

Rehabilitation of Alexander's and Slough Bridges

Project Purpose:

The purpose of the proposed action is to provide safe access to the Alexander's Bridge site area and to maintain circulation as defined in the 1890-1942 Commemorative Period. In order for the proposed action to be considered successful, the following objectives must be met:

- Allows for Park interpretation of the 1863 Battle Period and 1890-1942 Commemorative Period, as defined in the 1999 Historic Resource Study and the 2004 Cultural Landscape Report.
- Does not interrupt the historically accurate interpretation of adjacent Park resources (i.e., historic markers, site of the battle).
- Maintains the Park's ability to provide interpretation of the site for the enjoyment and experience of Park visitors.
- Maintains access to adjoining private lands.
- Maintains or improves the ability for West Chickamauga Creek flood waters to pass through the interpretive area
- Does not require the acquisition of additional lands. The acquisition of additional lands would require a congressional action, which is beyond the scope of this project.
