

I represent an organization providing housing services to senior citizens including over 1000 nursing home residents. The purpose of my communication is to object to the requirement for nursing homes to provide licensing information with each converter box coupon application on behalf of their residents. This requirement seems onerous and unnecessary. Moreover, the additional labor required to complete this application process would take valuable staff time away from the primary duty of providing care to the seniors we serve.

Thank you for your consideration.
