

"Title I modifications" therefore did not accurately reflect EPA's current proposed interpretation of this term. Thus, the first part of the statement quoted above should not have been included. This action corrects the erroneous language in the preamble.

Correction

In rule document No. 01-29967, beginning on page 62954, in the issue of December 4, 2001, make the following correction:

On page 62956, third column, remove the last paragraph beginning with "Response:" and on page 62957, first column, remove the first two paragraphs, and replace them with the following text:

"Response: EPA, in its proposed interim approval, indicated that a revision of the 20 DCMR 399.1 Definition of Title I Modification or modification under any provision of Title I of the Act to include changes reviewed under minor new source review would be required only if EPA established such a definition through rulemaking. Because EPA has not issued any final rule specifying that the definition of a 'Title I modification' must include changes subject to minor new source review, the District's current regulations remain consistent with 40 CFR part 70. EPA does not believe it is appropriate to require the District to revise the definition until such time as EPA completes its rulemaking on this provision in a manner that requires a revision in the District's rules.

Should EPA revise this definition in the future, the District will be required to revise its regulations as appropriate. As stated in EPA's proposed interim approval published on March 21, 1995 (60 FR 14921, 14922), EPA did not identify the District's definition of 'Title I modification or modification under any provision of Title I of the Act' as necessary grounds for either interim approval or disapproval. Accordingly, EPA has not identified the District's definition of this term to be a program deficiency."

Section 553 of the Administrative Procedure Act, 5 U.S.C. 553(b)(B), provides that, when an agency for good cause finds that notice and public procedure are impracticable, unnecessary or contrary to the public interest, the agency may issue a rule without providing notice and an opportunity for public comment. We have determined that there is good cause for making today's rule final without prior proposal and opportunity for comment because we are merely correcting an incorrect citation in a previous action. Thus, notice and public

procedure are unnecessary. We find that this constitutes good cause under 5 U.S.C. 553(b)(B).

Administrative Requirements

Under Executive Order (E.O.) 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and is therefore not subject to review by the Office of Management and Budget. For this reason, this action is also not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001)). Because the agency has made a "good cause" finding that this action is not subject to notice-and-comment requirements under the Administrative Procedures Act or any other statute as indicated in the Supplementary Information section above, it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), or to sections 202 and 205 of the Unfunded Mandates Reform Act of 1995 (UMRA) (Pub. L. 104-4). In addition, this action does not significantly or uniquely affect small governments or impose a significant intergovernmental mandate, as described in sections 203 and 204 of UMRA. This rule also does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of governments, as specified by Executive Order 13132 (64 FR 43255, August 10, 1999). This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

This technical correction does not involve technical standards; thus the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. The rule also does not involve special consideration of environmental justice related issues as required by Executive Order 12898 (59 FR 7629, February 16, 1994). In issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct, as required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996).

EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1998) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act (5 U.S.C. 801 *et seq.*), as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. Section 808 allows the issuing agency to make a rule effective sooner than otherwise provided by the CRA if the agency makes a good cause finding that notice and public procedure is impracticable, unnecessary or contrary to the public interest. This determination must be supported by a brief statement. 5 U.S.C. 808(2). As stated previously, EPA had made such a good cause finding, including the reasons therefore, and established an effective date of November 30, 2001. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This correction to Rule Document No. 01-29967 for the District of Columbia is not a "major rule" as defined by 5 U.S.C. 804(2).

Dated: January 24, 2002.

Thomas C. Voltaggio,

Acting Regional Administrator, EPA Region III.
