

## PROPERTY MANAGEMENT

GSA's Federal Supply Service, Property Management Program, announces a new program to assist Federal agencies in the disposal of excess personal property. State Managed Personal Property Centers are now open for business in Alaska, Arizona, California, Georgia, Oregon, and Washington as a joint service offered by GSA and the State Agencies for Surplus Property in the respective states. These State Managed Property Centers provide storage of excess/surplus personal property during the disposal process, a service long requested by our Federal customers.

The only cost to the Federal agency is for transportation of the property to the centers. The State Managed Property Center will serve as custodian during the disposal process and ensure screening as required in the Federal Property Management Regulations. After Federal and state screening, property not transferred will be offered for sale to the general public from the center location. Exchange/sale and reimbursable property will be accepted and fees negotiated on a case-by-case basis. Accountability of the property remains with the Federal agency until final disposal. It should be noted, scrap and hazardous property will not be accepted.

Property Management is negotiating to open more State Managed Property Centers. Please contact your Regional Property Management office for additional information <http://www.fss.gsa.gov/property>.

For further information on the new State Managed Property Centers, contact the appropriate persons listed with each location:
