#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

NOAA proposes to collect census-level information on fishing vessel and gear characteristics in the Gulf of Mexico shrimp fishery (Exclusive Economic Zone only) to conduct economic analyses that will improve fishery management decision-making in that fishery; satisfy NOAA's legal mandates under Executive Order 12866, the Magnuson-Stevens Fishery Conservation and Management Act (U.S.C. 1801 *et seq.*), the Regulatory Flexibility Act, the Endangered Species Act, and the National Environmental Policy Act; and quantify achievement of the performance measures in the National Marine Fisheries Service Strategic Operating Plans. Used in conjunction with landings and price data already being collected in this fishery as part of the dealer reporting program, and economic data to be collected under a voluntary program (implementation of which is expected later this year), this data will be used to properly describe the fishery and its operations. The collected information will also help to assess how fishermen will be impacted by and respond to any regulation likely to be considered by fishery managers. In addition, this data will be used to determine how fishing communities will be impacted by proposed fishing regulations.

##### II. Method of Collection

The vessel and gear characterization form will be mailed to all vessel owners who either currently have or who apply for Gulf of Mexico federal shrimp permits. Vessel owners will be asked for information about the nature and extent of their operations in the Gulf shrimp fishery, as well the types of electronic equipment and gear they use to conduct this fishery. Submission of a completed

vessel and gear characterization form would be mandatory.
