over FY 2006 for pay and non-pay adjustments.

CURRENT SERVICES PROGRAM DESCRIPTION

DRO has had to apply rigorous criteria to determine which apprehended aliens should be detained. National security and public safety are ICE's first priorities. ICE detains all aliens who pose a threat to community safety or national security, and those required to be detained under the nation's immigration laws. Those alternatives include release using electronic monitoring devices (EMD) and the Intensive Supervision Appearance Program (ISAP).

The EMD program ensures compliance with appearance at court and removal orders without detention in a detention facility. Under this program aliens awaiting immigration court hearings or removal wear either a monitoring ankle bracelet or report by telephone to a case manager. Originally available only at specific pilot sites, the EMD program is now being implemented nationwide.

The Intensive Supervision Appearance Program is a program that is only available to aliens who are not subject to mandatory detention; who are pending immigration court proceedings or awaiting removal from the United States; are residing within the managed area; and are not deemed a threat by DHS. ISAP is a voluntary program and all participants must agree to comply with the conditions of their release. Case specialists are then assigned a limited caseload of participants and are responsible for monitoring those participants in the community by using tools such as electronic monitoring (bracelets), home visits, work visits and reporting by telephone. Case specialists will also assist participants in obtaining pro-bono counsel for their hearings and help them to receive other types of assistance to which they may be entitled. The ISAP program has the capacity to supervise up to 200 aliens in each of eight cities: Baltimore, Philadelphia, Miami, St. Paul, Denver, Kansas City, San Francisco and Portland, Oregon. With funding provided in FY 2005, DRO is in the process of

doubling the capacity at each of the existing eight cities, and adding a ninth city. Funding in the FY 2006 revised enacted request would allow the IASP program to expand to a ninth and tenth city. IASP is a cost effective alternative to detention, with an average daily cost of only \$22 compared to \$95 for detention.

During FY 2005, approximately 2,400 aliens participated in the Intensive Supervision Appearance Program (ISAP) - a pilot program that works in conjunction with alternative detention for low risk aliens. Participants in the ISAP were credited with a 94% appearance rate at immigration court proceedings. In comparison, the non-detained appearance rate is 34% for aliens not participating in ISAP.

In FY 2006, DRO plans to assess the ISAP and Electronic Monitoring Device (EMD), and to expand the level of effort to include additional locations. While the programs show potential for success, the invariably protracted length of time between immigration proceedings makes it difficult to measure the true success of the programs in a single year.

In FY 2007, DRO will sustain efforts to support ISAP and EMD programs as effective alternatives to detention of low risk aliens engaged in immigration proceedings.

PPA: Detention and Removal – Institutional Removal Program

	Perm Pos	FTE	Amount
2005 Actual	163	152	\$54,666
2006 Enacted	568	495	\$101,519
2007 Adjustments-to-Base	---	68	8,529
2007 Current Services	568	563	110,048
2007 Program Change	1	1	202
2007 Request	569	564	110,250
Total Change 2006-2007	1	69	8,731

ICE requests \$110.3 million for this activity. This is an increase of \$8.5 million over FY 2006 for pay and non-pay as well as a small program increase of \$202 thousand to complete the CAP realignment from IRP.

CURRENT SERVICES PROGRAM DESCRIPTION

The total detained criminal alien population in FY 2007, serving sentences at the federal state and local level, is an estimated 630,000 nationwide. Approximately 79,000 criminal aliens were removed in FY 2005. Therefore, an estimated 551,000 criminal aliens have not yet been identified for removal. An estimated additional 275,000 are in the United States illegally. The Criminal Alien Program (CAP) was created to address screening and removal needs associated with this population.

The CAP identifies criminal aliens who are incarcerated within federal, state, and local facilities and prepares them for immigration proceedings, ensuring that they are not released into the community. The identification and processing of incarcerated criminal aliens prior to release reduces the overall cost and burden to the federal government as the number of aliens detained by ICE.

CAP ensures that criminal aliens are not released back into the community and are removed from the United States. The workload for each ICE officer is about 300 charging documents served per year. This figure encompasses the number of interviews and record checks of individuals that are not amenable to removal but are of foreign birth.

PPA: Detention and Removal – Transportation and Removal

	<u>Perm Pos</u>	<u>FTE</u>	<u>Amount</u>
2005 Actual	381	360	\$201,210
2006 Enacted			\$142,140
2007 Adjustments-to-Base			10,895
2007 Current Services			153,035
2007 Program Change			163,981
2007 Request			317,016
Total Change 2006-2007			174,876

ICE requests \$317 million for this activity. This is an increase of \$10.9 million over FY 2006 for non-pay adjustments. Staff has been moved to Custody Operations PPA. The program increase of \$164 million includes funding for expedited removal in support of the SBI.

CURRENT SERVICES PROGRAM DESCRIPTION

Aliens in ICE custody must be transported safely and securely from point of apprehension through the other phases of their immigration proceedings. If an alien receives a final order of removal from an immigration judge, the alien must be removed from the United States. The Transportation and Removals Management program provides safe and secure transportation of aliens in ICE custody. It also prepares for and conducts removals from the United States, as ordered by an immigration judge.

The Removal Management Division is responsible for formulating all DRO transportation and removal policy, conducting transportation and removal planning, defining and projecting transportation and removal requirements, and overseeing and supporting FOD execution of transportation and removal funding. The division carries out its responsibilities through four supporting units: (1) Air Transportation; (2) Travel Documentation; (3) Centralized Ticketing; and (4) Custody Determination, including oversight of the DRO Cuban Unit and Post Order Custody Review (POCR) operations.

The Air Transportation Unit (ATU) manages the DRO portion of the Justice Prisoner and Alien Transport System (JPATS) and all ground transportation operations.

The Travel Document Unit (TDU) has been involved in an interagency Visa Sanctions Working group to compel greater cooperation from several countries that routinely refuse to accept or unreasonably delay the acceptance of repatriation of their own nationals.

DRO is the first component of ICE to implement a Centralized Ticketing (CENTRIX) system nationwide to increase cost-savings and centralize control of removal operations. DRO field office

previously purchased commercial airline tickets from local travel agencies. Now DRO headquarters manages the resources and officers no longer have to use their individual travel, thereby reducing delinquent travel card accounts.

The Transportation and Removal Program/Project Activity includes case management activities. Aliens apprehended for violation of immigration law must be processed expeditiously and in accordance with laws and regulations. The Case Management program ensures that apprehended aliens are processed through the immigration legal system and afforded rights under the law by managing alien cases initiated by other immigration enforcement programs pending a final decision on the case by an immigration judge.

Case Management is responsible for the processing of aliens apprehended for violations of immigration law in an expedient manner and in accordance with all laws and regulations. The program ensures that apprehended aliens are processed through the immigration legal system and afforded rights under the law. This program manages alien cases initiated by other enforcement programs pending a final decision on the case by an immigration judge.

The implementation of the Custody Determination Unit (CDU) has ensured DRO's compliance with applicable custody review regulations, thereby reducing adverse litigation and limiting DRO's liability in habeas actions. The Field Oversight Program (FOP) developed by CDU, monitors and oversees case management operations of detained aliens under a final order of removal. This program has ensured that field offices follow up on custody reviews, travel document requests, and take appropriate case management actions in the cases of detained aliens.

In FY 2005, DRO devoted resources for the Centralized Ticketing Unit to procure dedicated contract support to assist with finances, analyses, and information technology that would advance transportation and removal capabilities. DRO also completed a comprehensive removal guide that includes essential information on foreign countries, transit and transportation requirements and points of contact.

Pending the creation of three permanent officer positions to oversee and coordinate removals from abroad, DRO detailed an officer to Frankfurt, Germany. Preparations to detail an officer to the Netherlands are underway.

In FY 2006, DRO plans to pursue ways to use Centralized Ticketing for improving transportation and removal services, work with government agencies and embassies to accelerate issuance of travel documents for aliens pending removal from the United States, and make the database portion of removal guide available online to appropriate field personnel.

In FY 2007 the program increase will fund the transportation services necessary to support the anticipated volume of expedited removals associated. Centralized Ticketing is expected to facilitate removal activities.

DRO will continue to engage other government agencies and embassies to accelerate the issuance of travel documents for aliens pending removal from the United States and engage other government agencies and embassies to expedite the issuance of travel documents for aliens pending removal from the United States.

DHS Infrastructure Transformation Program

The Department's Infrastructure Transformation Program (ITP), led by the Office of the Chief Information Officer (OCIO), will integrate the IT infrastructures of the 22 legacy components into "One Infrastructure". Currently, most of the Department's components fund and are supported by separate and largely stove-piped IT infrastructures. This environment makes it difficult to share information across components and has resulted in redundant investments and wasted resources. The ITP will eliminate the duplicative infrastructures and provide common capabilities and services for all components to leverage.

The ITP consists of five domains with a Department component assigned as a steward responsible and accountable for the performance of each domain. The domains and their stewards are listed below:

- Network Services led by Customs and Border Protection (CBP);
- Data Center Services led by CBP;
- Email Services led by U.S. Coast Guard (USCG);
- Help Desk Services led by USCG; and
- Video Operations Services led by Federal Emergency Management Agency (FEMA).

The OCIO oversees the work of the stewards and the other components to ensure operational requirements are met and investments and resource allocations are balanced across the components.

Implementation of the ITP will eliminate the need for components to spend resources on improving their own infrastructures. Instead, some of the investment funding previously used for stovepiped infrastructures will be used to support the department-wide ITP effort. For example, CBP's IT initiatives such as the Automated Commercial Environment will benefit from the capabilities and services the ITP will provide such as network access, data center hosting, email/collaboration services, wireless access, integrated help desk, voice access, video services, and on-site support. Rather than independently developing new capabilities or augmenting legacy capabilities within CBP, the ITP will provide enterprise-level services that will benefit all components.

By investing in the ITP, DHS components will benefit from economies of scale while promoting Department integration, and improving information sharing and interoperability. The amount of IT investment funding from components to support the ITP is still under deliberation and any such proposal will be fully vetted with the Congress prior to any actions being taken.

Program Increase: Internal Controls/Financial Audit

Strategic Goal(s) & Objective(s): 2.2 Enforce Trade and Immigration Laws
PPA: Multiple

Program Increase: Positions 8 FTE 4 Dollars \$1,000
Legal Proceedings Positions 1 FTE .5 Dollars \$125
Investigations Positions 4 FTE 2.0 Dollars \$500
DRO Positions 3 FTE 1.5 Dollars \$375

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							-	-	\$-
Program Increase							8	4	1,000
Total Request	-	-	\$-	-	-	\$-	8	4	\$1,000

Description of Item

The funding for this program increase is required to staff a stand-alone division ICE Office of Financial Management (OFM). The purpose of the division is to perform planning, evaluation, testing, transaction analysis, and reporting on internal controls over financial reporting of annual and quarterly financial statements, periodic reports to the Department of the Treasury and the Office of Management and Budget (OMB), as well as internal management reports. The establishment of the division within the OFM organizational structure indicates the importance of internal controls to ICE management.

The implementation of effective internal controls will be conducted in five phrases:

- (1) Planning phase which includes determining scope and processes with material impact on the financial reports, evaluating organizational structure, assessing risk, structuring review activities, planning and monitoring testing approach;
- (2) Evaluation phase of existing controls at the organizational entity level which includes conducting interviews, reviewing materials to develop an understanding of the key processes, evaluating and documenting controls, and assessing effectiveness;

- (3) Evaluation phase of existing controls at the business process level, e.g., payment processing, revenue processing, procurement, asset management, budget execution, etc.
- (4) Test phase of effective controls at the transaction levels which involves identifying key internal and application (system) controls, identifying key IT controls, assessing the effectiveness of the design for the controls, reviewing system outputs, and comparing actual results to intended results; and
- (5) Conclusion development phase that includes recommendations and corrective action plans required to address weaknesses identified in the testing phase.

Staffing requirements for this program increase are based upon comparable levels of personnel resources utilized for financial statement audits.

\$802,000 of this increase will fund eight positions:

- 1 GS-15 Director to head the Division and provide planning, oversight, direction and supervision of the subordinate staff;
- 3 GS-14 Senior Staff Accountants to perform the activities required to carry out the assessment cycle and to provide team leadership;
- 3 GS-14 Staff Accountants to perform assessment cycle activities; and
- 1 GS-12 Technical Writer to provide documentation support and report writing for the activities of the division.

The remaining \$198,000 will fund travel for 20 site visits, 320 hours of training and 100 hours of contractor support. Travel associated with the site visits is planned for locations where documentation is maintained, where operations occur, and where direct observation is needed. At a minimum, site visits will be conducted to observe payment processing in Texas, revenue and collection processing in Vermont, and personnel/payroll processing in California. Travel to these locations, which process thousands of transactions each month, will likely involve two or three persons and span five days.

Continuing professional education (CPE) training costs are also included in this request since the nature of the duties performed are comparable to those of financial statement auditors and therefore require maintaining certain competencies. Maintenance of professional certifications requires a minimum of 40 hours of continuing professional education each year.

The evaluation of certain processes and operations, such as information technology centers, may require specialized knowledge that is external to the financial domain. In these instances, contractor support will be needed to bridge the gap. Contractor support may also be needed to assist staff activities with unanticipated complexities and to ensure compliance with certain tight deadlines.

Justification

The Department of Homeland Security Financial Accountability Act requires that the annual Performance and Accountability Report (PAR) include an assertion by the Secretary on the adequacy of internal controls that apply to financial reporting. In addition, the Act requires the Secretary to include an audit opinion over the Department's internal controls over financial reporting.

Requirements for internal control reporting and audit impose significant management challenges and resource demands on the Department and Department components. For ICE, the effort requires a competent and skillfully-trained staff that is permanent and dedicated to developing:

- Internal control process analysis documentation,
- Internal control test of design and test of operating effectiveness,
- Precise remediation strategies for material weaknesses in internal control, and
- Feedback support to project management for the DHS Internal Control Committee.

In addition to planning, evaluating, and reporting, ICE will test and document the operating effectiveness of the internal controls. Previously, independent auditors performed this work. Testing and documentation requirements are expected to entail the most significant workload. Responsibility for carrying out the internal control assessment tasks has been assigned to ICE OFM.

Currently, there are no dedicated OFM resources in base funding to perform the required internal control activities. There is currently one accountant, serving on a temporary appointment, performing a limited range of internal control planning on a full-time basis. The manager providing oversight and direction to this accountant is doing so on a collateral duty basis.

Impact on Performance (Relationship of Increase to Strategic Goals)

As an administrative support program for the immigration and trade law enforcement operations for ICE, OFM is responsible for providing financial reporting requirements for both internal and external purposes. The implementation of internal controls over financial reporting is intended to lend integrity and confidence in affected reporting and is expected to ensure work products are timely and measurably-improved quality. A primary measure is an unqualified audit opinion on financial statements. Proper planning, evaluation, testing and documentation of internal controls are contributable factors that are essential to this achievement. Without sound internal controls over financial reporting that have been tested and documented, it will not be possible to obtain an unqualified audit opinion on ICE financial statements. Because ICE currently performs accounting services for other DHS components, any weakness in ICE internal controls will adversely impact the components as well as DHS as a whole.

Program Increase: Positions 32 FTE 16 Dollars \$3,600
Legal Proceedings Positions 2 FTE 1 Dollars \$ 225
Investigations Positions 19 FTE 10 Dollars \$2,140
DRO Positions 11 FTE 5 Dollars \$1,235

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							--	--	--
Program Increase							32	16	3,600
Total Request	55	45	\$8,412	55	52	\$10,022	32	16	3,600

Description of Item

This request will fund 32 positions needed within the ICE Office of Procurement to improve office operations and to keep pace with increased work levels without jeopardizing program office deadlines and overall quality in procurement actions. With this staffing increase, the Office of Procurement will be able to complete planned upgrades of information technology systems, respond to audits and data calls with increased accuracy, and improve lead times in major acquisition planning initiatives.

\$3,031,000 of this increase would fund 32 positions:

- 1 GS-1102-15 Policy Oversight Contracting Officer;
- 4 GS-1102-15 Senior Management/Branch Chiefs
- 9 GS-1102-14 Senior Contracting Officers;
- 8 GS-1102-13 Contracting Officers; and
- 10 GS-1102-12 Contracting Specialists.

The remaining \$569,000 in resources will fund PRISM Procurement Software Licenses for new users, contracting training classes required for Purchasing Warrant Authority, and additional office equipment and operating expenses.

Justification

Each year, the ICE Office of Procurement oversees \$1.9 billion in acquisitions that directly support all ICE program offices. Specifically, the Office of Procurement processes over 4,800 requisitions, resulting in the award of approximately 3,900 procurement actions each year. This is in addition to

responding to over 50 procurement data calls, 736 procurement reviews and participation in the resolution of five to seven major litigation actions (e.g., protests, claims, etc.)

The Office of the Inspector General (OIG) has found that one of the most significant vulnerabilities Department-wide is the lack of sufficient staff to execute critical procurement functions. Additionally, a GAO audit review of 42 of 185 active ICE contracts identified a need for consistent improvement in the areas of acquisition planning (to promote competition) and contract monitoring (to improve contract administration). Both issues, if not properly addressed through adequate contracting staff and appropriate management oversight, could lead to significant management problems.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding this program increase for procurement improvement ensures that ICE program offices and operations have the necessary weapons, ammunition, body armor, surveillance systems, and other mission-essential products and services needed to protect the continuity of the overall ICE mission.

Additional staffing will provide that the needed products and services are purchased/acquired and delivered in a timely manner. Procurement lead time is defined as the estimated amount of time it takes to fulfill a contract action once a complete requirements package is received. The ICE Office of Procurement's current lead time for contract actions in excess of \$100,000 is 75 to 180 days, depending on the complexity of the action. For competitive commercial contracts, the lead time is approximately 75 days. The program increase will provide the additional staff to process big ticket actions and to perform necessary oversight to improve the quality of the contract action while simultaneously reducing lead time by 25 to 35 percent.

As outlined in the GAO report and other studies conducted by the CPO, reducing the volume of transactions per Contract Specialist will improve the quality, timeliness, and accuracy of procurement actions and provide for better compliance with policy, processes, and operating procedures. Consequently, the Office of Procurement expects to improve customer service and satisfaction for ICE programs as well as afford the opportunity to conduct spend analyses that will identify areas for strategic purchasing and improvement of purchasing power; thus generating cost savings for ICE programs and resulting in effective buying practices.

Contracts procured to support ICE mission-critical activities are highly visible, complex, and demand integrity of the procurement process. An enhancement of dedicated, critical positions within the ICE Office of Procurement will improve procurement efforts and will help to reduce the potential for errors, omissions, delays, unattainable deadlines, and other work-related malfunctions attributable to inadequate personnel resources; thereby drawing unneeded attention of the media, DHS OIG, GAO, committees of Congress, and other high-ranking administrative officials.

Salaries and Expenses
Justification of Program Changes
(Dollars in Thousands)**

Program Increase: Compliance Investigations

Strategic Goal(s) & Objective(s): 2.2 Enforce Trade and Immigration Laws
PPA: Law Enforcement

Program Increase: Positions 54 FTE 27 Dollars \$10,017

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							130	130	\$26,764
Program Increase							54	27	\$10,017
Total Request	130	65	\$16,000	130	130	\$26,188	184	157	\$36,781

Description of Item

Funding will support an expansion of ICE’s Office of Investigations’ Compliance Enforcement Unit (CEU). The expansion would provide a total of 54 (46 Special Agent, and 8 Investigative Support) positions in addition to the 130 current positions. SEVIS fees will fund 23 agents to support compliance enforcement.

Justification

Millions of nonimmigrant aliens enter the United States every year to visit, work and attend school. Some of these individuals will overstay their term of admission for economic or personal reasons, but others may do so for more sinister reasons. To combat the threat to national security, DHS employs the National Security Entry Exit Registration System (NSEERS), the Student and Exchange Visitor Information System (SEVIS), and the U.S. Visitor and Immigrant Status Indicator Technology System (US-VISIT) to track nonimmigrant aliens during their stay in the United States. The responsibility for enforcing compliance with the terms of admission, as tracked by these programs, lies with the ICE CEU. The additional positions will help ICE increase visa and visa-overstay investigations.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested increase in positions for compliance enforcement investigations directly supports DHS Strategic Goal 2 - Prevention, Objective 2.2 “Enforce trade and immigration laws.” By ensuring consequences for immigration violations, integrity will be restored to the immigration system. This will result in increased security of the immigration system, a reduction in the number of malafide nonimmigrant aliens, facilitation of bona fide nonimmigrant alien processing, and promotion of international respect for the U.S. borders.

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							124	124	\$38,229
Program Increase							206	103	\$41,681
Total Request	23	12	\$5,000	124	74	\$38,000	330	227	\$79,910

Description of Item

The request will fund 206 additional positions within the ICE Office of Investigations devoted to worksite enforcement efforts. With this staffing increase, the Office of Investigations will increase investigations of employers that attract significant numbers of illegal and undocumented workers. Funding is requested for 171 Special Agents and 35 support positions.

Justification

Expanding our enforcement of immigration laws at worksites is another key element of any comprehensive border enforcement and control strategy. Resources devoted to worksite enforcement activities declined steadily in the years following the passage of the 1986 Immigration Reform and Control Act (IRCA), which made it unlawful for employers to knowingly employ undocumented aliens. The worksite enforcement program's post-9/11 focus on national security related critical infrastructure protection operations further led to a reduction in the number of agents available to conduct traditional worksite enforcement investigations (see GAO-05-822T *Preliminary Observations on Employment Verification and Worksite Efforts* released June 2005).

The requested increase will significantly enhance worksite enforcement activity, which will create a deterrent effect to illegal immigration and stem demand for undocumented labor.

The requested funding is more than double the resources in FY 2005 and FY 2006 and will increase worksite enforcement efforts as part of the President's plan for comprehensive immigration reform.

Impact on Performance (Relationship of Increase to Strategic Goals)

Worksite Enforcement is a primary illegal immigration prevention tool that works to shut down the U.S. demand for undocumented labor, thus fitting directly under the DHS goal of Prevention and the strategic objective 2.2, "Enforce Trade and Immigration Laws." The increase in staffing will significantly enhance enforcement activity, which will create a deterrent effect and increase the discovery of violations.

Total Request	242	233	\$15,500	242	238	\$17,500	307	271	\$22,206

Description of Item

The request includes \$400,000 for training to support implementation of the provisions of Section 287(g) of the Immigration and Nationality Act (INA) to delegate authority to enforce limited immigration functions to a larger number of State and local law enforcement officers.

The request provides \$3,926,000 for additional Law Enforcement Technicians (LETs) for the ICE Law Enforcement Support Center (LESC) in response to increasing demands by law enforcement officers for up-to-the-minute information on immigration alien queries. Funding will provide 58 LETs and 7 Supervisory LETs to assist with answering about 700,000 inquiries anticipated for FY 2007 from law enforcement officers. For FY 2005, the total number of law enforcement queries was 667,502. As of December 2005, the total number of queries was 148,946.

Justification

Section 287(g) of the Immigration and Nationality Act authorizes the Secretary of Homeland Security to enter into written agreements to delegate authority to enforce federal immigration laws to state and local law enforcement officers. Participation by state and local governments is completely voluntary. Delegation is granted only after extensive training from ICE, and delegated officers perform immigration enforcement functions under direct ICE supervision. Section 287(g) requires that a written memorandum of understanding (MOU) be created that defines the authorities being certified, the training requirements, the required supervision, the length of the agreement, and any other important issues, including regular meetings to review progress and adherence to the MOU. The level of interest in the 287(g) Delegation of Authority Program from state/local agencies has increased, thus creating the potential to improve immigration enforcement.

The ICE LESC, located in Williston, Vermont, provides information to law enforcement, primarily State and local, on the immigration status of foreign-born persons encountered in the course of law enforcement duties. The LESC operates 24 hours a day, 365 days a year, and provides these services to all United States law enforcement, regardless of whether they participate in the 287(g) program or not. Law Enforcement Technicians (LETs) query eight separate databases for immigration information as well as national and State criminal wants, warrants, and historical databases to formulate a response to law enforcement on the immigration status of the individual. These services are provided not only to law enforcement officers working the streets, but also to investigators, pre-trial and probation officers, and officers working in detention facilities. LETs also enter data into the National Criminal Information Center (NCIC) Immigration Violator File (IVF) on persons who have been deported or are scheduled to be deported but have absconded. The IVF now contains the names of over 150,000 individuals who are subject to arrest if located in the United States.

Impact on Performance (Relationship of Increase to Strategic Goals)

As a force multiplier for ICE immigration enforcement, the 287(g) program allows ICE to train, certify, and supervise State and local law enforcement officers in domestic security task forces, motor vehicle licensing offices, and correctional institutions. These officers can perform immigration-related enforcement operations targeting criminal aliens, fraudulent document vendors, illegal aliens working in sensitive critical infrastructure positions, and violent sexual offenders. Further, the 287(g) program assists the participating State/local agencies in ensuring the integrity of their internal licensing/benefit systems and removes criminal aliens from their jails and probation/parole programs, all of which pose a significant financial burden to the State/local governments. The linking of 287(g) Delegation of Authority Program and the CAP is achieved through the development and initiation of a formal MOU between ICE and a state/local/county jail. The MOU authorizes ICE to train and certify officers from the state/local/county entity to perform immigration enforcement duties from within the prescribed jail. Those certified officers identify criminal aliens, conduct record checks using ICE databases and process the alien for removal. This serves as a force multiplier for the CAP and is done under ICE supervision.

Since its creation, the number of queries received by the LESC has increased measurably every year and is likely to continue to increase. The LESC responded to 594,352 Immigration Alien Queries (IAQs) in FY 2003 and 667,460 IAQs in FY 2004. The number of IAQs received by the LESC in FY 2005 exceeded 676,000. Increases in immigration enforcement operations, such as increased participation in the 287(g) program, will increase the IAQ workload at the LESC. On average, responses to inquiries resulting from police street stops take about 20-25 minutes. LESC is working to reduce the response time to 10 minutes, whenever possible. However, without adequate staffing, the higher demand will likely result in longer response times. By providing timely, accurate immigration status information to law enforcement, primarily state and local law enforcement, the LESC ensures that these officers have timely and accurate immigration status information available to them when they need it. State and local law enforcement officers far exceed the number of federal officers and statistically have a far greater chance of encountering illegal aliens in the United States.

**Department of Homeland Security
Immigration and Customs Enforcement (ICE)
Salaries and Expenses
Justification of Program Changes

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									
Program Increase									\$4,444
Total Request									\$4,444

Description of Item

The request funds the training of ICE detention and investigative personnel at the Federal Law Enforcement Training Center (FLETC). While the request for FLETC includes requested resources for the training of new ICE personnel, the budget request is proposing to test the administrative and efficiency value of funding some FLETC training through reimbursable agreements between components such as CBP and ICE.

Justification

A significant SBI goal is hiring and training additional staff charged with providing required personnel commensurate with additional beds and removal activities the program brings. ICE will send approximately 620 detention officers and immigration enforcement agents, as well as 200 special agents to FLETC to ensure sufficient staff is trained.

Impact on Performance (Relationship of Increase to Strategic Goals)

The requested funds will provide trained and ready special agents and detention personnel to maximize the full potential of the skills, experience and capabilities required to enforce immigration laws. Special agents will possess the skills necessary to conduct investigations which have an enforcement consequence (arrest, indictment, conviction, seizure, fine or penalty). The detention personnel will have the skills necessary to affect an increase in the number of aliens with a final order of removal. Training additional law enforcement personnel is critical to increasing performance of objective 2.2 of the DHS Strategic Plan "Enforce trade and immigration laws."

Program Increase: Fugitive Operations Unit

Strategic Goal(s) & Objective(s): 2.2 Enforcing Immigration and Trade Laws
PPA: Detention and Removal

Program Increase: Positions 178 FTE 90 Dollars \$60,000,000

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							399	396	\$113,648
Program Increase							178	90	\$60,000
Total Request	129	138	\$85,904	399	366	\$108,912	577	486	\$173,648

Description of Item

This program increase requests resources to staff 18 fugitive operations teams. There are seven positions assigned for each team: one Supervisory Deportation Officer (SDO), four Deportation Officers (DOs), one Immigration Enforcement Agent (IEA), and one Deportation Assistant (DA), for a total of 126 positions. The request also includes funding for approximately 700 beds required for the additional apprehensions made by the Fugitive Operations teams.

The increase will also fund support personnel including: four DOs to conduct case management, 38 IEAs to handle transportation and custody issues, and 10 DAs to assist with case files.

Justification

Addressing the fugitive alien problem is an important component of SBI. Criminal fugitive aliens pose harm and potential threat to homeland security if not apprehended and removed from the United States. Criminal aliens include terrorists, human smugglers, sexual predators, gang members, drug dealers, purveyors of counterfeit and fraudulent documents and other contraband, persons engaged in black market transactions, money laundering, trafficking, etc.

DRO devotes resources for fugitive operations. Operating as seven-member teams, each team currently averages 500 apprehensions a year with a performance target of 1,000 apprehensions per team.

Appropriated resources for FY 2006 provide funding for up to 52 fugitive operations teams. Combined with the 18 new teams, DRO will oversee a total of 70 fugitive operations teams. Fugitive

operations teams pursue all illegal aliens who have absconded to avoid prosecution and removal from the United States.

The level of effort required by the members of the fugitive operations teams to apprehend absconders does not permit adequate time to process the paperwork for each alien case and to arrange for custody, transportation, and removal. The volume of administrative work generated by the fugitive operations requires the services and assistance of Headquarters and field support. For the 18 teams, 52 support positions are required.

Impact on Performance (Relationship of Increase to Strategic Goals)

The Fugitive Operations is one of five principal programs under DRO. In FY 2005, fugitive operations teams apprehended over 15,000 aliens. Of those apprehended: approximately 11,200 were fugitive aliens, 4,000 were charged with violation of immigration laws, and 270 were sexual predators. An estimated 10,470 were removed from the United States and the remainder was placed in immigration proceedings. The number of alien apprehensions for FY 2006 is projected to be 20,000.

Placement of the fugitive operations teams is typically based on the fugitive alien docket numbers. To provide coverage throughout the United States, at least one team is assigned to work from a field office and select sub-offices. Multiple teams are assigned to areas where fugitive aliens tend to congregate.

Increasing resources for fugitive operations will help to advance enforcement efforts aimed at eliminating the fugitive alien population.

Program Increase	-	-	-	-	-	-	560	280	\$386,690
Total Request	3,439	3,188	1,133,886	3,720	3,459	1,210,214	4,289	3,932	\$1,744,024

Description of Item

This program increase supports resources required to provide detention capacity that accommodates the anticipated increase in expedited removal of illegal aliens associated with the SBI. The increase funds the cost for: (1) 6,000 beds (\$208 million); (2) transportation and removal services (\$94.1 million); and (3) 560 positions that include Immigration Enforcement Agents (IEAs) and Detention Officers (DOs), as well as support staff (\$84.6 million).

The resource requirements for this program increase were based on the present level of effort to perform custody management and transportation/removal services for 100,000 'other-than-Mexican' aliens - the profile for expedited removals (ER).

Justification

Currently, all non-criminal Mexican illegal aliens apprehended are returned to Mexico immediately. Expedited removal applies to illegal non-Mexican aliens who are apprehended near our southwestern border—or who are stopped shortly after entering the United States without valid documents. These aliens will be detained and then removed to their home countries as quickly as possible. However, when no bed space is available, these non-Mexican aliens are released and ordered to appear in court at a future date. The ICE request helps eliminate this “catch and release” process.

Secretary Chertoff's goal is to end the practice of “catch and release” and will detain and remove these aliens as quickly as possible from the country. To meet this commitment, the Budget provides funding to add 6,700 new detention beds to hold illegal immigrants while they await removal (including 700

beds for absconders). ICE will also improve the processing and deportation of aliens to cut the detention time for aliens approximately in half—from 32 to 15 days.

In addition to detention beds, detention personnel are required for the processing, detention, and removal of aliens associated with the 6,000 beds and the expedited removal of 100,000 ERs. Resources will fund 54 DOs (Deportation Officers), 176 IEAs, (Immigration Enforcement Officers), and 50 DAs (Deportation Assistants) at a cost of \$84.6 million.

The transportation costs (via bus, air, automobile, van) to remove illegal aliens are \$94.1 million. Transportation Costs are approximately \$1,000 per removal and include costs for vehicles, airfare, fuel, maintenance, and retrofitting of new vehicles purchases.

Impact on Performance

ICE is reducing the detention stay of aliens under expedited removal proceedings from 32 days to approximately 15 days. DRO will also seek to engage government agencies and embassies to expedite the issuance of travel documents for aliens pending removal from the United States. Improved travel document acquisitions, a quicker country clearance, and other efficiencies will result in a decrease in the average detention stay. This will allow for an increase in the number of aliens detained and removed.

**Department of Homeland Security
Immigration and Customs Enforcement (ICE)
Justification of Program Changes**
(Dollars in Thousands)

Program Increase: Legal Proceedings

Strategic Goal(s) & Objective(s): 2.2 Enforcing Immigration and Trade Laws
PPA: Detention and Removal

Program Increase: Positions 257 FTE 128 Dollars \$38,500,000

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level	-	-	-	-	-	-	906	906	\$148,853
Program Increase	-	-	-	-	-	-	257	128	\$38,500
Total Request	858	819	\$132,535	906	882	\$147,414	1,163	1,034	\$187,353

Description of Item

The request enables the hiring of 257 attorneys required to prepare legal documents, address legal issues, and provide legal representation on behalf of the DHS before immigration proceedings associated with the detention and removal efforts of the SBI.

Justification

The Legal Proceedings program is the DHS legal component that is authorized to represent the federal government in immigration proceedings that end up in immigration courts. Legal Proceedings is essential to the successful completion of the expedited removal process. Without the legal expertise to interpret, uphold, and apply the provisions of immigration law that authorizes the enforcement of expedited removals, frivolous lawsuits would go unchallenged, the efforts of the detention and removal program would be futile, criminal and illegal aliens would go unpunished, and the integrity of the immigration process would be jeopardized.

Legal Proceedings attorneys are responsible for handling a variety of immigration-related issues that arise during the course of expedited removals that include: contested removals, custody determinations, applications for administrative relief, habeas petitions and petitions for review, extraditions, requests for pardons and clemency, plea bargains, paroles, custody standards and regulations, unaccompanied minors, repatriations, forced feedings, chemical restraints, psychiatric evaluations, among other issues. The workload also includes officer authority issues, such as use of

force, weapons carriage and firearms policy, arrests, search and seizure, emergency driving, worksite enforcement, benefits fraud, alien smuggling and trafficking, asset forfeiture, detention authority, fugitive operations.

The average caseload per attorney for this program increase is 390 cases according to caseload projections and includes support personnel inputs. By increasing the use of Expedited Removal, it is assumed that there will be an overall reduction in the caseload of the attorneys once all legal personnel are brought on board.

Impact on Performance

Legal Proceedings handled 352,250 matters in Immigration Court in FY 2005. SBI will increase the number of matters in the Immigration Court, but this increase will reduce the average caseload of attorneys.

This program increase supports the legal enforcement of detention and removal of unlawful aliens and is consistent with Strategic Goal and Objective 2.2, "Enforcing Immigration and Trade Laws."

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security

PPA Mission Statement

In the Office of Investigations (OI), our broad Homeland Security mission is to prevent acts of terrorism and ensure the safety and economic well being of our country. We work under that mandate by dividing our investigative effort into three broad investigative categories: National Security, Financial and Trade, and Smuggling and Public Safety. These three categories represent the general priorities we use to guide our efforts in our daily activities. Each priority can be broken down into many different sub-categories and, in fact, are operationally interrelated in a great many cases.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$851,672	\$877,106	\$962,461	\$85,355

PPA Mission Statement

Office of International Affairs (OIA) expands the investigative efforts of OI to over 50 foreign locations. The OIA represents the international assets of all ICE programs and collaborates with U.S. Citizenship and Immigration Services, U.S. Customs and Border Protection (CBP), and other DHS components. The OIA liaises with foreign governments and international partners to facilitate the enforcement of U.S. customs and immigration laws beyond our borders in an effort to interdict criminals and prevent or disrupt criminal activity. OIA also executes the operational mandate of Section 428 of the Homeland Security Act through ICE's Visa Security Program (VSP).

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007

PPA Mission Statement

Immigration enforcement authorities apprehend potentially removable aliens. In many cases, these aliens must be detained while they go through immigration proceedings and until they are removed. Often the number of apprehensions exceeds the detention space available and DRO must prioritize which cases will be detained. Custody Operations provides safe, secure, and humane confinement for these aliens. It also ensures that aliens in ICE custody appear for their immigration hearings, and then for their subsequent removal.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$259,466	\$346,845	\$443,513	\$96,668

PPA Mission Statement

The Alternatives to Detention program places low-risk aliens under various forms of intensive supervision rather than traditional detention as a cost-effective way to ensure their appearance for an immigration hearing or for removal. This program lowers the risk that aliens will be fugitives.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$2,848	\$6,851	\$9,767	\$2,916

PPA Mission Statement

The Institutional Removal Program (IRP) ensures that aliens are not released back into the community before they are removed from the United States. Through the IRP, ICE officers interview incarcerated aliens to determine whether they are amenable to immigration proceedings. If a case receives a final order of removal, ICE officers will immediately take that alien into custody upon completion of his or her criminal sentence and then prepare that case for removal.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007

PPA Mission Statement

Intelligence - Collect, analyze and share information on critical homeland security vulnerabilities that could be exploited by terrorist and criminal organizations. The Office of Intelligence focuses on data and information related to the movement of people, money and materials into, within and out of the United States to provide accurate and timely reporting to ICE leadership and field agents in support of enforcement operations. ICE's intelligence functions are managed by a highly trained team of professionals with expertise in data and threat analysis, languages, financial investigations, counterterrorism and a number of other areas. ICE intelligence professionals process information from a variety of sources to provide assessments of patterns, trends and new developments in a wide range of law enforcement areas. These include the following areas:

- Terrorism
 - Human Smuggling and Trafficking
 - Money Laundering and Financial Crime
 - Drug Smuggling
 - Criminal Aliens
 - Air and Marine Smuggling
 - Cyber Crimes
 - Identity Fraud and Document Fraud
 - Arms Trafficking and Technology Transfers
 - Commercial Fraud
 - Mass Migration and Conditions Affecting Immigration
 - Security at Federal Facilities and Other Critical Infrastructure Sites
 - Airspace Security

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$32,537	\$34,060	\$34,860	\$800

Salaries and Benefits includes costs for 333 FTEs. The FY 2007 request includes an increase of \$800,000 in personnel compensation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$869	\$885	\$873	(\$12)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes a decrease of \$12,000.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change

PPA Mission Statement

ICE Legal Proceedings (also referred to as the Office of the Principal Legal Advisor or "OPLA") provides the legal advice, training, and services required to support the ICE mission while defending the immigration laws of the U. S. in the administrative and federal courts and is the legal representative for ICE. OPLA is the DHS legal component within ICE that is authorized to represent the Government in immigration proceedings that end up in immigration courts.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007

PPA Mission Statement

Federal Protective Service (FPS) is the Federal law enforcement organization responsible for the protection and security of Federally-owned and leased buildings, property, and personnel across the Nation. The FPS operations focus on law enforcement and reduction of Federal facility vulnerabilities to criminal and terrorist threats, while ensuring that public facilities are safe, secure and remain available as a vital part of every day American life. FPS uses approximately 15,000 contract security guards and 1,100 Law Enforcement Officers who are strategically located throughout the Nation to provide security and law enforcement coverage to all GSA-owned and -operated Federal facilities.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. Immigration and Customs Enforcement**
Federal Protective Service**I. Appropriation Overview**

Federal Protective Service (FPS) is the Federal law enforcement organization responsible for the protection and security of Federally-owned and leased buildings, property, and personnel across the Nation. The FPS operations focus on law enforcement and reduction of Federal facility vulnerabilities to criminal and terrorist threats, while ensuring that public facilities are safe, secure and remain available as a vital part of every day American life. FPS uses approximately 15,000 contract security guards and 1,100 Law Enforcement Officers who are strategically located throughout the Nation to provide security and law enforcement coverage to all General Services Administration (GSA)-owned and -operated Federal facilities.

B. Budget Activities:

Basic Security - The FY 2007 Basic Security Fee was approved by the Office of Management and Budget for \$0.39 and is charged to all building tenants on a per square footage basis in GSA-owned and operated facilities. The basic security rate covers various types of security services, such as law enforcement officers on Federally-controlled property that respond to service and emergency calls, conduct preliminary investigations of incidents, and capture and detain suspects. The basic security rate also includes the monitoring of 24-hour security alarms, providing nationwide dispatch services, conducting regional threat assessments of Federal facilities, presenting security awareness programs for tenants, coordinating Occupant Emergency Plans, and sharing of current intelligence on domestic and foreign terrorist threats within the Criminal Investigations Program.

Building Specific Security - Building Specific Security is based on security requirements specific to a particular building. The two components are the Contract Security Guard and Security Systems Programs. The Contract Security Guard Program includes access control to facility entrances and exits, employee and visitor identification checks, monitoring security equipment, and roving patrols of the interior and exterior of Federal facilities. The Security Systems Program includes the purchase, installation, and maintenance of security equipment, such as cameras, alarms, magnetometers, and x-ray machines. Security equipment is based on identified projects in security surveys and standard replacement schedules.

C. Budget Request Summary:

ICE requests 1,438 positions, 1,438 FTE, and \$516,011,000 for FY 2007. The total adjustments-to-base is 0 FTE and \$29,011,000 based on increased fee revenue.

2007 Program Change
2007 Request	1,029	1,029	123,310
Total Change 2006-2007	14,075

U.S. Immigration and Customs Enforcement requests \$123.3 million for this activity. This is an increase of \$14 million over FY 2006, which is the estimated fee revenue increase resulting from the rate increase from \$.35 to \$.39 per square foot.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Federal Protective Service (FPS) is the Federal law enforcement organization responsible for the protection and security of Federal buildings, property, and personnel occupying those facilities across the Nation. The FPS operations focus on law enforcement and reduction of Federal facility vulnerabilities to criminal and terrorist threats, while ensuring that public facilities are safe, secure and remain available as a vital part of every day American life.

The basic security fee is approved by the Office of Management and Budget each year and is charged to all GSA building tenants on a per-square-footage basis in FPS protected facilities. The basic security rate covers various types of security services such as: law enforcement officers on Federally-controlled property that respond to service and emergency calls, conduct preliminary investigations of incidents, and capture and detain suspects. This rate funds the FPS Mega Center that maintains 24-hour security alarm monitoring and provides nationwide communication dispatch to enforcement personnel.

The fee also covers the physical security initiatives including security awareness programs for tenants, coordination of Occupant Emergency Plans and consultations with Building Security Committees on security countermeasures for Federal facilities. The basic security fee also covers building threat assessments of Federal facilities and the development of action plans to reduce the threats. Additionally, services requested at Federal facilities within and outside of the GSA inventory are provided on a reimbursable basis.

The additional revenue will fund pay and non-pay inflation. The non-pay inflation factor is applied to supplies, materials, equipment, and contracts with private sector, printing costs, transportation costs and utilities.

The FPS strategic goal is the protection of Federal facilities and employees through a comprehensive law enforcement and security program. The FPS law enforcement operations include conducting criminal investigations, and providing law enforcement response to potential crimes and/or threats at Federal facilities. FPS security operations include regular physical security assessments of Federal facilities, nationwide communications, alarm monitoring, and dispatching services, and administration of contract guards within Federal facilities.

Subsequent to the events of September 11, 2001, FPS has faced the new reality of protecting and securing Federal facilities by improving its ability to respond to new and changing threats. Through various FPS programs, Federal facilities remain protected, yet open and welcoming to legitimate visitors. Federal facilities are secure for all Federal employees and officials to perform their missions in service to the American public.

During FY 2005 FPS provided significant and appropriate law enforcement and security services for approximately 9,000 facilities to accommodate the mission. FPS monitored 5,700 alarm accounts daily for intrusion detection, fire and personnel protection, received 2,200 alarm activations, responded to 148 incidents on Federal property, one weapons and explosives incident, 11 demonstrations and disturbance incidents, eight accident related incidents and 18 fire related incidents.

In FY2006 FPS will improve its identification and reduction of real and/or perceived threats faced by our customers. FPS will enhance intelligence and information sharing, hazardous materials response, special operations capabilities, protective services, and strengthened security standards that will represent the key elements for reducing threat and vulnerability levels at Federal facilities. The increase in law enforcement presence and oversight, when combined with other countermeasures, will maximize the safety and security of the buildings, occupants, and visitors.

During FY 2007 FPS will continue its focus on law enforcement and reduction of Federal facility vulnerabilities to criminal and terrorist threats.

2007 Program Change
2007 Request	409	409	392,701
Total Change 2006-2007	14,936

U.S. Immigration and Customs Enforcement requests \$392.7 million for this activity. This is an increase of \$14.9 million over FY 2006 for pay and non-pay inflation.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Federal Protective Service (FPS) is the Federal law enforcement organization responsible for the protection and security of Federal buildings, property, and the personnel occupying those facilities across the Nation. FPS operations focus on law enforcement and reduction of Federal facility vulnerabilities to criminal and terrorist threats, while ensuring public facilities are safe, secure and remain available as a vital part of every day American life. FPS currently performs all necessary security and law enforcement functions at approximately 9,000 federally owned and leased locations throughout the United States and its territories.

The building specific fee is charged to all building tenants based on the mandatory security requirements specific to a particular building. The fee is based on the costs for contract security guards and security systems programs. The contract security guard program includes: access control to facility entrances and exits; employee and visitor identification checks; monitoring security equipment; and roving patrols of the interior and exterior of Federal facilities. The contract security guard represents the first line of defense against potential criminals and terrorists of Federal workplaces. The security system program includes the purchase, installation and maintenance of security equipment, such as cameras, alarms, magnetometers and x-ray machines. The security equipment is based on the identified mandatory projects in the security surveys and standard replacement schedules.

The additional revenue will fund pay and non-pay inflation. The non-pay inflation factor is applied to supplies, materials, equipment, and contracts with private sector, printing costs, transportation costs and utilities.

FPS mission is to render Federal facilities safe and secure for Federal employees, officials, and visitors in a cost effective manner by providing approximately 15,000 armed contract security guards, purchasing, installing, and monitoring security devices, equipment, and countermeasures in designated

buildings within approximately 9,000 Federally owned and leased facilities throughout the United States and its territories.

During FY2005 FPS maintained current countermeasures and security equipment for approximately 9,000 facilities to accommodate the mission by providing significant and appropriate law enforcement and security services. FPS provided oversight of over 15,000 armed contract guards, screened over one million Federal employees and visitors entering Federal facilities and intercepted 2,408 prohibited items from entering Federal facilities including firearms, knives and box cutters, etc.

In FY2006 FPS will improve its identification and reduction of real and/or perceived threats faced by its customers and enhance security equipment and systems through technology.

In FY2007 FPS will improve the contract guard program as well as security systems through technology improvements and training.

IV. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Justification of Proposed Changes in Federal Protective Service
Appropriation Language**

The revenues and collections of security fees credited to this account, not to exceed [\$487,000,000] \$516,011,000, shall be available until expended for necessary expenses related to the protection of federally-owned and leased buildings and for the operations of the Federal Protective Service. (Department of Homeland Security Appropriations Act, [2006] 2007.)

Explanation of Changes:

No substantive changes proposed.

PPA Mission Statement

The FY 2007 Basic Security Fee was approved by the Office of Management and Budget for \$0.39 and is charged to all building tenants on a per square footage basis in GSA-owned and operated facilities. The basic security rate covers various types of security services, such as law enforcement officers on Federally-controlled property that respond to service and emergency calls, conduct preliminary investigations of incidents, and capture and detain suspects. The basic security rate also includes the monitoring of 24-hour security alarms, providing nationwide dispatch services, conducting regional threat assessments of Federal facilities, presenting security awareness programs for tenants, coordinating Occupant Emergency Plans, consultations with Building Security Committees, and sharing of current intelligence on domestic and foreign terrorist threats within the Criminal Investigations Program.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$88,350	\$85,807	\$90,483	\$4,676

Salaries and Benefits includes costs for 1,029 FTEs. The FY 2007 request includes an increase of \$4,676,000 in personnel compensation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$1,632	\$4,410	\$4,485	\$75

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$75,000. Funding will be used to strategically place law enforcement personnel during heightened alert levels, demonstrations, and special operations.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Transportation of Things	\$1,875	\$4,790	\$4,871	\$81

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes increases of \$81,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$241	\$4,000	\$4,068	\$68

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes increases of \$68,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous char	\$1,270	\$2,600	\$2,644	\$44

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes standard inflation increases of \$44,000. Funding in this area will be used for the FPS Mega Centers to provide nationwide communication dispatch to enforcement personnel.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Printing	\$0	\$1,600	\$1,627	\$27

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes an increase of \$27,000 to print Occupant Emergency Plans and security guidance.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Operation & maintenance of facilities	\$0	\$0	\$9,000	\$9,000

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$9,000,000.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$1,493	\$3,758	\$3,822	\$64

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$64,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$1,333	\$2,270	\$2,310	\$40

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$40,000 in non-pay inflation.

PPA Mission Statement

The Building Specific Security Program is based on security requirements specific to a particular building. The two components are the Contract Security Guard and Security Systems Programs. The Contract Security Guard Program includes access control to facility entrances and exits, employee and visitor identification checks, monitoring security equipment, and roving patrols of the interior and exterior of Federal facilities. The Security Systems Program includes the purchase, installation, and maintenance of security equipment, such as cameras, alarms, magnetometers, and x-ray machines. Security equipment is based on identified projects in security surveys and standard replacement schedules.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007

	Actual	Revised Enacted	Request	Change
Operation & maintenance of facilities	\$0	\$298,962	\$312,268	\$13,306

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$13,306,000 to fund non revenue space and overhead expenses.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$2,496	\$5,710	\$5,731	\$21

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$21,000 for law enforcement supplies.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$880	\$1,400	\$1,487	\$87

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$87,000 to purchase new security equipment e.g., cameras, alarms, magnetometers, and x-ray machines.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

U.S. Immigration and Customs Enforcement
Automation Modernization

I. Appropriation Overview**A. Mission Statement for Appropriation Name:**

ATLAS is the principal automation modernization program for improving information-sharing across the Department of Homeland Security (DHS) and ICE organizations, strengthening information availability, providing a fully secure IT environment, and maintaining workforce productivity.

B. Budget Activities:

ATLAS Automation Modernization Projects

- (1) "Common Computing Environment" is a project to provide ICE e-mail standardization, implement a hardware refresh strategy to support ICE workforce production and integrate ICE with a shared DHS active directory structure;
- (2) "Integration" is a project to migrate ICE offices to the DHS One Network infrastructure to support information access, distribution, and management DHS-wide;
- (3) "ICE Mission Information" is a project to organize information so ICE users can find relevant, timely information from the best sources, improve information searching capabilities, and implement tools for integrating legacy applications with Web-enabled front-ends;
- (4) "Information Assurance" is a project to infuse strong information, network, and computer security measures to protect ICE information and systems;
- (5) "Architecture Engineering" is a project to provide state-of-the-art engineering facilities and tools to manage, operate, evaluate, and test new technologies that are in alignment with DHS Technical Architecture; and
- (6) "Transformation Planning" is a project to coordinate transformation projects, ensure compliance with the DHS Enterprise Architecture (EA) as well as adherence to cost, schedule, and performance goals.

C. Budget Request Summary:

ICE requests no positions, FTE, or funding. The total adjustment-to-base is a reduction of \$39,748,000, the FY 2006 level.

Automation Modernization
Program Performance Justification
(Dollars in thousands)

PPA: Automation Modernization

	Perm Pos	FTE	Amount
2005 Actual	\$1,240
2006 Revised Enacted	39,748
2007 Adjustments-to-Base	(39,748)
2007 Current Services
2007 Program Change
2007 Request
Total Change 2006-2007	(39,748)

ICE requests no new funding for this activity. Resources provided in 2005 and 2006 will enable a sufficiently strong modernization program into 2007.

CURRENT SERVICES PROGRAM DESCRIPTION:

ATLAS is the Immigration and Customs Enforcement (ICE) principal automation modernization program for improving information-sharing, strengthening information availability, providing a fully secure connectivity environment, and improving workforce productivity within the ICE organization.

ATLAS integrates enforcement capability rooted in a "One DHS" vision that includes sharing information, coordinating systems for identifying threats, forging DHS-wide standards and weaving together networks. To this end, the ATLAS mission is to create, sustain, secure, and manage an information technology (IT) infrastructure that supports ICE law enforcement programs.

ATLAS Automation Modernization Projects

- (1) "Common Computing Environment" is a project to provide ICE e-mail standardization, implement a hardware refresh strategy to support ICE workforce production and integrate ICE with a shared DHS active directory structure;
- (2) "Integration" is a project to migrate ICE offices to the DHS One Network infrastructure to support information access, distribution, and management DHS-wide;
- (3) "ICE Mission Information" is a project to organize information so ICE users can find relevant, timely information from the best sources, improve information searching capabilities, and implement tools for integrating legacy applications with Web-enabled front-ends;
- (4) "Information Assurance" is a project to infuse strong information, network, and computer security measures to protect ICE information and systems;

ICE AUTO - 3

(5) "Architecture Engineering" is a project to provide state-of-the-art engineering facilities and tools to manage, operate, evaluate, and test new technologies that are in alignment with DHS Technical Architecture; and

(6) "Transformation Planning" is a project to coordinate transformation projects, ensure compliance with the DHS Enterprise Architecture (EA) as well as adherence to cost, schedule, and performance goals.

ATLAS Program Goals

- Enhance ICE workforce productivity;
- Ensure integrity, security, and privacy of information and data assets;
- Promote information sharing and collaboration;
- Strengthen ICE IT program management;
- Establish a standard IT environment ICE-wide; and
- Enhance the security and protection of US citizens.

No new funding is requested for FY 2007. Because of delays in the obligation of FY 2004-2005 resources (\$49.4 million), as well as significant appropriations provided in 2006 (\$39.7M), ICE anticipates that an aggressive modernization program can be continued into 2007 without new funding.

ATLAS spending is subject rigorous external review and approval before obligations can be incurred. ICE established an ATLAS Program Management Office to ensure effective program management and facilitate the review process. Expenditure plans for 2005 and 2006 are in review and will be completed in the near future.

IV. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
U.S. Immigration and Customs Enforcement
Justification of Proposed Changes in Automation Modernization
Appropriation Language**

[For expenses of immigration and customs enforcement automated systems, \$40,150,000, to remain available until expended: Provided, That none of the funds appropriated under this heading may be obligated until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that --

(1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, part 7;

(2) complies with the Department of Homeland Security enterprise information systems architecture;

(3) complies with the acquisition rules, requirements, guidelines, and systems acquisition management practices of the Federal Government;

(4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project;

(5) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland Security, and the Office of Management and Budget; and

(6) is reviewed by the Government Accountability Office.] (*Department of Homeland Security Appropriations Act, 2006.*)

Explanation of Changes:

Because no funding is requested, appropriations language is proposed for deletion.

Full Time Equivalents		---	---	---	---

PPA Mission Statement

Automation resources are provided in support of major information technology (IT) projects within Immigration and Customs Enforcement (ICE). Automation modernization is mission-critical, with a long-term effort to meet expanding ICE needs by streamlining and re-engineering core business functions with the application of IT. Atlas is the principal automation modernization program for improving information-sharing, strengthening information availability, providing a fully secure connectivity environment, and improving workforce productivity within the ICE organization.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$1,145	\$19,670	\$0	(\$19,670)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. For Atlas, such services are primarily for IT operation and maintenance (O&M) for costs associated with maintenance for network servers, software and project management support services, training support, end user support, computer security, engineering and technical support, and other miscellaneous contractual services. For FY 2007, no additional funding for contractual IT advisory and assistance (O&M) services is requested. Funding provided in FY 2006 remains available until expended.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$95	\$20,078	\$0	(\$20,078)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. For Atlas, costs that classify as equipment include mobile/portable radios, software (capitalized and non-capitalized), network servers, special purpose IT equipment and network-related equipment. For FY 2007, no additional funding for equipment is requested. Funding provided in FY 2006 remains available until expended.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. Immigration and Customs Enforcement**
Construction**I. Appropriation Overview**

The Construction account funds are no-year funds and are available until expended. Resources are for necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration.

B. Budget Activities:**Major Construction**

The Detention and Removal Construction Program provides for the planning, design, and construction of housing, processing, medical, administrative, and support facilities to support the detention of aliens. The FY 2007 request includes capital investment projects at two Service Processing Centers that will (1) provide an additional 250 beds for new detainees, (2) provide a maintenance and storage facility that will also be utilized for repair of vehicles and other motorized equipment, and (3) improve the ability of one facility to provide its own water needs.

Repair and Alterations

The request also includes funds for repair and alteration to existing structures.

C. Budget Request Summary:

ICE requests 9 positions, 9 FTE, and \$26,281,000. This represents no increase over 2006.

ICE requests \$26.3 million for this activity. This represents no increase over 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Construction Program provides housing, processing, medical, administrative, and support facilities needed to assist and meet the needs of Detention and Removal activities. The Construction account funds are no-year funds and are available until expended. The FY 2007 Construction Program for Detention and Removal includes capital investment projects at two Service Processing Centers that will (1) provide an additional 250 beds for new detainees, (2) provide a maintenance and storage facility that will also be utilized for repair of vehicles and other motorized equipment, and (3) improve the ability of one facility to provide its own water needs. The repairs and upgrades will include new piping throughout the facility, a major expansion of the waste treatment plant and a long-term solution to the facility's waster supply needs.

G. Capital Investment and Construction Initiative Listing
U.S. Immigration and Customs Enforcement
Construction

The Illegal Immigration Reform and Immigrant Responsibility Act of 1996 and other immigration statutes authorize ICE to detain illegal aliens who are charged with immigration violations, have entered the United States illegally, or have been ordered to leave the country. These aliens are detained while their immigration proceedings are administered, which in turn facilitates their proper and expedient removal from the country. ICE's Office of Detention and Removal (DRO) administers a national detention program that uses funding appropriated specifically for the care of these aliens and includes the transportation, housing, subsistence, medical care, and guard service necessary to provide safe and humane environments for the detainee population and detention staff. The responsibility begins when a detainee enters DRO custody and continues until the alien can be released into the community or removed from the United States. The detainee population is generated by multi-component investigative and prosecutorial efforts within the Department of Homeland Security.

The Detention and Removal Construction Program provides housing, processing, medical, administrative, and support facilities needed to support the detention of aliens. These expansion projects are part of an ongoing capital investment program that is intended to meet the growing national demand for detention capacity. ICE continues to address the need for bed space and support facilities required to handle the processing and removal of aliens during immigration proceedings, relative to the total number of potentially removable aliens in the country.

The FY 2007 Detention and Removal Construction Program includes capital investment projects at two Service Processing Centers (SPCs) that will (1) increase capacity by 250 detainees, (2) provide a maintenance and storage facility and (3) improve the ability of one facility to provide its own water needs. The request also includes funds for repair and alteration to existing structures. A Master Plan has been developed for these SPCs, and these projects reflect logical next steps in each plan.

The table below provides a prioritized list of FY 2007 projects:

INITIATIVE NAME	FY 2007 FUNDING REQUEST (000)			FUNDING FROM	
	Total	Current Level	New Initiative	Budget Activity	Program's Name
Krome 250-Bed Secure Dorm	\$6,409	\$6,409	-	Construction	Construction
Krome Maintenance	5,000	-	\$5,000	Construction	Construction
Port Isabel Infrastructure	9,000	-	9,000	Construction	Construction
Facility Repair & Alteration	5,872	5,872	-	Construction	Construction
Total All Construction	\$26,281	\$12,281	\$14,000	Construction	Construction

Krome 250-Bed Secure Dorm

1. Project Description, Justification, and Scope

The Secure Dorm project is based on a prototypical design that includes individual hardened cells - unlike the rest of the existing open dormitory detainee bed layouts. This project will provide 250 beds for new detainees but will not include any family housing. The expansion of the Krome, Florida facility by 250 beds is needed to address a continually expanding detention requirement related to a nationwide illegal alien population estimated at over eight million.

The Krome Dorm 2 housing unit will increase the SPC's capacity by a total of 250 beds. This capacity is currently being provided to DRO via inter-governmental service agreements (ISGAs) in the south Florida area. For reasons such as local politics and local crime demographics, the availability of detention capacity in this geographic area is always difficult. The master plan for the KROME SPC has taken into consideration this environment and over the years has improved the facility's infrastructure to accommodate new housing and administrative facilities, including KROME Dorm 2. Additionally, consolidation of this capacity onto the KROME campus will reduce overall detention costs by taking advantage of existing operations at the SPC and eliminating expensive management and oversight at remote facilities.

The total cost for this activity is estimated to be \$26.6 million, to be funded across two fiscal years. Initial funding in the amount of \$20 million was appropriated in FY 2006, with the remaining \$6 million being requested in FY 2007.

The additional beds will not have a direct impact on staffing requirements in FY 2007. As is often the case where construction is concerned, support resources for increased capacity usually follow a one to two year lag time after installation of necessary infrastructure. The Custody Management budget request will reflect any resources needs at the proper time.

2. Significant Changes

The budget data submitted for FY 2006 accounted for total funding for the Dorm at Krome. The FY 2007 budget plans for the funding to be distributed over two years.

3. Project Schedule

	Work Initiated	Work Completed	Physical Construction Start	Physical Construction Complete	Total Estimated Cost (000)	Total Project Cost (000)
FY 2007 Budget Request	10/01/2006	3/31/2008	12/31/2006	3/31/2008	\$6,409	\$26,409

Project Total	\$26,409	\$20,000

6. Related Annual Funding Requirements

<i>These costs will not be incurred until FY 09:</i>	(Dollars in Thousands)	
	Current Estimate	Previous Estimate
Maintenance/Repair	\$868	\$868
Security	\$2,464	\$2,464

Krome Maintenance

7. Project Description, Justification, and Scope

The Krome Maintenance project will provide a singular efficient space for the storage and repair of the facility's equipment. Space will be provided for the repair of vehicles and other motorized equipment. The new space will replace the current maintenance shop which is smaller in capacity and lacks the infrastructure to handle the maintenance and repair requirements of the SPC.

8. Significant Changes

This is a new request. No data was submitted in FY 2006.

9. Project Schedule

	Work Initiated	Work Completed	Physical Start	Physical Complete	Total Estimated Cost (000)	Total Project Cost (000)

Port Isabel Infrastructure**13. Project Description, Justification, and Scope**

Due to an inadequate and inconsistent water supply, along with the expanding population, the water supply and circulation infrastructure at Port Isabel, Texas is in need of major repairs and upgrades, including new piping throughout the facility, a major expansion of the wastewater treatment plant and a long term solution to the facility's water supply needs.

14. Significant Changes

This is a new request. No data was submitted in FY 2006.

15. Project Schedule

	Work Initiated	Work Completed	Physical Start	Physical Complete	Total Estimated Cost (000)	Total Project Cost (000)

Facility Repair & Alterations

19. Project Description, Justification, and Scope

Repair and alteration projects are continually identified at existing ICE owned facilities. These projects are not capital construction projects, but are repair and alteration projects identified as projects to maintain government owned facilities and allow facilities to comply with life safety requirements and code compliance.

20. Significant Changes

No significant changes are present with regard to previously submitted budget data in 2006.

21. Project Schedule

	Work Initiated	Work Completed	Physical Start	Physical Complete	Total Estimated Cost (000)	Total Project Cost (000)
FY 2007 Budget Request	-	-	10/01/2006	9/30/2007	\$5,872	\$5,872

22. Schedule of Project Funding

	Dollars in Thousands				
	Prior	FY 2005	FY 2006	FY 2007	Total
Obligation (actual and planned)	-	-	\$6,541	\$5,872	\$12,413
Expenditure (actual and planned)	-	-	\$6,541	\$5,872	\$12,413

Repair and alteration projects are not capital construction projects and are not illustrated in the same manner as capital construction projects. Break down of projects related to expenditures is modified to reflect segments of repair and alteration projects.

Break down of project related expenditures: Repair and Alterations

Facility cost:	
Alterations	\$1,603
Repairs	1,603
Minor Construction	1,604
Management	200
Contingencies	862
Other Costs	
Total Project Expenditures:	\$5,872

25. Method of Performance

All DRO projects are planned, managed and monitored through an interagency service agreement with DHS Customs and Border Protection (CBP). CBP, in turn, contracts with the United States Army Corps of Engineers (USACE) to provide for environmental documentation, planning, design, construction, procurement, and management of services to include, construction design, planning, and project management.

