

CORPS OF ENGINEERS—CIVIL WORKS

CORPS OF ENGINEERS—CIVIL

The following appropriations shall be expended under the direction of the Secretary of the Army and the supervision of the Chief of Engineers for authorized civil functions of the Department of the Army pertaining to rivers and harbors, flood and storm damage reduction, [shore protection,] aquatic ecosystem restoration, and related [purposes] efforts. (Energy and Water Development and Related Agencies Appropriations Act, 2008.)

---------------------	-------	-------	-------

This appropriation funds the construction, replacement, and expansion of water resources projects whose principal purpose is to provide commercial navigation, flood and storm damage reduction, or aquatic ecosystem restoration benefits to the Nation, and related activities. The Budget shows all activity financed through the Inland Waterways Trust Fund as occurring within the Construction account.

This account allocates funds based on performance-based guidelines, which improve the overall performance of the construction program by redirecting funds to high-performing projects and limiting new construction starts.

1. *Project rankings.*—All ongoing specifically authorized construction projects, including projects funded in the Mississippi River and Tributaries account, will be assigned based upon their primary purpose to one of the main mission areas of the Corps (flood and storm damage reduction, commercial navigation, and aquatic ecosystem restoration) or to hydropower. Flood and storm damage reduction, commercial navigation, and hydropower projects will be ranked by their total benefits divided by their total costs (BCR), calculated at a seven percent real discount rate. Aquatic ecosystem restoration projects will be ranked by the extent to which they cost-effectively contribute to the restoration of a nationally or regionally significant aquatic ecosystem that has become degraded as a result of a civil works project, or to a restoration effort for which the Corps is otherwise uniquely well-suited (e.g., because the solution requires complex alterations to the hydrology and hydraulics of a river system).

2. *Projects funded on the basis of their economic and environmental returns.*—Ongoing flood and storm damage reduction, commercial navigation, and hydropower construction projects with a BCR of 1.5 or higher and ongoing aquatic ecosystem restoration construction projects that are cost-effective in contributing to the restoration of a nationally or regionally significant aquatic ecosystem that has become degraded as a result of a civil works project or to a restoration effort for which the Corps is otherwise uniquely well-suited will receive at least the amount needed to pay estimated contractor earnings required under ongoing contracts and related costs. In allocating funds among these projects, priority will be given to the projects with the highest economic and environmental returns and to projects where the Corps can complete physical construction of the project and/or related administrative activities in the budget year.

3. *Projects funded to address significant risk to human safety.*—Flood and storm damage reduction projects that are funded to address significant risk to human safety will receive sufficient funding to support an uninterrupted effort during the budget year.

4. *Projects with low economic and environmental returns.*—Ongoing flood and storm damage reduction, commercial navigation, and hydropower construction projects with a BCR below 1.5 will be considered for deferral, except for flood and storm damage reduction projects that are funded to address significant risk to human safety. Likewise, ongoing aquatic ecosystem restoration construction projects that do not cost-effectively contribute to the restoration of a nationally or regionally significant aquatic ecosystem that has become degraded as a result of a civil works project, and do not cost-effectively address a problem for which the Corps is otherwise uniquely well-suited, will be considered for deferral.

5. *New starts and resumptions.*—The budget could include funds to start up new construction projects, or to resume work on ongoing construction projects on which the Corps has not performed any physical work under a construction contract during the past three consecutive fiscal years, only if the project would be ranked that year in the top 20 percent of the ongoing construction projects in the budget in its mis-

sion area. The term “physical work under a construction contract” does not include activities related to project planning, engineering and design, relocation, or the acquisition of lands, easements, or rights-of-way. For non-structural flood damage reduction projects, construction begins in the first fiscal year in which the Corps acquires lands, easements, or rights-of-way primarily to relocate structures, or performs physical work under a construction contract for non-structural project-related measures. For aquatic ecosystem restoration projects, construction begins in the first fiscal year in which the Corps acquires lands, easements, or rights-of-way primarily to facilitate the restoration of degraded aquatic ecosystems including wetlands, riparian areas, and adjacent floodplains, or performs physical work under a construction contract to modify existing project facilities primarily to restore the aquatic ecosystem. For all other projects, construction begins in the first fiscal year in which the Corps performs physical work under a construction contract.

6. *Other cases.*—Projects will receive the amount needed to ensure that they comply with treaties and with biological opinions pursuant to the Endangered Species Act, and meet authorized mitigation requirements.

Dam safety assurance, seepage control, and static instability correction projects that are funded in the construction account will receive the maximum level of funding that the Corps can efficiently and effectively spend each year.

The Administration proposes that the Executive Branch and the Congress apply these guidelines to the Corps construction account and to the construction activities in the Mississippi River and Tributaries account.

This account includes \$92 million for work under the Comprehensive Everglades Restoration Plan (CERP), which represents 7 percent of the total amount in this account and 2 percent of the total amount in the civil works program excluding the emergency funds. Funding CERP at this level would not have a significant impact on the overall civil works program in 2009. Future levels of construction account funding for CERP will depend on the availability of funds, and the impact of such future funding on the overall civil works program cannot be determined at this time. Funding for the Department of the Interior (DOI) includes an additional \$9 million for work under CERP.

Also included in this account is \$93 million for other work related to the ongoing effort to restore the Everglades/South Florida ecosystem. Funding for DOI includes \$61 million for such non-CERP work.

The 2009 Budget for the two agencies includes a total of \$255 million for Everglades/South Florida ecosystem restoration work, of which \$101 million is for CERP and \$154 million is for non-CERP work.

This appropriation also funds continuing authorities programs (the planning, design, and construction of projects that do not require specific legislation). The 2009 Budget includes funding in this account for flood control (Section 205), emergency streambank and shoreline protection (Section 14), navigation (Section 107), aquatic ecosystem restoration (Section 206), and project modifications for improvement of the environment (Section 1135).

