

Allowance Query Direct Download Instructions

Two allowance query quick reports -- Allowance Transactions by Day and Allowance Detail (Serial) Report -- may be queried by specifying the input parameters in the URL, rather than entering the parameters in the Data & Maps query tool.

Allowance Transactions by Day Report

The Allowance Transaction by Day Report displays allowance transaction data for the program and date range specified by the user. The data is refreshed nightly, and information on transactions recorded through the previous day is available.

The Allowance Transaction by Day Report requires the user to specify the program [Acid Rain Program (ARP), NO_x Budget Trading Program (NBP), Ozone Transport Commission trading program (OTC), CAIR SO₂ Annual Program (CAIRSO₂), CAIR NO_x Annual Program (CAIRNO_x), or CAIR NO_x Ozone Season (CAIROS)], start date, and end date. The user may specify representative(s) or account(s) to limit the results further by listing the last names or account numbers separated by a comma but no space.