Per the Service Level Agreement (SLA), CBP is responsible for the provision of services to ICE. The fulfillment of each task is graded as Excellent, Satisfactory, Unsatisfactory, Poor or Not Applicable. The following services have been established by the SLA:

- Establish and maintain design guides and standards for ICE facilities
- Develop requirements for facilities
- Maintain ICE owned facilities inventory
- Provide annual facility assessment for ICE nationwide cost/benefit analysis with respect to real property
- Provide annual facilities assessment to establish repair and alteration program and budget
- Prepare short and long term (10 years) planning and recommendations
- Prepare any and all documentation necessary for investment review in accordance with applicable management directives of the Department of Homeland Security including business cases for facility projects that meet cost threshold criteria
- Prepare appropriations process documents (e.g., documentation for a budget formulation package) for facility projects
- Prepare Annual Work Plan describing the projects to be executed e.g., assess construction needs, identify costs for construction projects. [The Annual Work Plan should be updated consistent with changes in the overall mission strategy of ICE]
- Define scope of work for each facility project
- Prepare and approve Project Management Plan
- Subject to funding, perform necessary feasibility studies for facility projects. (Identify specific studies to include project control assessments, requirements)

- Perform all necessary compliance processes and procedures and prepare associated documentation for any and all project related legal obligations
- To act as agent for lease negotiations or land purchase needed for facility projects
- Provide design, engineering, construction contracting, construction management, occupational health and safety, and legal support for each project
- Provide a monthly report that identifies if each project being executed is tracking to its cost, schedule, and performance baseline (Monthly Status Report)
- Notify the ICE point of contact of any impending breach[s] of a performance, schedule, or cost baseline for a specified facilities project
- Provide a monthly status report of all funds transferred from ICE (Budget Compliance)
- Meet with ICE following the collection of customer satisfaction data to identify actions to improve customer satisfaction
- Report quarterly to ICE the status of actions for improving customer satisfaction

26. Budget Allocation to Programs

Program	Allocated Budget (Thousands)
	FY 2007
Construction	\$26,281
Total	\$26,281

27. Compliance with applicable Public Laws, Regulations, Standards and Executive Orders.

The USACE is responsible for the compliance of all applicable laws, code compliance, regulations and standards for all ICE projects. The services being provided by USACE are now being managed and monitored by CBP. A service level agreement between ICE and CBP outlines the roles and responsibilities of both ICE and CBP in accomplishing the execution of all capital construction and repair and alteration projects at ICE facilities.

ICE projects must comply with the following life-safety codes and standards:

- Local building codes or the latest edition of one of the model building codes, including Uniform Building Code (UBC); Building Officials & Code Administrators International (BOCA); Standard Building Code (SBC); and International Building Code 2000 (IBC).
- National Fire Protection Association (NFPA) Standard 101 Life Safety Code
- National Electric Code.

ICE Facilities must also comply with the ICE Detention Design Guidelines (2002 edition), and the ICE Detention Construction Guidelines (2004 edition).

Handicapped accessibility codes and standards apply to ICE facilities as follows:

- Facilities must comply with the Uniform Federal Accessibility Standards, Federal Standard 795.
- Facilities should comply with the Americans with Disabilities Act Accessibility Guidelines (ADAAG).

PPA Mission Statement

The Construction account funds are no-year funds and are available until expended. Resources are for necessary expenses to plan, construct, renovate, equip, and maintain buildings and facilities necessary for the administration and enforcement of the laws relating to customs and immigration.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$1,482	\$1,503	\$1,519	\$16

Salaries and Benefits includes costs for 9 FTEs. The FY 2007 request includes an increase of \$16,000 in personnel compensation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$16	\$16	\$16	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request has no change.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous char	\$24	\$24	\$24	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request has no change.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$39	\$40	\$40	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request has no change.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Purchase from Government Accounts	\$23,767	\$24,688	\$24,672	(\$16)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes a decrease of of \$16,000.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Operation & Maintenance of equipment	\$10	\$10	\$10	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request has no change.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. Immigration and Customs Enforcement**
Student and Exchange Visitor Program**I. Appropriation Overview**

The Student and Exchange Visitor Program (SEVP), administers the School Certification Program and manages the Student and Exchange Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F,M, J visa classification) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

B. Budget Activities:

SEVP administers and manages SEVIS; administers the School Certification Program; and provides support for compliance enforcement efforts. SEVIS is used by the Office of Investigation – Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CEU also uses SEVIS to identify schools and exchange visitor programs that are not in compliance.

C. Budget Request Summary:

- ICE requests 135 positions, 121 FTEs, and \$54,349,000. The total adjustments-to-base is 14 FTE and \$5,349,000 due to anticipated increase in collections.

II. Summary of FY 2007 Budget Estimates by Program/Project Activity (PPA)

2007 Program Change	---	---	---
2007 Request	135	121	54,349
Total Change 2006-2007	28	14	5,349

ICE requests \$54.3 million for this activity. This is an increase of \$5.3 million over FY 2006 due to anticipated increase in collections.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Student and Exchange Visitor Program (SEVP) ensures that international students and exchange visitors studying in the United States comply with visa rules and immigration law. The Student and Exchange Visitor Information System (SEVIS), administered by SEVP, is a web-based system for maintaining information on international students and exchange visitors (F, M and J visa classification) in the United States. SEVIS is administered by SEVP. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

SEVIS is ICE's core technology in this critical homeland security mission. SEVIS is primarily used by the Compliance Enforcement Unit (CEU) to identify foreign students and exchange visitors who fail to enroll or maintain status at their schools. The CEU also uses SEVIS to identify schools and exchange visitor programs that are not in compliance with regulatory requirements.

A SEVP form I-901 processing fee is paid by all prospective students and exchange visitors (\$100 for most and \$35 for some exchange visitors) prior to seeking a visa at the consulates and embassies overseas. This fee, in addition to the fees collected from schools seeking certification to host nonimmigrant students, provides the full funding for SEVP, as well as partial funding for the CEU and the Department of State, Office of Exchange Coordination and Designation.

In FY 2005, SEVP continued to administer and manage SEVIS; administer the School Certification Program and support compliance enforcement. Some of SEVP's major accomplishments for FY 2005 included:

- Reduced the waiting time for customers to speak with someone at the SEVIS Help Desk from 5 minutes and 36 seconds to 1 minute and 11 seconds;
- Provided training to the SEVIS Help Desk before new guidance was issued or a new release was implemented to better assist in answering questions in a timely manner;
- Maintained SEVIS availability maintained 100 percent 7 days a week;
- Increased the number of F/M data fix tickets resolved and closed within 90 days from 29 percent to 62 percent;
- Increased the number of J data fix tickets resolved and closed within 90 days from 11 percent to 28 percent;
- Implemented the Data Fix Elimination Plan on April 1, 2005 reducing the backlog by 54% on August 5, 2005
- Posted as of July 2005, two SEVP Operating Instructions (SOIs) posted on the SEVIS Web site;
- Implemented of a web-based training module for F/M users in August.

For FY 2006, the funding provided supports 107 positions, which include:

- Director, Deputy Director, Special Assistant, 5 Branch Chiefs, 1 Program Manager, 14 Adjudication Officers, 12 Program Analysts/Assistants, 6 IT Specialists, 1 Management Analyst, 1 Liaison Chief, 1 Attorney and 3 IT Support positions;
- 56 Special Agent positions for the CEU;
- 1 Program Manager, 2 Program Analyst/Coordinator positions and 1 IT Specialist for the Department of State.

These funds will allow SEVP to continue to administer and manage SEVIS; administer the School Certification Program; and support compliance enforcement. Some of SEVP's goals for FY 2006 are:

- Conduct a fee study;
- Enhance SEVIS reporting capabilities with the development of a new reporting tool;
- Establish a mechanism for tracking customer satisfaction via feedback surveys;
- Resolve 100 percent of incoming F/M data fix tickets within 60 days (currently completing 62 percent within 90 days);
- Resolve 100 percent of incoming J data fix tickets within 60 days (currently completing 28 percent within 90 days);
- Develop and post to the SEVP website SOIs for 8 additional subject areas;
- Develop and deploy via the SEVP website a web-based training module for F/M, and also J users;
- Train new/incoming officers/agents in SEVIS policies and procedures by incorporating a SEVIS module in the FLETC training program offered at the Glynco training facility.

During FY 2006, SEVP also plans to begin recertification of all SEVIS certified schools as required by the Border Security Act of 2002. Recertification includes a review of school performance within SEVIS over the previous two years – recordkeeping, data fixes, advertising, etc. These activities will help reduce the threat of improper admission and undetected status violators using F, M, and J visas, and will improve the ability to detect and investigate schools that are non-compliant.

FY 2007 request provides funding to support 23 Special Agent positions for Investigations. The new positions will facilitate increased enforcement efforts.

PPA Mission Statement

The Student and Exchange Visitor Program (SEVP), which is a division of U.S. Immigration and Customs Enforcement (ICE) administers the School Certification Program and manages the Student and Exchange Visitor Information System (SEVIS), a web-based system for maintaining information on international students and exchange visitors (F, M, J visa classification) in the United States. SEVIS is designed to keep our nation safe while facilitating the participation of students and exchange visitors seeking to study in the United States.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$3,036	\$5,947	\$10,831	\$4,884

Salaries and Benefits includes costs for 121 FTEs. The FY 2007 request includes an increase of \$4,884,000 for personnel compensation.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. Immigration and Customs Enforcement**
Breached Bond Detention Fund**I. Appropriation Overview**

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

2007 Current Services	63	63	90,000
2007 Program Change
2007 Request	63	63	90,000
Total Change 2006-2007	3,000

U.S. Immigration and Customs Enforcement requests \$90 million for this activity. This is an increase of \$3 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Breached Bond Detention Fund was authorized in Section 112 of the Department of Justice Appropriations Act of 1993 (P.L. 102-395). The Act amended Section 286 of the Immigration and Nationality Act (INA) of 1952, as amended, by establishing, in the General Fund of the Treasury, a separate account to be called the Breached Bond/Detention Fund. The first \$8,000,000 in breached cash and surety bonds collected goes to the General Fund of the U.S. Treasury. All collections in excess of \$8,000,000 posted under the INA, which are recovered by the Department of Justice, are deposited as offsetting collections into this fund. Amounts deposited into the fund, which remain available until expended, can be used for expenses incurred in the collection of breached bonds, bond management, litigation activities to obtain compliance from surety companies found to be delinquent in meeting their obligations, and for expenses associated with the detention of criminal and illegal aliens.

At the present time, ICE uses Fund resources to support bed space and related staff. The Fund will support an estimated 2,598 beds in FY 2007. Resources also support 63 staff including Bond Control Specialists, Immigration Enforcement Agents, and Administrative personnel. Staffing levels supported by the Fund will not change with the additional resources.

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$72,000 in collections.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$627	\$479	\$495	\$16

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$16,000 in collections.

BUDGET REQUEST AND SUPPORTING INFORMATION**U.S. Immigration and Customs Enforcement**
Immigration Inspection User Fees**I. Appropriation Overview**

The Immigration User Fee account was established as a repository for fees collected from arriving airline passenger for immigration inspection and fines imposed to prevent unauthorized landing and unlawful bringing of aliens into the United States, penalties for document fraud, and liquidated damages and expenses collected. The fees cover the cost of providing detention and removal services for inadmissible aliens arriving on commercial aircraft and vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry. All deposits into the Immigration User Fee account are available until expended.

B. Budget Activities:

Not Applicable

C. Budget Request Summary:

ICE requests 276 positions, 276 FTE, and \$108,000,000 for FY 2007. The total adjustments-to-base is 0 FTE and \$8,000,000 and represents increased fee collections.

II. Summary of FY 2007 Budget Estimates by Program/Project Activity (PPA)

 Immigration Inspection User Fees
 Summary of FY 2007 Budget Estimates by Program/Project Activity
 (Dollars in Thousands)

Program/Project Activity	FY 2005 Actual		FY 2006 Revised Estimate		FY 2007 Request		Total Changes		Increase (+) or Decrease (-) For FY 2007	
	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT	FTE	AMOUNT
Immigration Inspection User Fees	183	\$91,789	276	\$100,000	276	\$108,000		\$8,000		\$8,000
Subtotal, Enacted Appropriations and Budget Estimates	183	\$91,789	276	\$100,000	276	\$108,000		\$8,000		\$8,000
Less: Adjustments for Other Funding Sources:										
Net, Enacted Appropriations and Budget Estimates	183	\$91,789	276	\$100,000	276	\$108,000		\$8,000		\$8,000

The table reflects actual obligations of ICE's share of the Immigration User Fee account. The budget authority reported in MAX included \$9.2 million in balances.

III. Current Services Program Description by PPA

Department of Homeland Security
U.S. Immigration and Customs Enforcement
Immigration Inspection User Fees
Program Performance Justification
 (Dollars in thousands)

PPA: Immigration Inspection User Fees

	Perm		Amount
	Pos	FTE	
2005 Actual	187	183	\$91,789
2006 Enacted	276	276	100,000
2007 Adjustments-to-Base	8,000
2007 Current Services	276	276	108,000
2007 Program Change
2007 Request	276	276	108,000
Total Change 2006-2007	8,000

This fee supports ICE and U.S. Customs and Border Protection (CBP). Of this total, ICE's portion will be \$108 million (17% of the fees are allocated to ICE and 83% to CBP). This is an increase of \$8 million over 2006 for ICE.

DHS estimates that the total Immigration User Fee level for FY 2006 will be \$603 million. Based on International Air Transport Association (IATA) and Federal Aviation Administration's (FAA) growth rates for FY 2007 of 6.3% for international passengers, additional fees are estimated to total \$34 million in FY 2007.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Immigration User Fee account was established as a repository for fees collected from arriving airline passengers for immigration inspection and fines imposed to prevent unauthorized landing and unlawful bringing of aliens into the United States, penalties for document fraud, and liquidated damages and expenses collected. The fees cover the cost of providing detention and removal services for inadmissible aliens arriving on commercial aircraft and vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry. All deposits into the Immigration User Fee account are available until expended.

The Immigration Inspection User Fee account supported 1,974 beds in FY 2005. Anticipated fee collections will support approximately 2,000 beds in FY 2006. Resources will also support 276 staff in FY 2006 and 2007.

PPA Mission Statement

The Immigration User Fee account was established as a repository for fees collected from arriving airline passengers for immigration inspection and fines imposed to prevent unauthorized landing and unlawful bringing of aliens into the United States, penalties for document fraud, and liquidated damages and expenses collected. The fees cover the cost of providing detention and removal services for inadmissible aliens arriving on commercial aircraft and vessels and for any inadmissible alien who has attempted illegal entry into the United States through avoidance of immigration inspection at air or sea ports-of-entry. All deposits into the Immigration User Fee account are available until expended.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$20,896	\$23,965	\$25,786	\$1,821

Salaries and Benefits includes costs for 276 FTEs. The FY 2007 request includes an increase of \$1,821,000 in personnel compensation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Travel	\$4	\$4	\$5	\$1

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$1,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Transportation of Things	\$13	\$14	\$15	\$1

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes increases of \$1,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
GSA rent	\$5,432	\$5,918	\$6,391	\$473

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes increases of \$473,000.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Communication, Utilities, and miscellaneous char	\$33	\$36	\$39	\$3

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$3,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Advisory and Assistance Services	\$944	\$1,028	\$1,111	\$83

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$83,000.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$8,597	\$9,366	\$10,115	\$749

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY2007 request includes increases of \$749,000 due to increased collections.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Purchase from Government Accounts	\$386	\$421	\$454	\$33

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$33,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Operation & maintenance of facilities	\$26,338	\$27,494	\$29,790	\$2,296

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$2,296,000 due to increased collections.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Subsistence & Support of Persons	\$28,307	\$30,840	\$33,307	\$2,467

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2007 request includes an increase of \$2,467,000 due to increased collections.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Supplies & materials	\$818	\$891	\$962	\$71

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$71,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$21	\$23	\$25	\$2

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$2,000 in non-pay inflation.

STRATEGIC CONTEXT FOR THE FY 2007 BUDGET

U.S. Immigration and Customs Enforcement

A. Mission and Description

The U.S. Immigration and Customs Enforcement (ICE) is the largest investigative bureau within the Department of Homeland Security (DHS). ICE's mission is to protect America and uphold public safety by targeting the people, money and materials that support terrorist and criminal activities. All ICE employees are actively engaged in one or more aspects of this mission. ICE has legal authorities to investigate immigration, customs, and building security to combat terrorists, criminal aliens, domestic gangs, and organized criminal activities that are intended to do harm to the infrastructure, federal monuments, and/or inhabitants within the United States.

ICE employs approximately 15,000 Federal law enforcement officers and civil servants who are situated throughout the United States and overseas. ICE Headquarters ICE is located in Washington, D.C. ICE's personnel resources are primarily GS-0080 Security Officers, GS-0083 Police Officers, GS-0905 Attorneys, GS-1801 Deportation Officers, GS-1801 Detention and Deportation Officers, GS-1801 Immigration Enforcement Agents, GS-1801 General Investigators, and GS-1811 Criminal Investigators.

ICE's three enforcement operations are:

Office of Detention and Removal Operations (DRO) - DRO processes, detains, and schedules hearings for Criminal aliens, aliens residing illegally in the United States, and non-immigrants apprehended for infraction of immigration laws (including administrative violations). DRO is also responsible for the safe and humane treatment of detained aliens while in ICE custody and is responsible for maintaining control of aliens released from custody pending appearance for immigration proceedings. DRO is currently organized into 23 Field Offices plus staff at the ICE Academy and ICE Headquarters. Approximately 2,900 law enforcement personnel conduct investigations, detain, process and remove criminal aliens.

DRO manages the detention of aliens. DRO purchases detention space through several mechanisms. ICE owns and operates eight Service Processing Centers with the capacity of detaining an average of 6,000 aliens a day, as well an additional 1,800 aliens in two facilities that ICE shares with the Bureau of Prisons. Through agreements with other detention facilities, ICE contracts 4,600 beds for alien detention. Working with the Office of the Detention Trustee, DRO manages a system of inter-governmental service agreements capital assets including a fleet of law enforcement equipped vehicles used for routine enforcement activity and apprehension, a fleet of buses and vans to transport detained aliens within and out of the country, an infrastructure of office facilities, and investigative equipment and technology.

In addition, DRO manages the ICE Fugitive Operations program. Through this program, DRO locates and captures aliens who have violated conditions of release and subsequently absconded. The FY 2007 request funds an increase of 18 Fugitive Operations teams, bringing the total number of teams to 70. As of January 2006, there were approximately 558,000 alien absconders. In 2007, DRO plans to oversee the ICE Criminal Alien Program (CAP) in the states of New York, Alaska and the majority of the state of California. By identifying criminal aliens presently incarcerated in federal, state and local jails and initiating the removal process, the CAP ensures that criminal aliens are removed from the United States immediately upon their release; thereby preventing their release back into U.S. communities.

Office of Investigations (OI)—OI enforces immigration and customs laws through the investigation of activities, persons and events that may pose a threat to U.S. safety and security. In particular, OI investigates immigration law, illegal trafficking in weapons, including Weapons of Mass Effect, nuclear/biological/chemical/radiological agents, narcotics and contraband smuggling, human smuggling and trafficking, money laundering and other financial crimes, fraudulent trade practices and IPR violations, child pornography, and child sex tourism. OI is currently organized into 26 domestic areas of responsibilities and 50 foreign offices. About 5,700 criminal investigators conduct investigative operations.

Federal Protective Service (FPS) - FPS protects and secures federal buildings and personnel across the nation. FPS operations focus on law enforcement and reduction of federal facility vulnerabilities to criminal and terrorist threats, while ensuring that public facilities are safe, secure and remain available as a vital part of daily American life. FPS uses approximately 15,000 contract security guards and 1,100 law enforcement officers who are strategically located throughout the nation to provide comprehensive security and law enforcement coverage to all GSA-owned-and-operated federal facilities. FPS currently performs all necessary security and law enforcement functions at approximately 9,000 federally owned and leased locations throughout the nation.

B. Major Activities and Key Strategic Issues

ICE uses its immigration, customs, and security authorities to:

- 1) prevent the unlawful movement of people, money and materials across the borders of the United States;
- 2) use the unique access to customs and immigration information to respond to threats and address vulnerabilities;
- 3) secure the homeland by expeditiously removing terrorists and other threats to public safety; and
- 4) secure federal properties, key assets, and events of national interest from terrorist and criminal attacks.

Key Strategic Issues:

The Secure Border Initiative (SBI) is a comprehensive approach to immigration enforcement. The SBI focuses on two major enforcement themes, controlling the border and immigration enforcement within the United States. Border control means gaining full operational control of our borders, so we can prevent illegal immigration as well as security breaches. Enforcement inside the United States will eliminate vulnerabilities in the legal immigration process through

aggressive enforcement of immigration enforcement, resulting in the criminal prosecution of those that would violate the law, and removing those aliens who are present in the United States in violation of our laws. Full enforcement of immigration enforcement is tied to the President's proposal for a temporary worker program, which will ensure the availability of a legal work force, while eliminating the unlawful employment of unauthorized aliens.

It is also intended to help the Secretary ensure the most effective management of these resources through strategic planning and strong oversight of border security activities.

The SBI is a multi-year plan created to reduce illegal immigration into the United States via enhanced border security as well as enhanced interior immigration enforcement. Part I of SBI is enhanced border security. In particular, it includes resource enhancements for Detention and Removal Operations (DRO) for bed space, personnel and transportation costs.

Part II of the SBI will target interior enforcement. It includes enhancements to programs associated with interior immigration enforcement. In addition to those resource enhancements, SBI will work to improve efficiencies in current immigration efforts.

ICE will strengthen its efforts to combat document fraud, improve visa compliance, improve cooperation with state and local law enforcement, and improve the enforcement of immigration law at the worksite to ensure that employers who violate the law are punished. Currently, as Customs and Border Protection continues to make it more and more difficult to enter the United States illegally, individuals are turning to any means available to enter the United States and resorting to human smuggling at the risk of life and loss of money, and possibly being subjected to trafficking, servitude and sexual abuse. Still others who enter legally overstay beyond the time period permitted and remain in the United States in violation of the terms of their visas. Individuals, such as those involved in the 9/11 terrorist attacks, exploit weaknesses in the visa process and other document processes (e.g., driver's licenses, employment applications, social security documents, school registration, etc.). Social reforms, new technological developments, and economic principles of supply and demand result in more elaborate schemes to circumvent regulations and provide opportunities for financing illegal gain and even terrorist activities. Increases in cigarette taxes have created incentives for criminal organizations to smuggle cigarettes into the United States, resulting in lost tax revenues and undermining national health policy objectives. These illicit revenues have the potential to become sources for funding terrorism. Economic losses associated with violations of intellectual property rights laws overseas have grown exponentially as technology advances. And the counterfeiting of pharmaceuticals and food items pose increasing risks to public safety.

The trend of ICE investigative cases shows that criminal and terrorist organizations are exploiting the vulnerabilities of the customs and immigrations processes to obtain revenue and are using domestic financial networks to launder monies to support and sustain their operations.

Increased access to, and the quality of, fraudulent documents are facilitating the illegal receipt of immigration benefits and the employment of unauthorized workers within critical industries. The employment of undocumented aliens by U. S. employers jeopardizes the integrity of the immigration process and increases risk of sabotage, foreign conspiracy, espionage and related

terrorist activity. While undocumented aliens may seek employment without the intention of doing harm, the risk of exposure for immigration violation can be exploited to coerce unlawful behavior or activity. The proposed TWP would provide a legal channel for workers and employers.

Extremely rapid advances in electronic communication and accessibility have also created vulnerabilities that threaten the protection and safety of children. Since 2002, advancements and the use of peer to peer networks, for example, have resulted in significant and alarming increases in access to child pornography.

Major Activities:

The Secure Border Initiative (SBI) will focus on border security and interior enforcement. Detention ensures the physical custody of aliens pending completion of the immigration process to remove them from the United States. Beds are required to keep pace with the volume of aliens apprehended and to keep the aliens in custody for the lawful duration or until the successful completion of the removal process - whichever occurs first.

In an effort to reduce the length of time an alien is in immigration removal proceedings, Expedited Removal (ER) proceedings allow the U.S. government to remove illegal aliens from the United States in lieu of conducting a hearing before an immigration judge. To date, implementation of ER of illegal aliens apprehended along the Southwest border has served as a deterrent. By expanding ER to the Northern Border, continued success is expected in 2006.

ICE will strengthen its efforts to combat document fraud, improve visa compliance, improve cooperation with state and local law enforcement and monitor the worksite to ensure that employers who violate the law are punished. Employers who hire unauthorized workers currently face few consequences. Fines for violations of the employer sanction provisions of the Immigration Nationality Act (INA) are seen as a cost of doing business.

Enforcing immigration laws away from the border is a complex challenge which will be addressed by SBI. Today, an alien who is in the United States without permission has little difficulty blending into our diverse and welcoming society or finding work in our vibrant economy. Investigators cannot track down all illegal immigrants, and even those they catch often find loopholes and delays in an overcrowded immigration hearing process. As the threat of punishment has diminished, immigrants and employers alike have become less concerned about compliance with immigration laws. As tolerance grows for illegal workers, an infrastructure of support has developed, and it has become easier for more immigrants to enter and find work outside the law. The principal objective of the interior enforcement strategy, therefore, is to reverse this cycle – to end the tolerance of illegal employment and illegal immigration. The principal focus of this strategy is eliminating the magnet that draws immigrants across the border – by drying up the sources of employment in both legitimate and illegitimate sectors.

Through the Cornerstone program, ICE assists domestic financial and trade communities to identify and eliminate problems that may be exploited by terrorist and criminal organizations to earn, move or store illicit proceeds.

ICE identifies individuals and groups linked to national security threats by employing a methodology to leverage access to information to identify individuals who pose potential threats, connect any associates with those individuals, and take appropriate enforcement action to prevent and disrupt terrorist activity. The Front Line approach systematically: (1) analyzes travel, immigration and financial data; (2) reviews current intelligence and investigative threat reporting; (3) utilizes sources of information; and (4) applies cutting-edge analytical tools to generate timely investigative leads. This approach provides ICE with the ability to proactively identify and address potential national security vulnerabilities while maintaining the flexibility to adjust to rapidly changing threat environments.

With the help of new technology, up-to-the-minute sources of information, and broad-based outreach programs, ICE's Law Enforcement Support Center (LESC) and Forensic Document Laboratory (FDL) provide critical enforcement information and assistance to the law enforcement community. The LESL provides timely and accurate information to law enforcement officers on the immigration status and identity of individuals who have been arrested or are under investigation for criminal activity. The FDL provides training and technical support in the detection of fraudulent travel and identity documents. Additionally, the FDL fosters working partnerships with other federal, state and local agencies as well as foreign governments to combat document fraud through information sharing.

To protect the homeland, ICE pursues both effective and efficient ways to enforce immigration and customs compliance – directing resources toward activities and special interests that present the greatest threat to security. Intelligence and access to data and cooperation and coordination with federal, state and local officials contributes to more effective intelligence. Detention is the most effective way to ensure compliance with the removal process but it is also very costly. ICE has worked to decrease the cost of detention space by working with the Office of Federal Detention Trustee. In addition, ICE has created a program, Intensive Supervision Appearance Program, which combines intensive supervision and electronic monitoring to improve removal rates among the non-detained population. This program has had preliminary success in improving removal rates and ICE will explore the expansion of this program. Procedural efficiencies (e.g., activity-based costing) in the removal process help to reduce and streamline the removal process, while safeguarding the rights of aliens.

Consistent with government-wide security procedures and guidelines issued by the Interagency Security Committee, ICE ensures the security of Federal facilities, employees, and visitors. ICE provides protective details and logistical support at National Security and other sensitive public events.

Detention and Removals Operations (DRO) – In FY 2006, DRO received:

- \$1,450.3 million in the Detention and Removal group of five budget activities within the Salaries and Expenses appropriation,
- \$147.0 million for Legal Proceedings
- \$15.5 million in the Automation Modernization appropriation,
- \$26.3 million in Construction appropriation,
- \$87.0 million in Breached Bond Detention Fund account, and

- \$88.0 million in the Immigration User Fee account,

for a total of \$1,814.5 million overall. Funds will provide custody management (including bed space) in support of alien removals, facilitate the processing of illegal aliens through the immigration court, and to effect removal from the United States. Key priorities are the expanded use of expedited removal in support of the Secure Border Initiative (SBI) and continued growth in fugitive operations and the criminal alien program including the Institutional Removal Program (IRP). These activities identify and remove all high-risk illegal alien absconders, expeditiously removing identified alien criminals, and managing a robust removals program with the capacity to keep pace with the volume of annual final orders of removal.

Strategic issues and major challenges for DRO include: keeping pace with the growth of the fugitive alien population, achieving a balance between detained and non-detained by implementing alternatives to detention, the growth of the detention and removal requirements to keep pace with all other enforcement efforts and the increasing diversity of the detention population (e.g., race, gender, age, criminal/non-criminal).

The continued expansion of the fugitive operations program will present a deterrent to aliens who violate orders of removal. The performance target for each fugitive operations team is 1,000 apprehensions annually. Because of the time required to hire and train personnel, the additional teams funded for FY 2006 should reach full productivity in FY 2007. Funds received in FY 2006 will enhance resources to alternatives to detention, thereby increasing appearance rates at immigration proceedings. This approach allows DRO to better utilize bed space, resources, and manpower while providing a more appropriate means of supervision for aliens who do not require a secure detention setting. With the enhancement requested for FY 2007, DRO will increase detention capacity through additional beds that will provide the ability to detain a greater number of persons apprehended in support of the expanded use of expedited removal and the Secure Border Initiative and provide greater control over the alien population that is in immigration proceedings or awaiting removal.

Accomplishments/Planned Accomplishments:

FY 2005: Enforcement efforts in FY 2005 resulted in the removal of over 166,838 aliens. The 16 fully staffed and two partially staffed Fugitive Operations teams apprehended over 15,208 aliens; of these 11,198 were fugitive aliens. In addition, more than 4,010 aliens in violation of immigration law were apprehended along with the fugitive aliens, 270 aliens apprehended were sexual predators, and 10,469 aliens that were apprehended by Fugitive Operations teams were removed. The alternative to detention program started as a small pilot program in FY 2005 and while it only had a population of 2,400 aliens, the rate of appearance for immigration court proceedings was about 94%. The Criminal Alien Program (CAP) interviewed over 5,000 criminals and processed detention documents on over 3,200 of them. The CAP process will allow ICE DRO to begin or continue immigration proceedings on criminal aliens currently incarcerated in federal, state or local facilities. The end result should be the removal of these aliens at the completion of their incarceration, thereby limiting or eliminating the need for DRO to detain the aliens upon their release.

FY 2006: DRO will expand staffing in addition to detention and removal capabilities in order to eliminate “catch and release” through expedited removal. DRO expects to: reduce the 40,000 per year growth rate of the fugitive population by twenty-five percent from the FY 2006 level of 558,000; continue the expansion of CAP at existing facilities in the City of New York and the states of Alaska and California; and continue and expand the alternatives to detention program and thus increase the appearance rate of aliens at immigration proceedings. A robust and multi-faceted detention and removal program increases public safety and national security through the timely interdiction and removal of criminal aliens and those aliens that violate immigration law.

FY 2007: DRO will expand staffing in addition to detention and removal capabilities in order to eliminate “catch and release” through expedited removal. DRO proposes to: reduce the growth rate of the fugitive population by fifty percent from the FY 2006 level of 558,000; continue the expansion of CAP to the states of Alaska, California and New York, as well as select locations in Arizona and Texas; and pursue efforts associated with the alternatives to detention program to move it from a pilot project to the early identification and placement in immigration proceedings of criminal aliens incarcerated in federal, state or local facilities will minimize the need for DRO detention and should increase the ability to remove these aliens upon their release from incarceration, thereby lowering the growth of the fugitive population and ensuring aliens have full recourse of law during proceedings.

Office of Investigations (OI) - In FY 2006, OI received:

- \$1,434.1 million in the Investigations group of two budget activities within the Salaries and Expenses appropriation,
- \$58.6 million in the Intelligence budget activity within the Salaries and Expenses appropriation,
- \$24.2 million in the Automation Modernization appropriation,
- \$49.0 million in the Student Exchange Visitor Program account, and
- \$12.0 million in the Immigration User Fee account,

for a total of \$1,577.9 million overall. Funds will be used to pursue investigations into a broad array of law enforcement, public safety, and national security issues, including illegal imports and exports (components and precursors to weapons of mass destruction, munitions and restricted technologies), financial crimes, commercial fraud, human smuggling and trafficking, narcotics smuggling, child pornography/exploitation, and immigration fraud. This funding includes enhancements to expand targeted investigative and forensic audit efforts in worksite enforcement and to expand other areas of immigration enforcement in support of the SBI; to expand the Visa Security Program in compliance with Section 428 of the Homeland Security Act of 2002; to expand the computer forensic infrastructure of the Cyber Crimes Center; to increase staffing for the Forced Child Labor effort overseas; and to speed the entry of immigration enforcement information into the National Criminal Information Center database.

Strategic issues and major challenges evolve around integrating its enforcement authorities to uncover and eliminate vulnerabilities that harm our citizens, national security, and the economy. Through Worksite Enforcement’s Critical Infrastructure Protection ongoing initiatives, ICE will continue aggressive enforcement activities against egregious employers of unauthorized workers,

thereby promoting a healthier economy. Through an array of investigative processes in the areas of smuggling and public safety, finance and trade, and national security, Investigations works to identify the people, materials, and funding essential to sustaining terrorist threats and criminal enterprises, and to disrupt and dismantle those operations.

Accomplishments/Planned Accomplishments

FY2005: Closed 11,001 criminal investigations, made 22,700 criminal arrests and 14,007 seizures, there were 13,420 indictments, 14,457 convictions; successfully conducted first joint Intellectual Property Rights (IPR) investigation by ICE agents and Chinese authorities (Internet sales of pirated motion picture DVDs) and, with FBI, first criminal enforcement action targeting individuals committing copyright infringement on peer-to-peer networks; conducted Textile Production Verification Team (TPVT) visits to 11 countries; expanded background investigation of foreign visa applicants in high threat country; in February, launched Operation Community Shield, which aims to disrupt and dismantle violent, transnational street gangs/ arrested over 1,400 gang members by end of fiscal year; conducted numerous successful worksite enforcement investigations focusing on critical infrastructure and national security; reached record \$11 million civil settlement with Wal-Mart Stores, Inc., as result of traditional worksite investigation; arrested 27 human rights violators for criminal offenses and an additional 20 for removal proceedings; first two years of Operation Predator resulted in over 6,600 child predator arrests and more than 3,400 removals from the U.S.; participated in the Arizona Border Control Initiative (ABCI), yielding more than 1,700 defendants, seizure of over \$11 million, and apprehension of over 610,000 illegal immigrants; coordinated Weapons of Mass Destruction (WMD)/ delivery system training at selected Special Agent in Charge (SAC) offices; provided training to Australia Group (38 countries trying to minimize the risk of exporting or transshipping chemical and biological weapons); developed/implemented "train-the-trainer" program for agents on accessing Student and Exchange Visitor Information System (SEVIS) and U.S.-VISIT information; arrested 978 visa violators from Compliance Enforcement efforts; expanded Threat Analysis Section's tactical analysis capabilities; conducted Bulk Cash Smuggling (BCS) and Unlicensed Money Transmitting Businesses training and Cornerstone outreach/training; implemented Black Market Peso Exchange (BMPE) initiative; began work to establish formal Trade Transparency Units (TTUs) with three South American countries; with Customs and Border Protection (CBP), conducted operations targeting in-bond smuggling and smuggling at Foreign Trade Zones and bonded facilities; conducted outreach to increase awareness of Forced Labor issues, Intellectual Property Rights program, and Cornerstone program; continued development of ICE Mutual Agreement between Government and Employers (IMAGE) initiative (part of overall enforcement strategy to address document fraud, human smuggling, and worksite compliance priorities through industry outreach and employer self-policing); in coordination with foreign governments, continued task force efforts to identify/investigate "politically exposed persons."

FY2006: Expand Visa Security Program; expand overseas efforts against Forced Child Labor; bolster worksite and other immigration enforcement programs; continue WMD training; conduct Project Shield America visits to manufacturers/distributors/exporters of dual-use/military technology; (Project Shield America is ICE's outreach program to increase public awareness of export controls by cooperating with private businesses in identifying suspicious transactions); and implement school recertification program; in support of state and local law enforcement

efforts to supplement Federal immigration law enforcement, provide training for the 287(g) program; implement initiative to eliminate systemic vulnerabilities in unlicensed Money Service Businesses (MSBs); create/chair interagency Bulk Cash Smuggling Working Group & conduct joint operations with U.S. Postal inspectors; pilot Bulk Cash Smuggling Unit as a stand alone Financial Investigations section, co-located at the LESC to complement the LESC and capitalize on their connectivity with the state and local law enforcement community continue implementation of BMPE initiative; create additional TTUs with interested foreign governments; continue Cornerstone's outreach/training for trade and financial business communities; target illegal importations of counterfeit cigarettes and unapproved/counterfeit/adulterated pharmaceuticals, & textile transshipments; conduct TPVT visits to 13 countries; conduct outreach to Maritime Shipping and Cruise Ship lines in an effort to prevent these methods of transportation from being used to smuggle contraband and humans into the U.S.; expand outreach/partnership with Non-Government Organizations (NGOs) and business entities to educate and identify trends and activities of targeted criminal organizations (The Justice Department's Office of Special Investigations partners with ICE on denaturalization investigations of naturalized U.S. citizens concerning human rights violators. Since these cases are often transnational in nature, ICE obtains overseas evidence in order to pursue criminal and/or administrative charges); expand investigations of identified human rights violators & their support networks; in coordination with foreign governments, continue task force efforts to identify/investigate "politically exposed persons"; expand the ability of the Cyber Crimes Center to provide additional data analysis, data archiving, disaster recovery, and advanced examinations within the digital evidence network; accelerate entry of immigration enforcement information into the National Crime Information Center (NCIC) database.

FY2007: In support of the SBI and other agency initiatives, the following specific efforts are planned. Expand, Worksite Enforcement, and Compliance Enforcement Programs; to increase investigations of critical infrastructure and of employers who attract significant numbers of illegal aliens and to increase CEU's ability to identify and arrest high risk visa violators who potentially pose a threat to national security and public safety, consistent with the SBI; improve coordination with DOS/DOD tracking terrorist travel programs; increase participation in Joint Terrorism Task Forces (JTTFs); continue MSB initiative; implement BCS enforcement strategy/training; expand BCS Unit at LESC; create additional Trade Transparency Units (TTU) with interested foreign governments; continue BMPE initiative; implement enforcement action against fraudulent trade schemes used by terrorists/other criminal organizations to support their illegal activities; conduct public awareness campaign regarding Intellectual Property Rights (IPR) crime; conduct TPVT visits to about 13 countries; continue Cornerstone's outreach/training for trade and financial business communities; expand activities to disrupt/eliminate violent gangs & the most significant contraband/human smuggling/transportation organizations; implement targeted investigations of criminal sources/support networks; improve implementation of asset forfeiture as related to organizations involved in identity and benefits fraud; continue targeted investigations of identified human rights violators/support networks; in coordination with foreign governments, expedite task force efforts to identify/investigate "politically exposed persons"; improve inquiry response time at LESC; continue to provide training for the 287(g) program.

Federal Protective Service (FPS) – The basic security and building security fees collections approved for FY 2006 are \$487 million for FPS to provide law enforcement and security within Federal facilities nationwide. These funds allow FPS to maintain current services and staff, as well as maintain special response team initiatives, such as K-9 bomb detection teams, Weapons of Mass Destruction (WMD) first responder capability, improved equipment and technology, and increased intelligence sharing.

Key strategic issues and major challenges for FPS in FY 2006:

- FPS will continue to be the protection of Federal facilities and employees through a comprehensive law enforcement and security program.

The main objectives for enhancing the performance of FPS will focus on recruiting, training, and retaining a workforce that has the necessary skills and equipment to identify facility vulnerabilities and implement countermeasures to those vulnerabilities.

Accomplishments/Planned Accomplishments:

FY 2005: FPS sustained current countermeasures and security equipment for approximately 9,000 facilities to support the ICE mission by providing significant and appropriate law enforcement and security services. Over 1 million federal employees and visitors entering federal facilities were screened and 5,700 alarm accounts were monitored daily for intrusion detection, fire and personnel protection. In addition, FPS received 22,000 alarm activations and responded to 148 incidents on Federal property, one weapons and explosives incident, 11 demonstrations and disturbance incidents, eight accident related incidents and 18 fire related incidents.

FY 2006: FPS expects to improve strategic methods for identifying and reducing real and/or perceived threats faced by FPS customers. Improvements in intelligence and information sharing, hazardous materials response, special operations capabilities, protective services, and strengthened security standards represent the key elements for reducing threat and vulnerability levels at Federal facilities. Increased law enforcement presence and oversight, when combined with other countermeasures, maximizes the safety and security of the buildings, occupants, and visitors. A security index of one or greater reflects accomplishment of and/or exceeding the performance targets. A security index of less than one reflects failure to meet performance goals. FPS will meet or exceed its performance targets.

FY 2007: Specialized law enforcement skills and properly equipped officers will support FPS' goal to identify and prevent national security threats. New threats will require specialized technology training, tactics and equipment for FPS officers. FPS will maintain security systems through technology improvements and training with requested resources. FPS will support WMD, Hazardous Response, and K-9 Bomb Detection and establish a core capability to conduct force protection operations, including detection and identification of threat agents, extraction, decontamination, evacuation support, and limited mitigation.

C. Resources Requested and Performance Impact

Summary of FY 2007 Enhancements (dollars in thousands):

	Legal	DRO	OI	Intel	FPS	Total
Internal Controls	68	355	555	22		1,000
Procurement	244	1,276	1,999	81		3,600
Total ICE Enhancements	312	1,631	2,554	103	-	4,600

The Budget proposes to expand ICE programs as part of a Border Security Initiative (SBI) in FY 2007. Below is a summary table of enhancements requested for the SBI.

	Legal	DRO	OI	Total
Expedited Removal		386,690		386,690
Legal Proceedings	38,500			38,500
Fugitive Operations		60,000		60,000
Compliance			10,017	10,017
Worksite Enforcement			41,681	41,681
State and Local			4,326	4,326
Total Secure Border Initiative Enhancements	38,500	446,690	56,024	541,214

Detention and Removals Operations (DRO) – ICE requests \$2.494.3 billion for Detention and Removal in FY 2007:

- \$2,076.5 million in the Detention and Removal group of six budget activities within the Salaries and Expenses appropriation,
- \$206.5 million for Legal Proceedings
- \$0 million in the Automation Modernization appropriation,
- \$26.3 million in Construction appropriation,
- \$90.0 million in Breached Bond Detention Fund account, and
- \$95.0 million in the Immigration User Fee account.

Detention and Removal Operations underwent OMB's Program Assessment Rating Tool (PART) for the FY 2005 Budget process. DRO received a rating of moderately effective resulting from a need to establish performance measures and collect reliable and accurate supporting data and a need to develop a cost model for detention and removal expenditures. To improve the performance of the program, DRO is working to complete the follow-up actions recommended in the PART assessment.

Type	Follow-up Action
Budgetary	The Budget proposes to expand the program's initiatives to improve performance in removing all removable aliens.
Performance	The Department will ensure collection of critical performance data for the program's new measures.
Performance	The Department will work to develop cost effectiveness measures for the program.

Budgetary

- Resources will be used in FY 2006 to apprehend, process, and remove more aliens. The budget provides more Fugitive Operations Teams, more bed space, and more Transportation and Removal resources. The new resources will enable ICE to remove more removable aliens.

Performance

- DRO is collecting performance data on how to measure improvement on: removal rates, the success of expedited removal in deterring illegal crossings and repeat crossing, how many criminal liens are successfully removed, and the increase in fugitive apprehensions. The data will be collected from the Executive Office of Immigration Reform (EOIR), DRO, and CBP databases. These sources will be used in the analysis and will provide the basis for evaluating program performance.

Performance

- The performance data and analysis will provide the basis for determining program effectiveness.

DRO resource data will be combined with performance data to develop measures of efficiency.

Office of Investigations (OI) – ICE requests \$1.687 billion for Investigations in FY 2007:

- \$1561.4 million in the Investigations group of two budget activities within the Salaries and Expenses appropriation,
- \$57.9 million in the Intelligence group of two budget activities within the Salaries and Expenses appropriation,
- \$0 million in the Automation Modernization appropriation,
- \$54.3 million in the Student Exchange Visitor Program account and
- \$13.0 million in the Immigration User Fee account.

In support of the SBI, more effective immigration and trade enforcement will contribute to enhanced homeland security as well as providing deterrence to terrorist and other criminals. Specific initiatives will include: expanding the Compliance and Worksite Enforcement programs, providing training to State and local law enforcement personnel under Section 287(g), and improving the Law Enforcement Support Center's response time to inquires from State and local law enforcement personnel.

Investigations' primary measure for performance is the percentage of investigations that have resulted in an enforcement consequence. Annual targets for this measure were developed in FY 2003, based on data drawn from several data-reporting sources. However, OI transitioned to a new consolidated data system in FY 2004, making FY 2005 the first complete year of collecting data in a uniform manner through the use of a single source. Data collected in FY 2005 serves as the baseline for purposes of setting annual targets that will incrementally increase the percentage of cases that have an enforcement consequence.

OI underwent OMB's PART for the FY 2006 Budget process. OI received a rating of adequate, with recommendations for the agency to develop stronger financial controls, to continue progress in instituting controls to hold managers accountable for performance results, to increase cooperation with other Federal agencies to synergize efforts, and to collect performance data. ICE is working to complete the follow-up actions recommended in the PART assessment.

Type	Follow-up Action
Budgetary	<p>The 2006 Budget proposed \$34 million in initiatives for the Visa Security Program, the Homeland Security Data Network, and increased worksite enforcement.</p> <p>The agency will develop stronger financial control of its resources and develop stronger internal control mechanisms to track the expenditure of funds.</p>
Management	<p>ICE's first permanent Chief Financial Officer (CFO) was appointed on January 9, 2006. The Office of the CFO has been reorganized to address weaknesses in ICE's financial management system. A 3-year Financial Action Plan has been developed to improve the agency's financial management; key objectives include identifying and strengthening internal controls over financial processes and improving the integrity, accuracy, and timeliness over ICE financial reporting.</p>
Management	<p>The agency will continue its progress in instituting controls to hold managers accountable for performance results.</p> <p>All managers and supervisors have been identified for MAX HR performance training to be held January-March 2006. MAX HR training for ICE senior executives is basically complete. Activity on labor and employee relations training awaits the outcome of legal actions.</p> <p>The agency will work to increase cooperation with other Federal law agencies in order to prevent conflicting investigations and to utilize all resources in common investigative goals.</p>
Management	<p>ICE has made improvements in this area since the PART evaluation in 2004. OI and CBP have developed joint memoranda regarding roles and responsibilities, joint operations, and other joint matters; there are many Special Agents assigned to FBI Joint Terrorism Task Forces (JTTFs) around the country; additionally, ICE has agents assigned, detailed, or serving as liaisons to other FBI organizations, the Department of Defense, CBP, CIS, components of the intelligence community, the Department of State, etc.; ICE, FBI, ATF, and DEA routinely participate in each other's gang enforcement operations; ICE also continues to work cooperatively with other agencies to achieve common investigative goals in areas such as OCDETF investigations, HIDTA initiatives, Integrated Border Enforcement Teams, and Ad Hoc Task Forces on major investigations and initiatives.</p>
Management	<p>The agency will ensure collection of critical performance data for the program's measures.</p> <p>ICE OI has completed the consolidation of legacy law enforcement data, with FY 2005 being the base year for performance measurement and outyear targets.</p>

Federal Protective Service (FPS) – FPS requests \$ 516.0 million for FY 2007. In FY 2007 FPS will provide basic law enforcement and security services to all federal agencies housed within GSA owned and leased facilities, as well as ongoing special response team initiatives such as: K-9 bomb detection teams, Weapons of Mass Destruction (WMD) first responder capability, improved equipment and technology, and enhanced intelligence sharing. The President’s Budget will allow the FPS to continue identifying new vulnerabilities at Federal facilities and to recommend appropriate countermeasures to reduce these vulnerabilities. FY 2007 funding will support planning efforts to fulfill legislative requirements and DHS objectives for the FPS mission, such as providing law enforcement and security services to other Federal facilities outside of the current GSA managed inventory on a reimbursable basis.

The FPS is currently funded as an offsetting collection and is required to recover 100 percent of the costs to provide law enforcement and security services to federal facilities across the Nation. FPS receives no direct appropriations. Security fees and direct costs are collected from federal agencies housed in federal space and facilities protected by FPS through a process similar to that of the monthly General Services Administration (GSA) rent bill (security bill process).

The performance impact associated with the requested resources will allow for a 2% performance improvement with the Federal Facility Security Index measure. The Federal Facility Security Index quantifies the effectiveness in reducing threats and vulnerabilities to criminal and terrorist acts at Federal buildings by two percent.

D. How ICE Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

The following lists the performance goal(s) for each ICE program and identifies the specific DHS strategic goal(s) and objective(s) that each program supports:

Detention and Removals Operations (DRO) performance goal – To remove all removable aliens from the United States.

DRO’s performance goal supports the following DHS goal and objective:
 Goal 2: Prevention – Detect, deter and mitigate threats to our homeland.
 Objective 2.2: Enforce trade and immigration laws.

Office of Investigations (OI) performance goal – Prevent the exploitation of systemic vulnerabilities in trade and immigration that allow foreign terrorists, other criminals, and their organizations to endanger the American people, property and infrastructure.

OI’s performance goal supports the following DHS goal and objective:
 Goal 2: Prevention – Detect, deter and mitigate threats to our homeland.
 Objective 2.2: Enforce trade and immigration laws.

Federal Protective Services (FPS) performance goal - Provide law enforcement, criminal investigations, and physical security protection to reduce and respond to potential threats and

vulnerabilities to Federal properties thereby providing a safe, secure environment to Federal tenants and the visiting public in a cost-effective manner.

FPS' performance goal supports the following DHS goal and objective:

Goal 3 : Protection –Safeguard our people and their freedoms, critical infrastructure, property and economy of our Nation from acts of terrorism, natural disasters, or other emergencies.

Objective 3.1: Protect the public from acts of terrorism and other illegal activities.

Objective 3.2: Reduce infrastructure vulnerability from acts of terrorism.

Objective 3.5: Ensure the continuity of government operations and essential functions in the event of crisis or disaster.

E. Performance Based Budget Highlights by Program

Detention and Removal				
Performance Measure Objectives 2.2		2005	2006	2007
Main Measure: Number of aliens with a final order removed in a quarter/Number of final orders that become executable in the same quarter (demonstrated as a percent).	Target	Baseline	75%	81%
	Actual	75%		
Performance Measure Objectives 2.2		2005	2006	2007
Efficiency: Total DRO budget/number of final order removals	Target	Baseline	1,100	1,100
	Actual	1,000		
Performance Measure Objectives 2.2		2005	2006	2007
Number of completed removals (PART Performance Measure)	Target	Baseline	170,000	270,000
	Actual	166,838		
Performance Measure Objectives 2.2		2005	2006	2007
Removals as a percentage of (executable) final orders issued (PART Performance Measure) (FY05 Executable final orders may have been issued in previous FY but became executable in current FY)	Target	Baseline	75%	81%
	Actual	75%		
Performance Measure Objectives 2.2		2005	2006	2007
Efficiency: Appearance Rates for Immigration Hearings (PART Performance Measure)	Target	Baseline	44%	54%
	Actual	34%		
Performance Measure Objectives 2.2		2005	2006	2007
Efficiency: Appearance Rates for Removal (PART Performance Measure)	Target	Baseline	50.7%	66%

Alton Flight School (fee)	...	1,400	...	2,000	...	2,000	
Subtotal, Enacted Appropriations & Budget Estimates	50,673	\$5,971,458	50,343	\$6,677,014	50,300	\$6,289,462	17	\$387,552	\$132,448	30	\$79,866	(13)	\$52,882
Less: Adjustments for Other Funding Sources	(2,010,000)	...	(1,736,206)	(1,736,206)	(193,345)
Passenger Fee	...	(1,918,340)	...	(39,000)	...	(74,101)	(35,101)	(34,101)
Credentialing Fee	...	(1,818)	...	(2,000)	...	(2,000)
Alton Flight School (fee)	(5,500)	5,500	5,500
Net, Enacted Appropriations and Budget Estimates	50,673	\$4,057,288	50,343	\$4,110,514	50,300	\$4,487,156	17	(376,642)	(313,368)	30	(51,452,296)	(13)	(379,464)

¹ FY 2006 Revised Enacted fees include adjustments to FY06 Enacted levels.
² Specific FTE amounts have been updated to delineate the latest available data. As a result, numbers may differ somewhat from those depicted in MAX.
³ In FY 2005, Federal Air Marshals were included in Immigration and Customs Enforcement Budget.
⁴ In FY 2005, Transportation Threat Assessment and Credentialing (TTAC) part of Aviation Security Appropriation. In FY 2006 and beyond, TTAC a separate appropriation.
⁵ The FY 2005 actual amount includes Intelligence Appropriation and Research & Development (R&D) Appropriations data.
 In FY 2006, Intelligence became part of the Transportation Security Support Appropriation, and R&D was transferred to the Office of Science and Technology, DHS.

FY 2006 Revised Homeland fees include adjustment to FY06 financial level.

iii. Status of Congressionally Requested Studies and Reports**Department of Homeland Security
Transportation Security Administration****Status of Congressionally Requested Studies, Reports, and Evaluations**

1. Conference Report 109-241, page 21 directs TSA to report bi-weekly any reasons for non-compliance with a separate mandate to triple the percentage of air cargo inspected on passenger aircraft. Target response to Committee is January 2006 with subsequent reports to follow as needed.
2. Conference Report 109-241, page 23 directs TSA to report monthly that details, by airport, the amount of air cargo carried on passenger aircraft that was screened by TSA. Target response to Committee is February 2006 with subsequent reports to follow as directed.
3. Conference Report 109-241, page 8 directs DHS to provide a report on Explosives Detection Systems Plan. Target response to Committee is January 2006.
4. Conference Report 109-241, page 55 directs TSA to report quarterly on the progress of meeting the goals established for the Transportation Worker Identification Credential program. Target response to Committee is March 2006 with subsequent reports to follow as directed.
5. Conference Report 109-241, page 56 directs TSA to provide a report that details a proposal to expand the Federal Air Marshals program beyond the aircraft and enter the airport security arena. Target response to Committee is March 2006.
6. Conference Report 109-241, page 21 directs DHS to report bi-annually on the actions taken to increase the level of air cargo screened and the percentage of air cargo inspected at each airport. Target response to Committee is March 2006 with subsequent report to follow as directed.
7. House Report 109-79, page 47 directs TSA to provide a report on flight attendant security training. Target response to Committee is February 2006.
8. Conference Report 109-241, page 56 directs TSA to provide a classified report on the status and efforts to hire Federal Air Marshals. Target response to Committee is March 2006.
9. Conference Report 109-241, page 51 directs TSA to provide a report that details appropriate solutions to lengthy processing times of international travelers at airports. Target response to Committee is April 2006.
10. House Report 109-79, page 51 directs TSA to provide a report on the Access Certificate program. Target response to Committee is February 2006.
11. Conference Report 109-241, page 34 directs TSA to provide a report on general aviation security. Target response to Committee is March 2006.
12. Conference Report 108-774, page 21 directs TSA to report annually on the amount of unclaimed money recovered in total at each airport and how that money is being used to provide civil aviation authority. Target response to Committee is April 2006.

Total Direct Authorization/Appropriation			5,580,669	6,299,462

¹Through FY 2005, these programs were under the Aviation Program and were therefore authorized. The Transportation Threat Assessment and Credentialing Appropriation has not been authorized.

Notes:

(1) The only authorization that TSA has on program wide level is the aviation security authorization of appropriation received in the Aviation Transportation Security Act of Nov 2001. This act authorized Aviation funding through FY05 and was extended thru FY06 in the Intelligence Reform Act. Pass Fee auth was designated as not to exceed \$2.50 per emplanement with total not to exceed \$5.00 per one-way trip.

(2) FY06 Appropriation is Revised Enacted (includes 1% rescission)

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Transportation Security Administration
Aviation Security Appropriation

I. Appropriation Overview**A. Mission:**

The Aviation and Transportation Security Act (ATSA) enacted on November 19, 2001, established the Transportation Security Administration (TSA) to protect the transportation system and ensure the freedom of movement for people and commerce. The Aviation Security Appropriation consists of programs whose primary focus is to secure aviation transportation. The path to achieving this mission has evolved in the years since the September 11 attacks. In keeping with the DHS Second Stage Review, changes in aviation programs and shifts in resources have been driven by risk-based analysis. Enhancements in aviation security have included emphasis in explosives detection training and technology, modifications to the prohibited items list, and changes to TSA security screening protocols.

Aviation security efforts are supported by its Transportation Security Officers (TSOs), formerly known as screeners. TSA is committed to retaining and leveraging its workforce of 43,000 TSOs to enhance its ability to secure the aviation sector. The deployment of explosives detection systems is another key component of securing aviation. More than 1,400 explosives detection systems, over 1,850 advanced checkpoint x-ray devices, approximately 1,800 enhanced metal detectors, and an estimated 7,263 explosives trace detection devices have been installed in airports since November 2001. The deployment of 59 explosives trace portals to date has widened the scope of explosives detection at passenger checkpoints. Additional procurements in FY 2006 and FY 2007 will expand explosives detection capabilities at all airports for all high risk persons as well as automating explosives detection for their carry-on items. Near term emerging technology includes additional purchases of explosives trace portals; procurement of whole body imagers; automated explosives detection systems for carry-on items; cast and prosthesis spot imaging scanners; and automated explosives spot sampler systems. Safeguarding the nation's critical air cargo transportation infrastructure is another key component to aviation security. TSA has implemented a threat-based risk management approach for prioritizing efforts and focusing resources using a model of shared public and private sector responsibility. These efforts will be supported by the 200 cargo inspectors currently on board and the additional 100 being fielded in 2006. Deployment of the Freight Assessment System will also begin in 2007 to identify elevated risk cargo and enable a supply chain risk management model.

FY 2007 request also includes a provision that will restructure the September 11th Passenger Security Fee – passenger fee. Under the FY 2006 fee structure, passengers pay \$2.50 per enplanement for a maximum of \$5.00 per one-way trip. The proposed fee structure calls for a flat fee of \$5.00 for all air travelers for one-way travel from United States airports. The flat fee of \$5.00 matches the fee paid by most rural air travelers or those with connecting flights for one-way travel, and increases by \$2.50 the fee paid by air travelers flying on direct flights or only one enplanement. The restructuring responds to congressional feedback from last year and better aligns the share of costs paid by the direct

beneficiaries of aviation security, the commercial air travelers, to the cost incurred by TSA in meeting the special role of the federal government in providing transportation security in the aviation mode. The budget request assumes \$1.3 billion additional collections in FY 2007 associated with the change to the flat fee benchmarked to the \$5.00, which is the FY 2006 cap on two or more enplanements on a one-way trip. Because the fee for aviation security will apply to all passengers, it will be a fixed amount, collected from passengers by their carrier and remitted to the federal government to offset the cost of providing secure air travel.

B. Budget Activities:

The Aviation Security appropriation includes two distinct components: TSO Operations and Equipment, previously called Screener Operations, and Aviation Direction and Enforcement.

TSO Operations and Equipment includes the Programs, Projects and Activities (PPA's) that support the pay, training, outfitting, and recruiting costs for the TSO workforce. Funding is also included for checkpoint support, purchase, installation, and maintenance of screening equipment to include explosives detection systems (EDS) and explosives trace detection machines (ETD), and related integration activities.

Aviation Direction and Enforcement includes activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports air cargo and airport/airline regulation compliance through inspections, K-9 units, international programs, and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints, as well as the airport management and direction staff and airport IT connectivity and administrative support.

C. Budget Request Summary:

The Transportation Security Administration requests 51,102 positions, 48,520 FTE, and \$4,654,884,000 for the FY 2007 Aviation Security request. The total adjustments-to-base is \$1,106,000 and reflects a reduction of 20 FTE. The program increases include \$72,366,000 to:

- Fully utilize workforce retention flexibilities, to potentially include pay-for-performance, performance bonuses, retention allowances, college credit reimbursement, and flexible staffing (0 positions, 0 FTE, and \$10,000,000)
- Reimburse the Department of Labor Office of Worker's Compensation Program for claims filed by TSA employees through FY 2005 (0 positions, 0 FTE, and \$20,000,000)
- Enhance the detection capability of prohibited items, especially firearms and explosives, by fielding additional sensors such as whole body imaging systems, automated explosive spot samplers, and cast and prosthesis scanners at the checkpoint (0 positions, 0 FTE, and \$8,366,000)
- Support the maintenance of EDS systems that help prevent catastrophic loss and air piracy (0 positions, 0 FTE, and \$34,000,000)

TSA also requests adjustments to the collection of fees:

- Replace the two-tiered passenger fee with a single flat fee of \$5.00 for a one-way trip (0 positions, 0 FTE, and \$1,336,861,000)
- Collect retro-active Airline Security Infrastructure Fee (ASIF) payments from air carriers from 2005 and 2006 (0 positions, 0 FTE, and \$196,000,000)

D. Alternative PPA Structure Proposal:

The FY 2007 request is presented in the structure in which it was enacted in FY 2006. However, TSA proposes several strategic rollups of PPA's in two areas of the Aviation Security budget. These consolidations will improve TSA's ability to target funds in areas that are interrelated and provide agency management the flexibility to maximize the benefit intended among the linked PPA structure. TSA will continue to provide granularity on the specific pieces of the PPA's that were provided in past year budgets to support program accountability and external oversight of these activities.

TSA proposes a new PPA called TSA Staffing and Operations that will be comprised of the core PPA's that support the TSO workforce: Screening Partnership Program, Passenger and Baggage TSO PC&B, TSO Training, Passenger and Baggage TSO-Other, and Human Resource Services. This consolidation will allow TSA to respond to new requirements and risks that impact TSA's ability to recruit, train, and retain a quality TSO workforce. It will allow necessary management flexibility to balance the key logistical support PPA's related to the TSO workforce, allowing TSA to balance the complementary needs of payroll, training, recruiting, retaining, and equipping the TSO workforce. Examples of adjustments within this PPA could include changing the mixture of full and part-time TSOs to maximize staffing efficiencies, shifting resources when airports enter the Screener Partnership Program, and addressing emergent training needs or heightened security conditions that may arise. The consolidation of passenger and baggage activities is further supported by the fact that approximately 90% of TSO hires are trained as Dual Function TSOs. Currently, all of these changes would require Congress to approve a formal reprogramming request.

TSA also proposes to consolidate the EDS/ETD Purchase, Install, Maintenance and Utilities, and Operation Integration PPA's into one PPA called EDS/ETD Systems. This structure would mirror the Checkpoint Support PPA, which includes the purchase, install, and maintenance of checkpoint equipment into one PPA.

TSA will continue to provide an annual expenditure plan and capture obligations for EDS activities in four discreet categories: purchase, installation, maintenance, and operational integration. The PPA consolidation will allow TSA address changes in requirements as screening compliance issues arise or passenger growth patterns change. Funding requirements could also change as new technology is certified that is less expensive, which could change the amounts of install and purchase funding needed during the course of the year. The findings of the EDS innovative cost-share study could require TSA to shift resources between these areas.

As an example, a purchase and installation allocation imbalance exists in FY 2006, as outlined in the FY 2006 Spend Plan: given the programmatic requirements in this period, the EDS expenditure plan leaves \$22.5 million unallocated in purchase funding because not enough installation funding is available to

support additional systems. Purchasing the equipment without deployment draws down the warranty period thereby increasing life cycle costs and installation delays deny security and efficiency benefits to screening operations.

II. Summary of FY 2007 Budget Estimates by Program/Project Activity (PPA)

¹ Specific FTE amounts have been updated to delineate the latest available spending data. As a result, numbers may differ somewhat from those depicted in MAX.

² In FY 2005, Transportation Threat Assessment and Credentialing (TTAC) was part of the Aviation Security Appropriation. In FY 2006 and beyond, TTAC is a separate appropriation.

III. Current Services Program Description by PPA

Department of Homeland Security
Transportation Security Administration
Aviation Security Appropriation
Program Performance Justification
(Dollars in thousands)

PPA: PASSENGER TSO PERSONNEL, COMPENSATION, AND BENEFITS
[PASSENGER SCREENER – PC&B]

	Perm Pos	FTE	Amount
2005 Actual	30,260	28,785	\$1,504,238
2006 Revised Enacted	29,816	28,448	\$1,511,393
2007 Adjustments-to-Base	(22)	(22)	25,933
2007 Current Services	29,794	28,426	\$1,537,326
2007 Program Change	18,900
2007 Request	29,794	28,426	\$1,556,226
Total Change 2006-2007	(22)	(22)	\$44,833

The Transportation Security Administration requests \$1.556 billion for this activity. This is an increase of \$44.8 million over FY 2006.

PPA: BAGGAGE TSO PERSONNEL, COMPENSATION, AND BENEFITS [BAGGAGE
SCREENER – PC&B]

	Perm Pos	FTE	Amount
2005 Actual	17,772	16,905	\$781,973
2006 Revised Enacted	17,340	16,708	\$879,027
2007 Adjustments-to-Base	(13)	(13)	23,847
2007 Current Services	17,327	16,695	\$902,874
2007 Program Change	11,100
2007 Request	17,327	16,695	\$913,974
Total Change 2006-2007	(13)	(13)	\$34,947

The Transportation Security Administration requests \$914 million for this activity. This is an increase of \$34.9 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Passenger and baggage screening protects commercial air travelers by preventing dangerous or deadly objects that individuals are attempting to smuggle onto aircraft either on themselves or in their carry-on or checked baggage. The TSO PC&B PPAs fund approximately 44,100 FTE comprised of approximately 43,000 TSOs, TSO leads, and TSO supervisors, and approximately 1,100 TSO managers.

