

Commission [would] consider extending the waiver if it continues to be needed after that date.”

Entergy Services, on behalf of Entergy Operating Companies, seeks a two-week extension, through September 30, 2005, of the waiver of the requirement that Entergy record a log of each individual deviation from the standards of conduct associated with the information sharing and joint operations activities necessitated by the hurricane. It explains that due to the extreme flooding and damage caused by the hurricane in the City of New Orleans and the Amite-South area, it continues to experience emergency circumstances affecting system reliability, including a previously-unseen stability limit. These circumstances, according to Entergy, require detailed communication, coordination and joint operations among Entergy’s transmission and merchant units on virtually an hourly basis and the requirement to log each individual deviation would be an extremely burdensome task that would complicate Entergy’s restoration operation. Entergy proposes to limit the application of the waiver to deviations associated with information sharing and joint operations activities necessitated by Hurricane Katrina, but would not apply to deviations from standard OATT practices.

The Commission grants Entergy’s request for this limited waiver under these emergency circumstances.
