

---

## Section 23

# Transportation

---

This section presents data on civil air transportation, both passenger and cargo, and on water transportation, including inland waterways, oceanborne commerce, the merchant marine, cargo, and vessel tonnages.

This section also presents statistics on revenues, passenger and freight traffic volume, and employment in various revenue-producing modes of the transportation industry, including motor vehicles, trains, and pipelines. Data are also presented on highway mileage and finances, motor vehicle travel, accidents, and registrations; and characteristics of public transit, railroads, and pipelines.

Principal sources of air and water transportation data are the annual *National Transportation Statistics*, issued by the U.S. Bureau of Transportation Statistics; the *Annual Report* issued by the Air Transport Association of America, Washington, DC; and the annual *Waterborne Commerce of the United States* issued by the Corps of Engineers of the Department of the Army. In addition, the U.S. Census Bureau in its commodity flow survey (part of the census of transportation, taken every 5 years through 2002, for years ending in "2" and "7") provides data on the type, weight, and value of commodities shipped by manufacturing establishments in the United States, by means of transportation, origin, and destination. The latest reports for 2002 are part of the 2002 Economic Census. This census was conducted in accordance with the 2002 North American Industry Classification System (NAICS). See text, Section 15, Business Enterprise, for a discussion of the 2002 Economic Census and NAICS.

The principal compiler of data on public roads and on operation of motor vehicles is the U.S. Department of Transportation's (DOT) Federal Highway Administration (FHWA). These data appear in FHWA's annual *Highway Statistics* and other publications.

The U.S. National Highway Traffic Safety Administration issues data on traffic accident deaths and death rates in two annual reports: the *Fact Book* and the *Fatal Accident Reporting System Annual Report*. DOT's Federal Railroad Administration presents data on accidents involving railroads in its annual *Accident/Incident Bulletin*, and the *Rail-Highway Crossing Accident/Incident and Inventory Bulletin*.

Data are also presented in many nongovernment publications. Among them are the weekly and annual *Cars of Revenue Freight Loaded* and the annual *Yearbook of Railroad Facts*, both published by the Association of American Railroads, Washington, DC; *Transit Fact Book*, containing electric railway and motorbus statistics, published annually by the American Public Transit Association, Washington, DC; and *Injury Facts*, issued by the National Safety Council, Chicago, IL.

**Civil aviation**—Federal promotion and regulation of civil aviation have been carried out by the Federal Aviation Administration (FAA) and the Civil Aeronautics Board (CAB). The CAB promoted and regulated the civil air transportation industry within the United States and between the United States and foreign countries. The Board granted licenses to provide air transportation service, approved or disapproved proposed rates and fares, and approved or disapproved proposed agreements and corporate relationships involving air carriers. In December 1984, the CAB ceased to exist as an agency. Some of its functions were transferred to the DOT, as outlined below. The responsibility for investigation of aviation accidents resides with the National Transportation Safety Board.

The Office of the Secretary, DOT aviation activities include: negotiation of international air transportation rights, selection of U.S. air carriers to serve capacity-controlled international markets, oversight of international rates and fares,

maintenance of essential air service to small communities, and consumer affairs. DOT's Bureau of Transportation Statistics (BTS) handles aviation information functions formerly assigned to CAB. Prior to BTS, the Research and Special Programs Administration handled these functions.

The principal activities of the FAA include: the promotion of air safety; controlling the use of navigable airspace; prescribing regulations dealing with the competency of airmen, airworthiness of aircraft and air traffic control; operation of air route traffic control centers, airport traffic control towers, and flight service stations; the design, construction, maintenance, and inspection of navigation, traffic control, and communications equipment; and the development of general aviation.

The CAB published monthly and quarterly financial and traffic statistical data for the certificated route air carriers. BTS continues these publications, including both certificated and noncertificated (commuter) air carriers. The FAA annually publishes data on the use of airway facilities; data related to the location of airmen, aircraft, and airports; the volume of activity in the field of nonair carrier (general aviation) flying; and aircraft production and registration.

General aviation comprises all civil flying (including such commercial operations as small demand air taxis, agriculture application, powerline patrol, etc.) but excludes certificated route air carriers, supplemental operators, large-aircraft commercial operators, and commuter airlines.

