

telephone: (727) 896-8626; fax: (727) 893-2947.

FOR FURTHER INFORMATION CONTACT: Kim Iverson, Public Information Officer, South Atlantic Fishery Management Council, One Southpark Circle, Suite 306, Charleston, SC 29407-4699; telephone: (843) 571-4366 or toll free: (866) SAFMC-10; fax: (843) 769-4520; email: kim.iverson@safmc.net.

SUPPLEMENTARY INFORMATION: Invited workshop participants will meet from 8:30 a.m. – 5 p.m. on October 26, 2005, and from 8:30 a.m. – 1 p.m. on October 27, 2005, to complete a draft of the Council's Deepwater Coral Research and Monitoring Plan. This workshop is a follow up to one held in 2004. The workshop is designed to consolidate and refine sections of the draft document that have been developed through the use of a web portal. When completed, the detailed research and monitoring plan will be integrated into the Council's developing Fishery Ecosystem Plan and support long-term research needs for the proposed deepwater Lophelia coral Habitat Areas of Particular Concern. In addition, the research plan will also comprise the South Atlantic component of NOAA's national strategy for research and monitoring of deepwater coral communities.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Note: The times and sequence specified in this agenda are subject to change.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 3 days prior to the meetings.

Dated: October 6, 2005.

Emily Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

[I.D. 083105B]

Endangered Species; File No. 1377

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of permit modification.

SUMMARY: Notice is hereby given that Dr. Anton Tucker, Mote Marine Laboratory, 1600 Ken Thompson Parkway, Sarasota, FL 34236, has been issued a modification to scientific research Permit No. 1377.

ADDRESSES: The modification and related documents are available for review upon written request or by appointment in the following office(s):

Permits, Conservation and Education Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301)713-2289; fax (301)427-2521; and

Southeast Region, NMFS, 263 13th Ave South, St. Petersburg, FL 33701; phone (727)824-5312; fax (727)824-5309.

FOR FURTHER INFORMATION CONTACT:

Carrie Hubard or Patrick Opay, (301)713-2289.

SUPPLEMENTARY INFORMATION: On January 14, 2004, notice was published in the Federal Register (69 FR 3568) that a modification of Permit No. 1377, issued December 4, 2002 (67 FR 76727), had been requested by the above-named organization. The requested modification has been granted under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR 222-226).

Modification No. 1 to Permit No. 1377 will allow the holder to expand the study area to include the Florida Keys and Sarasota Bay, and allow the capture, flipper and PIT tagging, and collection of blood and tissue samples from an additional 150 juvenile and subadult green (*Chelonia mydas*), 150 juvenile and sub-adult Kemp's ridley (*Lepidochelys kempi*), 100 juvenile and sub-adult loggerhead (*Caretta caretta*), and 5 juvenile and sub-adult hawksbill (*Eretmochelys imbricata*) sea turtles. The holder will perform additional sampling techniques for all captured turtles including scute scraping for heavy metal analysis, bioelectrical

impedance analysis to determine fat content, and laparoscopic surgery to determine sex and reproductive status. Gastric lavage will be conducted on green sea turtles to obtain dietary samples. The permit holder will utilize additional telemetry instruments and attachment methods, including radio tags, sonic tags, time depth recorders, animal-borne video, audio and environmental data collection systems (AVEDS), and receiver tags (e.g., bioacoustic probe). Instruments will be attached to a subset of turtles in Charlotte Harbor or Sarasota Bay, and a subset of turtles in the Florida Keys. The amended permit expires December 31, 2007.

Issuance of this modification, as required by the ESA was based on a finding that such permit (1) was applied for in good faith, (2) will not operate to the disadvantage of any endangered or threatened species, and (3) is consistent with the purposes and policies set forth in section 2 of the ESA.

Dated: October 6, 2005.

Stephen L. Leathery,

Chief, Permits, Conservation and Education Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[I.D. 100405B]

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Application and requests for modification of scientific research permits.

SUMMARY: Notice is hereby given that NMFS has received one scientific research permit application and 18 modification requests relating to Pacific salmon. The proposed research is intended to increase knowledge of species listed under the Endangered Species Act (ESA) and to help guide management and conservation efforts.

DATES: Comments or requests for a public hearing on the applications must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific daylight-saving time on November 14, 2005.

