# Section 5

# Law Enforcement, Courts, and Prisons

This section presents data on crimes committed, victims of crimes, arrests, and data related to criminal violations and the criminal justice system. The major sources of these data are the Bureau of Justice Statistics (BIS), the Federal Bureau of Investigation (FBI), and the Administrative Office of the U.S. Courts. BJS issues many reports—see our Guide to Sources for a complete listing. The Federal Bureau of Investigation's major annual reports are Crime in the United States, Law Enforcement Officers Killed and Assaulted, annual, and Hate Crimes, annual, which present data on reported crimes as gathered from state and local law enforcement agencies.

Legal jurisdiction and law enforce**ment**—Law enforcement is, for the most part, a function of state and local officers and agencies. The U.S. Constitution reserves general police powers to the states. By act of Congress, federal offenses include only offenses against the U.S. government and against or by its employees while engaged in their official duties and offenses which involve the crossing of state lines or an interference with interstate commerce. Excluding the military, there are 52 separate criminal law jurisdictions in the United States: one in each of the 50 states, one in the District of Columbia, and the federal jurisdiction. Each of these has its own criminal law and procedure and its own law enforcement agencies. While the systems of law enforcement are quite similar among the states, there are often substantial differences in the penalties for like offenses.

Law enforcement can be divided into three parts: Investigation of crimes and arrests of persons suspected of committing them; prosecution of those charged with crime; and the punishment or treatment of persons convicted of crime.

**Crime**—The U.S. Department of Justice administers two statistical programs to measure the magnitude, nature, and

impact of crime in the nation: the Uniform Crime Reporting (UCR) Program and the National Crime Victimization Survey (NCVS). Each of these programs produces valuable information about aspects of the nation's crime problem. Because the UCR and NCVS programs are conducted for different purposes, use different methods. and focus on somewhat different aspects of crime, the information they produce together provides a more comprehensive panorama of the nation's crime problem than either could produce alone.

Uniform Crime Reports (UCR)—The FBI's UCR Program, which began in 1929, collects information on the following crimes reported to law enforcement authorities—Part 1 offenses: murder and nonnegligent manslaughter, forcible rape. robbery, aggravated assault, burglary, larceny-theft, motor vehicle theft, and arson. Law enforcement agencies report arrest data for 21 additional crime categories—Part 2 offenses: for UCR definitions of criminal offenses (including those listed), please go to: <www.fbi.gov /ucr/05cius/about/offense\_definitions.html>.

The UCR Program compiles data from monthly law enforcement reports or individual crime incident records transmitted directly to the FBI or to centralized state agencies that then report to the FBI. The Program thoroughly examines each report it receives for reasonableness, accuracy, and deviations that may indicate errors. Large variations in crime levels may indicate modified records procedures, incomplete reporting, or changes in a jurisdiction's boundaries. To identify any unusual fluctuations in an agency's crime counts, the Program compares monthly reports to previous submissions of the agency and with those for similar agencies.

The UCR Program presents crime counts for the nation as a whole, as well as for regions, states, counties, cities, towns, tribal law enforcement, and colleges and universities. This permits studies among neighboring jurisdictions and among those with similar populations and other common characteristics.

The UCR Program annually publishes its findings in a preliminary release in the spring of the following calendar year, followed by a detailed annual report, Crime in the United States, issued in the fall. In addition to crime counts and trends, this report includes data on crimes cleared, persons arrested (age, sex, and race), law enforcement personnel (including the number of sworn officers killed or assaulted), and the characteristics of homicides (including age, sex, and race of victims and offenders; victim-offender relationships; weapons used; and circumstances surrounding the homicides). Other periodic reports are also available from the UCR Program.

National Crime Victimization Survey (NCVS)—A second perspective on crime is provided by this survey of the BJS. Details about the crimes come directly from the victims 12 years and older. No attempt is made to validate the information against police records or any other source.

The NCVS measures rape/sexual assault, robbery, assault, pocket-picking, purse snatching, burglary, and motor vehicle theft. The NCVS includes crimes reported to the police, as well as those not reported.

