NEW RESIDENTIAL CONSTRUCTION IN JUNE 2008

The U.S. Census Bureau and the Department of Housing and Urban Development jointly announced the following new residential construction statistics for June 2008:

BUILDING PERMITS

Privately-owned housing units authorized by building permits in June were at a seasonally adjusted annual rate of 1,091,000. This is 11.6 percent ($\pm 1.2\%$) above the revised May rate of 978,000, but is 23.9 percent ($\pm 1.3\%$) below the revised June 2007 estimate of 1,433,000.

Single-family authorizations in June were at a rate of 613,000; this is 3.5 percent ($\pm 1.4\%$) below the May figure of 635,000. Authorizations of units in buildings with five units or more were at a rate of 446,000 in June.

HOUSING STARTS

Privately-owned housing starts in June were at a seasonally adjusted annual rate of 1,066,000. This is 9.1 percent ($\pm 10.3\%$)* above the revised May estimate of 977,000, but is 26.9 percent ($\pm 5.9\%$) below the revised June 2007 rate of 1,458,000.

Single-family housing starts in June were at a rate of 647,000; this is 5.3 percent ($\pm 9.6\%$)* below the May figure of 683,000. The June rate for units in buildings with five units or more was 400,000.

HOUSING COMPLETIONS

Privately-owned housing completions in June were at a seasonally adjusted annual rate of 1,167,000. This is 1.2 percent ($\pm 11.9\%$)* above the revised May estimate of 1,153,000, but is 21.7 percent ($\pm 8.0\%$) below the revised June 2007 rate of 1,491,000.

Single-family housing completions in June were at a rate of 859,000; this is 2.9 percent ($\pm 10.9\%$)* below the May figure of 885,000. The June rate for units in buildings with five units or more was 289,000.

New Residential Construction data for July 2008 will be released on Tuesday, August 19, 2008, at 8:30 A.M. EDT.

EXPLANATORY NOTES

In interpreting changes in the statistics in this release, note that month-to-month changes in seasonally adjusted statistics often show movements which may be irregular. It may take 3 months to establish an underlying trend for building permit authorizations, 4 months for total starts, and 5 months for total completions. The statistics in this release are estimated from sample surveys and are subject to sampling variability as well as nonsampling error including bias and variance from response, nonreporting, and undercoverage. Estimated relative standard errors of the most recent data are shown in the tables. Whenever a statement such as "2.5 percent ($\pm 3.2\%$) above" appears in the text, this indicates the range (-0.7 to +5.7 percent) in which the actual percent change is likely to have occurred. All ranges given for percent changes are 90-percent confidence intervals and account only for sampling variability. If a range does not contain zero, the change is statistically significant. If it does contain zero, the change is not statistically significant; that is, it is uncertain whether there was an increase or decrease. The same policies apply to the confidence intervals for percent changes shown in the tables. On average, the preliminary seasonally adjusted estimates of total building permits, housing starts and housing completions are revised about one percent. Explanations of confidence intervals and sampling variability can be found on our web site listed above.

Building permits and housing starts for June showed large increases of 11.6% and 9.1%, respectively. Northeast multifamily activity showed the largest gains. New York City enacted a new set of construction codes effective for permits authorized as of July 1, 2008. In June, there was a large increase in building permits issued for multifamily residential buildings in New York City. Excluding the Northeast multifamily data, there was a 0.7% increase in permit authorizations and a 4.0% decrease in housing starts in June 2008. More details are available on our website.

* 90% confidence interval includes zero. The Census Bureau does not have sufficient statistical evidence to conclude that the actual change is different from zero.
