Federal Supply Schedule 36 IV, Document Management Products & Services

MAKING DOCUMENT MANAGEMENT EASY!

Federal Supply Schedule 36 IV provides an array of Document Production Services that will encompass your needs for the 21st Century. We offer On-Site and Off-Site Document Production Services. Typical Document Production Services include copying, fax, large format scanning, facilities management, desktop transmission, on-going equipment maintenance and quality reports. Government agencies will initiate task orders that specify the actual Document Production Services to be performed, the dollar value, period of performance and any other significant factors relative to the requirement. For additional information call the Office and Scientific Equipment Center today at (703) 305-7425. Or visit us on our website at: www.fss.gsa.scientific.gov.

Federal Supply Schedule 68 VI B Chemical and Chemical Products

SIERRA ANTIFREEZE/COOLANT

Sierra Antifreeze/Coolant is a premium quality; propylene glycol (PG) based antifreeze that provides engine protection comparable to that provided by premium conventional ethylene glycol (EG) based antifreezes. Sierra provides outstanding performance in the four critical areas of engine protection: freeze-up, boil-over, heat transfer, and corrosion prevention.

Due to its PG formulation, SIERRA Antifreeze is less toxic than conventional EG-based antifreeze and, therefore, is safer to pets, people, and wildlife in cases of spills, leaks, boil-over, or careless disposal. Approximately 90,000 pets and animals die each year due to antifreeze poisoning. Fortunately, this does not have to happen. Today, Sierra — the safer antifreeze — provides an alternative.

SIERRA Antifreeze meets all requirements of the ASTM D5216, the industry-testing standard for propylene glycol coolants. SIERRA is also phosphate-free and provides corrosion protection for all engine metals including aluminum, copper, cast iron, brass, steel, and solder.

Federal Supply Schedules 75 II & III A

NEED OFFICE SUPPLIES? WE GOT 'EM!

The basic office supplies you need to efficiently run your agency's office can be found in the **Federal Supply Schedules 75 IIA and 75 IIIA**. In Schedule 75 IIIA, approximately 2,000 to 3,000 items can be acquired from the Next Day Delivery contractors. They're among the largest office supply wholesalers in the private sector.

But there's more. A lot more. In Schedule 75 IIA.

What else do you need today? *Need binders?* We have 1545 items from 33 contractors. *Need organizers?* We have a total of 1164, and including 92 different planners, 77 desktop organizers, and 74 organizer software disks. *How about Ballpoint Pens?* There are 273 different ones available. *Or Pencils.* We offer 1052. *Need File Folders?* There are 593 to choose from. *And Labels:* You'll find 4175 varieties for files, envelopes, and packages.

The following Special Item Numbers (SINs) better describe the wide purchasing potential. Check them out at the Federal Supply Schedules link at www.fss.gsa.gov, for a list of contractors go to Schedules E-library.

SIN 75 201 Art & Drafting Supplies: Drawing leads, cleaning pads, compasses, electric erasers, stencil sets, dusting brushes, drafting kits, protractors, squares, and templates.

SIN 75 202 Binders, Labels, Filing Accessories: Binders: Round ring, slant ring, D-ring, data, display, binding systems and supplies, storage racks, hanging binders, presentation, and binder lifts.

SIN 75 203 Desk Top Office Equipment & Accessories: Electric pencil sharpeners, letter openers, hole punches and letter slitters; manual hole punch, calculators; dictation equipment, electronic office reference equipment, ribbon/print cartridges, portable office equipment, shredders, and staplers.

SIN 75 204 Desktop Office Products: Blotters, book ends, clips and fasteners, desk clocks, pads, shelves and trays, drawer organizers, file frames, moisteners, name plates, pencil cups and trays, rubber bands, rulers, staples, staple removers, tape dispensers, thumb/map tacks, cutting instruments, envelopes, holders, stamps and stamp supplies, and telephone accessories.

SIN 75 205 Office Services: Binding, engraving, imprinting/customizing and repairing.

SIN 75 206 Organizer/Time Management Systems.

SIN 75 207 Presentation Products:

SIN 75 208 Tapes & Adhesives: Pressure sensitive, masking, transparent, removable, specialty, book, double coated, spray adhesive, and adhesive sticks.

SIN 75 209 Writing Instruments: Pens, pencils, markers, and highlighters.

A NOTE ABOUT FSS ENVIRONMENTAL PROGRAMS

Our primary responsibility is to ensure that FSS program offices are conducting business in compliance with the various environmental laws and regulations (i.e., Executive Order 13101, Greening the Government Through Waste Prevention, Recycling, and Federal Acquisition). Secondly, we play an instrumental role in expanding our product offerings to include those that contain environmental attributes. Lastly, we promote the use of environmental products and services throughout the Federal government.

We advise federal buyers to consider price, availability and performance requirements when making environmental procurements. In addition, federal buyers should evaluate contractor literature regarding environmental marketing claims.

**THINK GREEN...AND BUY GREEN
PRODUCTS FROM GSA!!!**

Federal Supply Schedule 54 II B Prefabricated Structures and Outdoor Smoking Shelters

CARR CONCRETE BUILDINGS

The top-quality materials and state-of-the-art processes used to manufacture every CARR-BILT precast concrete building help provide years – even decades – of service with minimal maintenance. In fact, we are so confident in the outstanding quality of our buildings that we offer a 5-year manufacturer's warranty.

Carr precast, reinforced concrete buildings are engineered to resist high winds and heavy snowfalls or ice loads. They won't rust, rot, or burn. When locked, they're virtually vandal and theft-proof. And because they require little maintenance (unlike wood or metal buildings), they quickly pay for themselves.

What's more, CARR-BILT buildings can be used for a variety of purposes. There are over 50 standard models to choose from, including 10 hazardous material storage models which can be designed to comply with your particular EPA and OSHA requirements. For special needs, your Carr Concrete Project Manager will help you customize your building. Heating and air conditioning; plumbing; windows; explosion-relief panels, custom floor, wall and roof openings; security alarm systems; and anti-graffiti coating are among the custom features you can select.

Best of all, CARR-BILT precast concrete buildings arrive ready for immediate use; no on-site assembly is required. They can also be relocated. And with Carr, you almost always save money over other building options because you're buying factory-direct.

Federal Supply Schedule 79 I B Cleaning Equipment, Janitorial Supplies, Cleaning Chemicals and Sorbents

ECOMATE MPC

Ecomate MPC is an industrial cleaner and degreaser for homes, offices, restaurants, and institutions. This environmentally-safe multipurpose cleaner replaces hazardous caustics and hard chemicals. Its inherent mildness, compared with other cleaners and degreasers, has made it the cleaner of choice for employees at institutions and hospitality industries. This free-rinsing aqueous cleaner has both organic and water-based cleaning properties, without the organic solvents. Ecomate MPC is a medium-foaming alkaline liquid. It is safe on all substrates except virgin aluminum. It is formulated without phosphates, D-limonene, chlorides, and harsh acids or alkalis.

Ecomate MPC effectively removes carbon, oil, grease, dirt, wax build-up, blood, and similar soils from grills, appliances, vinyl, food processors, floors, work clothes, carpet and upholstery, and concrete.

The environmental attributes offered by Ecomate MPC are: Biodegradable (98% in 7 to 28 days), nontoxic, odorless, USDA approved, sewer disposable, no enzymes or phosphates, non-petroleum based, and non-hazardous to skin or respiratory system.

Ecomate MPC comes as a concentrate and should be mixed according to instructions on label or by utilizing the Ecomate Multi Blend Dispenser. Specific soils may take more or less product, depending on the degree or period of accumulation. Ecomate MPC is effective at room temperature, but its power is increased when it is heated to between 80 and 165 degrees Fahrenheit.

DIGITAL LOGIC ANALYZERS AND GENERATORS

Were you aware that GSA offers digital analyzers and generators through our Multiple Award Federal Supply Schedules Program? These items are featured on Schedule 66 II J, Test and Measurement Equipment, under Special Item Number 627-9.

Logic analyzers are used to analyze the internal and input/output states and timing of digital logic circuitry of data processing equipment, PC boards and assemblies. Examples of such equipment include logic analyzers, emulators, bus exercisers and monitors. Also included are general purpose digital data pattern generators such as sequential and algorithmic pattern generators.

To find out the names, addresses and phone numbers of the commercial contractors who are featured on this Schedule, go to the FSS Homepage at www.fss.gsa.gov, click on Federal Supply Schedules <Schedules E-Library> and search for "66 II J". Orders should be placed directly with the contractor.

NEWS FLASH

SCHEDULES E-LIBRARY

The Schedules E-Library is GSA's official online source for complete Federal Supply Schedule contract award information. You can find out who has a Schedule contract, and what's available by using various search options, e.g., MAS contractor's name, contract number, Special Item Number, Schedule Number or keyword. Information is updated daily to ensure access to the latest schedules and contracts! This program utilizes the advances of electronic commerce while providing you access 24 hours a day, 7 days a week to Scheduled E-Library at <http://www.fss.gsa.gov/sched>.

