**INSPIRING HIGH PERFORMANCE
 THROUGH APPEALING WORK ENVIRONMENTS**

A well-planned workspace provides an inviting and productive environment in which people enjoy working. In today's mobile workforce, employees no longer maintain a job for 20 years or more. We know that the average American will not only switch jobs more than 15 times in a lifetime, but will actually change careers an average of 7 times. With the labor market as competitive as it is today, results-oriented organizations must look at their work environment to help them attract and retain valuable employees.

Considerations in creating a successful environment start with strategic planning and continue through the selection of the furniture and finishes. Progressive organizations have learned that an effective combination of space, color, furnishings, ergonomics, and interior design can work to create a more productive workplace and happier employees. Components of this process include:

- Strategic Planning
- Space Planning
- Ergonomics
- Aesthetics

Strategic Planning: Before beginning any space plan, it is necessary to understand the strategic elements of the organization's various divisions and how those divisions interact. Facility planners should know the current space occupancy and any projected growth, which could impact

workplace needs. Considering these factors when planning space can avoid future costs when programs change, functional units expand or contract, or organizations reorganize their overall structure.

Space Planning: The efficient use of space is also a key element in creating a successful work environment. General considerations include the overall circulation flow; any necessary areas for privacy or group meetings, unique layout needs, and avoiding overly crowded areas and awkward empty space. Employees often become frustrated with their environment if they run into situations where their workspace is unsuitable for the task at hand.

Ergonomics: Ergonomics consider the interaction between people and the objects they use in their work. Ergonomic programs range from providing basic staff training to complete workspace safety evaluations. Attention to ergonomics demonstrates that the employer cares about the health of its employees. Ergonomic programs have been successful at lowering workers' compensation claims and lowering lost time from work due to injury. They have also proven their value in improving productivity.

Aesthetics: The blend of color and lighting, plus the coordination of fabrics, furniture, and fixtures have the most visible effect on the workspace character. Color and lighting can be combined to create distinct environments and even impact psychological moods. A space can have high quality

**INSPIRING HIGH PERFORMANCE
THROUGH APPEALING WORK ENVIRONMENTS (CONT'D.)**

furniture and fixtures, but if the finishes and styles do not have balance, consistency, and coordination, the space can be disruptive and can impact employee behavior. The visionary leader considers improving not only employee performance but also their quality of work-life. Emphasis on interior design enriches the working environment and pays for itself through increased productivity.

The following suppliers provide Furniture Design and Layout services (SIN 712 4) under the Comprehensive Furniture Management Schedule (71 II K):

Management Engineering Associates	(360) 834-3004
Peck and Peck	(703) 690-4103
JMC Business Systems, Inc.	(703) 921-0622

Please look for articles in future issues of MarkeTips covering the other furniture related services offered under the Comprehensive Furniture Management Schedule. They are as follows:

- | | |
|-------|--|
| 712 1 | Project Management - Comprehensive support of the design, reconfiguration, relocation and right sizing of office space and similar facilities. |
| 712 2 | Assets Management - Services for designing and installing systems to manage office furniture and related inventories; includes warehouse and property disposal management. |
| 712 3 | Reconfiguration/Relocation Management - Services for reorganizing, consolidating, warehousing and/or opening new facilities. |
| 712 5 | Packaged Environments - Complete range of services to supply turnkey integrated office solutions, including procurement of office furniture and related furnishings. |

- | | |
|-------|---|
| 712 6 | Assets Maintenance - Services for restoring, repairing, renovating, reupholstering and cleaning office furniture and equipment. |
|-------|---|

SUPER FISH SCALER

If you hate cleaning fish, after experiencing the fun of catching them, or if you hate to prepare fish for a large group, the "Super Fish Scaler" is the answer to your problems. The "Super Fish Scaler" consists of a 1/8" plastic shield and two sizes of brushes. The 4" stainless steel brush is for larger fish and the polypropylene brush is available for small to medium sized fish. It only takes a few seconds per side to de-scale a fish with the I. Johnson Enterprise's "Super Fish Scaler". The scales are retained within the plastic covering, keeping you and the cleaning area clean. An electric or cordless drill (not provided) may power this product. See the "Super Fish Scaler" in action – a video is available for viewing on the web site: www.superfishscaler.com.

Order on-line through GSA *Advantage!* at www.gsaAdvantage.GOV or order directly from the contractor at:

CLASSIC COOKER GRILLS

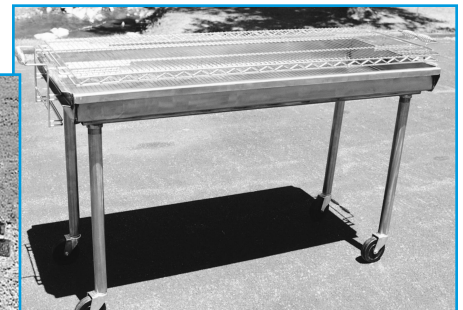

Blue Ridge Mountain Cookery, Inc., proudly presents their Classic Cooker Grill Series, featuring five different super grills. The **Classic Cooker Series 500** is a high quality model that requires minimal maintenance. This grill is constructed entirely of stainless steel, including the legs, which are mounted on easy-rolling casters. The stainless steel grilling surface measures 2x5 feet and allows for easy clean-up and storage. You won't need to worry about rusting or repainting, either. Simply wipe the grill off and store it away for the next use. The **Classic Cooker Series 1000** is a fabulous stainless steel trailer-mounted gas barbecue, with a grill that measures 24" wide and 60" long. It comes complete with a 40-pound propane tank and is mounted with a light package and license plate holder. You will also find it equipped with a Certificate of Origin so you can license it for road travel. The grill is fitted with 3-30,000 BTU burners and domed bread box lids, allowing for full use of the grilling surface, as well as easy cleaning. The Classic Cooker Series 1000 Patio Barbecue features the same attention to detail as the trailer mount, plus heavy-duty casters and a full length collapsible counter top. It is made entirely of stainless steel and comes with a stainless steel tank carriage and a 40-pound propane tank. The **Classic Cooker Series 3000**, is truly a kitchen-on-the-go. Measuring approximately 13.5' long and 7.5' wide, it features 3-30,000 BTU burners per insert. It offers approximately 20 square feet of cooking space and is constructed of stainless steel. It has two grilling surfaces, comes complete with two 40-pound propane tanks and is mounted with a light package and license plate holder. The Classic Cooker Series 3000 features two domed bread box lids, allowing for full use of the grilling surface, as well as easy cleaning. You will also find a 35 gallon water tank and a large 24" x 60" insulated stainless tub with a lid, perfect for storing hot or cold items. The **Classic Cooker Series 4000** is the cream of the crop in the Blue Ridge Mountain Cookery line of grills. It features stainless steel construction and offers two sides for grilling, complete with four separate cooking areas measuring 24" x 60," for a total of 40 square feet of grilling space. The Series 4000 comes complete with two 40-pound propane tanks, a 35-gallon water tank, collapsible stainless steel counters on each side, and 12 oval burners with 30,000 BTUs each.

Law Enforcement and Security Equipment**

T H E R M A L I M A G E C A M E R A S

After several years of development, Raytheon Corporation has introduced two new sensors for use in camera systems made by the independent manufacturers of Raytheon's OEM group.

The newest infrared sensor, being introduced in early 2001, is the Amorphous Silicon Bolometer. This infrared sensor is made from silicon wafers — like video cameras and computer chips. Silicon sensor wafers can be made thousands at a time for a few dollars per wafer. In the foreseeable future, Thermal Image Cameras will be as common and inexpensive as a quality video camera is today.

The second new development is a digital "Thermal Camera" that is now available to the independent manufacturers of the Raytheon OEM group. Engineers have incorporated a digital zoom feature in this model that will allow a 2:1 zoom to be done with no change to the lenses. The 2:1 zoom is accomplished with the simple flick of a switch. Thermal image cameras use lenses made from Germanium or Zinc-Selenide because glass and most plastics will not allow heat (infrared energy) to pass through them. Germanium and Zinc-Selenide are man-made materials and very expensive to manufacture.

Since "Thermal Camera" sees heat not light, a very small portion of a person can be seen through foliage and is immediately recognized as a hot spot. A warm bodied person in

a cold climate or a person in water is easily seen as a hot spot from a distance. The "Thermal Camera" sees through smoke, tear gas, rain, sleet, snow, hail, smog, and blowing dust — usually as if the obscurant was not even there. The "Thermal Camera" will always see better and further than your naked eye or video camera.

O F F I C E S U P P L Y S C H E D U L E S C O N S O L I D A T I O N

Due to a reorganization of office supply schedules and in order to better serve our customers, the 75IIIA, Next Day Desktop Delivery of Office Supplies, has been merged with the 75IIA, Office Products and Services. Also due to merge are Multiple Award Schedule 58VA, ADP/Telecommunications Media Supplies, and Single Award

Schedule 75V Envelopes—Mailing, Printing and Plain. If you have been buying products on any of these schedules, they will now be available under 75IIA. An additional notice has been posted in GSA Advantage, e-library, directing users to the 75IIA Schedule.

ONE STOP SHOPPING AT GSA NOW AVAILABLE UNDER MULTIPLE AWARD SCHEDULE 75 II A

GSA now offers electronic catalog ordering via one of our whole catalog contractors (formerly 75 III A, Next Day Desktop Delivery of Office Supplies). The range of products and services offered by these companies can be as simple as a desk set or as complex as designing and furnishing your entire office. They offer *everything* in their entire catalog on line through GSA. It's easy! Just log on to www.gsaAdvantage.GOV, search by company name or contract number and look for the "hotlink" symbol  next to the part number. This link will take you to the company's GSA *Advantage!* full catalog offering. Once there, you can buy as much or as little as you need at GSA prices!

The contractors below provide this service.

Note: Some currently do not have their links but we will have them up and running in the near future.