Public Law 109–148, the 3rd emergency supplemental appropriations act of 2006, Public Law 109–234, the 4th emergency supplemental appropriations act of 2006, and Public Law 110–28, the emergency supplemental appropriations act of 2007, provided funds to repair and restore hurricane damaged projects, to accelerate completion of New Orleans area flood and storm damage reduction projects, and to provide 100-year storm protection for the greater New Orleans area. The scope and magnitude of the required work has increased with time, resulting in an upward revision of project costs. \$5,761,000,000 in additional construction funds, designated as emergency funding, combined with the State’s contribution

CONSTRUCTION—Continued

[(INCLUDING RESCISSIONS OF FUNDS)]—Continued

of non-Federal cost-share, would provide 100-year storm protection to greater New Orleans in 2011, improved internal drainage for specific portions of New Orleans, and for completion of repair and restoration and accelerated work to authorized levels of protection in surrounding areas. The request includes, at full Federal expense the following estimated amounts: \$133 million to complete repairing and restoring authorized protection and floodwalls on the Lake Pontchartrain and Vicinity (LPV) project; \$171 million to complete authorized protection on the LPV and West Bank and Vicinity (WBV) projects; \$260 million to complete repairing and restoring authorized protection and floodwalls on the New Orleans to Venice (NOV) Project; \$188 million to complete authorized protection on the NOV project; \$456 million to complete work to incorporate non-Federal levees in Plaquemines Parish into the Federal system; \$704 million for pumps and closures at outfall canals; \$53 million to improve protection at the Inner Harbor Navigation Canal; \$459 million for armoring levees and floodwalls; \$412 million to reinforce and replace floodwalls on the LPV and WBV projects; and \$90 million to storm-proof pump stations. The request also includes estimated costs of \$1,077 million to provide 100-year storm protection for the LPV project; \$920 million to provide 100-year storm protection for the WBV project; and \$838 million for the Southeast Louisiana Urban Drainage project (SELA). This work on SELA and to increase storm protection to 100 years for the LPV and WBV projects would be cost-shared 65 percent Federal / 35 percent non-Federal. The Secretary may, under existing law, permit a delay in the initial payment, without interest, of any non-Federal contribution of funds associated with each measure for up to one year after the date when construction is begun on such measure.

Outlays	1,310	1,469	1,561

This appropriation funds operation, maintenance, and related activities at the water resources projects that the Corps operates and maintains. Work to be accomplished consists of dredging, repair, and operation of structures and other facilities, as authorized in the various River and Harbor, Flood Control, and Water Resources Development Acts. Related activities include aquatic plant control, monitoring of completed projects where appropriate, removal of sunken vessels, and the collection of domestic waterborne commerce statistics. The Budget shows all activity financed through the Harbor Maintenance Trust Fund and the Inland Waterways Trust Fund as occurring within and transferred to the Operation and Maintenance account. To improve accountability and oversight, reflect the full cost of operating and maintaining existing projects, and support an integrated investment strategy, the Budget funds the following activities in the operation and maintenance account: the rehabilitation of infrastructure, where the extent of the work is not large enough to be considered a replacement; Endangered Species Act compliance, where the Corps is implementing a reasonable and prudent alternative set forth in a biological opinion in order to be able to continue operating an existing project without jeopardizing the existence of federally listed species; the construction of facilities, projects or features (including islands and wetlands) to use materials dredged during Federal navigation operation and maintenance activities; and the mitigation of impacts on shorelines resulting from Federal navigation operation and maintenance activities.

This appropriation funds all of the costs associated with protecting Corps facilities from potential security threats. It also funds the national emergency preparedness program under Executive Order 11490.

This account does not provide any funding for the operation and maintenance of CERP in 2009; therefore, funding CERP at this level would not have a significant impact on the overall Corps civil works program. No CERP projects have been completed, and the work scheduled for CERP over the next couple of years will not involve the operation and maintenance of projects. Future levels of funding for operation and maintenance will depend on the pace of project construction and availability of funds. The impact of such future funding on the overall Corps civil works program cannot be determined at this time.

The Administration re-proposes a Corps recreation facility modernization initiative based on a model now employed by other Federal recreation providers including the National Park Service and the Forest Service. The Corps would finance a portion of the cost of maintaining and upgrading recreation facilities through the retention of user fees. Under the Operation and Maintenance and Mississippi River and Tributaries accounts, the Budget provides a total of \$274 million for recreation activities in 2009.

Net budget authority and outlays:				
89.00	Budget authority	171	167	91
90.00	Outlays	144	179	122

This appropriation funds studies to determine the need, engineering feasibility, and economic and environmental return to the Nation, of potential solutions to water and related land resource problems; and funds preconstruction engineering and design, data collection, interagency coordination, and research. Since the Corps civil works program already has a large backlog of ongoing construction work, the Budget limits its funding for the study and design of additional projects and focuses resources on the projects with the best prospects for providing a high net economic or environmental return to the Nation.

This appropriation provides funds to administer the laws pertaining to the regulation of activities affecting U.S. waters including wetlands, in accordance with the Rivers and Harbors Appropriation Act of 1899, the Clean Water Act of 1972, and the Marine Protection, Research and Sanctuaries Act of 1972.

The requested funds are needed to review and process permit applications, ensure compliance on permitted sites, protect important aquatic resources, and support watershed planning efforts in sensitive environmental areas in cooperation with States and local communities.

The Expenses appropriation funds the command and control, policy and guidance, program management, national and regional coordination, and quality assurance for the civil works program. These activities are carried out by the headquarters, eight divisions and six supporting field offices of the Corps of Engineers. The Expenses program provides administration of the following Corps offices and facilities:

Headquarters (HQ).— This office provides executive direction and management for the civil works program.

Offices of the Division of Engineers.— These eight division offices supervise work in 38 district offices.

Humphreys Engineer Center Support Activity (HECSA).— This support center provides administrative services, such as personnel, logistics, information management and finances and accounting for the Office of the Chief of Engineers and other separate field operating activities.

Institute for Water Resources (IWR).— This institute performs studies and analyses and develops planning techniques for the management, development and restoration of water resources.

