Users of these cylinders should be advised that serious personal injury, death or property damage could result from the rupture of a cylinder.

Accordingly, all persons owning, using or having access to the cylinders subject to the recall should immediately take the following precautions:

1. If a cylinder has been filled, its entire contents should be vented in order to relieve internal pressure.

2. The vented cylinders should be segregated from all other cylinders by being placed in a secure place and marked conspicuously with a tag bearing the notation "Do Not Use" or similar warning.

3. Under no circumstances should any of the cylinders in question be sold or otherwise transferred, filled, refilled or used for any purpose.

Once the above procedures have been implemented, all cylinders bearing the serial numbers indicated should be returned for replacement to the company or distributor from whom they were purchased.

(49 U.S.C. 1804(c), 1805(n) and 1808(d)(3))

Issued in Washington, D.C. on July 12, 1985, under authority delegated in 49 CFR Part 106, Appendix A.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.
