

Beltsville Agricultural Research Center (BARC)

Potential Environmental Areas of Concern

Status of Investigations as of June 1, 2005

- Initial site screening completed; further investigation in progress
- Site screening completed; no further action necessary

- Additional Cleanup Needed
- Remedial investigation in progress

Note: Initial site screening has been completed at all sites. Site screening evaluates human health risks for each site individually. A separate ecological risk evaluation is in progress on a facility-wide basis.