Engineering Research and Development Center (ERDC).— This center manages all research and development for the civil works program.

The Washington Aqueduct supplies drinking water to customers in three jurisdictions: the District of Columbia; Arlington County, Virginia; and the city of Falls Church, Virginia. Although the Aqueduct is owned and operated by the Corps, the customers finance the operation, maintenance, and capital improvement of Aqueduct facilities. Under current law, the Aqueduct's customers are required to pay the full cost of making capital improvements at the Aqueduct in advance.

This account covers the following three permanent appropriations:

Hydraulic mining debris reservoir.—The Corps uses fees collected from Pacific Gas and Electric Company to help maintain the Englebright Dam, Yuba River, California, mine debris restraining works and associated hydropower generation facilities. (33 U.S.C. 683)

Maintenance and operation of dams and other improvements of navigable waters.—The Corps uses its share of certain fees levied by the Federal Energy Regulatory Commission (on the private use of Federal property, including facilities and land; private construction and operation of water management and appurtenant facilities; and private benefit from headwater improvement by others) for construction, operation, and maintenance of Federal water management facilities. (16 U.S.C. 810(a))

Payments to States.—In lieu of taxes, the Corps pays to States three-fourths of the rent received from the lease of Federal lands acquired for flood control, navigation, and allied purposes. (33 U.S.C. 701c-3)

This revolving fund provides for the acquisition, operation, and maintenance of plant and equipment used by the civil works program and for temporary financing of services chargeable to the civil works program. The fund also initially finances district operating expenses which the districts later reimburse with project-specific funds. In addition, payments are made into the fund when other agencies or entities use plant and equipment acquired by the fund.

The Harbor Maintenance Trust Fund is authorized under the Harbor Maintenance Revenue Act of 1986 (P.L. 99-662, Title XIV), as amended. Revenue is derived from receipts from a 0.125 percent ad valorem tax imposed upon commercial users of specified U.S. ports, Saint Lawrence Seaway tolls, and investment interest. The Budget shows all activity related to the Harbor Maintenance Trust Fund as occurring within the Operation and Maintenance account.

The Harbor Maintenance Revenue Act authorized expenditures from this fund to finance up to 100 percent of Corps harbor operation and maintenance costs, including the operation and maintenance of Great Lakes navigation projects. The fund fully finances the operation and maintenance of the Saint Lawrence Seaway Development Corporation. Section 201 of Public Law 104-303 authorized the fund to pay the Federal share of the costs for the construction of dredged material disposal facilities that are necessary for the operation and maintenance of coastal or inland harbors, the dredging and disposal of contaminated sediments that are in or affect the operation and maintenance of Federal navigation channels, the mitigation of impacts resulting from Federal navigation operation and maintenance activities, and the operation and maintenance of dredged material disposal facilities for which fees have been collected and deposited in the fund.

HARBOR MAINTENANCE TRUST FUND—Continued

The North American Free Trade Agreement Implementation Act (P.L. 103–182, section 683) authorized payment from the fund of administrative expenses incurred by the Department of the Treasury, the Corps, and the Department of Commerce related to administration of the harbor maintenance tax, but not to exceed \$5 million in any fiscal year.

A 1995 United States Court of International Trade decision, *United States Shoe Corp. v. United States* (Case No. 94–11–00668), found the harbor maintenance tax unconstitutional under the export clause of the Constitution (Article I, section 9, clause 5), and enjoined the Customs Service from collecting the tax on exports. The Supreme Court affirmed that decision on March 31, 1998.

The Inland Waterways Trust Fund is authorized under the Inland Waterways Revenue Act of 1978 (P.L. 95–502), as amended by the Water Resources Development Act of 1986 (P.L. 99–662).

Revenue currently is derived from taxes imposed on fuel for commercial vessels engaged in inland waterways transportation, plus investment interest. The Administration has proposed creation of an alternative funding source to the fuel tax. It would consist of a fee imposed on commercial barges using locks operated by the United States Army Corps of Engineers. The fee would be phased in beginning October 1, 2008, with increases each year through December 31, 2012. Automatic adjustments to the fee would be made annually beginning in 2013, based on the total net assets in the Trust Fund.

The Budget shows all activity related to the Inland Waterways Trust Fund as occurring within the Construction, Operation and Maintenance, and Mississippi River and Tributaries accounts.

The fund is used to pay one half of the costs associated with the construction, replacement, expansion, and rehabilitation of Federal inland waterways projects.

Funds are contributed by non-Federal interests for use on improvements of rivers and harbors. This includes cost-sharing contributions for the study, design, construction, and operation and maintenance of authorized Federal projects, as well as contributions of 100 percent of the costs of certain other work.

The Coastal Wetlands Planning, Protection and Restoration Act (P.L. 101-646, Title III, as amended) directs the Secretary of the Interior to distribute to the Coastal Wetlands Restoration Trust Fund a portion of the amounts appropriated each fiscal year from the Sport Fish Restoration Account. The Louisiana Coastal Wetlands Conservation and Restoration Task Force, an interagency task force (consisting of the Corps, Environmental Protection Agency, Fish and Wildlife Service, Natural Resources Conservation Service, National Marine Fisheries Service, and the State of Louisiana) uses these funds to plan, set priorities, and carry out projects for the creation, protection, and restoration of coastal wetlands in the State of Louisiana.

This fund, authorized in the Water Resources Development Act of 1999 (P.L. 106-53), supports wildlife habitat restoration efforts undertaken by the State of South Dakota. The establishment of this fund satisfies the Federal obligation under the Fish and Wildlife Coordination Act (16 U.S.C. 1661 et seq.) to mitigate for the loss of habitat due to flooding from the Oahe and Big Bend projects, which the Corps constructed under the Pick-Sloan Missouri River Basin program.

ADMINISTRATIVE PROVISION

[Appropriations in this title shall be available for official reception and representation expenses (not to exceed \$5,000); and during the current fiscal year the] *The Revolving Fund, Corps of Engineers, shall be available during the current fiscal year for purchase (not to exceed 100 for replacement only) and hire of passenger motor vehicles for the civil works program. (Energy and Water Development and Related Agencies Appropriations Act, 2008.)*

96-322000 All Other General Fund Proprietary Receipts Including Budget Clearing Accounts	43	31	31
General Fund Offsetting receipts from the public	61	52	52
Intragovernmental payments:			
96-388500 Undistributed Intragovernmental Payments and Receivables from Cancelled Accounts		12	12
General Fund Intragovernmental payments		12	12

ALLOCATIONS RECEIVED FROM OTHER ACCOUNTS

Note.—Obligations incurred under allocations from other accounts are shown in the schedules of the parent appropriation as follows:
State and Private Forestry, Forest Service, Department of Agriculture.
Construction, National Park Service, Department of the Interior.
Federal Aid to Highways, Miscellaneous Studies, Reports, and Projects; Federal Highway Administration, Department of Transportation.

Bonneville Power Administration Fund (Power Marketing Administration), Department of Energy.

GENERAL PROVISIONS

CORPS OF ENGINEERS—CIVIL

SEC. 101. (a) None of the funds provided in *this* title [I of this Act, or provided by previous appropriations Acts to the agencies or entities funded in title I of this Act that remain available for obligation or expenditure in fiscal year 2008], shall be available for obligation or expenditure through a reprogramming of funds that:

- (1) creates or initiates a new program, project, or activity;
- (2) eliminates a program, project, or activity;

(3) increases funds or personnel for any program, project, or activity for which funds have been denied [or restricted] by this Act, unless prior [approval] notice is [received from] transmitted to the House and Senate Committees on Appropriations;

(4) [proposes to use] uses funds directed for a specific program, project, or activity by [either the House or the Senate Committees on Appropriations] *this* Act for a different purpose, unless prior [approval] notice is [received from] transmitted to the House and Senate Committees on Appropriations;

(5) augments or reduces existing programs, projects, or activities in excess of the amounts contained in subsections 6 through 10, unless prior [approval] notice is [received from] transmitted to the House and Senate Committees on Appropriations;

(6) INVESTIGATIONS.—For a base level [over] of \$100,000, reprogramming of 25 percent of the base amount up to a limit of \$150,000 per project[, study] or activity is allowed: *Provided*, That for a base level less than \$100,000, the reprogramming limit is \$25,000; *Provided further*, That up to \$25,000 may be reprogrammed [into any continuing study] for ongoing contracts and concomitant administrative expenses on any project or activity that did not receive an appropriation [for existing obligations and concomitant administrative expenses];

(7) CONSTRUCTION.—For a base level [over] of \$2,000,000 or more, reprogramming of 15 percent of the base amount up to a limit of \$3,000,000 per project[, study] or activity is allowed: *Provided*, That for a base level less than \$2,000,000, the reprogramming limit is \$300,000: *Provided further*, That up to \$3,000,000 may be reprogrammed [for settled] per project to settle contractor claims, address changed conditions, or satisfy real estate deficiency judgments; *Provided further*, That up to \$300,000 may be reprogrammed [into any continuing study] for ongoing contract and concomitant administrative expenses on any project or activity that did not receive an appropriation [for existing obligations and concomitant administrative expenses];

(8) OPERATION AND MAINTENANCE. [—Unlimited reprogramming authority is granted in order for the Corps to be able to respond to emergencies: *Provided*, That the Chief of Engineers must notify the House and Senate Committees on Appropriations of these emergency actions as soon thereafter as practicable: *Provided further*, That for] For a base level [over] of \$1,000,000, reprogramming of 15 percent of the base amount up to a limit of \$5,000,000 per project[, study] or activity is allowed: *Provided further*, That for a base level less than \$1,000,000, the reprogramming limit is \$150,000: *Provided further*, That \$150,000 may be reprogrammed into any [continuing study or activity] ongoing work on a project that did not receive an appropriation: *Provided further*, That unlimited reprogramming authority is granted to respond to a flood, hurricane, or other natural disaster or to address any imminent risk to the public health and safety from a civil works project owned or operated by the Corps;

(9) MISSISSIPPI RIVER AND TRIBUTARIES.—The same reprogramming guidelines [for] listed in subsections 6 through 8 above apply to the Investigations, Construction, and Operation and Maintenance portions of the Mississippi River and Tributaries Account [as listed above]; and

(10) FORMERLY UTILIZED SITES REMEDIAL ACTION PROGRAM.—Reprogramming of up to 15 percent of the base of the receiving project is permitted.

(b) CONTINUING AUTHORITIES PROGRAM.—Subsection (a)(1) shall not apply to any project or activity funded under the continuing authorities program.

[(c) Not later than 60 days after the date of enactment of this Act, the Corps of the Engineers shall submit a report to the House and Senate Committees on Appropriations to establish the baseline

for application of reprogramming and transfer authorities for the current fiscal year: *Provided*, That the report shall include:

(1) A table for each appropriation with a separate column to display the President's budget request, adjustments made by Congress, adjustments due to enacted rescissions, if appropriate, and the fiscal year enacted level;

(2) A delineation in the table for each appropriation both by object class and program, project and activity as detailed in the budget appendix for the respective appropriations; and

(3) An identification of items of special congressional interest: *Provided further*, That the amount appropriated for salaries and expenses of the Corps of Engineers shall be reduced by \$100,000 per day for each day after the required date that the report has not been submitted to the Congress.]

SEC. 102. None of the funds made available in this title may be used to award or modify any [continuing] contract [or make modifications to any existing continuing contract that commits] to commit an amount [for a project] in excess of the amounts appropriated for that project that remain unobligated, except that such amounts may include any funds that have been made available through reprogramming to that project pursuant to section 101 of this Act.

SEC. 103. [None of the funds in this Act, or previous Acts, making funds available for Energy and Water Development, shall be used to implement any pending or future competitive sourcing actions under OMB Circular A-76 or High Performing Organizations for the U.S. Army Corps of Engineers.]

