SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of Labor has delegated to the BLS the authority to collect, compile, and analyze statistical data on work-related injuries and illnesses. The Cooperative Agreement is designed to allow the BLS to ensure conformance with program objectives. The BLS has full authority over the financial operations of the statistical program. The BLS requires financial reporting that will produce the information that is needed to monitor the financial activities of the BLS Occupational Safety and Health Statistics grantees.

II. Desired Focus of Comments

The BLS is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

III. Current Action

Continued collection of grantee financial information is necessary to maintain an effective program of collection, compilation, and analysis of occupational safety and health statistics, as authorized by the Occupational Safety and Health Act of 1970 (Pub. L. 91-596). The burden estimates are based on actual experience of grantees completing the forms.

Public comments on the accuracy of the burden estimates, as well as suggestions for reducing the burden, are encouraged. Signatures that certify the authenticity of the information will continue to be required.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–335 and 50–389]

St. Lucie, Units 1 and 2, Florida Power and Light Company; Notice of Availability of the Final Supplement 11 to the Generic Environmental Impact Statement Regarding License Renewal for St. Lucie, Units 1 and 2

Notice is hereby given that the U.S. Nuclear Regulatory Commission (NRC) has published a final plant-specific Supplement 11 to the Generic Environmental Impact Statement (GEIS), NUREG–1437, regarding the renewal of operating licenses DPR–67 and NPF–16 for St. Lucie, Units 1 and 2 (St. Lucie), for an additional 20 years of operation. St. Lucie is owned and operated by Florida Power and Light Company (FPL), and is located on Hutchinson Island in St. Lucie County, Florida. Possible alternatives to the proposed action (license renewal) include no action and reasonable alternative energy sources.

It is stated in Section 9.3 of the report:

Based on (1) the analysis and findings in the GEIS (NRC 1996, 1999); (2) the Environmental Report submitted by FPL (FPL 2001b); (3) consultation with Federal, State, and local agencies; (4) the staff's own independent review; and (5) the staff's consideration of public comments, the recommendation of the staff is that the Commission determine that the adverse environmental impacts of license renewal for St. Lucie Units 1 and 2 are not so great that preserving the option of license renewal for energy planning decisionmakers would be unreasonable.

The final Supplement 11 to the GEIS is available electronically for public inspection in the NRC Public Document Room (PDR) located at One White Flint North, 11555 Rockville Pike (first floor), Rockville, Maryland, or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm.html> (the Public Electronic Reading Room). Persons who do not have access to ADAMS or who encounter problems in accessing the documents located in ADAMS, should contact the PDR

reference staff at 1–800–397–4209, 301–415–4737, or by e-mail to pdr@nrc.gov.

FOR FURTHER INFORMATION, CONTACT: Dr. Michael T. Masnik, License Renewal and Environmental Impacts Program, Division of Regulatory Improvement Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555. Dr. Masnik may be contacted at 301–415–1191 or by writing to: Dr. Michael T. Masnik, U.S. Nuclear Regulatory Commission, MS O–11F1, Washington, DC 20555.

Dated at Rockville, Maryland, this 19th day of May, 2003.
