Written comments should be received within 60 days of this notice.

Proposed Project

Collection of Assessment Information about the Centers for Disease Control and Prevention Publications—NEW—National Center for Health Marketing (NCHM), Centers for Disease Control and Prevention (CDC).

Background and Brief Description: As part of CDC's Future's Initiative, the National Center for Health Marketing was created to ensure that health information, interventions, and programs at CDC are based on sound science.

Numerous CDC-operated communication platforms targeting scientific, professional, and technical audiences have been developed in the past twenty years. The reach of many of these platforms has increased significantly in the past five years. In order to ensure future growth, it is

critical to obtain feedback from subscribers of these platforms to understand who uses them, how they use them, how satisfied they are with the platforms, and solicit suggestions on ways to improve each platform to bolster satisfaction. The data collected from this effort will allow us to answer critical operating questions, including:

- Which audiences (*e.g.*, doctors, local health officials, researchers, *etc.*) receive their information from which CDC platforms?
- How often and with what purpose do they access CDC platforms?
- How satisfied are subscribers of the platforms with the content and delivery of information?
- Are there ways to enhance the platforms for the subscriber through improvements to current offerings or through new products/services?

- Who are our most critical target audiences, *i.e.*, what are our publication and dissemination priorities in service to our health impact goals?

The purpose of this project is to evaluate the content, processes, and channels through which CDC communicates scientific information to partners and customers to ensure that health impact is maximized through the delivery of timely, effective, and credible information, which will result in optimal benefit for public health. The evaluation will help to ensure that these platforms meet subscriber and partner priorities, build CDC's brand, and contribute to health impact goals. Feedback from the subscriber base is necessary to fully evaluate the performance of CDC's platforms.

At this time, the scope of this project is limited to five communication platforms owned and managed by CDC which transmits information primarily intended for scientific and professional audiences. However, future plans include adding additional publications as needed. The initial five communications platforms are: Emerging Infections Journal, MMWR, Epi-X, Preventing Chronic Diseases Journal, and Health Alert Network. We want to ensure that the timeliness, effectiveness, and credibility of this communication maximizes the health impact of that information, resulting in optimum benefit for public health. These channels include both print and electronic versions of the five platforms. There is no cost to respondents other than their time.

ESTIMATES OF ANNUALIZED BURDEN HOURS

Form	Respondents	Responses per respondent	Hrs/response (in hrs)	Total burden hours
MMWR	30,000	1	20/60	10,000
EID	12,750	1	20/60	4,250
PCD	10,500	1	20/60	3,500

SUPPLEMENTARY INFORMATION:

Discussion of Notice

This notice announces the stand-up of Sector Charleston and MSU Savannah. Upon creation of Sector Charleston, Group Charleston, Base Charleston and MSO Charleston's OPFAC will be cancelled. MSO Savannah will be renamed MSU Savannah and will report directly to the Sector Charleston Commander. Sector Charleston will be composed of a Response Department, Prevention Department, and Logistics Department. All existing missions and

functions performed by Group Charleston, Base Charleston, MSO Charleston and MSO Savannah are realigned under this new organizational structure as of May 13, 2005.

Sector Charleston is responsible for all Coast Guard missions in the Charleston Marine Inspection Zone, COTP zone, and Area of Responsibility (AOR). The Commanding Officer of MSU Savannah shall only be responsible for all COTP and OCMI functions within the Savannah COTP sub-zone and marine inspection sub-zone. The overall Sector Charleston AOR includes the Charleston marine inspection zone and COTP zone and the Savannah marine inspection sub-zone and Savannah COTP sub-zone. A continuity of operations order has been issued to address existing COTP regulations, orders, directives and policies.

The boundary of the Charleston marine inspection zone and COTP zone starts at the sea at the intersection of the North and South Carolina boundary; thence proceeds westerly along the North and South Carolina boundary to the intersection of the North Carolina, South Carolina and Georgia boundaries; thence southerly along the South
