

## Technology Administration, Commerce

## § 1180.6

to training technology and other federally owned or originated technologies, and applies to items produced in-house or outside the agency through the Government Printing Office, its contractors, Federal Prison Industries or any other producer, provided that such material is intended by the agency for public dissemination.

*Scientific, technical and engineering information* means—

(1) Basic and applied research that results from the efforts of scientists and engineers in any medium (including new theory and information obtained from experimentation, observation, instrumentation or computation in the form of text, numeric data or images), and

(2) Information that bears on business and industry generally, such as economic information, market information and related information, if the agency determines such information would be of value to consumers of the information described in paragraph (1) of this definition.

*Summary* means information relating to an ongoing research project likely to result in a final product.

### § 1180.3 General rule.

Unless an exception applies under section 1180.7, each federal agency shall, within the time period specified in this regulation, transfer to NTIS—

(a) At least one copy of every final STEI product resulting from the agency's federally funded research and development activities, and

(b) A summary of the agency's new and on-going research that is likely to result in a final STEI product

if such final product or summary is unclassified and is intended by the agency for public dissemination.

### § 1180.4 Preparing a product for transfer.

(a) Every final STEI product or summary shall, to the extent practicable, be prepared in a format that is consistent with one of the various formats found in NTIS guidelines. In addition, every such product shall—

(1) Be accompanied by a report documentation page (SF 298) or its electronic equivalent;

(2) Be in a form capable of high quality reproduction appropriate to the medium;

(3) In the case of software, be accompanied by relevant documentation, such as operating manuals, but not including printed source code; and

(4) In the case of a product not printed by the Government Printing Office, be accompanied by a statement as to whether the product has been made available for depository distribution by the Government Printing Office.

(b) Each federal agency shall transfer or have transferred to NTIS those STEI products funded by it that are protected by copyright only if there is a license reserved to the Government. In such cases, the agency shall inform NTIS of the terms of the license. Suggested language for inclusion in agency funding instruments is contained in the Appendix to this part.

(c) If an agency has generated or funded an STEI product which should be available for public dissemination but has embedded within it any copyrighted material, the designated liaison appointed pursuant to § 1180.8 should work with NTIS to determine if it would be appropriate to seek a license from the copyright holder in order to make the STEI product available.

### § 1180.5 Timeliness.

A single copy of a final product or summary described in § 1180.3 must be transferred to NTIS within fifteen days of the date it is first made available for public dissemination through any distribution channel, and, whenever practical, as soon as it has been approved by the agency for final printing or other reproduction, unless the agency and the Director have otherwise agreed.

### § 1180.6 Production of additional copies.

Unless the agency determines that such action would not be feasible, it shall make appropriate arrangements to enable NTIS, from time to time and at NTIS's own discretion and expense, to ride agency printing and other reproduction orders.