Other features include:

- Access to information on over 4 million products and services.
- Direct link to the GSA *Advantage!* Online Shopping for instant purchasing!

- New and improved look for easier browsing and navigation!
- New "preview" pages allow you to jump directly to the areas you need without unnecessary paging!
- Ability to download schedule information by schedule or SIN!
- More contractor websites and e-mails!
- More enhancements are on the way!

Schedules E-LIBRARY

Federal Supply Schedule 68 VI B Chemical and Chemical Products

INSECT REPELLENTS AND WATER-TREATMENT PRODUCTS

Hilton Head Laboratories, Inc., is proud to present to GSA customers two groups of products: Insect Repellents and Water-Treatment Products.

Our insect repellents consist of the following:

Everglades® MAX Insect Repellent is available in 2-ounce bottles with either a pump or roll-on applicator. Everglades® MAX Insect Repellent contains 100% DEET and protects the user for up to 8 hours from mosquitoes, gnats, ticks, chiggers, and biting flies.

Everglades® EVERYDAY Insect Repellent is available in a 4-ounce pump spray or in individual-use packettes. Everglades® EVERYDAY Insect Repellent contains 30% DEET and protects the user for up to 5 hours from mosquitoes, gnats, ticks, chiggers, and biting flies.

Insect Repellent, Clothing Application, Kit (NSN 6840-01-345-0237) is designed to treat clothing with a permanent insect repellent coating that will last for up to 24 washings. This product is available in a kit that can treat two pieces of clothing or two bed nets. This system has been used by the Department of Defense for 6 years to treat battle fatigue uniforms when troops go into the field. This product repels and kills mosquitoes, ticks, lice, fleas, and biting flies.

The water-treatment product is Bio-Med II. This product is a specifically-formulated bio-enzyme product that improves water quality by eliminating organic waste dissolved solids such as algae, mildew, spores, bacteria, sludge from treatment plants, and their accompanying odors through an enzyme-digestion process. Bio-Med II can be used in lakes, holding ponds, decorative ponds, aquariums, and other fresh-water sources. Within a few short weeks, this product, when used according to directions, will produce a better quality of water. Bio-Med II is guaranteed to be environmentally friendly and will not harm the water supply. After the dissolved solids have been eliminated by Bio-Med II, the Bio-Med II will break down into its basic components of water and carbon dioxide, leaving no harmful residue. Bio-Med II is available in 5-gallon pails and 55-gallon drums. The typical application rate is 1 gallon of Bio-Med II per 1 million gallons of treated water per month.

Cleaning Equipment, Janitorial Supplies, Cleaning Chemicals and Sorbents**

SORBENTS

Choose America's "green" absorbent products. USA Absorbents, Inc., products include spill kits, pads, mats, booms, and much more. These all-natural absorbents are made of all-American agricultural products and are manufactured in the USA. Presidential Executive Order Number 13101 includes bio-based products as a priority for government purchases. USA Absorbents are all-natural cotton and wool and have been declared an "Environmentally-Preferred Product" by the USDA and EPA.

When you choose natural absorbents, you choose to help clean up the environment, to keep American farmers and ranchers in business, and help balance America's foreign trade deficit by purchasing absorbents which are the finest of America's heartland.

NEW PORTABLE BREATH ALCOHOL ANALYZER

LIFELOC TECHNOLOGIES, INC.

The PHOENIX quickly and accurately calculates a subject's breath alcohol concentration, using either direct or passive testing. It automatically records vital information, such as the time/date and the last calibration and verification information, and allows entry of a unique subject identification number. When in Direct test mode, the subject is directed to blow into the mouthpiece, at which time the PHOENIX quickly and accurately calculates the alcohol concentration. Should the subject fail to provide an adequate sample, the PHOENIX will alert the operator. In Passive test mode, the operator simply holds the PHOENIX in front of the subject's face while he/she blows softly towards the sample port. Once the results have been collected, they can be immediately printed on a Lifeloc portable printer, or stored in the memory for later retrieval.

The PHOENIX sets a new standard for breath alcohol testing. Certified by the U.S. National Highway Traffic Safety Administration, the PHOENIX is recognized around the world for its accuracy and measurement speed.

The PHOENIX comes with a charger, 10 mouthpieces, and a case; or may be purchased in a kit with a portable printer.

FREE-FLO & FREE-FLO 350

Free-flo & Free-flo 350 is a mixture of enzymes and natural microbes specially selected for clearing drain lines, grease traps, septic tanks, etc. This all-natural product will not only dissolve the source of the blockage, it will also eliminate offensive odors.