(a) *Effective October 1, 2008, section 10 of the Rivers and Harbors Appropriation Act of 1922, ch. 427; section 206 of Public Law 106-53; and section 107 of Public Law 108-137 are repealed.*

(b) *Effective October 1, 2008, section 2306c of title 10, U.S.C., is amended by —*

(1) striking “Subject” in subsection (a) and inserting “Except as provided in subsection (i) and subject”;

(2) inserting the following new subsection (b)(6):

“(6) Services associated with the civil works program of the Army Corps of Engineers.”;

(3) inserting in subsections (d)(1), (d)(3), (d)(4), and (d)(5) “or civil works program” after “congressional”;

(4) inserting in subsection (d)(2) “(or, in the case of the civil works program of the Army Corps of Engineers, \$100,000,000)” after “\$500,000,000”;

(5) inserting in subsection (d)(4) “(or, in the case of the civil works program of the Army Corps of Engineers, \$20,000,000)” after “\$100,000,000”; and

(6) inserting the following new subsection (i):

“(i) Army Corps of Engineers Civil Works Program. —

(1) The Secretary of the Army shall take all necessary steps to ensure that the Army Corps of Engineers civil works program:

(A) limits the duration of each multiyear contract to the term needed to achieve a substantial reduction of costs on the margin; and

(B) limits the amount of work performed each fiscal year on each project to the funds that are available for that project during that year.

(2) A multiyear contract made in connection with the civil works program of the Army Corps of Engineers —

(A) shall not be subject to subsections (a)(2) and (c)(3) of this section; and

(B) notwithstanding the time period referenced in subsections (a) and (f) of this section, may cover a period of more than five years if the Secretary of the Army determines that such a longer period is necessary to comply with the terms of subsection (i)(1)(A) of this section with regard to a specific contract, and notifies the Committee on Environment and Public Works and the Committee on Appropriations of the Senate, and the Committee on Transportation and Infrastructure and the Committee on Appropriations of the House of Representatives in writing, with the rationale for that determination and the length of the contract term, at least 30 days in advance of the award of the proposed contract.”

[SEC. 104. None of the funds appropriated in this or any other Act shall be used to demonstrate or implement any plans divesting or transferring any Civil Works missions, functions, or responsibilities of the United States Army Corps of Engineers to other government agencies without specific direction in a subsequent Act of Congress.]

[SEC. 105. Within 90 days of the date of the Chief of Engineers Report on a water resource matter, the Assistant Secretary of the

CORPS OF ENGINEERS—CIVIL—Continued

Army (Civil Works) shall submit the report to the appropriate authorizing and appropriating committees of the Congress.】

【SEC. 106. WATER REALLOCATION, LAKE CUMBERLAND, KENTUCKY (a) IN GENERAL.—Subject to subsection (b), none of the funds made available by this Act may be used to carry out any water reallocation project or component under the Wolf Creek Project, Lake Cumberland, Kentucky, authorized under the Act of June 28, 1938 (52 Stat. 1215, ch. 795) and the Act of July 24, 1946 (60 Stat. 636, ch. 595).

(b) EXISTING REALLOCATIONS.—Subsection (a) shall not apply to any water reallocation for Lake Cumberland, Kentucky, that is carried out subject to an agreement or payment schedule in effect on the date of enactment of this Act.】

【SEC. 107. Using amounts available in the Revolving Fund, the Secretary of the Army is authorized to construct a new Environmental Laboratory and improvements to the Information Technology Laboratory at the Engineer Research and Development Center in Vicksburg, Mississippi: *Provided*, That the Secretary shall ensure that the Revolving Fund is appropriately reimbursed from appropriations of the Corps' benefiting programs by collection each year of amounts sufficient to repay the capitalized cost of such construction and improvements.】

【SEC. 108. Notwithstanding section 729 of the Water Resources Development Act of 1986, as amended (33 U.S.C. 2267a), the Secretary shall credit toward the non-Federal share of the cost of the Rio Grande Basin Watershed Study, New Mexico, Colorado and Texas, the cost of in-kind services contributed by the New Mexico Interstate Stream Commission for the Study up to the full amount of the required non-Federal share, in accordance with the Agreement between the Commission and the Department of the Army dated December 3, 2001, as modified on January 14, 2002.】

【SEC. 109. Section 121 of the Energy and Water Development Appropriations Act, 2006 (Public Law 109-103; 119 Stat. 2256) is amended by striking subsection (a) and inserting the following:

“(a) The Secretary of the Army may carry out and fund planning studies, watershed surveys and assessments, or technical studies at 100 percent Federal expense to accomplish the purposes of the 2003 Biological Opinion described in section 205(b) of the Energy and Water Development Appropriations Act, 2005 (Public Law 108-447; 118 Stat. 2949) as amended by subsection (b) and the collaborative program long-term plan. In carrying out a study, survey, or assessment under this subsection, the Secretary of the Army shall consult with Federal, State, tribal and local governmental entities, as well as entities participating in the Middle Rio Grande Endangered Species Collaborative Program referred to in section 205 of this Act: *Provided*, That the Secretary of the Army may also provide planning and administrative assistance to the Middle Rio Grande Endangered Species Collaborative Program, which shall not be subject to cost sharing requirements with non-Federal interests.”.】

【SEC. 110. The Secretary of the Army, acting through the Chief of Engineers, is directed to convey at no cost, lands to Tate County School District, Tate County, Mississippi, the transfer of any real property interests, not to exceed 50 acres, at Arkabutla Lake deemed available by the Army that is located adjacent to school district property in the vicinity of State Highway 306 west of Coldwater, Mississippi. Such transfer shall be subject to the reservation of any required flowage easements for the operation of Arkabutla Lake and which preclude structures for human habitation. This property shall be used by the Tate County School District for public educational purposes.】

