

### III. Issues for EPA and stakeholders

In general, EPA is requesting comments on the following issues: (1) The scope and purpose of a voluntary pilot program for nanoscale materials that are existing chemical substances, (2) kinds of information that are relevant to the evaluation of potential risks from exposure to nanoscale materials, (3) chemical characterization and nomenclature of nanoscale materials for regulatory purposes, and (4) identification of interested stakeholders. Comments in these specific areas will be particularly helpful:

- Feasibility and value of a voluntary pilot program.
- Scope and design of a voluntary pilot program, including elements such as: purpose (e.g., R & D, use involving environmental release, any commercial use), administration, outcomes, duration, and next steps.
- Information that would be useful in the evaluation of potential effects on human health and the environment from exposure to nanoscale materials.
  - Size, dimensions, and shapes of chemical substances that should be considered nanoscale materials.
  - Types of information (e.g., unique and novel properties) that would be useful to provide for purposes of: informing the voluntary pilot program; and helping to name and characterize nanoscale materials (including features to distinguish them from otherwise similar chemical substances that do not involve nanoscale structures).
  - Manufacturing processes for nanoscale materials and how they relate to identities of the products from the nanoscale manufacturing processes.
  - Identification of interested stakeholders.
