Wisconsin Power and Light Company; Notice of Filing

July 29, 2005.

Take notice that on July 22, 2005, Wisconsin Power and Light Company (WPL) filed, pursuant to section 284.224 of the Commission's Regulations, an application for a blanket certificate of public convenience and necessity authorizing it to transport natural gas in interstate commerce to the same extent and in the same manner that intrastate pipelines are authorized to engage in such activities pursuant to subpart C of part 284 of the Commission's Regulations. WPL maintains that the issuance of a blanket certificate will serve the public convenience and necessity by permitting WPL to provide interstate transportation services on behalf of South Beloit Water, Gas and Electric Company, a local distribution company that serves the natural gas market in and around South Beloit, Illinois, as well as other shippers desiring such service, without otherwise subjecting WPL to the Commission's Natural Gas Act jurisdiction.

Louisville Gas and Electric Company; Notice of Availability of Environmental Assessment

July 29, 2005.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's regulations, 18 CFR part 380 (Order No. 486, 52 FR 47879), the Office of Energy Projects has reviewed the application for a new license for the Ohio Falls Hydroelectric Project, located on the Ohio River, in Jefferson County, Kentucky, and has prepared an Environmental Assessment (EA). In the EA, Commission's staff analyze the potential environmental effects of relicensing the project and conclude that issuing a new license for the project, with appropriate environmental measures, would not constitute a major Federal action significantly affecting the quality of the human environment.

A copy of the EA is on file with the Commission and is available for public inspection. The EA may also be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link. [Docket No. CP05-49-000]

Northern Natural Gas Company; Notice of Availability of the Environmental Assessment for the Proposed Bluff Creek/Tomah Expansion Project

July 7, 2005.

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) on the natural gas pipeline facilities proposed by Northern Natural Gas Company, (Northern) in the above-referenced docket.

The EA was prepared to satisfy the requirements of the National Environmental Policy Act. The staff concludes that approval of the proposed project, with appropriate mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The EA assesses the potential environmental effects of the construction and operation of the proposed 3.2 miles of 30-inch diameter pipeline in Lafayette County, Wisconsin at the Bluff Creek Interconnect, and increase the horsepower at the existing Chatfield compressor station.

The purpose of the proposed facilities is to enable Northern to provide a 675-pounds per square inch gauge operating pressure guarantee to Wisconsin Gas LLC at the Bluff Creek Interconnect and provide additional horsepower at the Chatfield Compressor Station to enable Northern to meet firm incremental service to Wisconsin Gas LLC on the Tomah Branchline.
