SUPPLEMENTARY INFORMATION: Pursuant to Additional U.S. Note 5 to chapter 17 of the Harmonized Tariff Schedule of the United States (HTS), the United States maintains tariff-rate quotas for imports of raw cane and refined sugar. Pursuant to additional U.S. Note 8 to chapter 17 of the HTS, the United States also maintains a tariff-rate quota for certain sugar-containing products.

Section 404(d)(3) of the Uruguay Round Agreements Act (19 U.S.C. 3601(d)(3)) authorizes the President to allocate the in-quota quantity of a tariff-rate quota for any agricultural product among supplying countries or customs areas. The President delegated this authority to the United States Trade Representative under Presidential Proclamation 6763 (60 FR 1007).

The in-quota quantity of the tariff-rate quota for raw cane sugar for the period October 1, 2005–September 30, 2006, has been established by the Secretary of Agriculture at 1,226,057 metric tons, raw value (1,351,496 short tons). The quantity of 1,226,057 metric tons, raw value is being allocated to the following countries:

Zimbabwe	13,953

These allocations are based on the countries' historical shipments to the United States. The allocations of the raw cane sugar tariff-rate quota to countries that are net importers of sugar are conditioned on receipt of the appropriate verifications of origin.

This allocation includes the following minimum quota-holding countries: Congo, Cote d'Ivoire, Gabon, Haiti, Madagascar, Papua New Guinea, Paraguay, St. Kitts & Nevis, and Uruguay.

The in-quota quantity of the tariff-rate quota for refined sugar for the period October 1, 2005–September 30, 2006, has been established by the Secretary of Agriculture at 49,000 metric tons, raw value (54,013 short tons), of which the Secretary has reserved 28,656 metric tons (31,588 short tons) for specialty sugars. Of the quantity not reserved for specialty sugars, a total of 10,300 metric tons (11,354 short tons) is being allocated to Canada and 2,954 metric tons (3,256 short tons) is being allocated to Mexico. The remaining 7,090 metric tons (7,815 short tons) of the in-quota quantity not reserved for specialty sugars may be supplied by any country on a first-come, first-served basis, subject to any other provision of law. The 28,656 metric tons (31,588 short

tons) reserved for specialty sugars is also not being allocated among supplying countries and is available on a first-come, first-served basis, subject to any other provision of law.

In 1995, the United States Trade Representative determined, pursuant to 15 CFR 201.110(a), to suspend the certificate of quota eligibility (CQE) requirements for sugar entering under the tariff-rate quota for refined sugar. Based on the factors set out in 15 CFR 201.110(b), I have determined to reinstate the CQE requirements for sugar entering under the tariff-rate quota for refined sugar that is the product of a country that has been allocated a share of the tariff-rate quota for refined sugar. Accordingly, pursuant to 15 CFR 201.110(b), effective October 1, 2005, the provisions of subpart A of part 201 of title 15 of the Code of Federal Regulations are reinstated with respect to sugar entering under the tariff-rate quota for refined sugar that is the product of a country that has been allocated a share of the tariff-rate quota for refined sugar.

With respect to the tariff-rate quota of 64,709 metric tons (71,329 short tons) for certain sugar-containing products maintained pursuant to additional U.S. Note 8 to chapter 17 of the HTS, 59,250 metric tons (65,312 short tons) of sugar-containing products is being allocated to Canada. The remaining in-quota quantity for this tariff-rate quota is available to other countries on a first-come, first-served basis.

Conversion factor: 1 metric ton = 1.10231125 short tons.

Rob Portman,

United States Trade Representative.

This document also assesses the potential noise impact on Zion National Park, Little Black Mountain Petroglyph site, and 42 other potentially noise sensitive properties in the vicinity.
