30 CFR 75.153 and 77.103 (Electrical work Qualified person) establish the procedures under which miners are qualified to perform electrical work in the underground and surface coal mines. MSHA form 5000-1 provides coal mine operators with a standard reporting format which expedites the certification and qualification process while ensuring compliance with regulations. The information provided on the form enables MSHA to determine if miners satisfy the requirements to obtain the certification/qualification sought. This collection of information is covered by the Privacy Act notice published in the Federal Register. Computer safeguards are as described in the National Bureau of Standards Publication, *Computer Security Guidelines for Implementing the Privacy Act of 1974*, and in accordance with procedures developed by MSHA Under GSA Circular E-34. Public reporting burden for this collection of information is estimated to average 25 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection information. Persons are not required to respond to this collection of information unless it displays a currently valid OMB Control Number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to:
