

center. The Army Installation Management Agency (IMA) Headquarters from Virginia, the Northwest IMA Regional office from Illinois, and the Army Environmental Center from Maryland will also move to Fort Sam Houston.

(1) Alternatives to be examined in the EIS could consist of alternative locations within Fort Sam Houston for siting facility construction, new construction only, renovation and use of existing facilities (to include historic buildings), or a combination of both new construction and use of existing facilities, and usage of alternative locations within Camp Bullis, a sub-post of Fort Sam Houston, for training activities.

(2) As a result of moving approximately 9,000 new personnel to Fort Sam Houston and associated new construction, renovation and training activities, implementing the proposed BRAC action could have potential significant impacts to traffic on and off post, air quality and historic properties, to include contributing elements of the Fort Sam Houston National Historic Landmark District.

g. Fort Carson, Colorado. Fort Carson will receive a Heavy Brigade Combat team and a Unit of Employment Headquarters from Fort Hood, Texas, and the inpatient care services from the U.S. Air Force Academy, Colorado. Another Infantry Brigade Combat Team from overseas could also be transferred to Fort Carson as a result of the BRAC recommendation.

(1) Alternatives that may be considered in the Fort Carson EIS could include phasing movement of units to the fort, alternative siting locations within the post of placement of new facilities, construction of only new facilities, utilization and renovation of existing facilities, a combination of new construction and utilization of existing facilities, and utilization of alternative locations within Fort Carson for training activities.

(2) Fort Carson will gain approximately 10,000 Army personnel as a result of the BRAC action. Construction of new facilities, renovation of existing infrastructure and additional training activities could have significant environmental impacts on Fort Carson and its environs. Impacts could concur to local air and water quality, archaeological resources, noise and traffic.

h. Pinion Canyon Maneuver Site, Colorado. Pinion Canyon Maneuver Site (PCMS) is a subpost of Fort Carson and a primary training area for units stationed at Fort Carson and other Army posts. The new combat units stationed

at Fort Carson will increase the training tempo at the PCMS.

(1) The EIS to be prepared for the PCMS will examine a number of implementation alternatives that could include alternative placement of new construction projects, alternative locations within the PCMS for training activities, and alternative timing for units to conduct training activities at the PCMS.

(2) The Fort Carson BRAC action has the potential to significantly impact natural resources at the PCMS since the approximately 10,000 new personnel to be stationed there will now be training at the PCMS on a regular basis. New construction and increased training activities at the PCMS could have an impact on archaeological resources, natural resources, air and water quality, and soil erosion.