The TSA screening process must strike the appropriate balance between preventing security breaches and maintaining the efficient movement of law-abiding passengers through the security checkpoints. At the time of passenger check-in, TSOs use various types of electronic detection and imaging machines for this purpose, including X-ray machines, explosives trace detection equipment, walk-through metal detectors, and hand-held metal detectors. TSA personnel, including trained TSOs may employ behavior recognition techniques in conjunction with screening operations. At the checkpoints, TSOs may also perform physical searches of carry-on baggage and pat-down searches of airline passengers or crew.

By law all TSOs, both private and federal, are required to be U.S. citizens, pass a background investigation, and have a high school diploma, a general equivalency diploma, or experience that TSA has determined is sufficient to perform the duties of the position. They must pass training and be certified to use the machines employed in their jobs. They are also subject to periodic training and testing. Failure to pass any phase of training or a certification examination is grounds for termination of employment.

At the FY 2007 requested level of \$2.47 billion for TSO personnel, compensation, and benefits (PC&B), TSA will employ sufficient TSOs to ensure the safety of the traveling public in secure airport terminals and aboard aircraft. In doing so, the public's confidence and satisfaction with the security of the aviation system will remain acceptable. Public satisfaction with security is evidenced in part by commercial air traffic that now exceeds pre-9/11 levels.

At the requested level, funding will support TSO salaries and management at all federalized airports. Included in the request is funding to support base salaries and benefits, including locality, Sunday, night differential, overtime, and holiday pay.

TSA requests \$10 million for a program increase for screener retention programs. TSA will seek to fully utilize workforce retention flexibilities, to potentially include pay-for-performance, performance bonuses, retention allowances, college credit reimbursement, and flexible staffing.

In FY 2007 TSA will pay worker's compensation payments from the TSO PC&B account, indicative that U.S. Department of Labor Office of Worker's Compensation Program (OWCP) payments are most appropriately part of the TSO compensation base. Based upon actual OWCP billings for claims filed by TSA employees in FY 2005, a total of \$55 million for worker's compensation payments are included in the request, representing a \$20 million dollar increase over FY 2006. TSA will display and fund OWCP billings as part of the TSO PC&B activity.

TSA continues to aggressively reduce our OWCP costs through strategies of prevention, education, case management, and nurse intervention. TSA field operations are required to develop a local safety program targeted at inspections, hazard recognition and analysis, hazard

abatement, and injury documentation. The Office of Occupational Safety, Health and Environment (OSHE) provided field support to assist 150 airports develop their safety programs. Eleven safety courses aimed at injury prevention are posted on TSA's Online Learning Center. TSA implemented a national nurse case management program at 21 airports which has successfully assisted TSOs in returning to employment in a shorter time. We anticipate these efforts will mitigate injuries and reduce costs in the out years.

**TRANSPORTATION SECURITY OFFICER (TSO) STAFFING AND OPERATIONS
[SCREENER WORKFORCE]**

PPA: SCREENER PARTNERSHIP PROGRAM [PRIVATIZED SCREENING]

	Perm Pos	FTE	Amount
2005 Actual	\$152,429
2006 Revised Enacted	\$138,868
2007 Adjustments-to-Base	9,732
2007 Current Services	\$148,600
2007 Program Change
2007 Request	\$148,600
Total Change 2006-2007	9,732

The Transportation Security Administration requests \$148.6 million for this activity. This is an increase of \$9.7 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Screening Partnership Program (SPP) allows an airport operator to submit an application to have screening carried out by a qualified private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at the same or at higher performance levels as federal TSOs. TSA developed the SPP based on operational experience for five years with the Private Screening Pilot Program (PP5), key lessons learned and program improvements from evaluation studies, and input from internal subject matter experts and external stakeholders.

Under ATSA, the pilot program ended on November 19, 2004, but TSA issued short bridge contracts to the original PP5 contractors to allow TSA time to develop the rules for applying for the SPP, the acquisition process, the Qualified Vendor's List and the Requests for Proposals for the new contracts. To date, all the original PP5 airports (San Francisco International, Kansas City International, Greater Rochester International, Jackson Hole Airport, and Tupelo Airport) have applied to have qualified contractors perform screening functions.

Additionally, to date two federalized airports have applied to the SPP: Sioux Falls, South Dakota and Elko, Nevada. Sioux Falls was accepted and a contract was awarded in December 2005. To align TSA resources to support the Sioux Falls privatization, a total of \$1.7 million in various PPA's was allocated to the SPP PPA, the majority from TSO personnel, compensation, and benefits. The PPA adjustments were made by applying Activity Based Costing and Process

Based Management to determine the cost of airport screening activities. The Elko application is currently under review at TSA.

The FY 2007 funding request of \$148.6 million is based on an estimate of resources necessary to maintain the six privatized airports through the end of FY 2007. The base increases support worker's compensation costs as well as anticipated transition and sustainment costs.

TSA will work to ensure the privatized screening companies offer an attractive, beneficial screening system option for airports while maintaining or improving security outcomes. Efficient and effective screening programs can only be achieved through strong partnerships with local airports. TSA will continue to strive for ways to strengthen these partnerships while ensuring that efficiencies resulting from privatization in no way compromise security.

PPA: TSO TRAINING [SCREENER TRAINING]

	Perm Pos	FTE	Amount
2005 Actual	\$95,853
2006 Revised Enacted	\$87,509
2007 Adjustments-to-Base	491
2007 Current Services	\$88,000
2007 Program Change
2007 Request	\$88,000
Total Change 2006-2007	491

The Transportation Security Administration requests \$88 million for this activity. This is an increase of \$491,000 over FY 2006 to bring TSO training back to the FY 2006 enacted level.

CURRENT SERVICES PROGRAM DESCRIPTION:

A total of \$88 million is requested to fully implement the passenger and baggage TSO training programs and related TSO workforce development programs. These funds support the design, development, delivery, and administration of training for TSOs and TSO supervisors and managers. Funding also supports the annual proficiency reviews for the TSO workforce required by ATSA.

TSO training is comprised of a compendium of courses that includes basic training for initial TSO hires, lead and supervisor TSOs, TSO recurrent training, and advanced technical skills training. About 55% of TSA training is conducted by over 1,000 TSA Approved Instructors (TAI) at the local level, with the remaining courses being taught by contractors. TSA's On-Line Learning Center (OLC) is also used to provide recurrent and specialized training.

All newly hired TSOs receive classroom instruction that includes 52.5 hours of checkpoint training, 48.5 hours of checked baggage training, or 65.5 hours of Dual Function TSO training, in addition to a minimum of 60 hours of On the Job (OJT) training. In order to reinforce and extend existing skills and knowledge, TSA aims for TSOs to receive an average of 3 hours of recurrent training per week. The FY 2007 request also supports advanced technical training and

cross training to help mitigate the impact the attrition of TSOs and increase local management flexibility.

TSA continually updates its training programs to combat predictable threats and to respond quickly to emergent ones. Recent examples of TSO training in response to new threats include Improvised Explosives Detection (IED) training provided to more than 18,000 TSOs to date and new concepts in the recognition and resolution of IED's to enhance TSO ability to recognize and resolve the components of IED's.

The implementation of new screening methodologies and the rollout of new technology also require modifying existing or creating new training tools. For example, a training curriculum has been developed for TSOs in behavior observation and analysis at the checkpoint to identify passengers exhibiting behaviors indicative of stress, fear and deception. As new technology is deployed for passenger and baggage screening in FY 2007, including Whole Body Imagers and reduced-size EDS, new training modules will be developed.

TSA employs a variety of automated training and testing tools to enhance TSO skills including computer based courses, training videos, and Threat Image Projection – where new threats are flashed on the computer screen at checkpoints to test a TSOs ability to detect them. In addition, new tools are deployed like Object Recognition Module (ORM) and Tip Ready X-Ray Simulator (TRX) to enhance and improve the performance of TSOs in image recognition. TSA also provides a "Threat in the Spotlight" series of articles written specifically for TSOs and their supervisors which describes and shows actual pictures of threats found by TSOs at airports or from other intelligence resources.

TSA uses a measurement and evaluation process to ensure that training programs meet established objectives and standards. Training effectiveness is assessed using a four-level model measuring trainee reaction, learning, behavior, and results. TSA also conducts assessments to ensure that a high level of instructional quality is maintained.

The technical and leadership competence of screener supervisors/managers is a critical component of screener effectiveness and retention. All recently appointed supervisors/managers will participate in training that includes approximately 80 hours of classroom training supplemented by an additional 20 hours of web-based training. Concurrent with deployment of the new supervisor training program, TSA will be developing and deploying refresher and advanced training for experienced supervisors/managers to ensure that their skills keep pace with the ever changing work environment, security threats, and requirements for leading a security workforce.

All TSOs and Lead/Supervisory TSOs must participate in an Annual Proficiency Review (APR) to ensure that they meet all of the qualifications and performance standards required to perform their duties as set forth under ATSA. The APR involves a three part skills assessment which includes a written exam(s), an image proficiency review and a practical skills demonstration. TSOs who fail a portion must be removed from screening duties and receive extensive remedial training and be successfully re-tested prior to returning to duty. The contractor deploys assessment teams to every field location and provides for their logistical support.

PPA: PASSENGER TSO - OTHER [PASSENGER SCREENER - OTHER]

	Perm Pos	FTE	Amount
2005 Actual	\$25,559
2006 Revised Enacted	\$23,618
2007 Adjustments-to-Base	(266)
2007 Current Services	\$23,352
2007 Program Change	0
2007 Request	\$23,352
Total Change 2006-2007	(266)

The Transportation Security Administration requests \$23.4 million for this activity. This is a decrease of \$266,000 from FY 2006.

PPA: BAGGAGE TSO - OTHER [BAGGAGE SCREENER - OTHER]

	Perm Pos	FTE	Amount
2005 Actual	\$90,408
2006 Revised Enacted	\$134,036
2007 Adjustments-to-Base	(922)
2007 Current Services	\$133,114
2007 Program Change	0
2007 Request	\$133,114
Total Change 2006-2007	(922)

The Transportation Security Administration requests \$133.1 million for this activity. This is a decrease of \$922,000 from FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

In addition to compensation and benefits, TSA incurs other direct costs associated with TSO operations. These requirements include operational support such as consumable supplies; travel for the National TSO Force; a uniform allowance; hazardous materials disposal; and checkpoint janitorial services. For passenger and baggage, base resources of \$156.5 million support these activities.

This request supports \$104 million of consumable supplies, uniform allotments, and janitorial services. Consumable supplies are critical, disposable materials used by TSA TSOs to assure consistently effective checked baggage security levels. These consumable supplies include:

- disposable gloves
- sample swabs or traps
- sample wands
- daily calibration tokens
- sticks or traps
- moisture removers
- filters, printer paper & ribbons

- reactant materials
- special solutions
- holographic protected, serialized label seals applied to bag tags to confirm the bag has been cleared for transport
- serialized label seals and plastic strip seals to reseal bags opened for inspection by TSOs
- TSA logo inspected tape to reseal cardboard boxes and packages after inspection
- serialized TSA Kevlar straps to reseal bags after inspection when latches must be broken to gain access
- baggage inserts to notify passengers that TSA has opened their bag for inspection and providing contact information in the event the passenger believes there is a problem.

Full funding of this request will ensure that all TSOs receive a sufficient uniform allotment - initially \$234/TSO - to purchase and replace uniform items. TSA checked baggage and passenger TSOs are required to wear the TSA uniform in the performance of their duties. Uniforms allow TSA TSOs to maintain a professional appearance and instill confidence, as well as serve as a deterrent to would-be-terrorists.

Janitorial services are required at each passenger checkpoint and baggage screening area. These services are necessary to provide a debris free environment for TSA TSO workforce. In addition, the maintenance of these areas is crucial in assisting to convey a positive image of TSA to the traveling public.

The funds requested provide the \$35 million for operational expenses of the National TSO Force. In FY 2007, the National TSO Force will generally be deployed only to those airports experiencing significant staffing shortfalls associated with increased seasonal traffic or when a special event (e.g., Super Bowl, large national conferences, etc.) occurs requiring an immediate influx of additional TSO support. TSA will continue to review methods for reducing costs associated with the National TSO Force, such as ensuring that each airport has a sufficient staffing program in place to address short-term needs.

Additionally, this budget funds \$12 million for the National Hazardous Materials Disposal Program that arranges for disposition of the voluntarily abandoned and/or confiscated personal property, including hazardous materials collected by TSA at airport security checkpoints, such as butane lighters. TSA has an extensive and complex effort to safely and securely identify, sort, store, protect assets, as well as remove and dispose of hazardous property voluntarily abandoned or confiscated by TSA screening programs. With over 448 airports, it is not cost effective for each airport to individually handle hazardous material disposal. TSA has a national hazardous materials disposal program to avoid the exposure of the traveling public to hazardous materials and to comply with Environmental Protection Agency and local environmental regulations and laws.

TSA's most important resource is its employees. In order to support its employees and enable them to perform at the highest level, TSA allocates \$2 million for the Model Workplace Program, which identifies, supports and accelerates implementation of the best employment ideals and practices. The cornerstone of the Model Workplace Program is TSA's Integrated Conflict Management System (ICMS). The ICMS applies to everyone and is the foundation for a Model Workplace because it is about how agency personnel treat each other, how they solve

problems, and how they make decisions. It provides skills, structure and support to develop a positive workplace culture through a common language and the commitment to cooperative problem solving necessary for good relationships, good teamwork and organizational effectiveness. The ICMS supports better-informed and more strategic decision making by focusing on how decisions are made and communicated.

PPA: HUMAN RESOURCE SERVICES

	Perm Pos	FTE	Amount
2005 Actual	\$210,153
2006 Revised Enacted	206,068
2007 Adjustments-to-Base	1,166
2007 Current Services	207,234
2007 Program Change
2007 Request	207,234
Total Change 2006-2007	1,166

The Transportation Security Administration requests \$207.2 million for this activity. This is an increase of \$1.2 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

A total of \$207.2 million is requested for HR Services. The Office of Human Capital (HC) manages human resources, payroll, personnel policies, programs and systems, maintains oversight of all human resources contractual activities, and provides advice and counsel to senior managers on personnel issues. In addition, this office administers mandated employee related programs such as, Employee Assistance Program (EAP), Drug Testing Program, and Employee Relations.

The majority of the requested funds are for the recruitment, assessment and servicing of TSA's TSO and other workforce at headquarters, field locations, and airports to ensure a qualified workforce is available to meet security requirements. In FY 2006, TSA will need to hire in excess of 10,000 TSOs to sustain the workforce at 2006 funded levels given current attrition rates with a workforce comprised of 80% full-time and 20% part-time employees. In addition, TSA plans to increase the percentage of its part-time TSO workforce to provide greater flexibility and efficiency in scheduling which will require increased hiring actions and a greater number of overall employees to service.

PPA: CHECKPOINT SUPPORT

	Perm Pos	FTE	Amount
2005 Actual	\$89,256
2006 Revised Enacted	164,072
2007 Adjustments-to-Base	928
2007 Current Services	\$165,000

2007 Program Change	8,366
2007 Request	\$173,366
Total Change 2006-2007	9,294

The Transportation Security Administration requests \$173.4 million for this activity. This is an increase of \$9.3 million over FY 2006, which includes \$0.9 million base increase to bring TSA back to FY 2006 enacted level and a program increase of \$8.4 million.

CURRENT SERVICES PROGRAM DESCRIPTION:

Checkpoint Support provides the resources required to deploy and maintain passenger screening, carry-on baggage screening and electronic surveillance equipment at approximately 1,880 passenger checkpoint lanes in our Nation's airports. TSA is developing a comprehensive strategic plan for transforming passenger checkpoints through the use of emerging technology and other innovations. This risk based plan, scheduled for completion in 2006, will guide the deployment of screening equipment at passenger checkpoints.

Checkpoints are equipped with equipment to detect weapons including some improvised explosive device components (i.e. wires) in carry-on baggage; to detect the presence of metal on passengers' bodies; and to test for traces of explosives on passengers and their carry-on bags. The systems currently utilized for these purposes are the TIP ready X-Ray machines (TRX), which replace a previously manually-intensive search, allowing faster bag throughput, and increased threat detection capability; the enhanced metal detectors (EMD), which are walk-through metal detection portals that screen the general public for metallic weapons such as guns or knives; and the explosives trace detectors (ETD), which are used to test for explosive residue on selected carry-on items. Additionally, deployment of Explosives Trace Portals (ETP) began in 2005 to inspect passengers for concealed explosives. The portals represent the first emerging technology being used to detect explosives on passengers.

The growth in passenger traffic, the evolution of the airline industry, and the need to deploy emerging technology fuel the requirement for checkpoint reconfiguration funding in FY 2007. Funding of \$11 million will support the addition of 75 - 100 checkpoint lanes to accommodate anticipated airport growth and continued maintenance of the checkpoint equipment warehouse. This includes base funding of \$10 million and a program increase of \$1 million.

This request includes \$31.55 million to purchase and install new screening equipment and update existing equipment to enhance reliability and improve performance. This includes a base funding level of \$30.3 million and a program increase of \$1.25 million. Equipment purchases will include TIP Ready X-rays (TRX), Explosives Trace Detectors (ETD), Enhanced Walk-Through Metal Detectors (EMD), and Enhanced Hand Wand (EHW). Existing equipment will be refurbished to provide functionality and performance enhancements to existing ETD, TRX and EMD.

The requested funding for emerging technology of \$80.52 million will support the purchase and deployment of new passenger screening technologies that emerge from on-going R&D programs. The funding level includes a base funding level of \$79.30 and a program increase of \$1.22

million. This funding will permit the continued acquisition and deployment of Explosives Trace Portals (ETP) and Whole Body Imagers. The request provides funds to initiate the acquisition and deployment of Automated Explosives Detection Systems (EDS) for Carry-On Bags, Automated Explosives Spot Samplers, Cast and Prosthetics Scanners, as well as the initial production of new emerging technologies to be purchased and field tested. Funding will also allow implementation of engineering enhancements to screening systems utilizing emerging technologies that were deployed earliest in the equipment's roll-out. These enhancements will address any reliability and detection issues that emerge.

The table below describes the fully loaded per unit costs, including purchase, installation, engineering, technical and program support, for the emerging technology planned for deployment in FY 2007.

Emerging Technology	Description	Fully Loaded per Unit Costs
Explosives Trace Detection Portals (ETP)	Automated detection capability to inspect passenger's whole body for concealed explosives, while passengers pass through a semi-enclosed portal that puffs small amounts of air onto the passenger and then collects and analyzes the air for explosives trace.	\$211,924
Automated Explosives Spot Sampler	Automated detection capability to inspect passenger's hands, shoes, torso, or documents (ticket, boarding pass, ID, credit-card) for concealed explosives, could take the form of a kiosk, turnstile, etc.	\$126,344
Automated Carry-On Bag Explosives Detection System	Automated detection capability for inspecting carry-on bags for explosives and weapons that can be used to replace the current imaging (TRX) and manual image analysis process used in aviation checkpoints.	\$506,778
Whole Body Imaging	Imaging capability to inspect passenger's whole body for concealed weapons (metal and non-metal) and some explosives in place of a metal detection wand inspection and physical pat-down in selectee lanes using backscatter X-ray or other transmission technology to create images.	\$96,582
Cast and Prosthetics Scanner	Imaging capability to inspect passengers with limb casts or limb prosthesis for concealed weapons and some explosives in selectee lanes.	\$43,077

Funding for purchase and installation of checkpoint equipment and emerging technology will: (1) assist in meeting TSA's operational requirements for lane expansions; (2) ensure minimum delays for checkpoint operations; and (3) aide in replacing and upgrading current screening equipment that is nearing the end of its useful life-cycle. Specifically:

- 125 EMD's for expansion lanes

- 164 TRX's for expansion lanes and life-cycle replacements (includes 136 units for base funding and 28 units from the requested program increase)
- 375 ETD's for expansion lanes and life-cycle replacements
- 92 ETP's
- 27 Automated EDSs
- 91 Whole Body Imaging Systems
- 210 Cast and Prosthetics Scanners (includes 188 units from base funding and 22 units from the requested program increase)
- 93 Automated Explosives Spot Samplers

TSA must continue to fund maintenance in order to sustain operational capability and ensure compliance at the checkpoints. A total of \$40 million is requested for both in warranty and out of warranty checkpoint equipment, which includes both preventative and corrective maintenance, as well as spare parts and replacement pieces (e.g., condenser tubes, monitors). This includes a base funding level of \$35.1 million and a program increase of \$4.9 million. Minor preventative maintenance is performed by TSO personnel on a daily and weekly basis. Field Service Technicians from the various support contractors and original equipment manufacturers perform monthly, quarterly, and annual servicing as required. Checkpoint equipment comes with a 1 year manufacturer warranty from the site acceptance date; however machines in warranty still require approximately 3% of their original costs to support preventative maintenance during this time. Out of warranty equipment maintenance ranges from 12% – 17% of cost of the equipment. Early in its existence, TSA implemented an effort to procure passenger screening equipment for every checkpoint. The manufacturers' warranties have expired on the bulk of this equipment and TSA must now bear the full maintenance cost.

TSA's checkpoint equipment maintenance requirements by FY 2007 will consist of:

- Approximately 2,366 TRX's
- Approximately 2,268 EMD's
- Approximately 1,653 ETD's
- Approximately 434 ETP's
- Approximately 27 Automated EDS's
- Approximately 171 Whole Body Imaging Systems
- Approximately 210 Cast and Prosthesis Scanners
- Approximately 93 Automated Explosives Spot Samplers

In FY 2007, TSA will continue deployment of electronic surveillance systems. At the requested \$10.3 million level, TSA will be able to install closed circuit equipment at approximately 15 additional airports and support managed services at 14 legacy airports. By the end of FY 2007 surveillance systems monitoring checked baggage screening will be installed at 60% of targeted airports. The systems' cameras will detect theft or improper behavior during the screening process by TSOs or baggage handlers and provide a fast visual identification of those committing infractions. These cameras will provide an additional means of security by allowing a quick response to disruption in operations. It will also protect TSOs from false claims of abuse by recording all transactions in the screening areas.

PPA: EDS/ETD PURCHASE

	Perm Pos	FTE	Amount
2005 Actual	\$175,483
2006 Revised Enacted	174,016
2007 Adjustments-to-Base	(83,016)
2007 Current Services	91,000
2007 Program Change
2007 Request	91,000
Total Change 2006-2007	(83,016)

TSA requests \$91 million for this activity. This is a decrease of \$83 million from FY 2006. This shift represents an appropriate balance of purchase and installation funding in FY 2007.

CURRENT SERVICES PROGRAM DESCRIPTION:

EDS/ETD Purchase -- Funds the purchase of electronic baggage screening equipment for deployment in our nation's airports. Explosives Detection Systems (EDS) and Explosives Trace Detection (ETD) machines are the two types of equipment used in the Electronic Baggage Screening Program (EBSP). EDS is the main technology used in the checked baggage screening process. This equipment automates what was previously a manually-intensive baggage inspection, allowing faster bag throughput up to 250% and improved threat detection capabilities. EDS machines are the largest and most expensive security screening equipment.

Most of the currently deployed EDS technology was developed prior to ATSA based on standards set forth by Congress in the Aviation Security Improvement Act of 1990. Since large-scale deployment of EDS systems by TSA in 2002 and 2003, manufacturers have only marginally improved false alarm rates and throughput capabilities of this equipment. New EDS equipment was certified in 2005, including the Reveal CT-80 and AN 6400 that were developed under the Research and Development Phoenix Project (Next Generation-NexGen). The requested funding supports the purchase of these units and other NexGen equipment that the Phoenix and Manhattan II R&D projects are expected to continue developing in FY 2006 and FY 2007. NexGen EDS machines that can operate at up to 900 bags per hour and employ revolutionary threat detection concepts are also under development and scheduled for commissioning in early 2008.

ETD machines are used both as a primary screening method and a secondary screening method (i.e., resolving EDS alarms). ETDs are the second largest component of equipment cost within the EBSP program. The ETD machines check for explosive residue left on the outside or inside of baggage. Since the enactment of the Aviation and Transportation Security Act (ATSA) in November 2001, TSA has worked with airports to implement the 100% checked baggage screening requirement. Equipment purchases associated with Letters of Intent (LOIs) with six airports will continue in 2007. In 2007, TSA will use the EDS Strategic Plan to prioritize new airport projects. This plan uses a top-down prioritization model to perform a systematic, comprehensive assessment of screening alternatives at airports and prioritizes projects by

balancing security and economic factors. These results feed into a deployment model that identifies the optimal schedule for deploying equipment to airports given funding, equipment availability and other key assumptions. These continuing system deployment efforts are required to maintain compliance as passenger traffic increases and circumstances at airports change.

Given the variety of local factors and conditions that will affect funding and design decisions, the determination of an optimal screening solution for an airport requires a partnership between TSA, the airport operator, and its key airline tenants. TSA plans to work closely with airport operators and other key stakeholders to integrate the "bottom-up" planning exercises being conducted by many airport operators with the initial "top-down" plans developed as part of the Strategic Plan. This will preclude airports from designing systems that will inaccurately address screening requirements and will ensure that the best overall implementation strategy will be executed.

The final component of the E BSP Strategic Plan will be completed in 2006 with the release of the cost-share study. TSA is working in collaboration with aviation industry stakeholders to develop innovative financing solutions for the program. Depending on the results of this phase, TSA may be able to accelerate the implementation of the Strategic Plan.

Based on current plans, a total of \$91 million will be required to meet the need for new and replacement screening equipment. This funding will allow TSA to continue to field enhanced security capabilities at airports and to recapitalize equipment reaching the end of its service life. In FY 2007, \$27 million will be required to replace approximately 400 aging ETD units in accordance with industry standards. At airports using multiple ETDs for primary baggage screening, TSA may seek to replace aging ETDs with EDS.

PPA: EDS/ETD INSTALLATION

	Perm		
	Pos	FTE	Amount
2005 Actual	\$217,817
2006 Revised Enacted	44,747
2007 Adjustments-to-Base	49,253
2007 Current Services	94,000
2007 Program Change
2007 Request	94,000
Total Change 2006-2007	49,253

Transportation Security Administration requests \$94.0 million for this activity. This includes an adjustment to base increase of \$49.3 million over FY 2006. This shift represents an appropriate balance of purchase and installation funding in FY 2007.

CURRENT SERVICES PROGRAM DESCRIPTION:

EDS/ETD Installation -- Funds the installation of electronic baggage screening equipment in our nation's airports. Installation costs, along with purchase costs, are a component of the total cost of equipment deployment. The cost of installing EDS and ETD systems consist of some or all of the following, depending on the equipment and specific location: 1) site survey and design, 2) site preparation/ facility modification, 3) warehousing and shipping, 4) testing and 5) program support.

The current services request level includes an increase of \$49.3 million. This represents a shift in funding from the EDS/ETD Purchase PPA. The funding requested, in combination with \$250 million from the Aviation Security Capital Fund, totals \$344 million. This funding allows TSA to provide the final payments to airports with existing LOIs at the 75-25 reimbursement level. At the base level of funding, TSA will apply approximately \$187.8 million to LOI reimbursement for six airports. No funds are allocated for new LOI agreements in FY 2007.

Additionally, \$156.2 million will fund the installation of new equipment purchased to replace systems that have reached the end of serviceable life and a number of additional in-line systems purchased for airports selected in accordance with the EBSP Strategic Plan "top-down" approach. This will cover both the installation of current certified equipment as well as NexGen equipment.

PPA: EDS/ETD MAINTENANCE & UTILITIES

	Perm Pos	FTE	Amount
2005 Actual	\$194,707
2006 Revised Enacted	198,875
2007 Adjustments-to-Base	<u>1,125</u>
2007 Current Services	200,000
2007 Program Change	<u>34,000</u>
2007 Request	234,000
Total Change 2006-2007	35,125

Transportation Security Administration requests \$234.0 million for this activity. This is an increase of \$35.1 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

EDS/ETD Maintenance & Utilities -- Funds the maintenance and associated utilities of electronic baggage screening equipment in our nation's airports. System sustainment, maintenance and the associated utility costs are fundamental requirements. If all security screening equipment is to be operationally ready and supportable over its anticipated lifetime, investment in preventative and corrective maintenance is critical.

The majority of TSA's maintenance activity is provided by contractors. Field Service Technicians (FSTs) and original equipment manufacturers (OEMs) under contract to TSA

perform monthly, quarterly, and annual servicing of equipment no longer covered under warranty. Additionally, staff of approximately 36 contractors is employed 24 hours a day, 7 days a week coordinating the deployment of highly skilled and specialized FSTs to perform unplanned corrective repairs in the field. Given that the technology for these machines is not mature, corrective maintenance represents a significant portion of the maintenance costs. Spare parts (e.g., condenser tubes, belts) required for routine maintenance are included in these contracts.

In addition to preventative and corrective maintenance activities, TSA must incur sustainment costs associated with the operation of deployed checked baggage screening systems. These costs include consumables for ETDs, transportation, sustaining engineering, data management, configuration management, safety, occupational health, environmental management functions, and disposal. The cost of utilities associated with operation of the equipment is also a recurring cost borne by TSA. Under the current maintenance contracts, TSA has achieved a 20% reduction in per-machine maintenance costs compared with pre-FY 2005 levels.

TSA's maintenance funding in FY 2007 will cover maintenance costs for over 1,944 EDS and 6,932 ETD units deployed to over 448 airports nationwide. A total of \$234.0 million is requested to sustain deployed security equipment at our nation's airports. Total maintenance costs are projected to be \$217.6 million and utility costs are projected to be \$16.4 million.

PPA: EDS/ETD SYSTEMS – OPERATION INTEGRATION

	Perm Pos	FTE	Amount
2005 Actual			...
2006 Revised Enacted	14	14	\$22,871
2007 Adjustments-to-Base	129
2007 Current Services	14	14	23,000
2007 Program Change
2007 Request	14	14	23,000
Total Change 2006-2007	129

Transportation Security Administration requests \$23 million for this activity. This includes an adjustment to base of \$129,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Funding for Operation Integration (OI) supports efforts to develop technology requirements and perform operational integration on new security equipment, including passenger, baggage and cargo screening equipment, infrastructure security systems and conveyance security technologies.

The Technology Requirements Branch (TRB), which consists of 14 FTE located at the Transportation Security Laboratory (TSL), is responsible for determining and establishing the operational, functional, performance and integration requirements for TSA security screening

equipment, both deployed and in development. The TRB also provides requirements engineering support to CTO organizations for infrastructure and support systems.

The TRB develops and maintains standards for system certification and qualification standards. As the principle interface to the DHS Science and Technology Directorate (S&T) and short-term research, the TRB formulates the acceptance criteria for systems transitioning from the S&T developmental test and evaluation phase to the TSA before the systems are piloted.

The purpose of the Operational Integration program is to evaluate the impact of new security technologies, procedures, and policies and the analysis of their integration into existing systems to ensure operational effectiveness and suitability before full system production and deployment. This work is accomplished through the testing and evaluation of pre-production or production-representative systems under real-world conditions, including operation by those who will employ the equipment in the field in a variety of environmental conditions.

The OI program is an essential element in the deployment of emerging EDS technology for screening baggage and cargo and the deployment of programs intended to enhance the physical security of transportation infrastructure and conveyances. The requested funding supports TSA's program management of the National Safe Skies Alliance and several major initiatives, including those listed below.

- Operational testing and evaluations (OT&E) of EDS systems emerging from the Phoenix and Manhattan II developmental programs and of emerging technologies in various transportation venues
- Extended field testing of EDS systems to screen Break-Bulk Cargo
- OT&E of biometric devices, access control, and perimeter security technologies
- Technical support for the development of Qualified Products Lists for infrastructure protection technologies
- OT&E of technologies designed to protect the transport media including continuation of the Hardened Unit Load Devices and evaluation of Passenger Cabin Protection technologies once products are accepted by developmental testing

Competitive awards for the conduct of the airport perimeter security pilots will be awarded during FY 2006. These pilots, funded under a separate PPA in FY 2006, will evaluate innovative technologies that may reduce security weaknesses and vulnerabilities in airports throughout the United States will be. The information these pilots generate will be considered in the development of future security programs.

PPA: AVIATION REGULATION AND OTHER ENFORCEMENT

	Perm		
	Pos	FTE	Amount
2005 Actual	1,368	893	\$197,413

2007 Current Services	975	975	217,516
2007 Program Change
2007 Request	975	975	217,516
Total Change 2006-2007	(24)	(24)	(3,649)

TSA requests \$217.5 million for this activity. This is a decrease of \$3.6 million below FY 2006 to re-align base resources to higher priorities. In FY 2007, TSA will reduce FTE levels by 24 in this program.

CURRENT SERVICES PROGRAM DESCRIPTION:

This program is responsible for providing law enforcement and regulatory presence at airports to ensure compliance with required security measures and respond to security incidents. It also provides an international component to foster consistency in worldwide security requirements.

Regulatory Inspections: TSA exercises regulatory authority to implement security measures throughout the aviation domain. A cadre of 650 expert aviation security inspectors (ASIs) monitors and enforces compliance with these regulations through inspection and outreach programs.

The inspection mission is broad and involves the evaluation of the security integrity of more than 1,000 airports (over 450 of which are located in the U.S.), more than 1,500 domestic and international carriers operating in the U.S., and over 7,500 indirect air carriers subject to periodic inspection. Inspectors play an essential role in formulating annual plans for local inspection. ASIs review the documentation and plans that have been approved by TSA and implemented in support of TSA regulatory mandate as well as records and files pertaining to criminal history records checks performed pursuant to Federal law. The inspectors also review records and files to ensure compliance of indirect air carriers, private passenger and/or cargo charters, airmen and aircrew with security requirements. The ASIs investigate incidents related to violations of TSA regulation, security directives, and approved security programs. Inspectors deliver technical briefings and assistance to aviation industry in interpreting agency policies to ensure compliance with rules.

ASIs also evaluate the integrity of fences, lighting, and locks, among many other important security measures by walking the grounds and interaction with airport personnel. They determine the adequacy of security and recommend enhancements, where appropriate, for non-regulated airports/facilities, including general aviation landing facilities and airports, and for aircraft operators. Areas of emphasis for inspection and/or assessment include: access control systems,

security identification systems, surveillance systems, law enforcement response capabilities, physical security of aviation facilities and aircraft.

In FY 2005, 41,487 formal enforcement actions were filed against airports, air carriers, and indirect air carriers. The largest number of enforcement actions (37,099) was taken against individuals including passengers and others involved in incidents at passenger screening checkpoints and allegations of misconduct by those who attempt to carry weapons or other items prohibited for transport aboard aircraft. Inspectors must be well trained and knowledgeable in the principles of investigation and civil enforcement in order to assist the agency Chief Counsel in the preparation of formal enforcement actions against those who violate security requirements.

While continuous monitoring is not possible by ASIs, they nevertheless completed 79,620 inspections in FY 2005 targeting both domestic and international aviation activity. Inspections are both scheduled and random and may include one or all of the critical security elements required by TSA. Against a backdrop that reflects historically high rates of compliance by the aviation industry, TSA inspections still uncovered 9,063 issues of security non-compliance in FY 2005 with formal enforcement investigations launched against operators in 4,388 of those cases. TSA estimates 87,500 inspections in FY 2007, compared to 90,600 inspections anticipated in FY 2006. Similarly, the estimated investigations for FY 2007 would total 4,800, compared to nearly 5,000 projected for FY 2006 based on the current funding levels, enacted as well as requested.

Law Enforcement Officer (LEO) Agreements: In addition to 80 TSA LEOs, TSA established reimbursable agreements with state and local law enforcement agencies to provide uniformed officers at passenger security checkpoints under the flexible response authorities granted to TSA. These agreements provide the law enforcement security services required by Federal Security Directors (FSDs) to fulfill their security mission at the checkpoints. They ensure an expert law enforcement presence is always available to deter suspicious activity and respond quickly in the event of a breach of security at checkpoints.

Under the reimbursable program, financial assistance is available in cases where a no-cost program would critically and adversely affect the financial resources and security staffing requirements of the participating airport. For those cases, FSDs submit written justifications on why a no-cost program would not be adequate and why financial assistance would be essential to the success of the TSA mission.

In FY 2007, TSA plans to fund over 275 reimbursable agreements.

Canine Explosive Detection Program: The National Explosives Detection Canine Program exists to deter and detect the introduction of explosives devices into the transportation system. In addition, bomb threats cause disruption of air, land and sea commerce and pose an unacceptable danger to the traveling public and should be resolved quickly. Explosives detection canine teams are proven and reliable resources to detect explosives and are a key component in a balanced counter-sabotage program. The use of highly trained explosives detection canine teams is also a proven deterrent to terrorism directed towards transportation systems and provides a timely and mobile response to support facilities, rail stations, airports, passenger terminals, seaports and surface carriers. The canine program fosters partnerships throughout the federal government, state and local law enforcement community, as well as throughout the world.

The canine program provides local law enforcement officers with canine unit support, related equipment, technical assistance, and partial reimbursement costs to ensure a safe and secure transportation system. In FY 2007, TSA will have in place its fully authorized level of 420 teams for aviation security (including air cargo) and an additional 30 teams for mass transit inspections. All the programs combined will result in maintaining a total of 450 canine teams to detect explosives as part of its multifaceted approach to transportation security. TSA-certified canine teams are stationed at each of the nation's largest airports and are used numerous times each day to check out suspicious bags or cargo and to deter terrorist activities.

Base funding for canines is \$19 million in this PPA. The program also receives funding from the Surface appropriation to support mass transit teams (\$2 million) and from the Air Cargo PPA to support air cargo inspections (expected to be \$7 million in FY 2006 and FY 2007).

International Programs: TSA strives to lead worldwide improvements in transportation security using a three-layered approach, which includes:

- 21 TSA representatives responsible for liaison activity and representation with over 100 foreign governments;
- On-site liaison activity and representation in 14 foreign countries;
 - Non-stop assessment activity to verify security measures for U.S. and foreign assets at more than 500 foreign airports and maritime ports, and nearly 700 foreign and domestic repair stations, worldwide;
- Active leadership within the regional and international community that comprises the world's transportation security expertise and policy development.

TSA promotes alignment and consistency between the security requirements of the U.S. and foreign governments. TSA takes a leadership role as a permanent U.S. member in the regional and international organizations concerned with transportation security [e.g., International Civil Aviation Organization (ICAO), the Arab Civil Aviation Commission (ACAC), the European Civil Aviation Conference (ECAC), the International Multi-Modal (IMM) Transportation Security, and the Asian Pacific Economic Cooperation (APEC)]. Through interaction with foreign officials at the regional level, best practices in transportation security can be advanced to achieve our vision of a secure, global transportation system.

TSA Representatives (TSARs) serve as the on-site coordinator for the TSA response to terrorist incidents and threats to U.S. assets at foreign transportation modes. The TSARs serve as principal advisors on transportation security affairs to U.S. Ambassadors and other embassy officials responsible for transportation issues to ensure the safety and security of the transportation system.

TSA implements the Foreign Air Carrier Program (FACP), in accordance with 49 CFR Part 1546, which requires non-U.S. air carriers, landing or taking off in the United States, to adopt and carry out a security program for each scheduled and public operation meeting specific seating capacity and/or airport access criteria. Such non-U.S. air carriers are assigned an International Principal Security Inspector (IPSI). TSA IPSIs coordinate the sharing of aviation security related requirements, intelligence, incidents; and/or threat information affecting passengers, air carriers, the United States, and civil aviation worldwide.

The Foreign Airport Assessment Program and Air Carrier Inspection Program for foreign airports differ significantly from domestic operations. During airport assessments conducted in foreign countries, International Aviation Security Inspectors focus on application of International Standards and Recommended Practices (SARPs) defined by the International Civil Aviation Organization, to which nearly 190 countries are signatories. Each foreign airport assessment, mandated under 49 United States Code 44907, requires four weeks to complete in its entirety. During FY 2005, 143 assessments were conducted.

TSA will conduct security audits on all FAA certificated (14 CFR Part 145) repair stations located in foreign countries through its Foreign Repair Station Program (FRSP) as mandated by Vision-100, enacted in December 2003. In FY2006 these audits were funded as a separate PPA within Aviation direction and enforcement.

PPA: AIRPORT MANAGEMENT, IT AND SUPPORT

	Perm		
	Pos	FTE	Amount

2007 Current Services	2,085	2,085	666,032
2007 Program Change
2007 Request	2,085	2,085	666,032
Total Change 2006-2007	(16,141)

TSA requests \$666 million for this activity. This is a decrease of \$16.1 million from FY 2006 to re-align base resources to higher priorities.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2007, of the \$666 million requested for this PPA, \$267.7 million supports approximately 2,100, positions. Approximately 1,800 positions comprise the staff of the 158 Federal Security Directors (FSDs) and nearly 300 Security Operations positions direct the policy, analysis, and administration of aviation screening. FSD staffs and Security Operations positions are critical to supporting the front line operations of our TSOs.

This funding supports the salaries and benefits of these positions, as well as travel, training, and contract requirements to support the staff. In order to streamline the administrative operations and gain efficiency at the airports, larger airports have been designated as hubs. These hubs provide security direction, administrative support, and staffing/personnel as needed to smaller, lower staffed airports (spokes). Frequent travel is required by the FSD and staff between the hubs and spoke airports. Funding of airport management and staff will provide the proper direction, support and staff at the spokes to ensure efficient and effective operations.

While the aviation business model changes and discount airlines continue to grow, TSA must be able to provide support as the airports expand. TSA will be a valuable partner in the planning

and design of security at airports through assistance with checkpoint redesigns and perimeter security. FSD and staff will continue to build relationships with airport officials, airlines, local law enforcement, and Joint Terrorism Task Force officials.

Airport management and staff have developed operational strategies to make the screening process more efficient for the traveling public especially during peak travel seasons. They will continue to be the central reference point on policy development, information technology, training, performance management, finance, and human resources to support the mission of TSA.

The Office of the Chief Information Officer (OCIO) maintains the IT and telecommunications infrastructure support and services for all of the TSA. The FY 2007 base request for these activities is \$257 million. Approximately 220 airport and field locations have completed full IT Infrastructure installation, to include high-speed network connectivity (Hi-SOC), while all others continue to operate on minimalist IT capability, which includes only dial-up access to TSA systems. OCIO manages a comprehensive and enterprise-wide IT managed services solution that assists TSA in meeting its mission responsibilities. In FY 2006 TSA permanently shifted its base to support various service levels required in a number of categories of effort. These include, but are not limited to:

- Operational Data Center
- Communications network
- Wireless equipment
- National Helpdesk
- Federal Security Director support
- Airport IT support
- Land Mobile Radio Rollout
- Security Incident Response
- Checked Baggage and Passenger Screening Data
- Performance management data analysis

The core of IT capability is provided through a managed service contract. The managed services model offers the prospect of long-term cost efficiencies and the provision of state-of-the-art technologies for services and equipment. The Information Technology Managed Services (ITMS) program will continue to maintain the IT and telecommunications infrastructure support and services for all TSA employees including:

- IT Seats/Head Seats: Office Automation hardware, software and services needed for the TSA workforce to perform their duties and responsibilities. There are a number of different combinations of IT seats to include: Secure Communications Seats; Training Seats; Red Package (dial-up) Seats; White Package (network) Seats; Voice Over Internet Protocol (VOIP) Seats; Government Furnished Equipment Seats; and TSO Workforce Head Seats. These Seats provide Office Automation assets to the TSA Headquarters, Federal Security Directors, International TSA personnel, General Counsel, TSO Workforce, and contractors supporting TSA.
- TSA Functional Center Support: to the TSA Operations Center; Consumer Response Center; FSD Crisis Action Centers; Regional Training Centers; Artesia Training Center;

Oklahoma Training Center; Federal Law Enforcement Training Center; Mission Support Centers; TSA Technical Center (Atlantic City); Airport Training Centers; and the IT Coordination Center.

- Program Contractor Support: contractor support that is not part of the core ITMS program and provides desk-side Office Automation support. This contractor support includes a Rapid Response Team for emergency situations and 100 contractors assigned to the 81 Category X and 1 FSD offices/airports, the Federal Law Enforcement Training Center, Oklahoma Training Center, Artesia Training Center, Office of National Risk Assessment, three for international locations, four for Command Center support, five for TSA Headquarters support, and three assigned to the IT Coordination Center.
- Miscellaneous Office Automation: additional areas required to support Office Automation Deployment and Refresh to include: Commercial Off The Shelf (COTS) Provisioning/Deployment, GFE Equipment Processing, Installation Move Add Charges (IMAC), Deployment Travel, Deployment Refresh, Replacement of Lost/Stolen Equipment, Provisioning of 508 Compliant IT Equipment, and Other Direct Charge funding to purchase small dollar IT items that are not conducive to a managed service (zip drives, cables, surge protectors, CD/RW, etc.).

Hi-SOC operation is a prerequisite to deployment of mission critical applications, including but not limited to:

- Threat Image Protection Network (TIP)
- Electronic Surveillance System (ESS)
- TSO Scheduling System (SABRE)
- Human Resource Capabilities- including NextGen HR
- Transportation Workers Identification Card (TWIC)
- Integrated multi-media messaging such as Land Mobile Radio (LMR)

In FY 2006, \$120 million will be used to deploy Hi-SOC to all Category X and I airports and preliminary high-speed connectivity to all Category II, III, and IV airports. A total of \$90 million is required to support this effort in FY 2007. Of this total, \$54 million is required to complete deployment of all Hi-SOC features to the Category II, III, and IV airports. The remaining funding will support operations and maintenance costs including recurring costs for routers, switches, circuits, and cabinets, racks, and network monitoring.

A total of \$93.5 million is requested for rent payments and furniture for TSA's field offices throughout the United States (including FSD and TSO staff locations). TSA will be able to maintain a fleet of vehicles and provide transit and parking benefits for field office employees within base funding of \$17.5 million. At the base level funding of \$2.9 million, TSA will continue to operate and maintain the SABRE scheduling system that enables efficient and timely scheduling of TSOs and associated personnel at airports.

A total of \$12.2 million will support the Transportation Security Operations Center (TSOC) to fulfill TSA's responsibilities established in ATSA. The TSOC serves as TSA's 24/7 operations center (command center) for transportation security-related operations, incidents, or crises. The TSOC correlates and fuses real-time intelligence and operational information, ensuring unity of

command and action in the prevention of and response to terrorist-related incidents across all transportation modes -maritime, land, and aviation.

TSOC operations are being integrated with other operations centers across the Department such as the central Homeland Security Operations Center (HSOC). HSOC decisions provide the U.S. public with increased speed and capabilities to respond to nationwide transportation terrorist threats. TSOC's scope covers transportation across the national transportation infrastructure, except for the maritime environment.

DHS Infrastructure Transformation Program

The Department's Infrastructure Transformation Program (ITP), led by the Office of the Chief Information Officer (OCIO), will integrate the IT infrastructures of the 22 legacy components into "One Infrastructure". Currently, most of the Department's components fund and are supported by separate and largely stove-piped IT infrastructures. This environment makes it difficult to share information across components and has resulted in redundant investments and wasted resources. The ITP will eliminate the duplicative infrastructures and provide common capabilities and services for all components to leverage.

The ITP consists of five domains with a Department component assigned as a steward responsible and accountable for the performance of each domain. The domains and their stewards are listed below:

- Network Services led by Customs and Border Protection (CBP);
- Data Center Services led by CBP;
- Email Services led by U.S. Coast Guard (USCG);
- Help Desk Services led by USCG; and
- Video Operations Services led by Federal Emergency Management Agency (FEMA).

The OCIO oversees the work of the stewards and the other components to ensure operational requirements are met and investments and resource allocations are balanced across the components.

Implementation of the ITP will eliminate the need for components to spend resources on improving their own infrastructures. Instead, some of the investment funding previously used for stovepiped infrastructures will be used to support the department-wide ITP effort. For example, CBP's IT initiatives such as the Automated Commercial Environment will benefit from the capabilities and services the ITP will provide such as network access, data center hosting, email/collaboration services, wireless access, integrated help desk, voice access, video services, and on-site support. Rather than independently developing new capabilities or augmenting legacy capabilities within CBP, the ITP will provide enterprise-level services that will benefit all components.

By investing in the ITP, DHS components will benefit from economies of scale while promoting Department integration, and improving information sharing and interoperability. The amount of IT investment funding from components to support the ITP is still under deliberation and any such proposal will be fully vetted with the Congress prior to any actions being taken.

PPA: FFDO AND FLIGHT CREW TRAINING

	Perm Pos	FTE	Amount
2005 Actual	25	14	\$19,331
2006 Revised Enacted	25	25	30,328
2007 Adjustments-to-Base	142
2007 Current Services	25	25	30,470
2007 Program Change
2007 Request	25	25	30,470
Total Change 2006-2007	142

The Transportation Security Administration requests \$30.5 million for this activity. This is an increase of \$142,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA is mandated to provide a Federal Flight Deck Office (FFDO) program to deputize qualified airline pilots as federal law enforcement officers to defend the flight decks of aircraft against acts of criminal violence or air piracy. This voluntary program provides training in firearms proficiency, self-defense tactics, authorities, and decision making to defend the cockpit. While the exact numbers of trainees is sensitive information, the program has been successful in deputizing thousands of airline pilots flying tens of thousands of mission legs each month throughout the nation. FY 2006 marks the beginning of the recurrent training of initial deputized pilots to refresh their skills. The FY 2007 request of \$27 million will fund initial training, firearms requalification training, and recurrent training required to sustain FFDO levels.

TSA is also mandated to provide a Crew Member Self Defense (CMSD) for flight and cabin crew members. This program is also a volunteer training regimen. It provides incident awareness, decision making, and self-defense skills to volunteer crewmembers from throughout the nation. About 1,000 flight and cabin crew have been trained to date. The FY 2007 request of \$3.5 million will continue this training.

PPA: AIR CARGO

	Perm Pos	FTE	Amount
2005 Actual	200	160	\$27,062
2006 Revised Enacted	246	246	54,691
2007 Adjustments-to-Base	...	54	309
2007 Current Services	300	300	55,000
2007 Program Change

2007 Request	300	300	55,000
Total Change 2006-2007	...	54	309

The Transportation Security Administration requests \$55 million for this activity. This is an increase of \$309,000 over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

This program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. An estimated 23 billion pounds of cargo is shipped within the United States by air annually. About three-quarters of this amount are transported via all-cargo aircraft, while the remainder travels aboard passenger aircraft. The program operates through compliance activities, policy initiatives and technology implementation. Safeguarding the nation's critical air cargo transportation infrastructure is a shared public and private sector responsibility. Significant regulatory and outreach effort is required. TSA has implemented a threat-based risk management approach for prioritizing efforts and focusing resources. The Air Cargo Strategic Plan outlined an approach for securing the air cargo transportation system based on two threats: introduction of an explosive device on a passenger aircraft, and the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

In FY 2005, the air cargo program hired 100 additional cargo inspectors, expanded the use of canine resources in screening cargo at 85 airports nationwide, and conducted over 20,000 inspections of foreign and domestic air carriers and indirect air carriers (IACs). Express parcel shipments were routinely screened by TSA at over 250 airports. Twelve cargo strikes were conducted at airports responsible for over one-half of total air cargo volume, totaling over 1,200 inspections. Over 2,500 outreach events were conducted. Certifications were issued or renewed for over 3,500 IACs. In FY 2006, TSA will field an additional 100 inspectors and in FY 2007 will continue these efforts and begin deployment of the Freight Assessment System to identify elevated risk cargo and enable a supply chain risk management model. Continued development and implementation of the Known Shipper Management System will improve the vetting of known shippers designated by industry. The Air Cargo Final Rule is expected to be implemented to further strengthen security by mandating specific items for industry compliance.

PPA: AIRPORT PERIMETER SECURITY

	Perm Pos	FTE	Amount
2005 Actual
2006 Revised Enacted	4,972
2007 Adjustments-to-Base	(4,972)
2007 Current Services
2007 Program Change
2007 Request
Total Change 2006-2007	(4,972)

The Transportation Security Administration does not request funding for this activity in FY 2007. This funding will be used for pilot programs that will be completed in FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The perimeter security pilot programs will consist of one or more projects at airports to demonstrate security technologies that will address security requirements at both intended access points (such as vehicle gates), perimeter boundaries, and the terminal. The pilot projects will propose technologies that will provide new perimeter security capabilities or significantly enhance current technology based capabilities. TSA expects responsive projects to include perimeter sensors, intelligent camera systems, biometric devices, technologies to detect and track potential intruders, and communication capabilities to provide appropriate alarm and response notification. TSA will utilize the results of this project to continue to develop processes, procedures, technical requirements, and standards for perimeter security.

PPA: FOREIGN REPAIR STATIONS

	Perm Pos	FTE	Amount
2005 Actual
2006 Revised Enacted	15	15	2,983
2007 Adjustments-to-Base
2007 Current Services
2007 Program Change
2007 Request
Total Change 2006-2007	(15)	(15)	(2,983)

The Transportation Security Administration has included funding for this activity in FY 2007 in the Aviation Regulation and Enforcement PPA.

CURRENT SERVICES PROGRAM DESCRIPTION:

The FY 2006 current services level supports the hiring of inspectors to ensure that Foreign and Domestic Repair Stations are inspected. Once these inspectors are on board, they will initially be deployed to domestic airports to facilitate inspections at both domestic and international foreign repair statements.

FEE: AVIATION PASSENGER SECURITY FEE (*includes \$250 million set aside for the Aviation Security Capital Fund*)

	Perm Pos	FTE	Amount
2005 Actual	1,866,321
2006 Revised Enacted	1,910,000
2007 Adjustments-to-Base	95,345
2007 Current Services	2,005,345
2007 Program Change	1,336,861
2007 Request	3,342,206
Total Change 2006-2007	1,417,206

TSA proposes a restructuring of the airline security passenger fee for a total of \$3.34 billion which will provide further offset toward recovering costs for federal aviation security operations. This is an increase of \$1.42 billion over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

TSA proposes a provision that will restructure the September 11th Passenger Security Fee – passenger fee. Under the FY 2006 fee structure, passengers pay \$2.50 per enplanement for a maximum of \$5.00 per one-way trip and \$10 per round trip. The FY 2007 Budget proposes to replace the two-tiered fee with a single flat security fee of \$5.00 for a one-way trip. This is consistent with the screening process whereby passengers generally only pass through security once. Furthermore, the new fee structure would resolve the concern of rural passengers who believe they are currently charged twice because such passengers nearly always fly two or more legs per one-way trip.

FEE: AVIATION SECURITY INFRASTRUCTURE FEE (ASIF – Air Carrier Fee)

	Perm Pos	FTE	Amount
2005 Actual	307,000
2006 Revised Enacted	350,000
2007 Adjustments-to-Base	98,000
2007 Current Services	448,000
2007 Program Change	196,000
2007 Request	644,000
Total Change 2006-2007	329,000

TSA proposes a total of \$644 million in the Aviation Security Infrastructure fee collections to provide further offset toward recovering costs for federal aviation security operations. This is a total increase of \$329 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

In FY 2002, the Air Carrier Fee was assessed on the basis of an air carrier's 2000 passenger and property screening costs. In its 2005 report on this fee, GAO determined that the air carriers should be paying annual fees of \$425 to \$471 million compared with the \$315 million they had been paying. TSA has utilized GAO's methodology as the basis to determine total industry costs. Choosing the mid-point of this range results in an annual fee collection of \$448 million

For FY 2007, TSA anticipates collecting the full \$448 million as well as collecting an additional \$196 million from air carriers. The \$196 million is from ASIF's assessed for FY 2005 and FY 2006 but not yet paid.

IV. Program Justification of Changes

Department of Homeland Security
Transportation Security Administration (TSA)
Aviation Security
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: Performance Accountability and Standards System - TSO
Workforce Performance Management System

Strategic Goal(s) & Objective(s): Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved screening of passengers and baggage with an effective, high performing workforce.

PPA: TSO Staffing and Operations

Program Increase: Positions 0 FTE 0 Dollars \$10,000

	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							47,125	44,121	\$2,458,564
Program Increase							0	0	10,000
Total Request	48,032	45,690	2,286,211	47,156	44,156	2,390,476	47,125	44,121	\$2,468,564

Description of Item

TSA requests a \$10 million program increase for screener retention programs. TSA will seek to fully utilize workforce retention flexibilities, to potentially include pay-for-performance, performance bonuses, retention allowances, college credit reimbursement, and flexible staffing.

Justification

TSA's screener workforce exhibits a high rate of attrition, in excess of 20% for full-time screeners and in excess of 50% for part-time screeners. This, in turn, leads to higher recruitment and training costs to replace these departing screeners, with a corresponding reduction in airport security due to the large turnover of trained and experienced personnel. TSA intends to implement compensation incentives in order to improve retention for its most important asset - its screener personnel.

One of TSA's most promising new programs is the development of the Performance Accountability and Standards System (PASS). The PASS is one element of TSA's overarching Human Capital initiative which is designed to strengthen the performance of the TSO. ATSA states that "The Under Secretary for Transportation Security shall establish a performance

management system which strengthens the organization's effectiveness by providing for the establishment of goals and objectives for managers, employees, and organizational performance, consistent with the performance plan." PASS would meet the ATSA mandate and would give TSOs, Lead and Supervisory TSOs, and Screening Managers a clear understanding of what performance standards are expected of them, how their performance links to organizational goals; who will evaluate their performance; how their performance will be evaluated; and, what salary increases they can expect associated with the standard of performance they achieve.

The PASS is a performance management system that will rate TSOs on four levels (as opposed to the current pass/fail system) starting in FY 2006: *Does Not Meet Standards*; *Achieves Standards*; *Exceeds Standards*; and, *Role Model of Excellence*. In order for TSA to implement the PASS, a pay-incentive funding pool would support graduated, pay-for-performance salary increases for employees who earn an *Achieves Standards* rating, or higher, based on their FY 2006 performance, and would be awarded dependent upon available funding.

Impact on Performance (Relationship of Increase to Strategic Goals)

The PASS will have meaningful and lasting impact on numerous operational and strategic programs that stretch across TSA. The most significant impact will be that every TSO, Lead and Supervisory TSO, and Screening Manager will have a clear understanding of the individual performance that is expected of them and that individual performance is linked to mission-critical organizational performance. Other positive impacts of PASS are:

- A lower rate of voluntary attrition. Since the screening workforce will now see performance-based opportunities for pay increases, TSA should achieve decreases in this population's voluntary attrition rate.
- A more knowledgeable and skilled screening workforce. With decreases in the voluntary attrition rate, TSA should achieve increases in the knowledge and skill levels of the screening workforce.
- More efficient use of resources:
 - With decreases in the voluntary attrition rate, TSA should achieve lower recruitment and training costs.
 - With increases in the knowledge and skill levels of the screening workforce, TSA should achieve decreases in costs associated with recertification because fewer employees will need remediation and retesting.
 - Because of strengthened readiness-for-duty metrics, TSA should achieve decreases in costs associated with employees taking unapproved leave or leave without pay.
- Improved performance. With increases in the knowledge and skill levels of the screening workforce, and by retaining a seasoned screening workforce, TSA should achieve improved Threat Image Projection (TIP) results and better covert testing results at both the national level (TSA IA, and GAO) and the local level.
- Better workforce morale. Both the 2004 Organizational Assessment Survey and the 2005 Federal Human Capital Survey indicated that a primary cause of low morale in TSA's screening workforce was the respondents' perception that TSA fails to link employee performance with annual pay increases. PASS is a robust pay-for-performance system

and its implementation should eliminate this perception and TSA should achieve an increase in employee morale.

Program Increase 2: Workers Compensation

Strategic Goal(s) & Objective(s): Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved TSO of passengers and baggage with an effective workforce.

PPA: TSO Staffing and Operations

Program Increase: Positions 0 FTE 0 Dollars \$20,000

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							47,125	44,121	\$2,458,564
Program Increase							0	0	20,000
Total Request	48,032	45,690	2,286,211	47,156	44,156	2,390,476	47,125	44,121	\$2,478,564

Description of Item

This requested increase would enable TSA to reimburse the Department of Labor Office of Worker's Compensation Program (OWCP) for claims filed by TSA employees through FY 2005.

Justification

In FY 2006, TSA's base includes \$35 million of funds for worker's compensation payments. This was based upon actual U.S. Department of Labor Office of Worker's Compensation Program (OWCP) billings for claims filed by TSA employees in FY 2004. The FY 2007 budget requires a total of \$55 million for worker's compensation payments for claims filed by TSA employees in FY 2005.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA is vigorously working to mitigate our OWCP costs through strategies of prevention, education, case management, and nurse intervention. We expect that direct safety support to airports, which started in FY 2005, will aid in the establishment of local safety programs targeted at inspections, hazard recognition and analysis, hazard abatement, and injury documentation. We anticipate that this effort will result in both injury and cost reduction in the out years. TSA will continue the cost-saving case management and nurse intervention programs which began in FY 2004 and were expanded in FY 2005, with an eye toward better identifying and tracking our worker's compensation caseload.

Program Increase 3: Checkpoint Support

Strategic Goal(s) & Objective(s): Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved TSO of passengers and baggage with an effective workforce.

PPA: Checkpoint Support

Program Increase: Positions 0 FTE 0 Dollars \$8,366

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$165,000
Program Increase							0	0	8,366
Total Request	0	0	\$89,256	0	0	\$164,072	0	0	\$173,366

Description of Item

This funding request will enhance the detection capability of prohibited items, especially firearms and explosives, by fielding additional sensors such as whole body imaging systems, automated explosive spot samplers, and cast and prosthesis scanners at the checkpoint.

Justification

Equipment using new detection technology will be piloted in FY 2006 and constitutes one segment of a multi-faceted approach to more effective and efficient passenger screening. In addition to improved and integrated sensors, the TSA is performing a risk value assessment on the resources associated with passenger screening. Included in this assessment are the redesign of checkpoints, detection equipment, and a review of the screening protocols.

TSA proposes a \$3.4 million increase to implement the results of this assessment. This increase will support the purchase and installation of an additional 28 TRXs, 22 cast and prosthetic scanners, and an additional \$1 million for checkpoint reconfiguration activities.

TSA proposes a \$4.9 million increase to support the maintenance of checkpoint technology to ensure that the enhanced equipment is fully operational and compliant.

Impact on Performance (Relationship of Increase to Strategic Goals)

TSA's TSO effectiveness and efficiency would increase significantly, and a critical security gap would be mitigated.

Program Increase 4: EDS/ETD Maintenance

Strategic Goal(s) & Objective(s): Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved screening of checked baggage.

PPA: EDS / ETD Maintenance

Program Increase: Positions 0 FTE 0 Dollars \$34,000

Funding Profile

	FY 2005 Actual			FY 2006 Revised			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$200,000
Program Increase							0	0	34,000
Total Request	0	0	194,707	0	0	198,875	0	0	\$234,000

Description of Item

This increase in funding will support the maintenance of EDS systems that help prevent catastrophic loss and air piracy. EDS provides a higher probability of detection over a broader range of explosives than other screening methods. The ability to find threats in transportation venues is key to eliminating their destructiveness or mitigating their results. Currently enacted funding levels have proved inadequate to optimally maintain deployed equipment; threatening to negate the technology's benefits.

Justification

This funding is required to sustain deployed security equipment at our nation's airports. Without this funding, preventative maintenance and corrective maintenance of existing EDS systems will not be performed at optimal levels and the risks to the traveling public will increase significantly.

EDS/ETD system sustainment, maintenance and the associated utility costs are fundamental requirements. If all security screening equipment is to be operationally ready and supportable over its anticipated lifetime, investment in preventative and corrective maintenance is critical. TSA purchased the majority of its passenger and baggage screening equipment prior to December 2002. The manufacturer's warranties have expired, and TSA must bear the full cost of operating and maintaining the equipment. TSA's maintenance requirements by FY 2007 will consist of over 1,944 EDS and 6,932 ETD units (not to include 1,653 ETDs at the passenger checkpoints, which are funded from Checkpoint Support) deployed to over 448 airports nationwide.

The agency continues to monitor contract costs for these services and seek other opportunities to control costs. Under the current maintenance contracts, TSA has achieved a 20% reduction in per-machine maintenance costs compared with pre-FY05 levels.

Base funding of \$200 million and \$34 million in additional follow-on funding is requested to maintain equipment in FY 2007. Total maintenance costs are projected to be \$217.6 million as illustrated in the following table and utility costs are projected to be \$16.4 million.

Equipment Quantities		Unit Cost to Maintain	Field Cost to Maintain
EDS			
CTX-2500	141	\$85,337.65	\$9,212,608.41
CTX-5500	520	\$75,906.33	\$39,471,293.73

			\$217,638,252.59

Impact on Performance (Relationship of Increase to Strategic Goals)

EDS technology affords the ability to screen by sampling a broader range of threats to the traveling public and provides a higher probability of detection. Consistent with Congressional direction, TSA continues to deploy EDS technology to additional airports throughout the nation, thereby increasing the probability of detection.

Program Increase 5: Aviation Passenger Security Fee (includes \$250 million set aside for the Aviation Security Capital Fund)

Strategic Goal(s) & Objective(s): Implement effective stewardship of resources

FEE: Aviation Passenger Security Fee

Program Increase: Positions 0 FTE 0 Dollars \$1,336,861

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request

Program Increase									1,336,861
Total Request			1,866,321			1,910,000			3,342,206

Description of Item

TSA proposes a provision that will restructure the September 11th Passenger Security Fee – passenger fee. This would change the airline passenger security fee to a \$5.00 flat fee per one-way trip, regardless of the number of segments flown by a passenger.

