

and recovery of the species in the wild; and

5. Any other measures that the Service may require as being necessary or appropriate for the purposes of the HCP to be met.

The Habitat Conservation Plan

The District is administering development of a regional HCP on behalf of the five counties that comprise the San Luis Valley—Alamosa, Conejos, Costilla, Rio Grande, and Saguache Counties. Within the San Luis Valley, certain agricultural and other economic activities could inadvertently harm the endangered southwestern willow flycatcher (*Epidonax traillii extimus*) (flycatcher) and other listed bird species, and would be subject to regulation by the Service if there were a Federal nexus or take involved in the activity. These activities include operation, maintenance, and construction of diversions, ditches, canals, roads, bridges and utility lines; livestock grazing and agricultural practices; tamarisk and noxious weed control; and floodplain maintenance near towns and cities. Rather than seek ESA compliance for these activities on a case-by-case basis, the District will prepare a single, regional conservation plan that will be more efficient and effective in providing for the long-term protection and conservation of the flycatcher and other listed bird species and their habitat while allowing for the continuation of agricultural and other economic activities in the San Luis Valley.

The District intends to apply for an incidental take permit for the flycatcher, bald eagle (*Haliaeetus leucocephalus*), and yellow-billed cuckoo (*Coccyzus americanus*). The District also may seek to cover other rare and/or sensitive species that may be affected by the identified activities in the San Luis Valley. The ITP would become effective for unlisted species, such as the yellow-billed cuckoo, that are adequately covered by the HCP upon listing of such species as threatened or endangered by the Service. Other species for which the District is not seeking permit coverage also may benefit from the conservation measures provided in the HCP.

After receipt of the District's permit application and draft HCP, the Service will publish a notice of availability and request for comment. The draft HCP is planned for release in July 2005.

Environmental Review

The Service and the District are proposing to conduct an environmental review of the proposed issuance of an ITP and the associated proposed HCP

and to prepare an environmental document to assess potential impacts related to the ecosystem and the human environment. The District will administer development and coordinate implementation of the HCP, as required by section 10(a)(1)(B) of the ESA. The HCP will provide measures to minimize and mitigate the impacts of the proposed take of listed species and reduce impacts to the habitat upon which they depend.

The environmental review will consider the proposed action, no action (*i.e.*, no permit issuance), a reasonable range of alternatives, and the associated impacts of each alternative. A detailed description of the proposed action and alternatives (including no action) will be included in the environmental document. We anticipate that several alternatives will be developed, which may vary by the level of impacts caused by the proposed activities, their specific locations, and the conservation measures involved.

The NEPA document will identify potentially significant direct, indirect, and cumulative impacts on biological resources, land use, air quality, water quality, water resources, economics, and other environmental issues that could occur with the implementation of the Service's proposed actions and alternatives. For all potentially significant impacts, the NEPA document will identify avoidance, minimization, and mitigation measures to reduce these impacts where feasible, to a level below significance.

The Service will conduct the proposed environmental review in accordance with the requirements of NEPA, its implementing regulations, other appropriate Federal laws and regulations, and policies and procedures of the Service for compliance with those regulations. We are publishing this notice in accordance with section 1501.7 of the NEPA regulations to obtain suggestions and information from other agencies and the public on the scope of issues and alternatives to be addressed in the environmental document. The primary purpose of the scoping process is to identify, rather than to debate, significant issues related to the proposed action. We invite comments and suggestions from all interested parties to ensure that a reasonable range of alternatives is addressed and that all potentially significant issues are identified. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public. We will fully consider all comments received during the comment period.
