

Eastern Federal Lands Highway Division
Federal Highway Administration
U.S. Department of Transportation

— CAREER DEVELOPMENT OPPORTUNITIES —

Contract Specialist GS-1102-9/11/12
Salary Range: \$48,108.00 – \$90,698.00

Organizational Overview

Federal Lands Highway (FLH)

Nearly one-third of the land area of the United States is Federally owned and administered. The Federal Government has a special interest in and responsibility for highways on or serving these Federal and Indian Lands. Congress has established various programs to fund the construction of highways on Federal and Indian lands. The Federal Highway Administration (FHWA) is authorized to assist its Federal Agency partners to perform engineering and related services for the development and improvement of these highways. The FHWA, through the Federal Lands Highway office is responsible for two of these programs: Federal Lands Highway Program (FLHP) and the Emergency Relief on Federally-owned Roads Program.

Federal Lands Highway Program (FLHP)

The FLHP is administered in cooperation with our Federal Land management partners. Our partners include the National Park Service (NPS), U.S. Forest Service, U.S. Fish and Wildlife Service, and other land management agencies who depend on FHWA for all, or a portion of, their engineering, design and contract administration needs. The FLHP includes four funding categories: the Park Roads and Parkways Program, the Public Lands Highway Program (which includes the Forest Highway and Public Lands Discretionary Programs), the Refuge Roads Program, and the Indian Reservation Roads Program. These partners rely on the FHWA for all, or a portion of, their planning, engineering, design, and contract administration needs. Other Federal agencies and State Departments of Transportation also request our services on a periodic basis. The FHWA and its Federal partners are responsible for constructing some of the most beautiful and scenic highways in America through the FLHP.

Eastern Federal Lands Highway Division (EFLHD)

Based outside Washington, D.C., in Sterling, Virginia, the EFLHD is one of three field offices responsible for the Federal Lands Highway Program. The EFLHD provides our partners with transportation program administration and engineering services for planning, environmental compliance, design, contract administration, construction, and rehabilitation of highways and bridges on or providing access to federally-owned lands serving 31 Eastern States, Puerto Rico, and the U.S. Virgin Islands.

EFLHD Contracting Section

The EFLHD Contracting Section, a part of the Planning and Programming Branch, is responsible for contracting out all project services required for the entire Division. Typical services required are for bridge and roadway construction, Architect/Engineer (A/E) designs, environmental resource surveys, land surveys, and geotechnical investigations. Services are normally acquired either by negotiated or formally advertised procedures.

The Contracting staff interacts with other EFLHD fiscal, technical, and construction staff, and with our Federal Land partners, to ensure timely acquisitions of the required services, and for compliance with the Federal Acquisition Regulations (FAR) and other regulatory requirements.

The EFLHD Contracting Section offers an excellent opportunity for management, leadership, and teamwork; as well as direct involvement in highway and bridge project contracting.
