

direction for conserving wildlife and their habitats, the CCPs identify wildlife-dependent recreational opportunities available to the public, including opportunities for hunting, fishing, wildlife observation and photography, and environmental education and interpretation. We will review and update these CCPs at least every 15 years in accordance with the National Wildlife Refuge System Administration Act of 1966, as amended by the National Wildlife Refuge System Improvement Act of 1997, and the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4370d).

The major focus of the Refuge for the next 15 years will be building a refuge land base, programs, and staff primarily through partnerships and cooperative agreements with landowners and local non-government organizations. The Refuge's key biological focus will be conserving and enhancing remnant coastal wetlands and island habitats for the benefit of the migratory birds, especially diving waterfowl. A modest visitor services program is proposed on existing Refuge lands. Grassy Island is closed due to safety concerns and Mud and Calf Islands can only be reached using watercraft. However, public programs could expand if a shared visitor center is built adjacent to the Refuge's Humbug Marsh.