Justification

Under the FY 2006 fee structure, passengers pay \$2.50 per enplanement for a maximum of \$5.00 per one-way trip and \$10 per round trip. The proposed fee structure calls for a flat fee of \$5.00 for all air travelers for one-way travel from United States airports. The flat fee of \$5.00 matches the fee paid by most rural air travelers or those with connecting flights for one-way travel, and increases by \$2.50 the fee paid by air travelers flying on direct flights or only one enplanement. The restructuring responds to congressional feedback from last year and better aligns the share of costs paid by the direct beneficiaries of aviation security, the commercial air travelers, to the cost incurred by TSA in meeting the special role of the federal government in providing transportation security in the aviation mode. The budget request assumes \$1.3 billion additional collections in FY07 associated with the change to the flat fee benchmarked to the \$5.00, which is the FY 2006 cap on two or more enplanements on a one-way trip. Because the fee for aviation security will apply to all passengers, it will be a fixed amount, collected from passengers by their carrier and remitted to the federal government to offset the cost of providing secure air travel.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional fees will help defray the cost of providing federal aviation security, and will lessen the burden of the general tax payer from fully funding the cost of aviation security.

Program Increase 6: Aviation Security Infrastructure Fee (ASIF – Air Carrier Fee)

Strategic Goal(s) & Objective(s): Implement effective stewardship of resources

FEE: Aviation Security Infrastructure Fee

Program Increase: Positions 0 FTE 0 Dollars \$196,000

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level									448,000
Program Increase									196,000
Total Request			644,000			350,000			644,000

Description of Item

For FY 2007, TSA anticipates collecting \$448 million as well as collecting \$196 million from air carriers. The \$196 million is from additional ASIF's assessed for FY 2005 and FY 2006 back payments.

Justification

On January 3, 2006, TSA issued letters to 43 air carriers requiring collection of additional ASIF for calendar year 2005. TSA estimates that it will collect \$98 million from the air carriers for FY 2005 and for FY2006 payments. TSA anticipates carriers appealing these assessments and given the complex administrative review process, TSA expects collections to begin not earlier than FY 2007.

Impact on Performance (Relationship of Increase to Strategic Goals)

The additional fees will help defray the cost of providing federal aviation security, and will lessen the burden of the general tax payer from fully funding the cost of aviation security.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Transportation Security Administration
Justification of Proposed Changes in Aviation Security
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing civil aviation security services pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S.C. 40101 note), [\$4,607,386,000] ~~\$4,654,884,000~~, to remain available until September 30, [2007] ~~2008~~, of which not to exceed \$3,000 shall be for official reception and representation expenses: *Provided*, [That of the total amount made available under this heading, not to exceed \$3,605,438,000 shall be for screening operations, of which \$175,000,000 shall be available only for procurement of checked baggage explosive systems and \$45,000,000 shall be available only for installation of checked baggage explosive detection systems; and not to exceed \$1,001,948,000 shall be for aviation security direction and enforcement presence: *Provided further*,] That security service fees authorized under section 44940 of title 49, United States Code, shall be credited to this appropriation as offsetting collections and shall be available only for aviation security: *Provided further*, That the sum herein appropriated from the General Fund shall be reduced on a dollar-for-dollar basis as such offsetting collections are received during fiscal year [2006] ~~2007~~, so as to result in a final fiscal year appropriation from the General Fund estimated at not more than [\$2,617,386,000] ~~\$218,678,000~~: *Provided further*, That any security service fees collected in excess of the amount made available under this heading shall become available during fiscal year [2007] ~~2008~~: *Provided further*, That notwithstanding section 44923 of title 49, United States Code, the share of the cost of the Federal Government for a project under any letter of intent shall be 75 percent for any medium or large hub airport and ~~not more than~~ 90 percent for any other airport, and all funding provided by section 44923(h) of title 49 United States Code, or from appropriations authorized under section 44923(i)(1) of title 49 United States Code, may be distributed in any manner deemed necessary to ensure aviation security and to fulfill the Government's planned cost share under existing letters of intent: [*Provided further*, That heads of Federal agencies and commissions shall not be exempt from Federal passenger and baggage screening:] *Provided further*, That ~~beginning in fiscal year 2007 and thereafter~~, reimbursement for security services and related equipment and supplies provided in support of general aviation access to the Ronald Reagan Washington National Airport shall be credited to this appropriation and shall be available until expended solely for these purposes: [*Provided further*, That none of the funds in this Act shall be used to recruit or hire personnel into the Transportation Security Administration which would cause the agency to exceed a staffing level of 45,000 full-time equivalent screeners]. (*Department of Homeland Security Appropriations Act, 2006.*)

Explanation of Changes:

Changes to funding levels reflect adjustments to the base.

The first change reflects the proposed consolidation of the EDS/ETD Systems PPA's to provide the flexibility needed to address changes in requirements as screening compliance issues arise or passenger growth patterns change. Funding requirements will also change as new technology is certified that is less expensive, thereby shifting the resource needs of installation and purchase funding. The findings of the innovative cost-share study for EDS could also shift the need for resources between these areas.

The addition of the "not more than" 90 percent cost-share allows the flexibility for other cost-share amounts for a future letter of intent.

The language proposes to delete the reference to heads of Federal agencies and commissions not being exempt from screening. TSA prefers to make risk-based decisions on the screening of passengers.

The 45,000 TSO cap is proposed for deletion because neither the FY 2006 enacted level nor the FY 2007 request for TSO personnel, compensation, and benefits supports a workforce of this size.

TSA – Electronic Baggage Screening Program (EBSP) and Passenger Screening Program (PSP)**1. Project Description, Justification and Scope**

The Electronic Baggage Screening Program (EBSP) seeks to prevent catastrophic loss and air piracy through screening passenger checked baggage while ensuring freedom of movement for people and commerce. EBSP covers all modes of transportation, including aviation, maritime and land, trucking, and rail. The program is designed to oversee and implement the screening of passenger checked baggage to avert threats in various modes, or segments, of the transportation system. The EBSP procures, deploys, integrates, and maintains over 12,000 end items of security equipment at 445 U.S. commercial airports. This investment includes the program management, quality assurance, research and development, acquisition, deployment, installation, maintenance, repair, relocation, in-service upgrade, and life-cycle replacements of baggage screening equipment, disposal of surplus assets, as well as human factors studies of airport operations to improve ongoing processes used by TSA. This investment reduces costs and improves the efficiency of security screening by transferring significant tasks from human screeners to machines. Without these automated tools, the effectiveness of security screeners in detecting and preventing the introduction of explosives materials, weapons, and other dangerous articles into commercial aircraft would be substantially reduced. Automated tools reduce costs by reducing the number of security screeners required to screen passengers and baggage. Savings and resources attributable to automation of the inspection process may be reinvested or redeployed to other mission critical priorities of the organization. Security screening automation via EDS machines allows for more thorough threat detection and detection of a wider range of threats than can be achieved by manual inspections. EDS machines also require fewer personnel to screen bags, reducing operating costs over the life of the equipment and requiring less lifting of baggage, thus reducing the number of on-the-job injuries. A physical search done by two screeners can process up to 80 bags per hour. EDS machines increase baggage throughput (425 bags per hour for in-line systems and up to 150 bags per hour for standalone systems under normal operating circumstances) and require only one screener to respond to failure alarms.

The Passenger Screening Program (PSP) is designed to oversee the development and deployment of the technology that screens passengers and their personal property to deter, detect, mitigate and prevent transportation of explosives and weapons on commercial aircraft, and considers screening technology applications to other modes of the transportation system, such as ports and rail stations. The investment in the PSP includes funds for program management, testing, procuring, deploying, integrating, and maintaining the passenger and carry-on baggage security screening equipment used to guard the checkpoints of 445 U.S. commercial airports and other forms of travel across the country, in an effort to prevent catastrophic loss or air-piracy. The PSP is tasked with providing screeners the tools and methods to verify that the individuals who are traveling do not carry any items that could be used as weapons or any other type of threat. The PSP will facilitate the flow of passenger traffic, increase throughput, lower the false alarm rates, and most importantly increase travel security by improving the effectiveness of technologies and screener methodologies, while expanding the scope of threats detectable. Currently, checkpoints do not have the ability to accurately and quickly detect explosives on all passengers; only a minimal number of passengers are directed to a selectee lane for further inspection, where they are manually tested for explosives or subject to a pat down. As a result, many travelers are allowed to pass through the checkpoints without complete testing and detection. It is critical to fill this detection gap in order to satisfy the Strategic Goals of the DHS of leading the unified national effort to prevent and protect the

passengers and commerce of the Nation. In addition, the PSP is developing technologies that would automate the checkpoint process and further increase the effectiveness of currently deployed technologies, which would directly support the President's Management Agenda of strategic management of human capital.

TSA - HR Services - Recruiting (HR1), and TSA - HR Services - Staff Support (HR2)
1. Project Description, Justification and Scope

Section 1 Human Resources services provide for the recruitment, qualification and examination of all categories of employees, excluding Executive level staff and the FAMS. This section includes initial and attrition recruitment (including merit staffing) qualification, examination, testing, and assessment. The workforce is comprised of Security Screeners, Law Enforcement Officers, and other professional, administrative, technical and support personnel. The first contractor was initially selected, but after eight months of service, the contract was recompeted. Cooperative Personnel Services (CPS) was then awarded the contract and currently provides the following HR services as required in the contract:

- * Meet all Federal requirements for HR functions
- * Provide TSA with the timely hiring of a diverse and well-qualified workforce
- * Conduct assessments
- * Provide support for employee entry-on-duty processing as directed by TSA
- * Maintain professional, accurate, and timely customer service in all dealings
- * Communicate effectively and timely with all customers, including candidates, TSA, and other contractors providing related services to TSA
- * Maintain accurate records and report timely to TSA on activities performed under the contract
- * Meet Federal e-government initiative requirements
- * Provide recommendations for accomplishing TSA goals.

Section 2 Human Resources Services are provided by Accenture and requires the contractor to:

- * Provide full-service federal HR operations for all TSA employees, excluding Executive level staff and the FAMS, including, but not limited to:
 - Selection of candidates
 - Orientation and entry-on-duty functions
 - Personnel action processing, routing and tracing system and records keeping
 - Creation, maintenance and disposition of Official Personnel Folders
 - Benefits administration
 - Workers' compensation administration
 - Compensation and pay administration
 - Performance management administration
 - HR advisory services
- * Provide customer service
- * Meet all Federal requirements for HR functions
- * Communicate effectively and timely with all customers
- * Maintain accurate records and report timely
- * Meet Federal e-gov initiative requirements
- * Provide recommendations for accomplishing TSA goals

2. Significant Changes

No significant changes from the information provided in the 2006 Congressional Justification.

3. Project Schedule

Projects	Fiscal Quarter and Year				Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)
	Work Initiated	Work Completed	Project Start	Project Complete		
Establish baseline for the hiring and administrative support of TSA employees	Dec 13, 2002	Dec 31, 2003			49.100	
Recruit and Assess baseline level of Screener and Management Administrative and Professional (MAP) FTPs	Jan 1, 2003	Dec 31, 2003			111.175	
Recruit approximately 12,000 Screeners and MAP FTP to account for staff fluctuations due to attrition	Jan 1, 2004	Dec 31, 2004			112.300	
Hire approximately 12,000 Screener and MAP FTPs. Perform HR Admin functions for TSA employees.	Jan 1, 2004	Dec 31, 2004			43.400	
Recruit approximately 12,000 Screeners and MAP FTP to account for staff fluctuations due to attrition	Jan 1, 2005	Dec 31, 2005			113.300	
Hire approximately 12,000 Screener and MAP FTPs. Perform HR Admin functions for TSA employees.	Jan 1, 2005	Dec 31, 2005			36.700	
Recruit approximately 12,000 Screeners and MAP FTP to account for staff fluctuations due to attrition	Jan 1, 2006	Dec 31, 2006			115.150	
Hire approximately 12,000 Screener and MAP FTPs. Perform HR Admin functions for TSA employees.	Jan 1, 2006	Dec 31, 2006			37.500	
Recruit approximately 12,000 Screeners and MAP FTP to account for staff fluctuations due to attrition	Jan 1, 2007	Dec 27, 2007			116.575	
Hire approximately 12,000 Screener and MAP FTPs. Perform HR Admin functions for TSA employees.	Jan 1, 2007	Dec 13, 2007			38.400

PPA Mission Statement

The Screening Partnership Program (SPP) allows an airport operator to submit an application to have screening carried out by a qualified private screening company. The contractor must perform under federal oversight and the contracted screeners must perform at the same or at higher performance levels as federal TSOs.

Summary Justification and Explanation of Changes

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$35	\$32	\$34	\$2

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$2,000 in non-pay inflation.

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$17,994	\$16,393	\$16,600	\$207

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$207,000 in non-pay inflation.

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Other Services	\$134,400	\$122,443	\$131,966	\$9,523

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes increases of \$2.6 million in non-pay inflation, and \$6.9 million in annualization for privatization transition and federal pay comparability costs.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$0	\$6,122	\$6,562	\$440

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes a base increase of \$440,000 to bring HR Services back to FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Medical Care	\$0	\$169	\$182	\$13

Medical Care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2007 request includes a base increase of \$12,000 to bring HR Services back to FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$0	\$32	\$32	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request has no change.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$0	\$35	\$35	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request has no change.

PPA Mission Statement

The Checkpoint Support PPA provides the resources required to deploy and maintain passenger screening, carry-on baggage screening and electronic surveillance equipment. This equipment is a vital component of TSA's efforts to secure our nation's air transportation.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$0	\$308	\$327	\$19

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes an increase of \$19,000 for employee travel required to support increased level of project activity.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$0	\$24	\$24	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. This request funds the transportation costs associated with new refurbished and relocated equipment.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous char	\$40	\$0	\$0	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$70	\$0	\$0	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$15,056	\$0	\$0	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$1,700	\$30,944	\$32,697	\$1,753

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes an increase of approximately \$1.8 million which will support installation of new equipment and the increased program management support required at the higher program activity level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$33,000	\$0	\$0	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & maintenance of facilities	\$1,091	\$0	\$0	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$0	\$64,847	\$68,520	\$3,673

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of approximately \$3.7 million which will support the increased operation and maintenance required at the higher program activity level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$3	\$2,833	\$2,994	\$161

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes an increase of less than \$200,000 to support the newly deployed equipment.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$38,296	\$65,116	\$68,804	\$3,688

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes an increase of \$3.7 million which includes a base adjustment of \$0.9 million. This funding will also permit the continued acquisition of Explosives Trace Portals (ETP) and Whole Body Imagers. The request provides funds to initiate the acquisition and deployment of Automated Explosives Detection Systems (EDS) for Carry-On Bags, Automated Explosives Spot Samplers, Cast and Prosthetics Scanners, as well as the initial procurements of new innovative technologies that are still "coming down the pipeline." The \$0.9 million base adjustment will allow the purchase of an additional 28 TRXs and 22 Cast and Prosthetic Scanners.

EDS/ETD Purchase
Funding Schedule
(Dollars in Thousands)**

PPA: EDS/ETD Purchase		2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Object Classes: ¹					
21.0	Travel	32	50	50	0
25.2	Other Services	12,492	19,823	10,335	(9,488)
31.0	Equipment	162,959	154,143	80,615	(73,528)
Total		\$175,483	\$174,016	\$91,000	(\$83,016)
Full Time Equivalents		---	---	---	---

¹ Specific Object Class amounts have been updated to delineate the latest available spending data. As a result, numbers may differ somewhat from those depicted in MAX.

PPA Mission Statement

EDS / ETD Purchase funds the purchase of electronic baggage screening equipment for deployment in our nation's airports. The deployment of this equipment is a key component of TSA's ability to ensure the security of the air transportation system.

Note: This decrease of \$83 million from FY 2006 represents an appropriate balance of EDS / ETD purchase and installation funding in FY 2007.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$32	\$50	\$50	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$12,492	\$19,823	\$10,335	(\$9,488)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY2007 request includes \$10,335,000 for program management and other consulting efforts associated with equipment purchase. This funding represents a decrease of \$9,488,000 which partially offsets increased funding needs in the EDS / ETD Installation PPA.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$162,959	\$154,143	\$80,615	(\$73,528)

Equipment includes all costs for the purchases of property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request for \$80.6 million represents a decrease of approximately \$73.5 million. This decrease offsets the increased funding requirements of the EDS / ETD Installation PPA that are required for implementation of the EBSP Strategic Plan. The requested funding will allow TSA to continue to field enhanced security capabilities at airports in accordance with the Strategic Plan.

PPA Mission Statement

EDS / ETD Installation funds the installation of electronic baggage screening equipment in our nations airports. Installation is an integral cost associated with the deployment of equipment that enhances the security of our air transportation system.

Note: This \$49 million increase represents an appropriate balance of EDS / ETD Purchase and Installation funding in FY 2007.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$78	\$100	\$150	\$50

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. Travel is a required part of program implementation allowing personnel to collect and evaluate information to develop requirements and monitor implementation of projects. The FY 2007 request includes increases of \$50,000 for employee travel associated with an increased level of equipment installation over FY 2006.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$2,001	\$194	\$408	\$214

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Transportation costs are associated with equipment that is purchased or relocated as part of program implementation. The FY 2006 request includes an increase of \$214,000 for this activity to cover increased relocation of equipment required to implement the strategic plan. The change in funding level is an adjustment-to-base off-set by a decrease in the EDS / ETD Purchase PPA.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$0	\$27	\$57	\$30

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$30,000 associated with additional program management expenses associated with higher level of installation activities. The change in funding level is an adjustment to base off-set by a decrease in the EDS / ETD Purchase PPA.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$215,598	\$44,417	\$93,369	\$48,952

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes an increase of \$48,952,000 to fund increased installation activity needed to implement the Strategic Plan. The change in funding level is an adjustment to base off-set by a decrease in the EDS / ETD Purchase PPA.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$140	\$9	\$16	\$7

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. FY 2007 funding includes a modest increase associated with the increased level of effort for this PPA. The change in funding level is an adjustment to base off-set by a decrease in the EDS / ETD Purchase PPA.

PPA Mission Statement

EDS/ETD Systems -- Maintenance and Utilities funds the maintenance and associated utilities of electronic baggage screening equipment in our nation's airports. This funding is essential to ensure that all security screening equipment is operationally ready and supportable over its anticipated lifetime.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$0	\$50	\$50	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. Travel is a required part of program implementation allowing personnel to collect and evaluate information to develop requirements and monitor implementation of projects. The FY 2007 request includes \$50,000 to cover the cost of employee travel required to implement and monitor maintenance programs.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$2,012	\$6,077	\$6,444	\$367

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request provides for utilities to EDS / ETD checked baggage screening facilities including a \$367,000 increase that is expected to cover increases in the cost of the base services and the cost of supplying utilities to newly installed equipment.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$2,667	\$5,838	\$6,000	\$162

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request funds maintenance and program management contracts required for the maintenance of EDS and ETD baggage screening equipment including a \$162,000 increase to cover the maintenance cost associated with newly deployed equipment and older equipment whose maintenance is no longer covered under warranty.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$188,016	\$184,792	\$219,014	\$34,222

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request funds maintenance of EDS and ETD baggage screening equipment including a \$34 million comprised of a \$1.125 million adjustment to base and a \$32.875 million increase to cover the maintenance cost associated with newly deployed equipment and older equipment whose maintenance is no longer covered under warranty. Maintenance cost increases from approximately 3% to about 15% of original purchase cost as equipment warranties expire.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$2,012	\$2,118	\$2,492	\$374

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FY 2007 request includes a \$374,000 increase to support the additional requirements associated with newly deployed equipment.

PPA Mission Statement

The purpose of Aviation Regulation and Other Enforcement is to provide activities that ensure that TSA continues to build a strong security regulation and enforcement presence on-site at the nation's commercial airports. Funding requested under this decision unit supports airport regulation compliance through domestic and international inspections, K-9 units, international outreach programs to ensure alignment and consistency in security requirements of the United States and those of the other nations to ensure transportation system integrity; and reimbursements provided to State and local law enforcement for support provided at commercial airport checkpoints.

Summary Justification and Explanation of Changes

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Salaries and Benefits	\$102,970	\$109,044	\$109,097	\$53

Salaries and Benefits includes an increase of \$53,000 to account for the net effect of the proposed federal pay raise and an additional loss of 24 FTE.

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$6,000	\$8,760	\$6,865	(\$1,895)

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes decreases of \$1,895,000 due to a reduction of mission related and other travel requirements.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$10	\$11	\$11	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

PPA Mission Statement

In FY 2007, of the \$666 million requested for the PPA, \$267.7 million supports approximately 2,085 FTE at the airports and HQ. Approximately 1,801 FTE comprise the staff of the 158 Federal Security Directors (FSDs) and 284 FTE direct the policy, analysis, and administration of aviation screening. FSD staffs and Security Operations positions are critical to supporting the front line operations of our TSOs. This PPA also supports TSA's IT operating platform, the Transportation Security Operations Center (TSOC), field rent, transit and parking, and miscellaneous IT systems that support the field.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$229,783	\$235,873	\$240,340	\$4,466

Salaries and Benefits include costs for 2,085 FTE in FY 2007, which represents the same level as FY 2006. The FY 2007 request includes an increase of \$4.466 million for annualization of prior year funds and for the proposed FY 2007 pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$3,861	\$6,798	\$6,798	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
GSA rent	\$62,509	\$110,045	\$105,045	(\$5,000)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request represents a decrease due to non-recurring GSA-leased space construction activities.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Rent	\$1,018	\$1,793	\$1,793	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$21,266	\$37,438	\$37,438	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$1	\$1	\$1	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$14	\$24	\$24	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$94,427	\$166,237	\$150,630	(\$15,607)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decrease due to non-recurring High Speed Operational Connectivity (Hi-SOC) installation expenses.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$30,926	\$54,445	\$54,445	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & maintenance of facilities	\$2,378	\$4,187	\$4,187	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$168	\$295	\$295	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$4,250	\$7,482	\$7,482	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$16,488	\$29,027	\$29,027	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Grants/Subsidies/Contributions	\$16,204	\$28,527	\$28,527	\$0

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects.

PPA Mission Statement

TSA is mandated to provide the Federal Flight Deck Officer (FFDO) and Flight Crew Training programs to deputize qualified airline pilots as federal law enforcement officers and to train flight crew members to defend the flight decks and cabins of aircraft against acts of criminal violence or air piracy. This voluntary program provides training in firearms proficiency, self-defense tactics, authorities, and decision making to defend the cockpit.

Summary Justification and Explanation of Changes

PPA Mission Statement

This program is responsible for securing the air cargo supply chain including cargo, conveyances, and people. An estimated 23 billion pounds of cargo is shipped within the United States by air annually. About three-quarters of this amount is transported via all-cargo aircraft, while the remainder travels aboard passenger aircraft. The program operates through compliance activities, policy initiatives and technology implementation. Safeguarding the nation's critical air cargo transportation infrastructure is a shared public and private sector responsibility. Significant regulatory and outreach effort is required. TSA has implemented a threat-based risk management approach for prioritizing efforts and focusing resources. The Air Cargo Strategic Plan outlined an approach for securing the air cargo transportation system based on two threats: introduction of an explosive device on a passenger aircraft, and the hijacking of an all-cargo aircraft resulting in its use as a weapon of mass destruction.

Base resources in FY 2007 will support 300 air cargo inspectors and the efforts described above. Further development of the Freight Assessment System will occur. Compliance and outreach efforts will emphasize implementation of the Final Rule.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$15,128	\$30,719	\$30,892	\$173

Salaries and Benefits includes an increase of \$173,000 to annualize prior year funds and for the proposed federal pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$520	\$1,055	\$1,055	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Transportation Security Administration
Surface Transportation Security Appropriation

I. Appropriation Overview**A. Mission.**

TSA is mandated to protect the surface transportation system and ensure the freedom of movement for people and commerce. This mission is accomplished largely by a consortium of federal, state, local and private entities optimizing resources in a risk-based approach to security. In addition to coordination, TSA provides surface inspectors, canine teams and other screening and detection programs.

These combined efforts play an essential role in DHS' mission to prevent terrorist acts within the U.S.; to reduce vulnerability to terrorism; and minimize the damage from potential attacks. The surface domain includes:

- Approximately 775 million passengers traveling on buses each year and over 9 billion passenger trips on mass transit per year;
- Over 140,000 miles of railroad track (of which 120,000 miles are privately owned), 3.8 million miles of roads (46,717 miles of Interstate highway and 114,700 miles of National Highway System roads), 582,000 bridges over 20 feet of span, 54 tunnels over 500 meters in length, and nearly 2.2 million miles of pipeline; and
- Nearly 800,000 shipments of hazardous materials transported every day (95% by truck).

There is a very real ongoing threat to transportation security, particularly involving the mass transit mode as evidenced by the bombings in Madrid in the summer of 2004 and in London in July 2005. While TSA, its government partners and industry owners and operators have increased their vigilance in response to these events, more robust information exchange, threat detection and preparedness measures must be undertaken to assure the security and resilience of the transportation system.

B. Budget Activities:

The appropriation includes two major programs – Surface Transportation Security Operations and Staffing and Rail/Mass Transit Security.

Surface Transportation Staffing and Operations:

Surface Transportation Staffing and Operations provides coordination among all surface security stakeholders to implement a regulatory framework, prioritize resources, and identify best practices through exercise support and pilot programs.

Rail/Mass Transit Security:

Rail/Mass Transit Security employs a cadre of inspectors and canine forces to provide compliance, outreach, and security efforts in the surface transportation system. They interact daily within the

transportation network to enhance security measures and are available for surge operations when heightened security is required.

C. Budget Request Summary

The Transportation Security Administration requests 297 positions, 297 FTE, and \$37,200,000 for the FY 2007 request. This is an increase of \$1,560,000 to fully annualize the 100 rail inspectors and mass transit canine program.

II. Summary of FY 2007 Budget Estimates by Program/Project Activity (PPA)

Department of Homeland Security
 Transportation Security Administration
 Surface Transportation Security
 Summary of FY 2007 Budget Estimates by Program/Project Activity

Less: Adjustments for Other Funding Sources	---	---	---	---	---	---	---	---	---	---
Net, Discretionary Appropriations and Budget Estimates	190	\$82,093	297	\$35,640	297	\$37,200	---	\$1,560	---	\$1,560

¹ FTE Numbers have been updated to reflect the most recent information available. As a result, numbers may differ somewhat from those depicted in MAX.
² The management of Transportation Grants including Port Security Grants, Operation Safe Commerce, and the Highway Watch Program was moved to the Office of Domestic Preparedness (ODP) in the Spring 2004 and subsequent appropriations for those programs are in the ODB budget for FY 2005 and beyond.
³ Funding for the TWIC program was moved to the Transportation Vetting and Credentialing Appropriation in FY 2006 (requested as TTAC in FY 2007).
⁴ The Port Security Incidents and Response program received funding only in the FY 2002 Emergency Supplemental and the funds were entirely expended by the end of FY 2005.

III. Current Services Program Description by PPA

Department of Homeland Security
Surface Transportation Security
Program Performance Justification
(Dollars in Thousands)

PPA: SURFACE TRANSPORTATION SECURITY OPERATIONS AND STAFFING

	Perm		Amount
	Pos	FTE	
2005 Actual	197	162	\$25,531
2006 Revised Enacted	197	197	23,760
2007 Adjustments-to-Base	240
2007 Current Services	197	197	24,000
2007 Program Change
2007 Request	197	197	24,000
Total Change 2006-2007	240

The Transportation Security Administration requests \$24 million for this activity. This maintains the FY 2006 funding level with a slight increase of \$240,000 to maintain current services.

CURRENT SERVICES PROGRAM DESCRIPTION:

Surface Transportation Security work with modal administrators (Federal Railroad Administration (FRA), Federal Transit Administration (FTA), Federal Motor Carrier Safety Administration, Pipelines and Hazardous Materials Safety Administration, and Federal Highway Administration), other government agencies, and industry stakeholders to establish best practices and national standards, develop security plans and regulations, better assess security vulnerabilities and identify needed security enhancements for surface transportation modes and related infrastructure.

TSA applies three tenets in surface security programming decisions:

1. A threat-based risk management system to ensure transportation security and to direct the investment of scarce resources;
2. A shared public/private responsibility; and
3. Coordination and leveraging of government and industry efforts to develop security plans and standards for intermodal transportation.

This three-pronged approach provides consistency among modes and recognizes transportation security in the context of intermodal, interdependent and international concerns.

In FY05, a Memorandum of Understanding was signed by DHS components and DOT's FTA to delineate coordination of activities, risk assessments and security reviews, information sharing and planning processes. TSA participated in Transit Watch, Security Roundtable conferences, and Connecting Communities Emergency Response and Preparedness training workshops. TSA provided expertise to prioritize security grant funding.

PPA: RAIL SECURITY INSPECTORS AND CANINES

	Perm Pos	FTE	Amount
2005 Actual	100	22	\$2,098
2006 Revised Enacted	100	100	7,920
2007 Adjustments-to-Base	5,280
2007 Current Services	100	100	13,200
2007 Program Change
2007 Request	100	100	13,200
Total Change 2006-2007	5,280

TSA requests \$13.2 million for this activity. The increase of \$5.3 million will annualize part-year funding provided last year and support 100 rail inspectors and mass transit canine support.

CURRENT SERVICES PROGRAM DESCRIPTION:

Surface Security Inspectors: Rail Security Inspectors are tasked with ensuring compliance with TSA and other federal security regulations, standards, or directives within the rail and mass transit sectors. The 100 compliance inspectors are assigned to TSA HQ and 18 field offices throughout the United States to provide coverage of the key rail and mass transit facilities in their regions. In FY05, the 100 inspectors were hired and trained. In conjunction with FRA counterparts, TSA inspectors were able to respond throughout the nationwide rail and mass transit system in response to the London bombings to provide situational awareness of security conditions. In addition, a System Security Evaluation (SSE) program was implemented and the initial SSE completed in the first quarter of FY06. These evaluations involve all stakeholders in a mass transit system in evaluating the security of the entire system. This program will be expanded with 18 planned evaluations in FY06, and maturing in FY07 to 36 SSEs. The inspectors are fully engaged with outreach and enforcement activities in the systems throughout their regions to ensure awareness and compliance with applicable Security Directives.

Mass Transit Canines: Canine explosive detection teams are in the process of being deployed to ten mass transit systems as part of the National Canine Explosives Detection Team Program (NEDCTP) [the overall program is also funded out of the Aviation Security Appropriation]. The FY07 funding level maintains the full operation of the 30

canine teams being certified and becoming fully operational in FY06. NEDCTP deploys and provides day-to-day operational oversight of TSA certified explosive detection canine team resources.

PPA: HAZARDOUS MATERIALS TRUCK TRACKING AND TRAINING

	Perm Pos	FTE	Amount
2005 Actual	\$6,956
2006 Revised Enacted	3,960
2007 Adjustments-to-Base
2007 Current Services
2007 Program Change
2007 Request
Total Change 2006-2007	(3,960)

The Transportation Security Administration requests no additional funding for hazardous materials truck tracking and training in FY 2007. This project was previously funded in FY 2003 through 2006. This represents a decrease of \$3.96 million from FY 2006.

IV. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Transportation Security Administration
Justification of Proposed Changes in Surface Transportation Security
Appropriation Language**

For necessary expenses of the Transportation Security Administration related to providing surface transportation security activities, [\$36,000,000] \$37,200,000 to remain available until September 30, [2007] 2008. (Department of Homeland Security Appropriations Act, 2006.)

Explanation of Changes:

No substantive changes proposed.

PPA Mission Statement

Surface Transportation Security Operations and Staffing is charged with managing TSA's efforts to mitigate the risk and provide security direction to all non-aviation transportation systems. This responsibility covers rail, mass transit, highways, buses, trucking, ferries, and pipelines. This office also works with industry, state and local governments, and other Federal agencies in developing standards and regulations to ensure the security of these vital transportation systems.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$16,424	\$21,016	\$21,557	\$541

Salaries and Benefits includes costs for 197 FTEs in FY 2007, which represents the same level as FY 2006. The FY 2007 request includes an increase of \$541k for annualization of prior year funds and for the proposed FY 2007 pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$500	\$500	\$500	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request maintains the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous char	\$100	\$100	\$100	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request maintains the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$10	\$10	\$10	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request maintains the 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$7,297	\$1,800	\$1,500	(\$300)

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY2007 request includes a decrease of \$300,000 based on programmatic projections of reduced levels in these services.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$1,000	\$134	\$133	(\$1)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes a decreases of \$1,000 to reflect program efficiencies.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$200	\$200	\$200	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request maintains the FY 2006 level.

PPA Mission Statement

TSA has been given the responsibility to ensure the compliance of security regulations and standards within the rail and mass transit modes. TSA will accomplish this with a cadre of 100 inspectors located at significant rail, mass transit, and transits centers across the United States.

Summary Justification and Explanation of Changes

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Salaries and Benefits	\$1,817	\$7,920	\$10,125	\$2,205

Salaries and Benefits includes costs for 197 FTEs in FY 2007, which represents the same level as FY 2006. The FY 2007 request includes an increase of \$541k for annualization of prior year funds and for the proposed FY 2007 pay raise. The remainder of the increase is to annualize carryover funding used to sustain the program in FY 2006.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$178	\$0	\$400	\$400

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY06 budget was offset with carryover funds. The FY 2007 request annualized the carryover funds to provide adequate operating expenses for rail inspectors. This funding will be used for local and extended travel to conduct multitude of transit inspections.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous char	\$0	\$0	\$170	\$170

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY06 budget was offset with carryover funds. The FY 2007 request annualized the carryover funds to provide adequate operating expenses for rail inspectors. This funding will be used for communication equipment and service cost.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$0	\$0	\$5	\$5

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY06 budget was offset with carryover funds. The FY 2007 request annualized the carryover funds to provide adequate operating expenses for rail inspectors.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$103	\$0	\$300	\$300

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY06 budget was offset with carryover funds. The FY 2007 request annualized the carryover funds to provide adequate operating expenses for rail inspectors.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$0	\$0	\$200	\$200

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY06 budget was offset with carryover funds. The FY 2007 request annualized the carryover funds to provide adequate operating expenses for rail inspectors. This funding will be used for the mass transit canines.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Grants/Subsidies/Contributions	\$0	\$0	\$2,000	\$2,000

Grants/Subsidies/Contributions includes cash payments to States, other political subdivisions, corporations, associations, individuals, and contributions to foreign countries, international societies, commissions, proceedings, or projects. The FY06 budget was offset with carryover funds. The FY 2007 request annualized the carryover funds to provide adequate operating expenses for mass transit canine teams.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

TRANSPORTATION SECURITY ADMINISTRATION
TRANSPORTATION THREAT ASSESSMENT & CREDENTIALING
[TRANSPORTATION VETTING AND CREDENTIALING]

I. Appropriation Overview

The Transportation Vetting & Credentialing appropriation (to be renamed as the Transportation Threat Assessment & Credentialing appropriation in FY 2007), established by Congress in FY 2006, supports compliance with the National Strategy for Homeland Security, the USA PATRIOT ACT of 2001 (P.L. 107-56), and the Aviation and Transportation Security Act of 2001 (P.L. 107-71). These laws provide direction to the Federal Government to protect homeland security, placing special emphasis on deterrence, prevention, interdiction of threats, aggression, and unlawful acts directed toward the United States. The Homeland Security Presidential Directive-11 (HSPD 11), issued August 27, 2004, directed the Department of Homeland Security (DHS), in coordination with other Federal agencies, to "enhance terrorist-related threat assessment through comprehensive, coordinated procedures ... in a manner that safeguards legal rights, including freedoms, civil liberties, and information privacy guaranteed by Federal law."

The objective of HSPD-11 is to more effectively detect and interdict individuals known to engage in terrorist activities or those who are reasonably suspected to be doing so, or who have been engaged in terrorist activities. To that end, the broad range of existing government and private sector security measures and initiatives will be augmented by a comprehensive, coordinated and integrated threat assessment environment. At the same time, implementation of HSPD-11 must facilitate the efficient movement of people, cargo, and conveyances and minimize any negative impacts on related activities. The Presidential Directive requires that these goals be achieved without compromising personal or institutional privacy and with due respect for other rights and freedoms quintessential to our way of life.

The Office of Transportation Threat Assessment and Credentialing (TTAC) within TSA supports this imperative by consolidating the management of all vetting and credentialing programs within TSA. This office consists of the following screening programs: Secure Flight, Crew Vetting, Transportation Worker Identification Credential (TWIC), Registered Traveler, Hazardous Materials Commercial Driver's License Endorsement (HAZMAT), and Alien Flight Student. The programs that comprise this appropriation are designed to enhance security to many components (air, land, sea) of the transportation sector and much of the risk-analysis being performed is scalable for use in other sectors of this dynamic network.

Through the use of passenger prescreening processes, the Secure Flight and Registered Traveler programs will improve the Federal government's ability to prevent terrorists from boarding aircrafts. The Crew Vetting program is the evaluation and analysis of airline crew lists against watch list and lost/stolen passport lists while the Alien Flight Student program conducts background and terrorist-based checks on aliens and other individuals who seek flight training in the U.S. As part of the certification process, commercial drivers seeking to haul hazardous materials across the United States must be cleared through a background check conducted by the Hazardous Materials CDL Endorsement program. The TWIC program provides an identity management system for higher risk

TSA - 1

transportation workers requiring unescorted access to secure areas of the nation's transportation system. The overall purpose of these programs is to provide a structured method of assessing potential threats to the safety and security of the American public through the screening of workers and travelers throughout the transportation industry.

Since we cannot predict specific terrorist activity, the name based threat assessment methodologies employed by the programs within TTAC become a very important tool in the fight against terrorism that could quickly be leveraged to further protect the Nation's transportation system.

A. Mission Statement for Transportation Threat Assessment & Credentialing
[Transportation Vetting and Credentialing]:

To reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of the threat assessment methodologies that are intended to identify known or suspected terrorist threats working or seeking access to the Nation's transportation system.

B. Budget Activities:

Secure Flight

This program will consolidate airline passenger screening, that was previously done by the airline industry, under one program managed and operated by the Federal government. This consolidation meets the provisions outlined in the Intelligence Reform and Terrorism Prevention Act of 2004 (P.L. 108-458) and the recommendations of the 9/11 Commission. For the sole purpose of preventing terrorists from boarding aircraft, the Secure Flight program will use an automated process backed by consistent internal analytical procedures to compare specific passenger information against records contained in the Terrorist Screening Center Database. The Secure Flight program will concentrate on airline passengers boarding within the U.S. and its territories. Prescreening of passengers boarding internationally continues to be done by the U.S. Customs and Border Protection through its Advanced Passenger Information System (APIS). However, both programs are working towards the use of integrated systems to ensure that domestic and international pre-screening is consistent and uniformly effective. The program is currently finalizing plans for testing and rollout and is also focusing on the rulemaking process.

Crew Vetting

This program allows TSA to mitigate risk by vetting airline crews entering, departing, or overflying U.S. airspace against terrorist-related information. It uses computerized vetting and matching analysis to assess potential threats of terrorists posing as cleared aviation personnel. Crew Vetting compares airline crew lists against the FBI's Violent Gang, Terrorist Organization Files (VGTOF), TSA's No-Fly List and Selectee lists, and numerous other watch lists including: U.S. Marshall's Warrant Information Network data, and Department of State lost/stolen passport lists. Further, analysts conduct evaluations of data through classified systems to determine if any crew member is a potential threat to the aviation system.

Transportation Worker Identification Credential (TWIC)

Developed in response to threats and vulnerabilities identified in the transportation system, TWIC will establish an integrated, credential-based, identity verification program through the use of biometric technology. In order to gain unescorted access to the secure areas within the nation's transportation system, transportation workers who need access to these areas will go through

identity verification, a satisfactory background check and be issued a biometrically verifiable identity card to be used with local access systems. The prototype phase of this program ended on June 30, 2005, with an enrollment of approximately 15,000 workers. After issuance of a rule, implementation of the program will begin in FY 2007, with maritime workers receiving TWIC cards to gain entry to secure areas at U.S. sea ports. The TWIC program will be a fully fee funded program, beginning in FY 2007.

Registered Traveler

Working closely with the airline industry, this program will enable travelers to move quickly through security checkpoints. Travelers will apply for "trusted traveler" status through a simplified application process for prescreening and clearance. The information collected from the applicant is screened against terrorist and law enforcement databases. Five airports participated in the pilot program which began in the summer of 2004 and ended September 2005. A sub-pilot to test the feasibility of using a public-private partnership model for the program began in June 2005 at Orlando, Florida. As a result, the Registered Traveler program developed an implementation plan, using the public-private partnership model, which is scheduled to commence with a nationwide roll-out beginning in June 2006. The Registered Traveler program is a fully fee funded program, beginning in FY 2006.

Hazardous Materials Commercial Driver's License Endorsement (HAZMAT CDL)

Developed to implement Section 1012 of the USA PATRIOT ACT of 2001 (P.L. 107-56), the goal of this program is to support public safety by ensuring that all commercial drivers transporting hazardous materials are thoroughly checked against terrorist and criminal databases. The Department of Transportation established regulations requiring states to issue special permits to drivers in order to transport commercial materials defined as hazardous by motor vehicle. The PATRIOT ACT expanded on this by requiring a background records check for all U.S. drivers who transport hazardous materials. Commercial drivers must receive endorsement from DHS in order to haul hazardous materials across the United States. Any driver applying for, renewing, or transferring a Hazmat endorsement is required to undergo a terrorist name based check and a criminal history check. HazMat CDL is a fully fee funded program.

Alien Flight Student Program (AFSP)

Established under the Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176), the AFSP reviews and assesses biographic and biometric information of non-U.S. citizens or any other individual (specified by the Secretary of Homeland Security), applying for training in the operation of any aircraft (having a maximum certificated takeoff weight of more than 12,500 pounds) at FAA certified flight schools located both inside and outside the United States. These persons are subject to a security threat assessment based on background and terrorist-based checks. Since its transfer to TSA from Federal Bureau of Investigation in July 2004, this program has been expanded to vet pilots seeking training in aircraft weighing under 12,500. This action was taken to mitigate a critical security weakness in the legislation. Although the AFSP is a fully fee funded mandatory program, TSA does not have the authority to collect fees to offset costs for vetting pilots seeking recurrent training. TSA currently vets this population to confirm their identity and their recurring training status. TSA is proposing a legislative language in the FY 2007 Budget that would authorize the collection of fees to offset costs for vetting this population.

C. Budget Request Summary:

For FY 2007, the Transportation Security Administration requests 118 positions, 118 FTE, \$54,700,000 in appropriated funding and \$76,101,000 in fee authority for a total budget authority

TSA - 3

of \$130,801,000. The total includes adjustments-to-base of 7 FTE, and \$15,555,000. The adjustments-to-base include revisions to the estimated fee collections in FY 2007 for the Registered Traveler and TWIC programs. It also includes base reductions of \$21,334,000 for adjustments to the Secure Flight program and the elimination of the Screening Administration and Operations line item.

2007 Adjustments-to-Base	(16,129)
2007 Current Services	51	51	40,000
2007 Program Change
2007 Request	51	51	40,000
Total Change 2006-2007	(16,129)

Transportation Security Administration requests \$40 million for this activity. This is a decrease of \$16.1 million from FY 2006. The decrease is a base adjustment to reflect a revised implementation schedule of the Secure Flight program.

CURRENT SERVICES PROGRAM DESCRIPTION:

On August 26, 2004, the Secretary announced that DHS would pursue a new domestic pre-screening program called Secure Flight. This new Secure Flight program addresses the 9/11 Commission recommendations regarding use of watch lists, and reflects input received from Congress, the privacy and civil liberties communities, the aviation community, airline travelers and DHS's international partners.

Secure Flight will shift the responsibility of checking passengers against terrorist watch lists (which currently falls to the domestic and foreign air carriers) to the Federal government, thus improving the consistency of and response to watch list comparisons. Domestic flight passenger name record (PNR) information will be compared against records contained in the Terrorist Screening Center Database (TSDB). Secure Flight will significantly improve the Federal government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

Consolidating these checks within the Federal government will allow the automation of most watch list comparisons and apply more consistent internal analytical procedures where automated resolution of initial "hits" is not possible. It will also allow for more consistent response procedures at airports for those passengers identified as potential matches. Significant progress has already been made by the U.S. government in providing greatly expanded No-Fly and Selectee lists to airlines to conduct checks on their own systems. Once Secure Flight is operational, the U.S. Government will have the responsibility of conducting these checks.

TSA - 6

International passenger pre-screening will continue to be conducted by U.S. Customs and Border Protection (USCBP) through its Advanced Passenger Information System (APIS). These checks are mandated by U.S. law. The Secure Flight program would work hand-in-hand with USCBP, including the use of integrated systems, to ensure that domestic and international pre-screening is consistent and uniformly effective.

The Secure Flight's goals are to improve the security and safety of travelers on domestic flights, reduce passenger airport screening time, and protect privacy and civil liberties. Secure Flight will fully protect the civil liberties and privacy of passengers and will include robust redress mechanisms to assist passengers with resolving instances in which they believe they have been unfairly or incorrectly selected for additional screening.

The Secure Flight program is also fully committed to successfully meeting all of the recommendations from the General Accountability Office's (GAO) March 28, 2005 report as required by the Department of Homeland Security Appropriations Act of 2006, (P.L. 109-90). TSA will continue to work with GAO in order to meet the requirements, secure the certification for the Secretary, and allow GAO to report to Congress.

The Secure Flight Program requires air carriers to modify their systems in order to implement the program. Air carriers will not begin any modifications until the rule is issued. Accordingly, status and implementation of Secure Flight is tied directly to the issuance of the rule. To prepare the carriers for the rule, the Secure Flight team has been engaged with the air carriers to jumpstart technical developments and interfaces. The rulemaking process will be a priority in FY 2006.

"The FY2007 Request will allow the program to maintain operational support of the Secure Flight platform. The timeline for roll-out to subsequent carriers will be decided once these plans are approved. The program is committed to providing a secure, high quality, service that protects individual privacy."

PPA: CREW VETTING

	<u>Perm Pos</u>	<u>FTE</u>	<u>Amount</u>
2005 Actual
2006 Revised Enacted	42	42	13,167
2007 Adjustments-to-Base	1,533
2007 Current Services	42	42	14,700
2007 Program Change
2007 Request	42	42	14,700
Total Change 2006-2007	1,533

Transportation Security Administration requests \$14.7 million for this activity. This is an increase of \$1.5 million from FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

This program allows TSA to mitigate risk by vetting airline crew members entering, departing, or overflying U.S. airspace. It uses computerized and manual vetting and matching analysis to assess potential threats of terrorists posing as cleared aviation or other transportation system personnel. The vetting compares airline crew lists and other transportation program personnel against the FBI's Violent Gang, Terrorist Organization Files (VGTOF), TSA's No Fly and Selectee lists, U.S. Marshall's Warrant Information Network, the Immigration and Customs Enforcement Deportable Alien Control System, and Department of State lost/stolen passport lists. This analysis allows analysts to evaluate the collected data to determine whether or not any crewmember is a potential threat to the aviation or other transportation systems.

The Crew Vetting Program is required to maintain a 24/7 operations center in order to have the ability to receive and analyze Flight Crew Manifests (FCM) and Master Crew List (MCL) from the airlines at anytime of day. The FCM are received 24 hours in advance of take-off, or 2 hours in the event of a crew change, and identify which crew members will be onboard a particular flight. These individuals are then vetted against the various watch-lists to identify potential security threats. The same timelines apply for General Aviation personnel flying into Reagan National Airport.

In FY 2007, it is anticipated that integration and testing of the Crew Vetting application onto the Secure Flight system platform will be completed. Steady state operation of the Crew Vetting application is also anticipated to be achieved in FY 2007. The FY 2007 Request of \$14.7 million will allow TSA to continue these activities and provide the necessary crew vetting program and contract support, system maintenance, and transaction costs.

PPA: REGISTERED TRAVELER (fee authority)

	Perm Pos	FTE	Amount
2005 Actual
2006 Revised Enacted	12	12	20,000
2007 Adjustments-to-Base	15,101
2007 Current Services	12	12	35,101
2007 Program Change
2007 Request	12	12	35,101
Total Change 2006-2007	15,101

Transportation Security Administration requests \$35.1 million in fee collection authority for this activity. This is an increase of \$15.1 million from FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Registered Traveler (RT) program increases the efficiency with which screeners and security resources are aligned. Travelers who provide limited personal information for a vetting process would, in return, receive the benefit of expedited processing through security checkpoints, which may include not having to remove shoes or coats or displaying computer equipment. Threat assessment resources can then be focused on unvetted travelers.

The RT Pilot Programs were initiated in five airports during the summer of 2004. In partnership with Northwest Airlines, United Airlines, Continental, and American Airlines, TSA established pilot programs at Minneapolis-St. Paul (MSP), Los Angeles (LAX), Houston International (IAH), Boston (BOS) and Washington, DC (DCA). Each of the five pilot programs enrolled approximately 2,000 people, who were invited to participate by the airlines from among their "very frequent" fliers. Participation was limited to U.S. citizens, U.S. nationals, and permanent legal residents of the U.S. Participation in the pilot program was entirely voluntary and free of charge.

Participating passengers provided personal biographic data including: name, address, phone number, date of birth, and in some locations, social security number. In addition, participants provided biometric information by fingerprint and/or iris scan. The validity of the document was verified using electronic document scanners. The biometric information was used to perform a name-based check against Federal terrorist watch-lists, databases of outstanding warrants, and similar government databases. Participants used biometric readers at special kiosks to confirm his/her identity before going through the normal TSA checkpoint. The pilot programs were specifically designed to test the effectiveness of the technology and operational processes and concluded in September 2005.

In June 2005, TSA initiated a sub-pilot at Orlando International Airport (MCO) called the Private Sector Known Traveler Program to engage the private sector and determine the feasibility, advantages and disadvantages of using a public-private partnership. This sub-pilot varied from the others in that it charged participants a fee of \$80 to test whether travelers are willing to pay a fee to participate in such a program.

Because of the success of these pilots, TSA announced in October of 2005 an RT roll-out strategy based on a public-private partnership model. The first key date was January 20, 2006 where TSA issued guidance to the industry regarding the collection and storage of biometrics on a security card and announced the redress process. To ensure consistency at all participating airports, TSA will establish stringent interoperability requirements to guarantee that participants will be provided with consistent and reliable service as they travel through various airports.

The FY 2007 fee collection estimate assumes continued operational support to the airports where RT will be implemented in FY 2006 and the implementation at additional airports in FY 2007 as plans are approved. The fees collected and retained by the Federal government will be used to cover operational costs.

PPA: TRANSPORTATION WORKER IDENTIFICATION CREDENTIAL (fee authority)

	Perm Pos	FTE	Amount
2005 Actual
2006 Revised Enacted
2007 Adjustments-to-Base	7	7	20,000
2007 Current Services	7	7	20,000
2007 Program Change
2007 Request	7	7	20,000
Total Change 2006-2007	7	7	20,000

Transportation Security Administration requests \$20 million in fee collection authority for this activity. This is an increase of 7 positions, 7 FTE, and \$20 million above the FY 2006 revised enacted level which reflects TSA's current estimate for TWIC fee collections in FY 2006 (\$0).

CURRENT SERVICES PROGRAM DESCRIPTION:

The Transportation Worker Identification Credential (TWIC) Program will improve security by establishing an integrated, credential-based, identity management program for transportation workers requiring unescorted access to secure areas of the nation's transportation system. When fully implemented, the program will ensure that the identity of each TWIC holder has been verified; that a satisfactory background check has been completed on that identity; and, that each credential issued is positively linked to the rightful holder through the use of biometric technology.

The TWIC Program was developed in response to threats and vulnerabilities identified in the transportation system, and in accordance with the spirit and requirements of the Aviation and Transportation Security Act of 2001 (P.L. 107-71), and the Maritime Transportation Security Act of 2002 (P.L. 107-295). The program is taking a risk-based approach as it rolls-out at the Nation's seaports by utilizing the national port criticality list that prioritizes ports based on risk, threat, and vulnerability analysis. Currently, TWIC is preparing to support the Maritime industry, but its functionality has been tested and could expand into other transportation sectors if necessary.

TWIC's personal identity verification (PIV) standards closely adhere to those of Homeland Security Presidential Directive 12 (HSPD-12), and its implementing standard, Federal Information Processing Standard (FIPS) 201. The TWIC system is also designed to comply with other Government standards for Smart Cards and credential issuance.

The TWIC program is on the leading edge of newly released biometric standards and was first to adopt those common biometric standards in the Federal government. Adhering to these standards will insure interoperability among physical access control systems that may incorporate different vendor products and technologies. TWIC specifically follows biometric standards of the American National Standards Institute (ANSI) for its pattern-based fingerprint format operational biometric.

The program completed the prototype phase on June 30, 2005 and began evaluating the results and establishing a business model for moving forward. The program was expected to be launched

during FY 2006 but has been delayed to accommodate the additional time for review and rulemaking. Pending approval of program plans and the rule, the FY 2007 request reflects the anticipated fee collections resulting from implementation of the program to maritime ports in FY 2007.

PPA: HAZARDOUS MATERIALS CDL ENDORSEMENT PROGRAM (fee authority)

	<u>Perm Pos</u>	<u>FTE</u>	<u>Amount</u>
2005 Actual
2006 Revised Enacted	6	6	19,000
2007 Adjustments-to-Base
2007 Current Services	6	6	19,000
2007 Program Change
2007 Request	6	6	19,000
Total Change 2006-2007

Transportation Security Administration requests \$19 million in fee collection authority for this activity. This is the same level as the FY 2006 revised enacted amount which reflects the current Registered Traveler fee collection estimates for FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Developed to implement Section 1012 of the USA PATRIOT ACT of 2001 (P.L. 107-56), the purpose of this program is to conduct background checks on drivers applying for, renewing or transferring, a hazardous materials endorsement (HME) on their state issued commercial drivers license (CDL). Drivers identified as a "security threat" would be denied the Hazmat endorsement. Successful execution of this program will enhance the security and safety of the nation's transportation system.

TSA issued an Interim Final Rule (IFR) on May 5, 2003, requiring background checks to be conducted on truck drivers who carry hazardous materials. Commercial drivers must receive the endorsement (HME) from DHS in order to haul hazardous materials across the United States. In addition to submitting biographical and biometric information, applicants must pay a fee to cover the cost of the checks. Regulations prohibit issuance of HMEs to individuals who: 1) have been convicted of certain felonies, under particular circumstances; 2) are fugitives; 3) are not U.S. citizens, lawful permanent residents, or lawful non-immigrants, refugees, or asylees with valid evidence of unrestricted employment authorization; 4) have been adjudicated as mentally incompetent or involuntarily committed to a mental institution; or 5) who are determined to pose a threat of terrorism or a threat to national transportation security. As a result of this program, 579 applicants were denied a Hazmat endorsement in FY 2005.

In FY 2007, the program anticipates performing fingerprint-based checks on nearly 400,000 Hazardous Material Endorsement (HME) holders. This is a 30 percent increase over FY 2006 projected levels and affirms the program's vital role of improving the safety and protection of passengers and freight traveling on our Nation's highways.

The Hazmat program is fully fee funded, which currently collects \$56 per applicant to cover the cost of the TSA security threat assessment (\$34) and for an FBI criminal history check (\$22). The \$56 fee is collected in the thirty-three states and the District of Columbia which have chosen to use TSA's agent for fingerprint collection and processing (this represents 61 percent of the total driver population). The remaining seventeen states are responsible for their own fingerprint collection and submission to the FBI, but must still submit the \$34 fee for the TSA assessment. The FY 2007 Request provides full funding from fee collection for operational costs including:

federal employee personnel compensation and benefits, contract support, equipment and software maintenance, fingerprint processing costs, and adjudication costs.

PPA: ALIEN FLIGHT STUDENT PROGRAM (mandatory fee authority)

	Perm Pos	FTE	Amount
2005 Actual	
2006 Revised Enacted	2,000
2007 Adjustments-to-Base
2007 Current Services	2,000
2007 Program Change	---
2007 Request	2,000
Total Change 2006-2007

Transportation Security Administration requests \$2 million in fee collection authority for this activity. This is the same level as the FY 2006 revised enacted amount.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Alien Flight Student Program (AFSP) conducts terrorist, immigration, and criminal-background checks on all alien flight students applying for FAA flight training in the U.S. or abroad. Applicants include pilots/student pilots training on aircraft weighing more than, and less than, 12,500 pounds and are subject to a security threat assessment in accordance with Vision 100 – Century of Aviation Reauthorization Act (P.L. 108-176). Pilots identified as a “security threat” under this program will be denied training. Successful execution of this program will enhance the security and safety of the Nation’s transportation system.

The Program reviews and assesses both biographic and biometric information in order to help identify individuals who pose a security threat to aviation or national security. Prior to the September 11th attacks, there was no systematic security checks performed on alien pilots who receive flight training at FAA certified flight schools located both inside and outside the United States.

In FY 2007, the AFSP anticipates processing approximately 15,000 applicants. The program also expects to move all 10-print fingerprints to a common DHS platform, which will allow for the leveraging of program data to other DHS components. This effort is of particular interest to Immigration and Customs Enforcement’s (ICE) Student and Exchange Visitor Information System (SEVIS) and will enhance both programs capability to more closely monitor attendance and status of students in training.

AFSP is a fee funded program that currently collects a fee of \$130 per applicant. This fee includes \$98 for extensive TSA international and domestic threat assessments, \$22 for an FBI criminal history records check, and \$10 for fingerprint and application processing. The FY 2007 Request provides full funding from fee collection for operational costs including: contract support, equipment and software maintenance, fingerprint processing costs, and adjudication costs.

PPA: SCREENING ADMINISTRATION AND OPERATIONS

	Perm Pos	FTE	Amount
2005 Actual
2006 Revised Enacted	4,950
2007 Adjustments-to-Base	(4,950)
2007 Current Services
2007 Program Change
2007 Request
Total Change 2006-2007	(4,950)

Transportation Security Administration requests no funding for this activity in FY 2007 as the PPA was originally intended to fund start-up costs for new credentialing programs. This represents a decrease of \$4.95 million from FY 2006.

PPA Mission Statement

The mission of the Secure Flight Program is to significantly improve the Federal government's ability to prevent terrorists from boarding aircraft, help move passengers through airport screening more quickly, and reduce the number of individuals selected for secondary screening, while fully protecting passengers' privacy and civil liberties.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$0	\$5,905	\$6,019	\$114

Salaries and Benefits includes costs for 51 FTEs in FY 2007, which represents the same level as FY 2006. The FY 2007 request includes an increase of \$114,000 for the proposed FY 2007 pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$0	\$260	\$185	(\$75)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. As the Secure Flight program begins implementation in FY 2006, travel is necessary to conduct on-site reviews and meetings with participating partners. The FY 2007 request includes a decrease of \$75,000 to reflect a revised rollout schedule for the Secure Flight platform.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$0	\$11	\$8	(\$3)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2007 request includes a decrease of \$3,000 to reflect a revised rollout schedule for the Secure Flight platform.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Rent	\$0	\$2,564	\$2,692	\$128

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 request includes an increase of \$44,000 for non-pay inflation and \$84,000 for annualization.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$0	\$777	\$790	\$13

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the Secure Flight platform. The FY 2007 request includes an increase of \$13,000 for non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$0	\$1,053	\$0	(\$1,053)

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. The FY 2007 request includes a decrease of \$1,053,000 to reflect a revised rollout schedule for the Secure Flight platform.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$0	\$44,757	\$29,734	(\$15,023)

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will be the primary vehicle by which the Secure Flight program will be implemented and operated in regard to connectivity with air carriers and the processing of security checks. The FY 2007 request includes a decrease of \$15,023,000 to reflect a revised rollout schedule for the Secure Flight platform.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$0	\$4	\$3	(\$1)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes a decrease of \$1,000 to reflect a revised rollout schedule for the Secure Flight platform.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$0	\$798	\$569	(\$229)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. This costs include equipment that will be purchased for the Secure Flight program outside of contracts for rollout and sustainment of the program. The FY 2007 request includes a decrease of \$229,000 to reflect a revised rollout schedule for the Secure Flight platform.

PPA Mission Statement

The mission of the Crew Vetting Program is to mitigate risk by vetting airline crews entering, departing, or overflying U.S. airspace using computerized vetting and matching analysis that will assess potential threats of terrorists posing as cleared aviation or other transportation system personnel.

Summary Justification and Explanation of Changes

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Salaries and Benefits	\$0	\$3,671	\$3,742	\$71

Salaries and Benefits includes costs for 42 FTEs in FY 2007, which represents the same level as FY 2006. The FY 2007 request includes an increase of \$71,000 for the proposed FY 2007 pay raise.

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$0	\$156	\$174	\$18

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with the vetting center in Colorado Springs, CO. The FY 2007 request includes an increase of \$2,000 for non-pay inflation and \$16,000 for annualization.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$0	\$35	\$39	\$4

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. TSA is dependant upon communications lines and utilities to run the vetting systems. The FY 2007 request includes an increase of \$4,000 for non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$0	\$8,938	\$10,264	\$1,326

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services are critical to the maintenance and operation of vetting systems and communication systems with the air carriers. TSA also uses contracts to adjudicate hits and discrepancies in within the system. The FY 2007 request includes an increase of \$163,000 for non-pay inflation and \$1,163,000 to pay for additional contracted services including installation of replacement equipment.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$0	\$28	\$31	\$3

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes an increase of \$3,000 for annualization.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$0	\$339	\$450	\$111

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes an increase of \$6,000 for non-pay inflation, \$20,000 for annualization and \$85,000 for purchase of equipment outside of contracting services.

PPA Mission Statement

The mission of the Registered Traveler Program is to increase the efficiency with which screeners and security resources are aligned. Travelers will achieve an expedited processing through security checkpoints by providing limited personal information that assures DHS of their good faith.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$0	\$994	\$1,134	\$140

Salaries and Benefits includes costs for 12 FTE in FY 2007, which represents the same level as FY 2006. The FY 2007 request includes an increase of \$140,000 for the proposed FY 2007 pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$0	\$25	\$44	\$19

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. Travel is necessary to conduct on-site reviews and meetings with the airport operators and aircarriers as the Registered Traveler is implemented. The FY 2007 request includes an assumption of \$19,000 in fee collection to cover full year operational costs.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$0	\$5	\$9	\$4

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incidental to the transportation of things. The FY 2007 request includes an increase of \$4,000 in fee collection adjustments to cover increased costs associated with the full-year operation of Registered Traveler.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$0	\$10	\$18	\$8

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, and utility services. The FY 2007 request includes an increase of \$8,000 in fee collection adjustments to cover increased costs associated with the full-year operation of Registered Traveler.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$0	\$1	\$2	\$1

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. TSA uses printed media to inform the public and airports and air carriers about the Registered Traveler program. The FY 2007 request includes an increase of \$1,000 in fee collection adjustments associated with the full-year operation costs of the Registered Traveler program.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$0	\$5,000	\$9,158	\$4,158

Advisory and assistance services include services acquired by contract from non-Federal sources (that are private sector, foreign governments, State and local governments, tribes, etc) as well as from other units within the Federal Government. TSA uses these types of contracts to assist in the development and implementation of the Registered Traveler Program. The FY 2007 request includes an increase of \$4,158,000 fee collection adjustments as full-year operational costs are realized.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$0	\$10,002	\$17,555	\$7,553

Other services include contractual services with non-Federal sources that are not otherwise classified under object class 25. Contracting services will be the primary vehicle by which the Registered Traveler program will be implemented and operated in regard to connectivity with airport operators and air carriers. The operational contracts include the adjudication of cases where individuals are denied participation in the program or access through the RT checkpoint. The FY 2007 request includes an increase of \$7,553,000 in fee collection adjustments for full-year costs of the program.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$0	\$1	\$2	\$1

BUDGET REQUEST AND SUPPORTING INFORMATION**Transportation Security Administration**
Transportation Security Support Appropriation**I. Appropriation Overview****A. Mission:**

The Transportation Security Administration is an agency of over 50,000 personnel, with over \$6 billion in budget authority, substantial regulatory and law enforcement authority, and a nationwide presence. The management and support of the organization are accomplished by a transportation security support staff and five strategically located Mission Support Centers (MSCs). TSA has developed and will maintain a flat organizational structure that emphasizes front-line service delivery with well-trained managers that are supported by an array of services from Washington, D.C. The MSCs and deployed personnel provide corresponding field operations personnel with direct and economical operational and technical support.

B. Budget Activities:

Intelligence: The Transportation Security Intelligence Service (TSIS) produces intelligence products to support TSA's mission of securing the transportation system. TSIS enables risk-based security planning at tactical, operational, and strategic levels. Intelligence driven operations optimize the full suite of TSA operational capabilities.

HQ Administration: Headquarters Administration provides all aspects of the support infrastructure required to sustain TSA's operations around the nation. These activities include serving as the central point on policy development, training, performance management, facilities management, finance, human resources, protecting civil rights, legal advice and internal conduct and audit.

Information Technology: Information Technology provides the IT infrastructure and services to maintain connectivity, provide productivity tools, and support corporate applications.

C. Budget Request Summary:

The Transportation Security Administration requests 1,476 positions, 1,445 FTE, and \$527,283,000 for the FY 2007 request. The total adjustments-to-base is \$14,405,000. The program increases include 61 positions, 30 FTE, and \$7,500,000 to increase acquisitions support and internal controls.

Less: Adjustments for Other Funding Sources:													
Net, Discretionary Appropriations and Budget Estimates ⁴	1,494	\$706,449	1,415	\$505,578	1,445	\$527,283	30	\$21,905	30	\$7,500	---	\$14,405	

¹ Specific FTE amounts have been updated to delineate the latest available data. As a result, numbers may differ somewhat from those depicted in MAX.

² In FY2005, Intelligence was a separate appropriation.

³ In FY2005, Research and Development (RAD) was a separate appropriation. In FY06, the R&D function was transferred to Science and Technology, DHS.

⁴ FY05 actual amount understated in MAX by \$7M. Net, Discretionary Appropriations & Budget Estimates of \$505.4 million in FY 2006 reflects revised enacted amount, while the FY 2007 estimate of \$527.3 million reflects the requested budget authority. These amounts differ from MAX, in that "obligation by program activity" is understated by \$13M, as reimbursable amount in error in MAX.

2007 Program Change
2007 Request	99	99	21,000
Total Change 2006-2007	210

TSA requests \$21.0 million for this activity. This request is a \$210,000 increase over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION

The Transportation Security Intelligence Service (TSIS) is the intelligence organization for TSA. It provides an organic capability to review, synthesize, and analyze transportation specific intelligence. It is the only federal intelligence entity focused solely in the transportation sector. TSIS coordinates closely and shares information with DHS, the Intelligence Community, the intelligence sections of law enforcement agencies, and the transportation industry. To facilitate collaboration with the intelligence community and provide rapid analysis and notification of threats, this office located liaison officers at key intelligence community and law enforcement agencies.

TSIS is critical to an overall risk-based security strategy. The products generated by TSIS provide a threat framework to prioritize security resources. They are regularly used by the Federal Air Marshal Service, Federal Security Directors, and transportation industry. TSIS operates and maintains 24x7 intelligence capability for TSA at the Transportation Security Operations Center (TSOC) to disseminate warnings and notifications of credible and immediate threats. TSIS helps coordinate domestic and international civil aviation and other modal security intelligence activities with other government agencies and prepare country threat assessments in support of foreign airport assessment.

In order to perform its mission, TSIS provides and maintains its Top Secret and Secret Collateral classified information technology (IT) infrastructures for interfacing via voice, video, and data with the Intelligence Community (IC), State & Local law enforcement, field sites, and industry partners. One such system is the Remote Access Security Program (RASP) solution which provides secure access to classified and unclassified threat information in a timely manner to over 190 remote locations.

TSA - 3

The FY07 request will sustain the current level of performance.

2007 Request	1,377	1,346	296,191
Total Change 2006-2007	61	30	19,594

TSA requests \$296.2 million for this activity. This is an increase of \$19.6 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION

Headquarters Administration supports numerous functions required to provide leadership, management, and logistics support to TSA operations. The Administrator, Internal Affairs, Chief Counsel, Finance and Administration, Legislative Affairs, Acquisition, Special Counselor, and Communications programs are wholly funded in this appropriation. Personnel funding for the Office of Human Capital and Operational Processes and Technology are also included. Approximately \$180 million in personnel costs are included in this PPA. Five Mission Support Centers (MSCs) at field locations provide specific expertise to airports in their regions. The HQ activities align with four primary functions:

Leadership: Includes \$5 million in operating expenses to develop the policy and management architecture to guide overall activities, ensure compliance with laws and regulations, develop and monitor performance metrics, and manage external relationships with Congress, the Administration, other oversight entities, and our private sector partners.

Internal Management and Controls: \$35 million in operating expenses supports the day-to-day management of an approximately \$6 billion budget and over 50,000 personnel. This includes financial management, acquisition services, asset management, and inspections. In FY05, Acquisitions expanded its oversight program to increase the use of audits and Internal Verification and Validation. Inspections (previously Internal Affairs) continued to provide covert testing of airport screening processes and aggressively pursued reductions in Workers Compensation fraud. TSA performed a pre-hiring background investigation on all TSA screeners and, once hired, a more extensive background investigation. This level of background investigations ensures reduced risks and enhances security. TSA is implementing systems to improve tracking and control of operational assets.

Workforce Support: \$26 million in operating expenses supports all aspects of sustaining approximately 50,000 employees, ensuring an excellent working climate and a safe environment

while performing TSA's mission. TSA provides an active Civil Rights program, Ombudsman program, and safety and health program. These programs ensure fair and lawful treatment of employees and the public. Activities funded include EEO education, complaint investigation and adjudication, and alternate dispute resolution. The Office of the Ombudsman serves as a liaison and source of problem resolution services for the public and TSA employees. It also serves customers requesting assistance in informally resolving complex, unique, and often-confidential problems involving TSA matters and programs and provides advice and guidance to the TSA Administrator and senior executives on TSA policy and programs. It operates the Contact Center, which responds to traveler inquiries including complaints and compliments both from internal and external customers. The Occupational Safety and Health program works to bring facilities into compliance and to reduce injuries and illness. Additionally, the requested amount will support a safety information system that will provide information for use with mishap reduction, prioritization of program needs, and providing measures for evaluating agency performance. Workforce support also seeks to develop and enhance workforce knowledge, skills and abilities to effectively meet our mission requirements.

Facilities Management and Physical Security: \$36 million in operating expenses provides facility and management for HQ, the Transportation Security Operations Center, and the Franconia Warehouse and support services within the facilities. Physical security develops, implements and maintains agency wide policies and procedures to ensure a safe work environment for TSA employees and visitors; serves as primary liaison with external law enforcement and security agencies; implements agency wide security awareness programs and policies (OPSEC); and administers the TSA Freedom of Information Act (FOIA) and Privacy Act program.

In addition to the above, Mission Support Centers (MSCs) are the central field service support mechanism for TSA across transportation modes. They provide TSA field personnel with immediate operational and technical support within designated areas. They are located in San Bruno, CA; Atlanta, GA; Troy, MI; Philadelphia, PA; and Irving, TX. \$3 million in operating expenses directly support the MSCs.

PPA: INFORMATION TECHNOLOGY (IT) CORE SUPPORT

	Perm Pos	FTE	Amount
2005 Actual	\$274,205
2006 Revised Enacted	207,991
2007 Adjustments-to-Base	2,101
2007 Current Services	210,092
2007 Program Change
2007 Request	210,092
Total Change 2006-2007	2,101

TSA requests \$210.1 million for this activity. This represents a \$2.1 million increase over FY 2006 to maintain current services.

CURRENT SERVICES PROGRAM DESCRIPTION

The \$158 million IT Core program maintains the Information Technology (IT) and telecommunications infrastructure support and services for all of the TSA and manages enterprise-wide IT managed service solutions that assist TSA in meeting mission responsibilities. Service levels are required in a number of categories of effort. The core of the IT capability is provided through a managed service contract. The managed services model offers the prospect of long-term cost efficiencies and the provision of state-of-the-art technologies for services and equipment. The Information Technology Managed Services (ITMS) program will continue to maintain the IT and telecommunications infrastructure support and services for all employees of the TSA, including:

- **Head Seats:** office automation hardware, software and services needed for the TSA workforce to perform their duties and responsibilities.
- **Program Contractor Support:** contractor support that is separate from the core ITMS program and provides desk-side Office Automation support.
- **Miscellaneous Office Automation:** additional areas required to support Office Automation Deployment and Refresh to include: Commercial Off The Shelf (COTS) Provisioning/Deployment, Government Furnished Equipment Processing, Installation Move Add Charges (IMAC), Deployment Travel, Deployment Refresh, Replacement of Lost/Stolen Equipment, Provisioning of 508 Compliant IT Equipment, and Other Direct Charge funding to purchase small dollar IT items that are not conducive to a managed service (zip drives, cables, surge protectors, CD/RW, etc.).

Time and Attendance (Kronos): This \$1.3 million project will streamline and automate the process currently utilized to support collection and data input of timecards and collection of performance metrics for the airport support staff. Current processes and available automation are legacy based, which make the continuance of the same functionally ineffective and cost prohibitive. This effort endeavors to eliminate paperwork, provide cost accounting, and provide management with the tools and resources needed to effectively evaluate cost alternatives with respect to FTE management and technological developments. In FY 2007, TSA will continue operations and maintenance of system and leverage connectivity to expand automated process.

Performance Management Information System (PMIS): PMIS is a \$5 million activity that converts data from front-line systems, from security processes, and machines, as well as from back-office systems, such as personnel and finance systems, to real-time information on the current status of the security systems to support personnel on the front lines of operations (e.g., Federal Security Directors), as well as TSA Executives.

In 2007, TSA will develop additional/redefine existing performance measures and dashboards to respond to Executives' and Federal Security Directors' needs.

e-Government Operating Platform (e-Gov OP): e-Gov OP is a \$3.3 million "toolbox" that provides a common set of tools for TSA's varied needs. Three types of tools comprise the e-Gov OP – a common data model, shared services, and enterprise-wide e-Government applications. The common data model enables TSA to store strategic data in one location, enabling agency-wide

access to consistent information. The shared services provide common capabilities that are the foundation for all of TSA's e-Government initiatives. The enterprise-wide e-Government applications are the specific systems designed to meet TSA's business needs. While each of these applications is designed to meet enterprise-wide business needs, they can also be configured for use by specific functional groups. This enterprise-wide approach is the true benefit of TSA's e-Government Operating Platform.

Personnel/Financial Management Systems: This activity funds \$42.4 million of interagency agreements with Coast Guard and the U.S. Department of Agriculture for the use of their financial management, personnel, and payroll systems. This also funds reimbursements to the Department of Homeland Security for the costs of the Working Capital Fund, related to operational support functions.

IV. Program Justification of Changes

Department of Homeland Security
Transportation Security Support
Justification of Program Changes
(Dollars in Thousands)

Program Increase 1: Procurement Staff and Internal Audit/Control Increase

Strategic Goal(s) & Objective(s): Strategic Goal 2 (Prevention) and Strategic Objective 2.5 (Strengthen the security of the Nation's transportation systems), Strategic Goal 7 (Organizational Excellence) and Strategic Objective 7.3 (Continually improve our way of doing business).

Total Request	93	73	13,830	112	112	20,865	173	142	28,647

Description of Item

This funding provides \$6.5 for million personnel costs and \$1 million in operating expenses to increase the ability to manage TSA's procurement processes. It will allow TSA to improve its internal controls and to develop a process to audit those internal controls.

Justification

DHS has identified Department-wide performance gaps in its procurement process. TSA's Office of Acquisition maintains the highest obligation rate in the Department, with one of the lowest staffing levels. There have been several benchmark studies showing the Office of Acquisition has significant staffing shortages. The generally accepted benchmark for staffing for the procurement function is "cost to spend". This metric divides the total dollars obligated by the direct manpower costs associated with the contracting function. In FY05, TSA's Office of Acquisition operated at a .348% cost to spend. The Center for Advanced Purchasing Studies (<http://www.capsresearch.org/>) is recognized as the industry expert organization regarding benchmarking for the acquisition function. Their applicable standard for the acquisition function is 2.1%.

The Department of Homeland Security (DHS) has established a standard for the contracting function of 1.2%-1.9%. The DHS Chief Procurement Officer established a staffing goal of 1.2% in FY06. During the re-organization of TSA HQ staff, internal resources were reprogrammed to

increase the ratio to 0.6% in FY06. TSA expects this requested increase to establish approximately a 0.7% ratio in FY07.

This increase also provides operating expenses to improve compliance with Public Law 108-330, *The Department of Homeland Security Financial Accountability Act*. The Act requires that the annual Performance and Accountability Report (PAR) include an assertion by the Secretary on the adequacy of internal controls that apply to financial reporting. In addition, the Act requires the Secretary to include an audit opinion over the Department's internal controls over financial reporting.

These requirements for internal control reporting and audit impose significant management challenges and resource demands on the Department and its components. To comply with the Act the Department's components must obtain contractor support to:

- provide training,
- develop internal control process analysis documentation,
- perform internal control test of design and test of operating effectiveness,
- develop significant remediation strategies for material weaknesses in internal control, and
- provide project management support for the Department's Internal Control Committee.

In compliance with DHS policy and OMB Circular A-11, TSA developed a plan for implementing EVM on contracts related to programs in Development, Modernization, or Enhancement (DME) phases. For programs that are in steady state, Operational Analysis will be used in accordance with DHS policy. EVM requirements will be assessed for each new contract award and implemented where necessary to ensure a cost effective ROI. TSA is currently developing policy and guidance and will provide EVM training to affected program offices to begin full implementation in FY06.

Impact on Performance (Relationship of Increase to Strategic Goals)

This budget increase supports a workforce level more capable of planning, negotiating, awarding, and managing business relationships. Aside from salary dollars, the majority of TSA's budget is spent through acquisition. TSA's relationships with industry are key to the overall effectiveness of the mission, especially regarding deployment of new technologies and services to strengthen transportation security. The requested funding will substantially improve TSA's internal control/audit function.

V. Exhibits and Other Supporting Materials**A. Justification of Proposed Legislative Language****Department of Homeland Security
Transportation Security Administration****Justification of Proposed Changes in Transportation Security Support Appropriation
Appropriation Language**

For necessary expenses of the Transportation Security Support Administration related to providing transportation security support and intelligence pursuant to the Aviation and Transportation Security Act (Public Law 107-71; 115 Stat. 597; 49 U.S. C. 40101 note), [\$510,483,000] ~~\$527,283,000~~ to remain available until September 30, [2007] ~~2008~~. [Provided, That of the funds appropriated under this heading, \$5,000,000 may not be obligated until the Secretary submits to the Committees on Appropriations of the Senate and the House of Representatives: (1) a plan for optimally deploying explosive detection equipment, either in-line or to replace explosive trace detection machines, at the Nation's airports on a priority basis to enhance security, reduce Transportation Security Administration staffing requirements, and reduce long-term costs; and (2) a detailed expenditure plan for explosive detection systems procurement and installations on an airport-by-airport basis for fiscal year 2006: Provided further, That these plans shall be submitted no later than 60 days from the date of enactment of this Act] (Department of Homeland Security, Appropriations Act, 2006.)

Explanation of Changes:

TSA has complied with the provisions included in previous language.

PPA Mission Statement

Provide Intelligence Analysis, Coordination, and Dissemination -- TSA will continue to provide current and strategic warning regarding threats to U.S. transportation modes and identify trends and changes in targeting. TSA intelligence unit analyzes intelligence and disseminates information through liaison with intelligence community agencies.

Summary Justification and Explanation of Changes

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Salaries and Benefits	\$9,423	\$11,456	\$11,666	\$210

Salaries and Benefits includes costs for 99 FTE in FY 2007, which represents the same level as FY 2006. The FY 2007 request includes an increase of \$210,000 for annualization of prior year funds and for the proposed FY 2007 pay raise.

	2005	2006 Revised	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$82	\$175	\$175	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request has no change.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$4,066	\$8,663	\$8,663	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request has no change.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$1	\$1	\$1	\$0

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request has no change.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$174	\$371	\$371	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request has no change.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$58	\$124	\$124	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request has no change.

BUDGET REQUEST AND SUPPORTING INFORMATION**Transportation Security Administration**
Federal Air Marshal Service Appropriation**I. Appropriation Overview****A. Mission:**

The FAMS mission is to promote confidence in our Nation's civil aviation system through the effective deployment of Federal Air Marshals, to detect, deter, and defeat hostile acts targeting U.S. air carriers, airports, passengers, and crews. To do so, the Service works in close coordination with its partners in federal, state, local and international law enforcement, utilizing a strategic, intelligence-driven approach for conducting domestic and international mission operations, maintaining domain awareness, and safeguarding the American public from the threat of terrorist or criminal activities.

B. Budget Activities:**Management and Administration (M&A)**

The FAMS' mission demands a host of critical planning, operational and support programs to protect the public from the threat of a terrorist attack or other criminal activity. The FAMS' M&A programs encompass vital enforcement, information management, and infrastructure components to include Joint Terrorism Task Force (JTTF) participation and investigations, a sophisticated flight/mission scheduling and notification system, workforce services, command and control, information management and other critical infrastructure requirements.

Travel and Training (T&T):

In order to maintain optimum readiness and perform its primary operational functions, the FAMS requires extensive training and mission travel capabilities. Federal Air Marshals must undergo continuous training to maintain and expand their expertise in the full range of skills necessary to operate within the aviation domain, to include specialized tactics, enforcement, surveillance detection, and other skill sets. Furthermore, the FAMS' mission travel activities are an integral component of the FAMS' mission in safeguarding air carriers, airports and the aviation domain.

C. Budget Request Summary:

The Transportation Security Administration requests \$699,294,000 in FY 2007. The total adjustments-to-base is \$19,956,000. The program will be maintained at current services.

III. Current Services Program Description by PPA

Department of Homeland Security
Transportation Security Administration
Federal Air Marshal Service
Program Performance Justification
(Dollars in thousands)

PPA: MANAGEMENT AND ADMINISTRATION

	Perm Pos	FTE	Amount
2005 Actual	\$604,096
2006 Revised Enacted	\$607,266
2007 Adjustments-to-Base	21,228
2007 Current Services	628,494
2007 Program Change
2007 Request	628,494
Total Change 2006-2007			21,228

The Transportation Security Administration requests \$628.5 million for this activity. This is an increase of \$21.2 million over FY 2006 to maintain current services.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Management & Administration (M&A) program funds the FAMS' payroll costs and supports operational and infrastructure requirements with the exception of training and travel costs.

Of the total funds allocated, over 80 percent of M&A will be dedicated to meeting workforce sustainment/compensation requirements. FAMS' personnel are arrayed throughout the country and provide the manpower necessary to perform the Service's full range of operations. The remaining balance of the M&A supports the continuing development and maintenance of the FAMS infrastructure, internal processes and strategic systems that enable Federal Air Marshals to seamlessly perform the integrated set of functions that make up their mission. Examples of costs include the following:

- Mission Scheduling and Notification System (MSNS), an automated interface between the FAMS and U.S. air carriers that facilitates the planning, scheduling, and deployment of all Federal Air Marshals on commercial flights. The system is based on the widely used Sabre Aircrews and Reservations Systems that incorporates a risk-based process that selects missions from over 25,000 U.S. commercial airline flights each day to deploy the thousands of Federal Air Marshals worldwide.
- Explosives Unit (EU), an expert, rapidly deployable, national level resource to conduct all aspects of explosives security. EU activities include countermeasures development, intelligence analysis, testing/evaluation of explosives effects and detection systems, explosives incident management, technical support to other DHS security personnel, post-blast and other investigations where a bombing is suspected, least-risk bomb location assistance to pilots and Federal Air Marshals with suspected

explosive devices in flight, explosives security surveys, and technical security assistance and training involving explosives and weapons.

- Human Resources Services/Recruitment Initiatives include recruitment/hiring and retention services (background investigations, security clearances, medical exams/physicals, drug tests).
- Information Technology requirements (equipment, software, licenses).
- Facility Leases for the Systems Operations Control Division (SOCD), which both maintains Domain Awareness for the FAMS, and incorporates that awareness into a mission logistics process that provides for the effective deployment of Federal Air Marshals; FAMS Headquarters facilities in Reston, VA, and Atlantic City, NJ; and twenty-one domestic field offices.
- Program Support Services and requirements such as interagency agreements, vehicle leasing, shipment of goods, utilities/communications, janitorial services, supplies, duty equipment, printing, physical security, and maintenance.

In FY 2007, the FAMS intends to continue coverage of the highest priority security risks through an array of enforcement, surveillance detection and associated activities within the aviation domain. The FAMS will also seek to further develop coordination mechanisms through technical solutions and ongoing partnerships with the public, private and international sectors.

PPA: TRAVEL AND TRAINING

	Perm Pos	FTE	Amount
2005 Actual	\$65,832
2006 Revised Enacted	70,092
2007 Adjustments-to-Base	708
2007 Current Services	70,800
2007 Program Change
2007 Request	70,800
Total Change 2006-2007			708

The Transportation Security Administration requests \$70.8 million for this activity. This is an increase of \$0.7 million over FY 2006 to maintain current services.

CURRENT SERVICES PROGRAM DESCRIPTION:

The T&T program supports the FAMS' requirements for travel and travel-associated costs and training.

Travel: The T&T program supports the FAMS' requirements for:

- Mission Travel critical to the Federal Air Marshals' ability to perform international and domestic flight coverage. These resources fund per diem and lodging expenses and associated costs such as airport parking and automated travel account services. The funds provide Federal Air Marshals with the necessary mobility and flexibility to perform their jobs.
- Other FAMS travel required for non-mission and training purposes.

Training: The balance of T&T funds support the FAMS training programs as follows:

- Federal Air Marshal Training: The FAMS' training regimen equips its workforce with the law enforcement expertise and skills to handle emerging threats to aviation both professionally and expeditiously. Upon entry to the program, Federal Air Marshals undergo an intensive 15-week training program conducted by the Federal Law Enforcement Training Center (FLETC) in Artesia, New Mexico and the FAMS Training Center located in Atlantic City, New Jersey. The T&T program provides for all associated training requirements such as FLETC costs, instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional and training gear, equipment and clothing. Once assigned to a field office, Federal Air Marshals undergo recurrent training to maintain their skills to meet law enforcement requirements and firearms certification levels.
- Professional/Technical Training: The T&T program also provides required professional training for FAMS technical professionals and support staff. Examples of Professional /Technical training include mandated annual explosives technical training for re-qualification and re-certification, mandated annual contracts/warrant officer training, mandated FAMS Instructor training, leadership/management training, and professional/career development courses.

PPA: AIR TO GROUND COMMUNICATIONS SYSTEM (AGCS)

	Perm Pos	FTE	Amount

Mission Statement

The Management and Administration (M&A) PPA funds the FAMS's staffing/payroll requirements to include salary/compensation, benefits, awards, overtime, etc. In addition, M&A funds critical administrative and operational requirements to include the FAMS' mission scheduling system and information technology requirements, rent, wireless communications systems and explosives unit operations; recruitment/hiring and retention services (background investigations, security clearances, medical exams/physicals, drug tests); and a host of program support services and requirements (interagency agreements, vehicle leasing, shipment of goods, utilities/communications, janitorial services, supplies, duty equipment, printing, physical security, etc.)

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Salaries and Benefits	\$529,929	\$540,506	\$559,924	\$19,418

The FY 2007 request includes an increases of \$19,418,000 for the annualization of prior year funds and for the proposed FY 2007 pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$2	\$0	\$0	\$0

The Management and Administration (M&A) PPA does not contain any travel funds. All FAMS travel-related resources are contained within the Training and Travel (T&T) PPA.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$1,873	\$1,959	\$2,012	\$53

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FAMS uses this object class series for central billing for shipment of goods between Headquarters and Field Offices and GSA vehicle leasing. The FY 2007 request includes an increase of \$53,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
GSA rent	\$2,182	\$0	\$0	\$0

When FAMS initial leased space was acquired, the Service utilized the Acquisition Management System, (AMS). As such, GSA rent costs are limited (see Other Rent below).

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Rent	\$11,789	\$11,106	\$11,407	\$301

Other rent includes all payments to a non-Federal source for rental space, land, and structures. All of the FAMS' commercial office leases for Headquarters and field offices are included in this category. The FY 2007 request includes an increase of \$301,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$8,559	\$10,896	\$11,191	\$295

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FAMS uses this object class series for PDA and cell phone air time and general office utilities such as metered gas, electric, water usage, etc. The FY 2007 request includes an increase of \$295,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Printing	\$1	\$10	\$10	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The majority of costs are for promotional/public relations materials.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$13,577	\$16,685	\$17,137	\$452

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. Services included in this section include IT Support for the entire FAMS; Mission Scheduling support; and interagency agreements with FAA, TSA and Coast Guard for program and financial services. The FY 2007 request includes an increase of \$452,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$13,137	\$12,994	\$13,346	\$352

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25. The FAMS uses this series for additional support for the Mission Scheduling system, support services for other elements (including the personnel system and contractors supporting the contracting/procurement efforts) within the Service and meeting OSHA requirements. The FY 2007 request includes an increase of \$352,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$1,708	\$2,365	\$2,429	\$64

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. For the FAMS, this includes facility maintenance support from the FAA, office equipment maintenance (new object class of 2538) and security clearances. The FY 2007 request includes an increase of \$64,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & maintenance of facilities	\$642	\$850	\$873	\$23

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FAMS uses this series for custodial services and facility buildouts/enhancements of current leases. There is a \$23K increase to fund expected cost inflation. The FY 2007 request includes an increase of \$23,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Medical Care	\$696	\$2,741	\$2,815	\$74

Medical care includes payments to contracts for medical services, but excludes federal employees who are reportable under OPM regulations as federal employees. The FAMS uses this series for a contract with Federal Occupational Health (FOH). The FY 2007 request includes an increase of \$74,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$119	\$26	\$27	\$1

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. During the transition to the new FAMS' accounting system, one of the major object classes for O&M was moved to 2538. The remaining funds here are used primarily for O&M of vehicles, security equipment and IT equipment. The FY 2007 request includes an increase of \$1,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Subsistence & Support of Persons	\$4	\$0	\$0	\$0

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. This would be used by the FAMS only for full PCS moves. Currently, the FAMS plans on doing only flat-rate moves.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$1,387	\$2,055	\$2,111	\$56

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property. The FAMS uses this series for IT supplies and materials, office supplies, fuel and duty ammunition. The FY 2007 request includes an increase of \$56,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$18,421	\$5,072	\$5,210	\$138

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. Included in this total are costs for IT equipment and software, furniture and other office equipment. The FY 2007 request includes an increase of \$138,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Indemnity	\$70	\$1	\$1	\$0

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FAMS anticipates minimal claims against the Service. If a claim is incurred, it will be dealt with as a budget execution issue (i.e. redistribute funds from another object class).

Mission Statement

The Travel and Training (T&T) PPA is used to cover all travel and training requirements that support the FAMS program. The primary components of T&T are as follows.

Travel - Supports the FAMS' requirements for mission travel (per diem, lodging) and associated costs, such as airport parking and automated travel account services. Mission travel resources are essential to the Federal Air Marshals' ability to perform scheduled flight coverage on both the domestic and international operations. These provide the FAMS the necessary mobility and flexibility to perform their enforcement and counterterrorism missions. T&T funds also support other FAMS travel required for non-mission and training purposes.

Training - T&T also supports the FAMS' comprehensive training requirements to include Phase I (basic) and Phase II (operational/tactical) training of new Federal Air Marshals and all recurrent training. This PPA also provides funding for all associated training requirements, such as Federal Law Enforcement Training Center (FLETC) costs, training-related ammunition, Phase II instructor contracts, hotel lodging contracts for Atlantic City classes, training supplies, firing range fees, professional & training gear, equipment and clothing. The T&T PPA also supports the required professional training for FAMS explosives technicians and for other professional development and career training as required.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Travel	\$53,862	\$53,989	\$54,535	\$546

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The bulk of these costs directly support Federal Air Marshal domestic and international mission travel, which is the primary mission of the Service. Also included in this object class are travel costs related to training, conference attendance and site visits. The FY 2007 request includes an increase of \$546,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Transportation of Things	\$8	\$10	\$10	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Under this PPA (T&T), costs are associated specifically with transportation of things related to Training (e.g. shipment of equipment from vendors to field offices).

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Rent	\$514	\$498	\$503	\$5

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The T&T PPA covers airport parking lot rental (to support mission travel operations) and other rent associated specifically with meeting the Service's training requirements. All other rent is funded through the FAMS' M&A PPA. The FY 2007 request includes an increase of \$5,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Communication, Utilities, and miscellaneous charges	\$83	\$0	\$0	\$0

The T&T PPA does not cover communications requirements. The FAMS' M&A PPA is the designated funding unit for meeting these requirements.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$1,912	\$498	\$503	\$5

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. FAMS Phase II Instructor contract costs are included in the object class. The FY 2007 request includes an increase of \$5,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Other Services	\$1,069	\$8,942	\$9,032	\$90

Other services include contractual services with non-Federal and Federal sources that are not otherwise classified under Object Class 25. The FAMS uses this object class series for FLETC costs, hotel lodging contracts for Phase II training and field offices recurring range fees for Federal Air Marshals' quarterly requalifications. The FY 2007 request includes an increase of \$90,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Purchase from Government Accounts	\$96	\$83	\$84	\$1

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified and include costs associated with maintenance and repair of the Atlantic City training facility. The FY 2007 request includes an increase of \$1,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Operation & maintenance of facilities	\$8	\$0	\$0	\$0

Operation and maintenance of facilities requirements includes custodial services and video communications.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Medical Care	\$711	\$737	\$744	\$7

This object class series includes both medical care and short-term training requirements. Two training object classes (256D and 256f) were created with the conversion to the new FAMS accounting system. Therefore, short-term non-government and interagency training requirements, such as professional career development, management development courses and training certification classes for instructor, are covered in the OC series. The FY 2007 request includes an increase of \$7,000 in base adjustments.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$3,537	\$4,682	\$4,729	\$47

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FAMS uses this object class series for medical supplies, training ammunition, armory supplies and training supplies. The FY 2007 request includes an increase of \$47,000 in base adjustments.

873

	2005 Actual	2006 Revised Enacted	2007 Request	2006 - 2007 Change
Equipment	\$4,032	\$653	\$660	\$7

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FAMS uses this object class series for medical and training equipment, primarily field office gym equipment used by Federal Air Marshals to meet and maintain the physical fitness requirements. The FY 2007 request includes an increase of \$7,000 in base adjustments.

I. STRATEGIC CONTEXT FOR THE FY 2007 BUDGET

A. Mission and Description of the Transportation Security Administration

The Transportation Security Administration protects the Nation's transportation systems to ensure freedom of movement for people and commerce.

In response to the September 11, 2001 terrorist attacks in the United States and with the potential for future attacks in this country, Congress enacted the Aviation and Transportation Security Act (ATSA) on November 19, 2001. The ATSA established the Transportation Security Administration (TSA) to protect the transportation system and ensure the freedom of movement for people and commerce. The TSA challenge is to fulfill its mission in a constantly changing threat environment, as terrorists and other criminals continue to probe transportation systems for vulnerabilities.

Post 9/11, TSA has made significant progress to strengthen security for all modes of transportation. Supported by a dedicated workforce, TSA has implemented multiple ambitious undertakings, including deploying over 45,000 Transportation Security Officers (TSOs), formerly known as screeners, responsible for passenger and baggage security at over 449 airports, a cadre of Federal Air Marshals, hundreds of air cargo and rail inspectors, and 420 canine teams. To meet the statutory requirement of screening 100 percent of passenger and check baggage, TSA installed over 1,400 explosives detection systems, 1,850 advanced checkpoint x-ray devices, 1,800 enhanced metal detectors, and an estimated 7,263 explosives trace detection devices at these airports. Also, 59 explosives trace portal machines have been installed at checkpoints in 25 airports to detect the presence of explosives on individuals. In addition, The Federal Flight Deck Office (FFDO) program has been successful in deputizing thousands of airline pilots flying tens of thousands of mission legs each month throughout the nation. These pilots have received training in firearms proficiency, self-defense tactics, authorities, and decision making to defend the cockpit.

To enhance performance and create better alignment with the Second Stage Review of the Department of Homeland Security (DHS), TSA is in the final phases of restructuring itself. The restructuring will put a focus on communications and mobility in deploying the organization's limited resources to better address vulnerabilities and threats. Restructuring the organization to operate with randomness using a flexible, risk-based workforce will allow TSA to better control its domain and protect the transportation network. The restructuring empowers a motivated workforce where senior leadership sets policy and decision-making as far down in the organization as possible. Operationally, there are four key offices: 1) Security Operations; 2) Transportation Sector Network Management (TSNM); 3) Law Enforcement/Federal Air Marshal Service; and 4) Operational Process and Technology. The new TSNM organization is fairly unique in the Federal government. It will communicate and work closely with stakeholders on specific transportation security issues, including the development of security plans.

TSA's security strategy based on the following four operating principles:

1. TSA will use risk/value analysis to make investment and operation decisions. TSA will assess risks based on threat and vulnerability, including to people, transportation assets, and the economy.

2. TSA will incorporate unpredictability into its procedures so that terrorists cannot use the predictability of security measures to their advantage in planning or carrying out a threat.
3. TSA will apply intelligence and focus its security measures on the terrorists and the means for carrying out the threat by enhancing techniques to identify terrorists, detecting explosive devices at TSO checkpoints, and gathering and disseminating timely intelligence.
4. TSA will build partnerships across all levels of government (e.g., Federal, state, and local) to enhance security. Our new organizational structure of TSA places renewed emphasis on building information sharing networks in every transportation sector.

B. Major Activities and Key Strategic Issues

TSA received \$6.2 billion in gross budget authority FY 2006 to protect the Nation's aviation, transit, railway, highways and pipeline systems. The nation's transportation systems are inherently "open" environments, designed to move people and commerce quickly to their destinations. Given this environment, TSA is using its budget to establish the best possible security strategies, while maintaining quick and easy access for passengers and cargo. FY 2006 funds are being used to support the following five major TSA program activities/appropriations.

Major Activities (Appropriations):

Aviation Security program allowed TSA to ensure the safety of the traveling public in secure airport terminals and aboard aircraft during FY 2005. In FY 2006, TSA will strive to maintain an acceptable level of public confidence and satisfaction with the security of the aviation system. In FY 2007, TSA will secure the transportation system by use of air cargo and airport/airline regulation compliance inspections, leading edge technology, K-9 units, and reimbursements provided to state and local law enforcement for support provided at commercial airport checkpoints.

Federal Air Marshals Service (FAMS) supports the ongoing necessity to provide qualified Federal Air Marshals to assist in the protection of the transportation system. While providing air security on thousands of flights, the FAMS Mission Scheduling System and the capabilities of the Surveillance Detection System (SDS) were enhanced during FY 2005. During FY 2006, the FAMS will fulfill its mission while continuing to implement and maintain enhancements to its various support systems. In FY 2007, FAMS will provide superior security to the transportation system. They will also continue the development and maintenance of their infrastructure, internal processes and strategic systems that enable the Service to seamlessly perform its integrated set of mission functions.

Surface Transportation Security efforts include resources for TSA's security operations in all non-aviation modes of transportation. In FY 2005, TSA participated in Transit Watch, Security Roundtable conferences, and Connecting Communities Emergency Response and Preparedness training workshops. During FY 2006, TSA will conduct inspections to monitor and enforce compliance with standards and regulations. In FY 2007, TSA and its partners will develop best practices, standards, and regulations to protect the transportation infrastructure. In addition, continued inspections monitoring and enforcing compliance with standards and regulations will occur, along with designing and implementing vulnerability assessment models for all surface transportation modes.

Transportation Threat Assessment and Credentialing provided centralized vetting capability services during FY 2005 for Alien Flight Schools, commercial aviation crew members and personnel, Hazardous Material Commercial Driver's License, and some general aviation operators. During FY 2006, into and through FY 2007, TSA will enhance its vetting operations and system

upgrades for Secure Flight, Crew Vetting, Hazardous Material Commercial Driver's License, Transportation Worker Identification Credentials, Domestic Registered Traveler, and Alien Flight School programs.

Transportation Security Support supports the operational needs of TSA's extensive airport/field personnel and infrastructure. During FY 2005, TSA provided front-line service delivery with well-trained managers to its field components. A recent organizational restructuring will cause enhanced delivery of service during FY 2006. In FY 2007, TSA will develop and implement updated policies and security directives, where appropriate, along with the provision of timely and robust support to TSA's operational units.

Key Strategic Issues:

TSA will continue to work with Congress, OMB, DHS and other stakeholders to identify overlaps and intersections between transportation modes to determine effective ways to utilize resources and share best practices. To meet the security needs across the transportation sector, TSA will address certain key strategic issues.

STRATEGIC ISSUE 1: Predictability

Due to the ever-evolving threat to commercial aviation, TSA will vary its screening procedures to more screenings of passengers and their bags using a variety of random methods. It is paramount to the security of the aviation system that terrorists do not know, with certainty, what screening procedures they will encounter at airports around the nation. By incorporating unpredictability into procedures and eliminating low-threat items, TSA can better focus its efforts on stopping individuals that wish to disrupt or do harm to the transportation sector.

STRATEGIC ISSUE 2: Keeping Pace With Emerging and Changing Threats

This issue encompasses TSA's concentric four rings of security – securing infrastructure perimeter; enforcing security and surveillance detection; screening passengers, baggage and cargo; and securing assets. Common to each ring of defense is TSA's reliance on its personnel and technology.

Personnel

TSA's aviation workforce is comprised of federalized TSOs who make up an integral front line for aviation security. Similarly, in the rail, mass transit and highway modes, TSA personnel are critical to security efforts as well by conducting risk assessments, identifying vulnerabilities and implementing countermeasures.

Technology

Technology plays a critical role in enabling TSA to achieve its mission. TSA must be able to support its security and information technology (IT) needs to purchase, deploy, and maintain security screening equipment, IT connectivity, automation services, and applications. As TSA moves further into the future, emerging technology will continue to play a significant role in the security of all modes of transportation and communications with transportation stakeholders. In addition, TSA must ensure that the necessary systems are in place to manage its business in real time, communicate vital intelligence information with the appropriate transportation stakeholders, and coordinate seamlessly between TSA headquarters and field offices, other Federal agencies, state and local governments and the private sector. With secure systems in place, officials will be able to expedite the flow of vital intelligence information and facilitate interactions more effectively.

STRATEGIC ISSUE 3: Sharing / Using Information and Intelligence

TSA is responsible for protecting the nation's vastly complex transportation system against terrorist groups which hold the advantage of being able to choose from an almost infinite number of targets and attack methods. To effectively use its resources, TSA is leveraging intelligence, analyzing threats, and is helping to manage risks to: 1) prioritize transportation security efforts and protective programs; 2) pioneer innovative analytics; and 3) smoothly transform the flow of intelligence into effective countermeasures and actions.

To monitor terrorist threat, TSA continuously reviews intelligence reports, tests existing protective programs, and develops intellectual capital on threat scenarios through analysis. Although TSA has made significant progress, it must continue to implement programs based on threats and streamline the flow of intelligence information from Federal, state, local, and private sector sources so that DHS has an accurate picture of potential threats.

C. Resources Requested and Performance Impact***Aviation Security***

TSA requests \$4.7 billion for the Aviation Security appropriation in FY 2007. These funds will support the current federalized and privatized workforce, provide sufficient training and other support for both passenger and baggage screening, and continue other critical aviation security regulation and enforcement activities. Critical increases are requested for the HR services to improve workforce retention rates and enhance checkpoint explosive detection technology. An additional \$250 million will be provided by the Aviation Security Capital Fund for EDS installations.

Federal Air Marshal Service

TSA request \$699.3 million to support this program. The funds support the recruitment and deployment of qualified Federal Air Marshals, while ensuring they are properly trained, equipped, and assisted to meet the mission of protecting the Nation's transportation system.

Surface Transportation Security

The budget requests \$37.2 million for the Surface Transportation Security appropriation in FY 2007. These funds will maintain TSA's various surface transportation security initiatives, including the surface transportation inspectors added in FY 2005.

Transportation Threat Assessment and Credentialing (TTAC)

TSA requests \$130.8 million in funding for TTAC program, which includes a request for \$54.7M in appropriated funds to support the implementation and continuation of initiatives under the Secure Flight and Crew Vetting programs as well as implementation and start-up costs for other credentialing programs. TSA also requests the authority to spend a total of \$76.1 million in fees collected through the Domestic Registered Traveler program, the Transportation Worker Identification Credential, the HAZMAT Truck Driver Certification program, and the Alien Flight Student program.

Transportation Security Support

TSA requests \$527.3 million for the Transportation Security Support appropriation. These funds will ensure that TSA's TSOs and other operational employees have sufficient intelligence information, information technology, management direction, administrative services, and other key support to accomplish the agency's mission. TSA will continue to seek opportunities to increase efficiencies in these programs through innovative approaches and improved management.

PART Reviews

TSA continues to use the process associated with OMB's Program Assessment Rating Tool (PART) to enhance our ability to make informed budget decisions, support the management of programs, identify potential issues, and measure and track performance. TSA is committed to the PART process and effective and efficient operations.

OMB PART Recommendations	TSA Actions
<p>FY 2005 <i>Aviation Passenger Screening Program</i> 1. Solicit an independent evaluation of the Passenger Screener Performance and Passenger Screening System performance measures. 2. Request a study by an independent entity to determine the optimal mix of part-and full-time employees for passenger and baggage security screening functions.</p>	<p><i>Aviation Passenger Screening Program</i> 1. TSA reviews determined report the component parts of the indices separately. Thus, plans for the independent review are no longer needed. 2. In CY 2004, TSA completed an analysis based on the US Commercial Aviation Partnership (USCAP) model to find the optimal mix of part-and full-time employees for passenger and baggage security.</p>
<p>FY 2006 <i>Screener Workforce</i> 1. Improve the screener workforce through implementation of advanced training programs and incentive programs to improve recruitment efforts and reduce attrition by the third quarter of FY 2006. 2. Develop performance targets for new performance measures by the second quarter of FY 2006. 3. Conduct a Screener Summit and bring various levels of screeners to address workforce performance needs and obtain feedback.</p> <p><i>Screener Training</i> 1. Ensure all airports are able to conduct on-line training by the third quarter of FY 2006. 2. Train all screeners on Improvised Explosive Device (IED) detection by the end of fiscal year 2006. 3. Take action, as appropriate, on 100% of DHS Inspector General or General Accountability Office recommendations by the end of FY 2006. 4. Assess remedial training standards and update as appropriate by FY 2007.</p> <p><i>Baggage Screening Technology</i> 1. Procure and deploy approximately 125 Next Generation EDS machines by 2007. 2. Develop and implement performance targets for the new performance measures. 3. Complete a comprehensive capital plan that addresses long term system performance needs.</p> <p><i>Passenger Screening Technology</i> 1. Purchase sufficient explosive trace portals to achieve one unit per four lanes of screener checkpoints at the Category X and I airports by FY 2007. 2. Develop and implement performance targets for the new performance measures by the second quarter of FY 2006. 3. Complete a comprehensive capital plan that addresses long term system performance needs by the third quarter of FY 2006.</p>	<p><i>Screener Workforce</i> 1. TSA is improving the screener workforce through two new programs that will realign funding of base resources. 2. Measures and targets are being developed in this program. 3. A final report with recommendations will be submitted by the second quarter of FY 2006.</p> <p><i>Screener Training</i> 1. TSA will support program improvements, primarily via TSA's Online Learning Center (OLC). 2. TSA will: a. Require all instructors to complete On the Job Training (OJT); b. Continue the development of evaluations; c. Develop Threat Image Projection (TIP) user adaptability features to maximize TIP training benefits; d. Expedite TRX connectivity; and e. Ensure screener certification on the specific make and model of ETD and EDS machines they operate. 3. Measures have been modified per GAO and IG recommendations. 4. Appropriate steps toward this goal will be taken in FY 2006.</p> <p><i>Baggage Screening Technology</i> 1. Funding is in the budget and has been allocated as required. 2. Measures and targets have been developed and reported on in FYHSP. 3. TSA has developed a business plan, and Strategic Plan and Quality Management System to address performance measurement deficiencies.</p> <p><i>Passenger Screening Technology</i> 1. Funding has been placed in the budget and has been allocated as required. 2. Measures and targets have been developed in this program and reported on in FYHSP. 3. TSA has developed a business plan, and Strategic Plan and Quality Management System to address system performance improvements.</p>
<p>FY 2007 <i>Aviation Regulation and Enforcement</i> 1. Develop and implement performance targets for the new performance measures by the second quarter of FY 2006. 2. Complete a comprehensive capital plan that addresses long term system performance needs by the third quarter of FY 2006. 3. By FY 2007, develop baselines and ambitious targets for the annual measures. 4. Develop a long-term outcome oriented performance measure that measures risk reduced as a result of implementing program objectives. This goal will be included in the FY 2008 Budget.</p> <p><i>Air Cargo Security</i> 1. Deploy the Freight Assessment System to improve gap analyses and risk/vulnerability assessments. Complete the pilot by the middle of calendar year in 2006 and full deployment beginning in FY 2007 and completing in FY 2008. 2. Develop a long-term outcome oriented performance measure that measures risk reduced as a result of implementing program objectives. This goal will be included in the FY 2008 Budget. 3. By the end of FY 2006, TSA will develop and deploy a pay-for-performance system to hold federal managers accountable for cost,</p>	<p><i>Aviation Regulation and Enforcement</i> 1. Measures and targets are currently being developed in this program. 2. TSA has developed a business plan, and Strategic Plan and Quality Management System to address system performance improvements. 3. Some of the measures seen in this program have already reported baseline numbers. Upon receiving actuals for FY 2006, TSA will create targets for outlying years, for those targets that have not already been established. 4. TSA has developed long term outcome measures for major programs. These risks based long term outcome measures are being reviewing towards meeting the timeline.</p> <p><i>Air Cargo Security</i> 1. TSA cancelled the pilot program for Freight Assessment System (FAS) and will go forward with the project using a different strategy. The new approach will provide measurable outputs immediately once data is available. 2. TSA has developed long term outcome measures for major programs. These risks based long term outcome measures are being reviewed towards meeting the timeline incorporating the FY 2006 Air Cargo Security. 3. TSA is creating a pay-for-performance system, which will hold</p>

<p>schedule, and performance results.</p> <p><i>Flight Crew Training</i></p> <p>1. By FY 2007, develop a plan to systematically review current regulations to ensure consistency among all regulations in accomplishing program goals.</p> <p>2. By FY 2007, develop an independent evaluation process to ensure programs are comprehensively reviewed on a regular basis.</p> <p>3. Develop a long-term outcome oriented performance measure that measures risk reduced as a result of implementing program objectives. This goal will be included in the FY 2008 Budget.</p> <p>4. By FY 2007, develop baselines and ambitious targets for the annual measures.</p> <p>5. By the end of FY 2006, TSA will develop and deploy a pay-for-performance system to hold federal managers accountable for cost, schedule, and performance results.</p>	<p>federal managers accountable for cost, schedule and performance results. It is tentatively scheduled to be implemented on April 1, 2006.</p> <p><i>Flight Crew Training</i></p> <p>1. TSA will begin developing a plan of review of current and anticipated regulations to ensure consistency between them and with their objectives.</p> <p>2. TSA will develop an independent evaluation process to ensure programs are regularly reviewed.</p> <p>3. TSA has developed long term outcome measures for major programs. These risks based long term outcome measures are being reviewed towards meeting the timeline incorporating the FY06 Flight Crew Training PART with a view towards meeting the timeline and providing at least one long-term outcome measure.</p> <p>4. Some of the measures, seen in the program, have already reported baseline numbers. Upon receiving actuals for FY 2006, TSA will trend the data and create targets for outlying years, for those targets that have not already been established.</p> <p>5. TSA is creating a pay-for-performance system, which will hold federal managers accountable for cost, schedule and performance results. It is tentatively scheduled to be implemented on April 1, 2006.</p>

D. How TSA Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives

The following list of TSA programs with performance goals are followed by the DHS strategic objective or objectives they support.

Aviation Security Performance Goal - Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved passenger and baggage screening processes.

Strategic Objective 2.3: Provide operational end users with the technology and capabilities to detect and prevent terrorist attacks, means of terrorism and other illegal activities.

Strategic Objective 2.5: Strengthen the security of the Nation's transportation system

Strategic Objective 3.1: Protect the public from acts of terrorism and other illegal activities.

Federal Air Marshal Service Performance Goal - To promote confidence in our nation's civil aviation system through the effective deployment of Federal Air Marshals to detect, deter, and defeat hostile acts targeting U.S. air carriers, airports, passengers, and crews.

Strategic Objective 2.5: Strengthen the security of the Nation's transportation system.

Strategic Objective 3.1: Protect the public from acts of terrorism and other illegal activities.

Surface Transportation Security Performance Goal - Reduce the probability of a successful terrorist or other criminal attack on surface transportation systems through the issuing of standards, compliance inspections, and vulnerability assessments.

Strategic Objective 1.2: Identify and assess the vulnerability of critical infrastructure and key assets.

Strategic Objective 2.5: Strengthen the security of the Nation's transportation system

Transportation Threat Assessment and Credentialing Performance Goal - Reduce the probability of a successful terrorist or other criminal attack to the transportation system through application of the threat assessment methodologies utilized by TTAC that are intended to identify known or suspected terrorist threats working or seeking to access the Nation's transportation system.

Strategic Objective 1.3: Provide timely, actionable, accurate, and relevant information based on intelligence analysis and vulnerability assessments to homeland security partners, including the public.

Strategic Objective 2.5: Strengthen the security of the Nation's transportation system.

Transportation Security Support Performance Goal - 100% of distribution of sensitive threat information relative to DHS/TSA components, field elements and stakeholders.

Strategic Objective 1.1: Gather, fuse, and analyze all terrorism and threat related intelligence.
Strategic Objective 2.5: Strengthen the security of the Nation's transportation system.

E. Performance Based Budget Highlights by Program

Performance Goal: Reduce the probability of a successful terrorist or other criminal attack to the air transportation system by improved passenger and baggage screening processes.						
Measure	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
Measure: Percent of the nationally critical aviation transportation assets or systems that have been assessed during the fiscal year and have mitigation strategies in place to reduce risk. (One-third of assets every year to meet requirement of conducting assessments every three years)	Target	N/A	N/A	33%	33%	33%
	Actual	N/A	N/A	55%		
Measure: Level of the Customer Satisfaction Index (CSI-A) for Aviation Operations.	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	Baseline	80 (+/- 5%)	81 (+/- 5%)	82 (+/- 5%)
	Actual	N/A	79	78		
Measure: Passenger screening covert test results (percent of screeners correctly identifying and resolving.)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Classified	Classified	Classified
	Actual	N/A	N/A	Classified		
Measure: Baggage screening covert test results (percent of screeners correctly identifying and resolving.)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Classified	Classified	Classified
	Actual	N/A	N/A	Classified		
Measure: Cost Per Person Screened – PART FY 2006 (Screener Workforce)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	Under Development	Under Development
	Actual	N/A	N/A	\$2.47		
Measure: Percentage of screeners scoring above the national standard level of Threat Image Projection (TIP) performance – PART FY 2006 (Screener Workforce)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	Classified	Classified	Classified	Classified
	Actual	N/A	Classified	Classified		
Measure: Cost per bag screened – PART FY 2006 (Screener Workforce)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	Under Development	Under Development
	Actual	N/A	N/A	\$3.44		
Measure: Level of training course evaluation performance – PART FY 2006 (Screener Training)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	0	4.6	4.64
	Actual	N/A	N/A	4.65		
Measure: Level of training programs and projects within 10% of program plan – PART FY 2006 (Screener Training)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	73.00%	84.00%	90.00%
	Actual	N/A	N/A	72.00%		
Measure: Percent of screeners scoring 85% or greater on annual performance recertification on first attempt – PART FY 2006 (Screener Training)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	78.80%	86.20%	91.00%
	Actual	N/A	N/A	48.67%		
Measure: Level of passenger screening machine efficiency – PART FY 2006 (Screening Technology, PAX)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	Under Development	Under Development
	Actual	N/A	N/A	\$0.04		
Measure: Passenger Machine Effectiveness – PART FY 2006 (Screening Technology, PAX)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	Classified	Classified	Classified	Classified	Classified
	Actual	Classified	Classified	Classified		
Measure: Baggage Screening level of machine effectiveness – PART FY 2006 (Screening Technology, BAG)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	Classified	Classified	Classified	Classified	Classified
	Actual	Classified	Classified	Classified		

Measure: Level of baggage screening machine efficiency – PART FY 2006 (Screening Technology, BAG)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	Under Development	Under Development
	Actual	N/A	N/A	\$0.22		
Measure: Average number of days holding time before dogs enter into formal training – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	135	120
	Actual	N/A	N/A	184		
Measure: Average number of domestic inspections conducted per inspector – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	Baseline	47	102	102
	Actual	N/A	45	97		
Measure: Average number of international inspections conducted annually per inspector – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	7.00	8.00
	Actual	N/A	N/A	8.13		
Measure: Number of inspections conducted domestically by TSA – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	109,909	109,900
	Actual	N/A	N/A	104,671		
Measure: Number of qualified participants (aviation and mass transit) that have executed Cooperative Agreement for TSA-certified explosives detection canine teams – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	Baseline	82	92	102
	Actual	N/A	64	66		
Measure: Percent of airports' costs of providing law enforcement presence offset by reimbursement provided to airports through the reimbursable agreement – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	85.00%	83.00%
	Actual	N/A	N/A	88.00%		
Measure: Percent of the 98 countries with Last-Point-of-Departure (LPD) service to the US provided aviation security assistance at national (e.g., Civil Aviation Security Program) or airport level (e.g. Threat Intelligence Daily) – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	100.00%	100.00%
	Actual	N/A	N/A	100.00%		
Measure: Percentage compliance with leading security indicators (air carriers) – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	N/A	Baseline	Under Development
	Actual	N/A	N/A	N/A		
Measure: Percentage compliance with leading security indicators (airports) – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	N/A	Baseline	Under Development
	Actual	N/A	N/A	N/A		
Measure: Percentage of 123 countries/territories with no direct service to the US provided aviation security assistance at national or airport levels – PART FY 2007 (Aviation Regulation and Enforcement)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	4.00%	6.00%
	Actual	N/A	N/A	2.00%		

Measure: Level of trainee satisfaction – PART FY 2007 (Flight Crew Training)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	4.64	4.68
	Actual	N/A	N/A	4.65		
Measure: Number of positive responses on the following TSA survey question: How confident are you in the ability of the flight crew to keep air travel secure and to defend the aircraft and its passengers from individuals with hostile intentions? – PART FY 2007 (Flight Crew Training)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	Under Development	Under Development
	Actual	N/A	N/A	Awaiting Data		
Measure: Percentage of training programs within 10 percent of cost and schedule – PART FY 2007 (Flight Crew Training)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	73.00%	84.00%	90.00%
	Actual	N/A	N/A	86.77%		
Measure: Average time (in minutes) per initial inspection of an Indirect Air Carrier – PART FY 2007 (Air Cargo)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	175	170
	Actual	N/A	N/A	180		
Measure: Number of days it takes to certify a new applicant as an Indirect Air Carrier – PART FY 2007 (Air Cargo)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	90	89
	Actual	N/A	N/A	30		
Measure: Number of inspections of identified 'elevated risk' air cargo on all air carriers – PART FY 2007 (Air Cargo)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	100.00% Domestic	100.00% Domestic
	Actual	N/A	N/A	0.00%		
Measure: Percent of Indirect Air Carriers found to be compliant with TSA standard security programs – PART FY 2007 (Air Cargo)	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	84.00%	87.00%	89.00%
	Actual	N/A	N/A	76.70%		
Program: Aviation Security	\$ Thousands			\$5,211,456	\$5,097,119	\$5,616,167
	FTE			52,135	48,977	48,889

Performance Goal: Reduce the probability of a successful terrorist or other criminal attack on surface transportation systems through the issuing of standards, compliance inspections, and vulnerability assessments.

Measure: Percent of nationally critical surface transportation assets or systems that have been assessed during the fiscal year and have mitigation strategies in place to reduce risk.	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007
	Target	N/A	N/A	Baseline	3.57%	14.28%
	Actual	N/A	N/A	0.75%

BUDGET REQUEST AND SUPPORTING INFORMATION
--

FEDERAL LAW ENFORCEMENT TRAINING CENTER
SALARIES & EXPENSES (S&E)

I. Appropriation Overview**A. Mission Statement for S&E:**

We are the leader in career-long law enforcement training. We prepare law enforcement professionals to fulfill their responsibilities safely and proficiently, ensuring that training is accomplished in the most cost-effective manner.

B. Budget Activities:**Federal, State and Local Training**

FLETC serves as an interagency law enforcement training organization for 82 Federal agencies with personnel located throughout the United States and its territories. The Center also provides services to State, local, and international law enforcement agencies, and on a space available basis, other agencies with related law enforcement missions. FLETC provides a limited amount of export training conducted at other locations. This delivery method is used when the programs being conducted do not require the use of certain specialized facilities and when a geographical concentration of personnel can be identified.

Consolidation of law enforcement training permits the Federal Government to emphasize training excellence and cost-effectiveness. Professional instruction and practical application provide students with the skills and knowledge necessary to meet the demanding challenges of a Federal law enforcement career. Personnel learn not only the responsibilities of a law enforcement officer, but through interaction with students from many other agencies, they also become acquainted with the missions and duties of their colleagues. This interaction provides the foundation for a more cooperative Federal law enforcement effort.

FLETC's Partner Organizations have considerable input regarding training issues and operational and functional aspects of the Center. Representatives from these agencies take part in regular curriculum review and development conferences, and also participate in the development of FLETC policies and directives. This relationship is characteristic of a "true partnership," responsive to the training mission.

Accreditation

Training policy, programs, and standards are established by an interagency Board of Directors, comprised of eight members. They occupy positions at the Under Secretary, Assistant Secretary, or equivalent level and represent all agencies which have organizations participating in activities at FLETC. The establishment and publication of professionally developed, recognized, and maintained training standards for Federal law enforcement ensures a disciplined and systematic approach to Federal law enforcement training.

FLETC's goals include:

- **Provide training that develops the skills and knowledge to perform law enforcement functions safely, effectively and professionally.**
 - Establish and maintain robust processes to examine law enforcement trends and emerging issues that affect training content, development and delivery.
 - Ensure training content addresses validated knowledge, skills and abilities, is conducted in accordance with professional standards and is presented with sound adult learning education and training practices.
 - Enhance the readiness of Federal law enforcement agents and officers to respond effectively to terrorist events.
 - Expand anti and counter terrorism training programs
 - Enhance intelligence training programs
- **Significantly expand access to and availability of quality law enforcement training.**
 - Maintain and “use” the FLETC Master Plan as a living-planning tool—baseline for budget and training capacity.
 - Acquire alternative resources – use alternative funding sources such as asset forfeiture funds and partner organization supplements.
 - Develop and deliver more intelligence training programs by FY 2006.
 - Design and construct counterterrorism facilities.
- **Develop alternative delivery methods.**
 - Invest in simulation technology to augment existing training methods to provide training not available using traditional training methods and facilities.

C. Budget Request Summary:

FLETC requests 1,041 positions, 1,016 FTE, and \$202,310,000. The total adjustment-to-base is \$4,063,000. Program increases include 15 positions, 15 FTE, and \$6,187,000 to:

- Provide additional instructor cadre, program cost and facility maintenance to support additional training of Border Patrol Agents and ICE Investigators. (9 positions, 9 FTE, and \$4,845,000)
- Provide additional instructor cadre and facility maintenance for the Practical Application/Counter Terrorism Operations Training Facility. (6 positions, 6 FTE, and \$1,042,000)
- Provide compensation to recipients receiving law enforcement accreditation. (\$300,000)

Total Change 2006-2007	15	15	10,250

FLETC requests \$202 million for this activity. This is a total increase of \$10.2 million which includes \$4 million for pay/non pay inflation and maintenance of new facilities required for increased Border Patrol and ICE training and total program increases of \$6.2 million covering accreditation (\$0.3M), PA/CTOTF (\$1M) and training costs associated with a significant expansion of Border Patrol Agents and ICE personnel included outside the FLETC budget (\$4.8M).

CURRENT SERVICES PROGRAM DESCRIPTION:

Law Enforcement Training: FLETC services to its three major client groups underscores its homeland security support mission in promoting intergovernmental cooperation in law enforcement preparedness.

Federal – FLETC provides law enforcement training to 82 Federal agencies having enforcement responsibilities. We prepare new and experienced law enforcement professionals to fulfill their responsibilities in a safe manner and at the highest level of proficiency. The average basic student spends 12 weeks at FLETC and receives a combination of classroom instruction and hands-on practical exercise training in all phases of law enforcement from firearms and high-speed vehicle operations to legal case instructions and defendant interview techniques. Students must apply their classroom knowledge during exercises that simulate typical situations encountered on the job. To add realism, these exercises often involve contract role players who act as victims, witnesses, or suspects. Each of the basic programs provides the core knowledge essential for any new federal officer or agent to carry out their duties in a safe and efficient manner.

In addition to basic training, FLETC offers advanced and specialized training for career-long law enforcement preparation in subjects that are common to two or more of its Partner Organizations. Examples include Antiterrorism Port Security Boat Operations, Cyber Counterterrorism Investigator Training, Covert Electronics Surveillance, Critical Infrastructure Protection, Financial Forensics Techniques, Intelligence Analysts Training and Land Transportation Antiterrorism Training.

State and local – The National Center for State and Local Law Enforcement Training trains personnel from state and local law enforcement agencies in advanced topics designed to develop specialized law enforcement skills. The participants benefit from the Federal expertise and specialized training available and receive instruction specific to their needs. Additionally, the program offerings are in subjects not generally available from state and local police academies or colleges and universities.

International – In the interest of combating global crime and protecting U.S. interests abroad, FLETC offers a range of training programs to foreign law enforcement agencies. Training focuses on three main areas: the U.S. Government’s Law and Democracy Program; the Antiterrorism Assistance Program; and the International Law Enforcement Academy operations in Europe, Asia, Africa and other regions in the world. In cooperation with the Department of State, FLETC operates two International Law Enforcement Academies in Gabarone, Botswana and San Salvador, El Salvador.

Accreditation: Federal law enforcement accreditation establishes standards and procedures to evaluate training programs and academies used in training Federal law enforcement agents and officers. Accreditation ensures a disciplined and systematic approach to training and is directly linked to the quality, effectiveness and integrity of the training that agents and officers receive. Training programs and course content review is on-going which ensures currency. As organizations seek accreditation, training issues, qualifications of instructors, improved training methods and techniques are raised in priority, resulting in improved training outcome. A total of 2 Law Enforcement training programs received accreditation in FY 2005. There are 20 agencies in the accreditation process of their academy and/or training programs.

DHS Infrastructure Transformation Program

The Department’s Infrastructure Transformation Program (ITP), led by the Office of the Chief Information Officer (OCIO), will integrate the IT infrastructures of the 22 legacy components into “One Infrastructure”. Currently, most of the Department’s components fund and are supported by separate and largely stove-piped IT infrastructures. This environment makes it difficult to share information across components and has resulted in redundant investments and wasted resources. The ITP will eliminate the duplicative infrastructures and provide common capabilities and services for all components to leverage.

The ITP consists of five domains with a Department component assigned as a steward responsible and accountable for the performance of each domain. The domains and their stewards are listed below:

- Network Services led by Customs and Border Protection (CBP);
- Data Center Services led by CBP;
- Email Services led by U.S. Coast Guard (USCG);
- Help Desk Services led by USCG; and
- Video Operations Services led by Federal Emergency Management Agency (FEMA).

The OCIO oversees the work of the stewards and the other components to ensure operational requirements are met and investments and resource allocations are balanced across the components.

Implementation of the ITP will eliminate the need for components to spend resources on improving their own infrastructures. Instead, some of the investment funding previously used for stovepiped infrastructures will be used to support the department-wide ITP effort. For example, CBP’s IT

initiatives such as the Automated Commercial Environment will benefit from the capabilities and services the ITP will provide such as network access, data center hosting, email/collaboration services, wireless access, integrated help desk, voice access, video services, and on-site support. Rather than independently developing new capabilities or augmenting legacy capabilities within CBP, the ITP will provide enterprise-level services that will benefit all components.

By investing in the ITP, DHS components will benefit from economies of scale while promoting Department integration, and improving information sharing and interoperability. The amount of IT investment funding from components to support the ITP is still under deliberation and any such proposal will be fully vetted with the Congress prior to any actions being taken.

IV. Program Justification of Changes

**Department of Homeland Security
Federal Law Enforcement Training Center
Salaries & Expenses
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Border Patrol/ICE Training

Strategic Goal(s) & Objective(s): Strategic Goal 2: Detect, deter and mitigate threats to our homeland
Strategic Objective 2.4: Coordinate national and international policy, law enforcement and other actions to prepare for and prevent terrorism

PPA: Law Enforcement Training

Program Increase: Positions 9 FTE 9 Dollars \$4,845

Funding Profile

	FY 2005 Actual			FY 2006 Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							43	42	\$10,638
Program Increase							9	9	4,845
Total Request	23	23	\$2,568	43	42	\$10,638	52	51	\$15,483

Description of Item

FLETC will provide training for an additional 1,500 Border Patrol Agents, 200 ICE Agents, and 620 ICE Detention Personnel in support of the Secure Border Initiative. The requested increase will provide training for another 200 new Border Patrol Agents and 50 ICE Agents as well as finance the conversion of retired annuitant training personnel to full-time status.

Outside of direct FLETC appropriations, the Budget contains a \$4.7 million request in CBP and \$4.4 million in ICE to reimburse FLETC for remaining training needs. Funding from CBP will be used to train 500 Border Patrol Agents and the funding from ICE will be used to train 620 Detention Personnel.

The following table provides a summary of the training FLETC will provide in FY 2007:

FLETC Training Amounts					
Funding Component	Funding Source Name	Dollars (\$K)	BP Agents	ICE Special Agents	ICE Detention
Attrition					
FLETC	Base	\$ 15,067	700	500	400
FLETC 1/	Base - Current Services Level	\$ 877	100		
Subtotal, Attrition		\$ 15,934	800	500	400
FY 2007 Secure Border Initiative					
FLETC	Base - Current Services Level	\$ 9,761	800	150	200
FLETC	FY 2007 Enhancement	\$ 4,845	200	50	(200)
CBP	CBP Reimbursement	\$ 4,691	500		
ICE	ICE Reimbursement	\$ 4,444			620
Subtotal, SBI		\$ 23,741	1,500	200	620
Total		\$ 39,675	2,300	700	1,020

1/ Funding for attrition of the 1,000 BP Agents provided in the FY 06 appropriation

Justification

Instructor requirements are based on direct contact hours of the program and the number of programs to be conducted to support the increased training requirements. Tuition cost area developed based on the direct materials needed to conduct the specific program such as publications, role players, crime scene kits, ammunition, fuel and oil.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program increase provides for the additional deployment of Border Patrol agents and ICE investigators to the field. The Border Patrol new agent training increases from 800 to 1,000 and ICE new investigators training increases from 150 to 200.