Police reporting rates (percent of victimizations) varied by type of crime. In 2005, for instance, 38 percent of rapes/sexual assaults were reported; 52 percent of robberies; 47 percent of assaults; 32 percent of personal thefts; 35 percent of pocket-pickings/purse snatchings; 56 percent of household burglaries; and 83 percent of motor vehicle thefts.

Murder and kidnaping are not covered. Commercial burglary and robbery were dropped from the program during 1977. The so-called victimless crimes, such as drunkenness, drug abuse, and prostitution, also are excluded, as are crimes for which it is difficult to identify knowledgeable respondents or to locate data records.

Crimes of which the victim may not be aware also cannot be measured effectively. Buying stolen property may fall into this category, as may some instances of embezzlement. Attempted crimes of many types probably are under recorded for this reason. Events in which the victim has shown a willingness to participate in illegal activity also are excluded.

In any encounter involving a personal crime, more than one criminal act can be committed against an individual. For example, a rape may be associated with a robbery, or a household offense, such as a burglary, can escalate into something more serious in the event of a personal confrontation. In classifying the surveymeasured crimes, each criminal incident has been counted only once—by the most serious act that took place during the incident and ranked in accordance with the seriousness classification system used by the FBI. The order of seriousness for crimes against persons is as follows: rape, robbery, assault, and larceny. Personal crimes take precedence over household offenses.

A victimization, basic measure of the occurrence of crime, is a specific criminal act as it affects a single victim. The number of victimizations is determined by the number of victims of such acts. Victimization counts serve as key elements in computing rates of victimization. For crimes against persons, the rates are based on the total number of individuals age 12 and over or on a portion of that population sharing a particular characteristic or set of traits. As general indicators of the danger of having been victimized during the reference period, the rates are not sufficiently refined to represent true measures of risk for specific individuals or households.

An *incident* is a specific criminal act involving one or more victims; therefore the number of incidents of personal crimes is lower than that of victimizations.

**Courts**—Statistics on criminal offenses and the outcome of prosecutions are incomplete for the country as a whole, although data are available for many states individually.

Since 1982, through its National Judicial Reporting Program, the BJS has surveyed a nationally representative sample of 300 counties every 2 years and collected detailed information on demographic characteristics of felons, conviction offenses, type of sentences, sentence lengths, and time from arrest to conviction and sentencing.

The bulk of civil and criminal litigation in the country is commenced and determined in the various state courts. Only when the U.S. Constitution and acts of Congress specifically confer jurisdiction upon the federal courts may civil or criminal litigation be heard and decided by them. Generally, the federal courts have jurisdiction over the following types of cases: suits or proceedings by or against the United States; civil actions between private parties arising under the Constitution, laws, or treaties of the United States; civil actions between private litigants who are citizens of different states; civil cases involving admiralty, maritime, or private jurisdiction; and all matters in bankruptcv.

There are several types of courts with varying degrees of legal jurisdiction. These jurisdictions include original, appellate, general, and limited or special. A court of original jurisdiction is one having the authority initially to try a case and pass judgment on the law and the facts; a court of appellate jurisdiction is one with the legal authority to review cases and hear appeals; a court of general jurisdiction is a trial court of unlimited original jurisdiction in civil and/or criminal cases, also called a "major trial court"; a court of limited or special jurisdiction is a trial court with legal authority over only a particular class of cases, such as probate, juvenile, or traffic cases.

The 94 federal courts of original jurisdiction are known as the U.S. district courts. One or more of these courts is established in every state and one each in the District of Columbia, Puerto Rico, the Virgin Islands, the Northern Mariana Islands, and Guam. Appeals from the district

courts are taken to intermediate appellate courts of which there are 13, known as U.S. courts of appeals and the United States Court of Appeals for the Federal Circuit. The Supreme Court of the United States is the final and highest appellate court in the federal system of courts.

Juvenile offenders—For statistical purposes, the FBI and most states classify as juvenile offenders persons under the age of 18 years who have committed a crime or crimes.

Delinquency cases are all cases of youths referred to a juvenile court for violation of a law or ordinance or for seriously "antisocial" conduct. Several types of facilities are available for those adjudicated delinquents, ranging from the short-term physically unrestricted environment to the long-term very restrictive atmosphere.