ADDRESSES: Written comments on the applications should be sent to Protected

Resources Division, NMFS, 1201 NE Lloyd Blvd., Suite 1100, Portland, OR 97232-1274. Comments may also be sent via fax to 503-230-5441 or by e-mail to resapps.nwr@NOAA.gov.

FOR FURTHER INFORMATION CONTACT: Garth Griffin, Portland, OR (ph.: 503-231-2005, Fax: 503-230-5441, e-mail: Garth.Griffin@noaa.gov). Permit application instructions are available at <http://www.nwr.noaa.gov>.

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

The following listed species (evolutionarily significant units) are covered in this notice:

Lower Columbia River (LCR) coho salmon (*Oncorhynchus kisutch*)
LCR steelhead (*O. mykiss*)
LCR Chinook salmon (*O. tshawytscha*).

Authority

Scientific research permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 et. seq) and regulations governing listed fish and wildlife permits (50 CFR 222-226). NMFS issues permits based on findings that such permits: (1) are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Anyone requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). Such hearings are held at the discretion of the Assistant Administrator for Fisheries, NMFS.

Applications Received

Permit 1550

The U.S. Fish and Wildlife Service (FWS) is asking for a 5-year research permit to take LCR coho salmon and LCR Chinook salmon in Abernathy Creek, Washington a tributary to the Lower Columbia River. The research is designed to determine the natural reproductive success and mean relative fitness of hatchery-origin and natural-origin steelhead and assess the overall demographic effects of hatchery fish supplementation in Abernathy Creek relative to two adjacent control streams, Germany and Mill Creeks. The study will benefit listed coho salmon by providing information on abundance and distribution that could be used over the long-term to protect important

habitat. The FWS proposes to capture using backpack electrofishing equipment handle, and release listed salmonids. The FWS does not intend to kill any fish being captured but some may die as an unintentional result of the research activities.

Modification Requests Received

For permits 1252, 1290, 1318, 1322, 1338, 1379, 1386, 1410, 1421, 1427, 1461, 1478, 1479, 1484, 1487, 1519, and 1525, the activities would only be modified to include take of LCR coho salmon; no other changes are proposed. Further information on the actions covered by these permits may be obtained from previous notices and on the web site <http://www.nwr.noaa.gov/1salmon/salmesa/permit.htm>.

Permit 1330 currently authorizes the Weyerhaeuser Company to take juvenile LCR steelhead in the Toutle River Basin, Washington. They are asking to modify their permit to add LCR coho salmon take and increase the annual number of LCR steelhead taken in the research. The purpose of the research is to increase understanding of the relationship between aquatic organisms and their habitat, determine how forest management and restoration influence the aquatic ecosystem, and produce data to help develop forest management practices that better protect aquatic resources. The research would benefit listed salmonids by producing data on their natural habitat recovery processes and by identifying the effects that various stressors have on listed species. Weyerhaeuser proposes to observe (during snorkeling surveys), capture (using backpack electrofishing), anesthetize, identify, measure, weigh, and release the fish. Weyerhaeuser does not intend to kill any fish being captured but some may die as an unintentional result of the research activities.

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate the application, associated documents, and comments submitted to determine whether the application meets the requirements of section 10(a) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day comment period. NMFS will publish notice of its final action in the **Federal Register**.

Dated: October 5, 2005.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-S

COMMODITY FUTURES TRADING COMMISSION

Agency Information Collection Activities: Notice of Intent to Renew Collection 3038-0048, Off-Exchange Agricultural Trade Options

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice.

SUMMARY: The Commodity Futures Trading Commission (CFTC) is announcing an opportunity for public comment on the proposed collection of certain information by the agency. Under the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 et seq., Federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on requirements relating to off-exchange agricultural trade options.

DATES: Comments must be submitted on or before December 12, 2005.

ADDRESSES: Comments may be mailed to David Van Wagner, Division of Market Oversight, U.S. Commodity Futures Trading Commission, 1155 21st Street, NW., Washington, DC 20581.

FOR FURTHER INFORMATION CONTACT: David Van Wagner, (202) 418-5481; FAX: (202) 418-5527; e-mail: dvanwagner@cftc.gov.

SUPPLEMENTARY INFORMATION: Under the PRA, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the CFTC is publishing notice of the proposed collection of information listed below.

With respect to the following collection of information, the CFTC invites comments on:

- Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;