Free-flo is packaged in 2-ounce packs of bacterial cultures on a dry enzyme base, held inside a water soluble, clear plastic envelope. The product is dropped in any required treatment area, and the water-soluble pack completely dissolves, usually within a few minutes, releasing billions of hungry bacterial cells along with enzymes.

NEW CLEAN IN A MINUTE® ALL NATURAL FACIAL CLEANING MITTEN

Clean in a Minute® is a 100% polyester cloth; shaped in the form of a mitten that fits onto your hand. When dampened with regular tap water, the mitten has the remarkable ability to remove all your makeup, facial camouflage, or grease paint, and deep clean your skin too, in just a few seconds! There are absolutely no added chemicals or cleansers inside the mitten, it is all-natural! When you are done removing your facial coverings and deep cleaning your skin, you just wash the Clean in a Minute® with a bar of toiletry soap and water and hang to dry. It is reusable for several months, even up to a year with average daily use. The remarkable cleaning ability found in the Clean in a Minute® product is due to its high tech micro-fiber structure and weave, without chemicals or cleansers.

Federal Supply Schedule 62 II Energy Efficient Products

BULB BOSS — WIRELESS LIGHT CONTROLLER

The Bulb Boss® is a reusable disk that quadruples bulb life and turns an ordinary light bulb into a dimmer, auto-off, night light, or flasher. To install, simply place the Bulb Boss® disk on the base of a light bulb and screw in the bulb. The Bulb Boss® 10 or 30-Minute Auto-Off saves energy by turning lights off automatically so you don't have to. Winner of numerous environmental awards, it is perfect for storerooms, closets, basements, and other low-use areas. The dimmer allows four lighting levels in any standard light socket. Say goodbye to expensive dimmers, 3-way bulbs, and switches. The nightlight is perfect for areas requiring a low light level for extended periods and occasional periods of high intensity. The flasher makes any light a signaling beacon. All Bulb Boss® models save maintenance costs by extending bulb life up to 400% using patented Soft Start® circuitry.

Bulb Boss® saves energy, saves maintenance costs, installs in seconds, and adds incredible functionality to the ordinary light bulb. It is a must for all energy users.

TEMPBADGE TIME - DEPENDENT ID

The TEMPbadge Time-Dependent ID is designed to prevent unauthorized re-use because it changes color AUTOMATICALLY, going from white to red to let you know that it has expired!

The TEMPbadge Time-Dependent ID Badge can help you solve your organization's problem of lost or uncollected badges. The color change provides a clear visual alert from 50 feet away, preventing reuse. The Time Dependent ID Badge is ideal for identifying visitors, vendors, contractors, and temporary employees.

This unique badging system is easy to use and requires no electronics or hardware to operate. The Time-Dependent Badge consists of two parts: The backpart, which is preprinted in red "migrating ink"; and the self-adhesive frontpart, which when applied to the backpart, activates the badge. The rate of expiration is determined by the frontpart and is available in: 2-hour, 1-day, 1-week, or 1-month expiration. The Time-Dependent Badge works indoors and out, day or night, and is available self-adhesive or as a clip-on-badge. It can be printed on any thermal transfer printer as part of an integrated access control system, issued manually, or used with the one-write sign-in system. Stock and custom designs available.

Water Purification and Sewer Treatment Equipment**

AQUASHIELD FILTRATION SYSTEM

The AquaShield Filtration System is a highly effective pollution-prevention technology that removes contaminants from stormwater, waste water, and non-point source discharges. The system involves a multi-stage treatment process that includes a patented filter media made of 100% reclaimed materials. The filter media does not allow contaminants to be released once it is absorbed. This is a unique feature of the AquaShield Filtration System that provides superior performance even in extreme conditions.

Third party evaluations confirm 95% removal of dissolved POLs. Maintenance of these systems involves very little effort or expense. All AquaShield models can be maintained from ground level. This eliminates the need for confined space entry.

The CS-200 AquaShield is an in-line treatment system designed for intense stormwater and waste water flows with large storage capacities for sediment, debris, POLs, and dissolved contaminants. The CS-200 AquaShield eliminates gravitational, Vortex, and coalescing oil water separator and grip chamber structures.

MANAGEMENT SERVICES CENTER AUGMENTS THEIR SCHEDULES

GSA's Management Services Center is expanding the services we provide the Federal community through the Multiple Award Schedules Program. At the present time, we have schedules for Mail Management Services, Environmental Advisory Services, Translation and Interpretation Language Services, and Management, Organizational and Business Improvement Services (MOBIS). Our two newest schedules for Energy Management Services and Logistics Worldwide (LOGWORLD) are anticipated to be awarded this spring and/or summer.