**Prisoners and jail inmates**—BJS started to collect annual data in 1979 on prisoners in federal and state prisons and reformatories. Adults convicted of criminal activity may be given a prison or jail sentence. A prison is a confinement facility having custodial authority over adults sentenced to confinement of more than 1 year. A jail is a facility, usually operated by a local law enforcement agency, holding persons detained pending adjudication and/or persons committed after adjudication to 1 year or less.

Data on inmates in local jails were collected by the BJS for the first time in 1970. Since then, BJS has conducted censuses of facilities and inmates every 5 to 6 years. In 1984, BJS initiated an annual survey of jails conducted in noncensus years.

Statistical reliability—For discussion of statistical collection, estimation and sampling procedures, and measures of statistical reliability pertaining to the National Crime Victimization Survey and Uniform Crime Reporting Program, see Appendix Ш.

# Table 299. Crimes and Crime Rates by Type of Offense: 1980 to 2005

[(1,345 represents 1,345,000). Data include offenses actually reported to law enforcement and also offense estimations for nonreporting and partially reporting agencies within each state. Rates are based on Census Bureau estimated resident populations of July 1; 1980, 1990, and 2000 enumerated as of April 1. See source for details. For definitions of types of crimes, go to <a href="http://www.fbi.gov/ucr/05cius/about/offense\_definitions.html">http://www.fbi.gov/ucr/05cius/about/offense\_definitions.html</a>

<sup>&</sup>lt;sup>1</sup> Includes races not shown separately. <sup>2</sup> Rate based on enumerated population figures as of April 1 for 1980, 1990, and 2000; estimated resident population as of July 1 for other years. <sup>3</sup> Effective with data for 1999, causes of death are classified by The Tenth Revision International Classification of Diseases (ICD-10), replacing the Ninth Revision (ICD-9) used for 1979–98 data. Breaks in the comparability of some cause-of-death statistics result from changes in category titles, changes in the structure and content of the classification, and changes in coding rules used to select the underlying cause of death. In ICD-9, the category Homicide also inludes death as a result of legal intervention. ICD-10 has two separate categories for these two causes of death. Some caution should be used in comparing data between 1998 and 1999.

# Table 310. Hate Crimes—Number of Incidents, Offenses, Victims, and Known Offenders by Bias Motivation: 2000 to 2005

[The FBI collected statistics on hate crimes from 12,417 law enforcement agencies representing over 245 million inhabitants in 2005. Hate crime offenses cover incidents motivated by race, religion, sexual orientation, ethnicity/national origin, and disability]

Bias motivation	Incidents reported	Offenses	Victims <sup>1</sup>	Known offenders <sup>2</sup>
2000, Total	8,213 7,529 7,679	9,619 8,773 9,065	10,117 9,164 9,561	7,690 6,979 7,175
2005, Total	7,163	8,380	8,804	6,804
Race, total Anti-White Anti-Black Anti-American Indian/Alaska native. Anti-Asian/Pacific Islander Anti-multiracial group	<b>3,919</b> 828 2,630 79 199 183	<b>4,691</b> 935 3,200 95 231 230	<b>4,895</b> 975 3,322 97 240 261	3,913 963 2,581 73 163 133
Ethnicity/national origin, total	<b>944</b> 522 422	<b>1,144</b> 660 484	<b>1,228</b> 722 506	<b>1,115</b> 691 424
Religion, total.  Anti-Jewish Anti-Catholic Anti-Protestant Anti-Islamic Anti-other religious group Anti-multireligious group Anti-mtheism/agnosticism/etc.	1,227 848 58 57 128 93 39 4	1,314 900 61 58 146 102 42 5	1,405 977 61 58 151 106 47	<b>580</b> 364 22 32 89 54 18
Sexual orientation, total Anti-male homosexual Anti-female homosexual Anti-homosexual Anti-heterosexual Anti-bisexual	1,017 621 155 195 21 25	1,171 713 180 228 23 27	1,213 743 186 233 23 28	<b>1,138</b> 715 146 237 18 22
Disability, total Anti-physical Anti-mental	<b>53</b> 21 32	<b>53</b> 21 32	<b>54</b> 21 33	<b>54</b> 21 33
Multiple bias 3	3	7	9	4

<sup>&</sup>lt;sup>1</sup> The term "victim" may refer to a person, business, institution, or a society as a whole. <sup>2</sup> The term "known offender" does not imply that the identity of the suspect is known, but only that an attribute of the suspect is identified which distinguishes him/her from an unknown offender. <sup>3</sup> In a "multiple-bias incident" two conditions must be met: more than one offense type must occur in the incident and at least two offense types must be motivated by different biases.

