

areas named below. The recurring survey form is identified as the BC-170A. The form for special censuses is identified as the BC-170B, and the form for decennial pretests as the BC-170D. The variation of forms by operation, is to collect specific data needed based on the nature of the operation. The major area of difference relates to the collection of work history. A cover sheet will be attached to each respective BC-170 to provide applicants with a brief description of their prospective job duties with the Census Bureau; the cover sheet message will vary for decennial, special censuses, or recurring survey positions.

Affected Public: Individuals.

Frequency: One-time.

Respondent's Obligation: Required to obtain benefits.

Legal Authority: Title 13 U.S.C., Section 23 a and c.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau produces statistics used to monitor activity in the large and dynamic construction industry. These statistics help state and local governments and the Federal Government, as well as private industry, to analyze this important sector of the economy. The accuracy of the Census Bureau statistics regarding the amount of construction authorized depends on data supplied by building and zoning officials throughout the country.

The Census Bureau uses the Survey of Building and Zoning Permit Systems to obtain information from state and local building permit officials needed for updating the universe of permit-issuing places. The questions pertain to the legal requirements for issuing building or zoning permits in the local jurisdictions. Information is obtained on such items as geographic coverage and types of construction for which permits are issued.

The universe of permit-issuing places is the sampling frame for the Building Permits Survey (BPS) and the Survey of Construction (SOC). These two sample surveys provide widely used measures of construction activity, including the economic indicators, Housing Units Authorized by Building Permits and Housing Starts.

We plan to change the format of the form and add a question asking how many new residential housing unit permits were issued in the prior calendar year.

II. Method of Collection

The form is sent to a jurisdiction when the Census Bureau has reason to believe that a new permit system has been established or an existing one has changed, based on information from a

variety of sources including survey respondents, regional councils and the Census Bureau's Geography Division which keeps abreast of changes in corporate status. Responses typically approach 85 percent.
