*Title:* Water Quality Standards Regulation (Renewal).

*Abstract:* Section 303(c) of the Clean Water Act requires States and authorized Tribes to establish water quality standards, and to review and, if appropriate, revise their water quality standards once every three years. The Act also requires EPA to review and either approve or disapprove the new or revised standards, and to promulgate replacement Federal standards if necessary. Section 118(c)(2) of the Act specifies additional water quality standards requirements for waters of the Great Lakes system.

The Water Quality Standards Regulation governs national implementation of the water quality standards program. The Regulation consists of 40 CFR part 131, and portions of part 132 related to water quality standards, including 40 CFR 132.3, Appendix A, Appendix E, and Procedures 1 and 2 of Appendix F. The Regulation describes requirements and procedures for States and authorized Tribes to develop, review, and revise their water quality standards, and EPA procedures for reviewing and approving the water quality standards. The regulation requires the development and submission of information to EPA, including:

- Results of each jurisdiction's triennial review of its water quality standards (40 CFR 131.6 and 131.20), including any new or revised water quality standards that are adopted, and required supporting information. Water quality standards include use designations for specific water bodies; water quality criteria sufficient to protect the designated uses; and an antidegradation policy. The regulation requires that certain information be made available for public review as well.
- Information that an Indian Tribe must submit to EPA in order to determine

whether a Tribe is qualified to administer the water quality standards program (40 CFR 131.8).

- Information a State or Tribe must submit if it chooses to exercise a dispute resolution mechanism for disputes between States and Tribes over water quality standards on common water bodies (40 CFR 131.7).
- Information required by 40 CFR part 132 from dischargers to waters of the Great Lakes system, including bioassay tests initiated by dischargers to support development of water quality criteria; studies and demonstrations required by the antidegradation policy for the Great Lakes System; and analyses to request variances from water quality standards. The Guidance includes additional information collections that are addressed in separate Information Collection Requests for the National Pollutant Discharge Elimination System program.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

*Burden Statement:* The annual public reporting and recordkeeping burden for this collection of information is estimated to average 988 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*Respondents/Affected Entities:* State and certain Tribal governments, and water dischargers subject to certain requirements related to water quality standards in the Great Lakes system.

*Estimated Number of Respondents:* 2,796 (56 States and Territories, 30 Tribes, 516 major industrial and POTW dischargers, and 2,194 minor dischargers).

*Frequency of Response:* At least once every three years for water quality standards reviews and submissions.

Once per occasion for Tribal applications to administer water quality standards; dispute resolution requests; and Great Lakes bioassay testing, variance requests, and antidegradation demonstrations.

*Estimated Total Annual Hour Burden:* 260,714.

*Estimated Total Annual Cost:* \$12,063,453, including \$0 for Capital Expense, \$0 for O&M, and \$12,063,453 for Respondent Labor costs.

*Changes in the Estimates:* There is an increase of 21,938 hours over the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is due to adjustments in the number of tribes receiving approval to administer water programs, even though there was a small reduction in some of the Great Lakes activities.

Dated: July 25, 2005.
