

behind EPA's conclusion that the NYSDEC must reopen the permit to: (1) Upgrade existing monitoring relating to stack testing and stack emissions; (2) include both particulate matter emission limits (State and Federal) as applicable requirements of the incinerators; (3) require permittee to keep a log of the incinerators' operating hours; (4) incorporate calibration methods and frequencies for monitoring devices; (5) specify a test method and appropriate recordkeeping for the sludge sampling activity; (6) incorporate the average scrubber pressure drop from the most recent performance test; and (7) specify QA/QC requirements with respect to the continuous opacity monitors. The order also explains the reasons for denying NYPIRG's remaining claims.