Our MOBIS Schedule 874 is extended from six to eight Special Item Numbers (SINs). The first new SIN 874-7, Program Integration and Project Management Services, provides for research and recommendations to enable a contractor to act as a project leader. The second new SIN 874-8, Alternative Dispute Resolution (ADR) Support Services, allows the support, application, performance, and/or management of facilitated, preventative, fact-finding, advisory, or imposed Alternative Dispute Resolution.

HAZARDOUS MATERIALS (HAZMAT) MATERIAL SAFETY DATA SHEETS (MSDS)

Certain items acquired for storage, distribution, and use by our customers require special transportation, handling, and disposal due to hazardous materials being used in their manufacture. Special instructions for handling these items are contained on Material Safety Data Sheets (MSDSs).

The Material Safety Data Sheet (MSDS) Schedule 738 IX is fully incorporated into our Environmental Advisory Services Schedule 899. More information about Environmental Advisory Services is forthcoming in the May/June issue of MarkeTtips.

Currently, we have over 400 schedule awarded contracts with qualified providers to deliver the total solution to help meet your agency's needs.

Please visit on-line for more information:

Vehicular Multiple Award Schedule (VMAS) 23 V

GSA IS CLEANING IT UP JUST IN TIME FOR SPRING!!

The Automotive Division's new Vehicular Multiple Award Schedule (VMAS) 23, Section V can help you with your road cleaning equipment needs. Previously under Federal Supply Schedule 38 I A for Construction and Highway Maintenance Equipment, Special Item Number (SIN) 271-104 is now included in the new VMAS.

SIN 271-104 for cleaning equipment includes sweepers/scrubbers which are 20 h.p. or greater. They sweep sidewalks, pavement, courtyards and parking ramps. The equipment can scour grime and pick up debris at the same time. Cleaning malls,

alleys and streets is fast and provides a nearly dust-free system to assist you with your spring cleaning.

For more information on road cleaning equipment you may contact Mike Balzer on (703) 305-6251. For information on any of the Automotive Division's other vehicle programs or services, please contact our Customer CARE line on (703) 308-CARS or visit our website at:

<http://www.fss.gsa.gov/motor>.

NEWS FLASH

REMINDER!

Mandatory prepayment audit of transportation billings starts April 20, 2000. For additional information visit the Transportation Audit website at <http://www.fss.gsa.gov/ota/>

The rewrite of regulations pertaining to prepayment audit will appear shortly in the Federal Register for comments.

In addition, we have updated two of the most helpful tools for handling transportation billings, the GBL and GTR Handbooks, to reflect the recent changes. When the regulations are finalized, the handbooks will be circulated for comments. The published handbooks will be available both in hard copy and on the Web.

Federal Supply Schedule 58 V A ADPI Telecommunications — Media Supplies

ERGONOMICS IS EVERYBODY'S BUSINESS

Under new standards set last November by the Occupational & Safety Health Administration (OSHA), Federal agencies will have to create programs to identify and fix ergonomics problems in the workplace.

According to OSHA, ergonomics-related problems account for one-third of all workplace injuries and illnesses. The proposed rules will establish guidelines for developing ergonomics programs in the workplace. The need is obvious. For people working repetitive tasks such as computers, the hazards can be pervasive and debilitating but are not incurable and are preventable. Ergonomics is the science of designing work tools that protect the health of workers. OSHA argues that when ergonomics is ignored, workers can develop injuries and disorders such as carpal tunnel syndrome, tendinitis, herniated discs and lower back pain, which result from repetitive motion, or performing work in awkward positions.

When ergonomic principles are used in the design of new tools and devices, the causes of these workplace injuries are greatly eliminated, reducing injuries, increasing worker's satisfaction, reducing absenteeism, and increasing productivity. For example, The advent of the computer brought many orthopedic problems to the workplace, along with employee eyestrain. To counteract this, wrist rests can support wrists and at the same time, maintain them in completely horizontal positions, preventing carpal tunnel syndrome and reducing pressure on the median nerve.

The ergonomic answers to many workplace injuries, strains, and inflammation of the musculo-skeletal structure can be found in Federal Supply Schedule 58, Part V Section A. Contractors can be accessed on the internet at the E-schedules library at <http://www.fss.gsa.gov/sched> or through GSA Advantage! at <http://www.fss.gsa.gov>, or by phone or fax. The negotiated prices are as low as you will find and the variety available gives you the options to make the best possible buying decision.

Federal Supply Schedule 71 I Office Furniture

MITY-LITE INC. — THE LEADER IN LIGHTWEIGHT DURABILITY

Mity-Lite Inc. was founded in 1987 in answer to a direct need for a durable, lightweight table. Mity-Lite's ingenious response revolutionized the table industry. Mity-Lite remains the industry leader in supplying durable, lightweight, plastic, folding tables to several markets. Customers include hotels, churches, convention centers, schools, the U.S. Government, both foreign and domestic.

Mity-Lite tables are composed of a high-impact ABS plastic surface with a hardwood interior frame and weigh about 30% - 40% less than traditional particleboard tables. Though lightweight, Mity-Lite tables are incredibly strong and durable. The Mity-Lite table can hold loads of over 1600 pounds! The table features patented, reinforced corners, T-nut leg mounts, and patented riveted leg brackets for a strong metal to metal leg assembly.

Mity-Lite offers over 50 table choices in hundreds of leg and color combinations. Most importantly, a Mity-Lite table purchase saves money in two key ways. First, fewer man-hours are needed for set up and take down. And second, strong, durable and stain-resistant Mity-Lite tables save on replacement and repair costs.

In a recent survey, over 99% of their customers would recommend Mity-Lite tables. Commitment to customers and confidence in their tables resulted in the recent extension of their warranty to 12 years.

HARDWARE STORE

Things break — that's a fact of life.

But you have no need to worry — we have the parts and accessories to fix all your ailing equipment. As part of GSA's Multiple Award Schedule 51V, Hardware Store, we offer 4 million parts and accessories that encompass 400 manufacturers. You can make purchases a variety of ways. We offer Walk-in/Walk-out service, so that you can actually use your SmartPay card to make "at-the-register" purchases. And we also offer convenient catalog service (both print and online). Currently, parts and accessories are available from the following six GSA approved contractors.

Federal Supply Schedules 738 X Human Resources & Enhanced Equal Employment Opportunity Services

COME TO GSA FOR HUMAN RESOURCES MANAGEMENT SERVICES

Human Resources Management Services – from thorny problems to routine activities and including enhanced equal employment opportunity services — are now available to Federal agencies through the newly created **Federal Supply Schedule 738X, Human Resources & Enhanced Equal Employment Opportunity Services**. This is a highly cost-effective answer to all HR needs — so essential during this period of downsizing, budget cutting, and mandates to do more with less — by taking advantage of contracts with some of the industry's most well regarded, highly competent consulting firms that have been selected. In fact, several large firms such as Anderson Consulting, Price Waterhouse, Booz Allen Hamilton & Deloitte Consulting, and KPMG are among those making offers.

Schedule 738 X covers the full gamut of HR management and EEO activities, which are highlighted below.

Human Resources Support Services

The Special Item Number (SIN) covering General Support involves *planning* future demand for personnel, *recruitment and internal placement*, including promotion and assignment, *pre-employment screening*, including investigation and verification, and *position classification* based on pertinent guidelines. It also covers *personnel actions*, such as maintaining personnel records and interfacing with finance and OPM, *training* by analyzing needs and providing guidance and specific programs, *employee assistance*, which includes advice, HR-specific training courses, and counseling, *employee relations*, such as disciplinary action, recognition and performance appraisal programs, and even *personnel outplacement services*, when such steps are required.

Other SINs involve *review and integration services*. These provide a review of the HR department relating to the implementation of the out sourced functions. If required,

they can integrate the functions of multiple contractors. Also available are all-important *workman's compensation services*, involving counseling claimants in filing accident reports and claims.

Enhanced Equal Opportunity Employment Services

The highly sensitive area of compliance with the Equal Employment Opportunity Act and related acts, rulings, and case law are covered by another large group of SINs. They cover a wide variety of issues including investigation, analysis, inquiry, reference materials and the development of training courses for managers and employees, and general consultation. In addition, another SIN covers the significant subject of alternative dispute resolution (ADR).

Schedule 783 X streamlines the procurement process. Your agency can place the entire – or merely significant parts – of any program in the hands of these consulting contractors, in addition to developing programs for your agency's unique requirements. The important thing is that GSA has taken care of a great many of the details for solution of these problems: Researched the subject, investigated the sources, and negotiated the fees. All competition requirements of the FAR will have been met with the selection based on "Best Value." In addition, further customization of the program can be accomplished with a BPA.

To obtain a copy of Schedule 738 X, contact The Centralized Mailing List Service (CMLS), P.O. Box 6477, Fort Worth, TX 76115; Phone (817) 334-5215, FAX (817) 334-5227. Or see the E-Schedule Library through *GSA Advantage!* at www.fss.gsa.gov

It make good business sense for you to pass this information to your unit's Human Resources Department.

