

Anchorage, Delta Junction, and Chistochina. Hearings will be held in Glennallen, Delta Junction, and Chistochina in conjunction with the public meeting. Meetings, hearings, and any other public involvement activities will be announced at least 15 days in advance through public notices, media news releases, and/or mailings.

FOR FURTHER INFORMATION CONTACT: Bruce Rogers (bruce_rogers@ak.blm.gov) or Tammy Larzelere (tammy_larzelere@ak.blm.gov) at (907) 822-3217.

SUPPLEMENTARY INFORMATION: The East Alaska RMP planning area covers 7.1 million acres of BLM-administered lands. The Draft EARMP/EIS focuses on the principles of multiple use and sustained yield as prescribed by Section 202 of the FLPMA. The Draft EARMP/EIS considers and analyzes four alternatives, including a No Action and a Preferred Alternative. The alternatives provide for an array of variable levels of commodity production and resource protection and restoration. The alternatives were developed based on extensive public scoping and involvement.

There are seven main issues addressed through this planning process. Issue 1, Travel Management, addresses management of access, roads, and the use of off-highway vehicles for various purposes, including recreation, commercial uses, subsistence activities, and the general enjoyment of public lands while protecting natural and cultural resources. Issue 2, Recreation, examines how recreation should be managed to provide a diversity of experiences on BLM-managed lands. The document analyzes what measures are necessary to ensure that a diversity of recreational opportunities is maintained and what level of commercial recreational use is appropriate to maintain a diversity of recreational opportunities. Issue 3, Special Resource Values, focuses on those unique, special values located within the planning area that were identified by resource specialists and the public, and includes discussions on wildlife, fisheries, soil, water, air, and vegetation. Issue 4, Lands and Realty, addresses the need to determine the appropriate mix of lands and realty actions needed to provide a balance between land use and resource protection. Special attention is paid to the Slana Settlement area, and the establishment of conditions that would make the area available for disposal while considering the effects of disposal on the social and environmental conditions of the area. Issue 5,

Vegetation Management, examines management to provide for forest health, personal and commercial wood products, and fish and wildlife habitat. The role of fire is also explored. Issue 6, Leasable and Locatable Minerals, addresses the need to determine which areas should be made available for mineral exploration and development. Issue 7, Subsistence/Social and Economic Conditions, examines the need to maintain and protect subsistence opportunities and resources, as well as how the management actions, guidelines, and allowable uses described under the other issues will affect subsistence opportunities and resources. Social and economic effects are also addressed as part of this discussion.

The public involvement and collaboration process implemented for this effort included 30 public scoping meetings, 17 alternative development meetings, and meetings with Native and Village Corporations. The State of Alaska is participating in the planning effort as an informal cooperator.

After comments on the Draft EARMP/EIS are reviewed and any adjustments to the document are made, a Proposed RMP and Final Environmental Impact Statement are expected to be available in the fall of 2005.