【SEC. 111. Section 594 of the Water Resources Development Act of 1999 is amended by striking “sec. 594. ohio.” and inserting in lieu thereof “sec. 594. ohio and north dakota.” and in (a) strike “Ohio.” and insert in lieu thereof “Ohio and North Dakota.” and in (b) strike “Ohio,” and insert in lieu thereof “Ohio and North Dakota,” and in (h) strike “\$240,000,000.” and insert in lieu thereof “\$240,000,000 for Ohio and \$100,000,000 for North Dakota.”.】

【SEC. 112. The Secretary of the Army, acting through the Chief of Engineers, is directed and authorized to conduct preconstruction engineering and design activities at full Federal expense for the Kahuku Storm Damage Reduction Project, Oahu, Hawaii, which includes interior drainage and related improvements to be constructed on lands that may include Federal land, the cost of the preconstruction, engineering, and design activities shall be included in total project costs to be cost shared at the rate of 65 percent Federal and 35 percent non-Federal, as a part of construction and

the Decision Document contents shall be limited to a design analysis and supporting NEPA documentation for drainage improvements.】

【SEC. 113. Section 227 of Public Law 104-303 is amended in section 5(a) by striking “7” and inserting “12” in lieu thereof.】

【SEC. 114. All budget documents and justification materials for the Corps of Engineers annual budget submission to Congress shall be assembled and presented based on the most recent annual appropriations Act: *Provided*, That new budget proposals for fiscal year 2008 and thereafter, shall not be integrated into the budget justifications submitted to Congress but shall be submitted separately from the budget justifications documents.】

【SEC. 115. The Secretary of the Army acting through the Chief of Engineers is directed to plan, design, and construct a rural health care facility on the Fort Berthold Indian Reservation of the Three Affiliated Tribes, North Dakota, at an estimated Federal cost of \$20,000,000. The Secretary shall transfer this facility to the Secretary of the Interior for operation and maintenance upon the completion of construction.】

【SEC. 116. The last sentence of section 215(a) of the Flood Control Act of 1968 (42 U.S.C. 1962d-5a(a)) is amended by striking “\$5,000,000” and inserting “\$7,000,000”.】

【SEC. 117. JOHNSON CREEK, ARLINGTON, TEXAS

(a) IN GENERAL.—The project for flood damage reduction, environmental restoration and recreation, Johnson Creek, Arlington, Texas, authorized by section 101(b)(14) of the Water Resources Development Act of 1999 (113 Stat. 280-281) is modified to authorize the Secretary to construct the project substantially in accordance with the report entitled Johnson Creek: A Vision of Conservation, dated March 30, 2006, at a total cost of \$80,000,000, with an estimated Federal cost of \$52,000,000 and an estimated non-Federal cost of \$28,000,000 if the Secretary determines that the project is technically sound and environmentally acceptable.

(b) NON-FEDERAL SHARE.—

(1) IN GENERAL.—The non-Federal share of the cost of the project may be provided in cash or in the form of in-kind services or materials.

(2) CREDIT AND REIMBURSEMENT.—The Secretary shall credit toward the non-Federal share of the cost of the project the cost of planning, design, and construction work carried out by the non-Federal interest for implementation of the project, if the Secretary determines that the work is integral to the project. Subject to the availability of funds, the non-Federal interest shall be reimbursed for costs incurred by the non-Federal interest that exceed the non-Federal share of project costs.

(c) CONFORMING AMENDMENT.—Section 134 of the Energy and Water Development Appropriations Act, 2006 (119 Stat. 2264) and section 5143 of the Water Resources Development Act of 2007, (Public Law 110-114) are repealed.】

【SEC. 118. The Secretary is authorized and directed to reimburse local governments for expenses they have incurred in storm-proofing pumping stations, constructing safe houses for operators, and other interim flood control measures in and around the New Orleans metropolitan area, provided the Secretary determines those elements of work and related expenses to be integral to the overall plan to ensure operability of the stations during hurricanes, storms and high water events and the flood control plan for the area.】

【SEC. 119. Section 219(f) of the Water Resources Development Act of 1992 (Public Law 102-580, 106 Stat. 4835 et seq.), as amended, is further amended by striking subsection “(71) Coronado, California”, in its entirety and inserting the following:

“(71)CORONADO, CALIFORNIA

“(A) \$10,000,000 is authorized for wastewater infrastructure, Coronado, California.

“(B) The Federal Share may be in the form of grants or reimbursements of project costs incurred by the non-Federal sponsor for work performed by the non-Federal sponsor before or after the execution of a project cooperation agreement, if the Secretary determines that such work is integral to the project.

“(C) The Secretary is authorized to credit towards the non-Federal share of project costs the costs incurred by the non-Federal sponsor for work performed by the non-Federal sponsor before or after the execution of a project cooperation agreement, if the Secretary determines that such work is integral to the project.”.】

【SEC. 120. NAVAJO RESERVATION, ARIZONA, NEW MEXICO, AND UTAH.—Section 520(b) of the Water Resources Development Act of 1999 (Public Law 106-53; 113 Stat. 345) is amended by inserting

after the second sentence “The local match for the funds appropriated for flood plain delineation on the Navajo reservation in Arizona, New Mexico, and Utah may be provided as in-kind services.”.]

