M311J — OILSEEDS, BEANS, AND NUTS (PRIMARY PROCESSORS) (MONTHLY REPORT)

DEFINITIONS AND SPECIAL INSTRUCTIONS

1. Scope of survey

This survey covers all establishments crushing or solvent processing vegetable oil bearing materials {oilseeds, beans, nuts, etc.}, including establishments using a continuous process that immediately refines the oil.

2. Figures to be reported

Companies with more than one establishment manufacturing the products covered by this survey are requested to complete a separate report form for each location. If you have not received a separate report form for each of your establishments, please call the contact shown on the report form or write to the U.S. Census Bureau for additional forms. A separate report form is required for each crude oil mill which your company operates.

a. Materials and oils to be included on this report

Report all quantities of oil bearing materials and crude oils produced, whether for your own account or on a toll basis.

Soybean cake and meal — Report separately the cake and meal that is produced for animal feeds and the cake and meal that is further processed for edible protein products. See item codes 0111 and 0112.

Lecithin — A mixed phosphatide product obtained from the soybean oil in the degumming process should be reported in item code 0114.

Report crushings of sunflower seeds, production of crude oil and cake and meal, and stocks of seeds, crude oil, and cake and meal in item codes 0920 through 0930.

Cottonseed crushers — Report cottonseed received at your establishment, whether it is to be used in crushing or for resale, in item code 0203.

b. Consistency checks

This report form requests only data on receipts of cottonseeds, but not on any other seeds, beans, nuts, or kernels. However, a figure on net receipts of these raw materials can be derived by adding monthly crushings to stocks at the end of the month and subtracting stocks at the beginning of the month. In other words, receipts equal crushings plus the net change in stocks. If

you maintain accurate book records on receipts of seeds, beans, etc., and derive crushings and stocks, please make certain that the net receipts figure obtainable from this report is consistent with actual receipts less shipments, if any, of seeds, beans, etc. carried on your books.

A similar balancing check should be made for shipments of crude oils and byproducts. Your reported beginning stocks plus production reported for the month, less reported month end stocks should equal shipments less consumption, if any.

If your company also refines or further processes crude vegetable oils, produces animal fats and oils, or consumes animal or vegetable oils, a report form should also be filed for each such location on Form M311N, "Monthly Report of Producers and Consumers, Animal and Vegetable Fats and Oils." If you are not filing a Form M311N for such locations, please notify us and we will send you the necessary report forms.

3. Definitions

The product detail for this survey, as shown in the Reference List, is defined according to standard nomenclature for this industry.

Continuous processor — If your company produces a once refined grade of oil from the crushing operation, report beans or seeds crushed, crude oil and cake and meal production. You must also report consumption of crude oil and production of refined oil on Form M311N, "Monthly Report of Producers and Consumers, Animal and Vegetable Fats and Oils."

Stocks — Stocks to be reported on this report form are for those stocks on hand at the processing location. If your company has stocks at a public or private warehouse not located at the processing location, a report should also be filed for each location on Form M311H, "Animal and Vegetable Fats and Oils (Warehouse Stocks)." If you are not filing a Form M311H for such locations, please notify us and we will send you the necessary report forms.
