

CR Number: 4764

**External
Reference:**

Category: CVISN - National ITS Architecture

Component: CVISN Architecture and Standards

Synopsis: Eliminate distinction between wireline and wireless lines on CVISN Architecture Flow Diagram

Status: Open

Disposition: [2006-09-22] Open for 30-day comment period.

Description: Different line types are used on the CVISN Architecture Flow Diagram to indicate Wireline (Fixed Point Communications), DSRC, Wide Area Wireless, and Other Transactions. The distinction between wireline and wireless communications is no longer of value for CVO applications.

Fix: Use a single line type for both wireless and wireline communications.

[2006-09-22] Presented at the 9/21/06 ACCB meeting.

Attendees recommended that this be approved. The CR will be posted to the CVISN System Architects' listserv for an additional 30-day comment period.

IMPACT SUMMARY:

ACCB Items:

1. CVISN Architecture Flow Diagram
2. CVISN Architecture Document (contains diagram)

Fix:
