Title: Emissions Certification and Compliance Requirements for Nonroad Compression-Ignition Engines and On-Highway Heavy Duty Engines (Renewal).

Abstract: This information collection is requested under the authority of Title II of the Clean Air Act (42 U.S.C. 7521 *et seq.*). Under this Title, EPA is charged with issuing certificates of conformity for those engines which comply with applicable emission standards. Such a certificate must be issued before engines may be legally introduced into commerce. To apply for a certificate of conformity, manufacturers are required to submit descriptions of their planned production line, including detailed descriptions of the emission control system, and test data. This information is organized by "engine family" groups expected to have similar emission characteristics. There are also recordkeeping and labeling requirements. Manufacturers electing to participate in the Averaging, Banking, and Trading (AB&T) Program are also required to submit information regarding the calculation of projected and actual generation and usage of credits in an initial report, end-of-the-year report and final report. These reports are used for certification and enforcement purposes. Manufacturers need to maintain records for eight years on the engine families participating in the program. Portions of former ICR 0011.08 ("Selective Enforcement Auditing and Recordkeeping Requirements for On-Highway Heavy-Duty Engines, Nonroad Large Compression Ignition Engines, and On-Highway Light-Duty Vehicles and Light-Duty Trucks," OMB Control Number 2060-0064, expired on 8/31/1999) are being incorporated into ICR 1684.06. No collection of information from ICR 0011.08 has been conducted since its expiration; upon approval of ICR 1684.06, the agency shall resume this information collection. Portions of former ICR 1897.05 ["Information Requirements for Nonroad Diesel Engines (Nonroad Large SI Engines and Marine Diesel Engines)," OMB Control Number 2060-0460, expiring on 10/31/2004] related to certification and compliance requirements for marine compression-ignition engines are also being incorporated into ICR 1684.06. This action is undertaken to consolidate information requirements for the same industry into one ICR, for simplification and to avoid duplicity. With this

consolidation, we combine the burden associated with the certification, AB&T, Production-line Testing (PLT) and Selective Enforcement Audits (SEA) programs for non-road compression-ignition engines and on-highway heavy-duty engines.

The information is collected for compliance purposes by the Engine Programs Group, Certification and Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation. Confidentiality of proprietary information is granted in accordance with the Freedom of Information Act, EPA regulations at 40 CFR 2, and class determinations issued by EPA's Office of General Counsel.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in 40 CFR are listed in 40 CFR part 9 and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 2,112 hours per respondent. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Manufacturers of nonroad compression-ignition engines and on-highway heavy-duty engines.

Estimated Number of Respondents: 68.

Frequency of Response: Annually, quarterly and on occasion.

Estimated Total Annual Hour Burden: 143,604.

Estimated Total Annual Cost: \$13,978,203, which includes \$0 annual capital/startup costs, \$5,484,884 O&M costs, and \$8,493,319 annual labor costs.

Changes in the Estimates: There is an increase of 54,557 hours in the total estimated burden currently identified in

the OMB Inventory of Approved ICR Burdens. This increase is due to: (1) Changes in the estimated number of hours that respondents spend carrying out each task and (2) the consolidation of portions of ICRs 0011.08 and 1897.05 into this ICR, as explained above.

Dated: September 20, 2004.

Director, Collection Strategies Division.