**445TH MAINTENANCE SQUADRON RECEIVES
ENVIRONMENTAL COMPLIANCE INSPECTION BEST PRACTICE AWARD**

The 445th Maintenance Squadron at WPAFB not only received excellent service, but saved time and money with their purchase and utilization, of the TS-48-S Filter Fuge™, with side mounted Power Puncher, manufactured by Turbo Spin, LLC. The Filter Fuge™ unit greatly decreased the environmental impact caused by the removal and disposal of used petroleum product filters and contributed to the 445th Maintenance Squadron award during an Environmental Compliance Inspection for Best Practices.

The Filter Fuge™ machine removes more oil than the traditional “draining and crushing” method. The filter retains its original shape allowing for removal and proper disposal of the filter element and recycling of the metal.

An example of Turbo Spin’s Filter Fuge™ capability: A used 1986 Hollingsworth Generator engine used oil filter weighed 1.785 kilograms after draining for 24 hours, but after utilizing the Filter Fuge™ this same drained 1986 Hollingsworth Generator engine filter weighed 1.590 kilograms. As demonstrated, the Filter Fuge™ removed an additional 7 ounces of oil from this drained used oil filter. The 445th Maintenance Squadron has drained 50 filters of varying sizes in the Filter Fuge™ in a single operation.

Turbo Spin, LLC, manufactures machines to drain all sizes of used oil filters for recycling and/or disposal. Each unit is covered by a limited warranty for one year from date of purchase.

FIRE EXTINGUISHERS AND OTHER RELATED ACCESSORIES

Flag Fire Inc., a Toledo, Ohio based company, is a premiere manufacturer of quality fire extinguishers and other related accessories. Whether the need is for dry chemical ABC, PDC, PKD or clean agent (NAF-S) special hazards spot protectors, Flag manufactures a fire extinguisher for the application you need. Flag Fire's recent introduction of a complete Halotron Line of extinguishers is perfect for areas where Halon was used in the past and you have environmental concerns.

Flag offers products that can be customized to adapt to special machinery, vehicles, processing equipment, etc. Unlike other fire extinguisher's available today, Flag's extinguisher design is unique. Sporting a "custom design bottom" to prevent foot injury if it should become dislodged from its hanger hook or accidentally dropped. The "external valve spring design", is no accident. Extensive industry research influenced the extinguisher's design to make them the easiest and fastest to service in the industry.

Since the early 60's Flag products have been the choice of discriminating buyers. Complete information on Flag Fire and its' products is available on their web page. When the need arises for Fire Extinguisher Cabinets, Hose Racks, Heavy Duty Brackets, Wheeled Units, Pump Tanks, Cartridge Operated Extinguishers as well as special finishes such as CHROME, BRASS or any CUSTOM color of your choice, Flag Fire stands ready to satisfy your requirement.

ATUOCAP'S SMART BATTERY MANAGEMENT SYSTEM

Critical operations that depend upon continuous electrical power depend upon the standby battery to ride through power outages. AutoCap's Smart Battery Management System not only monitors and tests each cell but also provides individual charging that will greatly extend the life and reliability of the battery. Sixteen models are available for virtually any battery configuration of any rechargeable chemistry. A single system can handle multiple strings of up to 264 cells each. The system contains an embedded PC with standard ports. Multiple systems can be arranged to communicate with a remote terminal via existing networks or phone lines. Four levels of alarms notify of problems and a solid state disk stores a complete history of each cell.

Food Service, Handling, Refrigeration & Storage Equipment**

“THE MEAL THAT HEATS ITSELF” — A MEAL WITH A STOVE INSIDE!

HeaterMeals, Inc., has two new products!

- **HeaterMeals** is a single self-heating meal, which enables people to enjoy a hot meal any time or anyplace without electricity or flame.
- **HeaterMeals Plus** is the more complete meal. HeaterMeals Plus includes the self-heating entree and additional items such as: applesauce, cookies, bread sticks, pudding, beef jerky, granola bar, and 16.9 oz. of water.

HeaterMeals and HeaterMeals Plus are completely self-contained meals. Each include a pre-cooked entree that heats right in its own package, thanks to a water-activated food-heating pad. Each product line has seven entrees.

HeaterMeals have a 2-year shelf life with no refrigeration required. HeaterMeals Plus has a 1-year shelf life without refrigeration.

Every HeaterMeals and HeaterMeals Plus comes with a sealed, 3/4-pound, pre-cooked tray of food, cutlery pack, a foam tray which holds the food heater, and a 2-oz. pouch of water. The water - that starts the food heater.

To heat the entree, pour the water on the food heater, place the sealed tub of food on the food heater, and slide it back into the box. Then 14 minutes after steam appears the meal is 140°F and “ready to eat.”

National Customer Service Center

WE CAN HELP!

Call and speak to one of the friendly, helpful people at the FSS National Customer Service Center.

Our job is to help you with questions or problems about any of the products or services available from the Federal Supply Service.

Contact our Acquisition Centers and speak to knowledgeable experts about items you want to purchase as well as product information, pricing, placing an order and status.

Select option (2) on the menu.
