

the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before June 10, 2005, but such final comments must not contain new factual information and must otherwise comply with § 207.30 of the Commission's rules. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's rules do not authorize filing of submissions with the Secretary by facsimile or electronic means, except to the extent permitted by § 201.8 of the Commission's rules, as amended, 67 FR 68036 (November 8, 2002).

Additional written submissions to the Commission, including requests pursuant to § 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.21 of the Commission's rules.

Issued: January 4, 2005.

By order of the Commission.

Marilyn R. Abbott,

Secretary to the Commission.

BILLING CODE 3180–02–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–395]

South Carolina Electric & Gas Company; Virgil C. Summer Nuclear Station; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from Title 10 of the Code of Federal Regulations, Part 50, Sections 50.44, and 50.46 and Appendix K, for the Renewed Facility Operating License No. NPF–12, issued to South Carolina Electric & Gas Company (the licensee), for operation of the Virgil C. Summer Nuclear Station (VSNS), located in Fairfield County, South Carolina. Therefore, as required by 10 CFR 51.21, the NRC has performed an environmental assessment as described in this notice and has made a finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would allow operation with up to four lead test assemblies (LTAs) containing fuel rods with Optimized ZIRLO™ and several different developmental clad alloys in the core.

The proposed action is in accordance with the licensee's application dated September 3, 2004, as supplemented by letter dated November 11, 2004.

The Need for the Proposed Action

The proposed exemption is needed because the NRC regulations identified above specifically refer to light-water reactors containing fuel consisting of uranium oxide pellets enclosed in zircaloy or ZIRLO tubes. A new zirconium-based alloy cladding has been developed, which is not the same chemical composition as zircaloy or ZIRLO. Therefore, the licensee needs an exemption to insert up to four assemblies containing the new fuel cladding material into the VSNS reactor core for test during operation.

Environmental Impacts of the Proposed Action

The NRC has completed its safety evaluation of the proposed action and concluded that it will not present an undue risk to the public health and safety. The safety evaluation performed by Westinghouse, upon which the licensee is relying, demonstrates that the predicted chemical, mechanical and material performance of the Advance zirconium-based cladding is within that approved for Zircaloy-4 or ZIRLO under all anticipated operational occurrences and postulated accidents. Furthermore, the LTAs will be placed in nonlimiting core locations. In the unlikely event that cladding failures were to occur in the LTAs, environmental impact would be minimal and is bounded by previous environmental impact statements.

The details of the NRC staff's safety evaluation will be provided as an enclosure to the letter to the licensee granting the exemption.

The proposed action will not significantly increase the probability or consequences of accidents, no changes are being made in the types of effluents that may be released off site. There is no significant increase in occupational or public radiation exposure. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

With regard to potential nonradiological impacts, the proposed action does not have a potential to affect any historic sites. It does not affect

nonradiological plant effluents and has no other environmental impact. Therefore, there are no significant nonradiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that there are no significant environmental impacts associated with the proposed action.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (*i.e.*, the “no-action” alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

Alternative Use of Resources

The action does not involve the use of any different resources than those previously considered in the Final Environmental Statement for the VSNS, NUREG–0719, dated May 1981.

Agencies and Persons Consulted

In accordance with its stated policy, on December 15, 2004, the staff consulted with the South Carolina State official, Henry Porter of the South Carolina Department of Health and Environmental Control, regarding the environmental impact of the proposed action. The State official had no comments.

Finding of No Significant Impact

On the basis of the environmental assessment, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated September 3, 2004, as supplemented by letter dated November 11, 2004. Documents may be examined, and/or copied for a fee, at the NRC's Public Document Room (PDR), located at One White Flint North, Public File Area O1 F21, 11555 Rockville Pike (first floor), Rockville, Maryland. Publicly available records will be accessible electronically from the Agencywide Documents Access and Management System (ADAMS) Public Electronic Reading Room on the Internet at the NRC Web site, <http://www.nrc.gov/reading-rm/adams.html>.
