

- Submission of an exploration plan within 8 years of lease issuance
- Economic incentives structured similar in form to those contained in the Proposed Notice of Sale for Beaufort Sea Sale 186 (68 FR 8306, February 20, 2003).

Incentives proposed for Beaufort Sea Sale 186 are:

- Royalty suspension volumes (RSV) for oil production (with possible consideration for gas)
- Subject to a price floor per barrel below which oil production that is royalty free does not count against the RSV
- Price ceiling per barrel above which production must bear full royalties

C. Relation to Coastal Management Plans. Comments also are sought on potential conflicts with approved local coastal management plans (CMP) that may result from the proposed sale and future OCS oil and gas activities. These comments should identify specific CMP policies of concern, the nature of the conflicts foreseen, and steps that MMS could take to avoid or mitigate the potential conflicts. Comments may be in terms of broad areas or restricted to particular blocks of concern. Commenters are requested to list block numbers or outline the subject area on the large-scale Call map.

5. Use of Information from Call

Information submitted in response to this Call will be used for several purposes. We will use responses to:

- Determine whether to proceed with a competitive oil and gas lease sale in Norton Basin
- Identify specific areas of interest for oil and/or gas exploration and development
- Identify environmental effects and potential use conflicts
- Assist in the public outreach for the environmental analysis
- Develop possible alternatives to the proposed action
- Develop lease terms and conditions and mitigating measures
- Identify potential conflicts between oil and gas activities and the Alaska CMP

6. Existing Information

An extensive environmental, social, and economic studies program has been underway in the Alaska OCS Region since 1976, including studies in this area. The emphasis has been on geologic mapping, environmental characterization of biologically sensitive habitats, endangered whales and marine mammals, physical oceanography, ocean-circulation modeling, and

ecological and socio-cultural effects of oil and gas activities.

The MMS has had one past sale in the Norton Basin area. In March 1983, Sale 57 was held and resulted in 59 leases being issued. There were six exploratory wells drilled, but all have been permanently plugged and abandoned. All 59 leases have since been relinquished or have expired. For the Norton Basin Planning Area, it is estimated that undiscovered conventionally recoverable resources are 0.05 billion barrels of oil and 2.71 trillion cubic feet of gas.

Information on the studies program, completed studies, and a program status report for continuing studies in this area may be obtained from the Chief, Environmental Studies Section, Alaska OCS Region, by telephone request at (907) 271-6577, or by written request at the address stated under Description of Area. A request may also be made via the Alaska Region Web site at akwebmaster@mms.gov.