【SEC. 121. The Secretary of the Army may, under such terms and conditions as the Secretary deems appropriate, contract with any public or private entity to provide visitor reservation services. Any such contract in effect on or after October 1, 2004, may provide that the contractor shall be permitted to deduct a commission to be fixed by the Secretary from the amount charged the public for providing such services and to remit the net proceeds therefrom to the contracting agency.】

【SEC. 122. The project for flood control, Redwood River, Marshall, Minnesota, authorized by section 401(a) of the Water Resources Development Act of 1986 and modified by section 4(k) of the Water Resources Development Act of 1988 is further modified to authorize the Secretary to construct the project at a total cost of \$11,863,000, with an estimated first Federal cost of \$8,722,000 and an estimated first non-Federal cost of \$3,141,000.】

【SEC. 123. The project for St. John’s Bayou and New Madrid Floodway in the State of Missouri as authorized by subsection (d) of the matter under the heading “Lower Mississippi River” under section 203 of the Flood Control Act of 1954 (68 Stat. 1258) and section 401(a) of the Water Resources Development Act of 1986 (100 Stat. 4118), and as modified by section 331 of the Water Resources Development Act of 1996 (110 Stat. 3658) as described in the June 2002 Revised Supplemental Impact Statement, as supplemented by the March 2006 Revised Supplemental Environmental Impact Statement 2 for this project is economically justified: *Provided*, That the levee closure and gravity structure at the south end of the New Madrid Floodway portion of the Project are part of the Mississippi River Levee feature of the Mississippi River and Tributaries Project and are not a separable element of that Project.】

【SEC. 124. Funds provided in title V, chapter 3 of Public Law 110–28 under the heading “Construction” may be used for restoration of shore protection projects in New Jersey damaged by the same meteorological events that resulted in Presidential Disaster Declaration FEMA–1694-DR.】

【SEC. 125. The project for flood control, Cedar Hammock (Wares Creek), Florida, authorized by section 101(a)(10) of Public Law 104–303 (110 Stat. 3664), is modified to authorize the Secretary to construct the project at a total cost of \$42,600,000.】

【SEC. 126. Section 156 of Public Law 108–137 is amended by inserting “or reimburse” after “non-Federal share of the cost of the project” in paragraphs (2) and (3).】

【SEC. 127. Notwithstanding any other provision of law, the requirements regarding the use of continuing contracts under the authority of section 206 of the Water Resources Development Act of 1999 (33 U.S.C. 2331) shall apply only to projects funded under the Operation and Maintenance account and the Operation and Maintenance sub-account of the Mississippi River and Tributaries account.】

【SEC. 128. Section 3020 of the Water Resources Development Act of 2007, Public Law 110–114, is amended by inserting “or after” following the word “before”.】

【SEC. 129. Notwithstanding provisions of 42 U.S.C. 2011 et seq. and 42 U.S.C. 7901 et seq. the U.S. Army Corps of Engineers shall have the authority to arrange disposal of waste materials from the Maywood, New Jersey, Formerly Utilized Sites Remedial Action Program (FUSRAP) site at off-site facilities permitted to accept such waste materials under subtitle C of the Resource Conservation and Recovery Act (42 U.S.C. 6921 et seq.). FUSRAP waste materials from the Maywood site may be, but shall not be required to be, disposed at sites licensed under the Atomic Energy Act (42 U.S.C. 2011 et seq.).】

【SEC. 130. AMERICAN AND SACRAMENTO RIVERS, CALIFORNIA Section 101(a)(1)(B) of the Water Resources Development Act of 1996 (Public Law 104–303: 110 Stat. 3662) is modified to read as follows:

“(B) CREDIT TOWARD NON-FEDERAL SHARE.—The non-Federal interest shall receive credit toward the non-Federal share of project costs for expenses that the non-Federal interest incurs for design or construction of any authorized project feature, including credit for work commenced before the date of execution of a cooperation agreement for the affected feature. The amount of the credit shall be determined by the Secretary.”.]

【SEC. 131. WHITE RIVER NAVIGATION TO BATESVILLE, ARKANSAS. The project for navigation, White River Navigation to Batesville, Arkansas, as authorized in Public Law 99–662 is amended to extend the project from mile 255, near Newport, Arkansas, to approximately mile 296, near Batesville, Arkansas; to include a harbor at Batesville,

Arkansas; and environmental restoration within the White River Basin including federally owned lands.】

【SEC. 132. LANDFILLS USED FOR CERTAIN WASTE

(a) IN GENERAL.—The funding prohibition set forth in section 103 of the Energy and Water Development Appropriations Act, 2006 shall not apply to the construction or expansion of any landfill in the Muskingum River watershed if—

(1) the landfill is used solely for the disposal of—

(A) wastes generated from the combustion or gasification of coal,

(B) wastes consisting of byproducts from pollution control technology installed to comply with the Clean Air Act, or

(C) both of such types of wastes.

(2) the landfill is owned by the waste generator or any affiliated person, and

(3) the facility at which the wastes are generated is located in the same watershed as the landfill.

(b) DEFINITIONS.—For purposes of this section:

(1) The term “affiliated person” means any person who, directly or indirectly, owns or controls the waste generator, is owned or controlled by the waste generator, or is under common ownership or control with the waste generator.

(2) The term “Muskingum River watershed” shall mean the area within the watershed of the Muskingum River, as delineated by the Secretary of the Army, acting through the Chief of Engineers.】

【SEC. 133. CONVEYANCE TO STORY COUNTY, IOWA Not later than 180 days after the date of enactment of this Act, the Chief of the Army Corps of Engineers shall convey to Story County, Iowa, without consideration, all rights, title, and interest of the United States in and to a parcel of real property, including any improvements thereon, consisting of approximately 197 acres originally proposed for the Skunk River Reservoir, located between Ames, Iowa, and Story City, Iowa.】

【SEC. 134. None of the funds provided herein may be used to implement any new water control manuals for the Apalachicola-Chattahoochee-Flint and Alabama-Coosa-Tallapoosa river systems: *Provided*, That in updating the water control manuals the Secretary of the Army, acting through the Chief of Engineers is directed to provide the following information by September 30, 2008:

(1) an estimate of the amount of withdrawals from each respective river basin for entities withdrawing one million gallons per day or more over the preceding 60 months;

(2) a flow data set for the respective river basin updated through the most recently completed calendar year; and

(3) an estimated projection of total water usage in the respective basins over the next 25 years.】

【SEC. 135. Title II, chapter 3 of Public Law 109–234 under the heading “Construction” is modified by striking “construction: *Provided*,” and inserting in lieu thereof “: *Provided*, That the Secretary of the Army, in implementing projects and measures in the New Orleans metropolitan area required to achieve certification for participation in the National Flood Insurance Program as directed in Public Law 109–234 shall include all authorized features of the Southeast Louisiana Flood Control project and related internal pumping requirements as integral elements of the comprehensive protection system for the area and shall complete all authorized work for the Southeast Louisiana project concurrently and integrally with other area projects: *Provided further*,”.】