NA Not available. – Represents zero. 

An aggravated assault is any assault in which an offender possesses or uses a weapon or inflicts serious injury. 

Excludes "don't know" relationships. 

Excludes "not known and not available" time of day. 

Includes areas on public transportation or inside station, in apartment yard, park, field, playground, or other areas. 

Excludes "don't know" and "not available" victim activity. 

Includes sheeping. 

Excludes "don't know" and "not available" distance from victim's home. 

Includes knives, other sharp objects, blunt objects, and other types of weapons.

# Table 318. Persons Arrested by Charge and Selected Characteristics: 2005

[In thousands (10,369.8 represents 10,369,800). Represents arrests (not charges) reported by approximately 10,970 agencies with a total 2005 population of approximately 218 million as estimated by FBI. Age and sex data are mandatory, while race data are optional and not always reported with arrest data; hence, two different total number of arrests. See source for details. For definitions of crimes, go to <a href="http://www.fbi.gov/ucr/05cius/about/offensedefinitions.html">http://www.fbi.gov/ucr/05cius/about/offensedefinitions.html</a>]

Starting in 1999, and through the current year of data, nonviolent sex offenses were reclassified from "Violent offenses" to "Public-order offenses."
Data for 1998 through 2002 are not directly comparable to 2003 and 2004 because of changes in the Trubilc-order otherises. Data for 1996 trifugin 2002 are not intensity comparative to 2004 and 2004 because of intensity of a data processing methodology. See note 2 on page 24, chapter 1 of the 2004 Compendium of Federal Justice Statistics. Includes suspects whose offense category could not be determined. In this table "Violent offenses" may include nonnegligent manslaughter. Fradulent property excludes tax fraud. Excludes fraudulent property and includes destruction of property and trespassing. Beginning in 2001, "Weapon" and "Immigration" offenses became major offense categories. Previously, theses offenses were classified within "Public-order offenses."

#### Table 333. Delinquency Cases Disposed by Juvenile Courts by Reason for Referral: 1990 to 2004

[In thousands (1,336 represents 1,336,000), except rate. A delinquency offense is an act committed by a juvenile for which an adult could be prosecuted in a criminal court. Disposition of a case involves taking a definite action such as waiving the case to criminal court, dismissing the case, placing the youth on probation, placing the youth in a facility for delinquents, or such actions as fines, restitution, and community service. Data have been revised through 2004]

Reason for referral	1990	1995	1996	1997	1998	1999	2000	2001	2002	2003	2004

#### Table 335. Child Abuse and Neglect Cases Substantiated and Indicated— Victim Characteristics: 1990 to 2005

[Based on reports alleging child abuse and neglect that were referred for investigation by the respective child protective services agency in each state. The reporting period may be either calendar or fiscal year. The majority of states provided duplicated counts. Also, varying number of states reported the various characteristics presented below. A substantiated case represents a type of investigation disposition that determines that there is sufficient evidence under state law to conclude that maltreatment cocurred or that the child is at risk of maltreatment. An indicated case represents a type of disposition that concludes that there was a reason to suspect maltreatment had occurred]

NA Not available. 

1 The number of investigations includes assessments. The number of investigations is based on the total number of investigations that received a disposition in 2005. 
2 The number of Children Subject of an Investigation or Assessment is based on the total number of children for whom an alleged maltreatment was substantiated, indicated, or assessed to have occurred or the child was at risk of occurrence. 

3 Victims are defined as children subject of a substantiated, indicated, or alternative response-victim maltreatment. 

4 Includes Puerto Rico and estimates for states that did not report.
