Section B

(continued)

B.1

e. Briefly summarize corrective actions taken and other improvements made as a result of your EMS assessments and compliance audits.

Attention and priority are given to correcting all regulatory non-compliance. J&J facilities strive for beyond compliance. Therefore, many issues identified in a facility's MAP are for continuous improvement.

f. Has your facility corrected all instances of potential non-compliance and EMS non-conformance identified during your audits and other assessments?

Yes No No such instances identified

If no, please explain your plans to correct these instances. A facility Management Action Plan (MAP) is developed/updated after every ISO (EMS), J&J Corporate, or self-assessment. The MAP identifies all the non-conformance issues, the corrective actions, person(s) responsible for each corrective action, and target dates for completing each corrective action. The facility's management board reviews the MAP on a regular basis. A MAP update is forwarded to J&J Corporate Environmental Affairs for review twice a year, once of which must contain the signature of the facility's business leader. Progress on corrective actions is monitored closely.

Instances of potential non-compliance and EMS non-conformances are corrected as soon as possible.

g. When was the last Senior Management review of your EMS completed? *mo/yr* A facility's MAP is reviewed by its management board and personally endorsed by its President at least once a year per J&J requirement.