【SEC. 136. Utilizing funds appropriated under Alaska Coastal Erosion or other available funds, the Secretary of the Army, acting through the Chief of Engineers, is directed to prepare a preliminary action plan for any community that requests assistance pursuant to section 117, as contained in title I, division C of Public Law 108–447: *Provided*, That the preliminary action plan pursuant to this authority shall be presented to the Assistant Secretary of the Army (Civil Works) and the Alaska Congressional Delegation not later than 90 days after the initial request from the community: *Provided further*, That the preliminary action plan will recommend the most appropriate course of action (relocation or erosion stabilization), including a preliminary cost estimate and, at a minimum, the first year funding requirements: *Provided further*, That if the Alaska District is unable to comply with this reporting requirement, the District shall provide written notification to the Assistant Secretary of the Army (Civil Works) and the Alaska Congressional Delegation within 30 days of the community assistance request explaining why they are unable to comply.】

SEC. 104. HURRICANE AND STORM DAMAGE RISK REDUCTION PROJECT, NEW ORLEANS, LOUISIANA.

CORPS OF ENGINEERS—CIVIL—Continued

(a) In General, The Secretary of the Army is authorized to implement as a single project, with such modifications as the Secretary determines appropriate, at an additional cost of \$6,294,000,000, with an estimated Federal cost of \$4,767,000,000 and an estimated non-Federal cost of \$1,527,000,000. This project shall consist of:

(i) Completion of repair and restoration and construction, as provided under the heading FLOOD CONTROL AND COASTAL EMERGENCIES in title I, chapter 3 of Division B of Public Law 109-148, for the West Bank and Vicinity project, authorized by section 401(b) of the Water Resources Development Act of 1986, as amended, and the Lake Pontchartrain and Vicinity project, authorized by section 204 of the Flood Control Act of 1965, as amended;

(ii) Completion of levee raises and other enhancements to the West Bank and Vicinity project and Lake Pontchartrain and Vicinity project, initiated pursuant to the authority provided under the heading CONSTRUCTION in title II, chapter 3 of Public Law 109-234, to provide the level of protection necessary to achieve certification required for participation in the National Flood Insurance Program on the date of enactment of this Act;

(iii) Completion of work as described under the heading FLOOD CONTROL AND COASTAL EMERGENCIES in title II, chapter 3, of Public Law 109-234 to —

(aa) Modify the 17th Street, Orleans Avenue, and London Avenue drainage canals and install pumps and closure structures at or near the lake-front;

(bb) Armor critical elements of the New Orleans hurricane and storm damage reduction system;

(cc) Improve protection at the Inner Harbor Navigation Canal; and

(dd) Reinforce or replace flood walls, as necessary, in the existing Lake Pontchartrain and Vicinity and West Bank and Vicinity projects to improve performance; and

(iv) Completion of measures, authorized by section 108 of the Energy and Water Resources Development Appropriations Act, 1996, and section 533 of the Water Resources Development Act of 1996, as amended, as part of the Southeast Louisiana Urban Drainage project, that are within the geographic perimeter of the West Bank and Vicinity and Lake Pontchartrain and Vicinity projects to provide for interior drainage of runoff from rainfall with a ten percent annual exceedance probability.

(b) Cost Sharing and Non-Federal Responsibilities.

(i) The cost of construction of any measure for the project that is described in subsection (a)(ii) or (a)(iv) and undertaken with Federal funding appropriated on or after the date of enactment of this Act shall be shared 65 percent Federal and 35 percent non-Federal.

(ii) The cost of construction of any measure for the project that is described in subsection (a)(i) or (a)(iii) shall be at full Federal expense.

(iii) Prior to the obligation of any Federal funds appropriated for this project on or after the date of enactment of this Act, the non-Federal sponsor shall enter into a binding agreement with the Secretary to —

(aa) Operate and maintain the project authorized by this section, the previously authorized West Bank and Vicinity and Lake Pontchartrain and Vicinity projects, and those measures of the Southeast Louisiana Urban Drainage project that are within the geographic perimeter of the West Bank and Vicinity and Lake Pontchartrain and Vicinity projects as one system (hereinafter referred as “the system”) and to pay 100 percent of the operation, maintenance, repair, replacement, and rehabilitation costs of the system;

(bb) Pay any remaining non-Federal share of the costs of construction of the system; and

(cc) Hold and save the United States free from damages due to the construction or operation and maintenance of the system, except for damages due to the fault or negligence of the United States or its contractors.

(iv) Upon written notification by the District Engineer to the non-Federal sponsor that construction of the project or a functional portion of the project is complete, the non-Federal sponsor shall commence operation and maintenance of the project or functional portion of the project, respectively. Future measures to restore components of the system to the authorized level of protection for reasons such as subsidence, sea level rise, new datum, or state-of-the art engineering will be considered a cost of construction and cost shared in accordance with paragraph (i) of this subsection if the Secretary determines that the measures are economically justified, environmentally acceptable, and technically sound.

(v) The State of Louisiana, or a single state entity established by the State, shall act as the non-Federal sponsor for any non-Federal cooperation required by this section. With the consent of the State or the single state entity, as applicable, other non-Federal public entities may act as additional non-Federal sponsors as long as the State, or single state entity, remains responsible for providing, or ensuring the provision of, any required non-Federal cooperation.

(vi) Funds provided to the State of Louisiana or coastal political subdivisions pursuant to section 384 of the Energy Policy Act of 2005 (43 U.S.C. 1356a) may be used to satisfy, in whole or part, any non-Federal cost share required by this section.

(c) Savings Clause. Nothing in this section affects authority provided in Public Law 109-148, Public Law 109-234, or Public Law 110-28 as it relates to the Corps of Engineers. (Energy and Water Development and Related Agencies Appropriations Act, 2008.)