**Air carriers and service**—The CAB previously issued "certificates of public convenience and necessity" under Section 401 of the Federal Aviation Act of 1958 for scheduled and nonscheduled (charter) passenger services and cargo services. It also issued certificates under Section 418 of the Act to cargo air carriers for domestic all-cargo service only. The DOT Office of the Secretary now issues the certificates under a "fit, willing, and able" test of air carrier operations. Carriers operating only a 60-seat-or-less aircraft are given exemption authority to carry passengers, cargo, and mail in scheduled and

nonscheduled service under Part 298 of the DOT (formerly CAB) regulations. Exemption authority carriers who offer scheduled passenger service to an essential air service point must meet the "fit, willing, and able" test.

**Vessel shipments, entrances, and clearances**—Shipments by dry cargo vessels comprise shipments on all types of watercraft, except tanker vessels; shipments by tanker vessels comprise all types of cargo, liquid and dry, carried by tanker vessels.

A vessel is reported as entered only at the first port which it enters in the United States, whether or not cargo is unloaded at that port. A vessel is reported as cleared only at the last port at which clearance is made to a foreign port, whether or not it takes on cargo. Army and Navy vessels entering or clearing without commercial cargo are not included in the figures.

**Units of measurement**—Cargo (or freight) tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. However, shipping weight excludes lift and cargo vans and similar substantial outer containers. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. Substantially, it represents space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Deadweight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is, therefore, the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

**Federal-aid highway systems**—The Intermodal Surface Transportation Efficiency Act (ISTEA) of 1991 eliminated the

historical Federal-Aid Highway Systems and created the National Highway System (NHS) and other federal-aid highway categories. The final NHS was approved by Congress in December of 1995 under the National Highway System Designation Act.

**Functional systems**—Roads and streets are assigned to groups according to the character of service intended. The functional systems are (1) arterial highways that generally handle the long trips, (2) collector facilities that collect and disperse traffic between the arterials and the lower systems, and (3) local roads and streets that primarily serve direct access to residential areas, farms, and other local areas.

**Regulatory bodies**—The Interstate Commerce Commission (ICC), created by the U.S. Congress to regulate transportation in interstate commerce, has jurisdiction over railroads, trucking companies, bus lines, freight forwarders, water carriers, coal slurry pipelines, and transportation brokers. The Federal Energy Regulatory Commission is responsible for setting rates and charges for transportation and sale of natural gas and for establishing rates or charges for transportation.

**Motor carriers**—For 1960–73, Class I for-hire motor carriers of freight were classified by the ICC as those with \$1 million or more of gross annual operating revenue; 1974–79, the class minimum was \$3 million. Effective January 1, 1980, Class I carriers are those with \$5 million or more in revenue. For 1960–68, Class I motor carriers of passengers were classified by the ICC as those with \$200,000 or more of gross annual operating revenue; for 1969–76, as those with revenues of \$1 million or more; and since 1977, as those with \$3 million or more. Effective January 1, 1988, Class I motor carriers of passengers are those with \$5 million or more in operating revenues; Class II less than \$5 million in operating revenues.

**Railroads**—Railroad companies reporting to the ICC are divided into specific groups as follows: (1) regular line-haul (interstate) railroads (and their nonoperating subsidiaries), (2) switching and terminal railroads, (3) private railroads prior to

1964 (identified by ICC as “circular” because they reported on brief circulars), and (4) unofficial railroads, so designated when their reports are received too late for tabulation. For the most part, the last three groups are not included in the statistics shown here.

For years prior to 1978, Class I railroads were those with annual revenues of \$1 million or more for 1950–55; \$3 million or more for 1956–64; \$5 million or more for 1965–75; and \$10 million or more for 1976–77. In 1978, the classification became Class I, those having more than \$50 million gross annual operating revenue; Class II, from \$10 million to \$50 million; and Class III, less than \$10 million. Effective January 1, 1982, the ICC adopted a procedure to adjust the threshold for inflation by restating current revenues in constant 1978 dollars. In 1988, the criteria for Class I and Class II railroads were \$92.0 million and \$18.4 million, respectively. Also effective January 1, 1982, the ICC adopted a Carrier Classification Index Survey Form for carriers not filing annual report Form R-1 with the commission. Class II and Class III railroads are currently exempted from filing any financial report with the Commission. The form is used for reclassifying carriers.

The Surface Transportation Board (STB) was established pursuant to the ICC Termination Act of 1995, Pub. L. No. 104-88, 109 Stat. 803 (1995) (ICCTA), to assume certain of the regulatory functions that had been administered by the ICC. The Board has broad economic regulatory oversight of railroads, addressing such matters as rate reasonableness, car service and interchange, mergers and line acquisitions, line construction, and line abandonments (49 U.S.C. 10101-11908). Other ICC regulatory functions were either eliminated or transferred to the Federal Highway Administration or the Bureau of Transportation Statistics within DOT.

