

*Alternative 4—Ocean Disposal/Minimal Port Development*

Disposal at Berth 243–245 (8 acres), Consolidated Slip Cap (20 acres), Cabrillo Shallow Water Habitat Expansion (35 acres) and/or Cabrillo Shallow Water Habitat Island (15 acres); Ocean Disposal at LA–2 or LA–3 (remaining material).

*Alternative 5—No Action*

Complete the current project to the extent possible utilizing the disposal capacity and sites previously authorized.

**4. Scoping Process**

a. Potential impacts associated with the proposed action will be fully evaluated. Resource categories that will be analyzed are: Biology, air quality, hydrology/water quality, cultural resources, land use, geology, recreational, aesthetics, ground and vessel transportation, noise, public health and safety, utilities, socioeconomics (environmental justice), and cumulative impacts.

The USACE and the Port of Los Angeles (POLA) are preparing a joint SEIS/SEIR to address potential impacts associated with the proposed project. The USACE is the Lead Federal Agency for compliance with NEPA for the project, and the POLA is the Lead State Agency for compliance with CEQA for the non-Federal aspects of the project.

b. Participation of affected Federal, State, and local resources agencies, and concerned interest groups/individuals are encouraged in the scoping process. Public participation will be especially important in the environmental analysis by providing assistance in defining the scope of analysis in the SEIS/SEIR; identifying significant environmental issues and impact analysis in the SEIS/SEIR; and providing useful information such as published and unpublished data, personal knowledge of relevant issues, and recommending mitigation measures associated with the proposed action. Those wishing to provide information or data relevant to the environmental or social impacts that should be included or considered in the environmental analysis can furnish this information by writing to the point of contact indicated above.

c. The Draft SEIS/SEIR (DSEIS/SEIR) document will incorporate public concerns in the analysis of impacts associated with the Proposed Action and associated project alternatives. The DSEIS/SEIR will be sent out for a 45-day public review period, during which time both written and verbal comments will be solicited on the adequacy of the

document. The Final SEIS/SEIR (FSEIS/SEIR) will address the comments received on the DSEIS/SEIR. In compliance with NEPA, the FSEIS will be sent out for a 30-day public review period. Copies of the FSEIS/SEIR will be furnished to all who commented on the DSEIS/SEIR, and to anyone that requests a copy. The final step involves, for the federal SEIS, preparing a ROD and, for the state SEIR, certifying the SEIR and adopting a Mitigation Monitoring and Reporting Plan. The ROD is a concise summary of the decisions made by the USACE from among the alternatives presented in the FSEIS/SEIR. A certified SEIR indicates that the environmental document adequately assesses the environmental impacts of the proposed projects with respects to CEQA. Any required permit would be issued concurrently or soon after the issuance of the ROD.