Program Increase 2: Practical Application/Counter Terrorism Operations Training Facility (PA/CTOTF)

Strategic Goal(s) & Objective(s): Strategic Goal 2: Detect, deter and mitigate threats to our homeland
Strategic Objective 2.4: Coordinate national and international policy, law enforcement and other actions to prepare for and prevent terrorism

PPA: Law Enforcement Training

Program Increase							6	6	\$1,042
Total Request	0	0	\$0	0	0	\$0	6	6	\$1,042

Description of Item

The \$1.042 million request will provide for training instructors and maintenance for the completed portions of the PA/CTOTF. Six new instructors will develop, coordinate, facilitate, and train in the Intermodal and International training sites. Anticipated training programs include Protective Service Operations, Tactics for Flying Armed, Weapons of Mass Destruction, Hazmat, Treat Response Driving, Urban Tactics, Emergency Response Tactics, High Risk vehicle stops/patrol, and interactive scenario based training.

PA/CTOTF supports new program requirements by providing realistic training facilities for many of the training programs conducted at FLETC for Federal, state, local and international law enforcement agencies. The new training facility consists of a 220 acre site dedicated to providing the “hands-on” training necessary to meet the expanding needs of law enforcement in the post 9/11 environment.

PA/CTOTF is composed of five training environments: international, intermodal, urban, suburban and rural – all designed to replicate both foreign and domestic settings. It will offer a variety of training venues, such as apartments, row houses, neighborhoods, Federal buildings, roadways and modes of public transportation. This facility will correct limitations and deficiencies in providing adequate practical application and counter terrorism training by recreating environments where law enforcement officers are likely to encounter their enemies and increase the probability of survival and aid in their mission of guarding our homeland.

Justification

The PA/CTOTF will significantly improve the FLETC training facilities serving a multitude of Federal, state, local and international law enforcement agencies. These agencies have varying missions and strategic goals, but collectively their purpose is to minimize threats to the American people and their freedom. Through their law enforcement efforts, the agencies detect, deter and

mitigate acts of terrorism and criminal activity, as well as respond to other emergencies. Training at this facility prepares law enforcement agents to detect, deter and mitigate acts by providing situations that they may face in the line of duty.

Impact on Performance (Relationship of Increase to Strategic Goals)

The PA/CTOTF will enable the FLETC and its Partner Organizations to support the Department of Homeland Security's Domestic Counterterrorism mission area and Strategic Goal #2 – Prevention.

Program Increase 3: Accreditation

Strategic Goal(s) & Objective(s): Strategic Goal 2: Detect, deter and mitigate threats to our homeland
Strategic Objective 2.4: Coordinate national and international policy, law enforcement and other actions to prepare for and prevent terrorism

Description of Item

Funding is for compensation to recipient agencies that receive law enforcement accreditation.

Justification

This program assists law enforcement training agencies in the accreditation of instructors, programs and training academies. Accreditation ensures integrity, professionalism, and accountability of Federal law enforcement training academies and programs. The funding level requested is to partially compensate the cost of accreditation to the recipients receiving law enforcement accreditation.

Impact on Performance (Relationship of Increase to Strategic Goals)

Continuously improve the quality and professionalism of Federal Law Enforcement Training.

V. Exhibits and Other Supporting Materials
 A. Justification of Proposed Legislative Language

Department of Homeland Security
 Federal Law Enforcement Training Center
 Justification of Proposed Changes in Appropriation Name
 Appropriation Language

For necessary expenses of the Federal Law Enforcement Training Center, including materials and support costs of Federal law enforcement basic training; purchase of not to exceed 117 vehicles for police type use and hire of passenger motor vehicles; expenses for student athletic and related activities; the conduct of and participation in firearms matches and presentation of awards; public awareness and enhancement of community support of law enforcement training; room and board for student interns; a flat monthly reimbursement to employees authorized to use personal mobile phones for official duties; and services as authorized by section 3109 of title 5, United States Code; [\$194,000,000] ~~\$202,310,000~~ of which up to [\$42,119,000] ~~\$43,910,000~~ for materials and support costs of Federal law enforcement basic training shall remain available until September 30, [2007; and of which] ~~2008; of which \$300,000 shall remain available until expended for Federal law enforcement agencies participating in training accreditation, to be distributed as determined by the Federal Law Enforcement Training Center for the needs of participating agencies; and of which~~ not to exceed \$12,000 shall be for official reception and representation expenses: *Provided* That the Center is authorized to obligate funds in anticipation of reimbursements from agencies receiving training sponsored by the Center, except that total obligations at the end of the fiscal year shall not exceed total budgetary resources available at the end of the fiscal year :*Provided further; That notwithstanding any other provision of law, section 1202 of Public Law 107-206 (42 U.S.C. 3771 note) is amending by striking "5 years after the date of enactment of this Act," and inserting "the close of 2009" and by striking "250" and inserting "350". (Department of Homeland Security Appropriations Act, 2006)*

Explanation of Changes:

The proposed language provides FLETC with \$300,000 for the compensation of accreditation cost for participating agencies.

The proposed language would continue authority FLETC was provided in FY 2002 (via Section 1202 of Public Law 107-206, 116 Stat. 820) to hire retired Federal employees until 2009. In response to the increased need posed by the Secure Border Initiative, the number of retired annuitants that could be hired under this provision would increase from 250 to 350. FLETC has discovered that rehired annuitants provide a high degree or relevant experience that cannot be duplicated. Their years of experience as law enforcement officers provide FLETC with an immediate return on its investment in terms of credibility and knowledge. In addition, this legislation gives FLETC the flexibility to hire and lay off instructors as the student workload fluctuates. Without this authority, FLETC would be limited in its ability to both hire and lay off workers in a timely manner. The extensive lead time and expense of hiring and reducing the size of the instructional cadre, following the normal regulatory authority, would have an adverse impact on FLETC's ability to meet the changing workload associated with the training needs of 82 participating organizations at four different training sites.

Mission Statement

The Federal Law Enforcement Training Center (FLETC) is the leader in career-long law enforcement training. We prepare law enforcement professionals to fulfill their responsibilities safely and proficiently ensuring that training is accomplished in the most cost-effective manner.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Salaries and Benefits	\$91,394	\$93,770	\$97,916	\$4,146

Salaries and Benefits includes costs for 1,016 FTEs. The FY 2007 request includes an increase of \$1,917,000 for the proposed January 2007 2.6 percent increase in personnel compensation and a \$2,229,000 program increase for 15 additional FTE.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$5,094	\$5,442	\$5,550	\$108

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes an increases of \$108,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Transportation of Things	\$868	\$1,201	\$1,278	\$77

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes increases of \$24,000 in non-pay inflation and \$53,000 in program increases.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Other Rent	\$90	\$92	\$94	\$2

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 request includes an increase of \$2,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Communication, Utilities, and miscellaneous charges	\$6,731	\$6,866	\$7,250	\$384

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes increases of \$134,000 in non-pay inflation and \$250,000 in program increases.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Printing	\$787	\$4,281	\$4,367	\$86

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes an increase of \$86,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Advisory and Assistance Services	\$3,730	\$3,805	\$3,880	\$75

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$75,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Other Services	\$1,741	\$9,821	\$10,000	\$179

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY2007 request includes increases of \$179,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Operation & maintenance of facilities	\$28,053	\$28,614	\$29,390	\$776

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$533,000 in non-pay inflation and a program increase of \$243,000.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Medical Care	\$2,378	\$2,426	\$2,475	\$49

Medical care includes payments to contracts for medical services, but excludes contracts with individuals who are reportable under OPM regulations as federal employees or payments to compensate casual workers and patient help. The FY 2007 request includes an increase of \$49,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Operation & Maintenance of equipment	\$3,911	\$4,551	\$4,640	\$89

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$89,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Subsistence & Support of Persons	\$238	\$243	\$248	\$5

Subsistence & Support of Persons includes costs for contractual services with the public or another Federal government account for the board, lodging, and care of persons, including prisoners. The FY 2007 request includes an increase of \$5,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Supplies & materials	\$8,513	\$31,168	\$31,700	\$532

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes an increase of \$532,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Equipment	\$7,990	\$8,150	\$8,295	\$145

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes an increase of \$145,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Land & Structures	\$5,975	\$6,095	\$6,200	\$105

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2007 request includes an increase of \$105,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Indemnity	\$24	\$25	\$26	\$1

Insurance claims and indemnities includes all benefit payments from the social insurance and Federal retirement trust funds and payments for losses and claims including those under the Equal Access to Justice Act. The FY 2007 request includes an increase of \$1,000 in non-pay inflation.

	2005 Actual	2006 Enacted	2007 Request	2006 - 2007 Change
Interest & Dividends	\$1	\$1	\$1	\$0

Interest and dividends include earnings to owners of trusts and other funds and interest payments under lease-payment contracts for the construction of buildings

BUDGET REQUEST AND SUPPORTING INFORMATION
--

Federal Law Enforcement Training Center
Acquisition, Construction, Improvements and Related Expenses (ACI&RE)

I. Appropriation Overview**A. Mission Statement for ACI&RE:**

We are the leader in career-long law enforcement training. We prepare law enforcement professionals to fulfill their responsibilities safely and proficiently, ensuring that training is accomplished in the most cost-effective manner.

B. Budget Activities:**Federal, State and Local Training**

FLETC serves as an interagency law enforcement training organization for 82 Federal agencies with personnel located throughout the United States and its territories. The Center also provides services to State, local, and international law enforcement agencies, and on a space-available basis, other Federal agencies with related law enforcement missions. FLETC provides a limited amount of export training conducted at other locations. This delivery method is used when the programs being conducted do not require the use of certain specialized facilities and when a geographical concentration of personnel can be identified.

Consolidation of law enforcement training permits the Federal Government to emphasize training excellence and cost-effectiveness. Professional instruction and practical application provide students with the skills and knowledge necessary to meet the demanding challenges of a Federal law enforcement career. Personnel learn not only the responsibilities of a law enforcement officer, but through interaction with students from many other agencies, they also become acquainted with the missions and duties of their colleagues. This interaction provides the foundation for a more cooperative Federal law enforcement effort.

FLETC's Partner Organizations have considerable input regarding training issues and operational and functional aspects of the Center. Representatives from these agencies take part in regular curriculum review and development conferences, and also participate in the development of FLETC policies and directives. This relationship is characteristic of a "true partnership," responsive to the training mission.

Accreditation

Training policy, programs, and standards are established by an interagency Board of Directors, comprised of eight members. They occupy positions at the Under Secretary, Assistant Secretary, or equivalent level and represent all agencies which have organizations participating in activities at FLETC. The establishment and publication of professionally developed, recognized, and maintained training standards for Federal law enforcement ensures a disciplined and systematic approach to Federal law enforcement training.

FLETC's goals include:

- **Provide training that develops the skills and knowledge to perform law enforcement functions safely, effectively and professionally.**
 - Establish and maintain robust processes to examine law enforcement trends and emerging issues that affect training content, development and delivery.
 - Ensure training content addresses validated knowledge, skills and abilities, is conducted in accordance with professional standards and is presented with sound adult learning education and training practices.
 - Enhance the readiness of Federal law enforcement agents and officers to respond effectively to terrorist events.
 - Expand anti and counter terrorism training programs
 - Enhance intelligence training programs
- **Significantly expand access to and availability of quality law enforcement training.**
 - Maintain and “use” the FLETC Master Plan as a living planning tool—baseline for budget and training capacity.
 - Acquire alternative resources – using alternative funding sources such as asset forfeiture funds and partner organization supplements.
 - Develop and deliver more Intelligence training programs by FY 2006.
 - Design and construct counter terrorism facilities.
- **Develop alternative delivery methods**
 - Invest in simulation technology to augment existing training methods to provide training not available using traditional training methods and facilities.

C. Budget Request Summary:

FLETC requests \$42,246,000. The total adjustments-to-base is a reduction of \$46,288,000, derived from non-recur of one-time facility construction projects provided last year. A program increase of \$1,000,000 is provided for construction of the Practical Application/Counter Terrorism Operations Training Facility.

III. Current Services Program Description by PPA

Department of Homeland Security
Federal Law Enforcement Training Center
Acquisition, Construction, Improvements and Related Expenses
Program Performance Justification
(Dollars in thousands)

PPA: ACQUISITION, CONSTRUCTION, IMPROVEMENTS & RELATED EXPENSES

	Perm		Amount
	Pos	FTE	
2005 Actual	0	0	\$60,050
2006 Enacted	0	0	\$87,474
2007 Adjustments-to-Base	...	0	(\$46,228)
2007 Current Services	0	0	\$41,246
2007 Program Change	0	0	\$1,000
2007 Request	0	0	\$42,246
Total Change 2006-2007	0	0	(\$45,228)

FLETC requests \$42,246M. This is a decrease of \$45,228M from FY 2006 because of the non-recur of one-time construction projects offset by a small increase in non-pay inflation. A program increase of \$1M is requested outside of base funding for partial construction of the Practical Application/Counter Terrorism Operations Training Facility.

CURRENT SERVICES PROGRAM DESCRIPTION:

FLETC provides the necessary facilities for conducting recruit, advanced, specialized and requalification training for Federal law enforcement personnel and to state, local and foreign law enforcement personnel on a space-available basis. Construction and improvement provides the acquisition and related costs for the expansion and maintenance of the Federal Law Enforcement Training Center. This includes funding for the Facilities Master Plan, Minor Construction and Maintenance, Environmental Compliance and Communications Systems. The Master Plan provides the long range blueprint for renovations and expansion of the Facilities to meet training requirements of the over 80 Partner Organizations. Minor Construction and Maintenance provides alterations and maintenance for approximately 300 buildings at four locations – Glynco, Georgia; Artesia, New Mexico; Charleston, South Carolina; and Cheltenham, Maryland. Environmental compliance is to ensure compliance with the EPA and State environmental laws and regulations. The Communications Systems maintains and repair/replaces the fiber optics telecommunications cable system

IV. Program Justification of Changes

**Department of Homeland Security
Federal Law Enforcement Training Center
Acquisition, Construction, Improvements and Related Expenses
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Practical Application/Counter Terrorism Operations Training Facility (PA/CTOTF)

Strategic Goal(s) & Objective(s): Strategic Goal 2: Detect, deter and mitigate threats to our homeland
Strategic Objective 2.4: Coordinate national and international policy, law enforcement and other actions to prepare for and prevent terrorism

PPA: Law Enforcement Training

Program Increase: Positions 0 FTE 0 Dollars \$1,000

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$8,108
Program Increase							0	0	\$1,000
Total Request	0	0	\$0	0	0	\$0	0	0	\$9,108

Description of Item

PA/CTOTF supports new program requirements by providing realistic training facilities for many of the training programs conducted at FLETC for Federal, state, local and international law enforcement agencies. The new training facility consists of a 220 acre site dedicated to providing the “hands-on” training necessary to meet the expanding needs of law enforcement in the post 9/11 environment.

PA/CTOTF is composed of five training environments: international, intermodal, urban, suburban and rural – all designed to replicate both foreign and domestic settings. It will offer a variety of training venues, such as apartments, row houses, neighborhoods, Federal buildings, roadways and modes of public transportation.

By reprioritizing existing ACI&RE requirements, \$8M of the \$9M required for construction of the PA/CTOTF annually in FY 2007 through FY 2011 is within base resources. The additional \$1M is a requested program increase to cover the balance of needs. Annual funding of \$9M provides for the phased construction of the PA/CTOTF with each phase consisting of related but completely self-sufficient and useable facilities.

Justification

PA/CTOTF will significantly improve FLETC training facilities serving a multitude of Federal, state, local and international law enforcement agencies. These agencies have varying missions and strategic goals, but collectively their purpose is to minimize threats to the American people and their freedom. Through their law enforcement efforts, the agencies detect, deter and mitigate acts of terrorism and criminal activity, as well as respond to other emergencies. This facility prepares law enforcement agents to detect, deter and mitigate acts by providing facilities that enable them to prepare for situations that they may face in the line of duty.

An enhanced training facility, with hands-on training environments, is essential to successfully carrying out FLETC's mission. The facility will improve FLETC's ability to sufficiently prepare law enforcement trainees and support FLETC's ability to economically meet increasing demands for law enforcement training.

Impact on Performance (Relationship of Increase to Strategic Goals)

The PA/CTOTF will enable FLETC and its Partner Organizations to support the Department of Homeland Security's Domestic Counterterrorism mission area and Strategic Goal #2 – Prevention.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
Federal Law Enforcement Training Center
Justification of Proposed Changes in Appropriation Name
Appropriation Language**

For acquisition of necessary additional real property and facilities, construction, and ongoing maintenance, facility improvements, and related expenses of the Federal Law Enforcement Training Center, [\$88,358,000] ~~\$42,246,000~~, to remain available until expended: *Provided*, That the Center is authorized to accept reimbursement to this appropriation from government agencies requesting the construction of special use facilities. (*Department of Homeland Security Appropriations Act, 2006*)

Explanation of Changes:

No changes requested.

Practical Application/Counterterrorism Operations Training Facility

1. Project Description, Justification and Scope

The Practical Application/Counterterrorism Operations Training Facility (PA/CTOTF) will support new training requirements by providing realistic training facilities for many of the training programs conducted at FLETC by Federal, state, local and international law enforcement agencies. The new training facility will consist of a 220 acre site dedicated to providing the “hands-on” training necessary to meet the expanding needs of law enforcement in the post-9/11 environment.

FLETC’s partnership with 82 Partner Organizations creates an opportunity for a consolidated training environment in which multiple agencies use a centralized location to meet their various training needs. This allows the government to benefit from economies of scale advantages available only from a consolidated law enforcement training facility. FLETC promotes cost-effective training, and will continue this trend, by allowing the government additional opportunities for cost reduction resulting from providing PA/CTOTF capabilities in a single location.

PA/CTOTF will allow trainees to experience the actual environments and confrontations that they will face in the field. The facility will be composed of five training environments: international, intermodal, urban, suburban and rural - all designed to replicate both foreign and domestic settings. It will offer a variety of training venues, such as apartments, row houses, neighborhoods, Federal buildings, roadways and modes of public transportation. Scenario and reality based training is one of the most effective tools available and must be supported by realistic facilities. By creating realistic environments, trainees can learn by actually performing tasks similar to those they will encounter when administering their law enforcement duties.

2. Significant Changes

This is the initial Budget Request for PA/CTOTF. We are requesting \$9M in each of the next five years to support construction of this 220 acre site dedicated to providing the “hands-on” training necessary to meet the expanding needs of law enforcement in the post 9/11 environment. The PA/CTOTF is composed of five severable training environments: international, intermodal, urban, suburban and rural – all designed to replicate both foreign and domestic settings.

3. Project Schedule

Projects	Fiscal Quarter and Year				Total Estimated Completion Cost (\$000)	Total Project Cost (\$000)
	Work Initiated	Work Completed	Physical Construction Start	Physical Construction Complete		
FY 2007 Budget Request	Apr 2004	Nov 2012	Feb 2005	Nov 2012	\$9,108	
Future Budget Requests					\$37,974	\$47,082
Total					\$47,082	\$47,082

Note: Total Project Cost of \$47,082 does not include \$9,334 prior year cost associated with this project.

**4. Schedule of Project Funding
(Dollars in Thousands)**

	Prior	FY 2005	FY 2006	FY 2007	Future	Total
Appropriation						
Obligation (actual and planned)	\$3,189	\$6,145	\$0	\$9,108	\$37,974	\$56,416
Expenditure (actual and planned)	\$3,189	\$937				
Facility cost:						
Total Project Expenditures	\$3,189	\$937				\$4,126

**5. Cost Estimate Detail and Changes
(Dollars in Thousands)**

	Current Estimate	Previous Estimate
Survey and Design:	\$2,164	N/A
Construction:		
Improvement to land	\$8,097	N/A
Buildings	\$40,323	N/A
Contingencies:		
Construction Phase	\$3,750	
Other Costs: (Maintenance)	\$2,082	N/A
Project Total	\$56,416	N/A

Note: The above represents acquisition cost (including contributions from DoD/AFOSI and Asset Forfeiture) and ACI&RE maintenance cost.

6. Method of Performance

The Integrated Project Team (IPT) uses earned value techniques and a system driven by Microsoft Project to track planned vs. actual cost, schedule, and performance. For the existing contracts, contractors are required to prepare a computerized critical path method (CPM) schedule, often using Gantt charts that include proposed engineering, procurement, construction and testing activities. The CPM schedule covers the time from Contract Award/Notice to Proceed to the Contract completion date. The baseline CPM schedule incorporates labor, equipment and quantity resource data as well as cost information. It is used by the contractor for planning, organizing, and directing the work; reporting progress; and requesting payment for work accomplished. The Contracts Management Office (CMO) works with contractors to update the schedule monthly, or weekly in some cases.

The firm-fixed price nature of PA/CTOTF contracts also serves to manage contractor performance. After 65% of the design stage, the construction manager (CMc) prepares a proposal for the unbid

portion of the uncompleted documents, and the Guaranteed Maximum Price (GMP) is negotiated. The CMC agrees to pay for costs exceeding the GMP and are not a result of changes in the contract documents. This helps to minimize schedule/budget variances.

The IPT will transition to using an ANSI/EIA Standard 748 system upon DHS's selection of an Earned Value Management System (EVMS) to be used consistently throughout the agency. The EVMS will track budgeted actual costs (BAC), estimated actual costs (EAC), budgeted cost for work scheduled (BCWS), budgeted cost for work performed (BCWP), actual cost of work performed (ACWP), schedule variance (SV) and cost variance (CV).

PERFORMANCE GOALS AND MEASURES (Exhibit 300, Section 1.C)

Fiscal Year	Strategic Goal(s) Supported	Existing Baseline	Planned Performance Improvement Goal	Actual Performance Improvement Results	Planned Performance Metric	Actual Performance Metric Results
2007	DHS: 2.4 Ensure national and international policy, law enforcement and other actions to prepare for and prevent terrorism are coordinated. FLETC: 1 Provide training that develops skills and knowledge to perform law enforcement functions safely, effectively and professionally.	The FY 2004 baseline for the percentage of federal supervisors that rate their FLETC basic training graduate's preparedness as good or excellent was 73%.	Results from a continuous validation survey that will be completed by federal supervisors 8-12 months after graduation will increase by 1% by 2007.	TBD	74%	TBD
2007	DHS: 2.4 Ensure national and international policy, law enforcement and other actions to prepare for and prevent terrorism are coordinated FLETC: 2 Significantly expand access to and availability of quality law enforcement training.	FLETC expects 2005 results from a Student Quality of Training Survey (SQTS) to show that 64% of students rate the quality of FLETC law enforcement training as excellent or outstanding upon graduation.	Results from a Student Quality Training Survey that will be completed by students after course completion will increase by 3% by 2007.	TBD	67%	TBD

2007	DHS: 2.4 Ensure national and international policy, law enforcement and other actions to prepare for and prevent terrorism are coordinated FLETC: 2 Significantly expand access to and availability of quality law enforcement training.	To be determined: There is currently no advanced training conducted at the PA/CTOTF. However, the enrollment for the first year of training is expected to be 3,500 students.	FLETC will train 3,500 students in advanced training programs at the PA/CTOTF.	TBD	3,500	TBD
2007	DHS: 2.4 Ensure national and international policy, law enforcement and other actions to prepare for and prevent terrorism are coordinated FLETC: 2 Significantly expand access to and availability of quality law enforcement training.	FLETC expected 2005 results from the Partner Organization Satisfaction Survey, completed by Partner Organization training leads, to show 80% of Partner Organizations agree or strongly agree their agents and officers are being taught the latest techniques, laws and regulations.	FLETC expects for 82% of Partner Organizations to express a high rate of overall satisfaction on the Partner Organization Satisfaction Survey.	TBD	82%	TBD

Construct 50 Yard Indoor Firearms Range

1. Project Description, Justification and Scope

The Charleston firearms range will consist of an environmentally controlled 50 yard range with 25 firing points. The size of the training classes that use the range is 24 students. Ranges with 25 firing positions provide flexibility for including an additional student, when required, and for occasional equipment outage. This project resolves two current problems with the firearms ranges available for Charleston training. The first problem is that the existing firearms ranges are technically inadequate. They are outdoor ranges that do not provide the capability to control the environment that the students are subjected to. For example, the training regimen requires low-light condition for some aspects of firearms training, and these environments can only be achieved for the entire length of a training session with an indoor range. The second problem is that the current firearms ranges are geographically remote from the training facility. The additional transportation time required for use of existing ranges results in significant waste of student time, and Partner Organizations have requested FLETC action to establish adequate firearms training ranges located aboard the Charleston campus.

2. Significant Changes

This is the initial budget request for the Charleston indoor firearms range and will resolve the technical and geographic inadequacies of our current outdoor firearms range.

Construct Language Arts Building

1. Project Description, Justification and Scope

The additional border patrol requirements results in workload exceeding the Artesia current language facility capacity. The existing language arts facility consists of rooms within the classroom building and trailers which were provided as temporary facilities for language requirements until a permanent facility could be provided. The language arts building replaces these temporary facilities and provides right-sized capacity for long term workload. The facility will house six language laboratories, two 48-student classrooms, 60 break-out rooms, and a common area within a 45,000 square foot structure. The facility will employ the latest technology to prepare Border Patrol agents for their law enforcement mission on our nation's borders.

2. Significant Changes

This is the initial budget request for the Artesia Language Arts Building. This facility is necessary to support the additional border patrol training.

3. Project Schedule

Mission Statement

The Federal Law Enforcement Training Center (FLETC) is the leader in career-long law enforcement training. We prepare law enforcement professionals to fulfill their responsibilities safely and proficiently, ensuring that training is accomplished in the most cost-effective manne.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Travel	\$55	\$56	\$57	\$1

Travel includes all costs of transportation of persons, subsistence of travelers, an incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes an increase of \$1,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
GSA rent	\$210	\$214	\$218	\$4

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes an increase of \$4,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Other Rent	\$137	\$140	\$143	\$3

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 request includes an increase of \$3,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Advisory and Assistance Services	\$2	\$2	\$3	\$1

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes an increase of \$1,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Other Services	\$574	\$586	\$598	\$12

Other services include report contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes an increase of \$12,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Purchase from Government Accounts	\$297	\$303	\$309	\$6

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes an increase of \$6,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Operation & maintenance of facilities	\$1,652	\$1,685	\$1,719	\$34

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$34,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Operation & Maintenance of equipment	\$20	\$20	\$21	\$1

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$1,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Supplies & materials	\$122	\$125	\$128	\$3

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (c) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes an increase of \$3,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Equipment	\$1,129	\$1,152	\$1,175	\$23

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes an increase of \$23,000 in non-pay inflation.

	2005	2006	2007	2006 - 2007
	Actual	Enacted	Request	Change
Land & Structures	\$55,852	\$102,260	\$40,875	(\$61,385)

Land and structures includes the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2007 request includes increases for non-pay inflation and \$1,547,000 in program increases. There is also a decrease of \$47,722,000 for non-recrurals and a decrease of \$15,443,000 for reduction of projects executed in FY 2006 with prior year funding.

A. Mission and Description of the Federal Law Enforcement Training Center

The Federal Law Enforcement Training Center's (FLETC) mission is to train those who protect our homeland. FLETC is the Federal government's leader for and provider of world-class law enforcement training. FLETC prepares new and experienced law enforcement professionals to fulfill their responsibilities in a safe manner and at the highest level of proficiency. Training consists of all phases of law enforcement instruction, from firearms and high-speed vehicle operations, to legal case instructions and defendant interview techniques. Through consolidated training, FLETC can respond quickly to emerging training needs, readily adapt to new requirements and focus exclusively on training which is FLETC's only mission. FLETC delivers interagency training with optimal efficiency through the government-wide sharing of facilities, equipment and expertise which produces economies of scale available only from a consolidated law enforcement training organization.

FLETC currently operates four training sites throughout the United States for multiple agency use. FLETC headquarters and training site, Glynco, Georgia, has classrooms, dining and residence halls, and state-of-the-art facilities for firearms, physical techniques, driver, marine and computer based training activities. Two field locations that provide both basic and advanced training are located in Artesia, New Mexico, and Charleston, South Carolina. The fourth training site, Cheltenham, Maryland, provides in-service and re-qualification training for officers and agents in the Washington, DC area. In cooperation with the Department of State, FLETC operates an International Law Enforcement Academy in Gaborone, Botswana and in FY 2005, FLETC opened its second International Law Enforcement Academy in San Salvador, El Salvador.

B. Major Activities and Key Strategic Issues

FLETC's services to its three major law enforcement client groups underscore its homeland security support mission in promoting intergovernmental cooperation in law enforcement preparedness. FLETC: 1) serves 82 Federal Partner Organizations having law enforcement responsibilities; 2) provides training and technical assistance to state and local law enforcement entities; and 3) plans, develops and presents formal training courses and practical exercise applications related to international law enforcement training in the interest of combating global crime and protecting U.S. interests abroad.

In FY 2006, we received \$279,534,000 to provide law enforcement training and re-qualification to over 50,000 students from Federal, state and local and International law enforcement agencies. FLETC also continued support of the law enforcement training accreditation program which consists of the internal accreditation of FLETC law enforcement programs and the assistance to other Federal law enforcement training agencies in the accreditation process.

FY 2005 Accomplishments

- Provide training to over 47,000 law enforcement students, an increase from almost 45,000 in FY 2005.
- Completed the transfer of the Border Patrol Training from Charleston to Artesia. Completed the infrastructure modifications at Artesia to increase the Border Patrol Agent training from 700 to 1,200.

- Assumed total operation of the Charleston Training Facility. Assisted in the stand up of the U.S. Coast Guard Maritime Law Enforcement Academy and the U.S. Courts Academy
- Assisted applicants in the accreditation process by which law enforcement training programs and facilities are accredited and law enforcement instructors are certified. FLETC submitted an application for Academy Accreditation in June 2005.
- In cooperation with the Department of State (DOS), FLETC commenced training at the second FLETC operated International Law Enforcement Academy in San Salvador, El Salvador. A total of 144 students were trained including a pilot program in Law Enforcement Development Training and specialized training programs on counter terrorism, trafficking and basic investigations of computers and electronic crimes.

Planned FY 2006 Accomplishments

- Provide training to over 50,000 law enforcement students.
- Design facility and award the construction contract for the Physical Techniques Facility at Artesia.
- Continue the infrastructure modifications along with award of the two dormitories and aquatic center at Artesia, NM necessary to support the training of up to 2,000 new Border Patrol Agents.
- Design facility and award construction contract for the Interview Complex at Glynco, Georgia required to support the increase of up to 800 new ICE Investigators.
- Conduct pilot training program using simulation for driver training scenarios.
- Commence training in a portion of the first phase of the Practical Application/Counter Terrorism Operational Training Facility which allows the trainees to experience the actual environments and confrontations that they will face in the line of duty which better prepares law enforcement agents to detect, deter and mitigate acts of terrorism.
- Receive Federal Law Enforcement Training Academy Accreditation.
- Commence new mission of service provider for accounting and budget execution functions for two DHS bureaus
- Submit application for Program Accreditation for one advanced and three law enforcement training programs.

Projected FY 2007 Accomplishments

- Provide training to over 50,000 law enforcement students.
- Provide the increased training to Border Patrol and Immigration and Customs Enforcement in support of the Secure Border Initiative
- Continue the construction of the multi-phased Practical Application/Counterterrorism Operational Training facility.
- Receive program accreditation for one advanced and three law enforcement training programs.
- Begin program training using simulation for driver training scenarios.

The key strategic issues and priorities of FLETC for the next five years will focus on expanding training programs through partnerships, emerging state-of-the-art training technology and sharing increased capacity in the most cost effective manner using the consolidated law enforcement concept of training and providing accredited law enforcement training for all law enforcement

personnel. The law enforcement officers trained at FLETC are the primary resources being used to fight the war on terrorism and to make the homeland more secure. In particular, during FY 2007 through FY 2011, FLETC will concentrate our efforts on:

- *Ensuring state of the art technology:* FLETC continues the partnership with Naval Air Warfare to integrate modeling and simulation technology to support driver and firearms training. This technology can improve the training curriculum and provide more comprehensive training in environments that can not be replicated on the traditional driver ranges. The simulation technology emulates highly dangerous law enforcement scenarios while enabling student learning in a safe and controlled environment. Simulation Training will commence in FY 2007 with the completion of facility construction.
- *Standardizing law enforcement training:* The Federal Law Enforcement Training Accreditation (FLETA) program has established policies and procedures for achieving standards in the design, development and evaluation of training and the qualification of instructors. FLETA assisted in the accreditation of the Department of State Diplomatic Security Service Academy in Dunn Loring, VA and the Department of Energy accreditation of their Basic Security Police Office Training Program in Albuquerque, NM. FLETC expects to receive Academy accreditation in FY 2006.
- *Partnering with state and local law enforcement entities:* FLETC continues to revise and develop training programs for export delivery to state, local, tribal and campus law enforcement agencies. This partnership fosters cooperation, provides technology, improves response coordination and maximizes recovery between these agencies and Federal law enforcement agencies in emergency related situations in the United States. Emerging programs for this area of training includes domestic violence training and anti-terrorism intelligence training. Special emphasis is placed on training law enforcement officers from small town and rural agencies, which comprise 95% of the state, local, tribal and campus law enforcement population.
- *Law enforcement training capacity:* FLETC evaluates facilities requirements based on Partner Organization training requests and the facilities needed to provide the training. FLETC has recently modified the facilities master plan to provide for the transfer of Border Patrol training to Artesia and the training of 2 new Partner Organizations at Charleston. FLETC continues to explore and apply training alternatives such as the use of technology-based solutions, including computer modeling and simulation, Web-based training and computer based training in order to provide the most up-to-date and cost effective consolidated training.

C. Resources Requested and Performance Impact

- a. The resources required to provide the necessary training by FLETC are driven by the amount of training requested by our Partner Organizations. The FY 2007 request of \$244.556 million provides for an increase of 200 new Border Patrol Agents and 50 new ICE Investigators.

Adjustments to the Accreditation program in the Salary and Expenses Appropriation includes funding to partially reimburse law enforcement agencies seeking accreditation and the transfer of the internal FLETC accreditation portion to FLETC sub-program Federal Law Enforcement

Training. Adjustments to the Construction and Improvement program in the Acquisition, Construction, Improvements and Related Expenses Appropriation includes decreases for one time construction projects funded in FY 2006 in support of the Secure Border Initiative.

b. The Program Assessment Rating Tool (PART) Review plays a critical role in resource investment decisions, management actions and legislative proposals. The PART has fostered identification of both specific mission-program performance and enterprise-wide improvement opportunities. FLETC continues to improve the integration of its performance planning and program budgeting as demonstrated by the results of the reassessment in FY 2005 for the FY 2007 PART Reviews. The FY 2007 PART overall rating of "Adequate Results Demonstrated" is a significant improvement from the FY 2004 PART overall rating of "Results Not Demonstrated."

Section	OMB Weighting	Score	Weighted Score
Program Purpose & Design	20%	88%	18%
Strategic Planning	10%	62%	6%
Program Management	20%	86%	17%
Program Results	50%	35%	17%
			58%

The alignment of FLETC programs to the Department of Homeland Security (DHS) Strategic plan and objectives and FLETC strategic plan enables FLETC to set priorities at all levels of the performance planning and program budgeting processes. The development of clear long-term performance goals, measures and targets enables FLETC to track the successful accomplishment of its mission and realization of its vision by ensuring its Partner Organizations have the highest caliber law enforcement training and facilities. Also, the DHS multi-year performance budget enables FLETC to develop and improve outcome and efficiency measures, as well as the short- and long-term targets associated with them.

D. How FLETC Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

Law Enforcement Training program performance goal – Provide the knowledge and skills to law enforcement agents and officers to fulfill their responsibilities.

- 2.4 Coordinate national and international policy, law enforcement and other actions to prepare for and prevent terrorism.

Accreditation program performance goal – Accredite all Federal law enforcement training.

- 2.4 Coordinate national and international policy, law enforcement and other actions to prepare for and prevent terrorism.

A. Performance Based Budget Highlights by Program

Measure: Percentage of federal supervisors that rate their FLETC basic training graduate's preparedness as good or excellent	Fiscal Year	FY2004	FY2005	FY2006	FY2007

BUDGET REQUEST AND SUPPORTING INFORMATION**OFFICE OF SCREENING COORDINATION AND OPERATIONS****I. Appropriation Overview****A. Mission Statement for Office of Screening Coordination and Operations:**

The Office of Screening Coordination and Operations (SCO) will improve security screening by creating screening standards and policies for the Department of Homeland Security, by providing a single redress office for travelers, by setting common standards for registered traveler programs, and by assisting with standards on the Western Hemisphere Travel Initiative and the Strategic Prosperity Partnership.

B. Budget Activities:

The functions of the SCO include: (1) development of a unified business vision and strategy for the coordinated screening of people; (2) development of standards and coordination of policies; (3) oversight of DHS screening programs, and management of screening and credential acquisitions; and (4) establishment of unified standards concerning enrollment, biometrics, credentialing, and central redress practices and policies.

C. Budget Request Summary:

The Office of Screening Coordination and Operations requests 17 positions, 17 FTE, and \$3,960,000 for FY 2007. The total request maintains the FY 2006 Revised Enacted funding level.

2007 Request	17	17	3,960
Total Change 2006-2007

The SCO requests \$3.96M for this activity. This maintains the FY 2006 Revised Enacted level.

CURRENT SERVICES PROGRAM DESCRIPTION:

Concept of Operations: The SCO is developing and coordinating the Business Vision as follows:

- *Develop Standardized Screening Business Process.* The SCO is developing of a set of harmonized screening processes, including biometrics and information management, application and credentialing, card issuance, and redress. Common services encompass creation of:
 - *Harmonized screening databases & standardized matching processes.* The SCO is defining the policy and business vision – and is coordinating with the Office of Chief Information Officer and relevant components on the development of enterprise and technical architecture, including standards and program management process -- for harmonizing DHS’s multiple screening databases into a single source to accurately identify an individual and view the travel and see history at the detail transaction level. SCO will develop a consistent approach for collecting and matching information against watch lists. SCO will also work with the Department of State and other U.S. Government agencies to further integrate screening efforts.
 - *Common biometrics/biographic standards and enrollment processes, and integrated priorities.* The SCO is working with relevant DHS components to coordinate and develop common DHS standards for the selection, capture and storage of biometrics in DHS’s multiple biometrics programs. Additionally, the SCO is developing standards and protocols for the access and sharing of biometric data, within DHS and with relevant external agencies. The SCO is also working with relevant DHS components to establish integrated priorities for applied research and development and deployment efforts.

- *Common application and credentialing processes for registered traveler and credentialing programs.* The SCO is defining common processes for enrollment in DHS's multiple registered traveler program and other credentialing programs. For situations where individuals are likely to apply for similar categories of DHS status or credentialing programs, the SCO will construct an appropriately unified application process.
- *Common card standards.* The SCO is working with relevant DHS components to establish common DHS standards on cards issued for trusted traveler or credentialing programs.
- *Unified redress.* The SCO will develop a comprehensive, one-stop, 24/7 DHS-wide redress office. SCO will work with the Department of State and other agencies to improve how individuals can seek redress.
- *Common acquisition approaches.* The SCO will coordinate the acquisition of common screening tools -- software and hardware.
- *Oversee Budget Formulation & Investment Decisions.* The SCO will review investment decisions, and provide budget guidance for new initiatives for DHS screening systems so that the Department does not duplicate screening.

A. Mission and Description of Office of Screening Coordination and Operations (SCO)

The Office of Screening Coordination and Operations (SCO) will improve security screening by creating screening standards and policies for the Department of Homeland Security, providing provide a single redress office for travelers, and by setting common standards for registered traveler programs. The SCO will assist with the Western Hemisphere Travel Initiative and the Strategic Prosperity Partnership.

The Screening Coordination office will enhance the interdiction of terrorists and criminals by integrating process and procedures to detect, identify, track, and interdict people and conveyances, and other entities and objects that pose a threat to homeland security, while safeguarding legal rights, including civil liberties and personal privacy. This program will oversee and coordinate multiple screening processes throughout the Department

B. Major Activities and Key Strategic Issues

In FY 2006, funds will be used to establish a program office and, hire staff.

The SCO will: (1) develop a strategy for coordinated screening ; (2) develop screening standards that all DHS components can use; (3) manage and oversee the acquisition of new screening systems and credentials; and (4) set DHS standards for enrollment, biometrics, credentialing, and redress practices and policies.

C. Resources Requested and Performance Impact

The SCO requests 17 positions, 17 FTE, and \$3,960,000 for FY 2007 Request. The total maintains the FY 2006 Revised Enacted funding level. In FY 2007, the SCO will continue to enhance and unify the operating approaches for four key elements of risk-based screening, civil liberties and privacy, governance and information sharing as the foundation for a coordinated, comprehensive and effective risk-based management approach.

D. How Component Name Programs and Their Performance Goals Align to and Support the DHS Strategic Plan Objectives.

The list below is the performance goal for the SCO followed by the DHS Strategic Objective the SCO supports.

Office of Screening Coordination and Operations – Enable Federal Immigration and Border Management agencies to make timely and accurate risk and eligibility decisions through coordination of screening capability policies, business strategy and processes, data, information systems, and technology to further enhance security and immigration, travel, and credentialing experiences.

2.1 Secure our borders against terrorists, means of terrorism, illegal drugs and violations of trade and immigration laws.

SCO - 1

E. Performance Based Budget Highlights by Program

For SCO, the performance goal, performance measure(s), budget including allocation of non-programmatic overhead, and FTE are:

Performance Goal: Enable DHS components to make timely and accurate risk and eligibility decisions about people.						
Measure: SCO is developing a new measure that will be completed in FY 2006.	Fiscal Year	FY2003	FY2004	FY2005	FY2006	FY2007

The program is currently in FY 2006 mode in HCS and has revised forecasts.

Estimate Change:

iii. Status of Congressionally Requested Studies and Reports

Department of Homeland Security United States Visitor and Immigrant Status Indicator Technology

Status of Congressionally Requested Studies, Reports, and Evaluations

1. House Report 108-541, Title II, page 16, directs the Under Secretary for Border and Transportation to submit a report on the results of the re-engineering and progress in achieving a streamlined acquisition strategy, including any legislative or funding requirements, with the fiscal year 2006 budget request. US-VISIT was tasked to assist with reporting requirements. It is anticipated that this report will be delivered to the Hill by February 28, 2006.
2. House Report 108-541, Title II, page 21, directs the United States Visitor and Immigrant Status Indicator Technology program to submit detailed monthly reports on the planned and actual deployment of the US-VISIT entry and exit systems and equipment at airports and seaports. The goal for US-VISIT is to prepare and submit the detailed monthly report to DHS within 30 days after the previous month's close. The department plans to deliver all outstanding monthly reports to the Hill by February 28, 2006.
3. Conference Report 109-241, Title II, page 41, in the statement of managers accompanying the conference report on Public law 108-334, the Department of Homeland Security was directed to submit a report by January 14, 2005, on the status of efforts between the Departments of Homeland Security and Justice to achieve real-time interoperability between the Integrated Automated Fingerprint Identification System and the Automated Biometric Identification System. The Committees on Appropriations did not receive this report until August 22, 2005. The conferees direct the cost and schedule estimate referred to in the report be completed no later than November 20, 2005, so that the results can be incorporated into the fiscal year 2006 United States Visitor and Immigrant Status Indicator Technology (US-VISIT) expenditure plan and the fiscal year 2007 President's Budget. It is anticipated that this report will be simultaneously submitted with the expenditure plan by March 20, 2006.
4. Conference Report 109-241, Title I page 4 and Title II page 41; House Report 109-79, Title II page 23; House Bill HR 2360 EH, Title I page 6; and Senate Bill HR 2360 EAS, Title I page 5 directs Expenditure Plan - That the total amount made available under this heading, \$159,658,000 may not be obligated for the United States Visitor and Immigrant Status Indicator Technology project until the Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that: (1) meets the capital planning and investment control review requirements established by the Office of Management and Budget, including Circular A-11, Part 7; (2) complies with the Department of Homeland Security information systems enterprise architecture; (3) complies with the acquisitions rules, requirements, guidelines and systems acquisitions management practices of the Federal Government; (4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project; (5) is reviewed and approved by the Department of Homeland Security Investment Review Board, the Secretary of Homeland Security, and the Office of Management and Budget; and (6) is reviewed by the Government Accountability Office. [Per House/Senate report language, this plan must reflect a clear benefit-cost analysis associated with the increments being proposed for funding.] The expenditure plan is anticipated to be with the Committees on Appropriations of the Senate and House by March 20, 2006.

BUDGET REQUEST AND SUPPORTING INFORMATION**United States Visitor and Immigrant Status Indicator Technology****I. Appropriation Overview****A. Mission Statement for United States Visitor and Immigrant Status Indicator Technology:**

The Department of Homeland Security's United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program has established four goals to accomplish its mission: (1) enhance the security of our citizens and visitors, (2) facilitate legitimate travel and trade, (3) ensure the integrity of our immigration system, and (4) protect the privacy of our visitors. The US-VISIT Program is a key component of a multi-layered, multi-agency defense that is integral to domestic security.

The mission of the US-VISIT Program is to collect, maintain, and share information, including biometric identifiers, on foreign nationals to determine whether an individual (1) should be prohibited from entering the United States; (2) can receive, extend, change, or adjust immigration status; (3) has overstayed or otherwise violated the terms of their admission; (4) should be apprehended or detained for law enforcement action; or (5) needs special protection/attention (e.g., refugees).

United States Visitor Immigrant Status and Information Technology (US-VISIT) provides immigration and travel information on the activities of foreign nationals before they enter, when they enter, and when they exit the United States. While they are in the U.S., US-VISIT continues watch list checks to provide notification to ICE and other law enforcement agencies if criminal violations occur. US-VISIT collects biometric and biographic information on foreign nationals traveling to the United States. US-VISIT's technologically-based approach to immigration and border management will lead to the creation of a virtual border to the United States. The US-VISIT program also provides the data necessary to perform better analyses of our immigration system, inform policy development, and support proactive border management.

B. Budget Activities:

In fiscal year 2006, Congress appropriated US-VISIT \$336.6 million to continue ongoing operations including new development and implementation. Specifically the Program will utilize these resources to (1) complete US-VISIT initial operating capability and functionality that meets Congressional requirements at the remaining 104 land border ports of entry by December 31, 2005; (2) deploy equipment and software so that Customs and Border Protection (CBP) officers can biometrically compare and authenticate travel documents issued by Departments of State and Homeland Security to aliens; (3) begin the process necessary to transition to 10-fingerscan enrollment as announced by Secretary Chertoff; (4) working with the Department of Justice, design and build a prototype—the interim data sharing model—that is a first step towards a fully interoperable environment between DHS IDENT and FBI IAFIS; (5) develop and begin to deploy e-Passport readers; (6) plan and design new technology architecture; and (7) provide continued operations and maintenance support along with the program management capabilities established.

In fiscal year 2007, the US-VISIT Program plans to accomplish the following within the identified program increments:

Increment 2A: United States Travel Documents and e-Passports - This increment provides the deployment of the capability to (1) biometrically compare and authenticate travel documents issued by the Departments of Homeland Security and State to aliens; (2) biometrically compare and authenticate e-Passports (which include an integrated computer chip capable of storing biographic and biometric information) issued by the United States and VWP countries.

In fiscal year 2007, US-VISIT plans to (1) develop a deployment strategy for e-Passport readers that will read both United States and foreign chip-enabled passports while meeting the ICAO standard; (2) complete execution of test plans to support an international joint live operational test with Visa Waiver Program countries; and (3) issue and award the acquisition of the e-Passport readers, and (4) work to complete the implementation of e-passport readers at designated land and sea ports by October 26, 2006.

Increment 2C: Automated Radio Frequency Identification (RFID) - Land Border Ports of Entry - In Phase One of the initiative, conducted in fiscal year, DHS embedded an RFID tag into Form I-94/A (Arrival/Departure Form for nonimmigrant aliens) and implemented the U.S.-Pedestrian integrated client using pre-positioned RFID traveler information at land border pedestrian primary workstations. During Phase Two development and testing, conducted in fiscal year 2006, DHS will allow for the continued recording of traveler entries and exits, enable vehicle association to traveler identities, trigger updated biographic and biometric watch list checks and provide the results in a person-centric consolidated view to CBP Officers at vehicle primary entry and pedestrian primary inspection. Following Phase Two of the Proof of Concept, DHS will complete a cost benefits analysis, which will incorporate the analysis and evaluation of the results to guide decisions during the later stages of the increment.

Operations and Maintenance - Funding for Operations and Maintenance will be utilized in fiscal year 2007 to support the delivered functionality to air, sea and land ports of entry, including biometric matcher hardware to support the estimated growth in population coverage. These costs include funding for support personnel in the areas of systems management, operation and administration as well as expenses for ongoing software configurations, table maintenance, a call center and on-site help desk support, and other functional and technical support services as required.

Program Management and Operations - Funding for Program Management Operations is required in fiscal year 2007 to maintain the program management structure and a baseline operation that includes salaries and benefits for government full time equivalents, rent, supplies, program support contracts, and travel.

Increment 4: 10-Print Capture Automated Biometric Identification System (IDENT) and Integrated Automated Fingerprint Identification (IAFIS) Interoperability (\$60 million) - These funds will be used for the transition to 10-print collection at US-VISIT enrollment and begin planning and development of initial operating capability for the IDENT/IAFIS interoperability initiative. The funds will be utilized to complete the software and hardware infrastructure changes necessary for the 10-Print data capture to be accepted and stored in the IDENT system and to commence the implementation of 10-Print readers at locations currently using the US-VISIT processing (commensurate with the Department of State implementation at the consular posts overseas). In addition, US-VISIT will move towards the initial operating capability (IOC) phase of the IDENT/IAFIS interoperability, which will build a capability for sharing information to enhance checks beyond the existing watch lists to include information such as the Criminal Master File and the recidivist data. This IOC includes a fully supportive infrastructure to enable the exchange of data between the Federal Bureau of Investigation's and Department of Homeland Security's IDENT systems.

C. Budget Request Summary:

The US-VISIT Program requests 115 positions, 102 full time equivalents, and \$399,494,000 for fiscal year FY 2007. The total adjustments-to-base is zero FTEs and \$2,810,000. In addition, the fiscal year 2007 request includes resources to continue to plan and implement the transition to 10-Print and IDENT/IAFIS interoperability efforts – an increase of \$60,084,000 over FY 2007 current services level.

2007 Current Services	115	102	339,410
2007 Program Change	-	-	60,084
2007 Request	115	102	399,494
Total Change 2006-2007			62,894

US-VISIT requests a total of \$399.5 million for this activity in FY 2007. This is an increase of \$62.9 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The US-VISIT Program has launched the following incremental capabilities:

Increment 1: Entry/Exit – Air and Sea Ports of Entry - (Total Resources obligated to date is \$265.7 million) – provides capabilities to improve the entry and exit data at all air and sea ports of entry through the capture of traveler biographic and biometric information (inkless finger scans and digital photographs). US-VISIT implemented the automated entry/exit capability required by the Data Management Improvement Act of 2000 for nonimmigrant visa travelers at 115 air and 14 sea ports of entry on December 31, 2003.

Increment 2A: United States Travel documents and e-Passports - (Total resources obligated to date is \$37.8 million) - provides for the capability to (1) biometrically compare and authenticate travel documents issued by the Departments of State and Homeland Security to aliens and (2) biometrically compare and authenticate e-Passports containing an integrated computer chip capable of storing biographic and biometric information issued by the United States and VWP countries. In FY 2007, Increment 2A focuses on providing this capability at additional inspection lanes as the technology of the readers improves.

Increment 2B: Entry/Land Border - 50 Largest land border ports - (Total resources obligated to date \$155 million) – provided capability to electronically capture of traveler biographic and biometric information (Increment 1: Exit/Entry capability) at the 50 busiest land border ports. Specifically, this Increment provided the capability to electronically capture arrival data (biographic and class of admission) for travelers issued Form I-94 and Form I-94W including the capability to electronically capture biometric data (unless exempt), which consists of collecting from the traveler

US-VISIT - 6

two fingerprint scans and a digital photograph, and print the Form I-94 Departure Record and enable arrival data to be shared with other authorized border management users of the system.

Increment 2C: Automated Radio Frequency Identification (RFID) – Land Border Ports of Entry (Total resources obligated to date - \$82.1 million)- The goal of Increment 2C is to enhance the biometric entry capabilities as implemented in Increments 1, 2B and 3 at land POEs, through the issuance of a unique automatic identifier that can be passively read (requiring no action by the traveler) upon entry and remotely read during exit.

The implementation of RFID will: (1) issue electronic, unique traveler identification and link this unique identifier to the individual's biographic and biometric data; (2) provide additional information through the design and development of a person-centric view to the CBP officer at primary inspection who determines admissibility; (3) identify travelers who may be of significant law enforcement interest at exit as a result of watch list queries against traveler database; (4) record the land border entry and exit of each unique identifier automatically, passively, and remotely; (5) integrate information on travelers and vehicles at land border entry and exit, as well as providing access to relevant information to CBP officers; and (6) protect the privacy of travelers.

Increment 3: Entry/Remaining Land Border Ports of Entry (Total resources obligated to date \$26 million) – provided the same capture capability of Increment 2B at 105 land, ferry and rail crossings to enable the electronic capture of biographic, biometric, and related travel data for arriving nonimmigrant by December 31, 2005.

Increment 4: Modernization and Expansion of Systems and Capabilities -

US-VISIT will begin the transition to 1) ***10-Print Deployment***, which collect and process ten fingerprints of foreign visitors and improve screening, accuracy, and processing times; and 2) interoperability between the Federal Bureau of Investigation's IAFIS and Department of Homeland Security's IDENT systems that will support the sharing of alien biometric and biographic information, and integrated alien information systems and processes.

DHS Infrastructure Transformation Program

The Department's Infrastructure Transformation Program (ITP), led by the Office of the Chief Information Officer (OCIO), will integrate the IT infrastructures of the 22 legacy components into "One Infrastructure". Currently, most of the Department's components fund and are supported by separate and largely stove-piped IT infrastructures. This environment makes it difficult to share information across components and has resulted in redundant investments and wasted resources. The ITP will eliminate the duplicative infrastructures and provide common capabilities and services for all components to leverage.

The ITP consists of five domains with a Department component assigned as a steward responsible and accountable for the performance of each domain. The domains and their stewards are listed below:

- Network Services led by Customs and Border Protection (CBP);
- Data Center Services led by CBP;
- Email Services led by U.S. Coast Guard (USCG);
- Help Desk Services led by USCG; and
- Video Operations Services led by Federal Emergency Management Agency (FEMA).

The OCIO oversees the work of the stewards and the other components to ensure operational requirements are met and investments and resource allocations are balanced across the components.

Implementation of the ITP will eliminate the need for components to spend resources on improving their own infrastructures. Instead, some of the investment funding previously used for stovepiped infrastructures will be used to support the department-wide ITP effort. For example, CBP's IT initiatives such as the Automated Commercial Environment will benefit from the capabilities and services the ITP will provide such as network access, data center hosting, email/collaboration services, wireless access, integrated help desk, voice access, video services, and on-site support. Rather than independently developing new capabilities or augmenting legacy capabilities within CBP, the ITP will provide enterprise-level services that will benefit all components.

By investing in the ITP, DHS components will benefit from economies of scale while promoting Department integration, and improving information sharing and interoperability. The amount of IT investment funding from components to support the ITP is still under deliberation and any such proposal will be fully vetted with the Congress prior to any actions being taken.

IV. Program Justification of Changes

**Department of Homeland Security
United States Visitor and Immigrant Status Indicator Technology
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: 10-Print IDENT/IAFIS Interoperability

Strategic Goal(s) & Objective(s): 2.1, 6.2 and 6.4
PPA: _____

Program Increase: Positions 0 FTE 0 Dollars \$60,084

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	\$8,049
Program Increase 1							0	0	\$60,084
Total Request	0	0	\$0	0	0	\$8,049	0	0	\$68,133

Description of Item

The 10-Print Implementation and IDENT/IAFIS Interoperability initiative will provide the capability to biometrically screen foreign visitors to the United States through the collection of 10-Print slap capture at enrollment in US-VISIT and 2-Print verification. This fingerprint standard improves the ability to match enrollees' fingerprints against latent prints, mitigate concerns about false negatives when matching enrollees against poor quality prints, and ensures faster processing time in order to resolve false positives. This will provide the most complete, appropriate, timely, and relevant information to federal border management decision-makers about the eligibility and admissibility of a travelers and to federal investigators.

Justification

The FY 2007 budget request is \$399.494 million. An increase of \$60 million in FY 2007 is requested to continue the transition to 10-print capture and the IDENT/IAFIS interoperability initiative. US-VISIT, in conjunction with the Departments of State and Justice, will in FY 2006 and 2007 plan and begin to implementing the (the second stage as well) capability. The planning and implementation activities will involve supporting the IDENT / IAFIS interoperability activities, enrolling foreign nationals using 10-Print, enhancing the operational capabilities of IDENT, improving immigration and border management business processes, enhancing technology capabilities, and the deployment of the new technologies while advancing research and development efforts.

Impact on Performance (Relationship of Increase to Strategic Goals)

This increase will improve the Federal Government's ability to screen travelers. In addition, this increase will provide the resources to address a long-standing interoperability problem between the FBI's IAFIS system and DHS' IDENT system.

V. Exhibits and Other Supporting Materials

A. Justification of Proposed Legislative Language

**Department of Homeland Security
United States Visitor and Immigrant Status Indicator Technology
Justification of Proposed Changes in
Appropriation Language**

For necessary expenses of the United States Visitor and Immigrant Status Indicator Technology project, as authorized by section 110 of the Illegal Immigration Reform and Immigration Responsibility Act of 1996 (8 U.S.C. 1221 note), [\$336,600,000] \$399,494,000 to remain available until expended. [*Provided*, That of the total amount made available under this heading, \$159,658,000 may not be obligated for the United States Visitor and Immigrant Status Indicator Technology project until the on Committees on Appropriations of the Senate and the House of Representatives receive and approve a plan for expenditure prepared by the Secretary of Homeland Security that—

- (1) meets the capital planning and investment control review requirements established buy the Office of Management and Budget, including Circular A-11, part 7;
- (2) complies with the Department of Homeland Security information systems enterprise architecture;
- (3) complies with the acquisition rules, requirements, guidelines, and systems management practices of the Federal Government;
- (4) includes a certification by the Chief Information Officer of the Department of Homeland Security that an independent verification and validation agent is currently under contract for the project;
- (5) is reviewed Department of Homeland Security information systems enterprise architecture;
- (6) is reviewed Department of Homeland Security Investment Review Board, the Secretary of Department of Homeland Security, and the Office of Management and Budget; and
- (7) is reviewed by the Government Accountability Office]. (*Department of Homeland Security Appropriations Act, 2006.*)

Explanation of Changes:

The program is adjusting the requirement for an expenditure plan.

PPA Mission Statement

The mission of the United States Visitor and Immigrant Status Indicator Technology Program is to deploy an end-to-end information management on foreign nationals traveling to the United States, covering their interactions with federal officials before they enter, when they enter, while they are in the country, and when they exit. This comprehensive view of border management leads to the creation of a virtual border and sets the course to meet the Program's goals and mission. Implementation also provides the necessary data to perform better analyses of our immigration system, informs policy development and support proactive border management. The Program has established four goals to accomplish its mission: (1) enhance the security of our citizens and visitors, (2) facilitate legitimate travel and trade, (3) ensure the integrity of our immigration system, and (4) protect the privacy of our visitors. The Program is a key component of a multi-layered defense that is integral to domestic security.

Summary Justification and Explanation of Changes

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Salaries and Benefits	\$11,233	\$15,440	\$16,139	\$699

Salaries and benefits includes fiscal year for 102 full time equivalents in direct appropriations. This fiscal year increase is only for the cost of living allowance with zero growth in full time equivalents.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Transportation of Things	\$124	\$128	\$199	\$71

Transportation of things includes all the related transportation costs and care of such items during transportation, while they are in transit and other incidental costs are that are related to the movement of items from one location to another during the fiscal year.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Other Services	\$356,583	\$307,637	\$317,487	\$9,850

The fiscal year 2007 budget request is \$399,494 million. An increase of \$60 million in fiscal year 2007 is requested to continue the transition to 10-print capture and the IDENT/IAFIS interoperability initiative. US-VISIT in conjunction with the Departments of State and Justice will initiate steps in fiscal years 2006 and 2007 to begin planning and implementing the initial capability as well as planning for a long-term implementation. The planning and implementation activities will involve supporting the IDENT / IAFIS interoperability activities, enrolling foreign nationals using 10-Print, enhancing the operational capabilities of IDENT, improving immigration and border management business processes, enhancing technology capabilities, and the deployment of the new technologies while advancing research and development efforts.

	2005	2006	2007	2006 - 2007
	Actual	Revised Enacted	Request	Change
Equipment	\$20,944	\$6,822	\$59,096	\$52,274

Equipment includes all costs for the purchase of personal property of a durable nature or the initial installation of equipment under contract. The Program anticipates to purchase a large number of scanning workstations for Increment 2A, as well as equipment necessary for IDENT/IAFIS interoperability and Increment 2C pilots.

A. Mission and Description of the United States Visitor and Immigrant Status Indicator Technology

The Department of Homeland Security's United States Visitor and Immigrant Status Indicator Technology (US-VISIT) Program has established four goals to accomplish its mission: (1) enhance the security of our citizens and visitors, (2) facilitate legitimate travel and trade, (3) ensure the integrity of our immigration system, and (4) protect the privacy of our visitors. The US-VISIT Program is a key component of a multi-layered, multi-agency defense that is integral to domestic security.

The mission of the US-VISIT Program is to collect, maintain, and share information, including biometric identifiers, on foreign nationals to determine whether an individual (1) should be prohibited from entering the United States; (2) can receive, extend, change, or adjust immigration status; (3) has overstayed or otherwise violated the terms of their admission; (4) should be apprehended or detained for law enforcement action; or (5) needs special protection/attention (e.g., refugees).

US-VISIT contributes to the Department of Homeland Security's immigration and border management goals as well as provides our citizens and visitors with a more expeditious and secure process and experience.

B. Major Activities and Key Strategic Issues

In FY 2006, Congress appropriated \$336.6 million to US-VISIT to continue ongoing operations including new development and implementation. In FY 2006, specifically, the Program will (1) complete US-VISIT initial operating capability and functionality that meets Congressional requirements at the remaining 104 land border ports of entry by December 31, 2005 (utilizing FY05 funding) (2) deploy equipment and software so that CBP officers can biometrically compare and authenticate travel documents issued by Departments of State and Homeland Security to aliens by October 25, 2005 (utilizing FY05 funding); (3) Working with the State Department, begin the transition to 10 finger scan enrollment in at the direction of DHS Secretary Chertoff. (4) working with the Department of Justice, design and build a prototype—the interim data sharing model—that is a first step towards a fully interoperable environment between the DHS Automated Biometric Identification System (IDENT) and FBI Integrated Automated Fingerprint Identification (IAFIS); (5) develop and begin to deploy e-Passport readers; (6) plan and design new technology architecture; and (7) provide continued operations and maintenance support along with the program management capabilities established.

In FY 2007, the US-VISIT Program will use its resources to:

Increment 2A: United States Travel Documents and e-Passports - This increment provides the deployment of the capability to (1) biometrically compare and authenticate travel documents issued by the Departments of Homeland Security and State to aliens; (2) biometrically compare and authenticate e-Passports (which include an integrated computer chip capable of storing biographic and biometric information) issued by the United States and VWP countries.

In fiscal year 2007, US-VISIT plans to (1) develop a deployment strategy for e-Passport readers that will read both United States and foreign chip-enabled passports while meeting the ICAO

standard; (2) complete execution of test plans to support an international joint live operational test with Visa Waiver Program countries; and (3) issue and award the acquisition of the e-Passport readers, and (4) work to complete the implementation of e-passport readers at designated land and sea ports by October 26, 2006.

Increment 2C: Automated Radio Frequency Identification (RFID) - Land Border Ports of Entry – In Phase One of the initiative, conducted in FY 2005, DHS embedded an RFID tag into Form I-94/A (Arrival/Departure Form for nonimmigrant aliens) and implemented the U.S.-Pedestrian integrated client using pre-positioned RFID traveler information at land border pedestrian primary workstations. During Phase Two development and testing, conducted in fiscal year 2006, DHS will allow for the continued recording of traveler entries and exits, enable vehicle association to traveler identities, trigger updated biographic and biometric watch list checks and provide the results in a person-centric consolidated view to CBP Officers at vehicle primary entry and pedestrian primary inspection. Following Phase Two of the Proof of Concept, DHS will complete a cost benefits analysis, which will incorporate the analysis and evaluation of the results to guide decisions during the later stages of the increment.