Class I Railroads are regulated by the STB and subject to the Uniform System of Accounts and required to file annual and periodic reports. Railroads are classified based on their annual operating revenues. The class to which a carrier belongs is determined by comparing its adjusted

operating revenues for 3 consecutive years to the following scale: Class I, \$250 million or more; Class II, \$20 million to \$250 million; and Class III, \$0 to \$20 million.

**Postal Service**—The U.S. Postal Service provides mail processing and delivery services within the United States. The Postal Reorganization Act of 1970 created the Postal Service, effective July 1971, as an independent establishment of the Federal Executive Branch.

Revenue and cost analysis describes the Postal Service's system of attributing revenues and costs to classes of mail and service. This system draws primarily upon probability sampling techniques to develop estimates of revenues, volumes, and weights, as well as costs by class of

mail and special service. The costs attributed to classes of mail and special services are primarily incremental costs which vary in response to changes in volume; they account for roughly 60 percent of the total costs of the Postal Service. The balance represents “institutional costs.” Statistics on revenues, volume of mail, and distribution of expenditures are presented in the Postal Service's annual report, *Cost and Revenue Analysis*, and its *Annual Report of the Postmaster General* and its annual *Comprehensive Statement on Postal Operations*.

**Statistical reliability**—For a discussion of statistical collection and estimation, sampling procedures, and measures of statistical reliability applicable to Census Bureau data, see Appendix III.

**Table 1032. Transportation-Related Components of U.S. Gross Domestic Product: 2000 to 2005**

[In billions of dollars (1,089.5 represents \$1,089,500,000,000), except percent]

<sup>1</sup> NA Not available. <sup>2</sup> Less than 50. <sup>3</sup> Data on deaths are from U.S. National Highway Traffic Safety Administration and are based on deaths within 30 days of the accident. Includes only police reported crashes. For more details, see Table 1079. Accidents which result in damages to railroad property. Grade crossing accidents are also included when classified as a train accident. Deaths exclude fatalities in railroad/highway grade crossing accidents. Reporting criteria and source of data changed between 1988 and 1990; these data from 1990 to present are not comparable to earlier years. <sup>4</sup> See footnote 1, Table 1045. Injuries classified as serious. <sup>5</sup> See footnote 2, Table 1045. Injuries classified as serious. <sup>6</sup> See footnote 3, Table 1045. Injuries classified as serious. <sup>7</sup> See footnote 4, Table 1045. Injuries classified as serious. <sup>8</sup> Covers accidents involving commercial vessels which must be reported to U.S. Coast Guard if there is property damage exceeding \$25,000; material damage affecting the seaworthiness or efficiency of a vessel; stranding or grounding; loss of life; or injury causing a person's incapacity for more than 3 days. <sup>9</sup> Beginning in 1985, pipeline accidents/incidents are credited to year of occurrence; prior data are credited to the year filed. <sup>10</sup> Other transit includes bus, light rail, commuter rail, van pool, and automated guideway. Excludes cable car, inclined plane, jitney, and ferry boat. <sup>11</sup> Incidents, deaths, and injuries involving hazardous materials cover all types of transport, excludes pipelines and bulk, nonpackaged water incidents.

— Represents zero. <sup>1</sup> U.S. air carriers operating under 14 CFR 121. Beginning 2000, includes aircraft with 10 or more seats, previously operating under 14 CFR 135.<sup>2</sup> All scheduled service of U.S. air carriers operating under 14 CFR 135. Beginning 2000, only aircraft with fewer than 10 seats.<sup>3</sup> All nonscheduled service of U.S. air carriers operating under 14 CFR 135.<sup>4</sup> U.S. civil registered aircraft not operated under 14 CFR 121 or 135. Data from 2006 include 154 deaths aboard a foreign registered aircraft when it collided with a business general aviation aircraft over the Brazilian Amazon jungle. There were no fatalities in the general aviation aircraft.Source: U.S. National Transportation Safety Board, "Aviation Accident Statistics," Internet site <<http://www.ntsb.gov/aviation/stats.htm>> (accessed 11 July 2007).**Table 1046. U.S. Carrier Delays, Cancellations, and Diversions: 1995 to 2005**

[In thousands (5,327.4 represents 5,327,400). For calendar year. See headnote, table 1047]

Item	1995	1997	1998	1999	2000	2001	2002	2003	2004	2005
Total operations...	5,327.4	5,411.8	5,384.7	5,527.9	5,683.0	5,967.8	5,271.4	6,488.5	7,129.3	7,140.6
Delays:

Diversions <sup>4</sup>	10.5	12.1	13.2	13.6	14.3	12.9	8.4	11.4	13.8	14.0

<sup>1</sup> Late departures comprise flights departing 15 minutes or more after the scheduled departure time. <sup>2</sup> Late arrivals comprise flights arriving 15 minutes or more after the scheduled arrival time. <sup>3</sup> A cancelled flight is one that was not operated, but was listed in a carrier's computer reservation system within seven days of the scheduled departure. <sup>4</sup> A diverted flight is one that left from the scheduled departure airport but flew to a destination point other than the scheduled destination point.Source: U.S. Bureau of Transportation Statistics, *National Transportation Statistics*, annual. See also Internet site <[http://www.bts.gov/programs/airline\\_information/annual\\_airline\\_on\\_time\\_performance](http://www.bts.gov/programs/airline_information/annual_airline_on_time_performance)>.

**Table 1047. On-Time Flight Arrivals and Departures at Major U.S. Airports: 2006**

[In percent. Quarterly, based on gate arrival and departure times for domestic scheduled operations of U.S. major airlines. All U.S. airlines with 1 percent or more of total U.S. domestic scheduled airline passenger revenues are required to report on-time data. A flight is considered on time if it operated less than 15 minutes after the scheduled time shown in the carrier's computerized reservation system. See source for data on individual airlines]

## Table 1049. Commuter/Regional Airline Operations Summary: 2003 to 2006

[Calendar year data (112.6 represents 112,600,000). Commuter/regional airlines operate primarily aircraft of predominately 75 passengers or less and 18,000 pounds of payload capacity serving short haul and small community markets. Represents operations within all North America by U.S. Regional Carriers. Averages are means. For definition of mean, see Guide to Tabular Presentation.]

Item	Unit	2003	2004	2005	2006
Passenger carriers operating . . . . .	Number . . . . .	73	75	75	71
Passengers enplaned . . . . .	Millions . . . . .	112.6	134.1	154.2	155.7
Average passengers enplaned per carrier . . . . .	1,000 . . . . .	1,542.5	1,787.7	2,055.6	2,193.5

<sup>1</sup> Bridges are structurally deficient if they have been restricted to light vehicles, require immediate rehabilitation to remain open, or are closed. <sup>2</sup> Bridges are functionally obsolete if they have deck geometry, load carrying capacity, clearance or approach roadway alignment that no longer meet the criteria for the system of which the bridge is carrying a part.

**Table 1066. State Motor Vehicle Registrations, 1980 to 2005, and Licensed Drivers and Motorcycle Registrations by State: 2005**

[In thousands (155,796 represents 155,796,000). Motor vehicle registrations cover publicly, privately, and commercially owned vehicles. For uniformity, data have been adjusted to a calendar-year basis as registration years in states differ; figures represent net numbers where possible, excluding reregistrations and nonresident registrations. See also Table 1064]

State	Motor vehicle registrations <sup>1</sup>						2005		Motor- cycle registra- tion <sup>2</sup> 2005	Licensed drivers, 2005

**Table 1067. Roadway Congestion: 2003**

[15,919 represents 15,919,000. Various federal, state, and local information sources were used to develop the data base with the primary source being the Federal Highway Administration's Highway Performance Monitoring System. Areas shown are rated the top 73 in annual per-person hours of delay]

Urbanized area	Freeway daily vehicle miles of travel		Annual person hours of delay		Annual congestion cost		
	Total miles (1,000)	Per lane-mile of freeway	Total hours (1,000)	Per person	Per person (dol.)	Delay and fuel cost (mil. dol.)	Fuel wasted (gal. per person)

**Table 1068. Commuting to Work by State: 2005**

[In percent, except as indicated (133,091 represents 133,091,000). For workers 16 years old and over. The American Community Survey universe is limited to the household population and excludes the population living in institutions, college dormitories, and other group quarters. Based on a sample and subject to sampling variability; see Appendix III]

State	Total workers (1,000)	Percent of workers who—					Mean travel time to work (min.)	
		Commuted by car, truck, or van		Used public transportation <sup>1</sup>	Walked	Used other means <sup>2</sup>		
		Drove alone	Car-pooled					
U.S. ....	133,091	77.0	10.7	4.7	2.5	1.6	3.6

**Table 1073. Fatal Motor Vehicle Accidents—National Summary: 1990 to 2005**

[Based on data from the Fatality Analysis Reporting System (FARS). FARS gathers data on accidents that result in loss of human life. FARS is operated and maintained by National Highway Traffic Safety Administration's (NHTSA) National Center for Statistics and Analysis (NCSA). FARS data are gathered on motor vehicle accidents that occurred on a roadway customarily open to the public, resulting in the death of a person within 30 days of the accident. Collection of these data depend on the use of police, hospital, medical examiner/coroner, and Emergency Medical Services reports; State vehicle registration, driver licensing, and highway department files; and vital statistics documents and death certificates. See source for further detail.]

Item	1990	1995	2000	2001	2002	2003	2004	2005

**Table 1075. Vehicles Involved in Crashes by Vehicle Type, Rollover Occurrence, and Crash Severity: 2005**

[10,775.1 represents 10,775,100. Excludes motorcycles]

Vehicle type	Total		Rollover occurrence			
			Yes		No	
	Number (1,000)	Percent	Number (1,000)	Percent	Number (1,000)	Percent
<b>Vehicles involved in all crashes<sup>1</sup> . . . . .</b>						
Passenger cars . . . . .	10,755.1	100.0	279.9	2.6	10,475.2	97.4
Light trucks: <sup>2</sup>	6,087.2	100.0	108.7	1.8	5,978.6	98.2
Pickup . . . . .	1,652.6	100.0	60.7	3.7	1,592.0	96.3
Utility . . . . .	1,583.4	100.0	75.9	4.8	1,507.5	95.2
Van . . . . .	795.3	100.0	15.4	1.9	779.9	98.1
Other . . . . .	119.8	100.0	2.1	1.8	117.7	98.2
Large truck <sup>3</sup> . . . . .	441.5	100.0	14.2	3.2	427.4	96.8
Bus . . . . .	51.4	100.0	0.4	0.8	50.9	99.2
Other/unknown . . . . .	23.7	100.0	2.5	10.7	21.2	89.3
Fatal crashes . . . . .	54.7	100.0	11.5	21.1	43.2	78.9
Passenger cars . . . . .	25.0	100.0	4.1	16.4	20.9	83.6
Light trucks: <sup>2</sup>	10.9	100.0	2.9	26.7	8.0	73.3
Pickup . . . . .	8.1	100.0	2.9	35.4	5.3	64.6
Utility . . . . .	3.7	100.0	0.7	18.8	3.0	81.2
Van . . . . .	0.1	100.0	(Z)	21.3	0.1	78.8
Other . . . . .	4.9	100.0	0.7	13.6	4.3	86.4
Large truck <sup>3</sup> . . . . .	0.3	100.0	(Z)	2.5	0.3	97.5
Bus . . . . .	1.6	100.0	0.2	14.2	1.4	85.8

<sup>1</sup> Less than 50. <sup>2</sup> Includes injury and property-only crashes, not shown separately. <sup>3</sup> Trucks of 10,000 pounds gross vehicle weight rating or less, including pickups, vans, truck-based station wagons and utility vehicles. Trucks over 10,000 pounds gross vehicle weight rating.

[In dollars. Rates exclude Canada and Mexico]

Domestic mail date of rate change	Letters		Postcards	Express mail— first 1/2 pound	International air mail date of rate change	Letters— first ounce <sup>1</sup>	Post- cards			Aero grammes
	First ounce	Each added ounce								
1991 (Feb. 3) . . . . .	0.29	0.23	0.19	9.95	2001 (Jan. 7) . . . . .	0.80	0.70	0.70	0.70	
1995 (Jan. 1) . . . . .	0.32	0.23	0.20	10.75	2006 (Jan. 8) <sup>2</sup> . . . . .	0.84	0.75	0.75	0.75	
1999 (Jan. 10) . . . . .	0.33	0.22	0.20	11.75	2007 (May 14) <sup>2</sup> . . . . .	0.90	0.90	0.90	(*)	
2001 (Jan. 7) . . . . .	0.34	0.21	0.20	12.25						
2001 (July 1) . . . . .	0.34	0.23	0.21	12.45						
2002 (June 30) . . . . .	0.37	0.23	0.23	13.65						
2006 (Jan. 8) . . . . .	0.39	0.24	0.24	14.40						
2007 (May 14) . . . . .	0.41	0.17	0.26	16.25						

<sup>1</sup> The rates after the first ounce may differ depending on whether a country is primarily European; is in a rate group comprising Australia, New Zealand, and Japan; or is categorized "rest of the world." <sup>2</sup> On January 8, 2006, the process of converting the rates for Micronesia and the Marshall Islands from the domestic schedule to the international schedule was initiated. During the transition period, the rates to these two countries have increased and will continue to increase incrementally until they equal the international rate to the rest of the world. <sup>3</sup> Discontinued.
