SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of § 104(c)(6) of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216). Section 104(c)(6) provides for photography for educational or commercial purposes involving non-endangered and non-threatened marine mammals in the wild. NMFS is currently working on proposed regulations to implement this provision. However, in the meantime, NMFS has received and is processing this request as a "pilot" application for Level B Harassment of non-listed marine mammals for educational purposes.

The purpose of the proposed project is to film several species of non-listed marine mammals for a multimedia educational outreach package called Sea of Sound. The objective of this project is to teach classrooms and homes around the world about the richness and importance of undersea sound. The closeness of filming would be considered Level B harassment and therefore would require a permit under the MMPA. The photographers intend to attempt to document marine mammal movement and aggregation under varying conditions. Sea of Sound would be produced using high definition (HD) video and surround sound. The HD video system would be self contained and diver operated. The passive audio system would be deployed using a hydrophone array on short cables or in a self contained unit that is diver operated. The action area would include National Marine Sanctuaries throughout the United States. The Permit would expire five years after the date of issuance.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial

determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Needs and Uses: The USPTO developed the Patent Customer Transactional Survey to obtain additional data concerning customer satisfaction in three key areas: the legal positions of the examiners, the search functions of the various Automated Information Systems, and problem resolution at the USPTO. During previous surveys, the USPTO determined that these areas are key drivers of overall customer satisfaction. The USPTO developed this survey to fulfill a key quality initiative in the USPTO's 21st Century Strategic Plan and to gather feedback from the applicant about their satisfaction with how the agency prosecuted their patent application. The USPTO plans to use this data in the development of efficient and cost-effective customer satisfaction improvement strategies and in reporting the agency's performance standards. This voluntary survey is primarily a mail survey, although respondents will be able to respond through the Internet using a web-based version of this survey.
