

proposed clarifications and modifications to § 64.4002 of the Commission's rules. The proposed clarifications and modifications are in the nature of technical corrections to the Commission's customer account record exchange rules that, if adopted, would not have a significant economic impact on entities subject to those rules. For example, the Coalition asserts that its proposed modification to § 64.4002(d) would make this provision consistent with similar notification requirements adopted in the *Order* simply by requiring a LEC to confirm its receipt of a particular IXC-initiated notification with an appropriate response. The Coalition similarly proposes modifications to §§ 64.4002(e) and (g) to include within the information exchanges prescribed by those subsections, the same standard categories of information that carriers routinely must provide in connection with other notification obligations adopted in the *Order*. If the Commission were to adopt the proposed modifications and clarifications, we believe that the compliance burden, and resulting economic impact on entities subject thereto, would be *de minimus*. Therefore, the Commission certifies for purposes of the RFA that the proposals in this document, if adopted, will not have a significant economic impact on a substantial number of small entities.

The Commission will send a copy of this document, including a copy of this Initial Regulatory Flexibility Certification, to the Chief Counsel for Advocacy of the SBA. This initial certification will also be published in the **Federal Register**.
