

NRTL testing and certification requirements.

Many UL test standards also are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience, we use the designation of the standards developing organization for the standard as opposed to the ANSI designation. Under our procedures, any NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard. You may contact ANSI to find out whether or not a test standard is currently ANSI-approved.

Programs and Procedures

The renewal includes CCL's continued use of any supplemental programs for which it is approved, based upon the criteria detailed in OSHA's March 9, 1995, **Federal Register** notice on the NRTL programs (60 FR 12980). This notice lists nine (9) programs, eight of which (called the supplemental programs) an NRTL may use to control and audit, but not necessarily to generate, the data relied upon for product certification. An NRTL's initial recognition will always include the first or basic program, which requires that all product testing and evaluation be performed in-house by the NRTL that will certify the product. OSHA has already recognized CCL for the program listed below. See <http://www.osha.gov/dts/otpc/nrtl/ccl.html>.

Program 9: Acceptance of services other than testing or evaluation performed by subcontractors or agents.

OSHA developed these programs to limit how an NRTL may perform certain aspects of its work and to permit the activities covered under a program only when the NRTL meets certain criteria. In this sense, they are special conditions that the Agency places on an NRTL's recognition. OSHA does not consider these programs in determining whether an NRTL meets the requirements for recognition under 29 CFR 1910.7. However, these programs help to define the scope of that recognition.

Conditions

CCL must also abide by the following conditions of the recognition, in addition to those already required by 29 CFR 1910.7:

OSHA must be allowed access to CCL's facility and records for purposes of ascertaining continuing compliance with the terms of its recognition and to investigate as OSHA deems necessary;

If CCL has reason to doubt the efficacy of any test standard it is using under

this program, it must promptly inform the test standard developing organization of this fact and provide that organization with appropriate relevant information upon which its concerns are based;

CCL must not engage in or permit others to engage in any misrepresentation of the scope or conditions of its recognition. As part of this condition, CCL agrees that it will allow no representation that it is either a recognized or an accredited Nationally Recognized Testing Laboratory (NRTL) without clearly indicating the specific equipment or material to which this recognition is tied, or that its recognition is limited to certain products;

CCL must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major changes in its operations as an NRTL, including details;

CCL will meet all the terms of its recognition and will always comply with all OSHA policies pertaining to this recognition; and

CCL will continue to meet the requirements for recognition in all areas where it has been recognized.

Signed at Washington, DC this 31st day of May, 2005.

Jonathan L. Snare,

Acting Assistant Secretary.

BILLING CODE 7537-01-P

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-32741]

Notice of Availability of Environmental Assessment and Finding of No Significant Impact for License Amendment for Central Virginia Laboratories & Consultants, Inc's Facility in Virginia Beach, VA

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

FOR FURTHER INFORMATION CONTACT:

Kathy Modes, Materials Security & Industrial Branch, Division of Nuclear Materials Safety, Region I, 475 Allendale Road, King of Prussia, Pennsylvania 19406, telephone (610) 337-5251, fax (610) 337-5269; or by e-mail: kad@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Introduction

The Nuclear Regulatory Commission (NRC) is issuing a license amendment to Central Virginia Laboratories & Consultants, Inc. for Materials License No. 45-25198-01, to authorize release of its facility in Virginia Beach, Virginia, for unrestricted use. NRC has prepared an Environmental Assessment (EA) in support of this action in accordance with the requirements of 10 CFR Part 51. Based on the EA, the NRC has concluded that a Finding of No Significant Impact (FONSI) is appropriate. The amendment will be issued following the publication of this Notice.

II. EA Summary

The purpose of the action is to authorize the release of the licensee's Virginia Beach, Virginia facility for unrestricted use. Central Virginia Laboratories & Consultants, Inc. was authorized by NRC from June 16, 1992,