Increment 4: 10-Print Capture and (IDENT) and (IAFIS) Interoperability (\$60 million) - These funds will be used for the transition to 10-print collection specifically the deployment of 10-Print readers at locations currently using the US-VISIT processing. Additionally, US-VISIT will initiate the implementation of the IDENT/IAFIS interoperability Initial Operating Capability (IOC), the target estimated schedule is the IOC will last 22 months beginning in October, 2006, as well as the planning for the FOC. US-VISIT IOC phase of the IDENT/IAFIS interoperability will build a capability for sharing information to enhance checks beyond the existing watch lists to include information such as the Criminal Master File and the recidivist data.

Fiscal Year 2005 Accomplishments:

- Deployed by December 29, 2004, initial operational biographic and biometric entry functionality in the secondary inspection areas at the 50 largest of land border ports of entry.
- Deployed the ability to read U.S.-issued travel documents by October 26, 2005, at all ports of entry.
- Deployed (using FY 2005 resources) US-VISIT biometric entry capabilities at the remaining 104 land border ports of entry in December, 2005.

Fiscal Year 2006 Accomplishments

- Initiated the process necessary to transition to 10-fingerscan enrollment as announced by Secretary Chertoff.
- Worked with the Department of Justice, design and build a prototype—the interim data sharing model—that is a first step towards a fully interoperable environment between IDENT and IAFIS.
- Developed and deployed e-Passport readers for the Visa Waiver Program (VWP) countries.

US-VISIT faces significant challenges:

- US-VISIT also has many private and public stakeholders including state, local and tribal governments, the private sector, and foreign governments. US-VISIT established a Federal Stakeholders Advisory Board that develops developing the recommendations for improving US-VISIT
- Access to timely, accurate, and common information about individuals who should be denied entry to the United States, including terrorists, criminals, and immigration law violators, is crucial to border decision makers and law enforcement officials. US-VISIT works with other DHS agencies, the Department of Justice, and the intelligence community to collect and share this important information.
- The technical ability to share this information across multiple systems is an important challenge to overcome. The implementation of an Integrated Project Team for the IDENT/IAFIS interoperability effort how US-VISIT and the Department of Justice and help resolve the interoperability problem between IDENT and IAFIS. In addition, US-VISIT is developing a memorandum of understanding on the appropriate, necessary and efficient use and sharing of VISIT information

C. Resources Requested and Performance Impact

The US-VISIT Program requests 115 positions, 102 full time equivalents, and \$399.494 million for FY 2007. The total adjustments-to-base is zero FTEs and \$62.894 Million to:

- (1) Implement the transition to I0-Print and IDENT/IAFIS interoperability efforts – an increase of \$60.084 million, and
- (2) Fund adjustments to base of \$2.810 million for the current 102 full time equivalents and non-labor resources.

D. How US-VISIT and Its Performance Goals Align to and Support the DHS Strategic Plan Objectives.

US-VISIT supports the DHS Strategic Plan Objectives by improving identity and document verification capabilities available to Immigration and Border management stakeholders to further enable them to make timely and accurate risk and eligibility decisions.

DHS Strategic Objective 2.1 – Secure our borders against terrorists, means of terrorism, illegal drugs and other illegal activity.

DHS Strategic Objective 6.4 - Facilitate the efficient movement of legitimate cargo and people.

E. Performance Based Budget Highlights by Program

Performance Goal: Improve the identity and document verification capabilities available to Immigration and Border Management stakeholders to enable them to make timely and accurate risk and eligibility decisions.					
Measure: Ratio of adverse actions to total biometric watch list hits at ports of entry	Fiscal Year	FY2004	FY2005	FY2006	FY2007
	Target	Not Applicable	Not Applicable	33%	36%
	Actual		30	TBD	TBD
Program: US-VISIT	\$ Millions	\$191,905	\$395,847	\$336,600	\$399,494
	FTE	66	84	102	102

Performance Goal: Improve the identity and document verification capabilities available to Immigration and Border Management stakeholders to enable them to make timely and accurate risk and eligibility decisions.					
Measure: Number of biometric watch list hits for visa applicants processed at consular offices	Fiscal Year	FY2004	FY2005	FY2006	FY2007
	Target	Not Applicable	600	800	725
	Actual		897	TBD	TBD
Program: US-VISIT	\$ Millions	\$191,905	\$395,847	\$336,600	\$399,494
	FTE	66	84	102	102

Performance Goal: Improve the identity and document verification capabilities available to Immigration and Border Management stakeholders to enable them to make timely and accurate risk and eligibility decisions.					
Measure: Number of biometric watch list hits for travelers processed at ports of entry	Fiscal Year	FY2004	FY2005	FY2006	FY2007
	Target	Not Applicable	1,925	1,850	1,850
	Actual		2,059	TBD	TBD
Program: US-VISIT	\$ Millions	\$191,905	\$395,847	\$336,600	\$399,494
	FTE	66	84	102	102

US-VISIT developed these temporary measures to measure performance in the early stages of deployment. The program will undergo a Program Rating Assessment Tool evaluation as part of the FY 2008 Budget process and will improve its measures and its commitment to performance evaluation.

iii. Status of Congressionally Requested Studies and Reports

Department of Homeland Security
Federal Emergency Management Agency

Status of Congressionally Requested Studies, Reports, and Evaluations

1. Conference Report 109-241, page 74, directs the Secretary, through FEMA, to issue new inspection guidelines that prohibit inspectors from entering into a contract for the sale of any house or household item he or she inspected for the purpose of determining eligibility for assistance from FEMA. Guidelines are to be issued not later than 90 days after enactment of FY 2006 appropriations for DHS. Target response is due to the Committees on January 16, 2006. General Provisions delete the Senate Bill HR 2360 EAS, page 77, requirement. This report was submitted to the Committees on January 26, 2006.
2. Conference Report 109-241, page 74, Crisis Counseling - In order to ensure that first responders continue to receive mental health and other services, the conferees direct FEMA to provide a report on the transition of these services from Federal to city administration by February 10, 2006.
3. House Report 109-79, page 95, directs FEMA to provide a report on the percentage of flood maps updated, not merely transferred to a digital format, and the percentage of population that the updated maps cover. Due date was revised in Conference to February 10, 2006.
4. House Report 109-79, page 92, directs FEMA to provide a report on the impact of a second consecutive year under a hiring freeze on emergency preparedness, mitigation, response, and recovery efforts. The report should include what steps FEMA has taken to ensure the costs are budgeted for in fiscal year 2007. Due date was revised in Conference to February 10, 2006.
5. Conference Report 109-241, page 74, directs the Secretary, through FEMA, to submit to the Committees on Appropriations a report describing any changes to Federal emergency preparedness and response policies and practices as a result of the Inspector General's report (OIG-05-20) related to Hurricane Frances, and relating to FEMA's individual and household program in Miami-Dade County, Florida, in response to Hurricane Frances. Target response is due to the Committees on Appropriations by February 10, 2006. General provisions delete the requirement in Senate Bill HR 2360 EAS, page 76, to provide the report to the Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives not later than 60 days after enactment of FY 2006 appropriations for DHS.
6. House Report 109-79, page 91, directs FEMA to provide a report on the status of: the demonstration program studying the use of public television digital broadcasting technology to provide secure, time-sensitive communications for Federal, State

FEMA - iii

iii. **Status of Congressionally Requested Studies and Reports (continued)**

7. and local governments; the pilot study for issuing public warnings using a system that is similar to the AMBER Alert communications network; and the overall status of upgrading the Nation's emergency communication system, including milestones and timelines. Due date was revised in Conference to February 10, 2006.
 8. Senate Report 109-83, page 78, directs the Department to provide a report on the impediments to timely obligations of Pre-Disaster Mitigation Grant funds, with recommendations for how to remedy the situation, and an inventory of outstanding grant applications by fiscal year. Due date was revised in Conference to February 10, 2006.
 8. Conference Report 109-241, page 72, and Senate Report 109-83, page 73, direct the Secretary to provide a report on the total costs in fiscal years 2005, 2006, and proposed for 2007 to operate and train the 28 Urban Search and Rescue (US&R) teams, the cost to maintain the first equipment cache, the cost to maintain the second equipment cache, the cost to replace expiring drugs, the costs to replace/repair equipment that has been used in training or actual disasters, and all other costs of the program. The report should include State, local, and Federal costs and an assessment of the appropriate share for each level of government. Due date was revised in Conference to February 10, 2006. This subsumes the requirement in House Report 109-79, page 91, directing FEMA to provide a report on the interoperability of the national US&R teams and Federal communications with States and locals during an incident.
 9. Conference Report 109-241, page 74, and House Report 109-79, page 94, direct FEMA to provide a report on overpayments made and recovered for the major disaster declarations of the past 4 years. The report should include analysis of additional safeguards that may be employed to prevent overpayments. Target response is due to the Committees on June 1, 2006.
- General Provisions delete the Senate Bill HR 2360 EAS, page 58, requirement directing the Secretary, through the Director of FEMA, to provide a report containing: (1) a detailed list that describes (as of the date of enactment of this Act) all associated costs (as determined by the Secretary) incurred by New York City, the State of New York, and any other entity or organization established by New York City or the State of New York, as a result of the September 11, 2001, terrorist attacks, that were paid using funds made available to Congress; (2) the amounts of funds made available after the September 11, 2001, terrorist attacks that remain unexpended as of the date of enactment of this Act; and, (3) a detailed description of any plans for expenditure or obligation of those unexpended funds.
- General Provisions delete the Senate Bill HR 2360 EAS, page 77, requirement directing the Secretary to conduct a study of the feasibility of leveraging existing FM broadcast radio infrastructure to provide a first alert, encrypted, multi-point emergency messaging system for emergency response using proven technology.

iii. Status of Congressionally Requested Studies and Reports (continued)

10. Conference Report 109-359, page 434, directs FEMA to provide to the House and Senate Committee on Appropriations a spend plan for the amount transferred to the National Disaster Medical System to support medical care, as authorized by Public Law 107-188. The spend plan is to include the amounts obligated and expended as of the date of the report, the methods used for allocating funds, and the rules established regarding the expenses eligible for payment from this appropriation. Target response is due to the Committees on February 28, 2006.
11. Conference Report 109-359, page 434, directs FEMA to notify the House and Senate Committee on Appropriations when a community disaster loan has been awarded, not later than 15 days after the award. Such notification shall include the amount of the loan, a brief assessment of the borrower's financial position, the reasons for the necessity of the loan, and a description of the essential services to be provided through the loan. Target response due dates will vary.
12. Conference Report 109-359, page 434, directs the Director of FEMA to issue guidance within 2 weeks of the date of enactment of this act (Emergency Supplemental Appropriations to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza, 2006) used to determine continued eligibility for housing assistance under the section 408 program. Such guidance shall include the extension of assistance if the recipient is unable to afford local housing at the Fair Market Rent level. Target date for issuance of guidelines is January 13, 2006.

FEMA - v

BUDGET REQUEST AND SUPPORTING INFORMATION
--

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)
ADMINISTRATIVE AND REGIONAL OPERATIONS

I. Appropriation Overview

A. Mission Statement for Administrative and Regional Operations (ARO): Funding for ARO supports all of FEMA's programs. ARO supports the Office of the Director of FEMA and its managers by coordinating effectively between Headquarters and Regional Offices all policy, managerial, resource, and administrative actions; maintains programs to address public information issues; and builds partnerships with and among State and local governments, nongovernmental organizations, business, and industry.

B. Budget Activities:

FEMA provides critical information to the public, to the media, and to the emergency management community regarding disaster response activities and awareness and readiness measures. ARO activity includes administrative and programmatic expenses for staff support to accomplish emergency readiness responsibilities, to assist in the management of disaster response and the deployment of medical, mortuary, and specialty teams, and to mobilize the National Disaster Medical System (NDMS) when necessary. Regional Operations ensures that FEMA policies, programs, and administrative and management guidance are implemented in the Regions in a manner consistent with the Department's overall goals. Also included in ARO are FEMA's intergovernmental and international outreach; information technology services; the Office of National Security Coordination; and financial, human resources, acquisition, and facilities management.

C. Budget Request Summary:

The FEMA FY 2007 request for its ARO functions is 1,117 positions, 1,115 FTE, and \$255,499,000. Adjustments to base total 40 FTE and -\$1,483,000. The program increases include 45 positions, 43 FTE, and \$20,754,000 to:

- Strengthen the essential support functions upon which FEMA's five programs (Readiness, Mitigation, Response, Recovery, and National Security) rely to carry out critical mission activities, and to address deferred maintenance of capital facilities and equipment; and upgrades of software and IT equipment. (4 positions, 2 FTE, and \$11,414,000)
- Increase FEMA's procurement capacity, and thereby enhance FEMA's ability to process procurement requests during both routine and extraordinary operating periods, ensuring effective delivery of services for disaster response and recovery and effective, efficient, and proper procurement and contracting (41 positions, 41 FTE, and \$5,000,000)
- Assess FEMA's internal controls as related to conformance with the requirements of the DHS Financial Accountability Act (0 positions, 0 FTE, and \$1,000,000)

FEMA - 1

- Make capital improvements at the Federal Regional Centers (FRCs), addressing basic maintenance and repairs associated with safety and operational viability such as asbestos abatement, HVAC repairs, electrical panel replacement, etc. (0 positions, 0 FTE, and \$1,540,000)
- Convert 22 of FEMA's National Security program term positions, supported by supplemental funding due to expire in FY 2007, to permanent positions, thereby aiding FEMA in fulfilling its role as the lead agent for COG, COOP, and contingency programs. (0 positions, 0 FTE, and \$1,800,000)

2007 Current Services	1,020	1,020	185,505
2007 Program Change	45	43	20,754
2007 Request	1,065	1,063	206,259
Total Change 2006-2007	45	83	19,271

FEMA requests \$206.259 million for this activity. This is an increase of \$19.271 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

ARO provides support to all of FEMA's programs. ARO also supports the Director of FEMA and his managers by effectively coordinating between Headquarters and Regional Offices all policy, managerial, resource, and administrative actions; maintains programs to address public information issues; and builds partnerships with and among State and local governments, nongovernmental organizations, business, and industry.

FEMA provides critical information to the public, to the media, and to the emergency management community regarding disaster response activities and awareness and readiness measures. ARO activity includes administrative and programmatic expenses for staff support to accomplish emergency readiness responsibilities, to assist in the management of disaster response and the deployment of medical, mortuary, and specialty teams, and to mobilize the NDMS when necessary. Regional Operations ensures that FEMA policies, programs, and administrative and management guidance are implemented in the Regions in a manner consistent with the Department's overall goals. Also included in this activity are FEMA's intergovernmental and international outreach; information technology services; and financial, human resources, acquisition, and facilities management.

The FY 2006 supplemental provided funding to support 80 positions and 40 FTE to ensure proper controls over the expenditure and management of funds appropriated for Hurricanes Katrina and Rita response and recovery. These resources are being used to establish a Gulf Region Acquisition Center and to increase finance and budget staff at FEMA to optimize efficiency, oversight, and internal controls over FEMA's management of emergency supplemental appropriations. While the supplemental funding was a one-time increase, albeit no-year funding, the FY 2007 base includes

\$10.7 million to support 80 FTE to continue this initiative to provide financial and procurement integrity for not only the hurricanes of 2005, but also for future events.

The Office of National Security Coordination (ONSC) provides Executive Agent leadership for Federal Government Continuity of Operations (COOP), Continuity of Government (COG), and National Contingency Programs that support enduring constitutional government. In 2007, ONSC will accomplish the following:

- Coordinate DHS policy, guidance, and positions on national security matters in coordination with the Homeland Security Council and other elements of the Federal Executive Branch
- Implement, manage, and provide coordination for all COOP/COG programs and activities
- Perform annual maintenance of COOP/COG plans, devolution plans, and multi-year strategic program management plans
- Maintain, update, and implement test, training, and exercise programs for COOP/COG capability
- Ensure that national security programs remain current and relevant to evolving threats, incorporating new missions, methods, and technologies
- Develop, coordinate, implement, and administer all contingency programs supporting national security responsibilities
- Serve as the White House's Executive Agent for the national-level Emergency Alert System (EAS) and the DHS program manager for the Integrated Public Alert & Warning System.

The EAS uses commercial radio and television broadcast services to send Presidential messages to the American people when catastrophic events occur and other national communications resources have been damaged or compromised. Funding initially realized in the FY 2006 supplemental for EAS upgrades has become part of the base. In FY 2007, \$5.0 million will be used to improve system coverage, reliability, survivability, and security by providing a two-way, national-level EAS satellite backbone/path that will effectively link all Federal, State, and U.S. Territory Emergency Operations Centers.

FEMA - 6

FEMA requests \$49.24 million for this activity. This is an increase of \$.45 million over FY 2006.

FEMA's defense-related programs support its National security mission, including information technology support.

DHS Infrastructure Transformation Program

The Department's Infrastructure Transformation Program (ITP), led by the Office of the Chief Information Officer (OCIO), will integrate the IT infrastructures of the 22 legacy components into "One Infrastructure". Currently, most of the Department's components fund and are supported by separate and largely stove-piped IT infrastructures. This environment makes it difficult to share information across components and has resulted in redundant investments and wasted resources. The ITP will eliminate the duplicative infrastructures and provide common capabilities and services for all components to leverage.

The ITP consists of five domains with a Department component assigned as a steward responsible and accountable for the performance of each domain. The domains and their stewards are listed below:

- Network Services led by Customs and Border Protection (CBP);
- Data Center Services led by CBP;
- Email Services led by U.S. Coast Guard (USCG);
- Help Desk Services led by USCG; and
- Video Operations Services led by Federal Emergency Management Agency (FEMA).

The OCIO oversees the work of the stewards and the other components to ensure operational requirements are met and investments and resource allocations are balanced across the components.

Implementation of the ITP will eliminate the need for components to spend resources on improving their own infrastructures. Instead, some of the investment funding previously used for stovepiped infrastructures will be used to support the department-wide ITP effort. For example, CBP's IT initiatives such as the Automated Commercial Environment will benefit from the capabilities and services the ITP will provide such as network access, data center hosting, email/collaboration services, wireless access, integrated help desk, voice access, video services, and on-site support. Rather than independently developing new capabilities or augmenting legacy capabilities within CBP, the ITP will provide enterprise-level services that will benefit all components.

By investing in the ITP, DHS components will benefit from economies of scale while promoting Department integration, and improving information sharing and interoperability. The amount of IT investment funding from components to support the ITP is still under deliberation and any such proposal will be fully vetted with the Congress prior to any actions being taken.

IV. Program Justification of Changes

**Department of Homeland Security
Federal Emergency Management Agency (FEMA)
Administrative and Regional Operations
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Strengthening Operational Capability

Strategic Goal(s) & Objective(s):

Strategic Goal 3: Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters, or other emergencies.

Objective: 3.5 Ensure the continuity of government operations and essential functions in the event of crisis or disaster.

Objective: 3.7 Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters, or other emergencies.

Strategic Goal 4: Lead, manage and coordinate the national response to acts of terrorism, natural disasters, or other emergencies.

Objective: 4.1 Reduce the loss of life and property by strengthening nationwide response readiness.

Objective: 4.2 Provide scalable and robust all-hazard response capability.

Strategic Goal 5: Lead national, state, local and private sector efforts to restore services and rebuild communities after acts of terrorism, natural disasters, or other emergencies.

Objective: 5.1 Strengthen nationwide recovery plans and capabilities.

Objective: 5.2 Provide scalable and robust all-hazard recovery assistance

PPA: Administrative and Regional Operations

Program Increase: Positions 4 FTE 2 Dollars \$11,414

Total Request	940	760	\$159,635	1,020	980	\$187,438	1,024	1,022	196,919

Description of Item

Funding for this request will be devoted to strengthening the essential support functions upon which FEMA's five programs (Readiness, Mitigation, Response, Recovery, and National Security) rely to carry out critical mission activities. The FTE and basic infrastructure and IT performance are essential to ensure FEMA is able to perform its core missions effectively in the future, especially during periods of strenuous operations when core capability and staffing are stretched to meet extraordinary demands. The funds requested also will help cover required expansions of Federally mandated programs, including equal employment opportunity continuing education, implementation of the No-Fear Act, and programs that support the President's Management Agenda, such as full implementation of cyber security requirements. The requested funds will provide resources for other costs that support DHS initiatives, SmartCard Program implementation, contributions for e-Gov, and Working Capital Fund contributions. This funding also will allow FEMA to meet anticipated rate hikes and inflationary increases in utilities, fuel costs, phone services, wage rate determinations, rental payments to GSA-leased facilities, transit subsidies, and security guard services.

Justification

This funding is specifically intended to reinforce FEMA's operating budget. Although FEMA's 2005 budget may appear to be large, less than \$450 million of the total funding has any flexibility for execution. The great majority of FEMA's budget is appropriated for specific purposes and cannot be reprogrammed to cover transfers from its base operating budget. In FY 2005, over \$2 billion was the regular annual appropriation to the DRF; \$2.5 billion was to fund Biodefense Countermeasures; over \$2 billion represented fee-supported programs--mainly the National Flood Insurance Program (NFIP); and \$487 million represented other specific programs such as NFIP, Map Modernization, Emergency Food and Shelter, and various mitigation programs. The remaining discretionary funds, approximately \$450 million, included fixed costs such as rent, security, and salaries and benefits.

Approximately 50 percent of FEMA's workforce is eligible to retire in the next 5 years, which will create a large number of vacancies. It is extremely important that FEMA be able to fill all of its vacancies in order to maintain essential mission skills and capabilities among its workforce. Moreover, FEMA needs to have sufficient resources for other items such as information technology, safety programs, and uncontrollable cost increases, such as rent, so that vacancies are not left unfilled in order to fund these other necessary expenses. Deferring maintenance leads to continued deterioration of FEMA's facilities and other capital assets and simply increases costs at a later date when emergency repairs must be made.

The funding will be used specifically for the following:

- Information Technology and Information Security (2 FTE and \$3,065,000)

FEMA's information technology systems provide FEMA with the necessary tools to do their jobs every day. FEMA's web site provides a wealth of information from how people can prepare for disasters to how they can get disaster assistance. Information systems are also critical for collecting and analyzing data from disaster victims so that they can get the help that they need as expeditiously as possible. So that these critical systems can continue to function, FEMA needs to protect both its internal and external networks to monitor, detect, and prevent security breaches. In addition, both staff and funding are needed to develop and maintain FEMA's Enterprise Architecture. Finally, FEMA needs an automated recruitment and staffing system. The Office of Personnel Management's goal that agencies post a vacancy announcement and make a tentative job offer within 45 days is not achievable

without an automated system. Automation is the only answer for an agency that could be called upon to hire thousands of people within a very short time period in order to meet mission critical needs.

- **Uncontrollable Cost Increases (\$2,620,000)**

Costs for GSA rent are expected to increase an estimated \$1.9 million over the FY 2006 level. An estimated 3 percent increase in both regional and headquarters transit subsidies will result in a cost increase of \$415,000. If FEMA were to absorb these cost increases within the base, it would result in deferred maintenance and/or reduced hiring ability for critical staff.

FEMA estimates that tariffs for both long distance and local phone service will increase by \$305,000. To fund these tariff increases within the base would make it difficult to maintain current bandwidth between permanent sites and make repairs when telephone switches break. The resulting slower network and telephone service degradations would hamper FEMA employees' ability to respond to disasters and to the public.

- **Equal Rights Travel and Training (\$340,000)**

Both the Equal Employment Opportunity Commission's (EEOC) management Directive 715 and the No-Fear Act establish continuing education requirements in order to prevent discrimination and improve management's ability to resolve complaints early. FEMA does not have sufficient funds within its base to meet these requirements.

- **Safety and Security (\$4,387,000)**

Protecting FEMA's employees allows them to perform their jobs that are so important to protecting the lives and property of the Nation's citizens without the distraction of worrying about their personal safety. Since September 11, increased costs for security guards at FEMA facilities have drained funds away from other FEMA programs. This budget request will also provide funding for critical infrastructure protection at 13 Agency facilities to protect both the facilities and employees from a broad spectrum of threats.

- **Repair and Maintenance Needs (\$1,002,000)**

Deferring repair and maintenance at FEMA owned facilities results in decreased productivity, lowered employee morale, and degraded safety conditions. This requested increase would correct deficiencies at Mobile Emergency Response System (MERS) facilities in both Maynard, MA and Denton, TX.

Impact on Performance (Relationship of Increase to Strategic Goals)

Without the requested funding, FEMA's baseline support functions will erode, directly impacting the ability of FEMA's five programs to fulfill the strategic goals and objectives previously noted. Over time, the erosion of infrastructure will impact the performance of FEMA's mission programs. Funding for this request will improve FEMA's essential support functions and will address the maintenance needs of capital facilities and equipment; upgrades of software and IT equipment; and provide travel and training funds. FEMA faces declines in program performance if additional operational funding is not provided.

Program Increase 2: Enhancement of Procurement Capacity

Strategic Goal(s) & Objective(s):

Strategic Goal 3: Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters, or other emergencies.

Objective: 3.5 Ensure the continuity of government operations and essential functions in the event of crisis or disaster.

Objective: 3.7 Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters, or other emergencies.

Strategic Goal 4: Lead, manage and coordinate the national response to acts of terrorism, natural disasters, or other emergencies.

Objective: 4.1 Reduce the loss of life and property by strengthening nationwide response readiness.

Objective: 4.2 Provide scalable and robust all-hazard response capability.

Strategic Goal 5: Lead national, state, local and private sector efforts to restore services and rebuild communities after acts of terrorism, natural disasters, or other emergencies.

Objective: 5.1 Strengthen nationwide recovery plans and capabilities.

Objective: 5.2 Provide scalable and robust all-hazard recovery assistance

PPA: Administrative and Regional Operations

Program Increase							41	41	5,000
Total Request	55	55	\$8,400	115	85	\$12,334	156	156	16,296

Description of Item

Funding is requested for 41 positions/FTE to enhance the workload capacity of FEMA's procurement staff.

Justification

DHS has identified Department-wide performance gaps in its procurement processes and is working to strengthen procurement capability across the board. The General Accounting Office (GAO Report GAO-05-179) and the Acting Inspector General (Memorandum to the Secretary of May 2, 2005) noted substantial inadequacies and imbalances in the number of contracting professionals throughout the Department. Specifically, FEMA was cited as one of four components at grave risk for fraud, waste, and abuse based on the inadequate numbers of contracting personnel available to meet mission requirements.

FEMA currently has 115 positions for procurement of which 60 were realized in the FY 2006 supplemental and are slated for the Gulf Region Acquisition Center. The workload for this staff during even routine operations is excessive. In addition, FEMA's missions require an expanded procurement capacity whenever a disaster strikes to provide responsive procurement and contracting services to meet disaster response and recovery requirements. Last year's four hurricanes, and this year's Hurricanes Katrina and Rita have stretched FEMA's procurement capability to the breaking point. Additional staffing is required to prevent FEMA's inability to perform its mission during disaster operations, to prevent fraud, waste, and abuse, and to ensure legal and regulatory requirements are met.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding for this request will enhance FEMA's ability to process procurement requests during both routine and extraordinary operating periods, ensuring effective delivery of services for disaster response and recovery and effective, efficient, and proper procurement and contracting actions.

Program Increase 3: Internal Controls Audit

Strategic Goal(s) & Objective(s):

Strategic Goal 3: Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters, or other emergencies.

Objective: 3.5 Ensure the continuity of government operations and essential functions in the event of crisis or disaster.

Objective: 3.7 Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters, or other emergencies.

Strategic Goal 4: Lead, manage and coordinate the national response to acts of terrorism, natural disasters, or other emergencies.

Objective: 4.1 Reduce the loss of life and property by strengthening nationwide response readiness.

Objective: 4.2 Provide scalable and robust all-hazard response capability.

Strategic Goal 5: Lead national, state, local and private sector efforts to restore services and rebuild communities after acts of terrorism, natural disasters, or other emergencies.

Objective: 5.1 Strengthen nationwide recovery plans and capabilities.

Objective: 5.2 Provide scalable and robust all-hazard recovery assistance

Description of Item

Funding would be used to comply with the internal control provisions of the DHS Financial Accountability Act (Public Law 108-330).

Justification

On October 16, 2004, the President signed into law the DHS Financial Accountability Act. The Act requires the Secretary of Homeland Security to include in the Performance and Accountability Report an audit opinion on the Department's internal controls over financial reporting. The requirements for internal control reporting and audit impose significant management challenges and resource demands on the Department and its components. To comply with the Act, the Department's components must develop documentation, perform test work, and support remediation efforts to transform legacy internal control structures to an integrated internal control framework. A clean audit opinion is a top priority of the Department.

Impact on Performance (Relationship of Increase to Strategic Goals)

The funding requested will allow for assessment of FEMA's internal controls as related to conformance with the requirements of the DHS Financial Accountability Act.

Program Increase 4: Federal Regional Centers Capital Improvements

Strategic Goal(s) & Objective(s):

Strategic Goal 3: Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters, or other emergencies.

Objective: 3.5 Ensure the continuity of government operations and essential functions in the event of crisis or disaster.

Objective: 3.7 Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters, or other emergencies.

Strategic Goal 4: Lead, manage and coordinate the national response to acts of terrorism, natural disasters, or other emergencies.

Objective: 4.1 Reduce the loss of life and property by strengthening nationwide response readiness.

Objective: 4.2 Provide scalable and robust all-hazard response capability.

Strategic Goal 5: Lead national, state, local and private sector efforts to restore services and rebuild communities after acts of terrorism, natural disasters, or other emergencies.

Objective: 5.1 Strengthen nationwide recovery plans and capabilities.

Objective: 5.2 Provide scalable and robust all-hazard recovery assistance.

PPA: Administrative and Regional Operations

Program Increase							0	0	\$1,540
Total Request	0	0	0	0	0	0	0	0	1,540

Description of Item

Constructed during the 1960s, the Federal Regional Centers (FRCs) were designed to be self-sufficient, self-contained facilities capable of operating independently of the public infrastructure for extended periods. They are equipped with specialized subsystems for essential operations, and are currently used for a variety of purposes to include: FEMA National Radio System communications systems, which provides support to DHS, to FEMA's National Security program, to the Integrated Wireless Network, and to local/regional governmental agencies; Continuity of Operations (COOP) sites; Regional Response Coordination Centers; conference centers; and administrative/office space.

Justification

The FRCs provide locations that are totally self-sufficient and equipped with subsystems for essential operations. Enhanced communications systems at these sites, such as FEMA's National Radio System and the Integrated Wireless Network, provide essential communications capabilities that help to ensure enduring constitutional government.

DHS has committed the FRCs to support many emergency readiness programs, including the Integrated Wireless Network. A recent study found that the requirements for large external antennas and high altitude electromagnetic pulse-hardened, secure facilities could not be reproduced economically, and therefore, because the FRCs provide critical communications support, commercial space was not a viable option to replace the FRCs. The FRCs provide the security or protection needed that can't be duplicated at commercial sites. Upgrading and maintaining these facilities is therefore the best option and in the best interest of the Department and its Federal partners.

FEMA's facilities budget has been directed to support rent and security costs, leaving insufficient funds to address regular repairs and maintenance needs. Funds are available only through reprogramming on an emergency basis. The requested funding will be used to address basic maintenance and repairs associated with safety and operational viability such as asbestos abatement, HVAC repairs, electrical panel replacement, etc.

By having self-sufficient sites with enhanced systems and communications capability available, the ability exists to provide a secure environment for government operations during or in response to a coordinated terrorist attack or an attack using weapons of mass effect.

Impact on Performance (Relationship of Increase to Strategic Goals)

Funding will allow the FRCs to continue to provide the capabilities they now support. FRCs provide a well-integrated COOP site and Regional Response Coordination Centers for two regions, meeting the requirements of the National Response Plan and Federal Preparedness Circular - 65. FRCs also provide qualified sites for a variety of communications support to DHS, FEMA's National Security

program, the Integrated Wireless Network, and others. One of the sites is owned by FEMA and the other may be acquired by FEMA due to future base realignment and closure actions. Because of the capabilities already in place, these sites provide significantly more cost-effective work sites than GSA can provide. Based on operational necessity, these facilities will remain active. FEMA will need to complete the health, safety, and operational upgrades this request seeks, in order to sustain the FRCs' viability.

Program Increase 5: Conversion of National Security Term Positions to Permanent Positions

Strategic Goal(s) & Objective(s):

Strategic Goal 3: Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters, or other emergencies.

Objective: 3.5 Ensure the continuity of government operations and essential functions in the event of crisis or disaster.

PPA: Administrative and Regional Operations

Program Increase: Positions 0 FTE 0 Dollars \$1,800

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	0
Program Increase							0	0	\$1,800
Total Request	0	0	0	0	0	0	0	0	1,800

Description of Item

The requested funding will be used to convert 22 of FEMA's National Security program term positions, supported by supplemental funding due to expire in FY 2007, to permanent positions. As a result of new and expanded mission requirements since the events of 9/11, these positions have become critical to FEMA's responsibility to serve as Executive Agent for COOP and COG, as directed in PDD-67.

Conversion of these positions from term to permanent will aid FEMA in fulfilling its role as the lead agent for COG, COOP, and Contingency Programs. These 22 positions will continue to support vital program activities in FEMA's National Security program, including direct support to the Homeland Security Council's COOP coordination activities; enhanced COOP and COG communications support and training; outreach communications support and training for COOP and COG; outreach to Federal departments and agencies in all 10 FEMA Regions; increased COOP readiness, training, and exercises; and classified COG operational support.

Justification

Since the events of 9/11, the Executive Office of the President, the National Security Council, and the Homeland Security Council have placed greater leadership demands on FEMA's National Security program, resulting in increased and expanded mission requirements. With supplemental funding provided by Congress, the National Security program has used personnel in term positions in order to accomplish its COOP and COG missions. These positions have bridged the gap in personnel coverage resulting from the increased requirements, and have been critical in ensuring FEMA's ability to fulfill its role in guaranteeing the survival of an enduring constitutional government.

The total cost for salaries and benefits for these positions is \$2.5 million annually. The \$.9 million in remaining supplemental funding will be applied toward these positions in FY 2007. An additional \$1.8 million is requested to provide full funding for the 22 FTE. FEMA is unable to absorb the salary and benefits costs necessary to convert these term positions to permanent positions. Without funding for these positions, FEMA will not have adequate personnel to carry out its assigned duties and responsibilities as required by Presidential Decision Directive-67 and other Executive Orders.

Impact on Performance (Relationship of Increase to Strategic Goals)

The conversion of the 22 term positions to full-time, permanent positions will enhance the capability of FEMA's National Security program to accomplish its assigned missions, both operational and program oversight, as assigned by the White House following 9/11. These permanent full-time positions will help reduce vulnerabilities to government facilities by providing the necessary manpower to plan, train, coordinate, and execute COOP and COG programs - both classified and unclassified - designed to ensure the uninterrupted delivery of emergency services and essential functions.

This funding will significantly contribute to performance by providing FEMA's National Security program with the manpower necessary to provide assistance to the Federal departments and agencies in carrying out their national security emergency readiness responsibilities; to issue guidance for agencies to use in developing viable, executable COOP plans; and, to lead, oversee, and assess the status of our constitutional form of government to ensure its survivability.

PPA Mission Statement

Funding for Administrative and Regional Operations (ARO) supports all of FEMA's programs. ARO supports the Office of the Director of FEMA and its managers by coordinating effectively between Headquarters and Regional Offices all policy, managerial, resource, and administrative actions; maintains programs to address public information issues; and builds partnerships with and among State and local governments, nongovernmental organizations, business, and industry.

The FY 2007 request will strengthen the essential support functions upon which FEMA's five programs (Readiness, Mitigation, Response, Recovery, and National Security) rely to carry out critical mission activities; address maintenance needs of capital facilities and equipment; upgrade software and IT equipment; increase FEMA's procurement capacity; annualize the integrity initiative funded initially in the FY 2006 supplemental (P.L. 109-148); assess FEMA's internal controls as related to conformance with the requirements of the DHS Financial Accountability Act; make capital improvements at the Federal Regional Centers (FRCs); and convert 22 of FEMA's National Security program term positions (initially supported by supplemental funding in FY 2002 which is estimated to run out early in FY 2007) to permanent positions, thereby aiding FEMA in fulfilling its role as the lead agent for COG, COOP, and contingency programs.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Salaries and benefits	\$78,964	\$110,789	\$116,820	\$6,031

Salaries and Benefits include costs for 763 FTEs. The FY 2007 request includes a net increase of \$6,031,000: increases of \$2,113,000 for the proposed January 2007 2.2 percent pay raise, \$200,000 to fund 2 FTE to manage contractor support for Enterprise Architecture, \$415,000 for transit subsidy increases, \$1,690,000 to convert National Security term positions to full-time permanent, \$4,016,000 to increase FEMA's procurement capacity, and \$9,020,000 to annualize the integrity initiative funded from the FY 2006 supplemental partially offset by decreases of \$10,780,000 in funding provided by the FY 2006 supplemental and \$643,000 associated with carryover funds obligated in FY 2006.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Travel	\$1,492	\$2,385	\$2,797	\$412

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes a net increase of \$412,000: increases of \$10,000 for the Enterprise Architecture support staff, \$100,000 for equal rights training, \$110,000 to convert National Security term positions to full-time permanent, \$82,000 to increase FEMA's procurement capacity, and \$320,000 to annualize the integrity initiative funded from the FY 2006 supplemental partially offset by decreases of \$160,000 in funding provided by the FY 2006 supplemental and \$50,000 associated with carryover funds obligated in FY 2006.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Transportation of things	\$292	\$779	\$779	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request is the same as the FY 2006 level.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
GSA rent	\$16,101	\$18,197	\$20,389	\$2,192

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes a net increase of \$2,192,000: increases of \$1,900,000 related to inflation and \$492,000 for space for additional procurement staff, partially offset by \$200,000 associated with carryover funds obligated in FY 2006.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Other rent	\$230	\$1,480	\$1,960	\$480

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 request includes a net increase of \$480,000: an increase of \$960,000 to annualize the integrity initiative funded from the FY 2006 supplemental partially offset by a decrease of \$480,000 in funding provided by the FY 2006 supplemental.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Communications, utilities, and misc. charges	\$5,113	\$1,143	\$1,691	\$548

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes a net increase of \$548,000: increases of \$305,000 for local and long distance tariff increases, \$123,000 to support the procurement initiative, and \$240,000 to annualize the integrity initiative funded from the FY 2006 supplemental partially offset by a decrease of \$120,000 in funding provided by the FY 2006 supplemental.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Printing	\$156	\$387	\$387	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request is the same as the FY 2006 level.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Advisory and assistance services	\$2,110	\$500	\$500	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other services	\$36,248	\$16,965	\$21,180	\$4,215

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a net increases of \$4,215,000: increases of \$2,254,000 in non-pay inflation; \$6,161,000 for IT, equal rights training, security, and an automated recruitment & staffing system, all of which are long-delayed initiatives that will improve operational capability; and \$1,000,000 to assess FEMA's internal controls as related to conformance with the requirements of the DHS Financial Accountability Act, partially offset by decreases of \$5,000,000 for document digitization and \$200,000 associated with carryover funds obligated in FY 2006.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Purchases from Government accounts	\$7,296	\$11,621	\$13,530	\$1,909

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes increases of \$1,909,000: \$200,000 in non-pay inflation and \$1,709,000 in guard service costs that have been absorbed since 2002 and have resulted in delayed purchases of supplies, equipment, and necessary maintenance.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Operation & maintenance of facilities	\$2,229	\$228	\$1,228	\$1,000

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$1,000,000 for FRC upgrades.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Research and development	\$15	\$290	\$290	\$0

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Operation & maintenance of equipment	\$235	\$1,341	\$1,441	\$100

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request includes an increase of \$100,000 to improve operational capability.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Supplies & materials	\$2,172	\$2,649	\$2,655	\$6

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes a net increase of \$6,000: increases of \$4,000 for the Enterprise Architecture support staff, \$82,000 to increase FEMA's procurement capacity, and \$80,000 to annualize the integrity initiative funded from the FY 2006 supplemental partially offset by a decrease of \$160,000 in funding provided by the FY 2006 supplemental.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Equipment	\$3,618	\$7,591	\$7,986	\$395

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes a net increase of \$395,000: increases of \$10,000 for the Enterprise Architecture support staff, \$500,000 to improve FEMA's security and IT systems, \$205,000 to increase FEMA's procurement capacity, \$100,000 for FRC upgrades, \$5,000,000 for Emergency Alert System (EAS) upgrades, and \$80,000 to annualize the integrity initiative funded from the FY 2006 supplemental partially offset by decreases of \$400,000 in integrity initiative funding and \$5,100,000 for EAS upgrades, both of which were provided by the FY 2006 supplemental.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Land & structures	\$91	\$12,958	\$13,398	\$440

Land and structures include the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2007 request includes an increase of \$440,000 for FRC upgrades.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Grants/Subsidies/Contributions	\$691	\$135	\$135	\$0

Grants/Subsidies/Contributions include cash payments to States, other political subdivisions, corporations, associations, and individuals. The FY 2007 request is the same as the FY 2006 level.

PPA Mission Statement

Funds provided by this appropriation supported the activities of the Under Secretary for Emergency Preparedness and Response. Under the recent realignment of the Department of Homeland Security, the position of Under Secretary for Emergency Preparedness and Response no longer exists; instead FEMA is managed by a Director. Beginning in FY 2006, funding for the Director's Office is included under the Administrative and Regional Operations appropriation.

Summary Justification and Explanation of Changes

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
Salaries and benefits	\$2,538	\$0	\$0	\$0

Salaries and Benefits are no longer requested for this account.

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
	\$200	\$0	\$0	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. In FY 2007, funds are not requested for this account.

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
Other services	\$428	\$0	\$0	\$0

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. In FY 2007, funds are not requested for this account.

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
Research and development	\$10	\$0	\$0	\$0

Research and Development includes costs for contracts for the conduct of basic and applied research and development. In FY 2007, funds are not requested for this account.

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
Equipment	\$100	\$0	\$0	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. In FY 2007, funds are not requested for this account.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)
READINESS, MITIGATION, RESPONSE, AND RECOVERY

I. Appropriation Overview

A. Mission Statement for Readiness, Mitigation, Response, and Recovery (RMRR): Funding for Readiness, Mitigation, Response, and Recovery provides for the development and maintenance of an integrated, nationwide capability to prepare for, to mitigate against, to respond to, and to recover from the consequences of major disasters and emergencies, regardless of cause, in partnership with other Federal agencies, State, local, and Tribal governments, volunteer organizations, and the private sector.

B. Budget Activities:

The Readiness Program works with the Response and Recovery Divisions to ensure operational readiness for disasters of all kinds, regardless of cause. Readiness also coordinates and brokers agency and construction planning initiatives in support of operational response and recovery objectives for the National Response Plan (NRP) and for the National Incident Management System (NIMS). Readiness operates and directs the NIMS Integration Center (NIC), which is the Executive Agent for the NRP. Readiness plays a critical role in coordinating the various components of the NRP and ensures that the NRP remains linked to, and based upon, the NIMS.

The Mitigation Program's intent is to strengthen mitigation nationwide to reduce the Nation's risk to natural disasters or other emergencies, and to facilitate adoption and enforcement of up-to-date design and construction practices through State and local building codes. Mitigation funding supports activities that result in sound risk management decisions by individuals, private and public sector entities, State, local, and Tribal governments, and Federal agencies. The Mitigation Division's programs are accomplished through three core activities: risk identification and assessment, risk reduction, and insurance against flood risk. These core activities work in tandem to create safer communities by reducing the loss of life and property, to enable individuals to recover more rapidly from floods and other disasters, and to lessen the financial impact on the U. S. Treasury, States, and local and Tribal communities.

FEMA's Response Program represents the core Federal response capability to save lives and to protect property in communities throughout the U. S. that have been overwhelmed by the impact of a major disaster or an emergency, including an act of terrorism and the use of weapons of mass effect (WME).

Response Program activities encompass coordination of all Federal emergency management response operations and response planning and logistics programs, and integration of Federal, State, Tribal, and local response programs to ensure efficient and effective delivery of immediate emergency assistance to individuals and communities impacted by major disasters or emergencies, including acts of terrorism, as well as incidents involving WME.

The Recovery Program works to ensure that individuals and communities affected by disasters of all sizes, including those caused by terrorism, are able to return to normal function with minimal suffering and disruption of services.

C. Budget Request Summary:

The FEMA FY 2007 request for its RMRR functions is 946 positions, 939 FTE, and \$239,499,000. Adjustments to base total 0 FTE and \$296,000. The program increases include 34 positions, 117 FTE, and \$31,186,000 to:

- Strengthen FEMA's response, recovery, readiness, and mitigation functions by providing sufficient funds to fill vacant positions; address maintenance needs and life cycle replacement for equipment for FEMA's Mobile Emergency Response System (MERS); upgrade equipment in FEMA's National and regional response coordination centers; and provide for travel and training. (0 positions, 90 FTE, and \$17,586,000)
- Cover costs that directly result from FEMA's participation in National Special Security Event (NSSE) operations, as well as other special events designated by the Secret Service, the Federal Bureau of Investigation, and the Homeland Security Special Events Interagency Working Group (0 positions, 0 FTE, and \$1,300,000)
- Identify and initiate improvements and revisions to components of the NRP, and identify the resources necessary and their availability for mission-based operations during incidents of national significance or Presidentially declared disasters or emergencies (14 positions, 7 FTE, and \$5,300,000)
- Manage pre-positioned equipment program assets slated to be transferred in FY 2006 within FEMA's logistic program (20 positions, 20 FTE, and \$7,000,000).

Department of Homeland Security
Federal Emergency Management Agency
Readiness, Mitigation, Response, and Recovery
Program Performance Justification
(Dollars in thousands)

PPA: OPERATING ACTIVITIES

	Perm Pos	FTE	Amount
2005 Actual	1,013	874	\$210,331
2006 Revised Enacted	904	814	182,217
2007 Adjustments to Base	0	0	279
2007 Current Services	904	814	182,496
2007 Program Change	34	117	31,186
2007 Request	938	931	213,682
Total Change 2006-2007	34	117	31,465

FEMA requests \$213.682 million for this activity. This is an increase of \$31.465 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Readiness: FEMA's Readiness Division works with the Response and Recovery Divisions to ensure operational readiness for disasters of all kinds, regardless of cause. Readiness also coordinates and brokers agency and interagency planning initiatives in support of operational response and recovery objectives for the NRP and for the NIMS. Readiness operates and directs the NIC, which is the Executive Agent for the NRP. Readiness plays a critical role in coordinating the various components of the NRP and ensures that the NRP remains linked to, and based upon, the NIMS.

In FY 2006, FEMA's Emergency Management Institute (EMI) will develop, deliver, and evaluate the effectiveness and the impact of national-level training programs in the areas of risk management and emergency response using a diverse training delivery system that includes residential onsite training; offsite delivery in partnership with emergency management training systems, colleges, and universities; and technology-based mediums to conduct individual training courses for emergency response personnel across the Nation. EMI directly supports the implementation of NIMS and NRP. EMI training targets a diverse audience, including the FEMA disaster workforce and other partners involved in disaster operations.

In FY 2006, the NIC will maintain and continually refine the NIMS and its components over the long term. The NIC will provide the central activity to ensure that the NIMS is a continuously improving system of response that unites all responders in the United States through common organizations, common terminology for resources, and interoperable equipment and communications. These activities will be constantly evaluated and improved based on lessons learned and on the evolution of technology and protocols as directed in Homeland Security Presidential Directive (HSPD)-5. The NIC will begin to develop and to deliver a national mutual aid and resource management system that includes first responder and emergency worker credentialing based on national standards, that supports

the NIMS, and that allows Federal, State, and local governments to order and to track response resources quickly and effectively.

In 2007, FEMA's Readiness Division expects to:

- Continue to develop, deliver, and evaluate the effectiveness and the impact of EMI's national-level training programs
- Continue to integrate the NRP and the NIMS into Federal response operations through the NRP/NIMS/Incident Command System (ICS) Integration element, which coordinates closely with Federal response teams, other Federal agency partners, and emergency support functions. Readiness also will work with Response to integrate the ICS into all existing and newly formed Federal response teams to ensure that proper protocols and consistent team operations are followed in every disaster response operation. Readiness will continue its outreach to Federal response agencies and to State and local counterparts to ensure connectivity and synchronization under NIMS. FEMA also will continue to conduct ICS training for Federal response teams to acclimate them to the NIMS doctrine, and will continue to update printed manuals, materials, and functional documents to reflect NIMS protocols, and to ensure baseline skills capability for all teams under the NIMS system through an integrated ICS/NIMS training regimen. The new NIMS environment requires synchronization of many operational concepts within a divergent body of teams from within DHS and the interagency community to allow full NIMS integration. Implementing this standard will allow FEMA greater ability to test, to evaluate, and to ensure that all team members will remain well-versed in standard doctrine.
- Support emergency management readiness planning, resources management, and capability enhancements through operation of a comprehensive technical assistance program delivered through FEMA regional offices
- Under the auspices of HSPD - 5, continue to develop and to implement standards and performance criteria and guidelines in support of NRP and NIMS
- Develop and implement a Remedial Action Management Program (RAMP) to support implementation and improvement of FEMA's operational response and recovery efforts
- Continue to improve and to enhance the RAMP process, both internally and with Federal, State, Tribal, and local partners participating in response-focused exercises and responding to actual incidents
- Coordinate FEMA participation in, and support of, homeland security exercises sponsored by external organizations; plan, prepare, conduct, and evaluate internal FEMA exercise activities; coordinate Federal department and agency participation in exercises at the national and regional levels, incorporating the NRP and the NIMS
- Continue to identify and to implement requirements for the matrix organization to accomplish FEMA's response and recovery mission and to address a comprehensive emergency management program

- Establish the NRP Steering Committee (NRPSC) to serve as a point of contact for NRP signatory agencies and organizations. The committee, through three subcommittees, will provide a forum to develop supporting plans and procedures, will ensure a comprehensive NRP training curriculum, and will coordinate evaluation of the NRP.

NIMS Integration Center (NIC)

- Through a standardized credentialing initiative, establish a comprehensive system of effective classification for all response personnel and for the entire disaster workforce. Credentialing ensures that all teams and response staff are properly trained for optimum response readiness and professional capability. This initiative will bring the Federal response elements into compliance with NIMS and ICS. Response activities and exercises will be evaluated, as will be team performance and capabilities. Remedial actions and future development will be linked and determinations on budget requests and planning will be based on performance and the achievement of goals.
- Manage the National Mutual Aid and Resource Management Initiative, particularly in support of NIMS, focusing on conducting an inventory of Federal, State, Territorial, and local resources as well as the continued phased rollout of an automated resource management and tracking system
- Continue to identify and to share at the Federal level innovative and successful emergency management-related lessons learned and smart practices for DHS/FEMA and their operational NRP partners to improve emergency management capabilities throughout the Federal government; increase scope and frequency of publication and distribution; perform analyses of smart practices implementation; continue to develop a Federal-specific module;
- Support and integrate NRP, NIMS, and ICS to achieve the highest level of readiness and operational capability within DHS and in other agencies that have homeland security responsibilities
- Evaluate NRP in conformance with baseline requirements
- Revise and maintain the NRP based on lessons learned from disaster response operations

In FY 2007, FEMA's Readiness Division will support the President's *National Strategy for Homeland Security* through the continued development and implementation of a single NRP/NIMS to be accomplished by: mandatory use of a common ICS/Unified Command System; team member credentialing; and development and fielding of advanced support technology to incident command and response operations. The NIMS will eventually be capable of meeting:

- Mission requirements according to established standards
- Evaluation standards determined through a systematic testing and exercise program that will evaluate 75 percent of Federal response teams by FY 2007

In order to meet these objectives, FEMA will continue to set and to achieve milestones that are required to build a fully mission-capable NRP and to lay the foundation for an effective and efficient NRP that is designed to meet and is capable of meeting the needs of communities throughout the U.S. that are overwhelmed by major disasters, emergencies, or acts of terrorism. Cost efficiencies will

continue to be realized by the elimination of duplicative and overlapping functions, the streamlining of operations, and improved linkages among Federal responders.

Mitigation: The Mitigation Division's programs work to change conditions and behavior to prevent potential disaster losses, and are accomplished through three core activities: risk identification and assessment, risk reduction, and insurance against flood risk. These core activities work in tandem to:

- Create safer communities by reducing the loss of life and property
- Enable individuals to recover more rapidly from floods and other disasters
- Lessen the financial impact on the U. S. Treasury, States, and local and Tribal communities

The Mitigation Program's intent is to strengthen mitigation nationwide to reduce the Nation's risk to natural disasters or other emergencies, and to facilitate adoption and enforcement of up-to-date design and construction practices through State and local building codes. Mitigation funding supports activities that result in sound risk management decisions by individuals, private and public sector entities, State, local, and Tribal governments, and Federal agencies.

FY 2007 base resources will be used to:

- Provide training and technical assistance for State and local officials
- Implement approved performance metrics for the National Earthquake Hazards Reduction Program (NEHRP)
- Provide technical assistance to enable State and local planners to implement approved performance metrics for NEHRP
- Continue the development of building design guidance (physical security, lifelines, critical infrastructure), addressing man-made hazards for use by design professionals and the public
- Provide grants for mitigation and measure grant funding to enable communities to reduce more effectively and efficiently their losses from future disasters
- Continue the development of tools and data to document losses avoided through successful mitigation activities
- Enhance the benchmarking capability of State and local partners by including additional elements such as maps, photographs, and losses avoided studies in the web-delivered tool for accessing Mitigation Best Practices
- Develop a strategic decision-making tool for meeting training needs that will focus on increasing State and local capabilities for effective delivery of Mitigation programs

Response: FEMA's Response Program consists of five sub-programs that represent its main mission areas - Response Direction, Command, and Control; Specialized Response Teams; Logistics; Response

Planning; and Health and Medical Response. The Response Program represents the core Federal response capability to save lives and to protect property in communities throughout the U. S. that have been overwhelmed by the impact of a major disaster or an emergency, including an act of terrorism and the use of WME.

Response Program activities encompass:

- Coordination of all Federal emergency management response operations and response planning and logistics programs
- Integration of Federal, State, Tribal, and local response programs to ensure efficient and effective delivery of immediate emergency assistance to individuals and communities impacted by major disasters or emergencies, including acts of terrorism, as well as incidents involving WME

Each of the elements of the Response Program represents a key component of the Federal Government's ability to conduct effective and efficient response operations and directly contributes to the successful implementation of the NRP and the NIMS as established in HSPD-5.

In FY 2007, FEMA's Response Division will support the President's *National Strategy for Homeland Security* through the continued development and implementation of a single NRP/NIMS to be accomplished by development and fielding of advanced support to incident command and response support management to include assured secure and nonsecure interoperable communications, automatic data processing systems, and Geographic Information System (GIS) capabilities to provide a distributed, real-time, common view of incident response. The NIMS will eventually be capable of meeting:

- Reduced average response times for all Response Program teams from 48 hours to 36 hours to ensure the maximum capability to save lives and to protect property
- Expanded medical and hospital capacity to respond to large-scale patient evacuations and mass care, including contaminations. In FY 2007, 25 percent of National Disaster Medical System (NDMS) teams will be trained and exercised in large-scale patient and mass casualty evacuations.
- All major disaster and emergency requirements, including acts of terrorism and catastrophic disasters that exceed State and local capabilities

Response Direction, Command, and Control

Operations Centers are the central coordination elements for all Federal response teams. The operations centers consist of the National Response Coordination Center (NRCC), the 24-hour FEMA Watch Team, the FEMA Operations Center, and others. These operations centers coordinate the collection and dissemination of information from disaster operations, from field teams, and from other sources on current situations.

Disaster Workforce Management coordinates the deployment, tracking, and credentialing of all response teams. The Disaster Workforce Management function is also responsible for integration of NDMS teams into the rest of the disaster workforce, tracking teams as they deploy to the field and to

disaster support facilities. Every team that is sent into the field to respond to a disaster under the Stafford Act (and under public health authority as well) is rostered, deployed, and tracked in order to maintain visibility of assets in the field. This element is undergoing a major redesign that consolidates activities, systems, and resources from the various legacy response teams that are now part of a consolidated Federal response. As the Response Program strives to achieve a shortened response time and common credentialing for all teams under NIMS and ICS standards, the Cadre Management element, which ensures that teams are rostered, trained, and equipped to deploy, will have an increasingly important role.

Federal Incident Response Support Teams (FIRSTs), Management Support Teams (MSTs), and Incident Support Teams (ISTs) are core, field-level teams that support the response to major disasters, emergencies, and acts of terrorism. ISTs and MSTs are pre-existing elements that made up the management cells for the Urban Search and Rescue (US&R) task forces and the NDMS. The FIRSTs implement the NRP using the NIMS process, and are the initial Federal response assets to be deployed in support of the local incident commander in response to a major disaster, emergency, or act of terrorism, including the use of WME. The FIRSTs are the primary support element to State, Tribal, and local emergency responders, and they coordinate the delivery of immediate Federal response assistance as well as the integration of Federal, State, Tribal, and local emergency response operations. Depending on the size and scope of the incident, a FIRST will interact with all other elements of the Response Direction, Command, and Control and Specialized Response Teams sub-programs to ensure a fully coordinated, comprehensive, and effective response effort to save lives and to protect property. The MSTs and ISTs will be integrated into the FIRST operational protocols.

Special Events Operations support the readiness capabilities and planning for designated National Security Special Events to ensure an effective response to possible emergencies, to ensure public health and safety, and to protect property against threats or acts of terrorism. Support generally consists of activating operations centers and liaisons and is dependent upon the needs identified for each event.

Specialized Response Teams

Urban Search and Rescue (US&R) Task Forces provide the coordinated, national, all-risk capability for locating, extricating, and stabilizing victims of structural collapse resulting from natural and human causes, including those involving terrorism and WME. *Also see the Urban Search and Rescue PPA below.*

National Disaster Medical System (NDMS) Response Teams provide medical, mortuary, veterinary, evacuation, and field hospital care in emergencies and disasters, and can be activated by either the public health authorities or by the Stafford Act. NDMS teams are an important component of the overall NDMS that partner with the Department of Health and Human Services (DHHS), the Department of Veterans Affairs, and the Department of Defense (DOD) to provide evacuation and hospitalization response capabilities. NDMS has embarked on a comprehensive team readiness evaluation and enhancement initiative that will see every team achieve full operational status within 4 years of its initial evaluation. This initiative will ensure that every team has the operational, functional, and staffing capability to effectively deploy.

Mobile Emergency Response System (MERS) detachments are mobile, self-sufficient emergency response units designed to support Federal all-hazards response operations by providing integrated and

interoperable communications and life support to meet the needs for disaster response activities, as well as the needs for planned special events. MERS detachments are managed centrally by Headquarters and are dispersed throughout the U.S. to improve the efficiency and cost-effectiveness of the NRP and to allow staff at the Joint Field Offices (JFOs) to focus on immediate response and recovery activities. Additionally, MERS operates the five MERS Operations Centers as an integral part of the FEMA network of operations centers.

Logistics Materiel Management Teams provide a comprehensive support and distribution system for equipment and commodities to effectively support all disaster victims and emergency teams responding to major disasters and emergencies, including acts of terrorism and incidents involving WME. Logistics is a pivotal component of the Response Program because it provides the equipment, commodities, and resources that are critical for Federal response teams to effectively perform their missions at disaster sites. These teams are responsible for acquiring specialized team caches, moving assets, storing equipment and supplies, reconstituting equipment, and accounting for property and equipment. These teams will continue to acquire equipment to reduce their average response time from 60 hours to 48 hours in FY 2007 to provide essential services and support to an impacted community with a population of 50,000.

The Nuclear Incident Response Teams (NIRTS) owned by the Department of Energy (DOE), are the core Federal response personnel for disasters or emergencies involving nuclear and radiological materials. The NIRTS provide operational control when deployed in response to an actual or threatened terrorist act, disaster, or other emergency. The NIRTS are managed by DOE's National Nuclear Security Administration, but FEMA's Response Division is responsible for operational control and deployment decisions.

The Domestic Emergency Support Team (DEST) provides integrated coordination of Department of Justice and DHS operations in response to acts of terrorism or national security emergencies. The DEST is a specialized interagency U. S. Government team designed to provide expert advice, guidance, and support to the Federal Bureau of Investigation (FBI) On-scene Commander and the Principal Federal Official during a WME incident or credible threat. It also provides leadership and training oversight to the seven Federal agencies which comprise the DEST by addressing aggressively team readiness and training requirements. DEST partners include FEMA, DHS, FBI, DOE, DHHS, the Environmental Protection Agency, and DOD.

The Hurricane Liaison Team deploys to the National Hurricane Center to provide the liaison between the National Hurricane Center and the Federal, State, Tribal, and local governments' response system components, and provides an additional access point for critical interagency technology transfer to enhance all-hazards response capability.

National Emergency Response Teams (ERT-Ns) are initial response teams comprised of various FEMA program component experts who partner with Federal, State, and local emergency response agencies as pre-staged elements or in the beginning phases of a major disaster. Teams support Regions with command and control in large, complex response operations, help coordinate provision of Federal aid, and lead the integrated Federal response in support of a State. The ERT-N coordinates Federal response efforts through the Regional Response Coordination Center and the NRCC until a more permanent JFO can be established in the affected State.

Logistics

The Emergency Housing Support element is responsible for storing and delivering adequate emergency housing capabilities to disaster operations to ease the pain and suffering of affected communities. In partnership with the Recovery Program, Response Logistics will identify appropriate emergency housing models and will facilitate plans for storage and distribution to affected disaster areas.

Emergency Communications consists of a flexible mix of resources designed to meet all-hazards and national security emergency requirements, supports the MERS field units, and ensures continuity of communications through fixed detachment facilities across the country.

Logistics Support Operations consist of warehouse facilities and systems used to store, to maintain, to transport, and to track logistical material, commodities, and capabilities in emergencies and disasters. FEMA will develop a plan to transition regional warehouses to the newly consolidated logistics system. FEMA will also develop a plan that outlines a National logistics strategy that will streamline duplicative disaster response assets, warehouses, operating procedures, and associated management structures.

The Pre-positioned Disaster Supplies (PPDS) initiative will pre-stage logistics containers that contain initial emergency supplies that will be used to relieve the suffering of disaster-affected victims in the first days after a disaster. PPDS is meant to reduce response times and to allow States to have the flexibility to deploy logistical resources as needed in disasters.

Total Asset Visibility (TAV) is a system of information that provides the location of assets (or commodities) through their entire lifetime, from initial purchase through disposal. A TAV system that reports the location of all FEMA disaster resources is necessary to ensure and to improve accurate and timely responses to disaster situations. Implementation and use of the TAV system will improve the visibility of asset location and time of arrival, will increase the efficiency of existing asset utilization, and will improve the accuracy of inventories of assets and equipment.

Response Planning

Response Planning builds the foundation, through plans, procedures, and processes developed in cooperation with Federal, State, Tribal, and local partners, for effective and efficient response operations. Response Planning includes planning for all types of major disaster and emergency situations, including terrorist attacks or other incidents involving WME.

The full integration of response plans and functions at all levels of government and the annual testing and evaluation of them is critical to ensure that all individuals in response operations are 100-percent mission-knowledgeable, -proficient, and -capable. Without fully integrated plans, the existence of independent plans at the Federal, State, Tribal, and local levels renders response operations ineffective since response team members and workers are not familiar with each other's roles. Once the basic plans have been integrated and completed at all levels, the tailoring of those plans to meet specific major disasters, emergencies, or incidents involving terrorist attacks or WME is the next critical component.

Disaster sites should not be training sites. Response officials must be fully proficient in their respective roles in responding to all-hazards incidents in order to save lives and to protect property. Response Planning is a critical support system to the Response Direction, Command, and Control sub-program. In addition, studies have determined that adequate Response planning, supported by regular tests, exercises, and evaluations of the plans, processes, procedures, and response staff, provides significantly more effective response operations in impacted communities.

Logistics Planning will continue to develop and to provide cohesive and synchronized logistics planning processes for several programs to achieve both short- and long-term requirements. It will develop and build upon the capacity to respond to diverse requirements effectively and efficiently to meet operational needs.

Catastrophic Disaster Planning continues to initiate Federal-level catastrophic disaster response plans, in partnership with States and local communities, that take into account the significantly higher level of response assets and shorter response times required in such incidents. While some States have begun limited catastrophic disaster planning efforts, the lack of a Federal-level effort means that the critical national commonalities required for effective catastrophic disaster response operations are not in place. Years of successful experience with disaster response operations under the Federal Response Plan have clearly demonstrated that positive results are achieved when Federal response efforts are fully integrated with State, Tribal, and local operations. It is critical that the same levels of integration be put into place for the possible response to catastrophic disasters. The base funding will allow for this catastrophic disaster planning effort to initiate plans for five of the most high-risk communities in the country during FY 2007. The effort will also produce a disaster planning template that can be used in subsequent communities, applying locality-specific needs to a common template of planning categories and scenarios. This approach will allow local communities to drive their plans according to their own needs, with guidance and support coming from the Federal level.

Exercise Support contributes to exercise development and operation through response-oriented consultation, advisement, and program expert knowledge. Exercise Support coordinates with other agencies and within FEMA to provide interaction and participation in national-level response exercises. This support is dependent upon the needs identified for each exercise.

Health and Medical Response

Medical Surge Capacity Development ensures that the capability for handling large-scale patient care will be enhanced by expanding capabilities for handling larger numbers of mass casualties. FEMA will work closely with DHHS to ensure a continuum of medical response care for a mass casualty event, while avoiding duplication of efforts.