Federal Supply Schedule 69 Training Aids & Devices, Instructor Led Training Development for Course Materials

NEW GSA RESOURCES TO HELP IMPROVE THE LIVES OF EMPLOYEES & FAMILIES

Whether you're purchasing publications for personnel in the armed forces, dislocated Federal employees, single mothers leaving welfare, or substance abuse prevention programs --this new Federal Supply Schedule vendor can help make the job a little easier.

Life Skills Education, a publisher of educational pamphlets, now has its complete catalogue available through **Federal Supply Schedule 69, Training Aids and Devices**. As an established government vendor whose pamphlets have been used in social services and employment programs in the public and private sector for over 20 years, many program directors are already familiar with its materials. With titles ranging from parenting, substance abuse, and health to domestic violence and career skills, there aren't many social issues that they don't cover.

Easy-to-read, inexpensively priced, informative, and concisely-written, Life Skills Education booklets are suitable for use in human resources libraries, wellness centers, VA centers, drug abuse prevention and treatment, dislocated worker counseling, transition assistance, family advocacy, equal opportunity offices, youth outreach and welfare-to-work programs. In fact, there are 40 new titles to help welfare-to-work clients prepare for and land a job, as well as how to fit into the workplace, balance work and home duties, and improve job performance.

Their new catalog includes the following sections: *Personal Improvement*, including self-improvement, moving, healthy relationships and financial management; *Parenting* including parents & caregivers, child development, values and guidance and drugs and your kids; *Adolescence* includes

teen pregnancy, drugs and teens, sexuality' social pressure, divorce, safety, aging, and death & grieving; *Health* includes stress, mental health, nutrition, fitness, wellness, tobacco/smoking, sex education, and AIDS/HIV education; *Employment* includes getting ready, job search, letters & resumes, interviewing, the right attitude, networking & resources, adjusting to challenges, succeeding on the job, work & family, coping with unemployment, military life, and managing money; *Substance Abuse* includes prevention, addictive behaviors, support & prevention, and special risks, *Domestic Violence* includes support & treatment, families & caregivers, sexual abuse, and violence in society; *Social Issues* include law & justice, equal opportunity, environment, and schooling.

Written in conversational style, LSE booklets are packed with helpful information and an upbeat attitude and are perfect for handouts, workshops, and orientation packets. Value added features include free shipping, prompt turnaround, and free imprinting of covers on orders of 100 or more for individual titles.

Catalogues and free samples are available on request. Place all orders directly with the vendor, being sure to note that yours is a government order.

HARDWARE STORE EXPANDS ONCE MORE

After months of waiting, the FSS Hardware and Appliances Center is proud to announce the addition of Sears PartsDirect to the Hardware Store Multiple Award Schedule.

The Hardware Store is a Multiple Award Schedule allowing you to make purchases in a variety of ways. We offer Walk-in/Walk-out service, so that you can actually use your SmartPay card to make "at-the-register" purchases. And we also offer convenient Catalog service (both print and online). However your method of purchase, you will get a pre-negotiated discount off your purchase at the point of sale.

The Sears PartsDirect contract award went into effect January 3, 2000. With the inclusion of this contract in the Hardware Store, we can now offer GSA customers over 4,000,000 additional parts. As everyone knows, something does not need to break to need a new part. Normal wear and tear and maintenance can cause frustration and stress and downtime which decreases productivity. If your washer, vacuum, electric drill, or lawn mower (just to mention a few of the hundreds of electrical appliances) just lost a belt and you need a part to fix it - Check out Sears PartsDirect, they may be just what the doctor ordered.

Now you have even more choices for parts. Check out all of our Hardware Store Contractors: W.W. Grainger, Maintenance Warehouse, Hardware Associates, Tri-City Hardware, Sears PartsDirect and Specialized Products. To view vital information on all six contractors, log into our website at: www.fss.gsa.gov <Federal Supply Schedule> then link to Schedules E-Library.

LET SADI LIFT YOU UP — AND THEN SOME!

The Office of Vehicle Acquisition and Leasing Services recently merged its Federal Supply Schedules into a single schedule. The Automotive Division's SADI (Standard Aerial Devices and digger/derricks Immediately available) Program is now a part of this new Vehicular Multiple Award Schedule (VMAS) Part 23, Section V (previously under Federal Supply Schedule 23 II).

