notified via e-mail of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

m. AquaEnergy Group, Ltd. (AquaEnergy) has demonstrated that it has made an effort to contact all federal and state resources agencies, non-governmental organizations (NGO), and others affected by the project. AquaEnergy has also demonstrated that a consensus exists that the use of alternative procedures is appropriate in this case. AquaEnergy has submitted a communications protocol that is supported by the stakeholders.

The purpose of this notice is to invite any additional comments on the request to use the alternative procedures, pursuant to section 4.34(i) of the Commission's regulations. Additional notices seeking comments on the specific project proposal, interventions and protests, and recommended terms and conditions will be issued at a later date. AquaEnergy will complete and file a preliminary Environmental Assessment, in lieu of Exhibit E of the license application.

This differs from the traditional process, in which an applicant consults with agencies, Indian tribes, NGOs, and other parties during preparation of the license application and before filing the application, but the Commission staff performs the environmental review after the application is filed. The alternative procedures are intended to simplify and expedite the licensing process by combining the pre-filing consultation and environmental review processes into a single process, to facilitate greater participation, and to improve communication and cooperation among the participants.

AquaEnergy has met with Federal and State resources agencies, the U.S. Coast Guard, the Makah Tribal Council, and the public regarding the proposed project. It is expected that AquaEnergy will file 6-month progress reports during the alternative procedures process leading to the filing of a license application.

Magalie R. Salas,
Secretary.
