**History**

On December 15, 2005, a final rule for Airspace Docket No. 05-ASW-2 was published in the **Federal Register** (70 FR 74197). This rule established three RNAV routes (Q-20, Q-22, and Q-24) over the Southwestern and South Central United States. In the description for Q-20, the latitude for the HONDS fix was inadvertently listed as lat. 33°33'60" N. rather than lat. 33°34'00" N. This action corrects that error.

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**SUPPLEMENTARY INFORMATION:**

**Background**

On August 8, 2005, the FAA published in the **Federal Register** a

notice of proposed rulemaking to modify the Orlando International Airport, FL, Class B airspace area, establish the Orlando Sanford International Airport Class C airspace, and revoke the existing Sanford Airport Class D airspace (70 FR 45599). The FAA proposed to realign the MCO Class B airspace area (within the existing lateral boundaries) due to the commissioning of runway 17L/35R; to ensure that MCO arrivals and departures are retained within Class B airspace; and adjust the configuration of the Class B airspace area to accommodate the Orlando Sanford International Airport Class C airspace area. The FAA proposed to establish the SFB Class C airspace area to enhance safety and improve the management of air traffic in the terminal area.

Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal. In response to the NPRM, the FAA received 20 written comments. Many of the commenters identified themselves as pilots who operate
