ACTION: Notice of Intent to prepare a recovery plan; request for information.

SUMMARY: NMFS is required by the Federal Endangered Species Act of 1973 (ESA), as amended to develop plans for the conservation and survival of Federally listed species, i.e., recovery plans. SUPPLEMENTARY INFORMATION: NMFS is charged with the recovery of Pacific salmon and steelhead species listed under the ESA. The recovery planning process is guided by the statutory language of section 4(f) of the ESA and NMFS policies. Recovery is the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to the ESA are no longer necessary. The ESA specifies that recovery plans must include: (1) a description of management actions as may be necessary to achieve the plan's goals for the conservation and survival of the species; (2) objective, measurable criteria which, when met, would result in the species being removed from the list; and (3) estimates of time and costs required to achieve the plan's goal and

the intermediate steps towards that goal. Section 4(f) of the ESA, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. NMFS is hereby soliciting relevant information on CCC coho salmon ESU populations and their freshwater/marine habitats.

NMFS will work closely with the California Department of Fish and Game to integrate, where appropriate, the recently developed and State-approved February 2004 Recovery Strategy for California Coho Salmon with the Federal Recovery Plan. Workshops during recovery plan development will be noticed across the range of the CCC coho salmon ESU and, upon completion, the draft Recovery Plan will be available for public review and comment through publication in the **Federal Register**. NMFS requests relevant information from the public that should be considered by NMFS during preparation of the draft recovery plan.

Authority

The authority for this action is section 4(f) of the ESA.