Recovery: The Recovery Program works to ensure that individuals and communities affected by disasters of all sizes, including those caused by terrorism, are able to return to normal function with minimal suffering and disruption of services. FEMA is allocating resources for this activity to improve the effectiveness and efficiency of recovery programs as delivered in the numerous disasters occurring annually and to ensure that such assistance can be provided to victims of the larger and more complex disasters that could occur as the result of terrorism or catastrophic natural events.

Program activities will continue to focus on improving efficiency and expediting delivery of disaster assistance to eligible individuals, to State, local, and Tribal governments, and to eligible private

nonprofit organizations, through a commitment to streamline procedures, to improve program policy, to minimize error, and to modernize service delivery technology. Recovery is coordinating the Agency's catastrophic disaster planning initiatives to include local high-risk jurisdiction plans and strategies for housing, mass care, decontamination, and resource management. In FY 2007, FEMA's Recovery Program will focus on:

- Reducing the Individual Assistance processing cycle time by 5 percent
- Reducing the Individual Assistance unit cost of providing disaster assistance, based on the FY 2005 unit cost baseline
- Refining an administrative cost baseline for the provision of Public Assistance disaster aid
- Maintaining a 90-percent customer satisfaction rate for Individual Assistance disaster aid
- Maintaining the customer satisfaction rate for Public Assistance disaster aid at 88 percent
- Continuing to develop and refine plans for delivering accelerated individual assistance in catastrophic disasters

2007 Request	8	8	19,817
Total Change 2006-2007	0	0	17

FEMA requests \$19.817 million for this activity. This is an increase of \$.017 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Response: The National US&R Response System is comprised of 28 task forces that provide a coordinated, national, all-risk capability to assist State and local governments in responding to structural collapse incidents when the President declares a major disaster or emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act). These task forces are highly trained and possess the necessary expertise to extricate and medically treat victims in heavy rescue situations.

After 17 years and numerous activations to respond to hurricanes, earthquakes, and other emergencies, as well as to bombings in Oklahoma City, at the World Trade Center, and at the Pentagon, there are 28 FEMA-sponsored national US&R task forces located throughout the continental United State that are trained and equipped to handle structural collapse rescue.

The 28 teams are comprised of state local and non-profit organizations. These teams are based in their home states and communities. Except when deployed for federal activation, the team members and the teams themselves operate in their home states. One of the pillars of the National US&R system is that, in return for making these state and local resources available to Federal Government, the Federal Government provides resources and training that allow the teams to better serve their communities on a day to day basis.

Any of these national task forces can be activated and deployed by FEMA to a disaster area to provide assistance in structural collapse rescue or may be pre-positioned when a major disaster threatens a community. When activated, a task force can be dispatched and en route to its destination in a matter of hours.

Each task force is comprised of 70 specialists and is divided into six major functional elements: search, rescue, medical, hazardous materials, logistics, and planning. The task force may be divided into two 35-member teams, which allows for the rotation and relief of personnel for round-the-clock search and rescue operations. This is a Type I task force.

The task forces also have the flexibility to reconfigure and deploy as one 28-person (Type-III) team to respond to small, primarily weather-driven incidents. Requirements for this type of team include

physical, technical and canine search and rescue in light, wood-frame construction. Events triggering this type of response typically include hurricanes, tornados, ice storms, and typhoons.

When the system responds, a management group called the Incident Support Team (IST) also responds to support the teams. IST provides command and control for supporting local and State rescue operations.

Some of the capabilities of the US&R task forces are as follows:

- Physical search and rescue operations in damaged/collapsed structures;
- Operations in a known or suspected weapons-of-mass-destruction environment;
- Emergency medical care for entrapped victims, task force personnel, and search canines;
- Reconnaissance to assess damage and needs, and provide feedback to other officials;
- Assessment/shut-off of utilities to houses and other buildings;
- Hazardous materials survey/evaluations;
- Structural and hazard evaluations of buildings;
- Stabilization of damaged structures, including shoring and cribbing operations; and
- A 62,000-pound equipment cache, configured to quickly deploy with the team.

Water rescue is not part of the US&R mission, although they are somewhat equipped to perform the collapse structure rescue mission in a water environment.

In FY 2006 and FY 2007, FEMA will use funding to operate and train the existing task forces, maintain the equipment caches, and replace/repair equipment that has been used in training and actual disasters.

IV. Program Justification of Changes

**Department of Homeland Security
Federal Emergency Management Agency (FEMA)
Readiness, Mitigation, Response, and Recovery
Justification of Program Changes
(Dollars in Thousands)**

Program Increase 1: Strengthening Operational Capability

Strategic Goal(s) & Objective(s):

Strategic Goal 3: Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters, or other emergencies.

Objective: 3.5 Ensure the continuity of government operations and essential functions in the event of crisis or disaster.

Objective: 3.7 Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters, or other emergencies.

Strategic Goal 4: Lead, manage and coordinate the national response to acts of terrorism, natural disasters, or other emergencies.

Objective: 4.1 Reduce the loss of life and property by strengthening nationwide response readiness.

Objective: 4.2 Provide scalable and robust all-hazard response capability.

Strategic Goal 5: Lead national, state, local and private sector efforts to restore services and rebuild communities after acts of terrorism, natural disasters, or other emergencies.

Objective: 5.1 Strengthen nationwide recovery plans and capabilities.

Objective: 5.2 Provide scalable and robust all-hazard recovery assistance

PPA: Operating Activities

Program Increase: Positions 0 FTE 90 Dollars \$17,586

Funding Profile

Note: FY 2005 figures are approximations due to adjustments for 2SR.

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							904	814	\$182,496
Program Increase							0	90	17,586
Total Request	904	766	\$200,097	904	814	\$182,217	904	904	200,082

Description of Item

Funding for this request will strengthen FEMA's response, recovery, readiness, and mitigation functions by providing sufficient funds to fill vacant positions; address maintenance needs and life cycle replacement for equipment for FEMA's Mobile Emergency Response System (MERS); upgrade equipment in FEMA's National and regional Response Coordination Centers; and provide for travel and training. Specifically, the program increase will be used to:

- Fill 90 vacancies to improve mission capability agency-wide (\$9,783,000)
- Support MERS special mission travel and training (\$300,000)
- Provide a life-cycle management program for MERS communications systems, as well as its logistical, life support, and operations systems (\$3,860,000)
- Fund training for FEMA's Emergency Response Teams and support regional conferences and summits on individual and public assistance issues (\$1,235,000)
- Upgrade equipment and systems in the National and regional Response Coordination Centers (\$250,000)
- Support training for emergency managers (\$2,158,000)

Justification

- Fill 90 vacancies to improve mission capability agency-wide (\$9,783,000)

Since September 2004, FEMA has had to tightly manage FTE to stay within available funding in this appropriation. Without the requested funding in FY 2007, FEMA estimates that it will not be able to fill 90 of its authorized positions. The positions in RMRR are vital to the operational success of FEMA, where all employees are subject to deployment during disaster surge operations. Of these vacancies, 72 directly contribute to disaster response and recovery including support of programs such as the MERS and logistics management, which provide services critical to the Federal government's ability to plan for disasters and to respond after they strike.

Approximately 50 percent of FEMA's workforce is eligible to retire in the next 5 years, which will create a large number of vacancies. It is extremely important that FEMA be able to fill all of its vacancies in order to maintain essential mission skills and capabilities among its workforce. Moreover, when the planned level of workforce capability cannot be maintained, it creates higher reliance on contractor resources or untrained hires. This adds to the expense of disaster operations and degrades mission performance.

- Support MERS special mission travel and training (\$300,000) and provide a life-cycle management program for MERS communications systems, as well as its logistical, life support, and operations systems (\$3,860,000)

FEMA's MERS, which provides critical communications and logistical support during disasters, requires basic maintenance on its vehicles and storage buildings, as well as on its HVAC, electrical, plumbing, and security lighting systems. Deferring critical maintenance needs places the MERS

mission capability at risk. Systems technology in the communications field has outstripped FEMA's ability to upgrade the MERS. Funding for travel and training related to the MERS system is also needed to avoid negatively impacting the readiness of the system and the employees who manage it.

- Fund training for FEMA's Emergency Response Teams and support regional conferences and summits on individual and public assistance issues (\$1,235,000)

Emergency Response Teams are FEMA's first assets on the scene when a disaster threatens or strikes. These teams provide time critical information back to FEMA leadership and initiate the first steps for coordinating response and recovery activity with State and local governments. Funding is required to ensure the Emergency Response Teams are properly trained including participation in regional exercises, which are invaluable in preparing the teams to integrate with State and local partners, assess the particular risks associated with different regions, and respond to the unique needs of the population within an affected area. Funding will also provide training at the Emergency Management Institute.

FEMA holds regional summits on individual and public assistance to prepare for effective distribution of response and recovery resources tailored to meet the unique challenges within each region. Summits are vital to address the unique concerns of various geographic areas, and to better coordinate with State and local officials in advance of any contingency.

- Upgrade equipment and systems in the National and regional Response Coordination Centers (\$250,000)

National and regional Response Coordination Centers represent the nerve center of FEMA's response and recovery efforts. The centers serve as the key nodes for disaster information collection and strategic and tactical decision making during disaster response and recovery. The equipment at these centers is aging. This funding provides resources for necessary upgrades and repair of system equipment, as well as software and hardware enhancements, at FEMA's Response Coordination Centers.

- Support training for emergency managers (\$2,158,000)

Additional funding is required to provide for emergency manager training at the Emergency Management Institute. This funding will support cost increases for contract instructors and student stipends. All of the above funding is specifically intended to reinforce FEMA's operating budget. Although FEMA's 2005 budget may appear to be large, less than \$450 million of the total funding has any flexibility for execution. The great majority of FEMA's budget is appropriated for specific purposes and cannot be reprogrammed to cover transfers from its base operating budget. In FY 2005, just over \$2 billion was the regular annual appropriation to the DRF; \$2.5 billion was to fund Biodefense Countermeasures; over \$2 billion represented fee-supported programs--mainly the National Flood Insurance Program (NFIP); and \$487 million represented other specific programs such as NFIP, Map Modernization, Emergency Food and Shelter, and various mitigation programs. The remaining discretionary funds, approximately \$450 million, included fixed costs such as rent, security, and salaries and benefits.

Impact on Performance (Relationship of Increase to Strategic Goals)

Without the requested funding, FEMA's baseline support functions will erode, directly impacting the ability of FEMA's programs to fulfill the strategic goals and objectives previously noted.

Funding for this request will improve FEMA's operations and essential support functions by addressing needed maintenance of MERS equipment and by providing adequate travel and training funds. FEMA faces declines in program performance if additional operational funding is not provided.

Program Increase 2: National Special Security Event Operations

Strategic Goal(s) & Objective(s):

Strategic Goal 4: Lead, manage and coordinate the national response to acts of terrorism, natural disasters, or other emergencies.

Objective: 4.2 Provide scalable and robust all-hazard response capability.

PPA: Operating Activities

Program Increase: Positions 0 FTE 0 Dollars \$1,300

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							2	2	\$300
Program Increase							0	0	1,300
Total Request	2	2	\$300	2	2	\$300	2	2	1,600

Description of Item

Funding for this request will cover costs that directly result from FEMA's participation in NSSE operations, as well as in other special events designated by the Secret Service, the Federal Bureau of Investigation, and the Homeland Security Special Events Interagency Working Group. While the level of Federal support to events varies, costs from participation often stem from activation of operation centers and deployment of liaison personnel; Urban Search and Rescue task force activation; use of MERS team vehicles and equipment; satellite costs; continuity of operations activation, and associated costs to FEMA regional offices. Depending on the capabilities of the state and local jurisdiction hosting the event, a variety of response teams may be deployed, placed on alert, or play an advisory role, as appropriate.

Justification

Under Presidential Decision Directive (PDD)-39, FEMA is required to support NSSEs, as well as some special events not specifically designated as NSSEs. This requirement exists because, should a terrorist attack on a special event occur, FEMA's role as the lead Federal agency for response and recovery will be critical.

The number of NSSE and non-NSSE special events that require Federal support is set by the Homeland Security Interagency Special Events Working Group and the NSSE Working Group, and varies annually. Funding will ensure FEMA's ability to support NSSEs as designated by the Secretary of Homeland Security, and will cover annual events such as the President's State of the Union Address, as well as identifiable outyear spikes for events such as the Democratic and Republican National Conventions in 2008, and the Presidential Inauguration in 2009. Special event planning and support operations are essential because a special event constitutes an attractive target to terrorists for a variety of reasons, including participation of Federal officials and attendance of dignitaries; size, significance, and duration of the event; location and recurring nature of the event; anticipated media coverage; state and local resources available to support the event; multiplicity of jurisdictions; adequacy of security; and available threat assessments.

While FEMA's role in supporting these events has increased since 9/11, FEMA's budget still reflects a pre-9/11 environment, and no dedicated funds exist for special events support. Prior to 9/11, special events support was funded with reprogrammed dollars from other activities. This method of funding support for special events has continued since 9/11, but with a continual high-threat environment, special event operations cannot continue to be funded this way.

Impact on Performance (Relationship of Increase to Strategic Goals)

This funding will help to secure FEMA's ability to perform its mandated role in special security event operations under PDD-39 and PDD-62, and its ability to fulfill its responsibility as the lead Federal agency for emergency response and recovery should a terrorist attack occur.

Because the nature of these special events creates a possible target, FEMA must be prepared to address the possibility of threat from all hazards, to include chemical, biological, radiological, nuclear, explosive (CBRNE), cyber, and natural disaster. Systems and supplies that could be targeted include agricultural/food, public health, water, energy, IT, chemical industry, transportation, emergency services, and dams, as well as government and commercial facilities. Any such attack would have collateral effects that require response and recovery efforts. Careful planning, preparation, and highly visible security and emergency management presence at special events may help reduce the attractiveness of these events to terrorists and thereby reduce vulnerability to attack.

The consequences of inadequate special event planning can have an exponential impact on the number of lives saved or lost following a terrorist attack directed against a special event. An increase in funding will enable FEMA to have more coverage and readiness before, during, and after one of these special events.

Program Increase 3: National Response Plan Support

Strategic Goal(s) & Objective(s):

Strategic Goal 3: Safeguard our people and their freedoms, critical infrastructure, property and the economy of our nation from acts of terrorism, natural disasters, or other emergencies.

Objective: 3.7 Strengthen nationwide preparedness and mitigation against acts of terrorism, natural disasters, or other emergencies.

PPA: Operating ActivitiesProgram Increase: Positions 14 FTE 7 Dollars \$5,300Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	0
Program Increase							14	7	\$5,300
Total Request	0	0	0	0	0	0	0	0	5,300

Description of Item

The funding requested will be used to: improve NRP training materials; conduct NRP-based exercises; publish lessons learned from disaster responses; initiate NRP revisions based on exercises and lessons learned; coordinate research and development to improve NRP application and provision of technical assistance to Federal, State, and local government agencies and other partners; identify potential contingency response problems related to the NRP and provide remedial solutions; and identify the resources necessary and their availability for mission-based operations during incidents of national significance or Presidentially declared disasters or emergencies.

Justification

In FY 2006, FEMA will assume responsibility from DHS for implementing and maintaining the NRP. Without additional resources for this responsibility, FEMA's already limited operating resources will be further strained. This funding is needed to provide personnel and program support for implementing and maintaining the NRP and to support the operating costs associated with maintaining and updating the NRP, including the multi-agency coordination required across the Federal Government to ensure successful implementation of the plan. Lack of supporting resources including dedicated FTE will limit severely FEMA's ability to provide the support necessary to maintain and improve the NRP.

Impact on Performance (Relationship of Increase to Strategic Goals)

The NRP is designed to coordinate the response to all types and magnitudes of threats or hazards. Effective coordination is essential to the governments' ability to work together to reduce the consequences of attacks or natural disaster by lessening human suffering, by decreasing loss of life and property, and ultimately, through restoring critical infrastructure in affected communities. The funding requested will allow FEMA to support shortened response times and to provide more effective assistance during incidents of national significance. Lack of the requested funding would reduce FEMA's ability to provide timely implementation and maintenance support, endangering the relevance and ultimate success of the NRP.

Program Increase 4: Pre-Positioned Equipment Program (PEP)

Strategic Goal(s) & Objective(s):

Strategic Goal 4: Lead, manage and coordinate the national response to acts of terrorism, natural disasters, or other emergencies.

Objective: 4.2 Provide scalable and robust all-hazard response capability.

PPA: Operating Activities

Program Increase: Positions 20 FTE 20 Dollars \$7,000

Funding Profile

	FY 2005 Actual			FY 2006 Revised Enacted			FY 2007 Request		
	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)	Pos	FTE	Dollars (\$000)
Current Services Level							0	0	0
Program Increase							20	20	\$7,000
Total Request	0	0	0	0	0	0	0	0	7,000

Description of Item

PEP consists of standardized equipment pods that include equipment for personal protection, detection, decontamination, communications, and other specialized gear for responding to chemical, biological, radiological, nuclear, and explosive incidences. The program positions supplies in containers on the ground ready to be mobilized and put to use wherever and whenever disaster strikes. PEP equipment pods are being integrated with FEMA storage facilities and logistics systems around the country. The requested funding will provide for further equipment purchase, maintenance, deployment, and for training and outreach activities.

Justification

This program is being transferred from the Preparedness Directorate and requires resources to manage and integrate it into FEMA's logistics systems.

Impact on Performance (Relationship of Increase to Strategic Goals)

The program is a vital Federal asset for quick deployment to the scene of an incident, in order to maximize the capability of Federal, State, and local responders and to minimize their time to arrive on scene fully equipped.

PPA Mission Statement

Funding for Readiness, Mitigation, Response, and Recovery provides for the development and maintenance of an integrated, nationwide capability to prepare for, to mitigate against, to respond to, and to recover from the consequences of major disasters and emergencies, regardless of cause, in partnership with other Federal agencies, State, local, and Tribal governments, volunteer organizations, and the private sector.

The FY 2007 request will strengthen FEMA's response, recovery, readiness, and mitigation functions by providing sufficient funds to fill vacant positions; address deferred maintenance and life cycle replacement for equipment for FEMA's Mobile Emergency Response System (MERS); upgrade equipment in FEMA's National and regional response coordination centers; restore travel and training funds; identify and initiate improvements and revisions to components of the NRP, including identifying the resources necessary and their availability for mission-based operations during incidents of national significance or Presidentially declared disasters or emergencies; and cover the cost of FEMA's participation in National Special Security Events (NSSEs).

Summary Justification and Explanation of Changes

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
Salaries and benefits	\$91,151	\$88,397	\$103,130	\$14,733

Salaries and Benefits include costs for 931 FTEs. The FY 2007 request includes increases of \$14,733,000: \$1,945,000 for the proposed January 2007 2.2 percent pay raise; \$8,703,000 to fund 90 FTE needed to sustain operational capability; \$800,000 for overtime to participate in NSSEs; \$1,285,000 to identify and initiate improvements and revisions to the NRP; and \$2,000,000 for logistics management.

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
Travel	\$2,692	\$5,259	\$7,814	\$2,555

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes increases of \$2,555,000 for the following initiatives: \$1,450,000 associated with 90 FTE needed to strengthen operational capability; \$500,000 for travel to participate in NSSEs; \$525,000 to identify and initiate improvements and revisions to the NRP; and \$80,000 for logistics management.

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
Transportation of things	\$198	\$72	\$1,072	\$1,000

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes an increase of \$1,000,000 for equipment moves associated with logistics management.

	<u>2005 Actual</u>	<u>2006 Revised Enacted</u>	<u>2007 Request</u>	<u>2006 to 2007 Change</u>
GSA rent	\$62	\$0	\$105	\$105

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes an increase of \$105,000 for the 14 positions and 7 FTE associated with revising the NRP.

1100

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other rent	\$27	\$0	\$3,920	\$3,920

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 request includes an increase of \$3,920,000 for equipment storage.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Communications, utilities, and misc. charges	\$3,602	\$1,090	\$1,097	\$7

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes an increase of \$7,000 associated with personnel costs for the NRP initiative.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Printing	\$1,758	\$2,909	\$3,960	\$1,051

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes an increase of \$1,051,000 for the cost of revising and printing the NRP.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Advisory and assistance services	\$313	\$4,214	\$4,214	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other services	\$35,660	\$35,691	\$32,251	(\$3,440)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a net decrease of \$3,440,000: decreases of \$5,703,000 associated with the obligation of carryover funds in FY 2006 and \$500,000 from a base reduction to the National Incident Management System (NIMS), partially offset by increases of \$1,907,000 for the NRP initiative, \$656,000 to improve operational capability, and \$200,000 for non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Purchases from Government accounts	\$23,312	\$24,165	\$24,836	\$671

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes a net increase of \$671,000: increases of \$134,000 for non-pay inflation and \$2,037,000 to improve operational capability, partially offset by a decrease of \$1,500,000 from the NIMS base reduction.

1101

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Operation & maintenance of facilities	\$6,571	\$100	\$100	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Operation & maintenance of equipment	\$403	\$576	\$576	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Supplies & materials	\$2,829	\$2,357	\$3,467	\$1,110

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes increases of \$1,110,000: \$1,040,000 to improve operational capability and \$70,000 for NRP support.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Equipment	\$8,858	\$12,180	\$16,230	\$4,050

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes increases of \$4,050,000: \$3,700,000 to improve operational capability and \$350,000 to support the NRP.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Land & structures	\$1,036	\$445	\$445	\$0

Land and structures include the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Grants/Subsidies/Contributions	\$19,325	\$10,465	\$10,465	\$0

Grants/Subsidies/Contributions include cash payments to States, other political subdivisions, corporations, associations, and individuals. The FY 2007 request is the same as the FY 2006 level.

PPA Mission Statement

The National US&R Response System is comprised of 28 task forces that provide a coordinated, national, all-risk capability to assist State and local governments in responding to structural collapse incidents when the President declares a major disaster or emergency under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act). These task forces are highly trained and possess the necessary expertise to extricate and medically treat victims in heavy rescue situations.

In FY 2007, FEMA will use funding to operate and train the existing task forces, maintain the equipment caches, and replace/repair equipment that has been used in training and actual disasters.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Salaries and benefits	\$695	\$788	\$805	\$17

Salaries and Benefits include costs for 8 FTEs. The FY 2007 request includes an increase of \$17,000 for the proposed January 2007 2.2 percent pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change

BUDGET REQUEST AND SUPPORTING INFORMATION**FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)**
PUBLIC HEALTH PROGRAMS**I. Appropriation Overview**

A. Mission Statement for Public Health Programs: Under FEMA's Response program, this funding supports the National Disaster Medical System (NDMS).

B. Budget Activities:

The NDMS is a cooperative asset-sharing program among Federal Departments and Agencies, State and local governments, private business, and civilian volunteers that augments the Nation's emergency medical response capability. It provides a single, integrated national medical response capability for assisting State and local authorities in dealing with the medical and health effects of major peacetime disasters, and provides support to the military and Veterans Health Administration medical systems in caring for casualties evacuated to the U.S. from armed conflicts overseas. In addition, it (1) provides specialty medical teams to supplement emergency response capability; (2) maintains an inventory of available hospital beds; (3) manages the transportation of mass casualties to long-term care facilities; and (4) implements limited medical surge capabilities.

C. Budget Request Summary:

The FEMA FY 2007 request for its Public Health Programs activity is 40 other than full-time permanent FTE, and \$33,885,000. Adjustments to base total 0 FTE and \$225,000. No increase in program funding is requested.

FEMA requests \$33.885 million for this activity. This is an increase of \$.225 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The NDMS, under FEMA's Response program, is a cooperative asset-sharing program among Federal Departments and Agencies, State and local governments, private business, and civilian volunteers that augments the Nation's emergency medical response capability. It provides a single, integrated national medical response capability for assisting State and local authorities in dealing with the medical and health effects of major peacetime disasters, and provides support to the military and Veterans Health Administration medical systems in caring for casualties evacuated to the U.S. from armed conflicts overseas. In addition, it (1) provides specialty medical teams to supplement emergency response capability; (2) maintains an inventory of available hospital beds; (3) manages the transportation of mass casualties to long-term care facilities; and (4) implements limited medical surge capabilities.

* The 2005 Actual level includes \$100 million that was transferred from the Disaster Relief Fund to facilitate NDMS deployment following Hurricane Katrina, per P.L. 109-62.

PPA Mission Statement

The National Disaster Medical System (NDMS), under FEMA's Response program, is a cooperative asset-sharing program among Federal Departments and Agencies, State and local governments, private business, and civilian volunteers that augments the Nation's emergency medical response capability. It provides a single, integrated national medical response capability for assisting State and local authorities in dealing with the medical and health effects of major peacetime disasters, and provides support to the military and Veterans Health Administration medical systems in caring for casualties evacuated to the U.S. from armed conflicts overseas. In addition, it (1) provides specialty medical teams to supplement emergency response capability; (2) maintains an inventory of available hospital beds; (3) manages the transportation of mass casualties to long-term care facilities; and (4) implements limited medical surge capabilities.

The amount requested for FY 2007 will continue to provide support for the NDMS with increases related to pay and non-pay inflation only.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Salaries and benefits	\$9,394	\$5,119	\$5,232	\$113

Salaries and Benefits include costs for 40 FTEs. The FY 2007 request includes an increase of \$113,000 for the proposed January 2007 2.2 percent pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Travel	\$3,598	\$3,180	\$3,180	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Transportation of things	\$508	\$250	\$250	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
GSA rent	\$225	\$0	\$0	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. Neither the FY 2006 revised enacted level nor the FY 2007 request includes funding under this object class.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other rent	\$957	\$1,100	\$1,100	\$0

Other rent includes all payments to a non-Federal source for rental space, land, and structures. The FY 2007 request is the same as the FY 2006 level.

1122

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Communications, utilities, and misc. charges	\$360	\$345	\$345	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Printing	\$3	\$0	\$0	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. Neither the FY 2006 revised enacted level nor the FY 2007 request includes funding under this object class.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Advisory and assistance services	\$1,659	\$1,500	\$1,500	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other services	\$2,642	\$3,500	\$3,500	\$0

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Purchases from Government accounts	\$6,200	\$113,841	\$12,778	(\$101,063)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes a net decrease of \$101,063,000: a decrease of \$101,175,000 associated with the obligation of carryover funds in FY 2006 and an increase of \$112,000 for non-pay inflation.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Operation & maintenance of facilities	\$3	\$0	\$0	\$0

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. Neither the FY 2006 revised enacted level nor the FY 2007 request includes funding under this object class.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Operation & maintenance of equipment	\$168	\$1,000	\$1,000	\$0

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Supplies & materials	\$3,277	\$2,500	\$2,500	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Equipment	\$2,788	\$2,500	\$2,500	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request is the same as the FY 2006 level.

BUDGET REQUEST AND SUPPORTING INFORMATION**FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)**
DISASTER RELIEF**I. Appropriation Overview**

A. Mission Statement for Disaster Relief: Through the Disaster Relief Fund (DRF), DHS provides a significant portion of the total Federal response to victims in Presidentially declared major disasters and emergencies.

B. Budget Activities:

Major disasters are declared when a State requests Federal assistance and certifies that a given disaster is beyond the State's capacity to respond. Under the DRF, DHS will continue to operate the primary assistance program, including Federal assistance to individuals and households, and public assistance, which includes the repair and reconstruction of State, local, and nonprofit infrastructure.

C. Budget Request Summary:

The FEMA FY 2007 request for the Disaster Relief program is 25 permanent positions, 3,493 FTE, and \$1,941,390,000. Adjustments to base total 0 FTE and \$189,090,000. No increase in program funding is requested.

Coupled with funding from recoveries of prior year obligations and unobligated funds carried forward, the appropriation request for Disaster Relief is designed to fund disaster support costs and the five-year average for direct disaster activity (excluding extraordinary events, such as the terrorist attack of September 11, the 2004 hurricanes in Florida and other States, and hurricanes Katrina and Rita in 2005).

2007 Request	25	3,493	1,941,390
Total Change 2006-2007	0	0	189,090

FEMA requests \$1,941.39 million for this activity. This is an increase of \$189.09 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The *Robert T. Stafford Disaster Relief and Emergency Assistance Act* (Stafford Act), 42 U.S.C. 5121-5206 (Public Law 93-288, as amended), authorizes the President to provide Federal assistance to supplement State and local governments' disaster response, recovery, readiness, and mitigation efforts. Under Executive Order 12148, as amended by Executive Order 13286, FEMA's Director, formerly DHS' Under Secretary for the Emergency Preparedness and Response Directorate, has been delegated the responsibility for administering the Federal Government's disaster assistance programs. The Stafford Act authorizes five types of declarations or actions: (1) Major Disaster, (2) Emergency, (3) Fire Management Assistance, (4) Defense Emergency, and (5) Pre-declaration activities.

Direct Disaster Programs

These programs constitute the resources provided by the Federal Government (through FEMA) to directly address the short-, medium-, and long-term consequences of a disaster on both individuals and communities. Disaster assistance provided under the terms of the Stafford Act can be provided to any one of the States (and ultimately as well to local or Tribal governments), the District of Columbia, Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands. The Individual Assistance (IA) and Public Assistance (PA) programs, and the Hazard Mitigation Grant Program (HMGP) are the major components of the Direct Disaster programs, as are FEMA's pre-declaration and emergency response activities.

* Includes \$2,042,380,000 from the FY 2005 appropriation and \$66,500,000,000 in supplemental funding, reduced by a rescission of \$23,409,300,000 in FY 2006 and transfers of \$867,500,000 (\$752,500,000 to the Disaster Assistance Direct Loan Program Account, \$100,000,000 to Public Health Programs, and \$15,000,000 to the Inspector General).

FEMA's disaster programs will be impacted for a long time to come by the 2005 hurricane season, as the Gulf Coast recovers from Katrina, Rita, and Wilma. The 2005 hurricane season was the most active in U.S. history. Within 100 days of Hurricane Katrina's striking the U.S., FEMA provided nearly \$5.2 billion to more than 1.4 million households impacted by Hurricanes Katrina and Rita; figures unmatched in the Agency's history. More than 130 Disaster Recovery Centers were stretched across Texas, Louisiana, Mississippi, Alabama, and Florida, serving the needs of an unprecedented number of people displaced from their homes. Working through the American Red Cross, FEMA supported the Nation's largest-ever sheltering operation, with more than 320,000 evacuees at its peak, and paid to house 85,000 families in emergency hotel housing. FEMA also provided rental assistance to more than 653,000 families who were displaced. More than 40,000 manufactured homes or travel trailers provided through FEMA were occupied by families in the Gulf Coast, and more than 140,000 temporary roofs were put on damaged homes through the U.S. Army Corps of Engineers. As of January 1, FEMA and its Federal partners have removed nearly 60 million cubic yards of debris, and FEMA has approved over \$392 million in Community Disaster Assistance Loans and over \$205 million in unemployment insurance.

FY 2007 base resources for Direct Disaster Programs have been distributed as follows: 76 percent, or 2,048 FTEs and \$1,342,456,000, to the Recovery program; 15 percent, or 404 FTEs and \$264,959,000, to the Response program; and 9 percent, or 243 FTEs and \$158,975,000, to the Mitigation program for the HMGP.

Disaster Support Activity

In addition to direct assistance, FEMA maintains a critical, ongoing disaster operations and support infrastructure that supports the timely delivery of all of FEMA's disaster assistance programs. These resources provide for disaster-related support activities, which encompass ongoing operational capabilities that are not readily attributable to any one specific declared disaster. Disaster Support Activity programs within the DRF constitute the one-time and recurring costs associated with managing and operating overall disaster support services and infrastructure functions.

FEMA plans for and monitors disaster support costs annually, using a clearly defined process to identify and to control costs in support of a rapid response and efficiently executed disaster program. These support expenditures are essential for FEMA to provide (1) timely disaster response, (2) responsive customer service, and (3) cost-effective program management and delivery.

The DRF Disaster Support activities support the following FEMA programs:

- Response - includes response operations, command and control, disaster workforce management, planning and coordination, logistics management, and storage/warehouse activities
- Recovery - includes program planning and operations support (to include training and evaluation programs) to the IA and PA programs, the Federal Coordinating Officers and Community Relations programs, and the infrastructure to support centralized disaster application processing functions delivered at the National Processing Service Centers

- Mitigation - includes program planning and operations support (to include training, technical assistance, and evaluation programs) to the Hazard Mitigation Grant Program and related mitigation program support activities to help reduce the risk to life and to property from all hazards
- Readiness - includes disaster reservist cadre and permanent FEMA staff training on a wide range of disaster program and technical support functions, delivered at EMI, as well as at JFO and regional office locations

The Disaster Support budget also includes administrative and management support resources to support the FEMA program areas. These costs have been distributed to the four basic programs outlined above and include the following: U.S. Department of Agriculture National Finance Center charges for disaster employee payroll services, paid through DHS, as well as other centralized support costs association with the DHS consolidated Working Capital Fund; disaster employee unemployment benefits; disaster employee workers' compensation charges; rent for FEMA space occupied by disaster employees; disaster-related postage and shipping charges; disaster personnel administration and deployment; disaster financial operations support; physical security and background investigations of temporary disaster employees; and statutory requirements for health and safety programs. Disaster Support resources also support the full array of telecommunication and other information systems and equipment that allows for the transfer of data and information quickly and effortlessly through systems such as the National Emergency Management Information System, which is designed to process applications and payments for assistance expeditiously, and to provide for nationwide infrastructure to support disaster operations.

FY 2007 base resources have been distributed as follows:

Mitigation:	13 FTE	\$3,441,000
Readiness:	36 FTE	\$13,670,000
Response:	171 FTE	\$43,732,000
Recovery:	578 FTE	\$114,157,000

Changes within the disaster support base in FY 2007 will allow FEMA to continue to consolidate the Federal response functions into a comprehensive, coordinated NRP under the NIMS that will eventually be capable of meeting reduced response times that are required to ensure the maximum capability to save lives and to protect property for all major disaster and emergency requirements, including acts of terrorism and catastrophic disasters. FEMA will lead national, State, local, and private sector efforts to restore services and to rebuild communities after acts of terrorism, natural disasters, or other emergencies by strengthening nationwide Recovery plans and capabilities and by providing scalable and robust all-hazard Recovery assistance. In addition, FEMA will upgrade physical security in its disaster facilities in order to protect all facilities at the Department of Justice's minimum security standards proposed for the organization, will increase compliance with Civil Rights regulations, and will support e-government initiatives such as the "Disasterhelp.gov" web-based programs/systems.

Justification of Proposed Changes in Disaster Relief
Appropriation Language**

For necessary expenses in carrying out the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et seq.), [\$1,770,000,000] \$1,941,390,000 to remain available until expended. (*Department of Homeland Security Appropriations Act, 2006.*)

[For an additional amount for "Disaster Relief", \$6,500,000,000, to remain available until expended: *Provided*, That such amount is designated as an emergency requirement pursuant to section 402 of S. Con. Res. 95 (108th Congress), as made applicable to the House of Representatives by H. Res. 649 (108th Congress) and applicable to the Senate by section 14007 of Public Law 108-287.] (*Emergency Supplemental Appropriations for Hurricane Disasters Assistance Act, 2005.*)

[(TRANSEFR OF FUNDS)]

[In addition, of the amounts appropriated under this heading in Public Law 109-62, \$1,500,000 shall be transferred to the "Disaster Assistance Direct Loan Program Account" for administrative expenses to carry out the direct loan program, as authorized by section 417 of the Stafford Act: *Provided*, That the amount provided under this heading is designated as an emergency requirement pursuant to section 402 of H. Con. Res. 95 (109th Congress), the concurrent resolution on the budget for fiscal year 2006.]

[(RESCISSION OF FUNDS)]

[Of the funds appropriated under this heading in Public Law 109-62, \$23,409,300,000 are rescinded.] (*Emergency Supplemental Appropriations Act to Address Hurricanes in the Gulf of Mexico and Pandemic Influenza, 2006.*)

Explanation of Changes:

Language related to the FY 2005 and FY 2006 supplementals following hurricanes in the Gulf of Mexico is deleted.

PPA Mission Statement

Through the Disaster Relief Fund (DRF), DHS provides a significant portion of the total Federal response to victims in Presidentially declared major disasters and emergencies. The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5121-5206 (Public Law 93-288, as amended), authorizes the President to provide Federal assistance to supplement State and local governments' disaster response, recovery, readiness, and mitigation efforts. Under Executive Order 12148, as amended by Executive Order 13286, FEMA's Director, formerly DHS' Under Secretary for the Emergency Preparedness and Response Directorate, has been delegated the responsibility for administering the Federal Government's disaster assistance programs. The Stafford Act authorizes five types of declarations or actions: (1) Major Disaster, (2) Emergency, (3) Fire Management Assistance, (4) Defense Emergency, and (5) Pre-declaration activities.

FEMA's disaster programs will be impacted for a long time to come by the 2005 hurricane season, as the Gulf Region recovers from the 2005 hurricane season. The 2005 hurricane season was the most active in U.S. history.

Coupled with funding from recoveries of prior year obligations and unobligated funds carried forward, the FY 2007 appropriation request for Disaster Relief is designed to fund disaster support costs and the five-year average for direct disaster activity (excluding extraordinary events, such as the terrorist attack of September 11, the 2004 hurricanes in Florida and other States, and hurricanes Katrina and Rita in 2005).

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Salaries and benefits	\$418,277	\$301,257	\$201,436	(\$99,821)

Salaries and Benefits include costs for 3,493 FTEs. The FY 2007 request includes an increase of \$1,376,000 for the proposed January 2007 2.2 percent pay raise, offset by a decrease of \$101,197,000 as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Travel	\$183,261	\$113,500	\$58,500	(\$55,000)

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Transportation of things	\$86,744	\$25,250	\$2,250	(\$23,000)

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
GSA rent	\$15,352	\$14,300	\$13,300	(\$1,000)

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other rent	\$130,768	\$123,000	\$13,000	(\$110,000)

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Communications, utilities, and misc. charges	\$72,678	\$54,500	\$20,500	(\$34,000)

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Printing	\$8,831	\$3,950	\$2,950	(\$1,000)

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Advisory and assistance services	\$20,198	\$5,500	\$750	(\$4,750)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other services	\$1,298,823	\$581,574	\$160,000	(\$421,574)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Purchases from Government accounts	\$8,777,881	\$1,510,500	\$175,552	(\$1,334,948)

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Operation & maintenance of facilities	\$174,100	\$76,900	\$6,900	(\$70,000)

Operation and maintenance of facilities include all payments for the operation and maintenance of facilities when done by contract with the private sector or another Federal Government account. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change	
Research and development	\$3,199	\$100	\$100		\$0

Research and Development includes costs for contracts for the conduct of basic and applied research and development. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change	
Operation & maintenance of equipment	\$7,224	\$4,000	\$2,200		(\$1,800)

Operation and maintenance of equipment includes costs for operation, maintenance, repair, and storage of equipment, when done by contract with the private sector or another Federal Government account. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change	
Supplies & materials	\$374,780	\$104,000	\$14,000		(\$90,000)

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change	
Equipment	\$2,456,345	\$755,000	\$28,500		(\$726,500)

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change	
Land & structures	\$7,518	\$1,200	\$1,200		\$0

Land and structures include the costs for land and interests in land, buildings and other structures, roads, additions to buildings, nonstructural (or resource) improvements such as fences and landscaping, and fixed equipment additions and replacements when acquired under contract or by capital lease. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change	
Grants/Subsidies/Contributions	\$9,122,747	\$21,038,658	\$2,338,936		(\$18,699,722)

Grants/Subsidies/Contributions include cash payments to States, other political subdivisions, corporations, associations, and individuals. The FY 2007 request includes a decrease as Disaster Relief expenses return to an average year following the spike in FY 2006 from the 2005 hurricane season.

I. FY 2007 Schedule of Working Capital Fund by Program/Project Activity

**Department of Homeland Security
Federal Emergency Management Agency
Disaster Relief**

2001-2005	63	24	50	137	53	22	48	123
1996-2005	65	16	66	147	54	15	47	116

^{1/} Two of the requests for major declarations were turned down but were declared as emergencies instead.

^{2/} One of the requests for a major declaration was turned down but was declared an emergency instead.

^{3/} The Disaster Mitigation Act of 2000 expanded FEMA's authority to assist State and local governments (including tribes) in addressing fires that threaten such destruction as would warrant a major disaster declaration.

^{4/} One of the requests for an emergency declaration was withdrawn by the State.

BUDGET REQUEST AND SUPPORTING INFORMATION**FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)
DISASTER ASSISTANCE DIRECT LOAN PROGRAM ACCOUNT****I. Appropriation Overview**

A. Mission Statement for Disaster Assistance Direct Loan Program Account (DADLPA): This account provides administrative funds and subsidies for direct disaster assistance loans.

B. Budget Activities:

Disaster assistance loans authorized by the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act) are loans to States for the non-Federal portion of cost-sharing funds and community disaster loans to local governments incurring substantial loss of tax and other revenues as a result of a major disaster. The funds requested for this program include direct loans and a subsidy based on criteria including loan amount and interest charged. As required by the Federal Credit Reform Act of 1990, this account records, for this program, the subsidy costs associated with the direct loans obligated in 1992 and beyond (including modifications of direct loans), as well as administrative expenses of this program. The subsidy amounts are estimated on a present-value basis; the administrative expenses are estimated on a cash basis.

C. Budget Request Summary:

The FEMA FY 2007 request for the DADLPA is 3 positions, 3 FTE, and \$569,000. Adjustments to base total 0 FTE and -\$752,492,000: a reduction of \$752,500,000 for subsidy and administrative expenses associated with awarding Community Disaster Loans (CDLs) in the Gulf Region in FY 2006 and an increase of \$8,000 for pay related costs. No program increase is requested.

2007 Request	0	0	25,000
Total Change 2006-2007	0	0	(1,000,000)

FEMA requests no subsidy and a loan limit of \$25,000,000 for this activity. This is a decrease of \$750,000,000 in subsidy and \$1,000,000,000 in loan limitation.

CURRENT SERVICES PROGRAM DESCRIPTION:

FEMA's loan program consists of two types of direct loans:

State Share Loans. FEMA may lend or advance to a State or an eligible applicant the portion of assistance for which the applicant is responsible under cost-sharing provisions of the Stafford Act. To be deemed eligible for a loan, the governor of the affected State must demonstrate, where damage is overwhelming and severe, that the State is unable to assume its financial responsibility to meet the cost-share due to one or both of the following conditions: (1) the State is responding to concurrent, multiple disasters/emergencies; and/or (2) the State has incurred extraordinary costs as a result of a particular disaster or emergency. For 1992 and beyond, the State Share loans are obligated from the Disaster Assistance Direct Loan Financing Account (DADLFA).

* Subsidy provided as a transfer from Disaster Relief Fund pursuant to P.L. 109-88

Community Disaster Loans (CDLs). Loans may be authorized to local governments that have suffered a substantial loss of tax and other revenues as a result of a major disaster, and have demonstrated a need for financial assistance in order to perform their municipal operating functions. The loans, not to exceed 25 percent of the annual operating budget of that local government for the fiscal year in which the major disaster occurred, are made at the current Treasury rate for a term of 5 years. In addition, in accordance with recent Stafford Act amendments (P. L. 109-88), CDLs may exceed \$5 million and shall not be canceled. A local government is not eligible for further CDLs during any period in which the jurisdiction is in arrears with respect to required repayment of an existing loan. Between FY 1992 and FY 2006, FEMA approved State Share Loans and CDLs in excess of \$383 million. For FY 2006, subsidy totaling \$750,000,000 has been approved for up to \$1,000,000,000 in CDLs to local governments in the Gulf Region affected by the 2005 hurricane season. As of January 1, 2006, loans totaling \$392 million had been approved.

Three accounts are used to record cash flow data for direct loans:

- DADLPA. This is the budget account into which an appropriation is made to cover the subsidy costs of a direct loan, and from which such costs are disbursed into the financing account. A separate amount for administrative expenses is also appropriated into the program account.
- Disaster Assistance Loan Liquidating Account. This budget account records all cash flows to and from FEMA for pre-1992 direct loans made under the State Share Loan and CDL programs. There is no longer any activity in this account.
- DADLFA. This non-budgetary account records all cash flows to and from FEMA resulting from CDLs and State Share direct loans obligated in 1992 and beyond. This account holds balances, receives the subsidy cost payment from the program account, and includes all other cash flows resulting from post-1991 direct loans. The funds in this account are a means of financing and are not included in the budget totals.

For FY 2007, FEMA is requesting a loan limit of \$25,000,000 for State Share Loans only. No subsidy is required.

PPA: ADMINISTRATIVE EXPENSES

	Perm Pos	FTE	Amount
2005 Actual	3	3	\$567
2006 Revised Enacted	3	3	3,061
2007 Adjustments to Base	0	0	(2,492)
2007 Current Services	3	3	569
2007 Program Change	0	0	0
2007 Request	3	3	569
Total Change 2006-2007	0	0	(2,492)

FEMA requests \$.569 million for this activity. This is a decrease of \$2.492 million from FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

This account provides administrative funds that support direct disaster assistance loans. During FY 2006, FEMA will use \$2,500,000 in administrative funds to process \$1 billion in CDLs to local governments in the Gulf Region affected by 2005 hurricanes.

For FY 2007, FEMA is requesting administrative expenses of \$569,000 to support 3 full-time equivalents and to:

- Maintain capability to audit financial reports, to size the loan initially, and to assess justification for forgiveness
- Review and map the current CDL process from application for the loan through closeout with the goal of streamlining the CDL processes for application, application review, conduct of audits, and negotiated repayment plans by FY 2009
- Process applications and requests for forgiveness as necessary

PPA Mission Statement

This account provides administrative funds that support direct disaster assistance loans.

During FY 2006, FEMA will use \$2,500,000 in supplemental administrative funds to process \$1 billion in Community Disaster Loans (CDLs) to local governments in the Gulf Region affected by the 2005 hurricanes. For FY 2007, FEMA is requesting a base level of administrative expenses of \$569,000 to support 3 full-time equivalents.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Salaries and benefits	\$351	\$363	\$371	\$8

Salaries and Benefits include costs for 3 FTEs. The FY 2007 request includes an increase of \$8,000 for the proposed January 2007 2.2 percent pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Travel	\$0	\$15	\$15	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Advisory and assistance services	\$0	\$2,500	\$0	(\$2,500)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a decrease of \$2,500,000 in supplemental funds used to process CDLs in FY 2006.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other services	\$2	\$183	\$183	\$0

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request is the same as the FY 2006 level.

A. Mission Statement for the Flood Map Modernization Fund: The Flood Map Modernization Fund (FMMF) supports the effort to update and modernize the Nation's flood hazard data inventory.

B. Budget Activities:

Map Modernization will produce flood maps in geographic information system format for every area where there is flood risk. In addition, the modernization effort is incorporating the latest technology in order to provide the flood hazard data in the most usable format and also to provide modern tools and techniques that will enable FEMA and its State and local partners to produce high-quality data while managing cost and schedule constraints. FEMA's current approach for Flood Map Modernization assumes that a large percentage of the existing flood hazard data is still valid and that revising map information and boundary adjustments are the necessary changes needed to update the flood hazard maps. FEMA is also partnering with State and local governments to help develop their capability for managing and maintaining their flood hazard data.

C. Budget Request Summary:

The FEMA FY 2007 request for the FMMF is 33 positions, 33 FTE, and \$198,980,000. Adjustments to base total 0 FTE and \$980,000. No increase in program funding is requested.

PPA: FLOOD MAP MODERNIZATION FUND

	Perm Pos	FTE	Amount
2005 Actual	13	13	\$200,000
2006 Revised Enacted	33	33	198,000
2007 Adjustments to Base	0	0	980
2007 Current Services	33	33	198,980
2007 Program Change	0	0	0
2007 Request	33	33	198,980
Total Change 2006-2007	0	0	980

FEMA requests \$198.98 million for this activity. This is an increase of \$.98 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Floods inflict more damage and economic losses upon the United States than does any other natural disaster. During the 10 years from fiscal year 1992 through fiscal year 2001, flooding caused more than 900 deaths and resulted in approximately \$55 billion in damages. Since 1968, the National Flood Insurance Program (NFIP) has combined the development of flood maps to identify areas at greatest risk of flooding with mitigation efforts to reduce or eliminate flood risks to people and to property and with the availability of affordable flood insurance that property owners can purchase to protect themselves from flood losses.

Flood maps are used more and more each year - currently at least 40 million times annually. The NFIP Reform Act of 1994 significantly increased the use of flood maps in real estate transactions and institutionalizing the floodplain management profession has resulted in a knowledgeable and active community of practitioners. These maps are used as follows:

- To identify flood risk -- examples include community planning or disclosure requirements required for real estate transactions
- To manage flood risk -- examples include adopting and enforcing safe construction requirements or remedial measures such as floodproofing basements
- To define when flood insurance is required and how much it will cost
- To support Federal requirements under Executive Order 11988

The modernized maps will be a substantial improvement in usability and accuracy. The new maps will:

- Provide updated community features such as road networks, community boundaries, etc., to reduce errors in flood hazard determinations
- Resolve issues with ambiguous or incorrectly portrayed flood hazard information
- Be substantially more user-friendly
- Complete flood hazard identification projects for counties at risk for flood hazards, accounting for approximately 70 percent of the Nation's population in 2007
- Use streamlined and automated approaches in the map update process

PPA Mission Statement

The Flood Map Modernization Fund supports the effort to update and modernize the Nation's flood hazard data inventory. Map Modernization will produce flood maps in geographic information system format for every area where there is flood risk. In addition, the modernization effort is incorporating the latest technology in order to provide the flood hazard data in the most usable format and also to provide modern tools and techniques that will enable FEMA and its State and local partners to produce high-quality data while managing cost and schedule constraints. FEMA's current approach for Flood Map Modernization assumes that a large percentage of the existing flood hazard data is still valid and that revising map information and boundary adjustments are the necessary changes needed to update the flood hazard maps.

Floods inflict more damage and economic losses upon the United States than does any other natural disaster. During the 10 years from fiscal year 1992 through fiscal year 2001, flooding caused more than 900 deaths and resulted in approximately \$55 billion in damages. Since 1968, the National Flood Insurance Program (NFIP) has combined the development of flood maps to identify areas at greatest risk of flooding with mitigation efforts to reduce or eliminate flood risks to people and to property and with the availability of affordable flood insurance that property owners can purchase to protect themselves from flood losses.

Funding for FY 2007 will allow FEMA to continue with its map modernization effort such that FEMA will complete flood hazard identification projects for counties at risk for flood hazards, accounting for approximately 70 percent of the Nation's population in 2007.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Salaries and benefits	\$993	\$4,500	\$4,599	\$99

Salaries and Benefits include costs for 33 FTEs. The FY 2007 request includes an increase of \$99,000 for the proposed January 2007 2.2 percent pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Travel	\$432	\$500	\$500	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Transportation of things	\$16	\$0	\$0	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. Neither the FY 2006 revised enacted level nor the FY 2007 request includes funding under this object class.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
GSA rent	\$262	\$368	\$368	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request is the same as the FY 2006 level.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Communications, utilities, and misc. charges	\$690	\$100	\$100	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request is the same as the FY 2006 level.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Printing	\$0	\$500	\$500	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request is the same as the FY 2006 level.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Advisory and assistance services	\$72,978	\$70,586	\$67,086	(\$3,500)

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request includes a net decrease of \$3,500,000: a decrease of \$4,000,000 associated with the obligation of carryover funds in FY 2006 and an increase of \$500,000 in non-pay inflation.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Other services	\$71,708	\$68,915	\$65,597	(\$3,318)

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request includes a net decrease of \$3,318,000: a decrease of \$3,699,000 associated with the obligation of carryover funds in FY 2006 and an increase of \$381,000 in non-pay inflation.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Purchases from Government accounts	\$1,597	\$100	\$100	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request is the same as the FY 2006 level.

	<u>2005</u> <u>Actual</u>	<u>2006 Revised</u> <u>Enacted</u>	<u>2007</u> <u>Request</u>	<u>2006 to 2007</u> <u>Change</u>
Supplies & materials	\$37	\$30	\$30	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Equipment	\$358	\$100	\$100	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Grants/Subsidies/Contributions	\$58,916	\$60,000	\$60,000	\$0

Grants/Subsidies/Contribution include cash payments to States, other political subdivisions, corporations, associations, and individuals. The FY 2007 request is the same as the FY 2006 level.

BUDGET REQUEST AND SUPPORTING INFORMATION
--

FEDERAL EMERGENCY MANAGEMENT AGENCY (FEMA)
NATIONAL FLOOD INSURANCE FUND

I. Appropriation Overview

A. Mission Statement for the National Flood Insurance Fund (NFIF): The NFIF, which was established in the Treasury by the National Flood Insurance Act of 1968, is a fee-generated fund and is the funding mechanism for the National Flood Insurance Program (NFIP). The Act, as amended, authorizes the Federal Government to provide flood insurance on a national basis.

B. Budget Activities:

Flood insurance premiums collected are deposited into the NFIF, and losses and operating and administrative costs are paid out of the fund.

In return for the availability of insurance, communities agree to adopt and to enforce floodplain management measures to reduce losses from future flooding. Flood insurance may be sold or continued in force only in communities that enact and enforce appropriate floodplain management measures. Communities must participate in the program within 1 year of the time they are identified as flood-prone in order to be eligible for flood insurance and for some forms of Federal financial assistance for acquisition or construction purposes. In addition, Federally regulated lending institutions cannot provide loans to nonparticipating communities for properties within an identified special flood hazard area. Certain forms of disaster assistance also are restricted in these nonparticipating communities.

C. Budget Request Summary:

The FEMA FY 2007 request for discretionary funding in the NFIF is 270 positions, 270 FTE, and \$97,588,000, which is net of \$31,000,000 transferred to the National Flood Mitigation Fund. Adjustments to base total 0 FTE and \$1,734,000. No increase in program funding is requested.

In addition, FEMA estimates \$2,233,024,000 from mandatory collections or premiums. These funds will be used to support repetitive loss mitigation (\$50,000,000) and pay claims and other operating expenses of the NFIP.

Finally, a legislative proposal will be submitted with the President's Budget to increase borrowing authority by \$5.6 billion for a total of \$24.1 billion to pay the unprecedented insurance claims arising from hurricanes Katrina and Rita, as well as interest on the borrowing authority.

III. Current Services Program Description by PPA

Department of Homeland Security
Federal Emergency Management Agency
National Flood Insurance Fund
Program Performance Justification
(Dollars in thousands)

PPA: SALARIES AND EXPENSES

	Perm Pos	FTE	Amount
2005 Actual	270	241	\$33,336
2006 Revised Enacted	270	270	36,496
2007 Adjustments to Base	0	0	1,734
2007 Current Services	270	270	38,230
2007 Program Change	0	0	0
2007 Request	270	270	38,230
Total Change 2006-2007	0	0	1,734

FEMA requests \$38.23 million for this activity. This is an increase of \$1.734 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Resources under this activity support the salaries and expenses of FTE managing the NFIP and flood mitigation programs. In FY 2007, FEMA will continue to support the NFIP and to provide operational and administrative support for the Community Rating System.

PPA: FLOOD MITIGATION

	Perm Pos	FTE	Amount
2005 Actual	0	0	\$62,803
2006 Revised Enacted	0	0	59,358
2007 Adjustments to Base	0	0	0
2007 Current Services	0	0	59,358
2007 Program Change	0	0	0
2007 Request	0	0	59,358
Total Change 2006-2007	0	0	0

FEMA requests \$59.358 million for this activity. There is no increase over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

Through Flood Mitigation programs, FEMA encourages communities and their citizens to take informed and effective mitigation actions before a flood in order to reduce the long-term risk to people and property. Through the delivery of mitigation programs, FEMA leads a national effort to: identify and improve the understanding of communities' hazards and their risks; develop and improve techniques and

planning processes which mitigate those risks; provide an environment at the State and local levels that is conducive to applying those techniques and processes; provide financial and technical assistance to facilitate application of those techniques and processes; and support development of incentives and disincentives which make application of those techniques and processes a social, political and/or economic priority.

Program Specific:

In FY 2007, FEMA will:

- Develop a variety of outreach materials to assist all entities of Federal, State, and local governments to effectively maintain sound floodplain management practice, and educate the general public on mitigation actions that may be taken in a pre-disaster environment
- Provide ongoing map maintenance activities, issue map revisions, and enhance distribution services, including provisions for digital products, subscription services, and links to other hazard data. Provide funding to States for the development of the capability and capacity to manage the production of and to maintain flood hazard data. These efforts complement and support the Flood Map Modernization Fund activities.
- Provide technical assistance to the 20,000 communities participating in the NFIP and monitor the compliance with program requirements; provide grant funds to States and Territories to help furnish this technical assistance and monitoring; develop policy, guidance, and regulations to improve implementation of floodplain management at the State and community levels, and to enhance compliance by communities with NFIP requirements

PPA: SEVERE REPETITIVE LOSS MITIGATION

	Perm Pos	FTE	Amount
2005 Actual	0	0	\$0
2006 Revised Enacted	0	0	40,000
2007 Adjustments to Base	0	0	0
2007 Current Services	0	0	40,000
2007 Program Change	0	0	0
2007 Request	0	0	40,000
Total Change 2006-2007	0	0	0

FEMA requests \$40 million for this activity. There is no increase over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. These include the establishment of a five-year Pilot Program for the Mitigation of Severe Repetitive Loss Properties, authorized at \$40 million annually. The Pilot Program focuses on a subset of the repetitive loss properties – severe repetitive loss properties - that have the largest impact on claims paid from the NFIF. Not counting those properties lost during the 2005 hurricane season, there are currently about 5,400 of these properties that have had four or more losses exceeding \$5,000 each or the properties where cumulative losses exceed the property value. Mitigating these properties will result in savings to the NFIF. This program will be funded from mandatory, premium collections.

PPA: REPETITIVE LOSS MITIGATION

	Perm Pos	FTE	Amount
2005 Actual	0	0	\$0
2006 Revised Enacted	0	0	10,000
2007 Adjustments to Base	0	0	0
2007 Current Services	0	0	10,000
2007 Program Change	0	0	0
2007 Request	0	0	10,000
Total Change 2006-2007	0	0	0

FEMA requests \$10 million for this activity. There is no increase over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. These include the establishment of a grant program which provides a mechanism to mitigate properties that have experienced repetitive losses where the State or community does not meet eligibility requirements under the Flood Mitigation Assistance program. Although not necessarily focused on Severe Repetitive Loss Properties as defined above, the Act does direct FEMA to give priority to "Worst-Case Properties" that would result in the greatest savings to the NFIF. This program will be funded from mandatory, premium collections.

PPA: NFIF MANDATORY

	Perm Pos	FTE	Amount
2005 Actual	0	0	\$1,943,615
2006 Revised Enacted	0	0	2,054,354
2007 Adjustments to Base	0	0	128,670
2007 Current Services	0	0	2,183,024
2007 Program Change	0	0	0
2007 Request	0	0	2,183,024
Total Change 2006-2007	0	0	128,670

FEMA requests \$2,183.024 million for this activity. This is an increase of \$128.67 million over FY 2006.

CURRENT SERVICES PROGRAM DESCRIPTION:

The National Flood Insurance Act of 1968, as amended, authorizes the Federal Government to provide flood insurance on a national basis. Flood insurance may be sold or continued in force only in communities that enact and enforce appropriate floodplain management measures. Communities must participate in the program within 1 year of the time they are identified as flood-prone in order to be eligible for flood insurance and some forms of Federal financial assistance for acquisition or construction purposes. In addition, Federally regulated funding institutions cannot provide loans to nonparticipating communities with an identified flood hazard.

More than 20,000 communities in all States and Territories participate in the NFIP. Structures built to NFIP criteria experience 80 percent less damage through reduced frequency and severity of losses. The flood mitigation program requirements are estimated to save in excess of \$1 billion per year in flood losses avoided. The NFIP limits the impact of disaster by encouraging property owners and others to manage their risk through flood insurance and other hazard insurance mechanisms.

Program Specific:

In FY 2007, FEMA will continue to pay claims and issue policies. In addition, FEMA will:

- Begin implementation of NFIP modernized systems (NextGen), incorporating state-of-the-art business practices and technologies and assuring that operating integrity, cost efficiency, and customer service standards are met or exceeded
- Continue implementation of recommendations from independent NFIP evaluation
- Conduct the annual underwriting review of experience
- Modify the NFIP outreach campaign based on results of evaluation

A legislative proposal will be submitted with the President's Budget to increase borrowing authority by \$5.6 billion for a total of \$24.1 billion to pay the unprecedented insurance claims arising from hurricanes Katrina and Rita, as well as interest on the borrowing authority.

PPA: NFIP OFFSETTING COLLECTIONS - DISCRETIONARY

	Perm Pos	FTE	Amount
2005 Actual	0	0	\$96,139
2006 Revised Enacted	0	0	95,854

PPA Mission Statement

Resources under this activity support the salaries and expenses of FTE managing the NFIP and flood mitigation programs. In FY 2007, FEMA will continue to support the NFIP and to provide operational and administrative support for the Community Rating System.

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Salaries and benefits	\$27,925	\$30,700	\$32,434	\$1,734

Salaries and Benefits include costs for 270 FTEs. The FY 2007 request includes an increase of \$1,734,000 for the proposed January 2007 2.2 percent pay raise.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Travel	\$1,202	\$1,700	\$1,700	\$0

Travel includes all costs of transportation of persons, subsistence of travelers, and incidental travel expenses in accordance with Federal travel regulations. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Transportation of things	\$0	\$50	\$50	\$0

Transportation of things includes all costs of the care of such things while in process of being transported, and other services incident to the transportation of things. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
GSA rent	\$2,873	\$2,943	\$2,943	\$0

GSA Rent includes all payments to General Services Administration (GSA) for rental of space and rent related services. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Communications, utilities, and misc. charges	\$0	\$355	\$355	\$0

Communications, utilities, and miscellaneous charges include all payments for rental or lease of information technology equipment and services, postal services and rentals, and utility services. The FY 2007 request is the same as the FY 2006 level.

1206

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other services	\$858	\$248	\$248	\$0

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Purchases from Government accounts	\$124	\$0	\$0	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. Neither the FY 2006 revised enacted level nor the FY 2007 request includes funding under this object class.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Supplies & materials	\$32	\$100	\$100	\$0

Supplies and materials are defined as commodities that are (a) ordinarily consumed or expended within one year after they are put into use, (b) converted in the process of construction or manufacture, (c) used to form a minor part of equipment or property, or (d) other property of little monetary value that does not meet any of the three criteria listed above, at the option of the agency. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Equipment	\$282	\$400	\$400	\$0

Equipment includes all costs for the purchases of personal property of a durable nature or the initial installation of equipment when performed under contract. The FY 2007 request is the same as the FY 2006 level.

PPA Mission Statement

Through Flood Mitigation programs, FEMA encourages communities and their citizens to take informed and effective mitigation actions before a flood in order to reduce the long-term risk to people and property. Through the delivery of mitigation programs, FEMA leads a national effort to: identify and improve the understanding of communities' hazards and their risks; develop and improve techniques and planning processes which mitigate those risks; provide an environment at the State and local levels that is conducive to applying those techniques and processes; provide financial and technical assistance to facilitate application of those techniques and processes; and support development of incentives and disincentives which make application of those techniques and processes a social, political and/or economic priority.

The FY 2007 request allows FEMA to: develop a variety of outreach materials to assist all entities of Federal, State, and local governments to effectively maintain sound floodplain management practice, and educate the general public on mitigation actions that may be taken in a pre-disaster environment; provide ongoing map maintenance activities, issue map revisions, and enhance distribution services, including provisions for digital products, subscription services, and links to other hazard data; provide funding to States for the development of the capability and capacity to manage the production of and to maintain flood hazard data (these efforts complement and support the Flood Map Modernization Fund activities); and provide technical assistance to the 20,000 communities participating in the NFIP and monitor the compliance with program requirements

Summary Justification and Explanation of Changes

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Printing	\$1,146	\$1,800	\$1,800	\$0

Printing includes all costs for printing and reproduction obtained from the private sector or from other Federal entities. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Advisory and assistance services	\$950	\$2,000	\$2,000	\$0

Advisory and assistance services include services acquired by contract from non-Federal sources (that is the private sector, foreign governments, State and local governments, tribes, etc.) as well as from other units within the Federal Government. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Other services	\$38,131	\$36,558	\$36,558	\$0

Other services include contractual services with non-Federal sources that are not otherwise classified under Object Class 25. The FY 2007 request is the same as the FY 2006 level.

1209

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Purchases from Government accounts	\$489	\$4,000	\$4,000	\$0

Purchases from Government Accounts include costs for purchases from other Federal Government agencies or accounts that are not otherwise classified. The FY 2007 request is the same as the FY 2006 level.

	2005 Actual	2006 Revised Enacted	2007 Request	2006 to 2007 Change
Grants/Subsidies/Contributions	\$16,138	\$15,000	\$15,000	\$0

Grants/Subsidies/Contributions include cash payments to States, other political subdivisions, corporations, associations, and individuals. The FY 2007 request is the same as the FY 2006 level.

PPA Mission Statement

The Flood Insurance Reform Act of 2004 introduced several new requirements and program initiatives. These include the establishment of a five-year Pilot Program for the Mitigation of Severe Repetitive Loss Properties, authorized at \$40 million annually. The Pilot Program focuses on a subset of the repetitive loss properties – severe repetitive loss properties - that have the largest impact on claims paid from the NFIF. Not counting those properties lost during the 2005 hurricane season, there are currently about 5,400 of these properties that have had four or more losses exceeding \$5,000 each or the properties where cumulative losses exceed the property value. Mitigating these properties will result in savings to the NFIF. This program will be funded from mandatory, premium collections.
