

Table of Contents

Executive Summary

CHAPTER 1: Health and Welfare Concerns

1.1 Ozone	1-1
1.1.1 General Background	1-1
1.1.2 Health and Welfare Effects of Ozone and Its Precursors	1-2
1.1.3 Additional Health and Welfare Effects of NO _x Emissions	1-3
1.1.4 Ozone Nonattainment	1-4
1.1.5 Public Health and Welfare Concerns from Prolonged and Repeated Exposures to Ozone	1-7
1.2 Carbon Monoxide	1-8
1.2.1 General Background	1-8
1.2.2 Health Effects of CO	1-9
1.2.3 CO Nonattainment	1-9
1.3 Particulate Matter	1-11
1.3.1 General Background	1-11
1.3.2 Health and Welfare Effects of PM	1-13
1.3.3 PM Nonattainment	1-14
1.4 Gaseous Air Toxics	1-17
1.4.1 Benzene	1-18
1.4.2 1,3-Butadiene	1-19
1.4.3 Formaldehyde	1-19
1.4.4 Acetaldehyde	1-20
1.4.5 Acrolein	1-21
1.5 Inventory Contributions	1-21
1.5.1 Inventory Contribution	1-21
1.5.2 Inventory Impacts on a Per Vehicle Basis	1-24
1.6 Other Adverse Public Health and Welfare Effects Associated with Nonroad Engines and Vehicles	1-25
1.6.1 Snowmobiles	1-25
1.6.2 Large SI Engines	1-33
1.6.3 Acid Deposition	1-34
1.6.4 Eutrophication and Nitrification	1-35

CHAPTER 2: Industry Characterization

2.1 Marine	2-1
2.1.1 Marine Diesel Engine Manufacturers	2-1
2.1.2 Recreational Boat Builders	2-3
2.2 Large Industrial SI Equipment	2-4
2.2.1 Manufacturers	2-4
2.2.2 Applications	2-5
2.2.3 Engine Design and Operation	2-8

2.2.4 Customer Concerns	2-9
2.3 Snowmobiles	2-10
2.3.1 Manufacturers	2-10
2.3.2 Sales and Fleet Size	2-10
2.3.3 Usage	2-11
2.3.4 Customer Concerns	2-12
2.4 All-Terrain Vehicles	2-12
2.4.1 Manufacturers	2-13
2.4.2 Applications	2-15
2.4.3 Engine Design and Operation	2-15
2.5 Off-Highway Motorcycles	2-16
2.5.1 Manufacturers	2-17
2.5.2 Applications	2-20
2.5.3 Engine Design and Operation	2-21

CHAPTER 3: Technology

3.1 Introduction to Spark-Ignition Engine Technology	3-1
3.1.1 Four-Stroke Engines	3-1
3.1.2 Two-Stroke Engines	3-2
3.1.3 Engine Calibration	3-3
3.2 Exhaust Emissions and Control Technologies	3-6
3.2.1 Current Two-Stroke Engines	3-6
3.2.2 Clean Two-Stroke Technologies	3-10
3.2.3 Current Four-Stroke Engines	3-15
3.2.4 Clean Four-Stroke Technologies	3-16
3.2.5 Advanced Emission Controls	3-19
3.3 Evaporative Emissions	3-22
3.3.1 Sources of Evaporative Emissions	3-22
3.3.2 Evaporative Emission Controls	3-24
3.4 CI Recreational Marine Engines	3-27
3.4.1 Background on Emissions Formation from Diesel Engines	3-27
3.4.2 Marinization Process	3-28
3.4.3 General Description of Technology for Recreational Marine Diesel Engines	3-30

CHAPTER 4: Feasibility of Proposed Standards

4.1 CI Recreational Marine	4-1
4.1.1 Baseline Technology for CI Recreational Marine Engines	4-1
4.1.2 Anticipated Technology for CI Recreational Marine Engines	4-3
4.1.3 Emission Measurement Procedures for CI Recreational Marine Engines	4-4
4.1.4 Impacts on Noise, Energy, and Safety	4-12
4.2 Large Industrial SI Engines	4-14
4.2.1 Proposed 2004 Standards	4-14
4.2.2 Proposed 2007 Standards	4-14
4.2.3 Impacts on Noise, Energy, and Safety	4-37

4.3 Snowmobiles	4-38
4.3.1 Baseline Technology and Emissions	4-38
4.3.2 Potentially Available Snowmobile Technologies	4-38
4.3.3 Test Procedure	4-41
4.3.4 Impacts on Noise, Energy, and Safety	4-42
4.3.5 Conclusion	4-42
4.4 All-Terrain Vehicles	4-45
4.4.1 Baseline Technology and Emissions	4-45
4.4.2 Potentially Available ATV Technologies	4-47
4.4.3 Test Procedure	4-54
4.4.4 Impacts on Noise, Energy, and Safety	4-55
4.4.5 Conclusion	4-56
4.7 Off-Highway Motorcycles	4-57
4.7.1 Baseline Technology and Emissions	4-57
4.7.2 Potentially Available Off-Highway Motorcycle Technologies	4-59
4.7.3 Test Procedure	4-61
4.7.4 Impacts on Noise, Energy, and Safety	4-62
4.7.5 Conclusion	4-63
 CHAPTER 5: Estimated Costs	
5.1 Methodology	5-1
5.2 Cost of Emission Controls by Engine/Vehicle Type	5-3
5.2.1 Recreational Marine Diesel Engines	5-3
5.2.2 Large Industrial Spark-Ignition Engines	5-8
5.2.3 Recreational Vehicles	5-19
 CHAPTER 6: Emissions Inventory	
6.1 Methodology	6-1
6.1.1 Off-highway Exhaust Emissions	6-1
6.1.2 Off-highway Evaporative Emissions	6-3
6.2 Effect of Emission Controls by Engine/Vehicle Type	6-5
6.2.1 Compression-Ignition Recreational Marine	6-5
6.2.2 Large Spark-Ignition Equipment	6-11
6.2.3 Snowmobiles	6-24
6.2.4 All-Terrain Vehicles	6-28
6.2.5 Off-highway Motorcycles	6-35
 CHAPTER 7 Cost Per Ton	
7.1 Cost Per Ton by Engine Type	7-1
7.1.1 Introduction	7-1
7.1.2 Compression-Ignition Recreational Marine	7-1
7.1.3 Large Industrial SI Equipment	7-3
7.1.4 Recreational Vehicles	7-7
7.2 Cost Per Ton for Other Mobile Source Control Programs	7-11
7.3 20-Year Cost and Benefit Analysis	7-12

CHAPTER 8: Initial Regulatory Flexibility Analysis	
8.1 Requirements of the Regulatory Flexibility Act	8-1
8.2 Description of Affected Entities	8-2
8.2.1 Recreational Vehicles (off-highway motorcycles, ATVs, and snowmobiles)	8-2
8.2.2 Marine Vessels	8-3
8.2.3 Large Spark Ignition Engines	8-3
8.3 Projected Costs of the Proposed Program	8-4
8.4 Projected Reporting, Recordkeeping, and Other Compliance Requirements of the Proposed Rule	8-4
8.5 Other Related Federal Rules	8-4
8.6 Regulatory Alternatives	8-4