SADI offers Vehicle Mounted Personnel Lifts, Vehicle Mounted Digger/Derricks and Vehicle Mounted Cable Placers. These vehicles have a wide variety of options from which to choose for tree work and use around high voltage lines and generators. The vehicle mounted personnel lifts, both insulated and non-insulated, are available with working heights from 35' to 97' for both general purpose and material handling units. The digger derricks have

sheave heights from 42' to 60' and special purpose trucks are available for use in cable placing and cable reel handling. The vehicles are designed to meet the safety requirements of the American National Standards Institute.

The SADI Program provides you with multi-vendor selection and competitive pricing. You may place your order directly with the contractor or GSA will place the order for you for an additional surcharge of 1%.

For more information on SADI, you may contact Sarah Bailey on (703) 305-6251. For information on any of the Automotive Division's other vehicle programs or services, please contact our Customer CARE line on (703) 308-CARS or visit our website at:

“The Automotive Meter and Kit is a great diagnostic tool [it] is a great time saver and readiness enhancer!” — R.J. Holley, III Corps, Ft. Hood, Texas

Automotive Meter and Kit
Portable Solution for Automotive Field Diagnostics

What used to take hundreds of pounds of test equipment can be accomplished with the hand-held Extech MultiScope™ and several accessories in one neatly organized briefcase. Now a technician can diagnose military fleet service problems in the field efficiently with less expense, greater ease and more accuracy. Use this kit on any internal combustion engine from standing power plants to diesels, turbine craft and gear boxes to auto transmissions and power take-offs. Includes MultiScope™, pressure/vacuum adapter, ac/dc clamp-on adapter, PC communication kit software, automotive pick-up adapter, temperature adapter, ni-cad batteries and ac adapter in a hard black polyethylene case. The 11.6-pound kit is 20.5" x 20.25" x 6". One-year warranty.

“You may order directly through the Contractor using the Government Purchase Card.”

The following tests can be performed with the GSA Automotive Meter and Kit:

- EV sweep
- TAB current draw
- TAD current draw
- Injector voltage and current
- EGR solenoid duty cycle, current draw and voltage
- PIR pattern
- SPOUT pattern
- DIS current draw/DIS reference patterns
- Crank sensor voltage
- EST 1/EST 2 voltage
- MAP pattern
- High data signal/low data signal
- AC sensor
- VSS signal
- Canister purge flow
- Transmission pressure tests/and temperature tests
- Outlet temperature
- Onlet temperature
- Rotational speed-crank, blade, turbine and fan

Taylor Chair Now Under Contract!

- Fine Wood Furniture
- Several Styles
- Embossed Seals
- Guaranteed Quick Ship
- Compressed Lead Times
- Custom Designs Available

Established in 1816, Taylor Chair has earned an excellent reputation for designing and crafting fine office furniture that reflects progressive design, marked quality, and ambitious price points.

Through state-of-the-art embossing techniques, agency/department seals can be embossed on most Taylor seating models. Embossed seals are available in gold or silver foil.

Taylor Chair offers **the industry's first and only guaranteed fast ship program whereby each shipment is guaranteed to ship in 10 days or it's free!**

Because Taylor Chair is one of the very few manufacturers that builds its own seating frames, standard lead times are compressed to 4-8 weeks and custom designs for larger projects are available.

The Aurora Series

Contemporary styling makes the **Aurora Series** ideally suited for executive, management, and conference room applications. Back sizes include low, mid, and high, each available with open, closed, or black plastic composite arms.

The Arlington Series

The elegant styling of the **Arlington Series** blends a classic silhouette with contemporary comfort. Arlington is offered with two distinct upholstery variations: smooth, pull-over upholstery or attached-cushion, as well as several arm variations

The Crescent Series

The design of the **Crescent Series** blends an elegantly shaped maple frame with the soft curves of an upholstered seat and back. The signature wood button punctuates the outside back and is finished to match the wood frame.

The Cleveland Series

Crafted in solid maple, the **Cleveland Series** is competitively priced and functionally scaled with two back variations: open and fully upholstered. **With COM list prices starting at \$540, the Cleveland Series is an exceptional value.**

We know that running a government office can be tough.

So we started a support group.

**Boise Cascade
Office Products**
www.bcop.com

Boise knows how difficult your job can be. As a GSA-approved vendor for more than a decade, Boise can make your office products procurement a lot easier. You can order 24 hours a day, 7 days a week, by phone, fax or internet. We offer one-stop shopping for over 1,900 products, including JWOD, NIB, NISH, MWBE and recycled items. With Boise, you can be sure of GSA pricing, on-time delivery and procurement compliance. In addition, you can cut costs with our SAVESM program. And pay with our convenient SmartPay card. For more details, just call 888-505-FEDS. We'll support you all the way.
